Bob is a great friend of all the families mentioned and I'm proud of the great work he has done to keep this issue at the forefront of our attention.

THE MISSING ARE STILL REMEMBERED

Courage is to feel
The deadly daggers of relentless steel
And keep on living.—Douglas Malloch

The above words appear at the beginning of a column of mine that was published October 10, 1970.

In the body of the story I told about how Mrs. Robert Rausch of Hamburg was informed by visiting Air Force officers that her husband was missing in action in Southeast Asia.

It was the first of many stories I would write about the men missing in action in Southeast Asia and it came front and center a month or so ago when I received a letter from Donna Lee Glair, chairman of the Missing-In-Action ceremonies that will be held at the Vietnam Veterans Memorial and the Buffalo Naval & Servicemen's Park on July 6th and 7th.

In the letter Mrs. Glair asked if I would represent the Rausch family at the ceremony and place Robert Rausch's bracelet in the special case that from July 7th on will be on display at the Naval Park.

Right after notifying Mrs. Glair that I was honored by the invitation and would be there, I began thinking about an Independence Day column for July 7th.

Then I found myself thinking, "Who qualifies more for a Neighborhoods column than this band of people whom you have spent more time with than you have with neighbors."

Yes, there, have been memorable days.

There is no way I could forget the day Mrs. Barbara Rausch and Major Robert Rackley, the officer the Air Force had assigned to her case, asked me to meet them at the Statler Hilton.

At the meeting, Barbara told me that she was convinced—as were Air Force officials—that her husband had died on the day he crashed. She and Bob Rackley had fallen in love and planned to marry. They wanted me to break the news in a column because I understood the situation.

That was done and the Rackleys now live down South.

There were other unforgettable days. Like the Christmas Day when I spent some time with Mrs. Mafalda DiTommaso, who has not celebrated a holiday since her son, Robert, was shot down in 1966.

Like the time I traveled to Rochester to attend an Army-Navy Union meeting with Sue Czajkowski and her mother, the late Lee Dyczkowski, whose Air Force son, Robert, was shot down on April 23, 1966.

Then there were the tree plantings. And as I typed that last sentence I thought of the day some of Sgt. Jimmy Rozo's friends

played a special song at a tree planting in his honor in Tonawanda.

And there was the day we all marched to the White House with the families of people from other places who were missing in action in Southeast Asia.

Certainly I will never forget the lady who when asked by a TV reporter if she was refusing to concede her son was dead because of the fact that she would lose benefits, gave a strong and teary reply.

It was: "He came to me naked and with nothing and I will take him back the same way. All I want from the government is an accounting."

These days I am wearing an MIA/POW bracelet with the name of Robert DiTommaso on it. On the third finger of my left hand is a red ring with the name of Jimmy Rozo on it. And I wince when people say, "I didn't know people were still wearing those bracelets."

Yes, there are people wearing the bracelets and the rings and each veterans organization has a national committee on national and local levels that are dedicated to the cause.

As I watched reports on the hostage situation in Lebanon on TV the other night, I found myself thinking about some of the men whom many of us consider to be hostages.

Yes, the officials in Hanoi have been parcelling out the bodies of dead men just as terrorists parcel out live hostages. And often I recall Captain Dick Stratton, who came home after six and a half years as a prisoner of the Viet Cong and made a statement about the matter. He said: "If the Viet Cong would collaborate with an American inspection team, we could have an accounting within a month."

The name of Dick Stratton reminds me that I did not mention earlier that I spent many hours with his sister, Mrs. Ellen Cooper of Snyder. Ellen kept working with the other families of MIA/POW families after her brother was returned.

On the day of the march to the White House I met the father of a man who had also returned from prison camp. Others told me that the father is still one of the most active members of the National League of Families of Men Missing in Action in Southeast Asia.

The July 6th ceremony will start at 10 a.m. at the Vietnam Veterans Memorial near the Naval Park.

Bracelets with the names of 23 men from this area will be placed in a special case. After the formal ceremonies have ended, members of the Vietnam Veterans of America will keep a vigil over the case until 10:45 on Sunday, July 7th.

At 11 A.M. on July 7th, the bracelets will be moved to the park and placed in the care of Commander Richard Beck, U.S.N., (retired), Director of the Park. On Thursday, Susan Czajkowski was saying: "The case will be in Commander Beck's care until the last man whose name is on a bracelet is returned to the United States."

Of course I am looking forward to seeing all of MIA/POW people mentioned above and Christine Waz, Jimmy Rozo's sister, whom I didn't mention on July 6th. Chris was one of my main contacts for years.

And I hope that I will see some strange faces at the ceremonies. Faces that belong to other Americans who realize that the families of the men missing in action have never stopped feeling "the deadly daggers of relentless steel" as they kept on living and hoping.●

CONGRESSIONAL CALL TO CONSCIENCE

HON. BILL EMERSON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. EMERSON. Mr. Speaker, today I join many of my colleagues in the congressional call to conscience which, I am pleased to say, has become an annual occurrence in which we as Members of Congress can express our dismay and outrage at the human rights violations taking place every day against Jews in the Soviet Union. Despite our past protests and the world outcry against the treatment of these oppressed people, the situation in the Soviet Union has worsened during the past year. The emigration rate for Soviet Jews in 1984 was the worst in more than a decade, and anti-Semitic activity by the Soviet Government has increased.

At a time when relations between our Government and that of the Soviet Union are improving and a new leader has taken power there, it is important to continue pressuring the Soviets to observe the Helsinki accords and guarantee individual rights to freedom of religion, cultural practices, and emigration. All of these things that we take for granted in our own country are only dreams for millions of Jews in the Soviet Union. We must not allow ourselves to become complacent and forget others in the world who have the misfortune to live under a government that has no respect for basic human rights. Today, we all call upon the leadership of the Soviet Union to do what is right and decent and end its oppression of Soviet Jews.●

NATIONAL ENDOWMENT FOR DEMOCRACY: ONLY THE LATEST IN A LITANY OF QUESTIONABLE ACTIVITIES

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. CONYERS. Mr. Speaker, from its very inception, the National Endowment for Democracy has been riddled with scandal and impropriety. Whether it be interfering in other countries' elections, such as Panama, supporting ideologically affiliated political organizations and political parties abroad, acting as a pseudo foreign policy arm of the U.S. Government without a clear congressional mandate to do so, or violating congressional mandate by the way in which it distributes funds, NED has been a highly unjustified and duplicitous waste of the taxpayers' money.

Most recently, investigative reporters for the San Francisco Examiner, Phil Bronstein and David Johnston, have uncovered NED's activities in the Philippines. I enter into the CONGRESSIONAL RECORD their news story which appeared in Sunday's edition of that paper. The article follows:

[From the San Francisco Examiner, July 21, 1985]

U.S. FUNDING ANTI-LEFT FIGHT IN PHILIPPINES

(By Phil Bronstein and David Johnston)

At least $3 million from a U.S. fund designed to "foster democracy" around the world through development programs is quietly being spent to fight the communist insurgency in the Philippines and to cultivate political leaders there.

The money is part of a multimillion-dollar congressional appropriation to the AFL-CIO and other organizations. But details on how the funds are spent are a closely guarded secret provoking irritation both in Congress and in Manila.

The funds sent to the Philippines are intended to assist workers and farmers. Although such programs are under way, critics say the money also has become a vehicle for the United States to intervene in Philippine Affairs while bypassing the government of President Ferdinand Marcos.

The programs are paid from tax money via the private, Washington-based National Endowment for Democracy. The endowment channels the money to the Philippines through the Asian American Free Labor Institute, an arm of the AFL-CIO.

Local labor leaders in several Philippine provinces have won union elections with help from the fund; the money also assists several radio stations and publications.

A prominent Philippine opposition leader, former Sen. Jose Diokno, said the program is "worse than just a matter of intervening in our internal affairs. It is breeding further discontent."

Members of Congress and U.S. Embassy personnel in Manila have had difficulty learning details about the fund. One embassy official who made persistent inquiries was said to have been threatened with the loss of his job.

Program coordinators in the Philippines acknowledge that combatting the growing communist movement is a major objective, but insist the funds are appropriately spent to support the free trade union movement and create self-sufficiency programs for farmers and the rural poor.

The National Endowment for Democracy has critics in Congress, although its funding for the coming fiscal year was approved last week in the House. The Senate will debate the appropriation within the next few weeks.

NED is "clearly one of the most mischievous and unjustified expenditures of public funds that we've seen in some time," Rep. John Conyers, D-Mich., wrote in a letter to his House colleagues last week. Conyers tried unsuccessfully Wednesday to kill NED funding.

Conyers, who was unaware of the program's effort in the Philippines, said in his letter that NED money may be funding the AFL-CIO's political objectives in Central America and Africa.

He wrote that the law creating NED "should really be known as the Taxpayer Funding for Foreign Elections Act."

Last year, the NED-funded Free Labor Institute in Panama was found to have donated $20,000 to a candidate in that country's presidential election. Congress has since passed an amendment prohibiting political use of NED money.

The U.S. Information Agency liaison for NED, Cathy Super, said last week that she was unfamiliar with the programs in the Philippines and said the endowment resisted providing reports. NED's annual report to Congress does not specify the group's expenditures.

NED President Carl Gershman said there is no secrecy involved in the program. "We're operating in a fishbowl," he said.

NED was created in 1983 after President Reagan called for private sector efforts to strengthen democratic institutions around the world. Originally, NED funds—$18 million last year—were divided among groups set up by the AFL-CIO, the U.S. Chambers of Commerce and the Republican and Democratic national committees. Congress dropped funding for the party committees last year.

The AFL-CIO is getting the largest chunk of funding—$11.5 million—which it gives to its Free Trade Union Institute. The institute has created programs in politically unsettled areas. In Southeast Asia, the vehicle is the Asian American Free Labor Institute.

Although the institute covers all of Southeast Asia, the Philippines project "is far and away larger than anything else we've got going," said Charles Gray, the institute's executive director in Washington.

The Asian American Free Labor Institute has been active in the Philippines for 15 years, using money from the AFL-CIO and the U.S. Information Agency. But its funding for Philippine operations increased from $250,000 to $1 million in 1984 with the injection of the NED allocations. An additional $2 million was allocated last year, bringing the total to $3 million.

The program, with its base in the urban Filipino labor movement, has used the NED money to expand to all areas of the country in an attempt to undermine leftist gains in religious organizations, universities and among the rural poor.

The NED money had dramatic effects, said the institute's administrator in the Philippines, Bud Phillips, coming after the 1983 assassination of opposition leader Benigno Aquino had destabilized the country.

"If people hadn't had immediate assistance then," Phillips said, "the success of the political left in the (Philippine) trade unions would have been phenomenal. Nationally and internationally it would have been a Waterloo. Our help saved the free trade union movement here."

With only one administrator and a small staff in Manila, the institute depends on Filipino labor leaders to dole out the money to various programs. That creates political allies in a country where the average annual income is only $790.

"Some of the regional (labor leaders receiving institute money) are becoming powerful politically," Phillips said. "Imagine if you have $100,000 to give out to families in $500 chunks: Your stock goes way up, faster than the stock of any of the militant labor groups."

Institute money is distributed via one of the country's largest trade union groups, the Trade Union Council of the Philippines.

One U.S. official who has raised concerns about the effect and scope of the institute's activities is Joseph Lee, the U.S. Embassy's labor attache. Lee refused comment, but a source familiar with his efforts detailed Lee's unsuccessful attempts to get information about the institute's Philippine projects.

The source quoted Lee as saying that since the money came from U.S. taxpayers, "We have a certain obligation to see that they're used properly."

"All of a sudden it disappears into a private organization and becomes a secret," the source said. "Some of the programs are made to sound clandestine."

After Lee began to ask about the size and nature of the institute's programs, he was told by State Department officials to "lay off, it's none of your business," the source said.

AFL-CIO executives in Washington complained to Ambassador Steven Bosworth about Lee, according to the source, and threatened to have Lee removed from his job.

One of those blocking Lee's inquiries in Washington, according to several sources, was Irving Brown, the politically powerful head of the AFL-CIO's international section and an ardent anti-communist.

Brown, who visited the Philippines last year, has long been involved in AFL-CIO activities in international trouble spots, including Asia and Latin America. Some former Central Intelligence Agency agents, including Phillip Agee, have linked Brown to CIA activities.

The institute's director in Thailand was expelled late last year when the Thai government accused him of being a spy.

The institute's program in the Phillippines "follows the pattern of Latin America where AFL-CIO money was used for CIA purposes," Philippine opposition leader Diokno said. "For instance, they opened up an institute here supposedley to teach labor relations. But they teach community organizing and indoctrination, not labor tractics."

Still, over the last 15 years the institute has begun programs that even critics such as Lee endorse. They include low-interest loans, employment training, health care and farm projects.

Although some institute officials are unhappy even with the country's traditional opposition—They are the same kind of people already in power," said executive director Gray—the main enemy remains the communists, and not just those in the labor movement.

"The leftist elements (in the church) can potentially make real problems," Gray said, "and we're trying to counter that kind of thing."

The institute also has problems in Congress. Opponents are likely to renew their efforts to cut out NED financing when the appropriation request for the next two years comes before the Senate.

With board members like Henry Kissinger and Walter Mondale, NED will have powerful supporters.

But a congressional coalition of liberal Democrats and conservative Republicans has been building up steam against the endowment. The liberals are concerned about foreign meddling. The conservatives, including Rep. Hank Brown, R-Colo, worry about the money.

"Here we are cutting domestic programs right and left and at the same time putting millions in private hands to run around the world doing God knows what," said Brown's legislative assistant, Jerry Martin.●

H.R. 1555

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. LAGOMARSINO. Mr. Speaker, during the debate on H.R. 1555, the International Security and Development Cooperation Act of 1985, I was pleased to join the gentleman from New York, [Mr. GARCIA], in a short colloquy on the economic and political situation in Ecuador.

Much to my surprise and disappointment, I discovered several typographical errors in my remarks which appeared in the CONGRESSIONAL RECORD the following day. The printed text of my remarks incorrectly leaves the impression that Ecuador has not acted in a responsible manner with respect to its economic troubles. Such is not the case. The government of President Febres-Cordero has done a remarkable job to revive the economy and reduce the country's foreign debt. My remarks also indicated that Ecuador has a human rights problem. This is absolutely false. The U.S. State Department reports that Ecuador "has vigorously upheld the principles of representative rule." Further, they report "* * * there were no substantiated cases of human rights violations in 1984."

It is regrettable that these errors occurred in the transcript of my remarks.

Mr. Speaker, at this point in the RECORD, I would like to insert a copy of my letter to Ecuador's Ambassador to the United States, Mario Ribadeneira.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, DC, July 23, 1985.

His Excellency MARIO RIBADENEIRA,
Ambassador of Ecuador to the United States, 2535 15th Street, NW., Washington, DC.

DEAR MR. AMBASSADOR: I was honored to join in the debate during the House's consideration of the foreign assistance legislation regarding the economic and political situation in your country.

Your President is to be congratulated for setting a bold new direction in terms of economic and social policy.

It was with deep regret, therefore, that I discovered several errors in my printed remarks which appeared in the CONGRESSIONAL RECORD the following day. These errors could be construed in a way which reflects negatively upon your country. Such was not my intention. I have only the highest praise for your President's economic program and the government's record in the area of human rights. The facts support one inescapable conclusion: Ecuador is on the way to becoming a success story in Latin America.

With kind personal regards, I am

Sincerely,

ROBERT J. LAGOMARSINO,
Member of Congress.●

TO DESIGNATE NOVEMBER 18, 1985 AS EUGENE ORMANDY APPRECIATION DAY

HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. COUGHLIN. Mr. Speaker, today I am pleased to join with my distinguished colleague in the Senate, the Honorable JOHN HEINZ of Pennsylvania, to introduce a joint resolution designating November 18, 1985, as "National Eugene Ormandy Appreciation Day."

November 18 marks the anniversary of the birth of the Hungarian-born conductor who brilliantly led the Philadelphia Orchestra for over four decades. During his tenure as music director and conductor laureate, Mr. Ormandy developed and presented the unique and innovative "Philadelphia Sound" that soon gained international acclaim. He served the city of Philadelphia and his adopted country as a good will ambassador as he and his orchestra embarked on numerous tours of cultural diplomacy to such places as the Soviet Union, Europe, South America, and China.

For decades Ormandy was a source of pride for Philadephians as he honored and dignified the city with his leadership of the brilliant orchestra. Mr. Ormandy set a high set of standards and both he and his musicians lived up to them. By the time he stepped down—or stepped back, as he put it—Ormandy had personally handpicked every member of the orchestra.

Though he has recently passed away, Eugene Ormandy's legend lives on in his orchestra and in the hearts of Philadelphians and Americans alike. I hope my colleagues in the House will join me in declaring a national day of appreciation in honor of this great man.●

SOVIET DISINFORMATION—THREAT TO AN OPEN SOCIETY

SPEECH OF

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 17, 1985

● Mr. CRANE. Mr. Speaker, our colleague, Congressman DAN LUNGREN, is to be commended for his special order on Soviet disinformation and its effects on our society. I am pleased to be able to participate with Mr. LUNGREN and others in this special order, because I consider this to be a matter of great importance. If we fail to recognize the presence of disinformation, or fail to work to counteract it, we are leaving ourselves open to a dangerous and destructive influence. I believe it is essential to understand just what disinformation is if we are to be successful in our efforts to defend against it.

WHO CONTROLS THE DISINFORMATION NETWORK

Like all major foreign policy decisions, the ultimate approval for all use of disinformation rests with the highest level of the Soviet hierarchy, the Politburo and the Secretariat of the Central Committee of the Communist Party of the Soviet Union. The actual implementation of these decisions is carried out by a special branch of the KGB known as Service A. Service A works in close coordination with two clandestine elements of the Soviet party bureaucracy known as the International Department and the International Information Department. The fact that these two powerful party components participate so directly in Soviet disinformation activities indicates the level of importance that the Kremlin attaches to this type of operation.

Other elements of the Soviet structure are also regular and essential participants in disinformation measures. Magazines, news agencies such as TASS and Novosti, radio stations, television networks, and even the Soviet airline Aeroflot are all called upon as need arises. In the field, any KGB officer or intelligence asset can be used in the implementation of disinformation. What's more, official and quasiofficial Soviet representatives abroad often perform disinformation functions in addition to their overt or official functions. These representatives include embassy staffers, specialized Soviet missions abroad—trade, scientific, and cultural—and Soviet residents abroad—correspondents, scholars, students, and so forth.

The International Information Department is little more than the Soviet foreign propaganda machine. Its primary function is to supervise the Soviet propaganda organs such as New Times and Radio Moscow that support disinformation campaigns abroad. The IID also commonly redisseminates misleading or blantantly false reports—as in the Nigerian case mentioned above—that were originally released to local news organizations by the KGB or a KGB asset, such as an agent of influence. The purpose behind such an activity is to lend credence to claims made by Soviet leaders of widespread support throughout the world for Soviet policies. False stories receive extensive coverage and are described as having originated in independent and supposedly unbiased foreign newspapers.

The International Department, on the other hand, is the Soviet liaison with foreign Communist parties and Communist front organizations. Its mission is to convince foreign Communist parties to accept and support the official Soviet line on any number of issues that the Kremlin has chosen as priorities. Front organizations are instructed to undertake propaganda actions or political activities in support of disinformation campaigns. Some of the more well known of these front organizations are the Afro-Asian People's Solidarity Organization, the World Peace Council, and the World Federation of Trade Unions. The Soviets funnel funds to these and other front groups, and in some cases even provide administrative assistance and direct leadership.

The World Peace Council, based in Helsinki, is the largest of the Soviet front organizations, and until 1979 its financial and administrative activities were directed by Aleksandr Lebedev, a Soviet official. With affiliates in more than 130 countries, the WPC is an important instrument of Soviet foreign policy, and its directives come directly from the Kremlin. It is actively engaged in generating opposition to NATO and NATO policies in Western Europe and the United States. In fact, for the past 30 years WPC positions on virtually every important international issue have coincided exactly with those of the Soviet Union. Even the Soviet invasion of Hungary in 1956 and of Czechoslovakia in 1968 and the more recent invasion of Afghanistan have received the complete approval of the WPC.

TYPICAL DISINFORMATION TECHNIQUES

In addition to financing and directing front organizations such as the WPC, the Soviets use any number of disinformation techniques. Below is a list of some of the more common techniques used today:

Press placements.—Soviet disinformation specialists often make placements in the foreign media and either falsely attribute it using a fake or non-Soviet author or do not attribute it at all. The main function of such placements is to influence local opinion and provide grist for the Soviet propaganda mill.

Forgeries.—Soviet forgeries may actually contain some truth or they may be real documents that have been altered in some way. According to a House Permanent Select Committee on Intelligence report published in 1982, since 1975-76 the number of forged documents "known to have surfaced in foreign countries has increased from about three to four to a current count of more than twice that number per year. In some cases a Soviet role in manufacturing these documents may be uncovered by content and forensic analysis of the document, the method of surfacing the relative level of sophistication of the forgery, or its quick replay by the Soviet media."

"Friendship Societies."—Soviet friendship and cultural societies are well organized in many countries. They present themselves as nonpolitical groups designed merely to improve cultural and economic understanding and cooperation between countries. In fact, these groups are political tools that are manipulated and directed by the International Department. They allow the Soviets to reach people who might normally be reluc-

tant to involve themselves directly with local communist parties or groups that are openly pro-Soviet.

Clandestine radio stations.—The Soviets at present maintain two clandestine radio stations: National Voice of Iran (NVOI) and Radio Ba Yi. NVOI calls itself an independent station representing certain unidentified progressive elements of Iranians. Its broadcasts, as a rule, are virulently anti-U.S. and pro-Tudeh (the Soviet controlled Iranian communist party). It is actually located in Soviet Azerbeijan, although it has never revealed its exact location. Radio Ba Yi poses as a Chinese station representing Chinese political dissidents, particularly among the Chinese military. It, too, supports major Soviet foreign policy goals.

Political influence operations. Of all areas of Soviet disinformation activities, this is potentially the most difficult to trace and to deal with. The problem is that many such operations fall in what could be termed a "gray area" between an actual disinformation operation and a legitimate exchange of ideas. But according to the House Select Committee on Intelligence report, the purpose is always the same: "to insinuate the official voice of the Soviet Union into foreign governmental, political, journalistic, business, labor, artistic, and academic circles in a nonattributable or at least seemingly unofficial manner." Typically, the foreigner or agent of influence involved in the operation is not a recruited agent in the strictest sense of the word. In fact, he may be aiding the Soviet cuase unwitingly.

While the above list is far from exhaustive, it gives at least an idea of the extent of Soviet disinformation activities.

THE EFFECT OF DISINFORMATION IN OPEN SOCIETIES

It is extremely difficult to measure the effect of disinformation on an open society such as ours. But few people would dispute the fact that Soviet disinformation does have a negative impact on open political systems. Former Under Secretary of State for Political Affairs Lawrence Eagleburger described the effect as "corrosive." He stated that:

> The confusions produced by media manipulations, forgeries, calculated rumors, falsely attributed radio broadcasts, and the activities of agents of influence may, over time, weaken public confidence in political institutions and processes.

But the effects are even more tangible and immediate than the above statement would indicate. Take, for example, the Soviet involvement in the debate surrounding the "neutron bomb." Conservative estimates place the amount of money spent by the Soviets in that campaign at better tnan $100 million. But in the eyes of the Soviets, that money was very well spent. They were able to distort the public debate on the issue and divert Western attention from the huge Soviet military buildup in Eastern Europe. Had the public debate focused on the threat posed by Warsaw Pact conventional forces it is very likely that the neutron bomb would have been deployed, since enhanced radiation weapons can effectively counter the threat posed by conventional forces. Little wonder that this campaign is regarded by the Soviets as one of their most successful ever.

The strong opposition voiced in the debate regarding the deployment of Pershing II's and ground launched cruise missiles in Europe and the "nuclear freeze" movement are two additional examples of classic Soviet disinformation techniques. This is not meant to imply that those who support a nuclear freeze or oppose the Euromissiles are Soviet agents or "dupes." It does mean, however, that the thrust of Soviet disinformation on these issues has been to magnify and channel the sincere concerns of non-Communist critics of the official policies of Western governments. Through front organizations the Soviets have funneled huge sums of money to many freeze or antinuclear groups, thus making them unwitting allies of the Soviets. Legitimate concerns are lost in the confusion and uproar so adroitly encouraged by the Soviets.

What is disturbing in all this is the fact that the Soviets are able to participate in the West's public debate on the implementation of defense measures needed to counter the threat posed by the Soviets themselves. And herein lies the problem: our system allows for freedom of expression and open debate whereas the Soviet system does not. In fact, the Soviets actually bombard their own people on a daily basis with an unending stream of propaganda.

Obviously, Soviet disinformation in the United States and other advanced states has had to be more subtle than in most Third World countries. As stated above, the ideas promoted in disinformation campaigns, as dangerous as they might be, often fall into a gray area somewhere between blatant disinformation and the legitimate and healthy interplay so fundamental to a democratic system. The question is, How should we react when allies of a totalitarian system or agents of that system attempt to use the freedoms guaranteed by our system to influence our public debate? The issue becomes all the more important when the subjects being debated are so vital to our national security.

HOW TO COUNTERACT SOVIET DISINFORMATION

The quickest, most effective way of ensuring that the Soviets will be unable to participate further in the legitimate exchange of ideas in this country would be to merely limit the freedom of expression itself. But this is obviously not the answer. We cannot allow our freedoms to be restricted because of Soviet intervention. Actually, the contrary is true; what is needed is increased investigation, more information, and more publication of the truth. Persistent and determined efforts to expose in as accurate a way as possible all Soviet uses of disinformation will make citizens of this and other Western countries aware of the nature of the threat.

Some experts have described the Soviet use of disinformation as analogous to an infection: it thrives in the darkness but can be quickly cured if exposed to sunlight. Surely Soviet disinformation is very similar. As it becomes more and more embarrassing and costly in terms of international public opinion to employ such deceptive and hostile techniques, their use will gradually dwindle. We must resolutely expose disinformation operations and protect ourselves from them by removing from our society the foreign instruments responsible for them.

As Under Secretary Eagleburger has stated:

> The soundest response to the Soviet use of (disinformation) is to keep our balance. It is as unwise to ignore the threat as it is to become obsessed with the myth of a super Soviet conspiracy manipulating our essential political processes.

For now, at least, it appears that the Soviets are committed to the use of disinformation as an instrument of their foreign policy. The massive bureaucracy that has been created and the quantity of funds spent tend to indicate that this problem will be with us for some time to come. Logic would dictate, then, that the West must do all that it can to keep its citizens as fully informed as possible of the deceptive practices to which they are likely to be exposed. Only in this way can the threat posed by Soviet "dezinformatsia" be effectively countered and contained.●

HOUSE OF REPRESENTATIVES—*Wednesday, July 24, 1985*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

We pray, O God, for all those to whom great responsibility has been given. May Your guiding and comforting spirit be with the women and men who have been chosen to lead our Nation in the paths of peace. Give them wisdom to understand Your will and the strength to lead lives of service. Bless the Members of this assembly and their families. Keep them ever in Your grace, and may Your abiding love never depart from them. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 2370. An act to amend the Public Health Service Act to extend the programs of assistance for nurse education; and

H.R. 2409. An act to amend the Public Health Service Act to revise and extend the authorities under that Act relating to the National Institutes of Health and National Research Institutes, and for other purposes.

ELIMINATING THE SYNTHETIC FUELS CORPORATION

(Mr. SYNAR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SYNAR. Mr. Speaker, in a matter of hours, we are going to have a unique opportunity, for today, we will be voting on the Interior appropriations rule which has turned out to be the decision on whether or not we will continue the Synthetic Fuels Corporation.

The vote is not a small vote. It is a vote for $6 billion, one of the largest individual budget cuts this Congress will face this year.

Ladies and gentlemen, the Synthetic Fuels Corporation in this country has been a failure. It is the most wasteful and unproductive agency in our Federal Government. I hope that my colleagues will take this opportunity to end the Synthetic Fuels Corporation later today by overturning the rule and allowing us a vote on this very important issue.

ENDING THE SYNTHETIC FUELS CORPORATION

(Mr. BLILEY asked and was permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BLILEY. Mr. Speaker, today we will be taking up H.R. 3011, the Interior and related agencies' fiscal year 1985 appropriations bill.

I am speaking today to urge my colleagues on my side of the aisle, as the distinguished gentleman from Oklahoma [Mr. SYNAR], my friend, just urged Members on his side, in a bipartisan effort to vote against the rule, to vote against the rule to make in order an amendment that would allow the rescission of all but $500 million from the Synthetic Fuels Corporation.

The Synthetic Fuels Corporation has compiled a record of inaction, excessive salaries and pensions and has not brought the commercialization of synfuels 1 day closer to reality.

If the Congress does not act swiftly, billions of dollars may be obligated by the Synthetic Fuels Corporation without any congressional review. The full House should have the opportunity to vote on the rescission of synfuels.

The vote last year shows that most Members favor rescission. Rescinding money from the synthetic fuels fund in an appropriations bill is the only way, the only sure way to force the other body to deal with the synthetic fuels issue.

PAY EQUITY

(Mr. GARCIA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GARCIA. Mr. Speaker, we pride ourselves of being part of a nation which places great importance on fairness and equity. As a nation we have come a long way to correct unfairness in our society, but as they say, we have a long way to go.

Pay equity is an issue of discrimination which we, as legislators, must try to resolve. Discrimination is ingrained in the existing wage system of our Federal Government and it is hurting American women, especially those in the lower rung of the pay scale.

Many cities and States have taken a lead in implementing pay equity policies to eliminate wage discrimination in the local and State governments. Should not the Federal Government examine its own wage system, and follow the example being set by such cities and States?

The Federal Government is the largest employer of women, but the majority of the women employees are at the lower end of the pay scale. Those who argue against pay equity say that our market system placed women in particular job fields which just happens to pay less than the job fields dominated by men. However, most women are in the lower paying jobs because those jobs traditionally held by women have been under valued.

Many argue against pay equity contending that it will cost too much. Must we let the forces of free market go uncontrolled? Further, on the issue of costs to implement pay equity—should we not place equity and justice above and beyond monetary value?

We must start taking action to assure that the Federal Government examines its wage system to eliminate wage discrimination. It's our job, and it's our responsibility.

COMPARABLE WORTH

(Mr. ARMEY asked and was given permission to address the House for 1 minute.)

Mr. ARMEY. Mr. Speaker, one of the things we must always keep in mind is the fact that as the Federal Government enters the labor force, hiring labor, it must compete with the market across the economy, with the private sector. The fact of the matter is the market differentiates between different occupations and jobs by assigning them different wages.

People in this country are guaranteed, and this Government has done a great deal to assure, the right to freely make their occupational choice. As a result of those choices, people of similar circumstance and preference find themselves collected into different kinds of occupations at different wage rates. As we recognize this, the thing we must never forget is the individual American has the right and exercises the right to choose the job to which they will apply.

Our job as a government is to guarantee their right to access to employment, to guarantee them equal pay for equal work. We have been doing a good job of that and nobody is complaining of our failure to do so.

The largest voice in America for that right has been the women of America

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

arguing for equal pay for equal work and they have, in recent years, made significant progress. Today now, we entertain the possibility of a law that will stall that progress and diminish the willingness and the ability of women to move to nontraditional occupations. It is called variously pay equity or comparable worth. But the upshot of it is for the Government to override the market, to establish a system of Government fiat wage determination that will totally disregard the ability of the market to differentiate between occupations, and the rights of individuals to choose those occupations most advantageous to their individual sense of value and purpose.

IN SUPPORT OF PAY EQUITY

(Ms. KAPTUR asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. KAPTUR. Mr. Speaker, the Committee on Post Office and Civil Service will mark up H.R. 3008 today. I would urge my colleagues to keep an open mind on the issue of pay equity—at least until the committee finishes its work and brings a bill to the floor. There are those who are putting out much misinformation on this legislation. I would urge my colleagues to consider the facts.

H.R. 3008 simply calls for a study of the Federal pay and classification system to determine if discrimination exists based on sex, race, or ethnic origin. A study, Mr. Speaker, only a study. What are opponents of this legislation afraid of? I believe their confusion stems from circumstances which occurred in the State of Washington. When one looks into the situation there, it becomes clear that enormous sums required to implement pay equity in that State stem, not from the job evaluation study, but rather, from a court decision awarding back pay.

Mr. Speaker, all but five of the States have addressed this issue. Some 39 have done research, while 22 are currently conducting evaluations of the pay classifications of State employees. In addition, seven States are implementing pay equity adjustments as a result of such studies. These States include: Idaho, Iowa, Wisconsin, Minnesota, New Mexico, South Dakota, and Washington. In my home State of Ohio, we have conducted a pilot job evaluation study, done extensive research in this area, and established a task force on the issue.

Given that a recent GAO study found that federally employed women earn an average of 62.8 cents for every dollar earned by federally employed men, I believe this proposal for a study deserves our serious consideration.

TRIBUTE TO DR. CAROLYNE K. DAVIS

(Mr. PURSELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PURSELL. Mr. Speaker, today I'd like to recognize one of the most outstanding members of the Reagan administration, Dr. Carolyne K. Davis, who is announcing her decision to end her long and distinguished leadership of the Health Care Financing Administration.

Dr. Davis held that post longer than any other administrator. I think it has been obvious to all who have observed her work that the taxpayers and all of us in Congress have been fortunate to have her leading such an important and sensitive agency.

Dr. Davis is a long time associate of mine, and I'm proud to call her my friend. She is a former vice president of the University of Michigan, and her list of academic, professional, and personal accomplishments cannot be listed in such a brief comment. It is sufficient to say that Carolyne Davis is one of the most brilliant and able people I have ever known.

□ 1010

On behalf of my colleagues, particularly Congressman MICHEL, Congressman BROYHILL, Congressman GEORGE O'BRIEN, Congressman EARLY, and I am sure Congressman BOLAND, and others, we will miss her here and hope she returns to help this great Nation in some deserving capacity.

LET US VOTE ON DAVIS-BACON REFORM

(Mr. RAY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RAY. Mr. Speaker, I rise today to express my strong hope that this House will be given the opportunity to vote on the Davis-Bacon reform language which was added by the Senate to the Defense authorization bill. We will probably complete action on the DOD conference report before we recess next week, and I urge the conferees to allow the full House to vote on this important issue.

The Davis-Bacon Act was enacted in the 1930's, during the Great Depression, and requires that locally prevailing wages be paid on Federal contracts. The definition of "locally prevailing wages" was not specifically set out in the law, and, since the 1930's, the well intentioned Davis-Bacon requirements have produced a needless paperwork burden, particularly on small businesses. They have encouraged high unemployment rates in many places, especially in rural areas, and they have added more than $1 billion to Federal construction costs.

The House has never voted on Davis-Bacon reform, only on repeal and exemption. Now is the time, however, to review this out-of-date provision of the law and to improve it. I believe that this action will remove barriers to small business participation in the contracting process and will result in more jobs, reduced paperwork, and a lower Federal deficit.

AMERICAN HELD HOSTAGE IN LEBANON 444 DAYS

(Mr. O'BRIEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. O'BRIEN. Mr. Speaker, Friday will be the 444th day since Rev. Benjamin Weir was taken hostage by gunmen on the streets of Beirut.

Four hundred and forty-four days. The same number of days the American Embassy was held hostage in Iran 5 years ago.

Four hundred and forty-four days. That's 1 year, 2 months, and 3 weeks.

Not since May 1984 has Reverend Weir had any contact with the outside world. The Red Cross has never visited Reverend Weir.

Another American, William Buckley, will have been held hostage 500 days next Monday.

Sunday will mark the 200th day my good friend, Father Lawrence Jenco, has been held hostage in Lebanon.

Today is the 130th day of captivity for Terry Anderson, the Associated Press bureau chief in Beirut.

Today is the 57th day of captivity for David Jacobsen of Huntington Beach, CA.

Thomas Sutherland, of Fort Collins, CO, was kidnaped by Muslim gunmen on June 9, 6 days before TWA flight 847 was hijacked. Today is the 44th day Sutherland has been held hostage.

Today also marks the 232d day since the disappearance of Peter Kilburn of San Francisco, CA.

Mr. Speaker, what's the difference between an American Embassy being held hostage in Iran for 444 days and an American citizen being held hostage in Lebanon for 444 days? The hostage crisis is not over.

GASOLINE PRICE TYRANNY OF THE OIL COMPANIES DESPITE DECLINE OF CRUDE OIL PRICES, PRICE OF GASOLINE AT THE PUMP IS GOING UP, NOT DOWN

(Mr. OBERSTAR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. OBERSTAR. Mr. Speaker, pity the poor oil companies. They've had to raise the price of gasoline to boost their sagging profits. Yesterday, five

oil companies reported over $2 billion in profits for the second quarter of this year.

A worldwide glut of crude oil has triggered a continuing decline of crude oil prices over the last several months. Yet, consumers have seen the price of gasoline at the pump go up, not down.

The free marketeers have always argued that ending Government controls would stimulate increased crude oil production, which, in turn, would drive retail gasoline prices down. That, perhaps, is what should happen in a free market; but it hasn't. On the contrary; the oil companies have suspended the laws of competition and the marketplace. They have used their virtual monopoly position as processors to reduce the production of gasoline, artificially driving up its price and their profits.

In the process, they have denied consumers any share in the economic benefits of conservation, which should have resulted in financial savings for consumers. Instead, deregulation of crude oil controls and gasoline prices has become a Trojan horse for taking the public interest out of gasoline pricing and substituting for it the profit tyranny of the oil companies.

REPUBLICANS 9, DEMOCRATS 3

(Mr. COATS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COATS. Mr. Speaker, for those of our colleagues who have not yet heard and for the millions of Americans who were not able to pick up their sports page this morning to find out the results, let me just report: Republicans 9, Democrats 3.

THE OUTRAGEOUSLY WASTEFUL SYNTHETIC FUELS CORPORATION

(Mr. WOLPE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WOLPE. Mr. Speaker, I rise to urge my colleagues to vote "no" on the rule for consideration of the Interior appropriations bill. This is more than a procedural vote.

By defeating the rule, we will have the opportunity to prevent the outrageously wasteful Synthetic Fuels Corporation from squandering $6 billion.

The supporters of the SFC will no doubt make references to Khomeini and Qadhafi and the threat of future oil embargoes. Their concern is well-founded but the SFC is not the answer. To the contrary, allowing the SFC to waste $6 billion will only make us more vulnerable.

I urge my colleagues to take a close look at the SFC's abominable record and its very dim prospects for future success. If you do so, you will conclude that allowing the SFC to continue with its grandiose spending plans will not add to our security.

It will diminish our security and add only to our Federal deficits.

I strongly urge our colleagues to vote "no" on the rule today.

LET'S HEAR NO EXCUSES, MR. SPEAKER

(Mr. PORTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PORTER. Mr. Speaker, it appears all but certain that Congress will recess next week without writing a budget. Once again, our kids will pick up the bill. While we're out on recess, the Government will run up another $20 billion in debt. That will cost each child, over a lifetime, an extra $1,000 in taxes. That's quite an expensive vacation we're taking.

The American people don't want to hear any excuses, Mr. Speaker—from you or any of us—about why we couldn't reach an agreement. I know why. It's because you insisted on your spending increases. Had you been willing to accept an across-the-board freeze, plus some fairly applied cuts, I have a hunch we would have a compromise budget.

As it is, Mr. Speaker, you will have an obligation to this Congress—and, more important, to America's children—to come up with a $56 billion deficit reduction package. In hard numbers. With binding reconciliation.

If you can't, it's because you won't. And don't blame anyone else but yourself.

WE MUST VOTE "NO" ON INTERIOR APPROPRIATIONS RULE

(Mr. SHARP asked and was given permission to address the House for 1 minute.)

Mr. SHARP. Mr. Speaker, today we will have one of the most important opportunities we will have in this session of Congress to cut future deficits by as much as $6 billion. But to get that opportunity we must vote "no" on the Interior appropriations bill.

Mr. Speaker, ladies and gentlemen, the Synthetic Fuels Program, as administered by the Synthetic Fuels Corporation, cannot be justified by the energy picture we are facing, it cannot be justified by the performance of the Synthetic Fuels Corporation, it cannot be justified in the face of the massive deficits that we are going to be seeing for the next several years.

If we are not willing to cut the pork barrel and cut the Synthetic Fuels Program, when I think Members of the House are going to have to be willing to raise taxes.

ONE OF THE WORST BOONDOGGLES IN THE HISTORY OF THIS COUNTRY—SYNTHETIC FUELS CORPORATION

(Mr. DREIER of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DREIER of California. Mr. Speaker, as the unfortunate stalemate over the budget continues, we have seen by these 1-minutes this morning that there is going to be a great opportunity for Democrats and Republicans alike to lay the ground work to cut up to $6 billion from future deficits by attempting to eliminate one of the worst boondoggles in the history of this country. I speak of the Synthetic Fuels Corporation.

To do that we must vote "no" on the Interior appropriations rule. I urge my colleagues to do just that.

□ 1020

COSPONSOR LEGISLATION TO REMOVE THE SO-CALLED PHANTOM TAX

(Mr. BOSCO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOSCO. Mr. Speaker, with all the concern in Congress over tax fairness, I am sure my colleagues will be interested in a startling new report issued today by the Environmental Action Foundation.

Last year, the Nation's 125 largest electric utilities billed their ratepayers for $7.4 billion in Federal taxes that the utilities did not end up paying the Government. This so-called phantom tax occurred due to provisions of the 1981 Tax Act that allow utilities to charge customers for taxes without passing on benefits the utilities received under the act.

In my area of northern California, the Pacific Gas & Electric Co. was No. 1 in the Nation, charging customers $497 million for taxes last year—yet the utilities tax form showed it actually received a $29 million tax refund for the same period.

Industrial and residential customers paid on the average $33 in higher electric bills in 1984 due to the phantom tax, and the total indirect and direct costs to households exceeds $100 annually.

Mr. Speaker, this multimillion-dollar slight of hand is an unfair tax on all American consumers and businesses. I urge my colleagues to join with Messrs. DORGAN, PEASE, STARK, and myself in cosponsoring legislation to remedy this unfairness in our tax laws.

DIVORCE OURSELVES FROM "CONSTRUCTIVE ENGAGEMENT"

(Mr. MILLER of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MILLER of California. Mr. Speaker, under the guise of an emergency order, the Government of South Africa has once again unleashed state sponsored repression.

South Africa is a country where you can be jailed for objecting to repression, arrested for reporting repression, and hanged for fighting repression.

The goal of the mass arrests and the denial of civil liberites is simple: to silence the demands of the black majority for an end to apartheid

Both Houses of Congress have passed legislation condemning apartheid and halting U.S. economic support to the Nation that promotes it.

But the administration opposes taking real action. The administration insists on its policy of "constructive engagement."

Mr. Speaker, I believe I speak for the majority of this House, and the majority of Americans, when I say:

"We do not want to be "engaged" to apartheid in any fashion.

"We must divorce ourselves from apartheid and from the police-state that enforces it."

TWO "NO" VOTES REQUIRED TO STOP SYNFUELS

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, we have a couple of actions before us today. I join with my colleagues who want us to defeat the rule with regard to the Interior appropriations, but I suggest to those people who are concerned about Synfuels that they had better also defeat the measure with regard to the Budget Procedures Act.

Because if we allow the Budget Procedures Act question to go through, what could happen is that that Interior appropriation bill could come to the floor; they would have the provision in there that points of order could be made against the legislation in an appropriations bill, but nevertheless the Interior appropriations bill could be brought to the floor under the Budget Procedures Act.

I would suggest to all those people who are concerned about doing something about Synfuels, if you really want to cast votes that are aimed at reducing the deficit, you have got to vote against both the Budget Procedures Act and the rule on the Interior appropriations bill to get to this problem.

If you do only one, you will set up a scenario whereby the Interior appropriations bill could come to the floor and we would not be able to touch the Synfuels Corporation.

So I say to my colleagues, you have got to vote against both the Budget Procedures Act and the Interior rule in order to get at Synfuels. Otherwise, you are going to set a scenario whereby the process could go forward and we would not get to vote on the $6 billion for Synfuels.

DISMISSING THE ELECTION CONTEST AGAINST BEN BLAZ

Mr. JONES of Tennessee. Mr. Speaker, by direction of the Committee on House Administration, I call up a privileged resolution (H. Res. 229) dismissing the election contest against BEN BLAZ, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 229

Resolved, That the election contest of Antonio Borja Won Pat, contestant, against Ben Blaz, contestee, relating to the office of Delegate from Guam, is dismissed.

The SPEAKER. The gentleman from Tennessee [Mr. JONES] is recognized for 1 hour.

Mr. JONES of Tennessee. Mr. Speaker, I yield 30 minutes, for the purpose of debate only, to the gentlewoman from Nevada [Mrs. VUCANOVICH], and pending that, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 229 is a resolution to dismiss the election contest regarding the position of Delegate from the Territory of Guam.

Under the U.S. Constitution and the rules of the House, the Committee on House Administration is charged with the responsibility for investigating contested elections.

On July 10 the Committee on House Administration, by unanimous voice vote, directed me to bring to the floor this resolution dismissing the election contest of Antonio Won Pat against BEN BLAZ.

Pursuant to the Rules of the committee, Chairman ANNUNZIO established a task force to examine the documentary record, and to receive oral arguments from contestant and contestee. I chaired the task force, serving with me were Mr. GEJDENSON and Mr. BADHAM.

After presentation of oral arguments, and examination of the record, the task force determined that the contestant did not meet his burden of presenting sufficient documentary and other evidence to warrant further proceedings. The task force then unanimously recommended dismissal of the contest, and the committee also by unanimous vote, ordered this dismissal resolution reported to the House.

Although contestant Won Pat raised a number of issues regarding the administration of the election, which the committee hopes will be addressed by the Guam Election Commission before the next election, the committee concluded that the issues raised were not sufficient to overturn the outcome of the election. The initial count of ballots, and two subsequent recounts, provided contestee BLAZ with a winning margin of approximately 350 votes out of 31,000 cast.

The two principal issues raised by contestant were the late mailing of absentee ballots, and an interpretation by the Guam Election Commission of the election statute. Let me first address the absentee ballot question.

The task force found that no absentee ballots were sent out until October 16, 1984. Thereafter they were sent out as applications were received, right up to the week before the election.

The voters were instructed to return the absentee ballots as soon as possible, and were also instructed that absentee ballots received after election day would not be counted. Nearly two-thirds of the ballots sent out were returned by election day, and were included in the final tally. Late arriving ballots were not counted.

Given the late date on which absentee ballots were sent out, 21 days before the election compared to the 45 days recommended by the Voting Assistance Office of the Pentagon, some voters may not have been able to timely return their ballots. The committee hopes that the Guam Election Commission will establish procedures for future elections which allow substantially more transit time than was provided in the last general election, so as to avoid the possible disenfranchisement of overseas voters. Nevertheless, the committee does not believe contestant's claim requires that the election be invalidated. Invalidating an election is a radical step. There is no reason for believing that delay in sending out the absentee ballots had an impact on the result of the election. If there were a problem the contestant should have sought relief before the election.

The contestant's second contention is that blank ballots and overvotes should be included in the total number of "votes cast." That would deprive contestee of the absolute majority, required by the Guam statute.

In interpreting a similar statutory provision governing elections in the Virgin Islands, a Federal court of appeals rejected the argument that such ballots should be included in the total of votes cast. The committee found the court's reasoning to be persuasive and affirmed the decision of the Guam Election Commission.

The committee reviewed the other arguments put forth by contestant, but found that the various issues raised were not, individually or collectively, sufficient to change the result of the election.

Consequently the committee recommends that the House adopt the resolution dismissing the election contest.

□ 1030

Mr. BADHAM. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the resolution. As was stated by the gentleman from Tennessee, the task force met and heard oral arguments from the counsels for both parties and in a later meeting voted unanimously to dismiss the contest.

Briefly, Mr. Speaker, the contestant's allegations were that the rights of absentee voters were deprived by acts of election officials and that the contestee did not receive a majority of the votes cast in this election. Additionally, the contestant raised certain other allegations of irregularities in the Guam election process.

First, the allegation was made that the low rate of return of the ballots was because the first ballots were not mailed to the absentee voters until October 16 and that the mailing of the absentee ballots were not completed until October 31. Therefore, there was not enough time to complete and return the ballots in a timely manner. Counsel for the contestee presented the task force with an affidavit from the employee of the Guam Election Commission who spoke with the Postal Service representative who had advised her that if the absentee ballots were sent out by October 21 and if they were expeditiously returned by the voter the ballots should be back in time to be counted in the general election. In addition, Mr. Speaker, the absentee voter was advised several times within the absentee mailing to return the ballot immediately.

The contestant's second allegation that the contestee did not receive a majority of the votes cast. They contend that the "majority" must be computed to include ballots cast that were marked for both candidates—overvotes—or neither candidate—blank ballots. Further, the contestant believes that the absentee ballots which were postmarked prior to November 6, but received after the close of the polls are "votes cast."

Mr. Speaker, there was a similar case decided in 1982 in an election for Governor and Lieutenant Governor of the Virgin Islands. The court was faced with the issue of whether blank and spoiled ballots should be counted in determining the majority of the votes cast. In the Totman versus Boschulte opinion, the Court quoted an earlier decision (*Euwema* v. *Todman*, 8 V.I. 224 (D.V.I. 1971)) which stated that "The proper basis for computing a majority" was that "voters not attending the election or not voting on the matter submitted are presumed to assent to the expressed will of those attending and voting and are not to be taken into consideration in determining the result." Additionally, the Guam Election Commission legal counsel advised the commission of a legal opinion written 2 years ago that blank ballots and those with voted too many should not be counted.

Mr. Speaker, I don't believe it is necessary to take any more of the House's time on the resolution and would urge its adoption.

Mr. JONES of Tennessee. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. JONES of Tennessee. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the resolution just agreed to.

The SPEAKER pro tempore (Mr. GRAY of Illinois). Is there objection to the request of the gentleman from Tennessee?

There was no objection.

PROVIDING SPECIAL BUDGET PROCEDURES FOR FISCAL YEAR 1986 CONGRESSIONAL BUDGET PROCESS

Mr. DERRICK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 231 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 231

Resolved, That, for the purposes of the provisions of the Congressional Budget Act of 1974 (Public Law 93-344), as they apply to the House of Representatives, the Congress shall be considered to have adopted H. Con. Res. 152, revising the congressional budget for the United States Government for the fiscal year 1985 and setting forth the congressional budget for the United States Government for the fiscal years 1986, 1987, and 1988, as adopted by the House on May 23, 1985. For the purposes of this resolution, the allocations of budget authority and new entitlement authority printed in the Congressional Record of July 23, 1985 by Representative Gray of Pennsylvania, shall be considered as allocations made pursuant to section 302(a) of the Congressional Budget Act of 1974 (Public Law 93-344).

SEC. 2. This resolution shall cease to apply upon final adoption by the House and the Senate of a concurrent resolution on the budget for the applicable fiscal year or years.

The SPEAKER pro tempore. The gentleman from South Carolina [Mr. DERRICK] is recognized for 1 hour.

Mr. DERRICK. Mr. Speaker, I yield the customary 30 minutes, for the purpose of debate only, to the gentleman from Ohio [Mr. LATTA], and pending that, I yield myself such time as I may consume.

Mr. Speaker, yesterday, the Committee on Rules reported House Resolution 231, providing special budget procedures for the fiscal year 1986 congressional budget process. This is a matter of original jurisdiction for the Rules Committee. House Resolution 231 provides that the House-passed budget resolution for fiscal year 1986, House Concurrent Resolution 152, will be considered to be adopted by the Congress for purposes of the Congressional Budget Act, as it applies to the House of Representatives. House Resolution 231 states that the allocation of spending totals among House committees printed in the CONGRESSIONAL RECORD of July 23, 1985, by Representative GRAY, chairman of the Budget Committee, will be considered as the allocation required by section 302(a) of the Budget Act. Finally, Mr. Speaker, if the two Houses agree on a budget resolution for fiscal year 1986, the provisions of House 231 would cease to apply.

Mr. Speaker, the Budget Act was created in order to allow Congress to set some overall limits on spending and revenue and to set priorities for the way that funds would be spent. To make sure that these limits have some real meaning, that all of the pain we go through in adopting a budget resolution actually will help to control spending and revenues, section 303 of the Budget Act provides that spending and revenue legislation cannot be considered unitl Congress has agreed on those overall limits in a budget resolution. You cannot very well enforce limits on spending if you have already spent most of your money before you decide on those limits. Of course, the Budget Act also requires that the budget resolution be adopted by May 15.

But here we are on July 24, with no budget resolution agreed to. I am a member of the conference committee on the budget, and I can assure you that we have tried mightily to produce a budget agreement, but so far it has been beyond our power. I still hope that we will reach agreement, but we do not have one now and I cannot honestly say that one is just around the corner.

This means we are faced with a dilemma. We simply cannot afford to wait any longer to move forward with consideration of the 13 general appropriation bills and other spending legislation. If we delay any longer, we are simply insuring that the Government will be funded by a massive continuing resolution. The business of the Government must move forward at some point, even if we have not been able to

agree to a budget resolution. On October 1, funding for most of the Government stops, regardless of the status of the budget resolution. On the other hand, we cannot afford simply to throw up our hands and surrender to the $200 billion deficits facing us and give up the constraints provided by the Budget Act.

The resolution before us today offers a compromise solution to this dilemma. The solution is not perfect. A perfect solution would be that we have a budget resolution in place which eliminates the deficit. But this resolution allows the House to move forward with the business of providing funds for the Government, while imposing the constraints of the only budget resolution we have: The budget passed by this House on May 23. This resolution will allow the appropriation bills and other spending bills to move foward without waivers of the Budget Act, but it will activate all of the enforcement provisions of the Budget Act to ensure that these bills stay within the limits that this House agreed to in its budget resolution.

If House Resolution 231 is adopted, the regular scorekeeping procedures will be set in motion. Members will have the information necessary to compare spending bills with the overall spending totals in the House-passed resolution. Chairman GRAY printed in yesterday's CONGRESSIONAL RECORD the allocations of new budget authority and new entitlement authority among House committees. The House committees, pursuant to section 302(b) of the Budget Act, will subdivide their allocations among their subcommittees or by program and report these subdivisions promptly to the House. The Appropriations Committee has this morning made available a tentative version of its 302(b) subdivisions. The subdivision to be provided today is necessarily tentative because the Appropriations Committee has not had sufficient time to meet and formally approve it. It is my understanding, however, that the final subdivision is not likely to be significantly different.

House Resolution 231 would also set in motion the reconciliation process. In effect, House Resolution 231 gives force to the reconciliation directive included in the House Resolution 231 gives force to the reconciliation directive included in House Concurrent Resolution 52, the House-passed budget resolution, which instructs 10 committees of the House to report reconciliation legislation not later than 30 calendar days after final action on the resolution. If House Resolution 231 is adopted, the 30-day clock begins running today.

Adoption of this resolution will also bring into effect the Budget Act constraints on total spending and on revenues. In accordance with section 311 of the Budget Act and the provisions of the House-passed budget resolution, beginning October 1, 1985, a point of order will lie against any measure that would cause the spending totals or revenue floor set in House Concurrent Resolution 152 to be breached.

Mr. Speaker, House Rule XLIX provides that a joint resolution changing the debt limit shall be deemed to have passed the House if Congress adopts a budget resolution which recommends a change in the statutory limit on the debt. The resolution we are considering today does not trigger this procedure. If House Resolution 231 is adopted, the House-passed budget resolution will be deemed to have been adopted by Congress for purposes of the Budget Act, but not for purposes of House Rule XLIX.

To date, Mr. Speaker, three general appropriation bills for fiscal year 1986 have been considered and approved by the House. Three more have been reported by the Appropriations Committee and are awaiting consideration by the House. Therefore, out of a total of 13 general appropriation bills, only three have cleared the House and three more are pending.

With the start of the next fiscal year on October 1, 1985, and an intervening congressional recess during the month of August, it is apparent that we are far behind in our annual appropriations process.

Mr. Speaker, we are in a predicament. The budget conference is stalled. The House must act on appropriation measures but the House should not act without the constraint and guidance offered by a budget resolution. This is our situation. I wish it were not. The best we can do, I submit, is to use the House-passed budget resolution to get the ball rolling on reconciliation, to put in motion the regular scorekeeping procedures, and to place overall limits on spending. That is what House Resolution 231 does. I urge its adoption.

□ 1040

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, let me say I rise in opposition to the resolution.

In our discussion on this issue, I think we ought to start by being honest about the nature of the resolution itself. It is, in effect, a waiver of the Budget Act. Let us get that straight. More specifically, it has the effect of waiving the requirements that final action be completed on the budget resolution before the House may proceed to consider general appropriation bills.

This resolution eliminates certain Budget Act restraints on not just one, not just two, not just three, but all—all—the general appropriation bills for fiscal year 1986.

House Resolution 231 does all this by providing that the first budget resolution for fiscal year 1986 as passed by the House will be considered to have been adopted by both Congress of the Congress. If we once accept this pretense that a budget resolution has been agreed to, then there is no need to waive points of order for lack of a real budget agreement.

Mr. Speaker, not only is this a blanket waiver of section 303(a), the Budget Act requirement that a budget resolution be in place before appropriation bills can be considered, but for the first time this year, it actually would permit spending increase amendments to be offered to general appropriation bills.

Under current procedure, even though the House may waive section 303(a) of the Budget Act against individual appropriation bills, such waivers do not cover amendment. So under current procedure, amendments cutting spending may be considered, but amendments increasing spending violate the Budget Act requirement for a final budget resolution before new spending may be considered.

However, if this resolution is adopted, there will be no prohibition under the Budget Act remaining against amendments which increase spending. This may result in moving the House toward larger deficits rather than reducing deficits. Even if the House should manage to hold the line against spending increase amendments, the fact remains that many of the so-called savings in the original House-passed budget resolution are suspect at best.

To lock the House into this position would be to run up the white flag on achieving more meaningful, real savings in its ongoing negotiations with the other body.

Mr. Speaker, to adopt this resolution now removes much of the incentive to reach a budget agreement with the other body. We should be trying to encourage agreement, rather than making it easier to get along without any final budget resolution.

Mr. Speaker, a vote for this resolution is a vote for more, not less, spending and I oppose the resolution and ask my colleagues to join me in defeating it.

As one of the conferees on the budget, let me finish my remarks by setting forth some of the differences between the House and the Senate on these issues.

As the figures will indicate, the House must come up with some hard cuts, and reconciliation instructions which will produce results. These are several areas of disagreement on real cuts. We have to get back to the negotiating table with the other body, make these real savings, get away from any puffery, and there has been some admission that there were some, on both sides—not only on this side in

the Democrat budget, but in the other body, and get this budget resolution in place.

I have heard many speeches this year and in past years about how important it is to have a budget resolution, and I believe it is important to have a budget resolution. But the only way to get a budget resolution is to get concurrence with the other body and to come to some agreement on the differences. I think the time is short for getting an agreement.

We have to lay aside some of the differences, think only about the future if we do not come to some resolution of this problem.

Let me first ask this question of the Members of this House: Without a budget resolution, are you prepared, as early perhaps as the first of October, to be voting on an increase in the debt ceiling to as high as $2 trillion—$2 trillion? That is the forecast from the Treasury Department.

I think time is late for action, and this problem deserves action. We have to be prepared in the House to make cuts in our favorite programs, and we hear about them all the time. You cannot say you cannot cut this or that, but for gosh sakes, reduce the deficit. We have to reduce the deficit, and the only way to do it is in those programs that are your pet programs.

□ 1050

No one has said during this conference that we ought to be touching the so-called poverty programs or the needs-tested programs. We have laid those aside. We have laid COLA's aside. We have taken half the cuts out of defense in the House-passed budget, and defense only represents a third of the total budget. So for any Member to come down in the well and attempt to argue, as we have heard the last few days, that we have got to take more out of defense shows a lack of knowledge of what has already been accomplished. We have got to start touching those programs which are sensitive to the Members of the House.

The time to act is now, but not the way we are proceeding here this morning by passing a resolution to waive the Budget Act on all of the appropriations bills.

I raised this question yesterday before the Rules Committee: What would be the scenario if we come back with a budget resolution and we had passed appropriations above what is called for in that budget resolution? Nobody came up with the answer. Are we going to have to repass them? Are we going to have to lay them aside? What are we going to do? Nobody seemed to have the answer.

But we are about to pass a general waiver of the Budget Act. I think if we have to have a waiver on these appropriation bills, we ought to be taking them up one at a time, not doing it with one sweep.

Mr. Speaker, I include with my remarks a table showing the differences between the House and Senate budget figures, as follows:

HOUSE OFFER VERSUS SENATE BUDGET: MAJOR DOMESTIC CATEGORIES

	Program	Senate savings in excess of House		House offer (Senate savings)	
		1986	1986–88	1986	1986–88
	Hard program savings: COLA's:				
1	Social Security COLA	6.0	22.0	0	0
2	Other COLA's	1.7	6.3	0	0
3	Subtotal	7.7	28.3	0	0
	Hard program savings: Non-COLA's:				
4	Civilian/military retirement	.5	5.9	0	.5

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 4 minutes to the distinguished chairman of the Budget Committee, the gentleman from Pennsylvania [Mr. GRAY].

Mr. GRAY of Pennsylvania. Mr. Speaker, I rise in support of the proposed rule to implement the House-passed budget resolution.

Although I am still working to reach agreement with the Senate conferees on a budget resolution for fiscal year 1986, I believe that the House must take immediate steps to implement its own budget. The House is firmly committed to a budget-reduction figure of $56 billion in deficit reductions this year, and this message can never be delivered too strongly to the other body or to the American people.

What is being asked here is not a waiver of the Budget Act but a strong enforcement of the Budget Act. The House has made some tough decisions. We have made real cuts, and in our last offer to the Senate we offered $24 billion in additional cuts. Yet our offer was rejected.

This weekend we have heard four different targets coming from the other body and from the White House. We heard $28 billion, we heard $50 billion, we heard $70 billion, and we have heard $80 billion.

While the other body and the White House are trying to come together and get a target, we have to continue with the orderly business of this Nation. That means bringing forth the appropriation bills in order to meet our deadline at the end of this fiscal year. All this resolution does is simply allow us to continue that orderly business, allow the appropriation bills to come forward, and also let the Members of this House on both sides of the aisle know that those appropriation bills are under the House-passed budget. Thus, there is a 302(b) allocation that is published, as well as 302(a) allocation.

So in essence we are not waiving the Budget Act. We are simply saying that we need to move judiciously and efficiently in the House legislatively, and what we are doing is establishing a mechanism to do that in light of the fact that we do not have a conference report. As soon as we have a conference report, it will supersede the House-passed budget, but until then this mechanism will allow us to proceed with appropriation bills and have published in the RECORD 302(a)'s and 302(b)'s so that Members will know that each of the appropriation bills is under the House-passed budget.

It is important for us to do this for two reasons. First, let us remember that last year, because the other body had another problem, we did not get a conference report until October. Thus we had to pass several appropriation bills, and often Members asked, "Can

we tell for sure that these bills are under the House-passed resolution?" The answer was, "No, you cannot tell for sure because we don't have a published 302(b) allocation."

Second, I would also remind the Members that last year, besides not getting a conference report until October, often Members were put into the position of voting for appropriation bills, and then those very same votes were used against them to imply that they broke the budget every time they voted for an appropriation bill. By voting for this House resolution, all you are saying on both sides of the aisle is that this is the budget until we have a conference report, and thus we will have a published report and know exactly where each of these appropriation bills stands in relation to the House-passed budget which was bipartisanly passed this spring.

So I would urge my colleagues to recognize that this is not waiving the Budget Act. This is enforcing the Budget Act. This is showing once again that we in the House are committed to achieving over $50 billion of deficit reductions, and if we get a conference report, we will work to implement that as well. And this chairman stands ready to go back to the conference table with the Senate as soon as they convene. But again I remind the Members that the targets keep moving.

Mr. LATTA. Mr. Speaker, I yield 5 minutes to the gentleman from Mississippi [Mr. LOTT].

Mr. LOTT. Mr. Speaker, I fear that this procedure that we are about to vote on is one more nail in the coffin of the budget process. I really hate to see that because I think that the budget process that we set up under the Budget Impoundment Act is a good idea and one that I would like to see work. It has not worked very well in restraining spending, but I would like to see us keep working at trying to make it a success.

□ 1100

Now, as far as the argument that these appropriation bills are under the House-passed budget resolution, so is the sky. I mean, there is no restraint, in my opinion under the House budget resolution, so it is not very impressive when you are told that it is under the House budget resolution.

There are a lot of angles to this budget that I would like my colleagues to consider and I will just mentioned a few of them.

I remember, though, Mr. Speaker, President Lincoln used to pose the riddle, "If you call a tail a leg, how many legs does a horse have?" And when the answer would inevitably come back, "five legs," Lincoln would respond: "No. A horse would still have four legs. Calling a tail a leg doesn't make it a leg."

I would suggest to my colleagues that this resolution suffers from the same problem. It tries to call the House-passed budget resolution the "congressional budget." But calling it so doesn't make it so. We're just horsing around with this gimmick—pulling everyone's leg, and spinning tales. And why are we going to all this trouble? Mainly so we don't have to waive the Budget Act every time an appropriations bill comes to the floor. This resolution provides a blanket waiver of the Budget Act—one, big horse blanket.

Mr. Speaker, my majority party colleagues on the Rules Committee, in collaboration with the majority leadership, have presented us with a convenient little procedure that will spare us waiving the Budget Act piecemeal as we take up spending bills. Moreover, they will argue that by adopting this resolution we are somehow preserving orderly process, and especially the budget process and the discipline that goes with it.

Unfortunately, all those representations are just plain false. This does not preserve the congressional budget process; it gives formal recognition to a new House budget process. It says, "the other body be damned; full speed ahead." You will note that this is not a concurrent resolution on budget procedures; it is a simple House resolution.

Does this preserve the discipline of the budget process? Yes and no. This will trigger the reconciliation process. Our committees that are subject to reconciliation instructions will have to report their bills within 30 calendar days. This will also kick in the overall spending limit on October 1.

But, on the other hand, this resolution will also permit amendments to be offered to appropriations bills to increase spending—something that cannot be done under existing procedures without a specific waiver of the Budget Act against amendments. So consider the fact that during this crucial stage of the appropriations process, you will be authorizing spending increase amendments by adopting this resolution.

Also consider the fact that by adopting this resolution you will be taking the pressure off the conferees to work out a final budget resolution. Why should they? This gives them everything the House voted for.

In conclusion, Mr. Speaker, let me caution my colleagues to think before you vote. Think about what this resolution really does. Think about the precedent you are setting in converting the congressional budget process into a House budget process. Think about the harm you are doing to bicameralism and budgetary compromise by calling the House budget a congressional budget. Think about the damage you are doing to the prospect of achieving real savings in the area of $50 billion if you threaten a House-Senate compromise on a savings package and settle for the limited savings in the House-passed resolution that the other body might agree to.

I would submit that when you get done thinking about these larger issues, you just might be willing to join with me and set aside the temporary comfort and convenience this resolution might offer, and stick with existing procedures. We already have a budget process. Let's make it work. Defeat this resolution.

Mr. ROEMER. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Louisiana.

Mr. ROEMER. Mr. Speaker, I appreciate the gentleman's statement.

Assuming that the gentleman is concerned about the deficit, jobs in Mississippi and jobs in America, I make that critical assumption.

The SPEAKER pro tempore. The time of the gentleman from Mississippi [Mr. LOTT] has expired.

Mr. LATTA. Mr. Speaker, I yield 1 additional minute to the gentleman from Mississippi.

Mr. LOTT. Mr. Speaker, I thank the gentleman and I yield to the gentleman from Louisiana.

Mr. ROEMER. Mr. Speaker, I thank the gentleman for yielding.

If that is true, the deficit being critical, how would the gentleman reduce the deficit? The gentleman is not for Social Security cuts, he is not for any cuts in defense, he is not for any new taxes. I just ask the gentleman, as a responsible legislator with whom I share much in common and of whom I have a high regard, it seems to me that our colleague, the gentleman from Pennsylvania, is trying to put a budget on the House floor. What might we do constructively to help that?

Mr. LOTT. Well, Mr. Speaker, I would like to answer that question.

First of all, under the agreements that have been tentatively reached, I think we have already agreed to defense spending reductions in excess of $22 billion, and where we make those savings are in nondefense discretionary domestic appropriated accounts across the board, freeze them across the board. There are a lot of them that could be eliminated or cut further.

But the gentleman from Pennsylvania is trying to move in that direction and I think the conferees can make progress; but let us not take the pressure off them to make that progress by passing this resolution.

Mr. GRAY of Pennsylvania. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Pennsylvania.

Mr. GRAY of Pennsylvania. Mr. Speaker, I would say to the distinguished gentleman from Mississippi, with regard to taking pressure off the conference, in fact this does just the opposite. It puts pressure on the conferees.

The SPEAKER pro tempore. The time of the gentleman from Mississippi [Mr. LOTT] has again expired.

Mr. LATTA. Mr. Speaker, I yield 1 additional minute to the gentleman.

Mr. LOTT. Mr. Speaker, I yield to the gentleman from Pennsylvania.

Mr. GRAY of Pennsylvania. Mr. Speaker, I would say to the distinguished gentleman from Mississippi that just the opposite is true. Today there are reports in the media that the Senate is talking about not operating with a budget at all in 1986. The other body is talking about no budget.

Mr. LOTT. Well, Mr. Speaker, if the gentleman will allow me to respond to that particular point, that information is not correct. My colleagues in the other body are going to work further with the gentleman from Pennsylvania and make progress.

Mr. GRAY of Pennsylvania. Well, I hope that is true, but it seems to me that what we are doing in this simple resolution is putting in place a mechanism so that we can show clearly that we are prepared to enforce the savings in the House budget until such time as we get a conference report.

I want the gentleman to know that I want to keep the pressure on. I think this is the mechanism to keep the pressure on, because it says that the House is going to achieve over $50 billion worth of savings and the Senate, I am hopeful, will be able to do that, so I would simply say to my colleague that it does not take the pressure off.

Mr. LOTT. Well, what kind of pressure is it when we say, "All right, Appropriations, go ahead and do your deal and we will worry about the budget resolution later"?

Mr. GRAY of Pennsylvania. Well, let me just give the gentleman the answer by going to the opposite. You have to approve individual waivers.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the gentleman from Texas [Mr. FROST].

Mr. FROST. Mr. Speaker, my friend, the gentleman from Mississippi, made a comment a moment ago about another nail in the coffin of the budget process.

I would only point out to my friend, the gentleman from Mississippi, that as a member of the conference committee on this matter, I can tell the gentleman that it is the other body that has broken off the negotiations, that it is the other body that has proceeded to apply nails to this particular matter, not this body. It is the other body that has refused to come back with another offer at this point.

I hope that they will. I hope the other body will come forward this week, but I do not think that we can point the finger at Members on this side of the aisle or this House for having broken off the negotiations on the budget.

Mr. Speaker, I would like to make several points to my friend, the gentleman from Mississippi.

One. This is a matter of sunshine which Members on both sides of the aisle have sought from time to time, letting everyone know what is happening in the budget process. This resolution would do just that. You would have the 302(a) allocations, the 302(b) allocations, so that Members on that side of the aisle, as well as some Members on our side of the aisle who are concerned about what is happening on these individual appropriation bills would be able to look at those allocations, compare the appropriation bills and make their points during the debate.

Mr. Speaker, I would also point out, as was observed during the debate a moment ago, that this resolution permits reconciliation to go forward and that is very important.

Now, there is some difference of opinion about the amount of reconciliation, whether we should have an "X" figure or a "Y" figure, but the point is that reconciliation, once this resolution is adopted, then could begin, which is very important to enforcing any budget resolution in the House this year.

This is a constructive approach. It permits the House to move forward in a reasonable way to enforce a budget. It is something that should be adopted today.

Mr. LATTA. Mr. Speaker, I yield 6 minutes to the gentleman from Massachusetts [Mr. CONTE].

Mr. CONTE. Mr. Speaker, last week the Committee on Appropriations reported the fiscal year 1986 appropriation bills, three bills, for Agriculture, Housing and Urban Development, and Treasury-Postal Service.

All we needed at that time to bring these bills to the floor of the House was a waiver of section 303 of the Budget Act for each of the bills and the necessary waivers for lack of authorization.

What we got, instead, was a round trip to political Disney Land, courtesy of the majority leadership. Although the conferees have been unable to agree on a budget resolution for fiscal year 1986, this rule solves that problem by the convenient fiction that Congress "shall be considered to have adopted" the budget resolution which passed the House.

This has to be the most arrogant imposition on public credibility that I have seen in the last 27 years that I have been in the House, and I hope that the Members of the House will reject this rule here today.

Do we really believe that the public is so gullible that we can simply pass a resolution which says that the Congress has adopted a piece of major legislation, when as a matter of public record we have not? If so, why stop here with the budget resolution, I ask the gentleman from Louisiana?

If we are going to take this ultimate congressional junket to political Disney Land, why not dispose of all of our pending business?

We could legislate by a simple resolution. Think of the possibilities.

We could resolve that the conferees on the first budget resolution for fiscal year 1986 have met and agreed on a budget resolution which provides for a balanced budget through fiscal year 1990, and that this budget resolution has passed the House and the Senate.

We could resolve that the House and the Senate have passed, and the President has signed, a reconciliation bill which makes the changes in entitlement and authorizing legislation needed to implement a balanced budget through 1990.

We could resolve that the House and the Senate have passed, and that the President has signed, all authorizations and appropriation bills outstanding for the fiscal year 1986, which will be consistent with a balanced budget.

We could resolve that the House and Senate have passed, and the President has signed, a tax reform and simplification act, which provides for further reductions in individual tax rates and is revenue neutral and eliminates all unfair tax preferences in the Internal Revenue Code.

□ 1110

We could do that, believe me, if we could do this.

Finally, we could resolve that the first session of the 99th Congress has adjourned until January 3, 1986. What a blessing that would be.

This rule is an insult to the credibility of this House, to the intelligence of our constituents, and we should vote it down.

I see the gentleman from Michigan [Mr. WOLPE] who is interested in doing away with the Synthetic Fuels Corporation, as I am. If you vote for this today and it passes, there is no longer any need for the Interior Committee to go to the Rules Committee to get a rule waiving points of order against

section 302(b) or section 303. And there is no way, I say to the gentleman from Michigan [Mr. WOLPE] that I think that you will be able to join me in an amendment zeroing out the Synthetic Fuels Corporation.

Not only him, but the gentleman from Oklahoma [Mr. SYNAR] and all of the others who oppose the Synthetic Fuels Corporation and want to zero it out.

You are working right into the hands of the gentleman from Pennsylvania [Mr. MURTHA] and all of the others who favor the Synthetic Fuels Corporation. And I hope that you are listening, I say to the gentleman from Michigan [Mr. WOLPE] because there is no way in the world that you are ever going to be able to get rid of the Synthetic Fuels Corporation. We could kill the rule here today and the Interior Committee would not have to come back to the Rules Committee. They can bring the bill right here because they do not need any waivers.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Illinois.

Mr. YATES. Mr. Speaker, I think the gentleman is confused. We will have to come to the Rules Committee for a rule even though this passes and our Interior rule is voted down. We still will have to come to the Rules Committee for waivers of legislative matters.

We will not have to come to the Rules Committee on the question of waiving the requirements of the Budget Act.

Mr. CONTE. That is optional. That is optional and many, many subcommittee chairmen, I remember the gentleman from Iowa [NEAL SMITH] last year, I think it was, in the State Justice and Commerce bill came here without a rule, and they did raise points of order against those parts of the bill that were not authorized, and they were knocked out.

Mr. YATES. I have considered that possibility. The problem is that several of the legislative committees have not passed bills that will authorize major programs, and we would still have to come to the Rules Committee in order to get a waiver, in order for those very important Departments in Government to keep operating.

Mr. WOLPE. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I am glad to yield to the gentleman from Michigan.

Mr. WOLPE. I thank the gentleman for yielding, and I look forward to joining with him in a moment, of course, in the battle against the rule on the Interior appropriation bill.

But first, may I say that I think that the issue just raised with respect to the budget rule before us now, that issue is a red herring. There are many, many other reasons why the Interior Appropriations Committee or other committees will have come to the Rules Committee beyond the Budget Act, and that is simply a nonissue.

Mr. CONTE. That is a question of judgment by the subcommittee chairman. They have done it many times, they have come here without a rule, and they can do it again.

If you are interested in doing away with the Synthetic Fuels Corporation, you will vote down this rule.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 1 minute and 30 seconds to the gentleman from New York [Mr. SCHUMER].

Mr. SCHUMER, I thank the gentleman from South Carolina [Mr. DERRICK] for yielding this time to me.

I must say as to my colleague from Massachusetts, Mr. CONTE, that as a Member of the Appropriations Committee one could expect that he would opposed this resolution. But to my good friend, the gentleman from Ohio and the other Members on the other side of the aisle, I am surprised that they are opposing this resolution, because this resolution once and for all shows that we in the House are serious about the budget, are serious about the deficit and are trying to do something about it.

Can we go all the way as far as the Senate and the White House want us to go on domestic programs? Probably not. But are we trying to go a good part of the way? Yes, we are.

And we are saying we are going to do that whether there is a budget resolution or not. I would remind the gentlemen on that side of the aisle about what has happened in the other body. The other body a very tough budget resolution, and yet in the last week, even though their budget resolution eliminated money for EDA, they put $30 million in the supplemental appropriation for EDA. Even though the body's Budget Resolution eliminated the money for the ARC, the Appalachian Regional Commission, that body put $82 million in the appropriation bill, for the ARC.

Even though the other body opposed funding the TVA in their budget resolution, they put $90 million in their appropriation for that.

If this resolution passes, we cannot do the same thing that is going on in the other body here in the House. We will be proving once and for all that we indeed serious, and we will be making real progress.

I would ask the gentleman from that side of the aisle on the Budget Committee and the others to join us. They should be joining us. They should be saying that this shows the House is serious about the deficit. They should not say white simply because we say black.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 3 minutes to the distinguished chairman of the Appropriations Committee, the gentleman from Mississippi [Mr. WHITTEN].

Mr. WHITTEN. Mr. Speaker, I hope we will go ahead and pass this rule and get along with our business.

May I say that the Budget Act was not required because of appropriations from our Committee on Appropriations. The Budget Act was recommended by the study of Mr. Ullman of the Ways and Means Committee and myself representing the Appropriations Committee. We recommended the Budget Act because spending was bypassing the annual process by our Committee on Appropriations on 42 percent of Government spending.

What we have here is a resolution where we resolve to carry out what your Appropriations Committee is already doing. We pledged ourselves at the beginning of our action this year, in the absence of a budget resolution, that we would follow the House budget as passed by the House. We have done that and we will continue to do that. The resolution calls on us to do that. Here we would resolve to limit ourselves to the House budget provisions.

May I point out that the budget resolution was due May 15, 70 days ago. If you exclude Mondays and Fridays, we have remaining 13 legislative days. If there is much more delay, justified or otherwise, you are inviting a continuing resolution. We do not ever want that, we have not wanted to legislate by continuing resolution in the past, however it became necessary. This could easily happen again.

I urge you to let us go ahead now. If the Rules Committee wants me up there in the afternoon, in the morning and at midnight, I will be there, because I want the Congress to finish its business. Of course, I would prefer that all waivers be made at once for our convenience. I will point out that we will have about 9,000 witnesses before us this term, and we have had action of various types on appropriation bills in one single day last week. We are ready to work day and night to finish the business of the Congress.

A number of our colleagues wanted us to release the allocations made among the various subcommittees. We have done that. You have it before you and you can look at it. Of course, we reserve the right to reallocate, if such a course should become necessary. I recall a few years ago where we had to take $1 billion to take care of damages caused at Mount. St. Helens. We may have to do that again on any number of emergencies. But when we have to act, our action will be subject to your approval.

I wish to say again that we have 13 legislative days to wind up this fiscal year and to take care of the future of this Government. Your Committee on

Appropriations has not needed a budget resolution for us to stay in line. We have held the line each year, and will do so this year.

The public has been led to believe that we must have a budget, and if we cannot get one between the two Houses, surely it is appropriate for us to adopt a course as though we had a budget resolution. Our committee will follow the course, for which this resolution provides.

With 13 days remaining, I hope we will adopt this resolution, provide the necessary rules, and proceed.

Mr. LATTA. Mr. Speaker, I yield 5 minutes to the gentleman from New York [Mr. KEMP].

Mr. KEMP. Mr. Speaker, I thank my colleague for yielding. Let me say I can understand why the chairman of the Budget Committee wants to pass this resolution.

But let me rise in opposition for perhaps a different reason. I think it is just very poorly timed. I was disturbed, as I think some Members on the Democratic side of the aisle were, that there are reports from the other body that there are those who do not think that we need a budget.

I certainly think that this is faulty reasoning. We do need a budget and we ought not to give up. We have made, I think, some good-faith offers on both sides of the aisle and on both sides of the Capitol to try to reach a budget compromise.

Let me say to my colleagues in both Chambers, let us not let the process die. There are those who want to give up. And as I said earlier, I can understand why the gentleman from Pennsylvania, Chairman GRAY, wants to pass this resolution in the name of increasing pressure for a budget compromise. But it actually waives the budget in a blanket way, and that would be a mistake in my opinion.

This resolution would suspend the usual 302(b) allocations to the Appropriations Committee, which is one of the most important enforcement mechanisms for deficit reduction. The resolution would be an admission of failure that we cannot achieve a real deficit-reduction package. It suspends the budget process, which is already under attack as toothless.

□ 1120

I give Chairman GRAY credit for making a very good-faith effort to go to the Senate in the conference, on which I serve. I also commend the gentleman from South Carolina. They have offered a compromise. It does not go as far as our side of the aisle wants to go or Members of the Senate. But Chairman GRAY has offered a $273 billion spending cut package over 3 years and $56 billion or so in the first year. We ought to give him credit for making an offer which goes further than the House's original budget by making additional real spending cuts, strengthening reconciliation, and increasing defense budget authority.

Now I would say to some of my colleagues we are going back and attempting to pass today the original House budget which has $22 billion less saving than the House's second offer. I think that is a mistake. It is poorly timed. Both the House and Senate conferees are trying to achieve a new and better compromise budget package. I definitely want to say, as I previously did, that the chairman has made a good-faith effort. Let the Senate come back and make a new offer. We can then resolve our differences in the next 48 hours, which I am optimistic we can do, if we set aside some of our pseudodifferences and get down to numbers.

Chairman DOMENICI has set a budget savings benchmark that is very positive with regard to reducing the deficit. It is a bold package. Perhaps our Democratic friends cannot go that far. There are some of us in the House in the Republican Party that cannot go that far on certain items.

But I think we can find a way to work together to increase domestic savings without hurting the defense of the country and improving, as I think the chairman would like to do, the process for reconciliation or budget enforcement, as he and the gentleman from South Carolina have offered.

A good place to start in looking for additional savings might be to abolish or dramatically reduce synthetic fuels subsidies to major oil companies for producing synthetic fuels. We might think in terms of reducing subsidies for the Eximbank which subsidizes corporations for trading or exporting to other countries. We might reduce substantially outdated so-called economic development agencies. Those reforms would save $5 billion over 3 years. We might want to consider giving Amtrak's Northeast corridor routes to its employees for long-term savings and pass a moratorium on the strategic petroleum reserve [SPR] for additional savings of a couple of billion dollars.

We could abolish the Direct Loan Program of the SBA as recommended by the National Federation of Independent Businessmen, for another billion.

There are $3 billion to $5 billion that could easily be saved in other business subsidy programs beyond those I mentioned. I am not outlining a plan; I am not outlining the things that absolutely must be done. But we ought to go back in conference and not let the process die. In my opinion, we are about $5 to $7 billion apart in fiscal year 1986 and about $20 billion apart over the 3 years.

Now, do not forget, my friends, we are talking about almost a $1 trillion budget in a $4 trillion-plus GNP and we have narrowed our differences to around $7 billion to $8 billion.

Mr. Speaker, this is a huge economy. We have narrowed our differences. The chairman and the gentleman from South Carolina have made a good-faith effort to resolve some of the differences on reconciliation and enforcement. More could be done, more cuts could be made, some of which I have outlined.

I really think that the differences between the House and the Senate budget are not irreconcilable. They can be broached. The outlines for agreement are in sight. We ought to get moving.

On that basis, I would ask my colleagues on both sides of the Capitol to reconsider their support for the budget process. Let us get the conferees back and make the effort that has to be made, not on behalf of either side of the Capitol Hill or either party but on behalf of the American economy, getting those deficits down and getting a good budget for fiscal year 1986.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the gentleman from Florida [Mr. MACKAY].

Mr. MACKAY. I thank the gentleman for yielding. I speak for a group on this side of the aisle which last week objected to waiving the Budget Act, for two very specific reasons. One, we felt that the waiver would force us to give up the right to insist on reconciliation, a discipline required by the Budget Act. Two, we were unwilling to waive our right under the Budget Act to insist on 302(b) allocations. Without these allocations, which set upper limits on spending for each program, there is no way for individual Members to understand the entire spending proposal being put forward by the Appropriations Committee.

Today's resolution assures us that both of these rights will be protected.

Now clearly there is going to be a continuing resolution. This is going to happen whether we waive the Budget Act or whether we do not waive the Budget Act, and that is going to be because we have stalled around and played games far beyond the time contemplated to go forward with the budget resolution.

I do not know whose fault that is. I think there is enough fault so that we can all take our share of the blame for the position we find ourselves in. But the question of what happens on the continuing resolution is an issue not to be decided today. That is the issue to be decided when we have a rule, this year I hope, that says we will have the same limitations on the continuing resolution that we have on general appropriations bills. If that rule had been in effect last year, we could have avoided the farce which took place at

the end of the session, when the continuing resolution negated all efforts to achieve fiscal discipline.

In the meantime, I believe we are preserving the discipline of the Budget Act, we are doing as much as we can do under the circumstances, not as people who get together under the oak tree on the lawn of the White House and decide the future of the world, but as general, ordinary Members of the House who say, "I want to force the system to work the way it is supposed to work." We are doing all we can do. I think there was a major concession made by the Appropriations Committee. We can go home to our constituents in August and say, "The budget process is not working right, but at least I can tell you now in advance what is going to happen so far as the House spending decisions are concerned." That is not a spectacular gain, but it is probably all we can achieve under the constraints of the White House agreement.

Mr. Speaker, I urge support of this resolution.

Mr. DERRICK. For purposes of debate only, Mr. Speaker, I yield 1 minute to the gentlewoman from California [Mrs. BOXER].

Mrs. BOXER. I thank the gentleman for yielding.

Mr. Speaker, this past weekend I held community meetings throughout my district. People asked me "Congresswoman, what happened to the budget?" I told them, "I believe politics was getting in the way of a joint House/Senate budget and that that is unfortunate."

Today by passing this resolution I think we can rise above politics and show America that we are breaking the logjam, that we are moving ahead with the $56 billion deficit reduction this House already passed by such a wide margin.

Let the other body squabble, but let us move forward with deficit reduction. Let the other body walk out of conference, but let us move forward with deficit reduction. Let the other body work without a budget, but let us move forward with a budget.

Now I wish the other body would change, but we in the House cannot control that. But we can control what we do.

So let us move forward today with this resolution, with deficit reductions. Let us pass this resolution.

Mr. Speaker, I yield back the balance of my time to the gentleman from South Carolina.

Mr. LATTA. Mr. Speaker, I yield 1 minute to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I certainly agree with the chairman of the Committee on the Budget when he said that we are not waiving the Budget Act here. That is right. What we are doing is abandoning the Budget Act. What we have decided to do with this particular resolution is that we have decided that the process to which we have committed ourselves in the past does not work and so therefore we have learned to come up with a whole new process. This is another case of when you cannot live with the rules that you have set, you simply abandon the rules midstream.

That is what we are doing here. When it comes to spending money, I think there is no barrier that this House will not abandon in order to spend the money. This bill is called a sunshine bill here. That is right. I would agree it is a sunshine bill. There is nothing under the Sun we will not do in order to spend money. This Congress has regularly overspent its own budget. Over the last 5 years, we have overspent our own budgets to the tune of $150 billion or more. This is how we do it. This is exactly the kind of bill, the kind of approach that we use in order to overspend our own budgets.

□ 1130

Vote for this resolution if that is what you are going to do; that is fine, but your are voting for more spending and you are voting to abandon the budget process.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the gentleman from California [Mr. FAZIO].

Mr. FAZIO. Mr. Speaker, we are conducting another one of those arcane debates some of us refer to as "inside baseball" around here. People out across the country expect two things of us in the context of our budget process.

One, they want us to cut spending; they want us to balance the budget; they want us to reduce spending; they want us to move at least in the direction of reduction in our annual deficit so that we get back to the historic level we began with in 1980 when President Reagan took office, and secondly, they want us to keep the process of government functioning; they do not want us to run up against that October 1 fiscal year deadline and have to close down the Federal Establishment for symbolic purposes.

I argue that this resolution today allows us to move forward on both of those issues. First of all, it does not in any way reduce the pressure on our budget conferees. As a conferee myself, I can tell you that we feel the pressure. It is the kind of pressure that results from out of the knowledge we have about the strength of "the bully pulpit," the Presidency, President Reagan's ability to stand up and cast aspersions against the Congress as his top aide, Mr. Regan did the other morning, for failing in our responsibilities to enact deficit reduction measures.

We know that however ineffective some of us may consider the budget process, it is the most important symbolic act we can engage in, and we will continue our efforts in the conference this week, next week and when we come back, if must be the case, in September to pass a resolution so that we can enact the proper framework to meet our needs.

We are also, I think, able to say that the Appropriations Committee historically has met its targets. Senator HATFIELD, the chairman of the Appropriations Committee, a leading Republican, said in the debate on the Senate floor on the line-item veto yesterday that we have come $12 to $13 billion below President Reagan's spending requests since he has been in office; and right now the 10 appropriations bills that have come at least to full committee are $7.5 billion below the budget authority granted to them in the 302(b) tentative allocation. This committee is not the problem.

This is the approach we need to impose discipline on ourselves; the Senate needs it as well; I hope we can proceed at least today to give confidence to our budget process and to the Appropriations Committee's proper approach as well.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 1 minute to the gentleman from Connecticut [Mr. MORRISON].

Mr. MORRISON of Connecticut. Mr. Speaker, I thank the gentleman for yielding and I rise in support of the resolution.

This is a resolution that gives us the tools to at least live within spending limits. It gives us the tools to control and reduce spending. Those who are attacking this resolution as an attack on the budget process really do not want to come to grips with the fact that we want something real to compare the appropriations measures to.

This resolution gives us 302(b) guidelines by which we can judge the appropriations as they come to the floor. It gives us the beginning of a reconciliation process where we can save billions of dollars in spending if we will move forward in that process.

It gives us a 302(a) limit which can limit any continuing resolution that will be coming before this House.

We can and should do more than just pass this resolution, but it is a beginning; it is a beginning that gets the House of Representatives on record in its rules that will live at least within the budget that we have already passed, and the other body, if it has more savings, can get to give or more savings to ask, can certainly amend what we pass in the appropriation and reconciliation process to implement those greater savings.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 1

minute to the gentleman from Michigan [Mr. LEVIN].

Mr. LEVIN of Michigan. I appreciate the gentleman yielding.

Mr. Speaker, I rise in support of the resolution. I have listened to some of the debate, and I am somewhat surprised by the statement from the other side. What this resolution says is that we will meet the other house halfway on a resolution, but in the meanwhile, the House, this House is going to put our own house in order.

It has been said that this resolution would diminish the pressure on the other house. I think it will increase the pressure. It will show that we here are able to act within a framework that brings about major savings.

So for all of those reasons, I hope very much that we will vote for the resolution. This is a very significant first step toward the kind of budget that this country needs.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 1 minute to the gentleman from Louisiana [Mr. ROEMER].

Mr. ROEMER. I thank my colleague for yielding.

Mr. Speaker, this is a close call today. This is not an easy vote for a lot of people who care deeply about what we have done to this country in terms of the deficit. This is a close call today for those who are worried about jobs and get letters like I do about tomorrow and what it holds.

I did not support the budget that passed the House a couple weeks ago, and as a result it is very difficult for me to vote to put into effect the very budget that I voted against.

This is a close call, and I do not mean to cast stones in either direction, but I have decided that I cannot vote for this rule. I do so reluctantly; I do so without any animosity toward anyone. I just think the basic question is: Are we better off to put a bad budget in place or have no budget at all momentarily? Right now, I like the pressure of the individual votes on the appropriations bills. Because I voted against this budget, I am not going to be able to vote to impose it. That support is the responsibility of those who supported this budget originally. I did not. I can not.

Mr. LATTA. Mr. Speaker, I yield 1 minute to the gentleman from Texas [Mr. BOULTER].

Mr. BOULTER. Mr. Speaker, I thank my colleague for yielding and I rise in opposition to the resolution, for a number of reasons that have already been expressed.

Mr. Speaker, it would, as the gentleman from Louisiana [Mr. ROEMER] said, put into effect what many of us consider to be a very bad budget; a budget which as I recall in the area of nondefense domestic cuts actually contains $13 billion above a freeze level.

I rise in opposition to the resolution because it is a vote for that very budget. What we are doing today would remove pressure on House budget conferees to get a budget; those of us who think it is important to have a budget should vote against this. There is no precedent for it; it erodes the budget process, and it would actually permit spending increase amendments to be offered to appropriations bills.

I hope that this vote today will be viewed as the big spending vote of this Congress, because I believe this vote is a budget-buster, and it is an abandonment of the budget process.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 1 minute to the gentleman from Kansas [Mr. SLATTERY].

Mr. SLATTERY. Mr. Speaker, I thank the gentleman from South Carolina [Mr. DERRICK] for yielding, and I rise in somewhat reluctant support of the resolution.

The reason I do, Mr. Speaker, is because frankly the bottom line is, this is as good as we are going to do at this point. The fact of the matter is that we have made a good faith offer to the other body; $56 billion in deficit reduction next year; $273 billion over the next 3 years; and the Senate has in effect walked away from that offer.

At this point, we do not know whether the Senate is going to continue to participate in the conference or not. That leaves us in the position where we are totally at the mercy of the Senate.

I do not believe we can leave ourselves in that position, Mr. Speaker, and it seems we have no other choice. At least with this resolution we will be in a position to judge the appropriation bills against the earlier passed House budget resolution; and in addition to that, there is nothing in this resolution—and I say this to my colleagues on the other side of the aisle, and also to my colleagues on the Democratic side of the aisle—there is nothing in this resolution that will prevent individual Members from having the opportunity to come to this mike in the well of this House and offer amendments to further trim the appropriation bill that might be coming forward.

I, for one, intend to do that, and I would urge my other colleagues who are really interested in deficit reduction, to join me in that effort.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 1 minute to the gentleman from California [Mr. PANETTA].

□ 1140

Mr. PANETTA. Mr. Speaker, the issue here today is whether there will be any semblance of discipline whatsoever in the House with regard to the budget resolution. That is the issue. I regret as much as anyone else the fact that we do not have an agreement on a conference report regarding the budget resolution. There is plenty of blame for that to go around for everybody. But the blame will be on this House if we at the very least do not have the guts to support the very resolution that was adopted here. That is the point of this resolution. It is to provide some semblance of enforcement, scorekeeping on the appropriations bills. What could be the problem of providing a list of scorekeeping so we know whether in fact appropriation bills meet what is in the resolution? It provides for reconciliation. Reconciliation is the only tool we have in the budget process. This will allow reconciliation to go forward so that at the very least we can achieve those savings here.

Now, I understand the argument that some do not like the particular resolution. You may not like the shape of the barn; but it is no reason to leave the barn door open. This resolution tries to close that door. And at the very least, it is the minimal step that needs to be taken if we are to say to the American people, "We exercised some discipline on the budget process." This is your chance.

Mr. LATTA. Mr. Speaker, I yield 1 minute to the gentleman from Florida [Mr. MACK].

Mr. MACK. I thank the gentleman for yielding.

I rise in opposition to the rule. I think that to continue to make the statement about discipline and to make statements about one of the ways to avoid a continuing resolution is to vote for this rule is just totally misleading. The same comments were made last year. We ended up with a continuing resolution last year that increased spending by 13 percent.

What good is it to have scorekeeping if the scorekeeping is going to indicate to us that we are going to raise spending 13 percent?

So I think we are headed in the wrong direction. If we want discipline, we ought to make ourselves live within the Budget Act.

If I could, I would like to ask one question of the chairman of the Budget Committee.

What has happened to the $4 billion in contracting out. Is the Appropriation Committee going to deal with contracting out?

Mr. GRAY of Pennsylvania. The $4 billion in contracting out has been assigned to the Appropriations Committee. It is in the 302 allocation and it is in the 302(b)'s.

Mr. MACK. I thank the gentleman for the information.

Mr. LATTA. Mr. Speaker, I yield myself the balance of my time.

The SPEAKER pro tempore. The gentleman from Ohio [Mr. LATTA] is recognized for 2 minutes.

Mr. LATTA. Mr. Speaker, let me say that anybody who believes that the passage of this resolution is going to speed up the conference and the passage of a joint resolution on the budget must have to believe in the tooth fairy. They are living in dreamland. This makes it easier for the whole thing to go by the board.

I pointed out in my general remarks earlier something that seems to have escaped the people who want to do something about reducing expenditures. There is a difference in what they are doing here and what we would do otherwise. This is actually a matter of convenience. This is not only a blanket waiver of section 303(a) of the Budget Act, which requires a budget resolution to be in place before appropriation bills can be considered, but it actually would permit spending increase amendments to be offered to appropriation bills.

Under current procedure, even the House may waive section 303(a) against individual appropriation bills. Such waivers do not cover amendments which provide additional budget authority or spending increase amendments. Therefore, the adoption of this resolution can be interpreted as authorizing budget busting amendments that are currently prohibited under existing law.

So anybody who believes that we are going to reduce spending by passing a resolution that most of us on this side did not support in the first place, which had peanuts for reconciliation, which had a lot of puffery in it, escapes my imagination.

I think the only way to do anything about the deficit is to get back in conference and cut, cut, cut expenditures. Quit beating around the bush about it. Let us do something about it. And the way to do it is back in conference and not passing waivers like this. You can call it anything you like, but it is a waiver of the Budget Act and it opens the door for the Appropriations Committee to come in here on all of these appropriations with a blanket waiver of the Budget Act without coming up to the Rules Committee with a justification for a waiver on every bill.

I think they ought to come in and make their case on each individual appropriation bill.

Mr. DERRICK. Mr. Speaker, I yield myself 1½ minutes.

Mr. Speaker, to have not voted for the budget resolution last time is no excuse for not voting for this resolution. That is an untenable excuse. The House passed the budget resolution. This is an opportunity for the House to say to the American people who are looking to this Congress for some sort of fiscal discipline that we, even though we have made every effort that we possiby can to come to an agreement with the Senate on a budget resolution, that having failed that, until we do that—and I believe we will come to an agreement in very short order—that we are going to have what it takes to discipline ourselves.

There is no other way that the reconciliation process and the budget enforcement process of the House may go into effect without supporting this resolution.

So I suggest to the Members that those who are not voting for this because they do not like the budget are being very shortsighted. I voted for the budget. There is a lot in there I do not like. But what I do like and what I do demand, and what I do think we owe the American people is to tell them that, yes, the U.S. House of Representatives has what it takes to discipline itself.

Mr. Speaker, I yield the balance of my time to the distinguished gentleman from Pennsylvania [Mr. GRAY].

The SPEAKER pro tempore. The gentleman from Pennsylvania [Mr. GRAY] is recognized for 1 minute.

Mr. GRAY of Pennsylvania. Mr. Speaker and colleagues, there really are only two questions to be answered in this vote, and that is: Do you want to enforce what you voted bipartisanly, overwhelmingly for, just a couple of months ago in stating what the House priorities were? Do you want to demonstrate to America and to the other body that you are prepared to discipline yourself, enforce over $50 billion worth of savings? Or are we going to continue to play partisan politics and allow the red ink to swell up around us?

The Appropriations Committee, led by the distinguished gentleman from Mississippi, has already pledged itself to be a part of that great effort. That is the first question. So if you voted for the budget a couple of months ago, you ought to vote for this resolution.

Second, let me just say: Is this budget that we have from the House in conference the best budget in the world? I would say it is not. Given the constraints of the House policy, in terms of COLA's, given the constraints of the President's position on revenues, I believe it is a good start toward cutting spending. So let us enforce it; let us pass this resolution.

The SPEAKER pro tempore. All time has expired.

Mr. DERRICK. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. LATTA. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 242, nays 184, not voting 7, as follows:

NOT VOTING—7

Downey	Lujan	Wright
Ford (MI)	Michel	
Hefner	Monson	

□ 1200

The Clerk announced the following pairs:

On this vote:

Mr. Wright for, with Mr. Michel against.

Mr. Ford of Michigan for, with Mr. Monson against.

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

□ 1210

THE BATTLE HYMN OF THE REPUBLICANS

(Mr. CONTE asked and was given permission to address the House for 1 minute.)

Mr. CONTE. Mr. Speaker, unfortunately, I am not permitted to sing on the House floor. But, on this historic occasion, I would like to recite "The Battle Hymn of the Republicans":

Mine eyes have seen the glory of the victorious G.O.P.
We trampled down those Democrats by a score of 9 to 3.
At 17-6-1, you call this a rivalry?
The G.O.P. is marching on.
We practiced every day, Pursell and Coats worked up a sweat;
While the Democrats spent their weeks adding to the national debt.
They tried to legislate themselves some talent, I am willing to bet;
The G.O.P. is marching on.
We can hear the Donkeys whimper, with Chappell leading the whine;
But he shouldn't feel so bad; with that talent they played fine.
After batting against Schaefer, they just got splinters on the pine;
The G.O.P. is marching on.
As their coach, I helped them to accomplish this great feat;
I said, "Hit it to Russo or Bonior; that will ensure their defeat."
So stop crying, old Chappell; get out of the kitchen if you can't stand the heat.
The G.O.P. is marching on.
Now the game is over, one more year 'till 86;
And who will win next year, I know who I would pick.
Don't feel bad, old Chappell; you did well for a Florida hick.
The G.O.P. is marching on.

PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO FILE PRIVILEGED REPORT ON DISTRICT OF COLUMBIA APPROPRIATIONS BILL, 1986

Mr. DIXON. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a privileged report on a bill making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1986, and for other purposes.

Mr. CONTE reserved all points of order on the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

REDESIGN AND RECONSTRUCTION OF THE EAST PLAZA OF THE CAPITOL FOR INCREASED SECURITY

(Mr. YOUNG of Missouri asked and was given permission to address the House for 1 minute.)

Mr. YOUNG of Missouri. Mr. Speaker, today, I am introducing legislation which authorizes the Architect of the Capitol, under the direction of the Senate Office Building Commission and the House Office Building Commission, to redesign and reconstruct the east plaza of the U.S. Capitol to provide for increased security and for esthetic purposes. I am pleased to be joined in introducing the bill by the distinguished ranking minority member of the Subcommittee on Public Buildings and Grounds, Hon. E. CLAY SHAW, as well as several other distinguished Members of Congress. Mr. Speaker, this bipartisan effort is part of the crucial response to security needs of which we have become all too aware in recent years.

As my colleagues are aware, in November 1983, a bombing was carried out in the Senate wing of the Capitol by an extremist organization. The Subcommittee on Public Buildings and Grounds subsequently held hearings on increased security for the Capitol, and several additional security measures were implemented. This legislation is another important step toward updating security, while at the same time providing a ceremonial entrance to the Capitol substantially in accord with the Olmsted plan for the U.S. Capitol Grounds and the landscape plan of the 1981 master plan for the U.S. Capitol. It will provide for use of the east plaza as a major pedestrian and ceremonial entrance point appropriate for the main entrance to the Capitol of the United States.

Mr. Speaker, I hope that the Congress will recognize the importance of this legislation so that we can move quickly to detailed plans which will protect employees and visitors to the Capitol while ensuring that the east front reflects the pride which all Americans feel for the Capitol as a symbol of democracy. I urge my colleagues to cosponsor this legislation and support timely passage.

INTRODUCTION OF LEGISLATION TO IMPROVE SECURITY OF EAST FRONT PLAZA OF THE CAPITOL

(Mr. SHAW asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHAW. Mr. Speaker, I am honored to introduce along with the chairman of the Public Works and Transportation Subcommittee on Public Buildings and Grounds and sponsor of the bill, Mr. YOUNG of Missouri, and a number of my colleagues, legislation intended to substantially improve the security of the east front plaza of the Capitol.

All of us are keenly aware of the increasing acts of terrorism being carried out worldwide and realize we are as vulnerable here in Washington as the passengers who boarded their flight in Athens or the American soldiers who were senselessly murdered in a cafe in El Salvador.

I know many of you can recall the bomb blast which ripped through the

Capitol 2 years ago, the individual apprehended in the House gallery ladened with explosives, and the Columbian and Libyan hit squads headed for Washington and destinations throughout the country.

You will recall, too, the steps which were taken to deter or prevent a repeat of these occurrences. Identification cards were issued, access within the buildings was restricted, trucks were positioned across driveways and guard booths, and idling police cars were stationed in front of the Capitol.

But many of the measures implemented in and around the Capitol following these incidents were of a temporary nature, which is why we have introduced this legislation which would result in a number of permanent security improvements on the east front plaza.

The legislation would authorize the Architect of the Capitol to redesign and reconstruct, under the direction of the House and Senate Office Building Commissions, the east plaza of the Capitol in order to provide improved security for the hundreds of employees and thousands of visitors occupying this majestic building daily.

The redesign is to be in accordance with the Olmstead plan for the U.S. Capitol Grounds and the landscape plan of the 1981 master plan for the U.S. Capitol.

Once plans and cost estimates are prepared by the Architect, the legislation requires they be submitted to the Congress for final approval prior to the appropriation of funds for the reconstruction.

Preliminary estimates by the Architect indicate the entire project would cost approximately $8.4 million, and I would like to point out that some of the funds for the project may be available from the west front renovation.

Currently, the renovation of the west front is progressing exceptionally well under the careful and diligent supervision of the Architect; the project is on schedule and the costs that have been incurred thus far are well below those originally estimated.

Barring any unforeseen problems, the west front renovation should be completed well below the amount appropriate meaning; funds from this project could be transferred to the east front plaza reconstruction project subject to congressional approval.

Mr. Speaker, improving the security of our Nation's Capitol so we might ensure the protection of the world's most distinguished symbol of freedom, and the safety of those who work and visit there daily, is of paramount importance.

It is that responsibility we must not shirk, and I would urge Members to cosponsor and support this legislation.

IN DEFENSE OF DEMOCRATIC HONOR AND BASEBALL TEAM

(Mr. GONZALEZ asked and was given permission to address the House for 1 minute.)

Mr. GONZALEZ. Mr. Speaker, I rise in defense of the Democratic honor and the baseball team that fielded gloriously last night and lost through chicanery, but in direct reply to the poesy of the gentleman from Massachusetts, let me say that the Democratic gladiators battled proudly and gloriously and honorably on the field, but at no time could we change the GOP.

The GOP, like my little white hen, Higgly-Piggly, she lays eggs only for gentlemen.

We could not persuade with pistol or lariat to come across for the proletariat.

WAIVING CERTAIN POINTS OF ORDER AGAINST CONSIDERATION OF H.R. 3011, DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS, 1986

Mr. FROST. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 227 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 227

Resolved, That all points of order for failure to comply with the provisions of section 303(a) of the Congressional Budget Act of 1974 (Public Law 93-344) are hereby waived against the consideration of the bill (H.R. 3011) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1986, and for other purposes. During the consideration of the bill, all points of order against the following provisions in the bill for failure to comply with the provisions of clause 2 of rule XXI are hereby waived: beginning on page 2, lines 1 through 21; beginning on page 4, line 6 through page 6, line 19; beginning on page 8, line 10 through page 9, line 10; beginning on page 9, line 16 through page 10, line 2; beginning on page 11, line 11 through page 12, line 8; beginning on page 13, lines 3 through 26; beginning on page 14, lines 19 through 22; beginning on page 16, line 8 through page 17, line 9; beginning on page 26, line 8 through page 27, line 19; beginning on page 41, lines 12 through 21; beginning on page 45, line 20 through the colon on page 50, line 5; beginning after the colon on page 50, line 8 through page 50, line 16; beginning on page 52, line 12 through page 53, line 18; beginning on page 56, line 16 through page 57, line 15; beginning on page 61, line 3 through page 63, line 8; and beginning on page 65, lines 1 through 4; and all points of order against the following provisions in the bill for failure to comply with the provisions of clause 6 of rule XXI are hereby waived: beginning on page 45, line 20 through page 48, line 24; and beginning on page 52, line 12 through page 53, line 18. In any case where this resolution waives points of order against only a portion of a paragraph, a point of order against any other provision in such paragraph may be made only against such provision and not against the entire paragraph.

The SPEAKER pro tempore. The gentleman from Texas [Mr. FROST] is recognized for 1 hour.

Mr. FROST. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from Tennessee [Mr. QUILLEN], pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 227 waives certain points of order against the consideration of H.R. 3011, the Department of the Interior and related agencies appropriation for fiscal year 1986. The rule does not provide for the consideration of H.R. 3011, since general appropriation bills are privileged; rather, the rule protects specified provisions of the bill against points of order for failure to comply with the provisions of clauses 2 and 6 of rule XXI. Clause 2 of rule XXI prohibits unauthorized appropriations and legislative provisions in a general appropriation bill while clause 6 prohibits reappropriations or transfers in those bills.

The specific provisions of the bill for which the waivers are provided are detailed in the rule by page and line. I should note that the waivers provided in the rule are those requested by the chairman of the Committee on Appropriations, Mr. WHITTEN.

In large part, the provisions protected by clause 2, rule XXI waivers in the rule are unauthorized appropriations which are at some stage of the legislative process but have yet to be enacted into law. Generally, the granting of these waivers requested by Chairman WHITTEN was not found to be objectionable by the relevant legislative committees. However, in one instance, the authorizing committee, Energy and Commerce, did object to the language proposed to be protected by a waiver of clause 2 of rule XXI. This language, which prohibits the test sale of oil from the strategic petroleum reserve, was not protected in the rule by the Committee on Rules in light of the objection raised by the chairman of the Committee on Energy and Commerce. It has generally been the practice of the Committee on Rules not to grant protection to unauthorized projects or legislative language contained in appropriation bills if such language is found to be objectionable by the relevant legislative committees.

However, in order to protect the remainder of this paragraph in the bill, the rule provides that should a point of order be raised against the test sale language, that the point of order may be made only against that language in the paragraph and not against the paragraph as a whole. This provision in the rule leaves the remainder of the paragraph relating to the strategic petroleum reserve protected against

points of order under clause 2 of rule XXI.

The paragraphs granted a waiver of clause 2, rule XXI in title I of the bill provide appropriations for a number of agencies involved in activities related to the programs of the Department of the Interior including the Bureau of Land Management; resource management, land acquisition and construction within the U.S. Fish and Wildlife Service; funds for operations, construction and the John F. Kennedy Center for the Performing Arts within the National Park Service; the Geological Survey; and Administration of Territories. Waivers of clause 2, rule XXI in title II are provided for the Youth Conservation Corps within the Forest Service; various programs within the Department of Energy; Indian Health Services within the Department of Health and Human Services; the Smithsonian Institution; the National Foundation on the Arts and Humanities; and the U.S. Holocaust Memorial Council.

The rule also protects three provisions in title II against points of order against the failure to comply with clause 6 of rule XXI. These provisions are also protected by clause 2, rule XXI waivers. Specifically, the rule protects the clean coal technology reserve and the fossil energy research and development accounts within the Department of Energy because they contain transferred funds and the appropriation for the Indian Health Service within the Department of Health and Human Services because it contains reappropriations.

The rule also waives section 303(a) of the Congressional Budget Act of 1974 because the rule was reported from the Committee on Rules prior to the adoption of House Resolution 231 which was just agreed to by the House. Under the provisions of House Resolution 231, this waiver is no longer necessary because the House is now operating under the House-passed budget resolution, House Concurrent Resolution 152, as if it had been adopted by the Congress for purposes of the Budget Act. As Members know, once the first budget resolution has been adopted by the Congress, a waiver of section 303(a), which prohibits the consideration of new budget authority for a fiscal year prior to the adoption of a budget resolution for that year, is no longer required in order to consider appropriation bills.

Mr. Speaker, there is one matter of some controversy in the rule I should point out to my colleagues. The Committee on Rules did not provide a waiver of clause 2, rule XXI for an amendment relating to the Synthetic Fuels Corporation. The amendment, proposed by the gentleman from Indiana, Mr. SHARP, as well as a number of other Members, proposed to rescind oil funds in the energy security reserve, which is the Synthetic Fuels Corporation, except for $500 million which the SFC would be unable to commit. The amendment was not considered by the Appropriations Committee nor did that committee request that an amendment of this nature be protected under the rule.

Proponents of the amendment will speak today in favor of defeating the rule in order to compel the Committee on Rules to report another rule for H.R. 3011 which would protect the Syn Fuels amendment. I would like to point out from the outset that authorizing legislation has been reported from the Committee on Energy and Commerce and is currently pending before the Committee on Banking, Finance and Urban Affairs. The Committee on Rules was informed that the Subcommittee on Economic Stabilization will take up the legislation after the August district work period. The Committee on Rules has been, and continues to be, reluctant to grant waivers to allow legislative amendments to appropriation bills and while a great many Members may argue that this amendment would deserve special treatment despite the committee's reluctance, the Committee on Rules continues to believe that the legislative process must be protected and that authorizations should take their normal course through the legislative process. For this reason, the Committee on Rules did not recommend that the amendment be protected in the rule. I would urge my colleagues to support the position of the Committee on Rules, as well as the Committee on Appropriations, and vote to support this rule.

Mr. Speaker, H.R. 3011 contains important appropriations for a wide variety of programs within the Department of the Interior and other related agencies. The rule provides for the expeditious consideration of this measure and will allow the House to move forward with the consideration of general appropriation bills for the coming fiscal year. I urge my colleagues to support the previous question and the rule so that the House may conduct its business on this most important appropriation bill.

□ 1220

Mr. QUILLEN. Mr. Speaker, I yield myself as much time as I may use.

Mr. Speaker, I urge support for the rule.

Today, the House is faced with an important decision regarding our national energy policy and our national security. A bipartisan group of Members argue that this rule should be defeated so that the Rules Committee will be forced to grant another rule permitting the offering of a nongermane amendment to abolish the Synethetic Fuels Corporation. These Members are sincere and able. I have the greatest respect for them. I count them as my friends. My duty and responsibility as I see it, however, compels me to say that they are wrong, and I ask the House to reject their advise and to reject their policy.

Members should be aware that a bill to accomplish their purpose to abolish the Synthetic Fuels Corporation has been reported by the Committee on Energy and Commerce and is now before the Subcommittee on Economic Stabilization of the Committee on Banking, Finance and Urban Affairs. The subcommittee chairman, the gentleman from New York [Mr. LAFALCE], assured the Rules Committee in a letter that he has every intention of taking up their bill after the August recess. Here is the proper and regular legislative remedy for those who wish to press ahead in their effort to abolish the Synthetic Fuels Corporation.

To reverse our national energy policy and to destroy our most innovative national program to establish a synthetic fuels industry by way of a single amendment debated for a few minutes, is not the sort of deliberate legislative procedure this important matter deserves. What they are about is too serious a national policy question to be dealt with by such an irregular and impromptu procedure.

Beyond this procedural dispute lies the greater question of substance. And what a difference a few years make.

The great oil shortages of the 1970's are behind us. The economic devastation, the wild inflation, the high unemployment, the genuine threat to our national security, all apparently gone, behind us. Today there is an adequate supply of oil and the attitude seems to be that we have no problem with oil supplies anymore.

How quickly we forget. The truth is that America is dangerously dependent on imported oil and a lot of it comes from a part of the world infested with rulers who are sworn enemies of the United States. The Middle East is spinning off its axis under the assaults of a vicious terrorism, or religious fanaticism, of belligerent nationalism, of incredible disparaties of wealth, and is afflicted with the agonies of a traditional culture hammered by rapid change introduced by an alien world. They are even rerunning World War I, or is it the Hundred Years' War, at the head of the Persian Gulf.

This is a stable source of oil?

And remember, if we learned anything in the 1970's, it is that America's economy, her foreign policy and her national security depend on America's capacity to establish our own independent energy market—one that we control.

The Synthetic Fuels Corporation is the most important part of America's commitment to free herself from the

grip of the madmen and the crazies of the Middle East who hate her and who will use the oil weapon to bring America to her knees if they can. We have got to have the strength to stop them. We have got to have the vision to go forward and to develop a synthetic fuels industry.

We have sufficient coal and oil shale to last for centuries. Let's use it, instead of sending our sons to die some day in the sands of the Middle East in an oil war.

Mr. Speaker, I ask the Members to support the Appropriations Committee and the Rules Committee. Let us not act unwisely and in haste today on a matter of such importance. I ask for a "yes" vote on the rule.

□ 1230

The SPEAKER pro tempore. The gentleman from Tennessee [Mr. QUILLEN] has consumed 5 minutes.

Mr. FROST. Mr. Speaker, for purposes of debate only, I yield 5 minutes to the gentleman from Pennsylvania [Mr. MURTHA].

Mr. MURTHA. Mr. Speaker, this morning when I was driving into work, on my left was a Subaru, in front of me was a Honda and behind was another foreign car. I see the chairman of the Trade Committee coming in. Let me tell you something: They are all burning, one-third of those cars, not only coming in from overseas, but they are burning foreign-imported oil.

Now the steel mills, we have lost 200,000 people in the last couple of years. My area still has between 11 and 13 percent unemployment because of subsidized imports. They say in automobiles alone 50 percent of the cars are going to be imported in the next couple of years if the Japanese eliminate the voluntary quotas that they have received.

Interesting thing: This morning in my mail from a fellow named Broyhill, a Paul Broyhill, I received a letter and Paul says "The furniture business is going downhill and the subsidized imports are killing" him and something has to be done about it.

He sends me a copy of what imports are doing to this country.

Well there have been some of us who have been working for years trying to do something about imports.

In today's Washington Post, the headline "Long-Term Oil Problem." In last week's Washington Post, another, "U.S. May Face Power Deficit in the Early 1990's."

We are talking about, in my estimation, one of the most serious situations to face this country.

I remember driving back from Johnstown, PA, to Washington just a couple of years ago when I had to plan where I was going to stop because half the gasoline stations were closed. I had to be very careful what day I got back and make sure I filled my tank before I left Johnstown.

Now I have a copy of the CONGRESSIONAL RECORD here from 1953. We closed down two synthetic fuel plants in 1953, that is, the Congress. The Interior Committee of the Committee on Appropriations said in 1953 that we have no energy crisis, there is not going to be any problem so we are going to close down two plants.

Now what is the significance of closing those plants? The real expenditure in synthetic fuels is the capital expenditure. Those plants cost substantially less in 1953 than they would cost today. So the real crisis might have been avoided if we were able to keep those plants going, expand and increase the technology and to keep the price of the initial investment down.

Now you talk about the amount of money which we spend. Well, let me tell you something: Imported oil costs us $47 billion a year to our trade deficit. We are going to spend money in the long run in keeping some technology in this country. I am not talking about foreign aid, I am not talking about a program—and I supported the foreign aid bill because we need a balanced program—but let me tell you something here, here is a program that would help us be more independent, here is a program where people in the United States are going to be working.

Mr. Speaker, I got a letter from the United Mineworkers and they said that we have half our people out of work and we need a program that would put coalminers back to work.

You may argue about the situation at the Synthetic Fuels Corporation. But they have only had 6 months under the new board to get anything done. You can go back and look at the discouraging problems they had before and I know it is very difficult to defend the situation under the former regime, but since December, they have tried to narrow down the program and they have tried to increase the productivity, they have tried to make smaller projects and come up with something in case we have another energy crisis.

It is not beyond the realm of possibility that we are going to have an energy crisis within the next couple of years. This expenditure that we make today could be some of the best money spent in this country as far as I can see.

So I say to you today they have reported out a bill, that is the authorizing committee, and appropriately so. We will fight it out in their bill, but certainly we should not make the same mistake today we made in 1953 when we shut down two synthetic fuel plants, with the expenditures they made in those days which might have helped us during that energy crisis. We should make sure that we vote for the previous question and vote for the rule and to keep the prospects of being less dependent on foreign oil and reducing the amount of money and the deficit that we spend for foreign oil in this country.

Mr. QUILLEN. Mr. Speaker, I yield 5 minutes to the gentleman from North Carolina [Mr. BROYHILL].

Mr. BROYHILL. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, there are a number of Members on our side who would like to have time and I may have to yield to them.

Mr. Speaker, I do join with my colleagues on both sides of the aisle who are concerned that the Rules Committee did not give us the opportunity to vote on an amendment that would save the American people potentially several billions of dollars.

Now the gentleman from Pennsylvania who just spoke, who just left the well, Mr. Speaker, is a good friend of mine and certainly I share his concern about imports. But this amendment has nothing to do with that. We are talking about a program that is spending billions of dollars needlessly by subsidizing fuel for America.

We are talking about a corporation that has been pouring billions down a rathole.

Our budget deficit demands some action. This is not the place to talk about the import problem or try to come up with solutions to the import problem.

We sorely need to do that. The gentleman from Pennsylvania knows I am willing to join with him in coming up with solutions to that problem. But I do not see how we can continue to permit the Synthetic Fuels Corporation, which as I see it is a monument to corporate welfare and bureaucratic waste, I do not see how we can permit that corporation to continue untouched while we are here talking about, which we did earlier this morning, about reducing farm supports, reducing funding for Medicare and transportation, just to name a few.

Unlike many of these programs that I have mentioned where we are contributing to the well-being of our constituents, I do not feel that the Synthetic Fuels Corporation is contributing to anything but the well-being of its officers and employees.

The development of synthetic fuels technology, Mr. Speaker, is taking place but if real progress is being made, it is happening in spite of the Synthetic Fuels Corporation and not because of it, in the private sector.

I just do not believe it makes sense to spend massive amounts of taxpayer dollars to develop these white elephant/pink elephant type of plans in order to demonstrate technologies that are not even remotely eccnomical.

I am certain as the gentleman from Pennsylvania mentioned in his remarks, the majority of our Members

here feel as I do, Mr. Speaker, that something has to be done about the budget. Here is a chance to do it. Legislation is pending that would deal with this subject but we need to do something on this appropriations bill in order to reduce the funding for this particular program.

I think there is a momentum building here to do something about this and it is only a matter of time before this corrective legislation that I am talking about will come before the House. But we cannot wait that long. We have got to act now. The time is now. Synthetic Fuels Corporation could commit all of its funds available to it and once that happens, there is nothing we can do. When that bill comes before us, we will say that we will have already spent the money. We can do something about it now, prevent hundreds of billions of dollars from being poured down the rathole.

□ 1240

Mr. COUGHLIN. Mr. Speaker, I rise today to express my strong opposition to the rule governing the debate on the fiscal year 1986 Interior Department appropriations bill.

My opposition to this rule is based upon its overt protection of the Synthetic Fuels Corporation and the outright ban on offering an amendment to rescind $7.4 billion of its remaining appropriations.

We have fought this battle before. Last year the House only was allowed to work its will on the Synthetic Fuels Corporation when it defeated a similar rule banning synfuels amendments. We must do so again this year for several important reasons.

First, the Synthetic Fuels Corporation is an expense we can no longer afford. Designed to convert our vast reserves of coal and oil shale into liquid transportation fuels, we have learned that this mandate cannot be met. Synthetic fuels technologies are immature and much farther from commercial viability than had been anticipated. We have realized that synthetic fuels technologies are uneconomical and require massive Federal subsidies. In fact, the price of synfuels has risen from $60 to $90 per barrel of oil equivalent while the price of oil continues to decline below $30 per barrel.

Doesn't it seem ironic that we will allow billions of dollars, as much as $7.9 billion, to be spent on the commercialization of uneconomic and immature technologies when, at the same time, we are desperately searching for ways to reduce the deficit.

I maintain that the House must not spend billions of dollars on an industry that requires continued subsidization to develop unproven technologies which present environmental, public health and worker safety risks. We should not drain our limited resources away from productive energy investments. And we should not advocate and finance initiatives which prolong rather than curtail our energy dependence on foreign oil.

Momentum for a change continues to build and it is only a matter of time before corrective legislation is approved by the House. In fact, the House Energy and Commerce Committee has already acted by approving a bill, which I cosponsored, abolishing the Synthetic Fuels Corporation and authorizing a demonstration program.

But we should not wait any longer to stop the flow of red ink in the Federal budget. We should use every opportunity we have, whenever and wherever possible.

Failure to act now will allow the Synthetic Fuels Corporation to continue to commit most, if not all, of the billions of dollars it has available.

It is incumbent upon this House that we not let this happen. Our chance to prevent this wasteful expenditure is to vote down the rule.

I urge a "no" vote on House Resolution 227. A "no" vote will give us the chance to work our will and provide the opportunity to remedy the synthetic fuels mistake without further wasting taxpayers money.

Mr. FROST. Mr. Speaker, for purposes of debate only, I yield 6 minutes to the distinguished majority leader, the gentleman from Texas [Mr. WRIGHT].

Mr. WRIGHT. Mr. Speaker, I rise in support of this rule. I hope we will follow this orderly process. I recognize that there are people with a certain degree of zealotry who have been trying now for several years to do away with the Synthetic Fuels Program that we launched in 1980 in an effort to recoup our strength and build energy independence in this country so that never again would we be vulnerable to the kind of blackmail that we suffered in 1973 and again in 1979.

I know that memories are short and there are people now consumed with newer demands and newer alarms who have forgotten how desperately this country was smitten, and our economy actually brought to its knees by the Arab oil embargo of 1979.

That might have been prevented if we had followed the counsels of visionary people in 1952 and 1953. The President then had appointed a Paley Commission which recommended to us that we needed to develop a synthetic fuels capacity principally from coal if we were to stave off a disastrous dependence upon foreign oil.

Well, we didn't listen. I have before me here a copy of the CONGRESSIONAL RECORD of April 27, 1953, and it is to help us avoid the very mistake that our colleagues of that earlier date made that I want to read to you what they did.

"In the table above," I am reading from the RECORD, "the only appreciable change from the amounts allowed in the current fiscal year is for the Synthetic Liquid Fuels Program. It was reported to the committee that the Secretary proposed to put the synthetic liquid fuel demonstration plans at Louisiana, Missouri in standby."

Well, now, was that because it was not doing its work? No; quite the contrary. It was reported to the committee that "refinements accomplished to date in these processes have brought the cost of producing gasoline down to within a few cents of being commercially competitive."

"The Bureau of Mines has been operating another synthetic fuels demonstration plant at Rifle, CO, from which gasoline has been made from oil shale." Now, this process was reported to be even closer costwise to being commercially competitive.

Now the committee has therefore concluded, what; that we have got a good thing going? And that we ought to move it on until it is commercially competitive, until it is a reality? No. The committee has concluded, therefore, that it is time to close the Rifle plant also, the Bureau appears to have done an excellent job in leading the way in these important developments.

They were content with scientific theory, but my colleagues, we cannot be content only with the scientific theory which we know will prove itself. The Germans proved that they could run the Luftwafe and the Wehrmacht for many, many months after the realities of World War II would have caused them to crumble because they had the capacity to build a synthetic fuels plant and to convert that soft brown coal from the Ruhr Valley into high-grade aviation gasoline.

Now what they did, for goodness sake, we can do; but we cannot do it unless we have enough lead time. So in 1980, we resolved that this Congress was going to mandate that the Government of the United States make us energy independent by 1990; that it produce actual, ongoing production of a commercial-scale plant, of many commercial-scale plants, so that we would have a total of 2 million barrels, not less, by 1990, of commercial production.

Why is that important to us? Wholly aside from our military dependency is our economic dependency. The second biggest problem facing us right after the budget deficits is the trade deficit, robbing us of some $150 billion from our economy, and maybe 4 or 5 million American jobs this year; and the biggest single contributor to that trade deficit is our dependence on foreign petroleum products.

It has not grown better; it has grown worse in these intervening 6 years since 1979. Then we were importing

only crude oil. Today, after having closed down about 150 domestic petroleum refining plants, we are importing not only crude oil, but refined petroleum products as well.

Is it our destiny? Are we willing to accept a second rate status among the nations? Are we willing to say that oil and energy, those things that are the lifeblood of our economy, are something that we are willing to be dependent upon foreign sources for?

Let me just say this: Obviously what we have done is imperfect; obviously many people appointed to this commission have not really believed in its mission and have not performed in an exemplary way, but this program is vital to our national security in the future.

If the Defense Department had in it some people who were not operating in a way that you would like for them to operate, what would you do? Would you abolish the Defense Department? I do not think so. I think we would get rid of the people who had not been well-performing and replace them with people who believed in the mission that we had given to the Defense Department; and that is what I suggest we do today.

The great Committee on Science and Technology does not want this action taken today; they want this rule adopted in order that that great committee may have the oportunity to look at provisions that would aim at curtailing activities on the part of this board rather than just simply doing away with it.

I urge you, in the interests of the future security of the United States, maybe not tomorrow, maybe not next year, to vote wisely for the rule and let any recommendations to do away with this program follow the regular legislative process and not be rushed through here in a moment of passion today, only that we may regret it or our predecessors or our successors regret it in future years as we regret this unwise action of our predecessors of 1953.

Mr. QUILLEN. Mr. Speaker, I yield 4 minutes to the gentleman from Ohio [Mr. REGULA].

Mr. REGULA. Mr. Speaker, I rise in support of the rule. There are three major reasons that will be offered today for not supporting this rule, and I would like to address each of those.

First is the matter of cost. I would point out to my colleagues that if you use apples and apples in evaluating this bill, you would discover that we are about $300 million under fiscal 1985. Obviously you can get different kinds of numbers. However, I would make it very clear that because we have forward funded SPRO in 1984, that to get a valid comparison you have to include that money in fiscal year 1985. Given that fact, we are in effect freezing at 1985 levels minus $315 in this bill.

The administration, of course, has sent out some letters on this, and they would point out that we are over the administration's request in terms of the amount of money that is in the bill.

We took into account, in this bill, the pay raise, and factored that in, because the administration just a few days ago indicated that they are going to support the pay raise and have withdrawn the request for the 5-percent reduction.

□ 1250

Factoring that into their numbers, this bill would then be $900 million over the administration's request.

But let me point out a few things: The administration did not request any money for land acquisition. I think it is unreal, given the fact that one-third of America is owned by the Federal Government to not do any acquisition. There are adjacent lands that ought to be acquired for parks, for the Bureau of Land Management, and for national forests including in holdings, and similar lands, that need to be acquired in fiscal year 1986. Therefore, we put in approximately $144 million to do that.

The administration cut drastically the maintenance amount. Even though we have committed $1 billion in the last few years to improving the quality of the park experience and the forest experience for the people of this Nation, they now want to stop going forward with safety improvements, with health improvements with highways, with the things that are important. This is in spite of the fact that visitations to the national parks are substantially higher.

The administration cuts back on Indian health. Like it or not, we have a responsibility to the Indian population of this country to maintain basic health standards. Therefore, we address that; also we address the matter of soil and water problems in the national lands.

Let me say to all of you again that we are talking about one-third of America, 730 million acres are affected by this bill, and therefore it is important that we address these concerns adequately.

I think the impact of this is illustrated by the fact that we have requests in our subcommittee from 249 Members of the House of Representatives. More than half of the Members submitted requests to us, saying in effect, "This is important in terms of a Federal piece of land in my district that you do this." We tried to respond to those requests.

For all of these reasons, we were over the minimum budget submitted by the administration. I think we did a remarkable job in only going over $900 million, considering the 249 requests from Members of this House, in addition to the needs that I have just outlined.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. REGULA. I yield to the gentleman from Illinois.

The SPEAKER pro tempore. The time of the gentleman from Ohio [Mr. REGULA] has expired.

Mr. QUILLEN. Mr. Speaker, I yield 1 additional minute to the gentleman from Ohio. [Mr. REGULA].

Mr. YATES. Mr. Speaker, the gentleman spoke of the numbers of Members of the House who appeared before our committee and requested certain actions be taken, which we did, in most instances. About 60 Members, if my memory serves me correctly, came in and asked the committee to take steps to inaugurate a clean coal technology program. And based upon those requests and upon the country's needs we provided for a transfer of $750 million from the Energy Security Reserve to the Department of Energy to carry out that program.

Mr. REGULA. I thank the gentleman.

I would add two things. In there we included a requirement that the cost sharing be a minimum of 50 percent from anyone participating, in clean coal programs. Therefore, they have to put their own money up front to get support for the projects. We limit expenditures to $100 million next year.

One last comment, because others will address the Synfuels issues, and that is that this bill is a net revenue producer. We appropriate today, if we pass this bill and this rule, $8.2 billion. The U.S. Treasury will receive from the sale of oil and gas rights, mineral rights, forest products, and other miscellaneous items a total of $12.5 billion. This will net the Treasury $4.3 billion.

Mr. DREIER of California. Mr. Speaker, the time is long overdue for Congress to concede its error and cut its losses by rescinding funds for the continuation of the Synfuels Corporation. At its best Synfuels is a boondoggle, and at worst a careless waste of public revenue the supply of which is increasingly stretched thin.

The SFC was ill conceived in the panic of the 1979 fuels crisis. It promised an eventual solution to our Nation's dependency on foreign energy while guaranteeing a flow of oil and gas from previously untapped resources. In fact, the only flow consisted of billions of tax dollars coursing their way into a bottomless well of waste and mismanagement. The fuels obtained thus far haven't amounted to a trickle.

The highly touted centerpiece of the SFC, the Great Plains Coal Gasification Project, has become a public em-

barrassment—and a case in point for the dismantling of his misbegotten agency. After significant start up problems, fortunately the plant is able to produce synthetic gas. More precisely though, for every $3 of gas produced at Great Plains, the Government spends $10. That's some return on investment. So far, the project's cost to the taxpayer includes $1.5 billion drawn from $2 billion in Federal loan guarantees. Additionally, the project's contractors are negotiating $720 million in price guarnatees to insure payment of money already owed the Treasury.

Synfuels' other projects, though somewhat limited in number, can boast of similar accomplishments. The taxpayer has taken a very expensive bath in the corporation's best intentions. Meanwhile, the SFC retains one of the most highly paid bureaucracies in the history of government spending. Almost $53 million in salaries and administrative costs have been rung up in the last 5 years. That's for a staff which has never exceded 200.

The urgent need for synthetic fuels has been considerably relaxed by the turn of energy events since 1980. Oil and gas price estimates which justified the SFC at that time have not been born out. The major players in the private energy industry have withdrawn from their expanded R&D efforts to synthesize fuel continuing their efforts in correspondence with current needs and the dictates of the reduced marketplace. These corporations have taken the necessary steps to retrench following the popping of the energy crisis bubble.

The lack of necessity in light of the SFC's stated goals leave this agency with a lot of money and no where to spend it. This fact, combined with the agency's lackluster history of management, should convince its remaining congressional supporters to vote for a reallocation of Synfuels funds while putting a quiet end to a body has so little to be proud of.

I urge my colleagues to vote "no" on the Interior appropriation rule to hasten the redirecting of our energies and funds away from a public agency because it has become a public embarrassment. Let's admit the well intentioned mistake of creating the Synfuels Corporation in the haste of potential crisis in favor of recovering these resources for use in counteracting the clearly recognized crisis of the Federal budget.

Mr. QUILLEN. Mr. Speaker, I yield 2 minutes to the gentleman from Indiana [Mr. COATS].

Mr. COATS. Mr. Speaker, I rise today to urge my colleagues to defeat the rule providing for consideration of H.R. 3011, the Interior and related agencies fiscal year 1986 appropriations. I oppose the rule because it does not allow for an amendment to rescind $6 billion from the Synthetic Fuels Corporation.

The Energy and Commerce Committee recently voted overwhelmingly to abolish the agency and establish in its place a $500 million scaled-down Synfuels Assistance Program at the Department of Energy. Common sense tells us that to proceed with anything more would be an unwise and unneeded expenditure of scarce taxpayers funds.

The record of the Synthetic Fuels Corporation speaks for itself. The Corporation has compiled a record of inaction, excessive salaries and pensions, and has not brought about the efficient or cost-effective commercialization of synfuels that sponsors originally anticipated. To spend excessively for synfuels in the name of "energy security" will only waste billions of dollars when budget deficits are already at an all-time high.

If the Congress does not act swiftly, billions of dollars may be obligated by the Synfuels Corporation without any congressional review. When the Corporation was created, it was insulated from congressional review by being authorized through 1992 and received its $15 billion appropriation in one lump sum. Time and circumstances have dramatically altered the need for a synfuels program of the size and with the mission that Congress originally authorized.

The full House of Representatives should have the opportunity to vote on the rescission of Synfuels funds.

I urge a no vote on the rule.

Mr. FROST. Mr. Speaker, for purposes of debate only, I yield 3 minutes to the distinguished gentleman from Michigan [Mr. DINGELL].

Mr. DINGELL. I thank the distinguished gentleman from Texas for yielding.

Mr. Speaker, if this rule is rejected, my colleagues on the Rules Committee can go back up to the Rules Committee and can craft a rule which will enable the rescission of funds for the Synthetic Fuels Corporation; the House will be able to debate the actions of the Synthetic Fuels Corporation; the actions will not bear the test of scrutiny; we can proceed then to adopt what is an otherwise excellent bill; and we can then proceed to address the question of what ought to be done about the Synthetic Fuels Corporation. I urge—and this is the first time in 30 years' service in this body—I urge the rejection of the rule so that those issues can be properly addressed by this body.

If we defeat this rule, I trust that the Rules Committee will understand and be responsive to our reasoning, and craft a new rule to enable the House to have the opportunity to vote on a synfuels rescission amendment. Over all, the bill is an excellent one. I commend the Rules Committee, and I understand why it has done what it has, nevertheless, I think the rule must be objected to by the body.

The Interior appropriations bill is generally an excellent one, but the rule forecloses opportunity to deal with the basic issue.

Now, do not think that I am alone in this view. I just want to read from my old friend, Tom Corcoran. He says: It is preposterous to develop billions in synthetic fuel subsidies when we are faced with a massive budget deficit, cuts in social spending and high interest rates.

He is the vice chairman of that institution. They waste money. They have established a standard of living that exceeds that of any Government corporation. They have more people who make more than $80,000 a year than all of the rest of the government put together. Their first official act, or one of them, was to hire lawyers to figure out how they could keep information away from Congress.

In the entire life of that institution, they have approved three projects, gigantic white elephants, none of which can pay out.

Now, if you are interested in fiscal responsibility, understand we have here an opportunity to save $6 billion. Last year, in the hope that the Synfuels Corporation and its officers would reform and would move forward and provide Federal assistance for projects which would have merit, I supported the continued existence of the corporation. They have been tried; they are now found wanting. They waste. They construct enormous white elephants at vast costs to the taxpayers, instead of developing the technology and putting in place the size projects that will enable this country to move toward independence.

The arguments about imports and all of the other good questions are matters of concern. Developing coal, and liquid fuels therefrom, are extremely important. But the Synthetic Fuel Corporation in all of its years has not done anything about those problems.

So I say let us simply recognize they have not done what they are supposed to do. Let us abolish them, let us set up an appropriate size program in the Department of Energy, and let us move forward then toward the steps that will move this Nation toward a measure of energy independence based on good research, based upon responsible conduct in public office.

I would point out to my colleagues that at issue here are billions of dollars of taxpayers' moneys that can be saved. The savings will be small at first, but, believe me, dear friends, they will grow.

I yield to no man in affection for the majority leader. But on this he has a

blind side, and his views should be rejected.

Mr. QUILLEN. Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts [Mr. CONTE].

Mr. CONTE. Mr. Speaker, I rise in opposition to this rule providing for the consideration of H.R. 3011, making appropriations for the Department of the Interior and related agencies for fiscal year 1986. I do so because of the failure of the rule to permit me to offer an amendment to the Interior appropriations bill that would rescind funds previously appropriated for the Synthetic Fuels Corporation. It is clear that the time has come to stop the corporate subsidies and give-aways for the fat cats of the oil industry. But the only way to do that is to defeat this rule.

Back in 1980, when the Synthetic Fuels Corporation was first funded, synthetic fuels were the wave of the future. But since then, oil scarcity has turned to glut, and the price of imported oil has dropped dramatically. Just this week, we have been treated to the welcome news of OPEC oil ministers squabbling among themselves in an effort to stop the over-production and price cutting that threatens to destroy OPEC's stranglehold on the world's oil supply.

During our debate on this issue last year, several Members pointed to the instability in the Persian Gulf, the ongoing war between Iran and Iraq, and attacks on oil tankers, as evidence of the need to proceed full speed with the development of our synthetic fuel resources. What has the past year taught us?

It has taught us that despite continued and even increasing instability and conflict in the Middle East, our oil supply remains virtually unencumbered. Since last year, our dependence upon Middle Eastern oil has continued to decline, as ever-increasing portions of our oil imports come from our South American neighbors.

The past year has taught us that despite the best intentions of those who bailed out the Synthetic Fuels Corporation last year, the sweetheart deals, enormous subsidies, and outrageous life styles of Synfuels Corporation employees have continued.

As a result of continued filling of the strategic petroleum reserve, we are today in an even better position to withstand an enforced reduction in oil imports than we were a year ago.

We've been hearing a lot over the past several months about the budget deficit—well, here's the best opportunity we'll see in a long time to make a real cut. At a time when budget conferees are talking about cuts in food stamps and increasing the taxes on our elderly Social Security recipients, how can we even think about continuing to pay Union Oil a million dollars a day in price supports for 6 years—and that's in addition to the $3.4 billion in tax breaks!

When the budget conferees are talking about cutting transportation funds by 15 percent, how can we even think about providing billions of dollars in taxpayer subsidies to guarantee a return of over 20 percent for one of the most profitable companies in the Fortune 500.

How can we explain to those constituents back home who are breaking their backs 40 hours a week, sweating to pay taxes, that we didn't do anything to reduce the deficit, to bring down interest rates, to save billions of dollars when we had the chance?

Mr. Speaker, the Synthetic Fuels Corporation has had its chance. It should have been killed a year ago. The past year has given us just more of the same—more money wasted on staff perks and privileges, more money wasted on subsidies for oil companies to build plants that don't now and perhaps never will work, more money wasted on technology that won't be economical for at least 20 years, and more empty promises that the Corporation will be brought under control.

The Synthetic Fuels Corporation has proven beyond a shadow of a doubt that it is incapable of bringing itself under control. Now it is up to Congress to put this monster out of its misery.

I urge the defeat of this rule so that my amendment can be offered.

Mr. QUILLEN. Mr. Speaker, I yield 3 minutes to the gentleman from Arizona [Mr. RUDD].

Mr. RUDD. Mr. Speaker, I rise in support of the rule for the consideration of H.R. 3011, the Interior appropriations bill.

Some of my colleagues are opposing this rule because it does not allow for an amendment to rescind funding for the Synthetic Fuels Corporation. Such an amendment is not germane to the bill and would constitute legislation on an appropriations bill.

It's true that we don't need synfuels today. We have adequate supplies of oil and relatively stable prices. But it would be a grave mistake to send the signal only 5 years after authorizing the Synthetic Fuels Corporation that we are no longer serious about pursuing energy independence. We wouldn't cancel the fire insurance on our homes just because we haven't suffered from fire damage over the last 5 years. A fire could break out tomorrow. Just because we're not facing an energy emergency today, there is no reason to believe we will be so secure in the years ahead. About one-third of U.S. energy needs is now satisfied from imports, about the same as in 1973. Synfuels development provides our Nation with crucial insurance protection against increasing dependence on foreign sources of energy, particularly the volatile Middle East.

We are already falling behind other countries in synfuels technology. West Germany and Japan are leading the way in direct coal liquefaction. South Africa is leading in indirect coal liquefaction. The synfuels plant in South Africa has proved that we can have synthetic fuels at the rate of about $2.50 per gallon for gasoline. We cannot continue to lag behind in synfuels technology.

Twice during the 1970's, this Nation found itself grossly unprepared to deal with energy crises. The long gas lines, the prospect of rationing, and the memories of skyrocketing prices appear to have faded, and we are forgetting how vulnerable we can be to manipulation of our energy supplies from abroad. Such manipulation is a serious threat to our national and economic security, and in recognition of this threat, the Defense Department is already working with the Synthetic Fuels Corporation to address defense needs.

Finally, let me point out that the savings from abolishing the Synfuels Corporation are grossly inflated. Synfuels support comes mainly in the form of price supports and loan guarantees. Under the best scenario, the projects would not cost the Synfuels Corporation any money. Indeed, in a July 9, 1985, letter to the Energy and Commerce Committee, the Congressional Budget Office said that abolishing the agency and authorizing $500 million for an R&D program in the Energy Department would reduce estimated budget outlays by only $332 million from fiscal year 1986-90. This is nowhere near the $6 billion mentioned by SFC opponents.

I urge the adoption of the rule. Synfuels development is vital to national security and ought to be continued.

□ 1300

Mr. QUILLEN. Mr. Speaker, I yield 1 minute to the gentleman from Ohio [Mr. OXLEY].

Mr. OXLEY. I thank the gentleman for yielding to me.

Mr. Speaker, I would like to call this opportunity to vote perhaps a "Give us a chance to vote," and that is to give those of us who have some strong feelings about synfuels an opportunity to debate and vote on this very important subject. It seems to me that we have an opportunity here to not only save the taxpayers a great deal of money, but also to make public policy in the sunshine; something that we talked about earlier this morning. So the opportunity is there for all of us to vote down the rule and give these folks on both sides of the aisle an opportunity to debate this very important issue.

The distinguished majority leader has said, I think I quote: "This program is vital to our national security." If this program, as it is currently existing, is vital to our national security, then we are in a lot more trouble than we think, because this program has already authorized $2.6 billion in spending authority. It has spent $70 million; it has employed 200 bureaucrats, and what have we got to show for it? Absolutely nothing.

I ask that this vote be resounding against the rule.

Mr. FROST. Mr. Speaker, I yield such time as he may consume to the gentleman from Kentucky [Mr. PERKINS].

Mr. PERKINS. I thank the gentleman for yielding time to me.

Mr. Speaker, I rise to urge an affirmative vote on ordering the previous question and also on approval of this rule. It is absolutely vital to the national security and economic health of our Nation that the synthetic fuels program continue.

A little over 32 years ago, on April 27 and 28, 1953, this House debated on whether or not to add $2 million to the Department of Interior appropriation bill to continue in operation three synthetic fuel plants operated by the Bureau of Mines. In 1953, the Committee on Appropriations proposed that these plants be shut down. These plants were producing gasoline from coal and oil shale within a few cents a gallon as what it cost to refine gasoline from crude oil. This was admitted in the report accompanying the Interior Department's appropriation bill. A coal liquification plant was operating at Louisiana, MO; a coal gasification plant was working at Gorgas, AL; and an oil shale plant was operating at Rifle, CO.

It was said in 1953 that private industry would develop a synthetic fuels industry. Well, we all know what happened. The amendment to add the $2 million was defeated, the plants were shut down, and nothing happened. The only thing that did happen was that the technology made its way to South Africa which put their Sasol I synthetic fuel plant in operation about 1956.

The United States is importing a significant portion of its energy needs. Let's not forgot what occurred during the shortages of the 1970's. This could start tomorrow. All it would take would be for some terrorist to sink a super tanker in the Straits of Hormuz. Then we would have some real gasoline lines.

One of the basic rationales for the 600-ship Navy is to protect the sea lanes to the Middle Eastern oil fields. The basic rationale for the Rapid Deployment Force is also to protect the Middle Eastern oil fields. It is planned to pre-position ships at Diego Garcia so that troops can go ashore in the Middle East to protect the Arab oil. This Congress has been willing to spend billions of dollars to protect the oil owned by Middle Eastern potentates.

The purchase of imported oil is also a significant cause of our international trade deficit which is devastating the U.S. economy. There are three good reasons to vote yes on the rule. One, for the national security of our Nation; two, to lower the Defense budget by creating a synthetic fuel industry and thereby stopping the need to use American boys to protect the oil of Middle Eastern potentates; and, three, to reduce the Nation's trade deficit.

Mr. Speaker, in my opinion, any one of these reasons is sufficient in and of itself to vote yes on ordering the previous question and yes on this rule.

Mr. Speaker, we cannot today make the same mistake that was made over 32 years ago. It is not often that we will have the opportunity to avoid repeating the mistakes of the past. There is one such opportunity today.

Mr. FROST. Mr. Speaker, I yield 3 minutes to the gentleman from Florida [Mr. FUQUA].

Mr. FUQUA. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of the rule, and I would like to briefly explain why. This vehicle before us is an appropriations bill. It is not a legislative bill; it does not come from a legislative committee.

The Committee on Energy and Commerce has reported a bill that seeks to make certain changes in the Synthetic Fuels Corporation. That bill is now pending before the Banking and Urban Affairs Committee. The Committee on Science and Technology, which I have the honor to chair, has requested sequential referral. We have jurisdiction; we have a great interest in the matter of synthetic fuels.

The Committee on Science and Technology in 1975 brought the first bill to this floor relating to synthetic fuels, so our interest goes a long way back in this particular area. We intend to hold hearings on this legislation. We hope that we can perfect and correct any inequities or errors that have been involved in the Synthetic Fuels Corporation as we know today. But let us not just abolish the agency because we are mad because somebody did something they did not like.

We have had a problem in procurement with the Department of Defense but we did not abolish the Department. We tried to correct the problem. That is what we are trying to do here. I urge my fellow colleagues to give us a chance to orderly work through the legislative process and let the legislative committees that have an interest in this and have had a long and continuing interest in this area give us an opportunity to work through the legislative process and bring a bill to this floor.

It has been reported out of a committee, so it will get to the floor, and then the House will have its opportunity to work it in the proper forum, not as an attachment to an appropriations bill.

If you believe in the legislative process, I hope you will vote for the rule. We will have a bill of some sort on the floor that will be open to amendment. Everybody will have a chance to make their wishes known.

Mr. WIRTH. Mr. Speaker, will the gentleman yield?

Mr. FUQUA. I yield to my friend from Colorado.

Mr. WIRTH. I thank the gentleman for yielding.

Mr. Speaker, I want to associate myself with the gentleman's remarks and the process that ought to be followed, which he has described very well. As a member of both the Commerce Committee and the Science Committee, I have been an advocate of developing an energy independence program which the gentleman has been so much of a leader in, and I would hope that we would follow the regular process in this.

Mr. FUQUA. I appreciate the gentleman's support and I would like to further state that we have worked with all of the committees when this Corporation was created. We have had an interest for a long, long time in synthetic fuels and energy development. Alternative sources of energy. While we may have a glut of energy today, that does not mean that that is going to exist 5 or 10 years from now.

I urge that we let the legislative process work. Vote "aye" on the rule so that we can get on with the business of trying to work through the normal procedures of the House, and not attach something to an appropriations bill that has no business being on there. We worked very closely with the distinguished gentleman from Illinois [Mr. YATES] in funding programs, and the gentleman from Ohio [Mr. REGULA] in funding programs, particularly in the fossil fuel area. Our interest goes a long way.

I do urge a vote for the rule so we can consider this bill.

Mr. QUILLEN. Mr. Speaker, I yield 1 minute to the gentleman from Iowa [Mr. TAUKE].

Mr. TAUKE. I thank the gentleman for yielding.

Mr. Speaker, it is important for us to act on this critical issue of synfuels today because the train is about to leave the station on a number of major expenditures. One is on the Great Plains project. Let me just briefly discuss the Great Plains project.

The Federal Government put in $1.5 billion. One point five billion. The private sector put in $559 million. They

received in tax breaks over $30 million more than they put into the project—so far, they have a $30 million profit in tax breaks. They have put in not one nickel of equity.

They are producing fuel that costs $92 a barrel and so what are they doing? Coming back for a $720 million subsidy, that if we do not act on today will be granted. A $720 million subsidy to sell this fuel which they have produced.

It seems to me that we should be appalled at the notion that now the Synfuels Corporation is considering forgiving a good portion of the $1.5 billion loan we have already put in, and we have said that the private sector can get out by August 1986, meaning the Federal Government would be stuck with over $2 billion in losses.

This is a boondoggle from the word go, and to stop projects like this, we need to act today. Vote "no" on the rule.

□ 1310

Mr. QUILLEN. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania [Mr. CLINGER].

Mr. CLINGER. I thank the gentleman for yielding this time to me.

Mr. Speaker, the issue is joined here clearly. Those who are supporting this rule believe that the Synthetic Fuels Corporation has a vital role to play in securing America's energy independence, and it also has a vital role to play in the national security of this country.

Those who oppose this rule are trying to kill the Synthetic Fuels Corporation without giving the House of Representatives an adequate opportunity to really explore the ramifications of that action. The gentleman from Michigan has indicated that we should kill the Synthetic Fuels Corporation today because his committee has fully explored the issues and has arrived at its conclusion. But the fact is that, as the gentleman from Florida indicated, a number of other committees have a very vital interest in this program and have not had an opportunity to work their will and explore what the fallout would be.

Mr. Speaker, I serve as the ranking minority member on the Committee on Government Operations Subcommittee which has oversight jurisdiction over SFC, and we have studied the Corporation extensively. We have studied the outlook for world petroleum markets as well. If anyone doubts the necessity for a viable, commercial-scale synfuels program, they need only look at the increases in U.S. domestic consumption of petroleum products in 1984. They were up 5 percent. We are no longer in the days when we had decreasing consumption.

In addition, U.S. oil imports were up in 1984 by 8 percent. We talk about the deficit. Are we not concerned about the enormous trade deficit we are running to which oil imports are contributing $60 billion? We cannot afford the luxury of waiting until another crisis occurs.

A number of well-respected oil economists told us that by 1990 we can expect over one-half of our oil imports to once again come from OPEC nations, and most of that is produced in the Middle East, and I need not remind my colleagues of the unstable conditions that exist in that area of the world.

We can be proactive rather than reactive by supporting the Synthetic Fuels Corporation.

The major arguments we hear against the SFC is that it has been wasteful and abolishing it will cut the deficit by $6 billion. While there is no doubt that the program has had serious flaws in the past, there are now visible improvements at SFC for two major reasons. No. 1, last year Congress addressed this problem by cutting SFC's authorization by 45 percent and providing that 50 percent of the savings resulting from scaling down its projects would be returned to the Treasury. That was a responsible action. It was instigated by the same group that is opposing the rule today. But that action was barely 1 year ago. Seeking to abolish the Corporation without the opportunity for Congress' intent to be carried out would not be responsible. We have already taken action to put the SFC on the right path, this is not the time to pull the rug out from a program vital to our energy security.

The second factor not addressed by opponents of SFC is the dramatically new approach to project approval and technology selection which the SFC has developed in their new comprehensive strategy. This approach has just been completed and recognizes the wisdom of Congress in cutting the funds last year. The strategy calls for smaller projects, costing less to the taxpayer and putting in place the diversity of technology necessary to have a viable commercial alternative to petroleum. It is a lean and mean approach which we must give time to work.

The biggest argument against SFC is that by cutting it out completely we will save $6 billion which will have a direct effect on the budget deficit. This is simply not correct. The assistance given by SFC is in price supports and loan guarantees and is not an immediate outlay. The assistance would go to projects in most cases over a period of 10 years. Do not be deceived by the claims of immediate budgetary effects. In fact, a CBO study done for the gentleman from Michigan [Mr. DINGELL], showed that total budgetary impact of the amendment he seeks to offer would be $332 million—and that would be over a 5-year period, through fiscal year 1990.

On the other hand, if SFC were abolished, the Department of Energy would have to come to this body immediately seeking $1.5 billion to payoff the loan to the Great Plains project which DOE guaranteed. I stress that this would be an immediate dollar outlay of $1.5 billion. I believe the dollar tradeoff is clear, as is the necessity of acting for the energy security of our Nation. I really would like to see this House act responsibly, taking into account the future policy implications of our actions. The whole story shows us that SFC has built a responsible program, has a new Board to implement it, and is now poised to get us out from behind the threats of foreign imports. A smaller Energy Department R&D program is not the answer. We have gone that route unsuccessfully before.

The time to act is now and the vote to make is in favor of the rule.

Mr. FROST. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the gentleman from Indiana [Mr. SHARP].

Mr. TAUZIN. Mr. Speaker, will the gentleman yield?

Mr. SHARP. I would be happy to yield briefly to the gentleman from Louisiana.

Mr. TAUZIN. I thank my chairman for yielding.

Mr. Speaker, we need badly to oppose this rule and to get at the Synfuels Program. The logic of the Synfuels Program today is to commercially put in place projects that will develop synfuels for the future. The logic is so bad because the technologies are changing so fast. We may, in fact, invest billions of dollars, if we do not do something now, in technologies that will be as obsolete tomorrow as some of the personal computers of 5 years ago are today.

That is the kind of bad logic synfuels is engaged in. If we do not vote "no" on the rule, we cannot get into this debate and we cannot save this $6 billion.

Mr. SHARP. The gentleman is absolutely correct. Let me say procedurally the time is now, substantively the time is now.

Procedurally, we have to understand that it is very difficult for the Congress to get at the synthetic fuels program. Unlike the defense budget, unlike the budget on the domestic side, this was set up to be so insulated that we do not have any kind of annual or 2-year or 4-year review of this program.

We must seize the opportunity now. The only other time Congress got at this program was last year when it did the identical thing we are asking you to do today. Last year the House rejected the Interior appropriations rule

after which another rule came to the floor and we got to debate synfuels and make decisions about it.

Substantively the time is now, ladies and gentlemen, because the Corporation is in a position to commit us to $6 billion of future deficit spending; we can prevent that now.

Let me suggest to you, as one who supported this program, who sought to give the Reagan administration the opportunity over the last 4 years to make it work, that I cannot buy any longer the arguments that this is the direction in which to go; we can find few energy experts in this country who believe this is a wise place to put the limited number of Federal dollars that we have to spend on energy today.

The deficit cries out for us to cut the budget. It requires us to set firmer priorities, and this is the time to do it on synthetic fuels. If we are interested in coal, as I am interested in coal development, there are much better ways to go about it. This is the most wasteful approach we can take.

Mr. Speaker, I ask my colleagues to vote against the rule.

Mr. QUILLEN. Mr. Speaker, I yield 3 minutes to the gentleman from Colorado [Mr. STRANG].

Mr. STRANG. I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise in support of the rule because this has come down to a debate over synthetic fuels. Aside from being an improper forum to decide major issues in Congress, I raised some objections because, referring to the majority leader's comments back in 1953, are my colleagues aware what this Congress did with the coal gasification process that we had developed?

We gave it to South Africa, and it works. They are energy independent. We gave it to South Africa. This is the kind of action that this flagrant abuse of numbers and exaggeration is driving us to today.

We lost our nuclear initiative. We have lost it. We have lost it because we will not permit it to go forward. We are legislating by rescission. That is a mistake.

Talk about cost sharing, Mr. Speaker. Somebody mentioned cost sharing. Are my colleagues aware that on reliance that this Congress meant what it said, Union Oil has spent $683 million of their own money on their own project in Garfield County, CO?—$683 million. No taxapayer dollars. There are no synfuels dollars in western Colorado and there will not be for several years because they have to buy product.

What are the people in Florida and California going to do when they move down there for their declining years? They are already energy independent. What are they going to do in 1995 when we have a real, major energy wreck on our hands? They are going to ask us what we did. They are going to ask us what we did, and I do not know what we are going to tell them. What are we going to tell them? That we just wanted to save a few bucks now and we could not deal with the strategic and long-term importance of energy for this country? Six hundred billion barrels of available oil in the Green River formation alone in Utah and Colorado and we turned our back on it.

What are we going to do in 1995? What are we going to tell the people in Michigan, in Ohio, about the jobs that we create for them for a vehicle that cannot have any gasoline to drive? Have we forgotten the gas lines?

Do not defeat this rule. Mr. Speaker, we are about to go down the same road that our distinguished colleagues, Mr. Perkins of Kentucky and Mr. Aspinall of Colorado warned us against in 1953. Where did our development technology go? We gave it to South Africa. Let us not do that again.

Mr. FROST. May I inquire of the Chair how much time is remaining?

The SPEAKER pro tempore. The gentleman from Texas [Mr. FROST] has 4 minutes remaining and the gentleman from Tennessee [Mr. QUILLEN] has 4 minutes remaining.

Mr. FROST. Mr. Speaker, for purposes of debate only, I yield 1 minute to the gentleman from Illinois [Mr. YATES] the chairman of the subcommittee.

Mr. YATES. I thank the gentleman for yielding this time to me.

Mr. Speaker, I urge support of this rule. This is a good bill which the Interior Subcommittee of the Committee on Appropriations has brought to the House. It is a responsible bill.

Members have received a letter from our good friend, the gentleman from Minnesota [Mr. FRENZEL], in which he says that this bill is over the 1985 bill. That is not true. A true comparison between the amount of the bill that we have brought to the floor and the amount in the 1985 bill shows that we are at least $55 million below that bill.

□ 1320

We are now $254 million below our allocation under 302(b) in accordance with the budget that was established under the budget resolution approved by the House. We are in our bill not taking advantage of the so-called 5-percent pay reduction. We have money for the pay of Federal employees in the bill. We are not looking to pay them in a supplemental bill, as has been claimed by other committees.

This is a good bill. I am sorry that we got into the debate on the Synthetic Fuels Corporation. I think that is a subject for the bill that has already been reported by the Energy and Commerce Committee. That bill has been reported, and that bill should be given the opportunity of being debated on the floor in a legislative procedure rather than in an appropriation procedure.

Mr. QUILLEN. Mr. Speaker, I yield 1 minute to the gentleman from Utah [Mr. NIELSON].

Mr. NIELSON of Utah. Mr. Speaker, I rise in support of the rule at the risk of offending my ranking minority member, the chairman of my committee, and most of my colleagues on the Energy and Commerce Committee. I strongly support the rule.

I feel the vehicle that was adopted in the Energy and Commerce Committee is the one that should be used in the legislative process. It should come to the floor and be debated on the floor with appropriate amendments. I do not believe it should be in the appropriation bill.

I would like to point out that there are some successes in the Synthetic Fuels Corporation. One small one that I had mentioned is the Geokinetics Corporation which has been energy-efficient. It is already producing oil in an environmentally sound way. There are many others also, and some are in the process of developing tar sands. I believe we should put our eggs in more than one basket. I support the rule, and I would like to deal with the Synthetic Fuels Corporation directly.

Let me make one further rejoinder. We did take $5 billion out of this Corporation last year. We have not had time to see what effect that has had. They have a new Board. Let us give them a chance to operate and deal with it in a legislative fashion later.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I urge adoption of the rule.

We have heard debate on the Synthetic Fuels Corporation and how important it is to develop alternate sources of energy. Also, action on the Interior appropriation itself is necessary. I think we must get down to the business of passing this appropriation bill.

In further regard to the Synthetic Fuels Corporation, there are those who say that it is not operating efficiently. If you have a sore on your hand, you do not cut off the hand to cure the sore; you treat the sore. That is what we should do with this Corporation. We should bring it in line and let it do what it was intended to do.

Mr. Speaker, I urge adoption of the rule, and I reserve the balance of my time.

Mr. FROST. Mr. Speaker, for purposes of debate only, I yield 1 minute to the gentleman from Michigan [Mr. WOLPE].

Mr. WOLPE. Mr. Speaker, there is one overriding issue in the vote we are about to take, and that is whether we are going to allow the slogan of

"energy security" to continue to protect the most wasteful, the most mismanaged agency in the Federal Government, one that is squandering literally billions upon billions of taxpayer dollars, or whether we are really going to do something genuine about our energy security requirements.

Wasting billions of dollars on energy products that cost up to $90 a barrel of oil equivalent is diverting resources away from those kinds of energy investments that will really reduce our vulnerability to import oil. Let us understand very clearly that a vote for energy security is a no vote on this rule so that Members of this body can begin to hold the Synthetic Fuels Corporation accountable once and for all and so we can put an end to the waste of billions of taxpayer dollars.

Mr. Speaker, let us give Members of this body an opportunity to save 6 billions of taxpayer dollars and make a real contribution to energy security.

Mr. FROST. Mr. Speaker, I would inquire, has the gentleman from Tennessee [Mr. QUILLEN] used all of his time?

The SPEAKER pro tempore. The gentleman from Tennessee [Mr. QUILLEN] has 2 minutes remaining.

Mr. QUILLEN. Mr. Speaker, at the appropriate time I will yield 1 minute to the gentleman from Massachusetts [Mr. BOLAND], and to account for the balance of my time, I now yield myself 1 minute.

Mr. Speaker, I urge the adoption of the rule. Let us not be penny-wise and pound-foolish. Let us go forward and do what we have to do for this Nation to develop alternate sources of energy. Let us pass this rule overwhelmingly and let the appropriate authorizing committees of the House handle this synthetic fuels matter when they bring their bill to the floor.

Mr. Speaker, I now yield 1 minute to the gentleman from Massachusetts [Mr. BOLAND], and after that I will yield back the balance of my time.

Mr. BOLAND. Mr. Speaker, I am grateful to the gentleman from Tennessee [Mr. QUILLEN] for yielding a portion of his time to me.

Mr. Speaker, I strongly support the rule on H.R. 3011, the appropriations bill for the Department of the Interior and related agencies.

I understand the reason for the fight on this rule. A number of Members of this House believe that it's time to pull the plug on the Synthetic Fuels Corporation, and they want the Interior appropriations bill to be the executioner. I oppose this effort on both procedural and substantive grounds.

Mr. Speaker we had this same argument on synthetic fuels last year. As a result of that debate, we approved a sizable rescission in the funds previously appropriated to the Synthetic Fuels Corporation, we put the managers of that enterprise on notice that we expected them to institute some administrative reforms. Changes have been made as a result of what took place on this floor last August, but some would not give the Corporation a chance to see the fruits of those changes.

This year, the Energy and Commerce Committee has approved a bill which would effectively abolish the Synthetic Fuels Corporation. The Banking Committee has concurrent referral of that bill, and the Science and Technology Committee has requested sequential referral of it. The amendment which would be offered to the Interior appropriations bill if this rule is defeated is the bill reported by the Energy and Commerce Committee. I want to make it clear that I am going to vote against that bill in whatever form it comes to the floor. I think it is a shortsighted measure for which, if approved, we will pay dearly in the future. But I can't help but believe that this institution would be better served if all of the committees with jurisdiction over the various aspects of the Synthetic Fuels Corporation bill had a chance to consider it. There is no good reason, in my judgment, for short-circuiting that process in this case.

Mr. Speaker, where are our memories? The arguments we have heard on this floor against the Synthetic Fuels Corporation would have us disregard both history and common sense. I remember the atmosphere in this Chamber 5 years ago when the Synthetic Fuels Corporation was created. The Members who voted to launch our Nation's synthetic fuels effort, and I was one of them, understood two things. We knew that synthetic fuels were going to be expensive, and we knew that neither the strategic petroleum reserve nor energy conservation were going to provide effective long-term alternatives to imported petroleum. In the intervening 5 years, crude oil prices have fallen and our recollections of gas lines, factory closings, and early school dismissals have faded. You would think our energy problems had disappeared.

Some things have not changed since 1980. We all receive mountains of statistics on energy supplies and energy use. None of those statistics have ever led me to conclude that petroleum is other than a finite resource. No estimates which I have seen have shown that domestic oil and gas reserves, either onshore or offshore, are increasing. In fact, at least since the 1952 report by the Paley Commission we have been warned that the United States will run out of oil and gas. We are not sitting on oceans of oil in this country and we are never going to be. And what's more, Mr. Speaker, our consumption of imported petroleum, after several years of decline, is again moving toward the levels of the 1970's.

In my judgment, synthetic fuels represent our only path to energy independence. We knew, or at least I thought we knew, when we created the Synthetic Fuels Corporation that the road to commercial development was uncertain and likely to be expensive. We also knew, however, that when they were needed, synthetic fuels would look like a bargain at any cost. When synthetic fuels are needed, they are going to be needed in quantities approaching the 2 million barrels per day of production capacity which the Synthetic Fuels Corporation was charged with establishing. We simply will not have the time to build the plants necessary to produce synthetic fuels in those quantities, if we wait until a time of crisis to get started. You can do all of the research you want, and do small demonstration projects until there is not enough warehouse space at the Department of Energy to store them all, but if the necessary synthetic fuels plants are not in operation when the next crunch comes, all of the fancy blueprints, and academic treaties we will have purchased with the kind of program envisioned in the energy and commerce bill will be of little comfort.

It remains incumbent on this Congress to encourage the development of those alternative fuels on which our Nation's future will depend. Synthetic fuels are those alternatives and we dare not allow a complacence brought on by a temporary oil glut, to make us lose sight of the need to have them available when they are needed.

The SPEAKER pro tempore. The Chair will state that the time of the gentleman from Tennessee [Mr. QUILLEN] has expired, and the gentleman from Texas [Mr. FROST] has 2 minutes remaining.

Mr. FROST. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the gentleman from New York [Mr. LAFALCE], whose subcommittee has jurisdiction over this matter.

The SPEAKER pro tempore. The gentleman from New York [Mr. LAFALCE] is recognized for 2 minutes to close debate.

Mr. LAFALCE. Mr. Speaker, obviously a great many Members of this body want to vote on the continued existence or not of the Synthetic Fuels Corporation. They will get that opportunity, but I do not think they ought to get that opportunity on the Interiors appropriations bill.

My Subcommittee on Economic Stabilization has jurisdiction over the issue. We will have hearings on it immediately after we return from the August recess. I hope to report a bill out in the middle of September so that the Science and Technology Committee can then take it up and Members

can discuss the merits of the Synthetic Fuels Corporation and the merits of the approach we should take toward energy independence after full authorizing committee deliberations.

On the merits of the issue right now, I would point out, too, that this body did in August 1984 take dramatic action. We virtually cut in half the amount of money available to the Synthetic Fuels Corporation, and we totally changed its board of directors. They have had virtually no opportunity to carry out the will of this Congress now, and yet the members of the Synthetic Fuels Corporation's board of directors and its officers right now are those individuals who, either when they were here or on the outside, did not even favor the creation of the Synthetic Fuels Corporation. So we do not have an unfriendly audience running this Synthetic Fuels Corporation now. Those who would abolish it have a friendly board of directors and a friendly group of officers.

Mr. Speaker, this is an inopportune time to act. It is too precipitous, and we will have another opportunity. We will have another opportunity very shortly after we return from the August recess. I urge a "yes" vote on the rule.

● Mr. SYNAR. Mr. Speaker, I rise in strong opposition to the proposed rule. I do so reluctantly because I have great respect for the chairman and the committee. But as I did almost a year ago to the day, I stand in opposition to this rule; I stand in opposition to the most wasteful and unproductive agency in the Federal Government today—the Synthetic Fuels Corporation. We must put an end to the Synthetic Fuels Corporation now and, to do so, we must defeat this rule.

We will hear today about this Nation's continued vulnerability to foreign oil dependence and the need to remain committed to pursuing energy security. The issue before us today, however, is not simply an issue of energy security. It is an issue of how we as a Nation can achieve energy security in the most productive manner at the lowest possible cost to the taxpayer. The question is not whether we need an energy insurance policy, the question is what kind of coverage that policy provides and how much that policy costs.

If you consider nothing else today, I urge you to go beyond the traditional rhetoric surrounding this debate, beyond the image of the ayatolla, beyond the image of Persian Gulf strife, and focus on the substance of this program—the projects themselves. It's the projects that make the program.

As chairman of the Government Operations Subcommittee with responsibility for overseeing the Synfuels Corporation, I have followed as closely as any Member of Congress the trials and tribulations of this program and the projects it has brought us. This program has brought us the Union Oil shale facility in Colorado which, after 20 months of unsuccessful startup attempts, remains crippled by the technological difficulties inherent in the premature commercialization of infant technologies. This program has brought us the Great Plains project which remains continually dependent upon forever increasing taxpayer subsidies. I urge my colleagues to look at where we have been with this program and where we are going. Because even as we debate the wisdom of this program today, the Synfuels Corporation continues to negotiate additional assistance for the Union Oil shale facility and more subsidies for the Great Plains project. The past has clearly evidenced the failure of this program. The future promises only the disastrous consequences of our failure to act today.

As we debate the future of this program, our colleagues in the budget conference continue to struggle with ever-increasing deficits which truly threaten the security and prosperity of this Nation. Since we debated this program last year, the deficit has become larger, the prospects for substantial long-term deficit reduction have become dimmer and the expectations of synfuels viability have become more distant.

The real question before us today is a question of priorities and equity. It is a question of whether we as a Congress are prepared to say no to the family farmer, not to the elderly, no to the hungry and the homeless and yes to the handful of multimillion- and billion-dollar corporations that want Uncle Sam to pay their way to greater profits. It is a question of whether we as a Congress are committed to getting serious about this Nation's deficit problems and doing so in a fair and equitable manner.

Mr. Speaker, there are those who ask why we must act now. Just last week, the Synthetic Fuels Corporation reached preliminary agreement to provide an additional $720 million in taxpayer subsidies to the Great Plains project. We may not be able to alter that decision. But, Mr. Speaker, the Great Plains story is the story of the Synfuels Corporation. It is a story of technologies which cannot and will not for the foreseeable future be able to compete in the marketplace. It is a story of sponsors returning time and time again for more and more of the taxpayers' money. It is a story to which we must now write an end. We must cut our losses before its too late. I urge my colleagues to vote no on the rule and support the efforts of myself and my colleagues to put an end to the Synthetic Fuels Corporation.●

□ 1330

The SPEAKER pro tempore. All time has expired.

Mr. FROST. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. SYNAR. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 179, nays 251, not voting 3, as follows:

NOT VOTING—3

Downey	Hefner	Monson

□ 1340

Messrs. SILJANDER, JONES of Tennessee, EDWARDS of Oklahoma, SMITH of Florida, STARK, PANETTA, FOGLIETTA, and BADHAM changed their votes from "yea" to "nay."

So the resolution was not agreed to.

The result of the vote was announced as above recorded.

□ 1350

GENERAL LEAVE

Mr. MOAKLEY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on House Resolution 227.

The SPEAKER pro tempore. Is there ojection to the request of the gentleman from Massachusetts?

There was no objection.

WAIVING CERTAIN POINTS OF ORDER AGAINST CONSIDERATION OF H.R. 3038 DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT-INDEPENDENT AGENCIES APPROPRIATION ACT, 1986

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 233 and ask for its immediate consideration.

The Clerk read the resoluton, as follows:

H. RES. 233

Resolved, That during the consideration of the bill (H.R. 3038) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1986, and for other purposes, all points of order against the following provisions in the bill for failure to comply with the provisions of clause 2 of rule XXI are hereby waived: beginning on page 2, line 8 through page 7, line 17; beginning on page 8, line 4 through page 10, line 8; beginning on page 10, line 22 through 25; beginning on page 11, line 7 through page 12, line 13; beginning on page 12, line 20 through page 13, line 6; beginning on page 14, lines 12 through 21; beginning on page 15, line 13 through page 17, line 7; beginning on page 18, line 10 through page 23, line 18; beginning on page 24, line 14 through page 27, line 21; beginning on page 28, line 4 through page 31, line 16; beginning on page 35, line 11 through page 37, line 26; and beginning on page 38, line 22 through page 40, line 2; and all points of order against the following provisions in the bill for failure to comply with the provisions of clause 6 of rule XXI are hereby waived: beginning on page 2, line 8 through page 5, line 19; beginning on page 8, lines 4 through 18; beginning on page 11, lines 7 through 16; beginning on page 37, lines 7 through 26; beginning on page 39, lines 10 through 22; and beginning on page 40, lines 4 through 13.

The SPEAKER pro tempore. The gentleman from Massachusetts [Mr. MOAKLEY] is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, I yield the customary 30 minutes for purposes of debate only to the gentleman from Tennessee [Mr. QUILLEN], pending which I yield myself such time as I may consume.

Mr. MOAKLEY. Mr. Speaker, House Resolution 233 waives points of order against a number of provisions of H.R. 3038, the Department of Housing and Urban Development and Independent Agencies Appropriations Act for Fiscal Year 1986. The rule does not provide for the bill's consideration since general appropriation bills are privileged under the Rules of the House. Provisions relating to time for general debate are also excluded from the rule. Customarily, general debate is limited by a unanimous-consent request by the chairman of the Appropriations Subcommittee, Mr. BOLAND, prior to consideration of the bill.

Mr. Speaker, despite the fact that the House and Senate have not agreed to a budget resolution for fiscal year 1986, no Budget Act waiver is necessary to the consideration of this appropriation bill. As Members are aware, earlier today, the House adopted House Resolution 231 which deemed the House-passed budget resolution to have been adopted for purposes of the enforcement provisions of the Budget Act. This allows the House to proceed to consideration of appropriations and other spending legislation without the necessity of a waiver of section 303(a) of the Budget Act. This and other legislation is subject to all the other constraints of the Budget Act.

House Resolution 233 waives clause 2, of rule XXI which prohibits unauthorized appropriations and legislative provisions in general appropriation bills, against specified provisions in the bill. House Resolution 233 also waives clause 6, of rule XXI which prohibits reappropriations or transfers in general appropriation bills, against specified provisions in the bill. Mr. Speaker, the specific provisions of the bill which have been protected by these waivers are detailed in the rule, by reference to page and line of the Housing and Urban Development Appropriation bill. Chairman WHITTEN has also written a letter describing the provisions protected by the waivers. The provisions described in the letter are the only ones that waivers are provided for.

The provisions granted a waiver of clause 2, rule XXI in title I of H.R. 3038 provide appropriations for a number of programs of the Department of Housing and Urban Development. The waivers are necessary for some provisions because, while authorizing legislation for the programs involved is under consideration at some stage of the legislative process, it has not yet been enacted into law. In addition, Mr. Speaker, several provisions violate the prohibition on legislation in general appropriation bills, although a number of these are similar

to language routinely included in previous appropriation acts. These programs include housing for the elderly and handicapped. Low-income housing projects, and community development grants.

Clause 2, rule XXI waivers are also necessary to allow consideration of appropriations items in title II of the bill which fund the following independent agencies: The Consumer Product Safety Commission; the Environmental Protection Agency; Federal Emergency Management Agency; NASA; the National Science Foundation; the Neighborhood Reinvestment Corporation, and the Veterans' Administration.

The waivers of clause 6, rule XXI are provided for portions of the bill which provide for continued availability and use of funds provided in prior appropriations, for such programs as the troubled projects operating subsidy, the loan guaranty revolving fund, and the Veterans' Administration. The waivers are necessary to allow consideration of these reappropriations.

Mr. Speaker, H.R. 3038 appropriates $57.8 billion in new budget authority for the Housing and Urban Development Department and 17 independent agencies in fiscal year 1986. The bill would provide $12.6 billion for federally assisted housing programs, $330 million for urban development action grants, $1.5 billion for the Environmental Protection Agency, $7.7 billion for NASA, $3.4 billion for revenue sharing, and $26.5 billion for the Veterans' Administration. In addition, H.R. 3038 appropriates $2.0 billion for the contruction of 10,000 much needed public housing units. Also, H.R. 3038 would require that the Housing and Urban Development Department make available up to 20 percent of public housing funds earmarked for the development or acquisition of public housing for major reconstruction of obsolete housing projects.

Mr. Speaker, this is an important measure providing for new budget authority for a wide variety of programs and agencies. The Appropriations Committee should be commended for acting on a very important and complex bill and for reporting a bill that comes within the guidelines of the House-passed budget resolution. In addition, I would like to commend the gentleman from Massachusetts, the chairman of the HUD-Independent Agencies Subcommittee, Mr. BOLAND, for his hard work and leadership in dealing with issues that are vital to the Federal Government and the American people. I urge the Members to adopt the resolution.

□ 1400

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the rule has been ably explained by the gentleman from Massachusetts [Mr. MOAKLEY].

This is an important appropriation bill. Not only does it include HUD but also 16 independent agencies including the Veterans' Administration. We know that the veterans of this country deserve every attention possible that we can give them, as do the elderly, as do the needy, as do the beneficiaries of many of these agencies for which funds are appropriated in this bill.

So, Mr. Speaker, even though the administration says this bill is above their request, the committee reports that it is $1 billion less than 1985 and the rule needs to be adopted.

Mr. Speaker, I yield 3 minutes to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. I thank the gentleman for yielding.

Mr. Speaker, this bill and this rule are basically the kind of bill and rule that we have considered on the House floor before. I went to the Rules Committee, though, yesterday, with a subject area that I thought needed to be addressed and which did not get addressed in the Rules Committee; and I thought that I would bring it up because ultimately we are going to resolve it on the floor.

I have talked to the gentleman from Massachusetts [Mr. BOLAND] and the gentleman from New York [Mr. GREEN], and when the bill comes to the floor, I will be offering an amendment which I think they are prepared to take at that point.

I wanted to raise the issue of what I brought before the Rules Committee yesterday, because I think it is a question of process that needs to be understood by the House.

Back some weeks ago we passed a shuttle pricing policy on the House floor. It was a relatively close vote, but it was rather intensely debated and we came to a conclusion about shuttle pricing policy.

In the appropriations bill as reported from committee, the Appropriations Committee had gone back to the shuttle pricing policy that was rejected by the House, and put that in as a legislative provision in the appropriations bill.

It was my opinion, and when I appeared before the Rules Committee yesterday, that that kind of legislating in an appropriations bill ought to at least be subject to a point of order on the House floor; that we ought not be waiving points of order where the House itself has made a specific decision.

It is one thing to talk about waiving authorization types of language where in fact the authorizing committees have not done their job. I have some questions about that, and I can understand how Members can have some concern about that.

In this case, the authorizing committee had not only done its job; we had come to the floor, we had specifically debated the issue, the House had determined the issue; it is an issue where the Senate has already passed the bill; we are about to go to conference and we were faced here with a legislative provision in an appropriations bill that would have a marked effect on that policy.

It seemed to me that the Rules Committee, in those kinds of instances, does have an obligation to make that kind of legislation in an appropriation bill subject to a point of order.

The Rules Committee, in this rule, specifically decided not to do that, and I raise it as an issue because it would cause me to vote against the rule, but I think we also ought to take a look at the process, that it seems to me that the Rules Committee ought not put this House in a position of having legislation in an appropriation bill where the House has previously made a very, very fundamental determination, and I would hope that in the future the Rules Committee would be a little more sympathetic to those of us who sit for hours and hours and hours in authorizing committees to make decisions, who bring the bills in good conscience to the House floor, make decisions, and then have the potential of those decisions being overriden with legislation in an appropriations bill.

That is specifically what the rules attempt to protect, and what was being violated here, and I am disappointed that the Rules Committee did not see fit to maintain the point of order.

As I say, in discussions that the gentleman from Massachusetts [Mr. BOLAND], the gentleman from New York [Mr. GREEN] have had with the chairman of the authorizing committee, with the chairman of the subcommittee, with myself, and so, on, I think we have come to an agreement now that that ought not be the way of proceeding, and that the motion to strike I hope will be accepted; but it does bother me.

Mr. QUILLEN. Mr. Speaker, I yield 5 minutes to the gentleman from Texas [Mr. BARTLETT].

Mr. BARTLETT. I thank the gentleman for yielding, and I rise to oppose the rule that is now before us, as I will be opposing the bill itself.

What is essentially wrong with the rule is the rule would waive a number of points of order against the bill; those points of order not being trivial, but being significant to this bill.

The most important of which is the bill would waive the point of order in which programs that are not yet authorized would be appropriated.

Now in many appropriations bills, this happens, and I suppose that is a common bills, this happens, and I sup-

pose that is a common fight or disagreement on the floor in appropriating funds for programs that are not yet authorized.

I wish to bring to the House's attention that this bill goes a substantial step further than that; this bill appropriates $500 million in the assisted housing category for what is euphemistically called new program reserve.

This bill would appropriate $500 million for programs that are not only not authorized, but have never been authorized; that have never existed, that may or may not ever exist.

My point is that the point of order should not be waived on brand new programs that have never been created, and should not be waived on unauthorized programs that are waiting to be authorized in the first place.

I think it sets an enormously difficult and bad precedent for this House to be appropriating funds for new programs that had never existed.

Now, assuming the rule passes, and when we get to the appropriations bill, I will be offering an amendment to delete that new program reserve; that slush fund, if you will, of some $500 million that appropriates funds for new programs. I would urge the Appropriations Committee and the authorizing committee on which I serve to go back to the drawing board and we can then decide whether we want to authorize these new programs, and if we do, and if the Congress authorizes the new programs, then we can come back on either a supplemental or a recission or a new appropriations bill, and appropriate the funds after the authorization.

Now there is a further difficulty with the bill that this rule makes in order. The difficulty is, the appropriations bill is sold as a freeze level bill in the assisted housing programs, but in the assisted housing programs it appears to be, when you begin to look at each program line by line, a total increase in expenditures over fiscal year 1985 expenditures of a total of $1.7 billion.

When we get to the House floor on the bill itself, I will take time to offer amendments, and in debate I will explain to the House how that $1.7 billion was added on.

Suffice it to say for now that it was done in two ways: One, with an accounting change which made a change in accounting which changed $989 million; set that off-budget, or outside the HUD appropriations process, and then spent the money on new and additional programs.

The other way was to take $800 million of a nonrecurring, one-time-only program that was spent and designed to be spent only in fiscal year 1985; it is called rent supplement wrap; the program was not terminated; was not eliminated; it just simply existed for 1 year.

We took that $800 million and we spent that money additionally in fiscal year 1986 as if it were an ongoing program.

So I will have three amendments: One, to reduce the number of units of newly constructed public housing units from the 10,000 units that are in the bill back to a freeze level of 5,000 new units that we built in fiscal year 1985. I will not be proposing that we terminate public housing or that we eliminate all new units of public housing; but merely that we build the same number of new units in 1986 than we built in 1985.

The second one will be to eliminate the program reserve of new, unauthorized programs.

The third, then, will be across-the-board reduction of 2½ percent in order to achieve a true freeze level in the assisted housing programs.

I would call my colleagues' attention that the assisted housing programs will be the first up on the calendar; that in the HUD appropriations bill, the very first area that we will debate will be the HUD assisted housing programs; it is the area that is on a percentage basis the largest out of line in terms of a freeze.

□ 1410

It does spend a total of $1.7 billion more in fiscal year 1986 than we spent in fiscal year 1985. I would urge my colleagues to vote no on the rule so we can go back for a better rule so the points of order against appropriating funds for programs that are not yet and have never been authorized will simply not be in there and that we would be allowed to make a point of order in that case.

I would urge a "no" vote on the rule.

Mr. QUILLEN. Mrs. Speaker, I yield 2 minutes to the gentleman from New York [Mr. GREEN] to close debate on this side.

Mr. GREEN. I thank the gentleman for yielding.

Mr. Speaker, I urge my colleagues to vote for the rule. I shall address the points that the gentleman from Texas has made with respect to the substance of the bill when we go into the Committee of the Whole House and debate the bill.

With respect to the rule, point out that inevitably with this bill we come to the Rules Committee at a time when the majority of the programs in the bill are not authorized. I wish it were not so. The chairman of the subcommittee wishes it were not so. But that is the fact, and year after year it has been the fact, and year after year, if the House wants to proceed expeditiously with the appropriations bills instead of doing them all in the form of a continuing resolution, we have to have this kind of a solution.

The reserve to which my friend from Texas refers is a device we have used in the past to account to this House for the fact that we can expect further requests for funds for these programs, so that the House will be put on notice and know at the time it is considering this bill what it can expect in the way of spending, and so that it is not surprised by a supplemental request or funding in a continuing resolution. I think it is the more honest way to do it rather than just pretending that the future spending does not exist as a problem for the future.

So I would urge my colleagues to vote for this rule and let us move on to the substance of the bill.

Mr. MOAKLEY. Mr. Speaker, I understand the gentleman from Tennessee [Mr. QUILLEN] has no further requests for time. I have no further requests for time.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. BARTLETT. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 266, nays 159, not voting 8, as follows:

NOT VOTING—8

Downey	Horton	Williams
Hawkins	Monson	Wright
Hefner	Pepper	

□ 1430

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 821

Mr. BURTON of Indiana. Mr. Speaker, I ask unanimous consent that my name be removed as a cosponsor of H.R. 821.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

GENERAL LEAVE

Mr. BOLAND. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 3038, and that I be permitted to include tables, charts, and other extraneous material.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT-INDEPENDENT AGENCIES APPROPRIATION ACT, 1986

Mr. BOLAND. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3038) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1986, and for other purposes; and pending that motion, Mr. Speaker, I ask unanimous consent that general debate be limited to not to exceed 1 hour, the time to be equally divided and controlled by the gentleman from New York [Mr. GREEN] and myself.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Massachusetts [Mr. BOLAND].

The motion was agreed to.

□ 1432

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 3038, with Mr. PANETTA in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

Under the unanimous-consent agreement, the gentleman from Massachusetts [Mr. BOLAND] will be recognized for 30 minutes and the gentleman from New York [Mr. GREEN] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Massachusetts [Mr. BOLAND].

Mr. BOLAND. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I want to pay tribute to the members of this subcommittee on the majority side, the gentleman from Michigan [Mr. TRAXLER], the gentlewoman from Louisiana [Mrs. BOGGS], the gentleman from Ohio [Mr. STOKES], the gentleman from Minnesota [Mr. SABO], and the gentleman from Tennessee [Mr. BONER].

I also want to pay my respects to the ranking minority member, the gentleman from New York [Mr. GREEN], who has had extensive experience in the housing area and with these programs, and also to the gentleman from Pennsylvania [Mr. COUGHLIN], and the gentleman from California [Mr. LEWIS].

Mr. Chairman, the 1986 HUD-independent agencies appropriation bill which we bring to the floor today is, for the most part, noncontroversial. The bill, as it is before you, provides $57,807,514,000 in new budget authority for 1986. That is $10,351,783,000 above the President's request and is $1,011,043,000 below 1985. And, Mr. Chairman, virtually all of the increase above the President's budget is once again in the subsidized housing programs. Also, Mr. Chairman, the bill is within the $42,500,000,000 of tentative section 302(b) allocation—based on the House-passed budget resolution.

One thing I should point out at the outset is that the numbers I just gave you do not include $3,310,000,000 of budget authority we deferred pending enactment of three authorizations. We have deferred $900,000,000 for the Superfund Program—$2,400,000,000 for the Construction Grants Program—and $10,000,000 for a new fair housing initiative under HUD. However, all of the $3,310,000,000 is assumed within the section 302(b) allocations.

Now as I said, we are $10.3 billion over the President's budget. That is a lot of money—but let's keep in mind two things.

First, the President's budget included no funds for the Subsidized Housing Program. After the budget came up in February—everyone recognized that was simply not equitable. So both budget committees have assumed roughly $10 to $11.5 billion of new budget authority for new subsidized housing.

And the second point, is to keep in mind that under these programs we score the budget authority for the entire period of the housing contract. That means that the $10.7 billion in this bill covers 15 or 20 or even 30 years of the cost of each housing unit. So our method of scoring these costs tends to magnify the budget authority numbers.

HOUSING

Pages 4 through 8 of the report describe the subcommittee's actions concerning subsidized housing. Basically, we have included 100,000 incremental housing units in this bill. By incremental, I mean a net addition of subsidized housing units to the total number of 3.9 million currently under subsidy.

We have provided for 10,000 new public housing units—30,000 section 8 voucher units—12,000 section 202 housing for the elderly units—1,000 Indian housing units—32,000 section 8 existing units—and 15,000 section 8 moderate rehabilitation units. All of that adds to 100,000 incremental housing units.

In addition, we have also included $150 million to provide for approximately 15,000 rental rehabilitation units and 2,500 rental development [HODAG] units.

Finally, in the housing area, as many of you know, the House Banking Committee recently reported H.R. 1, the housing authorization bill for fiscal years 1986 and 1987. That bill has in it a number of potential new programmatic thrusts which are not addressed in this appropriation. So what we have done is exactly what we did 2 years ago—and that is that we have set aside $500 million in a reserve to accommodate at least some of new programmatic thrusts contained in H.R. 1—if that bill is ultimately passed and signed by the President.

Under the Community Development Block Program—we are going along with the 10 percent reduction proposed by the President and assumed in the budget resolution. For the Urban Development Action Grant Program we are recommending a 25-percent cut—from $440 million made available in 1985 to $330 million in 1986. I should point out, in the house budget resolution a 10-percent reduction was assumed and in the Senate a 20-percent cut was included. We are below both resolutions.

ENVIRONMENTAL PROTECTION AGENCY

For the Environmental Protection Agency, the total increase recommended above the budget request is $128 million. Also, we are about $174 million above the current 1985 rate. That increase above the budget request of $128 million is made up of $62 million in the operating programs—$16 million to restore the 5-percent pay cut—and $50 million for the school asbestos program. Except for the asbestos funds, the add-ons for EPA are largely in areas that the committee has restored funding for in the past.

FEDERAL EMERGENCY MANAGEMENT AGENCY

For FEMA, we have included funding in the bill that puts us about $70 million above 1985 and about $89.6 million above the budget request. I should quickly point out that the bulk of that increase above the budget and above 1985 is made up of $70 million included for the Emergency Food and Shelter Program. That activity has been underway since 1983, and to date we have made available a total of $160 million through the national board and $50 million through the States.

In other FEMA activities, the report spells out in great detail the committee's problems with the Agency in connection with discrepancies in the budget justifications. We have tried to address these ongoing management problems by including very specific bill and report language that will put FEMA on notice that we expect that Agency to provide the Congress with honest budget estimates.

Also, for FEMA, we have added about $22 million for the Civil Defense Program. You may recall that during the past 3 or 4 years the Agency has requested substantial increases for civil defense. Virtually all of those increases have been denied in the past. However, in 1986 the President's budget proposed a decrease in the Civil Defense Program below the 1985 level. While we are in agreement with the general philosophy of that decrease—we felt it went a little too far and we have restored some funding for ongoing civil defense grants to States. In 1987, we expect that the States will take over some of these programs on a 50/50 matching basis.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

For NASA we have recommended a total of $7,666,000,000 and that is $220 million under the President's budget request. It is, however, about $175 million above the current 1985 level. We have been able to provide for that small add-on above 1985 by reallocating some of our tentative section 302(b) allocation.

Now in taking a $220 million cut from the President's budget—what we tried to do was to adopt the philosophy that these reductions should be handled in such a way as to preserve the funding stream for those projects already underway—and cut to those projects which are proposed as essentially new starts in 1986.

We took that approach because it makes the most sense. Why? Because if additional projects are started in 1986 that will require substantially increased funding in 1987 and 1988—NASA's problems in view of uncoming very tight budgets will only get worse.

So we took the reductions primarily from the orbital maneuvering vehicle—which we cut from $25 million to $10 million—the solar optical telescope—which we cut from $30 million to $5 million—and the scatterometer—which we cut from $31 million to $6 million. And, we felt we could take some money out of the space station—which is basically a new activity—and we reduced that from $230 million to $200 million.

Let me give you a little additional insight as to why we took the approach we did. It's always easy to start new projects at low funding levels. We could probably have started the solar optical telescope with $10 or $15 million. But to do that, we would have had to cut some other ongoing project. For example, the Senate Authorization Committee, in making its reductions, reduced the upper atmospheric research satellite by $20 million in 1986—from $134 million to $114 million.

But do you know what the impact of that reduction is? The upper atmospheric research satellite—which is a satellite designed to take a hard look at what's happening to our atmosphere—and which is scheduled to fly in 1988 or 1989—is in its third year of funding. That $20 million cut will require NASA to replace it with $56 million in 1987 and 1988. So we only cut the project by $5 million—because the fact is that it doesn't make any sense to cut programs that are in the middle of their major funding stream and end up having it cost NASA three or four times as much. It makes a lot more sense to cut programs that are just about ready to start.

So that is the philosophy we followed with NASA—and I think it makes sense—and I think that the agency basically agrees with what we have done—given the very tough budget problems.

VETERANS' ADMINISTRATION

For the Veterans' Administration, we have added a total of $441,802,000. But, let me quickly point out that $205 million of that add-on was to restore the 5-percent pay cut.

And by the way, while I'm on that subject, I think this subcommittee should be commended for the fact that we took it upon ourselves to use part of our section 302 (b) allocation to restore more than $300 million for the 5-percent pay cut. Other subcommittees will have to face that problem down the road—or they will pass it off on a supplemental bill. But for every major agency in this bill we have re-

stored the 5-percent cut. So, we are $441 million over the President's budget in the table. However, because we have recently received a budget amendment from the President restoring the 5-percent pay cut to all agencies, our amount over the President's budget will ultimately be reduced by over $200 million.

Without restoring that pay cut to the VA Medical Programs—the 172 hospitals would face disaster. You cannot run a medical care system that has 193,000 employees—and not have sufficient funds to pay the people. We would have lost 5,000 additional nurses and doctors and lab technicians, et cetera—unless we had restored that pay cut at the beginning of the fiscal year.

We have also added about $80 million to maintain the 1985 FTEE [full time equivalent employment level] at 193,941. With new facilities coming online, even maintaining the level of nurses and doctors et cetera, at the 1985 rate will cause nearly every VA Hospital to give up positions in order to staff the new facilities.

The other major add-on in VA comes in the construction program where we have added a net of $98,960,000. Now let me quickly point out that we have not added any additional projects for construction. No, what we are trying to do is save OMB and the VA from itself. They proposed partial funding for the Philadelphia and Houston hospitals. This subcommittee has long had a policy that every construction project should be submitted for full funding. This is the first year, in my memory, that the administration did not do that. We have elected to add money to restore both the Philadelphia and Houston hospitals to the full funding level.

□ 1440

Now we have taken some offsets to do that. We cut out a couple of parking garages and a cemetery in northern California. And by the way, although those are virtually the only reductions we have made in the entire bill, from what we have heard, you would almost think that they were the most vital part of this legislation. But, basically, we have judged the parking garages at a lower priority than treating patients.

So Mr. Chairman, that sums up the HUD-independent agencies appropriation bill. I think it is a responsible mark. I think it is reasonable, and I hope it has your support. I will include a table summarizing the amounts recommended in the bill with comparisons to the 1985 appropriations and the 1986 budget requests at this point.

SUMMARY OF ESTIMATES AND NEW BUDGET (OBLIGATIONAL) AUTHORITY IN BILL

Department or agency	Appropriations, 1985	Budget estimates, 1986	Recommended in bill	Bill compared with—	
				Appropriations, 1985	Budget estimates, 1986
(1)	(2)	(3)	(4)	(5)	(6)
American Battle Monuments Commission	$11,065,000	$10,954,000	$10,954,000	−$111,000	
Cemeterial Expenses, Army	7,759,000	14,778,000	7,759,000		−$7,019,000
Consumer Information Center	1,149,000	1,249,000	1,249,000	+100,000	
Consumer Product Safety Commission	36,000,000	33,700,000	37,000,000	+1,000,000	+3,300,000
Council on Environmental Quality	700,000	705,000	700,000		−5,000
Department of Housing and Urban Development	16,901,317,775	5,088,041,000	16,445,549,781	−455,767,994	+11,357,508,781
Environmental Protection Agency	1,321,775,000	1,367,596,000	1,496,176,000	+174,401,000	+128,580,000
Federal Emergency Management Agency	561,368,000	542,070,000	631,656,000	+70,288,000	+89,586,000
Federal Home Loan Bank Board [1]	(68,908,000)	(71,649,000)	(27,617,000)	(−41,291,000)	(−44,032,000)
National Aeronautics and Space Administration	7,491,400,000	7,886,000,000	7,666,000,000	+174,600,000	−220,000,000

[1] Limitation on corporate funds; administrative and nonadministrative expenses in 1985 and only administrative expenses in 1986.
[2] Limitation on direct loans.

Mr. GREEN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would like to join the distinguished chairman of the HUD-Independent Agencies Appropriations Subcommittee in commending our colleagues on the subcommittee for their contributions to this bill. In addition, I would particularly like to express my appreciation and, I hope, the appreciation of the House to the distinguished chairman for the remarkable job that he does in bringing this bill to the floor of the House.

This is an extremely complicated bill, as I am sure the debate will reveal as we move forward. The funding mechanisms of assisted housing are extremely complicated, and to bring such a bill on the floor, particularly at a time of fiscal stringency when we are in essence shooting at a moving target in terms of the budget resolution, takes no small degree of skill. The House obviously owes a great debt of gratitude to the subcommittee chairman for being able to bring us this bill so promptly.

I do not want to recover the details of the bill, which have been so ably covered by the chairman but, rather, to focus on a few points which I gather from the discussions which have been had informally and on the floor of the House during debate on the rule are of concern to Members of this body.

First, we are below our section 302(b) allocation, tentative as it is, but not by much. We have a little over $4 million in leeway. I know there are many members who were disappointed that various projects in which they were interested, therefore, could not move forward. I happen to have a Veterans' Administration hospital in my district which is scheduled for a substantial expansion of its outpatient facilities because of terrible overcrowding. We were not able to reach that this year, and I know there are other Members who are concerned because their projects have not been reached. I can only say that, within the limits we have, we have done what we could, and I urge Members not to offer amendments that would take us over our section 302(b) allocation.

In addition, as the subcommittee chairman has pointed out, we are over $1 billion below our fiscal year 1985 enacted level. I think that represents a very significant savings in this bill. We are, it is true, well above the administration's request, but that is because the administration requested no funds for assisted housing, having proposed a 2-year freeze on those programs. Plainly, in the action on the first budget resolution that has so far taken place, both this body and the other body rejected that approach and did supply budget authority for the assisted housing programs. We have responded to that action on the part of both bodies and, therefore, have included funding for the assisted housing programs in this bill, which is

what puts us over the administration's request.

I know there are some Members of this House who are concerned because there is not a freeze on each and every item within this bill. Let me say straight out that I do not envisage that to be the charge that we in the Appropriations Committee have received from the House. Under the Budget Act we are required to come within our section 302(b) allocation, and as I indicated, we have done that.

There has been a strong sentiment for freeze in this House, and we have done that in terms of the bill as a whole. As I indicated, the bill is below our fiscal year 1985 enacted level. But we believe that it is appropriate that the Appropriations Committee and the full House have the flexibility to make adjustments within the overall bill in order to meet situations of need where those occur and to achieve savings where those can be achieved. Thus, if you want to compare this bill with the administration's request, on some items we are higher, on many we are the same, and in many we are lower. Similarly, if you want to compare this bill with last year's bill, we have not just frozen everything. On some items we are higher, on some items we are the same, and on many items we are lower.

I simply ask the Members to recognize this process and not just let the word, "freeze," apply to each line item in the bill. That would be a foolish consistency indeed, and it would make no sense from the point of view of the appropriation process in the House to function in that fashion.

We have allowed for increases in some activities. We have taken the pains of finding where to cut other activities or otherwise we could not come out below where we were last year. Having done that, I do ask the House to stand with us, recognize the work that has been done, and approve this bill. It represents a very significant effort to deal with the programs, the very important programs with which this subcommittee is charged, programs such as housing, veterans, the environment, our space programs, our science programs, and many others, while at the same time staying within the guidelines established by the House in the first budget resolution and, I think, reflecting the will of the House to hold these bills at or below last year's level.

This we have accomplished 100 percent, Mr. Chairman, and I ask the House to stay with us and approve this bill.

Mr. Chairman, I reserve the balance of my time.

Mr. BOLAND. Mr. Chairman, I yield 5 minutes to the gentleman from New York [Mr. SCHUMER].

Mr. SCHUMER. Mr. Chairman, I thank my distinguished colleague, the gentleman from Massachusetts [Mr. BOLAND], and I rise in support of this legislation.

Let me say that I think Appropriations Committee, the subcommittee and the committee as a whole, has done an outstanding job, and I speak from two perspectives. As a member of the Housing Subcommittee of the Banking Committee of the House, let me say that we have in the last 4 years suffered tremendous cuts. A total authorization in housing of $31 billion, roughly $31 billion in 1981, has shrunk to an authorization of just about half that amount. Yet there is a crying need for housing in this country. We hear about homeless people, we hear about poor people who cannot find housing, and now we have begun to hear about middle-class people, the kind of people who have had the American dream on their calendar and who had thought that once they were married and got jobs they would be able to find housing for themselves, but now they cannot. So we have a dramatic need for housing, and the Housing Subcommittee has tried to take into account those needs.

I also speak as a member of the Budget Committee, and as a freshman member of the Budget Committee, let me assure the Members of the House that that changes one's perspective a great deal.

□ 1450

To try and deal with the deficit that is only going to get worse and worse unless we do something is a painful and painstaking process. It is difficult to find $50 and $100 million there to bring the deficit reduction under control.

I have lived with that process, as have so many members of the Budget Committee, for the last 6 months. If you put those two things together and realize, No. 1, the desperate needs that we have in this country, needs that now extend to many, many districts in this country, certainly a majority, needs that extend to many different types and classes of people, and yet at the same time realize the looming deficit cloud that constantly hovers over our head, I think you can only come out where this resolution does. It is within the House budget resolution. It tries particularly in the reserve portion of the program to come up with some innovative and cost-efficient programs and preserve others, dramatic changes from the days of section VIII, which the majority of people in this House thought was too expensive and affected too few people.

Yet also while dealing with those needs, it does try to live, and does indeed live, within the budget resolution.

To ask for new programs probably scuttles the work that this subcommittee has done and pushes us over the budget resolution. We cannot ask for any more than we have; but to cut any further simply because there may not be in one's own district the people knocking at the door for the needs of housing would also be a lesson to those on the Housing Subcommittee and the authorizing committee and to so many in this House that to painstakingly live within the budget resolution is not worth it all, because you go to the House floor and because housing and so many other areas here are not the No. 1 items on most people's political agendas, you say, well, cut those.

The lesson then would be, cut those further.

The lesson then would be, "Don't live within the budget resolution, start off as high as you can, because you're going to be cut on the floor anyway."

So I would say to my colleagues in conclusion that this is a fine, well honed appropriation. It does not make everybody perfectly happy, but it does live within the two goals, the two parameters within which we must live, the parameter of a need for housing and the parameter of an increasing deficit.

Mr. Chairman, I urge support of this resolution.

Mr. GREEN. Mr. Chairman, I yield 3 minutes to the gentleman from Pennsylvania [Mr. COUGHLIN].

Mr. COUGHLIN. Mr. Chairman, I would like to take this opportunity to comment briefly on our recommendations for the fiscal year 1986 budget for the Environmental Protection Agency.

Prior to commenting upon specific EPA items, I want to commend the subcommittee's distinguished chairman, Mr. BOLAND, for his tireless work on H.R. 3038. The guidance and invaluable efforts of Mr. GREEN, the ranking minority member or our subcommittee, also have enabled us to present this carefully crafted proposal to the full House for consideration. I want to thank both Mr. BOLAND and Mr. GREEN for all their help in making significant strides in the budget of the Environmental Protection Agency.

I believe our recommendations will provide EPA with the resources necessary to continue to successfully achieve its statutory objectives and to protect human health and the environment.

The relatively modest increases proposed for EPA over last year's funding level will provide important practical benefits. For example, our bill provides $50 million for the school asbestos abatement program. The magnitude of the costs facing local schools in their attempt to curb these potential hazardous conditions justifies a Federal role in assisting school districts in financial need. To insure that any asbestos abatement work under-

taken with these Federal funds are environmentally sound and safe, our panel has included requirements. Specifically, under our bill any abatement projects funded by the program must be conducted by contractors that have been certified by the States and by workers who have received training through programs approved by EPA.

H.R. 3038 also provides: additional enforcement funds and staff positions for the Resource Conservation and Recovery Act's program which regulates the handling and disposal of hazardous wastes; a full-scale demonstration of limestone injection multistage burning technology [LIMB], a potential acid rain reduction technology that promotes cleaner burning of coal; $3 million for exposure assessment studies of toxic pollutants; $5 million for State grants to expand innovative State and local activities in inventorying and reducing hazardous waste generation and a $2 million program for estuarine management. These are just a few important initiatives our subcommittee has taken to assist EPA to fulfill its myriad responsibilities.

I also want to mention, as my colleagues are aware, that our panel deferred spending decisions on the Superfund Program and the Clean Water Act's Wastewater Treatment Construction Grants Program pending enactment of authorization bills for the two programs. As you know, the authorizations for these programs expire at the end of September.

I pledge, however, my strongest support for efforts to appropriate funds for these vital programs as expeditiously as possible once the required authorizations bills advance through Congress.

In conclusion, Mr. Chairman, I want to urge my colleagues to support these modest EPA increases we propose. The panel has provided EPA with the resources necessary to continue its attempts to meet its environmental mandate. The benefits our citizenry will reap from these moderate hikes in EPA's budget demand our support.

Mr. BOLAND. Mr. Chairman, I yield such time as he may consume to a member of the subcommittee, the gentleman from Tennessee [Mr. BONER].

Mr. BONER of Tennessee. Mr. Chairman, I rise in strong support of the Department of Housing and Urban Development—independent agencies appropriations bill. I particularly would like to compliment the chairman of my committee, Mr. BOLAND, for leading the members of the committee through many difficult program choices.

Let me underscore some of the remarks that have already been made during this debate. The bill is below the total amount of money appropriated for the same departments, agencies, and programs in fiscal year 1985. In its entirety, the bill is more than $1 billion below the amount appropriated last year for these same programs. Additionally, the bill is below the House budget resolution allocations.

Within the level of funding provided, the members of the Appropriations Committee have tried to make difficult choices between and among programs. As a result, the committee is recommending funding for some programs that are higher than fiscal year 1985, but it has offset those increases with corresponding reductions in other programs. These recommendations, these choices, these decisions setting priorities were made only after the committee reviewed all of the programs in its jurisdiction. These were not easy choices but we hope that our colleagues here in the House will endorse the recommendations contained in the bill.

I would like to offer some comments on the funding level recommended for NASA. I joined a majority of my colleagues in voting to freeze funding for NASA at the fiscal year 1985 level. I certainly do not regret that vote. In fact, I believe that the House vote to freeze NASA's authorization increased the scrutiny the committee focused on NASA's budget request. In doing so, the committee tried to assure a stream of funding for those NASA programs nearing a level of maturity while deferring, where possible, those new and young programs that could afford to be deferred. In addition, the committee worked to assure adequate funding for some programs whose delay would result in significant cost increases over the life of the program. This is the case with the NASA recommendations for the Space Station Program.

While I would have liked to fund fully the request for the space station, I believe the level provided for the program by the committee is the minimum necessary to assure that the space station options are fully studied. As my colleagues know, the inclusion of man in the operation of the space station and the full development of robotics and automated systems is currently being studied. NASA has initiated these studies and their successful completion is the first necessary step to constructing the space station.

Several other NASA programs deserve the level of funding the committee has recommended. One of these is the advanced communications satellite [ACTS], a program which will continue the United States' lead in meeting future communication needs.

For the Department of Housing and Urban Development, the committee has recommended what I believe is the minimum necessary to meet our Nation's housing needs. Again, I join many of my colleagues in wishing the House could provide a higher level of funding. But, in light, of the budget constraints imposed by the House, the level of support provided in the bill assures continued public housing, vouchers, section 8 and section 202 units, and adequate funding to support rental rehabilitation and low-income housing operational assistance.

Lastly, Mr. Chairman, I ask my colleagues to support the committee's recommendation for the Veterans Administration. We are all well aware of the increasing numbers of aging veterans who may need medical assistance. The bill continues this Nation's commitment to provide assistance to our veterans, not only in terms of new hospital and outpatient facilities construction but also the medical personnel necessary to staff these facilities.

I encourage my colleagues to join in support of the committee's recommendations. The bill reflects the committee's considered judgment on what programs need and deserve funding while complying with the votes earlier this year to reduce Federal expenditures.

□ 1500

Mr. GREEN. Mr. Chairman, I yield 4 minutes to the gentleman from Texas [Mr. BARTLETT].

Mr. BARTLETT. Mr. Chairman, I thank the gentleman for yielding.

During the debate, I will concentrate on that portion of the bill that is in the housing assistance program. I have a chart to share with the Members of the Committee to consider that portion of the bill that is between the fiscal year 1985 and fiscal year 1986 appropriations.

Several have said earlier that this is a complex bill, and indeed, it is. I will attempt to make it direct and straightforward.

Someone else said that we do not have to have a freeze on each and every line item, and I agree with that. And what I have attempted to do is to secure at least freeze level for that $10 billion of the total or aggregate section of the assisted public housing or the assisted housing programs.

Now I think the House understands what a freeze level means. It means a freeze level to where we spend no more in the total in 1986 than we spent in 1985.

What we have in the assisted housing portion of this HUD appropriation bill is a nominal freeze on the surface, but it is impossible that it could be a freeze in reality because, in fact, when you look at each program, line by line, you discover that virtually all of the programs have been increased, some by as much as 100 percent, and no programs have been reduced by any significant amount.

Let me share with my colleagues precisely where the difference between the nominal freeze and the bona fide freeze would be. First, in the area of modernization of public housing, now that is the area that repairs

existing units of public housing. It is a good program and it ought to be. Last year, in fiscal year 1985, we spent $1.7 billion in that, but we did so, as the House has historically done, by appropriating both the principal and the interest in the HUD appropriation bill. In the fiscal year 1986, we appropriated $700 million, a nominal $1 billion decrease, but the difficulty is we change the accounting formula so that we only appropriate the principal and the interest is shuffled over to the function 900 of the total Federal budget, so we are spending the $900 million in another place off the HUD appropriation, and yet we are counting that $900 million saving for additional programs.

The same holds true in the nonrecurring items of the rent supplement and rental assistance program. That is a program which has essentially ended. It is not a program to help people or to transfer payments. That is a program in which last year we appropriated $1.6 billion for a one-time-only conversion, and it was a conversion of 236 units to section 8 units. We had to buy out the contracts. All of those contracts are now purchased.

Then we spent, in essence, of that $1.6 billion, we spent $800 million. That is a conversion that is already completed. it is not a recurring program. But the appropriations bill was to take that $800 million and spend it again in new programs.

What I will be proposing a little later will be essentially to back both of those accounting changes out of the bill with three amendments to bring the total appropriations down to a true freeze of $8.9 billion. If you take the $10.7 billion in new authority in fiscal year 1985, reduce it by the $900 million of modernization, of interest payments, reduce it by the $800 million of rental supplements, which is a conversion program, which has already been spent, there are no more contracts to buy, then you come up with a true freeze of $8.9 billion.

I will be proposing in essence three amendments to come down to that amount. I will be freezing the amount of newly constructed public housing units to last year's level.

Now it is true that the administration proposed a 1-year moratorium.

The CHAIRMAN. The time of the gentleman from Texas [Mr. BARTLETT] has expired.

● Mrs. ROUKEMA. Mr. Chairman, I rise in strong support of the amendment to be offered by my colleague from the Housing Subcommittee, Mr. BARTLETT.

This amendment would strike from the bill $500 million which the Appropriations Committee has recommended be earmarked for new and unauthorized programs. To me, this is the height of fiscal irresponsibility.

This year both the House and the other body agreed in separate budget resolutions that we need to reduce the budget deficit by over $50 billion this year and by nearly $300 billion over the next 3 years. Does it make sense under these circumstances to approve funding for unauthorized programs? We are talking about $500 million for programs which the full House has not even had the opportunity to review.

Faced with $200 billion deficits for as far as the eye can see, it is totally inappropriate for Congress to be authorizing any new housing programs. We have had a hard enough time finding money for programs that are currently operative and in dire need of sustained funding. To allocate money for new, unauthorized programs would be irresponsible and would fly in the face of reason.

As a member of the Housing Subcommittee that has only recently completed markup of H.R. 1, the housing authorization bill, I have had an opportunity to observe and engage in the heated controversy that has surrounded committee deliberations on these new programs. My colleagues, this is neither the time nor the place to continue the debate regarding these new housing programs—we will have that opportunity when the housing authorization bill reaches the floor—but let me just briefly say that many of these proposed new programs are costly, and redundant.

By way of clarification, in addition to funding for the Department of Housing and Urban Development, many independent agencies also receive appropriations through H.R. 3038. For example, $26.5 billion is provided for the Veterans' Administration and some very meritorious veterans programs.

Of this amount, $14.2 billion is for veterans compensation and pensions and $9.4 billion is earmarked for medical care and treatment. Mr. Chairman, I want to make it perfectly clear that I believe we, as a nation, owe our veterans a great debt. I have consistently supported veterans programs. The increased funding for veterans programs in his bill recognizes the fact that in coming years, millions of World War II and Korean conflict veterans will become eligible for and need veterans health care. Therefore, my speaking against one aspect of this, this comprehensive appropriations bill should in no way be construed as a stand against funding for important and necessary veterans programs.

My colleagues, in closing, let me stress, this House has not authorized new housing programs, we have not agreed on the need for new programs, and we certainly cannot justify the new costs of these programs. To set aside money for programs that are yet unauthorized would be irresponsible; and there are far better places in the budget where the money could be put to use. I urge you to support the Bartlett amendment.●

Mr. BOLAND. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Connecticut [Mr. MORRISON].

Mr. MORRISON of Connecticut. Mr. Chairman, I thank the chairman of the subcommittee for yielding me this time, and I want to start by commending him and his entire committee on bringing in a housing program, and in fact an entire appropriation which does the two necessary things that we have to do in this budget and appropriation process this year.

No. 1, it conforms itself to the budget requirements. It is within the budget, and it is comfortably within the budget. And beyond that, it makes the difficult choices to fund the programs that are needed in this country that ought to be supported by Federal funds.

First let us look at the budget matter. We have had debate after debate about freezing and limiting spending, and I have been proud to have been a part of that debate and to try to take a leadership role. And one of the questions that is always raised is are we denying the proper flexibility to reallocate funds from one area to another but to stay within a reasonable budget amount? The answer to that has always been that the way to do that job is through the budget process. And in this appropriation and in the response of this committee to this appropriation we have just that effect.

Today we have received, we understand, on the House floor now as a result of the resolution passed this morning, the section 302(b) allocation. We know what is available within the budget that we have passed for this committee and under its jurisdiction.

What we have before us is $3.4 billion below that level, so it certainly is within the budget, and on top of that the $4.1 billion beneath the spending level for 1985.

The committee has reserved the funds which may be necessary for future authorizations in the area of the EPA and the area of housing programs; $3.3 billion is reserved in its entirety, and within the housing budget a half billion dollars is reserved, and not allocated based on future authorizations that may come from the committee of authorization jurisdiction.

These budget savings did not come without a price. There are cuts that are difficult to be absorbed. We have $110 million lower spending in the area of urban development action grants, and $350 million less available in community development block grants, and a 25-percent cut, over $1.1 million in the area of revenue sharing.

These are real cuts and they are real reductions in Federal spending. They hurt in the communities, but they are the price we are paying for budget discipline.

As a member of the Housing Subcommittee, I am particularly pleased to see the maintenance of necessary housing starts for the next year. We have heard criticism by the prior speaker about the budget level. Somehow it is wrong, it is argued, that this year as well we are going to provide 100,000 new units of housing for low-income and elderly Americans who need it.

I do not think that anyone could question the need. Certainly I know that the hearings before our Subcommittee on Housing have suggested that this only scratches the surface. And I think most Members of this body know that is true.

We have been able at least to freeze and maintain the level of effort with respect to new housing, and I think that that is an accomplishment and it ought not to be criticized. It ought to be supported, and it certainly ought not to be cut back by arguing that savings that have been made in other areas, which may be less important, cannot be used in this area to maintain our effort. In fact, that is exactly what the budget process is about.

For that reason, I urge the Members to support this appropriation as reported. I want to note in particular that with respect to the elusive 5-percent pay cut that in some areas has created problems, this subcommittee has taken a responsible road and provided the funds in its appropriation to cover that 5-percent pay restoration which we all knew was never going to happen in the first place.

The overall picture here is one of responsible allocation of limited resources to do a job that is much in need of doing. I commend the committee in its entirety for having brought us this appropriation, and I urge the Members of this House not to make budget constraint into a fetish by which each and every line item is cut without looking at the picture as a whole. We have now done the job of putting our budget into our House rules and making it effective. We have got an overall target. We are meeting that target.

Let us approve the bill.

Mr. GREEN. Mr. Chairman, I yield 3 minutes and 30 seconds to the gentleman from Wisconsin [Mr. ROTH].

Mr. ROTH. Mr. Chairman, I thank the gentleman for yielding me this time.

I have a message for the President. Popular folklore has it that the President sometimes watches floor debate. Well, Mr. President, I want to inform you that this particular bill we are debating today is $10 billion above your budget request.

□ 1510

Mr. President, you have often said that if Congress does not do the proper cutting, you are going to send your surgeon to Capitol Hill to do some real cutting.

Well, Mr. President, my advice would be to send your surgeon and to send him quickly. Some people may tell you that we are not giving away the entire grocery store, and that may be true. But we are certainly giving away most of the groceries in the store.

This measure represents an improvement over the housing authorizing measure, H.R. 1, in addressing the needs of the low-income housing needs of this country but it hardly resembles a budget-cutter's dream.

I regret, for example, that the bill calls for doubling the number of units of new construction. However, overall it does recognize that we need to make a switch from emphasis on new construction programs to those which utilize existing housing stock but it appropriates entirely too much money in the process. We cannot any longer afford the convenience of sticking with the same, tired old concepts, or the impulsiveness of buying off on fashionable new products. What we can do is improve programs that have worked in the past and streamline and eliminate other programs. This bill goes only so far, but not far enough, in that direction.

I applaud the Appropriations Committee's recognition that housing vouchers are an important component of this Nation's housing law and should be retained. The bill before us today provides for 30,000 freestanding vouchers.

The Housing Subcommittee has been slow to recognize, even after 10 years of experience, that this program may be the best way to house needy families. The Appropriations Committee has again had the wisdom to fund this housing program.

During the Banking Committee markup I successfully offered an amendment to untie the voucher program from rental rehabilitation. This will help ensure that the vouchers we are funding in this bill will represent a fair test of the program.

Vouchers provide housing assistance to eligible families at a lower cost than any other housing program. They allow an assisted family to obtain decent, safe and sanitary rental housing and guarantee payment to the landlord for a portion of the rent. With the continued recognition of this valuable program, HUD has been able to assist more families than ever while at the same time decreasing the assisted housing debt.

Congress has an obligation to reduce the Federal deficit while continuing to help the most needy. We must act responsibly in affirming our Nation's commitment to provide decent, safe, and affordable housing for those who are needy. This must be accomplished, however, within the context of fiscal responsibility. I am confident that these two goals can be met.

Amendments which will be offered to the bill by members of the Housing subcommittee will enable us to meet both goals. I urge my colleagues to achieve an honest "budget freeze" for housing. The measure before us is by no means a freeze. An amendment to be offered by Mr. BARTLETT will help us achieve a freeze in assisted housing.

The bill allows for $500 million for new program reserves. This is not the time to be obligating funds to programs not yet authorized.

Also, this bill does authorize 10,000 new public housing units. Again, here we need to recognize that the housing needs of the low income can be best served by utilizing existing housing units, not by constructing new housing projects. We should restore the 1985 level for newly constructed housing units to 5,000.

It has often been said: "Little holes will sink a big ship." Well, this is not just a little hole, it's $10 billion.

So I would advise that we take a realistic look at this legislation because it is very important if we are going to keep the deficit under control.

Mr. BOLAND. Mr. Chairman, I yield such time as he may consume to the gentleman from California [Mr. COELHO].

Mr. COELHO. Mr. Chairman, I thank the gentleman.

Mr. Chairman, I would like to enter into a colloquy with the chairman of the Appropriations Subcommittee on HUD and Independent Agencies, the gentleman from Massachusetts [Mr. BOLAND].

I would like to ask the chairman about the administration's $6 million request for land for a national cemetery in northern California. As the chairman knows, the House has approved legislation directing the VA to establish the cemetery on land in Merced County, CA, a private owner is willing to donate. Am I correct then in assuming that the committee deleted those funds because it now appears that the VA will not have to pay for the land—because the cemetery will be built on donated land?

Mr. BOLAND. Mr. Chairman, will the gentleman yield?

Mr. COELHO. I yield to the chairman of the subcommittee.

Mr. BOLAND. I thank the gentleman for yielding.

Mr. Chairman, the gentleman from California is correct.

Mr. COELHO. One more point, Mr. Chairman. It is my understanding that the VA has the funds to begin design and planning and can proceed with this phase as soon as it acquires the

land. Therefore, I would ask to have some assurance that the deletion of these funds is no indication of a lack of support for this project. I would hope that at such time as construction funds are needed, and a request is submitted in a supplemental this year or in the fiscal year 1987 budget, it will be given due and favorable consideration by the committee.

Mr. BOLAND. Mr. Chairman, will the gentleman yield further?

Mr. COELHO. I am happy to yield to the gentleman from Massachusetts.

Mr. BOLAND. I thank the gentleman for yielding further.

Mr. Chairman, deletion of the $6 million in no way conveys a lack of support by the committee and I can assure the gentleman that any request for construction funds submitted by the administration will receive the most careful review and sympathetic consideration.

Mr. COELHO. Mr. Chairman, I appreciate the assurance of the gentleman from Massachusetts.

Mr. Chairman, I yield back the balance of my time.

Mr. GREEN. Mr. Chairman, I yield 3½ minutes to the gentleman from Texas [Mr. FIELDS].

Mr. FIELDS. Mr. Chairman, I rise in support of H.R. 3038, the HUD-independent agencies appropriation bill for fiscal year 1986. Funding for a project of deep personal concern to me and to the 450,000 veterans in the Houston VA Medical Center's primary service area is funded. H.R. 3038 appropriations $226 million for the replacement of the Houston VA Medical Center.

Shortly after coming to Congress in 1981, the veterans of my district suggested that I visit the Veterans' Administration Hospital in Houston. I agreed. While I expected that the facility might not be optimum, I have to tell you that I was not prepared for what I saw.

I was immediately struck by a glaring lack of patient privacy. Bed after bed was divided only by privacy curtains. In fact, the joint Commission on Accreditation of Hospitals has cited the Houston Medical Center for lack of adequate patient privacy. Toilet and bathing facilities were limited and were in deplorable condition. Handicapped access was almost nonexistent in a facility which by its very nature serves a large number of handicapped individuals.

I saw many departments of the hospital, such as ambulatory care, fragmented into different locations. The outlay of the medical center was an architect's nightmare, with various structures added on through the years to try to keep pace with growing demand and new technology. Because of these piecemeal additions along with an outmoded general design, interrelated areas such as surgery and intensive care were located wherever physically possible, not where functionally efficient. Many of the hospital's buildings were constructed in the mid-1940's with a life expectancy of 15 years, yet are still in use.

Finally, I was appalled by safety deficiencies such as inadequate smoke detectors, sprinklers, smoke partitions, and fire alarm systems. I could go on and on, but time does not permit.

Since that initial shocking visit to the Houston VA Medical Center, I have returned numerous times. Each visit rededicates me to the effort to ensure congressional approval of adequate funds to replace the Houston facility.

The Houston VA Medical Center first appeared on the Veterans' Administration 5-year facility construction plan of the 10 hospitals most in need of replacement or modernization in 1979. However, for 3 subsequent years nothing happened. The Houston facility was pushed aside in favor of other hospitals below Houston on the priority list.

That's why I became involved. I felt that the full story of our facility's dire need of replacement was not being told, or not being told loudly enough. In 1982, I arranged a meeting with the then-administrator of the Veterans' Administration. Several of my colleagues from the Houston area joined the meeting. Later that year, I was informed that, finally, the Veterans' administration had placed Houston on the advance planning fund for fiscal year 1984 to receive $5 million for preliminary design planning.

Last year, Congress recognized Houston's need and appropriated $25.2 million for working drawings and site preparation.

H.R. 3038 would follow through with the commitment Congress made to our veterans last year by appropriating $226 million, the entire amount needed for the Houston VA replacement project.

I urge favorable consideration of the bill.

Mr. GREEN. Mr. Chairman, I yield 3 minutes to the gentleman from Indiana [Mr. HILER].

Mr. HILER. I thank the gentleman for yielding.

Mr. Chairman, I rise to voice a concern about the way some of the numbers are obtained in the HUD portion of this particular bill, in particular as it relates to the assisted housing provisions.

When we were marking up the housing authorization bill in both the Housing Subcommittee and in the full Committee on Banking, somewhat of an extended discussion took place over the accounting changes as they concern modernization of public housing units.

□ 1520

I do not think anyone in the Housing Subcommittee or in the Banking full committee or on the Appropriations Committee today would say that we are going to do less in modernization for public housing authorities; and yet we are showing in our numbers nearly $1 billion savings because we are saying that rather than that money being issued to the public housing authority with a, I believe it is a 20-year note and, therefore, putting the total cost of the money going to that public housing authority is not only the actual money itself, but also the interest cost over 20 years; now we are going to treat it as a grant.

Now, the fact is that the Federal Government still has to borrow that money to give that money to the public housing authority, and we have switched the functions. Instead of that interest being charged up to the HUD budget, it is not going to be charged up to the Function 900 budget, and we then use that as a $1 billion savings to spend in a different area in the HUD budget to basically come up with our saying that this is a frozen level for HUD.

Mr. BARTLETT. Will the gentleman yield?

Mr. HILER. I will be happy to yield to the gentleman from Texas.

Mr. BARTLETT. Mr. Chairman, I think the gentleman is saying that the Housing subcommittee does not have an objection to the new accounting method. Our objection is to changing accounting methods, to shifting $1 billion of spending to another portion of the budget and then counting that as part of the new spending level in HUD appropriations; in essence, spending it twice. That is the gentleman's objection.

Mr. HILER. Reclaiming my time, I would say that is so, although I would caution the gentleman, I am not speaking for the Housing subcommittee; I am speaking for myself, and I think for the gentleman from Texas and some others.

I had offered an amendment in the Housing subcommittee that was ruled out of order, which would have said that the alleged savings that we were going to get should not be then used to justify funding new programs, and yet still come up with the bottom line of spending at a freeze level or below.

So I think that the Members of the House should know that when we vote on the HUD bill, that if this is not changed, if we do not reduce the nearly $1 billion that has been added to the HUD bill to use this billion dollars in savings; that you will be voting for funny money savings. I think you should be aware of that, and there will be more discussion on that when we get to the amendment process.

Mr. BOLAND. Mr. Chairman, I yield 3 minutes to the gentleman from New York [Mr. LUNDINE].

Mr. LUNDINE. Mr. Chairman, I have read the fine committee report that accompanies this bill. I was particularly pleased to find language urging the National Science Foundation to support the International Institute for Applied Systems Analysis, known as IIASA.

IIASA was first conceived by President Johnson as a place were East and West could meet and demonstrate that we could work together on common problems that require common solutions. The Institute was later established under President Nixon, with the support of scientific bodies from a dozen countries.

As a member of the Science and Technology Committee, I have met many American scientists who have worked at IIASA. I have learned that the Institute makes valuable contributions in tackling global problems like overpopulation, world climate, and depletion of energy, food, and water resources. These are problems where East-West cooperation is important and noncontroversial.

I was fortunate to be in Vienna for a meeting of the Inter-American Development Bank last March. While there, I led a delegation to IIASA's headquarters and met Prof. Tom Lee of MIT, the new director of the Institute. I was extremely impressed by Dr. Lee and I know that IIASA will continue to make important contributions in the future under his leadership.

Once again, I commend the Appropriation Committee for recognizing the importance of IIASA. I strongly support NSF funding for this valuable institution.

Mr. GREEN. Mr. Chairman, I yield myself such time as I may consume.

I take this time to respond to a couple of issues that have arisen during the general debate. First, let me deal with the question of the so-called accounting change.

This is a change in the way that the modernization program is funded. I emphasize for my colleagues that this is a change requested by the administration so that in adding this to the bill and in changing the traditional method of funding the modernization program, we have simply acceded to what the administration requested.

I would suggest, however, that the consequences are a little different from what those who have attacked the accounting change, who have questioned its saving, would have you think.

The fact of the matter is, one does save dollars when one buys for cash instead of buying on the installment plan. They get around that by seeking to charge this account, alone of all the accounts in the budget, with the interest on the national debt.

Now, if you wanted to charge accounts that way, we would have not a $300 billion defense bill but a $1,300 billion defense bill by the time we pay off all the borrowing for the Defense authorization bill that this House passed earlier this year.

The fact of the matter is that as the modernization program has worked in the past, the Federal Government entered into contracts with local housing authorities to pay for 20-year borrowing by the local housing authority; and the Federal contract agreed to pay both the principal amount of the debt incurred by the housing authority to conduct the modernization work and the interest on that principal amount. Depending on what interest rates were at the time, that meant that the total amount it would cost the Federal Government as it paid off on that contract, over a 20-year period, would be approximately twice the cost of the work; it has been a little more than twice what the work would cost if we paid up front.

Of course, as the gentleman points out, if we pay it up front we have to borrow money because we are having a deficit this year and there will be interest on that money; but when we pay it over time and we have deficits, we have to borrow more than twice as much money; and we therefore have to pay more than twice as much interest on the national debt, because we have bought on the installment plan.

Essentially what the administration is seeking to do is to stop buying housing modernization on the installment plan, to pay for it up front, and to save money the way any household would that pays for its goods up front instead of buying on time.

Mr. BARTLETT. Will the gentleman yield?

Mr. GREEN. I yield to the gentleman.

Mr. BARTLETT. Rather than debate all of the merits and demerits, the point is, is without debating the merits of the new accounting system; of whether it is paid up front or on the installment plan, all we are asking is that it be an apples-to-apples comparison, so that however we accounted for it, in fiscal year 1985, we account for it in the same manner in fiscal year 1986.

The Congressional Budget Office, for example, has sent a letter in which they conclude there are no net savings in outlays to the Federal budget as a whole, since the proposed financing methods would simply cancel a host of intergovernmental transfers.

The point is that all we ask is that we compare, is that we calculate fiscal year 1985 the same way we calculated fiscal year 1986 so then we can come to a freeze baseline; not that we calculate them—the appropriations bill has fiscal year 1986 calculated a new way, and it takes the $900 million that is taken out and counts it as a savings.

Mr. GREEN. If I may reclaim my time, the problem is we are not comparing apples; we are comparing dollars. And when you compare dollars, there is a real dollar savings from paying cash instead of borrowing; any family that has to make a purchase either for cash or on the installment plan knows which way it comes out. That is why we have truth in lending legislation.

Let me now move on, however, to the question of the reserve fund. I would like to say to the House that this reserve fund is an effort on the part of the Appropriations Committee to accommodate the authorizing committee; in this case, the Banking Committee.

□ 1530

It would have been easy enough for us to sit down and write out $500 million of items on which we chose to spend the money. We have deferred to the Banking Committee by holding this fund in reserve so that its members may fulfill their function under the House rules and make a determination as to what housing programs this House ought to have. But we have been honest with the House. We have told the House that we anticipate that we will be applying this money to assisted housing before the budget process is over. I think that is the honest way to do it. I do not think we should be criticized for it. I think we should be applauded for the deference we have shown the Banking Committee and for the honesty we have shown the House by accounting for this situation in this manner.

Mr. BARTLETT. If the gentleman will yield, I have a great deal of respect for the gentleman from New York, I work a great deal with him on housing matters and I appreciate the Appropriations Committee attempting to accommodate the Banking Committee. What the Members of the House would like would be for the Appropriations Committee to acommodate the 435 Members of the House who have not yet had an opportunity to review the creation of these five new programs.

So we as Members of the House as a whole would seek to withhold judgement and to have a real debate on those new programs before the money is appropriated.

Mr. GREEN. If I can reclaim my time, since I have only about a minute left, before that money gets applied to specific programs the house will have two shots at it, once in the authorizing legislation, when that is scheduled, and once in any supplemental appropriation or continuing resolution when we identify the reserve with specific

programs. We are not denying the House that opportunity. We are simply alerting the House that it is the intention of the committee to come back to the House with specific recommendations after we have heard what the Banking Committee chooses to do and the House has approved it.

Mr. BOLAND. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Texas [Mr. ANDREWS].

Mr. ANDREWS. Mr. Chairman, it gives me great pleasure to note that today the veterans' hospital replacement project was fully funded by the House. This hospital project will be a critical link in our ability to provide ongoing medical care to the veterans in Houston and throughout my region of the country.

According to the Veterans' Administration, by the year 2000 the number of veterans over 65 will more than double to 9 million, making 2 out of 3 elderly males in the United States eligible for Veterans' Administration medical care. This hospital is a vital part of the response to a dramatically growing need. Our veterans who have risked their lives for our way of life deserve the best medical care available. This hospital will provide such care. We have faced difficulties and setbacks in planning for this replacement hospital facility. It is to the credit of all of the people with whom I've worked for so many months that attention to the needs of American veterans have kept those difficulties to a minimum and helped in their solution. This hospital means so much for American veterans, and I am proud to have worked for its funding.

Mr. BOLAND. Mr. Chairman, I yield such time as she may consume to the gentlewoman from Louisiana [Mrs. BOGGS], a member of the committee.

Mrs. BOGGS. Mr. Chairman, it is with a great deal of pride that I rise in full support of this legislation and to compliment the chairman and the ranking minority member, and all the members of the committee and the staff, for coming forth with a bill of such a comprehensive nature that deals not only with one of the largest departments in the Government, but with 17 of the independent agencies. The particular care which is taken with each of these agencies and with each segment of the Housing and Urban Development Department is absolutely amazing. Sometimes some of the best programs that this bill funds are lost to the public view in the whole comprehensive attitude of the bill.

It is imperative that we consider the many good and measurable benefits of NASA's programs when we consider its budget. Most of the programs carried out by NASA have benefits for our country but are difficult to measure when they are initiated. You have heard about some of these programs by some of my distinguished colleagues. I would like to review one of NASA's programs that I have supported and have a special interest in that it has produced remarkable and very measurable benefits. This is NASA's Search and Rescue Program—sometimes called the COSPAS/SARSAT Program. This program saves lives.

In 1978, NASA requested a new start to support their idea of developing a system using polar orbiting satellites to detect crashed airplanes and sinking boats. Congress supported its request.

By 1979, NASA with its unique facilities and people were not only able to complete the design of the system but they put together a team of U.S. agencies including the Coast Guard, Air Force, and NOAA and formed an international team with France and Canada. Later that same year they formed an additional team with the Soviet Union to jointly develop and fund the system.

In 1982, after less than 4 years of work, the first satellite [COSPAS I] was launched. Within weeks of the first launch, while NASA was performing preliminary tests, the satellite detected a red emergency in the wilderness of British Columbia—and three lives were saved.

Today, we have three Soviet and two American satellites in orbit. As of this morning, 475 lives—(over one-half of them American)—have been saved by this program. The COSPAS/SARSAT system has been declared operational and nine nations are now participating in the program. We will probably see over 100 nations involved in the program within 10 years.

So far 475 pilots, fishermen, and explorers have been saved by this NASA program—a very measurable benefit.

When we consider NASA's budget, remember the Search and Rescue Program as representative of the many good things NASA does for our great Nation.

● Mr. CONTE. Mr. Chairman, I am pleased to join the distinguished chairman of the subcommittee, Mr. BOLAND, and the ranking minority member, Mr. GREEN, in bringing to the House floor today H.R. 3038, the bill making appropriations for the Department of Housing and Urban Development and independent agencies for fiscal year 1986.

I would like to take this opportunity to thank the chairman, the ranking minority member, and each of my colleagues on the subcommittee for their swift and responsible action in reporting out this measure. This is the fifth regular appropriation bill which we bring to the floor this year. With very few legislative days remaining in this fiscal year, it is important that we move as expeditiously as possible to complete work on this and other bills so that they may be sent to the other body and enacted into law before October 1.

This bill contains $57.8 billion in new budget authority for the Department of Housing and Urban Development and 17 independent agencies for fiscal year 1986. This is approximately $1.011 billion below fiscal year 1985 enacted levels, and $10,352 billion above the budget request.

The majority to the increase over the President's request, $11.4 billion, occurs in the assisted housing account where our committee has rejected the proposed 2-year moratorium on all subsidized housing programs.

While the chairman and the ranking minority member have described some of the important housing, community development, environmental, veterans, emergency management, scientific, consumer and educational programs and activities funded through this bill, I would like to take a moment to highlight a few of the programs which we have included for fiscal year 1985.

For the Department of Housing and Urban Development, we have recommended $3.124 billion for community development block grants, the same as the budget request and as assumed in the House-passed budget resolution. We have provided $330 million to continue the Urban Development Action Grant Program, a 25-percent reduction from the 1985 levels, but a significant restoration of the President's request for program termination.

We have restored the section 8/section 202 level of 12,000 units at the fiscal year 1985 level to maintain our commitment to provide housing for elderly and handicapped Americans, and have recommended $735.3 million for the modernization of public housing. In addition to the 100,000 incremental assisted housing units, our committee also recommends $75 million for the Rental Rehabilitation Grants Program and $75 million for Rental Housing Development Grants Program. We have also recommended $20 million for the Solar Energy and Conservation Bank, and $1 million for the Housing Assistance Council, the national nonprofit corporation which has been established to increase the availability of decent housing for rural, low-income people.

Out of our $1.5 billion recommendation for the Environmental Protection Agency, we have provided $1.5 million to upgrade the national emissions data system to make possible an accurate inventory of industrial emissions related to acid rain, an increase of $4 million over the request for hazardous waste and ground water research, $5 million for the Clean Lakes Program, and $50 million for the School Asbestos Abatement Program.

For the Federal Emergency Management Agency, we are recommending $631.7 million. Included in this total is

$70 million for the Emergency Food and Shelter Program and a continuation of funding for the Neighborhood Antiarson and National Community Volunteer Fire Prevention Programs.

Our committee's recommendations for NASA total $7.66 billion, and include a minimum of $200 million for phase B definition studies connected with the President's space station initiative. For the National Science Foundation, we recommend $1.523 billion, including $60.55 million for science education activities. The fiscal year 1986 recommendation for the Veterans' Administration totals $26.503 billion.

Mr. Chairman, as you know, the administration has indicated its opposition to the bill as reported by the committee. In one of his last "Dear Sil" letters, our good friend, the young slasher, the Director of the Office of Management and Budget, indicates that the most seriously objectionable increases are the $330 million UDAG provision, $70 million for the Emergency Food and Shelter Program, $99 million for the construction of major Veterans' Administration projects, a $129 million increase over the request for EPA operating programs and a $279 million increase over the request for Veterans' Administration medical care.

Mr. Chairman, as you know, the committee has recommended deferral of fiscal year 1986 action on four specific issues until such time as the appropriate authorizing committees act on matters within their jurisdiction. These include: EPA wastewater treatment construction grants, the Superfund, the Fair Housing Initiatives Program and several additional housing programs.

I think that each of us is disappointed with one aspect or another of this bill. Some of us would like to see some increases for a change in assisted housing programs for the elderly, handicapped, and low-income. Some of us would like to see new veterans medical facilities for our needy veteran population or additional funding for science education at the precollege or university level. I, myself, am sorry to see just another $50 million going into the acid rain research effort at EPA, and I regret that I cannot stand here proudly before you to explain a strong, responsible control program initiative. It is not here.

But in light of the need for fiscal restraint, the absence of necessary authorizing legislation, and the clear and continued responsibility which we have to provide shelter, medical care, environmental protection and scientific and technological advancement for the citizens of this great country, I believe that we have before us a responsible bill which deserves our support.

In over 20 days of hearings, including testimony from more than 300 witnesses filling 9 volumes of hearings and 7,500 pages, our committee has crafted a fair and reasonable bill. In light of the assumptions made in the House-passed budget resolution, and action which we await from a wide number of authorizing committees, I believe that we have acted responsibly. I urge the support of my colleagues for H.R. 3038.●

● Mr. MONTGOMERY. Mr. Chairman, during debate on the supplemental appropriations bill passed by the House on June 12, 1985, I complimented the leadership of the Appropriations Committee for the restoration of certain funds for the Veterans' Administration, especially for veterans' health care.

Again, I want to thank the very able chairman of the Subcommittee on HUD-Independent Agencies, the distinguished gentleman from Massachusetts [Mr. BOLAND] and the distinguished ranking minority member of the subcommittee, Mr. GREEN, for correcting some of the deficiencies in the administration's proposed budget for veterans for the next fiscal year.

For example, the subcommittee took the following actions:

First, it restored the 5-percent pay cut throughout the agency, including the medical care account, to prevent what would be a very serious reduction in VA staffing. The proposed pay cut would have required a reduction of 6,767 FTEE in VA's medical staff—VA is already having to absorb a 1-percent OMB imposed staff reduction of 1,916 FTEE in fiscal year 1986 and will have to reduce current hospital staffing by about 2,000 FTEE in order to fund activations next year.

Second, it continued the staffing level for medical care at the 1985 level of 193,941. This follows earlier committee and House action approving $152 million to maintain that FTEE level in fiscal year 1985.

Third, it increased medical and prosthetic research by $8,760,000—some of the most vital and effectively used money available to the VA medical care system to assure quality medical care for veterans.

Fourth, it added the funds necessary to fully fund the replacement hospitals at Philadelphia and Houston. It is very important that we continue to upgrade the medical facilities throughout the country, many of them 50 or more years of age.

Fifth, it prevented the administration from eliminating the VA Nurse Scholarship Program.

Sixth, it provided 13 FTEE for the two pilot programs our committee enacted last year to provide vocational training for certain seriously disabled veterans drawing compensation and pension benefits. We hope to get many of these veterans off the unemployment rolls and back to productive jobs.

These are some of the major differences between the administration's plan for veterans and that proposed by the Appropriations Committee. All of the recommendations of the subcommittee are contained in the committee bill and, again, I want to thank the distinguished and very able chairman of the full committee, Mr. WHITTEN, the distinguished ranking minority member of the full committee, Mr. CONTE, and all members of the Appropriations Committee for their continuing commitment to our veterans and their families.●

The CHAIRMAN. All time for general debate has expired.

Mr. BOLAND. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore [Mr. VENTO] having assumed the chair, Mr. PANETTA, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3038) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1986, and for other purposes, had come to no resolution thereon.

WAIVING CERTAIN POINTS OF ORDER AGAINST CONSIDERATION OF H.R. 3037, AGRICULTURE, RURAL DEVELOPMENT, AND RELATED AGENCIES APPROPRIATION BILL, 1986

Mr. HALL of Ohio. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 232 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 232

Resolved, That during the consideration of the bill (H.R. 3037) making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1986, and for other purposes, all points of order against the following provisions in the bill for failure to comply with the provisions of clause 2 of rule XXI are hereby waived: beginning on page 9, line 13 through page 16, line 11; beginning on page 22, lines 1 through 13; beginning on page 25, line 11 through page 26, line 8; beginning on page 27, line 12 through page 28, line 10; beginning on page 29, line 11 through page 30, line 10; beginning on page 30, line 21 through page 31, line 7; beginning on page 32, lines 6 through 13; beginning on page 32, line 20 through page 33, line 4; beginning on page 46, line 9 through page 48, line 8; beginning on page 48, line 23 through page 50, line 21; and beginning on page 52, line 7 through page 53, line 2; and all points of order against the following provisions in the bill for failure to comply with the provisions of clause 6 of rule XXI are hereby waived: beginning on page 22, lines 1 through 13; be-

ginning on page 27, line 12 through page 28, line 10; and beginning on page 46, line 9 through page 48, line 8.

□ 1420

Mr. HALL of Ohio. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Missouri [Mr. TAYLOR], for purposes of debate only, pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 232 waives points of order against several provisions of H.R. 3037, the Department of Agriculture, rural development, and related agencies appropriation bill for fiscal year 1986. The rule does not provide for the bill's consideration because general appropriation bills are privileged under the Rules of the House. Provisions relating to time for general debate are also excluded from the rule. Customarily, general debate is limited by a unanimous-consent request by the chairman of the Appropriations Subcommittee prior to consideration of the bill.

Despite the fact that the House and Senate have not yet agreed to a budget resolution for fiscal year 1986, no budget waiver is necessary to allow consideration of this appropriation bill. As Members are aware, on July 24, the House adopted House Resolution 231 which deemed the House-passed budget resolution to have been adopted for purposes of the enforcement provisions of the Budget Act. This allows the House to proceed to consideration of appropriation and other spending legislation without the necessity of a waiver of section 303 of the Budget Act. Under the terms of House Resolution 231, this and other such legislation is subject to all the constraints of the Budget Act.

The rule waives all points of order against specified provisions of the bill for failure to comply with clauses 2 and 6 of rule XXI. Clause 2 of rule XXI prohibits unauthorized appropriations and legislative provisions in general appropriation bills. Clause 6 of rule XXI prohibits reappropriations or transfers in general appropriation bills.

The specific provisions of the bill which have been granted waivers are detailed, by reference to page and line of the bill, in the rule. I also have a copy of a letter from Chairman WHITTEN further describing the provisions protected by the waivers.

The sections granted a waiver of clause 2 of rule XXI in title I of the bill provide appropriations for a number of research and extension programs. These include the Agricultural Research Service, the Cooperative State Research Service, the Extension Service, and the National Agricultural Library. Funding for the Dairy Indemnity Program is also protected from points of order by the rule. In addition, title I contains language dealing with section 32 funds which may constitute legislation in an appropriations bill, and is therefore protected from points of order by the rule.

Clause 2, rule XXI waivers are also necessary to protect rural housing programs in title II of the bill.

In title III of the bill, clause 2, rule XXI waivers are needed for several sections relating to domestic food programs. Title III also contains language dealing with transfer of section 32 funds which may constitute legislation in an appropriation bill, and is, therefore, protected from points of order by the rule.

Title IV of the bill deals with international programs. Clause 2, rule XXI waivers are needed for sections relating to the Public Law 480 Program.

Mr. Speaker, many of the provisions which have been granted clause 2, rule XXI waivers are in various stages of the legislative process. In some cases, the authorizations will be contained in the 1986 farm bill not yet reported by the House Committee on Agriculture. In other cases, legislation has been reported by the authorizing committee but has not yet been considered by the full House. Since the authorizing bills have not been enacted into law, the provisions specified in the rule represent unauthorized appropriations in a general appropriation bill. Therefore, a waiver of clause 2 of rule XXI is necessary.

The rule also protects specified sections of the bill against points of order for failing to comply with clause 6 of rule XXI. In title I, language dealing with the transfer of section 32 funds needs a clause 6, rule XXI waiver, as does the language providing a transfer of funds for the general sales manager of the Commodity Credit Corporation. In title III, the section providing for a transfer of section 32 funds for the child nutrition programs also requires protection from points of order under this clause.

Mr. Speaker, H.R. 3037 is an important measure providing appropriations for a variety of programs ranging from measures to assist our Nation's largest industry—agriculture; to domestic nutrition programs, and food-for-peace funds for Africa. The bill has broad bipartisan support.

House Resolution 232 provides for expeditious consideration of this bill, and I urge its adoption.

I yield to the gentleman from Missouri [Mr. TAYLOR] for the purposes of debate only.

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 232 waives certain points of order against the consideration of the agriculture, rural development and related agencies appropriations bill for 1986.

The purpose of this rule to allow timely consideration of the bill, H.R. 3037, and it therefore waives points of order that would otherwise lie against specified provisions of the bill for failure to comply with clause 2 and clause 6 of rule XXI.

Mr. Speaker, the gentleman from Ohio [Mr. HALL] has already pointed out that this rule does not contain a waiver of section 303 of the Budget Act, because the House adopted House Resolution 231 earlier today, and thus alleviated the need to waive points of order against consideration of this bill for failure to comply with section 303 of the Budget Act.

Clause 2 of rule XXI prohibits appropriations for any expenditure not previously authorized by law and it also prohibits legislation on an appropriations bill. The waiver recommended by the Committee on Rules is necessary because a number of provisions of H.R. 3037 contain appropriations for which authorizing legislation has not yet been enacted.

Clause 6 of rule XXI prohibits reappropriations or transfers in a general appropriation bill. The waiver recommended by the Committee on Rules is necessary. Several items may be reappropriations.

Mr. Speaker, the various provisions of the bill to which these waivers apply are specified in the resolution, and are provided because of delays in enactment of the 1985 farm bill, the 1985 Housing Act reauthorization, and the foreign assistance authorization bill.

Mr. Speaker, the programs funded by this appropriations bill have generally have been frozen by the Committee on Appropriations at their 1985 funding levels, and the bill covered by this rule maintains current service funding for most of our farm and nutrition programs.

Mr. Speaker, it is certainly not the fault of the Committee on Appropriations that the necessary authorization bills have not been enacted into law, and the action of the Committee on Rules reflects this fact.

Mr. Speaker, there was no controversy about this rule in the Committee on Rules, and the chairman of the Committee on Appropriations, the gentleman from Mississippi [Mr. WHITTEN], and the ranking Republican member of the Agriculture Subcommittee, the gentlelady from Nebraska [Mrs. SMITH] appeared before the committee united in their request for this rule.

Mr. Speaker, I strongly support this rule because we are rapidly running out of time before the beginning of the new fiscal year.

Mr. BONIOR of Michigan. Mr. Speaker, I wish to thank my friend and colleague from Ohio [Mr. HALL], for filling in for me in my absence earlier.

Mr. Speaker, I have no requests for time and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 3037, and that I be permitted to include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

AGRICULTURE, RURAL DEVELOPMENT AND RELATED AGENCIES APPROPRIATIONS BILL, FISCAL YEAR 1986

Mr. WHITTEN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill—H.R. 3037—making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1986, and for other purposes; and pending that motion, Mr. Speaker, I ask unanimous consent that general debate be limited to not exceed 2 hours, the time to be equally divided and controlled by the gentlewoman from Nebraska [Mrs. SMITH] and myself.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi [Mr. WHITTEN].

The motion was agreed to.

□ 1550

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 3037, with Mr. VENTO in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

There was no objection.

The CHAIRMAN. Under the unanimous consent agreement, the gentleman from Mississippi [Mr. WHITTEN] will be recognized for 1 hour, and the gentlewoman from Nebraska [Mrs. SMITH] will be recognized for 1 hour.

The Chair recognizes the gentleman from Mississippi [Mr. WHITTEN].

Mr. WHITTEN. Mr. Chairman, I yield myself such time as I may require.

Mr. Chairman, we come now to one of the basic actions that the Congress has to take each and every year. It has been said that with less than 3 percent of our people engaged directly in agriculture today that these few make it possible for us to have food, clothing, and shelter so that the rest of us may have the standard of living that we have today.

Historically, American agriculture has been the custodian of our land for present and future generations. Historically, American agriculture has been our chief earner of dollars in world trade. Historically, it is the biggest market that industry and labor has, and the biggest employer that we have. I hate to say it, but right now we are in a serious situation in agriculture and if we do not look after what is left, the whole country will feel it.

Most folks do not realize that the farm programs of the mid-1930's were to restore the purchasing power of American agriculture.

BUDGET REQUEST

I would call attention here today to the fact that there have been proposals that the Department of Agriculture be abolished, and that the budget submitted to us provides for the abolishment of the conservation programs, the programs that take care of our land for the present and future generations. It calls for the abolishment of rural housing and other rural development programs, and recommends that we abolish most direct farm lending by the Farmers House Administration at a time when banks and the Farm Credit System are unable to meet the need. It looks like in the coming year the Farmers Home Administration will be nearly the sole source of money with which to farm. The budget works toward abolishing the Rural Electrification Administration. It would abolish all special research grants, those where the Congress has some say about what is done, and where they report to the Congress as to what they are doing. It would abolish all the special programs of the Extension Service, it would convert the Farmers Home Administration to a loan servicing agency and terminate about 4,000 employees. It would convert the Soil Conservation Service to a technical assistance staff and terminate 9,300 employees, and it would reduce access to the feeding programs such as school lunch and elderly feeding.

That is what we had before us. Since there is no way, without abolishing all the programs of the Department, it left us where we had to measure what we recommend by the present year's appropriation under which it is operating.

RECOMMENDED BILL

So I would like to say that our bill is based on the 1985 levels. The bill is under the House-passed budget resolution. It is within the 302 allocation.

We recommend $36,396 million-plus in obligational authority. We are $4.2 billion below the 1985 appropriation.

I would like to pause and say that $9.2 billion will be appropriated to the Commodity Credit Corporation because it is greatly depleted in its ability to meet its obligations.

As I said, it is within the 302 allocation. It is $916,000 less than the budget. It restores the rural housing program to the 1985 level, restores the conservation programs to the 1985 level, it restores water and sewer loans to $340 million and grants to $115 million, restores the Cooperative State Research Service and the Extension Service to about last year's level.

It restores special research grants. It restores nutrition aids and urban gardening, which gives our city colleagues an opportunity to take part in the debate in handling this program.

We restore the REA loan programs and provide that the REA associations shall not be sold except with the support of over half of the Members, and provides that any loans to the Government would have to be repaid, as provided by law.

We fully fund all the food programs, and require a budget request for $665 million for school lunch, since it is an entitlement program.

LEADED GASOLINE

Mr. Chairman, in our full Committee meeting on this bill, Mr. TRAXLER and Mrs. SMITH of Nebraska offered an amendment to the committee report regarding the Environmental Protection Agency's proposed ban of leaded gasoline. Their amendment to our report passed unanimously. When the report was filed in the House the language of the amendment was inadvertently omitted from the committee's report.

The language that was adopted is as follows:

The committee is concerned that the Environmental Protection Agency's proposed ban of leaded gasoline will impose severe hardship on farmers and ranchers, many of whom utilize machinery powered by leaded-gasoline engines. The Secretary will be expected to fully cooperate with the Administrator of the Environmental Protection Agency in conducting a study of the use of fuel containing lead additives in gasoline engines which are used in agricultural machinery and are designed to combust fuel containing such additives.

AGRICULTURE ESSENTIAL

Let me repeat again: Here we deal with the relatively few who make our high standard of living, the group to whom we have to look to take care of the soil and the natural resources that we have. It has been the chief dollar earner in world trade, and would be so again if we will sell competitively as we have the authority to do under the

charter of the Commodity Credit Corporation. Not only do we have the right to offer for sale at competitive prices, but we have the obligation, in my opinion, to do so. At a time when the world is begging for food, we are wasting the big advantage we have in providing for the peoples of the world.

We need again to restore the dollar earnings of American agriculture because now we are running a trade deficit of around $100 billion a year. We are buying that much more than we are selling, and we need to restore the purchasing power of American agriculture.

EMBARGOES

In our bill, we ask for information about what the effects of our policies have been where we have set embargoes against exports. We have put embargoes on the sale of soybeans at one time, a market that we are finding hard to get back. We had an embargo on exporting grain. Now, if you were the middleman, if you bought grain at a time when we had an embargo against selling to Russia and could not sell it, we paid the exporter, but we did not pay the farmer anything. There have been years when we have not used the mechanics of our Government, through the Commodity Credit Corporation, to see that the product is moved. We are asking them to give us the information on that to see what part it has played in the serious situation facing agriculture.

I say further that we have over 59 banks in rural areas that failed this year. American agriculture owes $214 billion, and I do not know how, at present prices, they are going to pay the interest on that debt.

Mr. Chairman, our bill is within the budget and within the allocation. We are bringing you a bill to restore these services so vital to the American people. Mr. Chairman, this is a good bill and I hope we will have the support of all the Members.

Mrs. SMITH of Nebraska. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of H.R. 3037, making appropriations for Agriculture, Rural Development, and Related Agencies for fiscal year 1986.

Let me commend my good friend and colleague, the chairman of the full Appropriation Committee and chairman of the Appropriations Subcommittee on Agriculture, Mr. WHITTEN, for his leadership and expertise in drafting a bill that significantly addresses the needs of rural America, but yet serves an extremely broad spectrum of constituencies. I also commend the other members of the subcommittee for their efforts to work in a bipartisan manner on behalf of agriculture. Thanks are extended to the staff for their outstanding assistance.

This bill funds our Child Nutrition and Food Stamp Programs, sends food for peace donations to hunger-stricken people in Africa and around the world, and provides important assistance to many Americans in our large cities who participate in such activities as the extension service's Urban Gardening and Nutrition Education Programs.

So this bill addresses many high priorities, the highest of which is our agricultural production base. Before pointing out major features of the bill, let me take a moment to review the importance of American agriculture:

Farming, with a work force of 3 million, is the Nation's largest industry, employing as many as the combined work forces of the transportation, steel, and automobile industries.

In all, fully 22 percent of our work force, or 23 million individuals, work in agriculture-related industries throughout our country.

Our export surplus of agricultural products, which is estimated at $14 billion this fiscal year, is one of the few bright spots in our $150 billion balance of trade deficit—this in spite of the overvalued dollar.

Let me briefly review key features of the bill, particularly as they relate to Members of this body:

Overall, the amounts in this bill are within the amounts assumed in the House-passed budget resolution.

Funds are included to restore Federal employees pay to the status quo prior to the 5-percent pay cut proposed by the administration's original budget.

Funding for Soil and Water Conservation Programs, which help to preserve two of our most important natural resources, has been restored to levels about the same as fiscal year 1985.

Farmers Home Administration farm ownership, rural housing, and rural development loan levels are nearly identical to last year's level. FmHA farm operating loans total $3.4 billion—the same as the administration's budget request.

Rural Electrification Administration loan levels are in accordance with the agreement reached earlier this year by the administration, the other body, and the rural electrical cooperatives.

Nearly all special grants funded in fiscal year 1985 by the Agricultural Research Service and the Cooperative State Research Service have been restored in the bill, along with special programs of the Cooperative Extension Service.

The levels of expenditure proposed by this bill represent a bipartisan effort of the Appropriations Committee and our Agriculture Subcommittee to develop a balanced bill that is truly fiscally responsible. Loan levels are either frozen or reduced in nearly every account, and expenditures would be held to levels very close to the original fiscal year 1985 levels.

Therefore, I urge my colleagues to vote for fiscal responsibility and continued support for these programs by approving H.R. 3037.

Mr. WHITTEN. Mr. Chairman, I yield myself 2 minutes.

Mr. Chairman, as chairman of the Subcommittee on Agriculture, I wish to express my thanks to the gentlewoman from Nebraska [Mrs. SMITH]. Nobody could be better informed or more interested or work harder. She makes a great contribution, not only in this area but in many other areas.

I do not believe there is a better subcommittee membership anywhere. The subcommittee is composed of the gentleman from Michigan [Mr. TRAXLER]; the gentleman from New York [Mr. MCHUGH]; the gentleman from Kentucky [Mr. NATCHER], with whom I have served for many years on the subcommittee; the gentleman from Hawaii [Mr. AKAKA]; the gentleman from Oklahoma [Mr. WATKINS]; the gentleman from Illinois [Mr. DURBIN]; the gentleman from Iowa [Mr. SMITH]; the gentlewoman from Nebraska [Mrs. SMITH], whom I mentioned; the gentleman from Indiana, Mr. JOHN MYERS, who has given many years of service here, though he is a very busy Member in other activities; the gentleman from Kentucky [Mr. ROGERS]; the gentleman from New Mexico [Mr. SKEEN]; and the gentleman from Massachusetts, Mr. SILVIO CONTE. I wish to pay special tribute to my colleagues who work on this subcommittee because they, too, recognize agriculture as basic to the overall economy and to the public's well-being.

Mrs. SMITH of Nebraska. Mr. Chairman, I yield 5 minutes to my good friend and colleague, the gentleman from Indiana [Mr. MYERS].

Mr. MYERS of Indiana. Mr. Chairman, I thank my colleague, the gentleman from Nebraska, for yielding this time to me.

Mr. Chairman, it is a pleasure to serve on this committee, not just for the task we have in trying to help rural American agriculture but for the colleagues we have to serve with and the staff that we have.

As Chairman WHITTEN and the gentlewoman from Nebraska [Mrs. SMITH] have both demonstrated here, the spirit is that we want to try to help rural America. It is a rather difficult job, but we do it in a bipartisan way—I guess I should say "nonpartisan" because there is a difference between bipartisan and nonpartisan. We do it in a nonpartisan way because the problems in rural America today are too important to let politics enter into it.

I just took this off the ticker here. Contract lows were established in every pit in the grain market in Chicago at the close today. At the close, soybeans were off up to 5¾ cents; wheat

was off up to 6 cents, 6 to 8 cents; corn was off up to 3¼ cents; and oats were off 2¼ cents. This is happening too often. The market is continuing to go down.

If you will look at the report—and I know there is a lot of reading in these committee reports—on pages 10, 11, and 12 it pretty well tells the story about agriculture and rural America and its plight. If you will read it, it says that prices received by farmers have gone up roughly 50 percent in the last 10 years; that is, on overall prices, while prices paid by farmers have more than doubled. The pressure is on farmers to produce better today and cheaper, and it is not always possible.

This bill is a rather comprehensive bill. It is unfortunate that so often some of our colleagues point to the $33 billion figure here in this appropriation and say: "Look, a $33 billion handout to farmers of America for sitting on their cans and going to Florida," or whatever it is farmers are accused of. And that is not true.

If you would closely examine our appropriation bill today, you will see that more than 60 percent of this $33 billion is not related to help to farmers directly; it is in feeding programs such as the Child Nutrition Program, $4 billion plus; women, infants, and children, $1.5 billion; and food stamps, almost $12 billion. Those are three of the largest items in our appropriation bill.

So maybe it is a little unfair that farmers get tagged today about this huge appropriation, that we are bailing out farmers or paying farmers not to work, which is not true.

But it is a big bill. I must say that in the years I have been on the Appropriations Committee this bill has increased rather significantly. But again it has not been in helping farmers do a better job or paying farmers not to produce or providing for the many programs that so often farmers get accused of. So much of it has been in feeding programs and in research. And research is very necessary.

The bill is under every expectation. It is below the President's request by approximately $22 million, not a large amount under the President's request, but it is under the President's request. It is well under last year's spending on appropriations.

The Members are all going to receive letters, as we already have, from the Office of Management and Budget. I would be kind of disappointed and be suspect if we did not get a letter from OMB saying that the bill is not acceptable to the administration. It troubles me to get those letters because it is the scoring, how it is done. We have examined this, and what actually happens is that every time the Appropriations Committee makes a savings and cuts below the President's request, that is never taken off, but every time we change in priorities, adjust the dollars from the President's request, if we add to it, that is a plus. That is charged against us in their scorekeeping. But when we cut below, which we did a number of times, we are never given credit. So the OMB makes the best of their world to make their case look the best. They add it up, they add to it and charge us if we go over their expenditures, but they never give us credit for the cuts.

As long as I have been on the Appropriations Committee—and the chairman has been there a long time, much longer than I have, as well as several other members, including the gentleman from Kentucky [Mr. NATCHER], who has been there many years longer than I—the House of Representatives and the other body, especially the Appropriations Committees, are going to see things differently from the administration. And we should. That is our job. If we have to rubber stamp only what somebody else requests, why have the Appropriations Committee? Why have a House of Representatives? Why have a Congress at all?

Of course we make some adjustments. We live with it. We examine each of these programs, and we make judgments on what is best for rural America because we are closer to it.

We have made some changes. But this is the bottom line which I think we have to be concerned about here. We have the House-passed budget, which is someplace between here and the other side—and whether it will ever see the light of day we do not know—and we can only take that document and last year's spending and the President's request. We are under all of them in this bill.

Mr. Chairman, this is a bill worthy of the Members' support.

□ 1610

Mr. WHITTEN. Mr. Chairman, I would like to point out the situation we have facing us and the basis for our bill that we have here.

Mr. Chairman, Members are well aware of the conditions facing American agriculture. Not a day goes by without the press reporting on the seriousness of the situation. Bankruptcies are prevalent, and loss of farms that have been in a family for generations is commonplace.

What is equally disturbing is the recommendation for a new farm bill submitted by the administration which would reduce farm income further, would reduce production, and do nothing to reduce costs to the farmer nor to pass on a reasonable price to the user of farm products.

Why don't we let the user pay for a reasonable support price for basic commodities. It would be many times cheaper to the Government and would prevent the farmers from an undeserved tag of being kept citizens. At the beginning of the year, we would remove to a great degree the uncertainty of price. Industry and labor pass on to the users what they get under laws—through such laws as minimum wage, the right of labor to organize and of industry to mark up so much above cost. Over the last 25 years these two have increased their take of the user's dollar from 49 percent to 73 percent. The farmer buying from them has an ever-increasing cost and decreasing income, declining from 51 percent to 27 percent during the same period.

What we pay to him is to offset the increase of what the other two have gotten. As with industry and labor, the farmer should receive a fair return.

In export sales, we have to deal with foreign governments. Why don't we use the Commodity Credit Corporation, a wholly owned Government corporation set up for the very purpose of dealing with foreign governments? It worked before, why not use it now? All countries sell what they produce and don't need for what it will bring except the United States. Why should we hold an umbrella over world prices and remain a residual supplier because we don't push for our normal share of world markets?

If the Secretary rents 20 million acres of land, at a cost of $11 billion charged to the farmer, actually he will give away a further share of our overseas market as he did when he lost 11 percent with the PIK Program.

Without meaning to, they would cause a return to Dust Bowl days. At a time when farmers are broke, they put the burden on him to take care of the land when he cannot even pay his taxes.

Recommended are programs paying him a slight sum not to farm which have the effect of giving our competitors our normal foreign markets. At a time when much of the world is hungry it is proposed we limit our production.

It is evident we are returning to the conditions of the early 1930's when no farmer owned his land. It was owned by insurance companies and banks.

Under some proposals Federal agents will be authorized to go on a person's land to enforce orders of the Federal Government in Washington. Not just to search out illegal crops like marijuana, but to see if farmers are carrying out the orders of the Secretary of Agriculture.

With our trade deficit over $120 billion a year, our national debt nearly $2 trillion, the Nation cannot afford a return to Dust Bowl days.

All farmers know land deteriorates far more if idle than if cultivated. Today nonfarmers appear to be in the saddle in setting agricultural policy.

For those who would do what the budget advocates, let them do it by State law and not by Federal statute or program.

FORMER PROGRAMS EFFECTIVE

Mr. Chairman, few are aware of or have taken the time to study the history of the farm programs. The farm programs were originally enacted by the Congress to restore purchasing power to agriculture. For years, we in this country provided a domestic support price by loan or purchase to maintain a reasonable balance between the income of agriculture, industry and labor.

The Commodity Credit Corporation, a $25 billion wholly owned Government corporation, was set up to support such a system. The CCC charter provided the authority and obligation to support farm prices through commodity loans and purchases at prices which provide a balance to the farmer at a level comparable to labor and industry; and move supplies surplus to domestic needs into world trade at competitive prices, with credit arrangements comparable to those provided for other U.S. products.

This approach had the advantage of letting the farmer and his banker know what price levels they could count on when he planted his crop—leaving cost and volume as the only variables. It provided a strong and well-financed mechanism to sell commodities surplus to domestic needs in world trade on a competitive basis. It also enabled the farmer to deal through a Government corporation on an equal basis with other governments, most of which use governmental boards or agencies to market their production.

Another benefit of this system—and a substantial one—was that the price paid to maintain a reasonable balance for the farmer came from the users of his products, who on the domestic level paid at least the support price which assured the farmer of a fair return on his production. In this connection, it should be recognized that a 10-percent increase in farm prices would add less than half a cent to the retail price of a 54-cent loaf of bread and only 5 cents to the retail price of a $15.95 cotton shirt.

Under this program, farmers imposed on themselves acreage allotments which applied to most basic or storable commodities. However, in 1956, this approach fell into disuse. Few people today remember it, and few study the past. At that time Congress had to step in and require the use of CCC to move our commodities in world markets at competive prices.

Perishable commodities, where one year's surplus generally does not carry over into the next year, were and still are supported by section 32 funds—30 percent of tariff receipts on imports. These funds are used to buy up surpluses for use in the School Lunch Program, feeding programs for the needy, and other such outlets. Unfortunately, in recent years there have been attempts in Congress to transfer cash directly rather than commodities or to divert the fund to other uses, thereby defeating the intent of the program and its essential price support benefits.

This farm program worked.

It provided relatively stable income to the farmer. It preserved our share of world markets, since our competitors knew that the United States would produce and sell, with the receipts going back into the CCC revolving fund for continued use.

It is still in basic law.

It is not a two-price system. A two-price system is one which results in one price to the farmer for production for the domestic market, and another price to the farmer for production for export. Use of CCC to support prices and sell surpluses overseas competitively involves only one price to the farmer for his entire production.

This concept has now been twisted around by opponents to discredit the former farm program—one which worked.

It should be recognized that support prices and competitive export sales do not represent a subsidy to the farmer. Rather, they are used to protect his market, and thus are a benefit to the entire economy. They enable the American consumer to enjoy abundant quantities of high quality food at very low prices and enable American industry to retain its largest and best customer—the farmer.

CONSERVATION OF NATURAL RESOURCES

Mr. Chairman, one of the most disturbing aspects of the proposed 1986 budget is its virtual abandonment of the Department of Agriculture's conservation programs. Next year's budget proposes to reduce the funds and staff of the Soil Conservation Service to one-third of its present level. It eliminates all funding for the Agricultural Conservation Program [ACP] and the Forestry Incentives Programs. It removes all funds of river basin sureys and investigations, watershed planning, watershed and flood prevention, resource conservation and development, and Great Plains conservation, all of which have contributed so much to the Nation's conservation movement.

These proposals raise several basic questions which can be answered by Congress and the people, such as: Can this country afford to step aside and let the very effective conservation effort built up over past 50 years disintegrate? Can we let up on our efforts to prevent the depletion of our soil, and timber resources at a time when expanding needs for food and fiber at home and abroad are placing increased demands on the productive capacity of this country? Can we expect the farmer to assume the full cost of protecting and conserving the land for present and future generations, when he is unable to even meet the interest payments on his loan? Can we ignore the mistakes of those civilizations which have disappeared or are in the process of disappearing because of failure to protect and preserve their productive resources?

LESSONS OF THE PAST

A review of history reveals what happened to those past civilizations of the world which failed to take care of their fertile lands, timber, and water supplies.

Today's terrible famine in Africa is a present-day example of the results of the failures to employ good conservation practices. Here again, the major reason for this calamity is the neglect of the soil, water, and timber resources through the years. The lack of rain during the past 3 years has brought on the immediate crisis. However, continued deforestation, soil degradation, population growth, and counterproductive Government policies have contributed to the long-term decline in the productivity of the past half-century, have done so much to restore and preserve the Nation's basic natural resources and the growing human suffering which follows.

Our people and our Government must ever be aware of the need to maintain a strong and coordinated conservation effort. They must realize that the best investment they can make in the future of this country is the conservation of its real wealth—the soil, the water, and the timber. With productive resources, present generations can feed themselves and pass along to their children the means to prosper during their lifetime. With wornout land and depleted water supplies, their descendants cannot survive, despite all else.

STRONG CONGRESSIONAL SUPPORT

Mr. Chairman, through the years, this committee has believed that it is absolutely essential to maintain the conservation programs of the Department of Agriculture at a level which will ensure maximum protection of the Nation's basic resources. With the backing of the Congress through the years, it has restored severe budget reductions and has increased budget requests to assure an effective national conservation effort. It has restored budget cuts for the agricultural conservation program [ACP] more than 30 times over the years.

The committee can see no reason to turn its back on these valuable programs now, as proposed by the 1986 budget. It cannot see the logic of giving less attention to the foundation of our national economy, so as to spend more for less productive purposes.

CREDIT ASSISTANCE REDUCED

The proposed budget for 1986 seriously curtails insured loan funds for the Farmers Home Administration which provides loan funds to those farmers who are unable to obtain credit from other sources. This proposal would also eliminate almost 4,000 staff technicians from FmHA offices at a time when farmers are facing the most severe financial crisis since the Great Depression and need additional assistance in meeting their problems, not less. Many farmers are in deep financial trouble. Many are facing bankruptcy. Many are unable to plant their crops for the next year.

PHASEOUT OF REA AND FCIC SUPPORT

The 1986 budget also proposes to severely curtail various USDA programs which have done so much to improve the quality of life in rural America. It drastically reduces funds for the Rural Electrification and Telephone Programs—the first step toward eventual liquidation of these valuable programs which have been so successful in bringing essential electric and telephone services to rural areas. Also, it sharply reduces loan and grant funds for water and sewer facilities and rural housing. Further, under proposed legislation, the administration would phase out Federal administrative and premium support for the Federal Crop Insurance Program. This would increase the farmer's crop insurance premiums at a time when he is unable to assume any additional expenses. About 80 percent of the land area of our country, four times the area in our major cities and encompasses thousands of cities and towns. This area of the country and its residents must have equal treatment.

FARM ECONOMY CONTINUES TO DECLINE

Although the Nation's total economy has expanded greatly through the years, the farm economy has declined. Since 1968, the Gross National Product [GNP] has increased 331 percent, from $831 billion in 1968 to $3,581 billion in 1984. During this same period, net farm income went up only half that amount—152 percent, from $12.3 billion in 1968 to an estimated $31.0 billion in 1984.

While the national income level rose from $722.5 billion in 1968 to $2,450 billion in 1982—an increase of 240 percent—income to the farm sector went up only one-third of that amount—80 percent. During the period, gross farm income doubled while farm production expenses tripled, leaving a greatly decreased share for the farmer.

FARM INCOME

During the past decade, gross farm income increased 70 percent while farm production expenses went up 90 percent, leaving less net income to the producer. Net income reached a high of $31 billion in 1981, but then dropped nearly 50 percent to a low of $16 billion in 1983.

During the hearings on the 1986 budget, the Secretary of Agriculture estimated that net farm income for 1985 will be between $19 and $24 billion—a reduction of $10 billion from 1984 and close to the disastrously low level of 1983.

FARMER'S SHARE OF FOOD DOLLAR

Since 1946, the farmer's share of the dollar has decreased nearly 50 percent, from 51 percent to 27 percent, while the share taken by those between the farmer and the consumer has nearly doubled, from 49 percent to 73 percent. Thus, while the farmer's income has gone down, the cost of what he must buy from industry and labor has gone up, leaving less and less for him to run his farm and support his family.

FARM DEBT A GROWING PROBLEM

Mr. Chairman, as of January 1, 1985, the farm debt totaled $212 billion—an increase of $159 billion—300 percent—over 1970. About half the debt is for real estate loans, the balance covers non-real estate and CCC loans. This is a very heavy debtload for the farmers to carry under today's depressed farm conditions and high interest rates.

Due to loss of income on one hand and inflated expenses on the other, an increasing number of farm producers are existing from one crop year to the next entirely on credit. Many have had to mortgage all of their assets each year to plant their next crop. They are in effect working for their bankers, since they have no equity left. Many remain on the farm only because they prefer farming as a way of life, not as a way to support their familes.

FAMILY FARMS IN TROUBLE

Large farms units—those with annual sales of $500,000 or more—and small farms which depend largely on off-farm income are relatively solvent. The current debt crisis is affecting primarily the family farms with annual sales of $40,000 to $500,000, which provide an important part of the Nation's supplies of food and fiber. About 229,000—34 percent—of these middle-size farms with debt-to-asset ratios of 40 percent or more are in serious financial trouble, many facing bankruptcy. Those in the deepest trouble are located in the Corn Belt, Lake States, and Northern Plains.

FALLING LAND VALUES

Declining farm income, and falling land values reflecting the reduced earning power of farmland, are largely responsible for the present credit crisis. The value of farm real estate which provides the main collateral to support farm loans has declined 10 percent since 1981. In the Corn Belt land values have fallen 30 to 50 percent. As a result, many farmers face bankruptcy and many more are unable to put this year's crop into the ground at planting time.

LOAN DELINQUENCIES AND LOSSES

Loan delinquencies of the Farmers Home Administration, which holds 9 percent of farm real estate debt and 15 percent of farm operating debt, are at an alltime high. As of April 1985, 41 percent of its borrowers were delinquent some $5.4 billion.

Also, the Farm Credit System is under financial stress; 11 production credit associations PCA's have been liquidated and 39 PCA's have been merged to maintain liquidity. In 1983, PCA losses totaled $253 million, over 40 percent of all losses sustained in its 50-year history. Losses increased to $370 million in 1984, a serious strain on PCA reserves.

The Governor of the Farm Credit Administration summed it up in the following words: "In my 8 years of coming before you * * * this is an extremely critical year. PCA's and Federal land banks are facing serious cash flow problems. The next 2 to 3 years are crucial."

IMPACT ON RURAL AND URBAN AMERICA

Mr. Chairman, the impact of the current farm crisis on rural America is growing as increasing numbers of producers are being forced off their farms. Equipment dealers, hardware stores, feed, seed, and fertilizer dealers, and many Main Street merchants in small, rural towns are going broke along with the farmer.

Rural banks, which represent 28 percent of all U.S. banks, are also in trouble. An increasing number are facing bankruptcy. As of January 1, 1985, 837 of the Nation's banks were considered by the FDIC to be problem banks. Of these, 306—37 percent—were agricultural or rural banks with 25 percent of their loans agriculture-related.

The media is full of examples of rural communities which are beginning to dry up, especially in the Midwest. Press and TV provide a frightening picture of the threat to the agricultural heartland of the United States—an area which has helped greatly to feed the entire world. They provide ample evidence of what can happen to the national economy if its foundation—agriculture—crumbles.

URBAN PEOPLE ALSO AFFECTED

People in the cities are also beginning to feel the impact of the farm crisis. Companies which provide the equipment and supplies needed to operate the farms and produce the crops are having to curtail their operations and reduce the number of their employees.

FUTURE OF AMERICAN AGRICULTURE

Despite agriculture's magnificent contribution to the strength of the United States and the welfare of its people, the future of the family farm which made this possible is not encouraging. Faulty Government policies, failure to protect the farmer's interest, and lack of official and public

understanding and support have made farming a far less desirable and rewarding occupation and way of life than in the past.

Only about 3 percent of our people live on the farm today. The other 97 percent, who enjoy the highest standard of living ever known to man, take their food supply for granted. They often fail to realize that the farmer must have a fair return for his investment and labor if he is to continue to provide their basic necessities—food, clothing, and shelter. Many overlook the fact that the low food prices they enjoy in this country come at the expense of the farmer who must face ever-expanding production costs with a declining share of the consumer food dollar.

FARM VALUE OF FOOD DOWN

For the wheat in a 54-cent loaf of bread or the corn in a 56-cent package of cornflakes, the farmer receives only 4 cents. The farm value of the cotton in a $15.95 shirt is only 50 cents, about 3 percent of the retail price. If the farm price of wheat and cotton were increased by 10 percent, it would add less than half a cent to the retail price of a loaf of bread and only 5 cents to the retail price of a cotton shirt.

AGRICULTURE—NATION'S LARGEST INDUSTRY

Mr. Chairman, agriculture is the Nation's main generator of new wealth. It is estimated that each dollar taken from the soil multiplies seven times as it travels through the Nation's financial system. In 1982, agriculture accounted for 19.8 percent of gross national product, compared with 5.1 percent for the auto industry and 2.6 percent for housing.

Agriculture is the country's largest industry. Its assets of over $1 trillion are equal to 70 percent of the total for all manufacturing corporations in the United States. Some 22 million people work in some phase of agriculture, from growing food and fiber to selling it at the supermarket or the export market. The number of such workers equals the combined total for transportation, the steel industry, and the automobile industry.

For the benefit of all—farmer, consumer, industry, and labor—the importance of agriculture to our society and our economy must be recognized and perpetuated. The American farmer must have equal opportunity under the law to maintain a balance with all other segments of the Nation's economy. The future strength and prosperity of this country depends on this.

Mrs. SMITH of Nebraska. Mr. Chairman, I yield 5 minutes to my good friend, the gentleman from New Mexico [Mr. SKEEN].

Mr. SKEEN. Mr. Chairman, I thank the gentlewoman for yielding this time.

I want to begin by saying that as a new member on the Agriculture Appropriations Committee that it has been very instructional. I have served on the full Agriculture Committee of the House prior to going to this assignment.

I want to say at the outset that under the adroit leadership of our chairman, the gentleman from Mississippi [Mr. WHITTEN], and in concert with our colleagues and with good staff representation as well, I think it is probably one of the most responsive committees that I have ever served on, because we are in a crisis in agriculture. I do not think that anyone would deny that who knows what the situation is or who has had any contact with it.

For most Americans, that is a very superficial contact because so few people today are involved directly in agriculture. Just a little over 3 percent of our entire population produces the food and fiber that we use in this country. We are so sophisticated that lots of times we take this for granted, because it is there and in abundant supply, it is well packaged, it is attractive, and it is there once again in great abundance.

As a matter of fact, that has been one of our problems, the tremendous abundance that we produce in agriculture goods in the United States.

But I do want to say this, at this time we do have an economic crisis in agriculture, that this committee has risen to the challenge each time. I want to commend the chairman and the other members of the committee, as well as the staff, because just the other day we extended the CCC authority. The initiative was begun here and I think that took care of a situation that could have been very costly for farmers, particulary in the winter wheat producing country, because without that authority the sales would have completely stopped, the cash flow which is so essential in operating agricultural enterprises today would have been stopped.

Along with that I want to mention, too, and everybody gets a little grin out of this when you mention it, the grasshopper program, but an extremely critical issue to many of the States in the West and the Northwest. This committee once again rose to that challenge and took care of that problem in a timely fashion ahead of the incident itself, because the hatch looked good.

So I just want to take this opportunity to say it has been a pleasure to serve on that committee. I think we have done very valuable work. I think we have got a good agriculture appropriation bill here today.

One of the things that it is is forward looking. It is saying that we have a tremendous future in agriculture, no matter how dark the situation may look today. We are still going to take care of agricultural research and the conservation measures that we feel are one of our primary responsibilities and that is included in this bill today, not just farm credit, not just the economic things, but the future of agriculture in the United States

I want to commend the members of the committee and those members of the staff who served with us. It has been a real pleasure to operate with them.

I think we have a good bill here and I urge its adoption.

Mr. WHITTEN. Mr. Chairman, I yield 2 minutes to the ranking member of the committee, the gentleman from Michigan [Mr. TRAXLER].

Mr. TRAXLER. Mr. Chairman, I rise in complete support of H.R. 3037, the bill making appropriations for the Department of Agriculture and related agencies for fiscal 1986. This bill deserves the support of all of our colleagues because it is fiscally prudent while meeting the many important diverse needs of those who depend upon the programs administered by the Department of Agriculture.

I want to compliment the distinguished chairman of both the full Appropriations Committee and the Agriculture Subcommittee, Mr. WHITTEN, for his marvelous leadership in a very difficult task. I also want to express my appreciation to our distinguished ranking minority member, Mrs. SMITH of Nebraska, who consistently puts the interest of American agriculture first, and enables us to come forward with a truly bipartisan bill.

There is no question that American agriculture continues to face great difficulties. The work on this appropriation, as well as the work on the 1985 farm bill clearly reflect our concern that something must be done to address the serious problems our farmers face so that we can continue to have the most abundant food supply in the world.

I must say at this point, however, that I am somewhat disheartened by the fact that despite that our action was completed last week on an emergency supplemental appropriation for the Commodity Credit Corporation to keep farm price support payments coming, the President has as of late yesterday still not signed the measure into law. This is certainly an urgent situation, and I would implore the President to recognize this fact on this bill and any further supplemental action we might have to take.

Mr. Chairman, the bill before us today is $4.2 billion below the fiscal 1985 appropriation for the Department of Agriculture. It is also slightly below the amount requested by the President in total, while responding to the concerns of the hundreds of witnesses who appeared before our subcommittee during our 2 months of hearings. The priorities may not be the same as those in the President's

budget, but they are in keeping with what the people we all represent say they want.

I want to take some time here to describe some of the programs that are of particular significance to the people I represent, and, indeed, to our entire Nation.

We have heard a lot about efforts by the Environmental Protection Agency to ban leaded gasoline over the next few years. Last year as part of our work on the HUD-independent agencies appropriations bill, the report directed EPA to review the adverse effects of such a ban on farmers who frequently own older vehicles that use leaded gasoline. The ban will provide a particular hardship to them. The full Appropriations Committee last week directed EPA to work with the Secretary of Agriculture to conduct a study of the use of leaded fuel in gasoline engines used in agricultural machinery to analyze mechanical difficulties associated with the use of other fuels, and the impact of a ban on leaded fuels on farmers. We expect the Secretary of Agriculture to take close note of this directive which is found in House Report 99-212, and sanctioned during our discussions of the agricultural appropriations bill.

There is no question that the future of agriculture depends in large part upon the results of research and extension activities. This is why, in my view, these programs deserve special consideration in any budget. They are plans for the future, and we are all interested in the future.

It was necessary for us to make several restorations in these accounts. The cuts were not in the best interest of our Nation. The restorations are. But we did not provide any major increases in these accounts either, recognizing the fiscal limitations our Nation faces.

It is particularly important to those of us around the Great Lakes to have the restoration of $200,000 for the continued assessment of dioxin and other contaminants in the Great Lakes. We need to be vigilant about all dangers from chemical residues, and it is vital that we do more to understand the possible health risks of these substances before they enter the food chain.

For the Cooperative State Research Service, we were forced to make some hard choices. The hardest one we had to make was to not provide for an increase in the Hatch Act formula research funds. This action is in line with the President's budget proposal, and is also consistent with our action throughout the entire bill. I know that many State research stations are in need of additional research funds, and I truly wish that the time was right to provide an adequate increase, but that is one of the good things that will have to wait while we in the House make serious efforts to reduce the Federal budget deficit.

We were able to restore a number of special research grants that are of special interest to Michigan, including funding for the Saginaw Valley Bean and Beet Research Farm, dairy and beef photoperiod research, blueberry shoestring virus research, potato research, asparagus yield decline research, stone fruit decline research, and wood utilization research.

I want to call special attention to the wood utilization research project which involves a cooperative effort between Michigan State University and Purdue University. Given the extensive forest lands in Michigan, it is important that adequate work be done to appropriately use and replenish a significant resource.

We were also able to fund four new research projects under the Special Research Grants Program this year. One of these projects will provide $100,000 for the initiation of an apple quality research program in Michigan. This project is designed to improve apple quality at the level of production, handling, storage, packaging, and distribution. Work will also be done regarding grading, sorting, and packaging of apples.

We reduced funding for the Competitive Grant Program by $12 million, from $46 to $34 million. Since this funding involves totally new projects each year and these projects are usually not of an emergency nature, it is possible to reduce this funding without impairing the ability to do crucial research.

We also did not provide any increase in Smith-Lever formula funding under the Extension Service. Our reasoning here was the same as with Hatch funding under CSRS. I personally would have preferred increasing this account, but our budget situation does not allow us our personal preferences.

We did manage, however, to restore the shortsighted efforts to eliminate funding for all of the Smith-Lever 3(d) projects, like the Expanded Food and Nutrition Education Program, the Farm Safety Program, the Urban Gardening Program, and the Integrated Pest Management Program. The strong public support for these efforts would not allow us in good conscience to go along with the President's recommendation to eliminate funding for these projects.

I am sorry, however, that we were not able to restore funding for the Renewable Resources Extension Program. I personally understand the importance of this program, and I am very hopeful that in the remainder of the budget process we might find a way to restore funding for this program.

We were also able to restore a number of reductions proposed for the Animal and Plant Health Inspection Service. Of primary importance is the restoration of funding for the Brucellosis Eradication Program. It seems as if this is a battle we face each year because certain individuals are simply philosophically opposed to this program. Fortunately the Appropriations Committee is more interested in results, and it is based on the success of this program, as well as the remaining task, that we restored funding.

Another battle we face each year involves funding for the Animal Welfare Program. The amount of mail I have received in support of restoring funds for this program is absolutely incredible. Each year during our hearings I have been able to point out to APHIS personnel that the law does not allow States and private organizations to enforce the provisions of the Animal Welfare Act, as the administration persistently proposes. The results of adopting any reduction in funding for this program would quite simply mean that our animal welfare efforts would be significantly diminished.

I am also pleased that we were able to restore funding for the Agricultural Cooperative Service. We understand quite well that this agency is doing all that it can with its limited resources to help foster the development and expansion of farmer cooperatives. This is support that is vitally needed as we work to help expand market opportunities for our farmers.

In title II, we restored a great number of rural loan and grant programs, both for farmers and for communities. Now is not the time to cut off the resource helping so many farmers stay in production, and all of these programs have a role to play in this regard. We cannot afford to forget the programs that serve rural communities, like water and sewer programs, because the quality of life in rural areas is just as important as it is in urban areas.

We also restored funding for the Rural Electrification Administration, compared to the President's request. The funding is below the fiscal 1985 levels in some of the REA programs in recognition of our tight budget situation, and reflects the best estimates of actual needs for the REA programs. I want to extend my personal compliments to the National Rural Electric Cooperative Association for their sincerity in working toward funding recommendations which meet both the needs of rural areas and Federal budget constraints. Let no one say that this group was more interested in its own concerns than in our Nation.

We also rejected some extremely disastrous proposals to reduce total funding for the Soil Conservation Service by about one-third. The job of conservation is never over because the forces of nature continue to work on changing our resources, and all too often in-

51-059 O-86-10 (Pt. 15)

dividuals fail to recognize the need to work with and not against nature. The Soil Conservation Service works to help everyone develop this understanding.

I am particularly pleased that we were able to provide $60,000 to start a study of back irrigation through existing drainage systems to avoid the need for taking water from ground wells for irrigation purposes in the Thumb and Saginaw Bay area of Michigan. This project will serve as a model for the Nation in demonstrating a new and innovative way to provide water for our farmers while taking action to avoid risks to water supplies.

And it should be no surprise to anyone that we once again restored funding for the most basic of all conservation programs, the Agricultural Conservation Program. The local nature of this program enables every part of the Nation to tailor conservation practices to individual situations. The continued efforts to eliminate this program have failed once again because we continue to recognize the value of ACP, and the fact that the job is not yet done.

Title III provide all of the funding for our domestic feeding programs. In a Nation as rich as ours, we have a moral obligation to try to share our abundance with those who do not have the personal ability to obtain adequate food for themselves and their families.

It is true that this is a very major component of this appropriation bill, and it is equally true that these programs face the same budget limitations that I described for other components of the bill. We have operated under a very simple and straightforward policy in developing this component of the bill: We fund programs based on current provisions of law, and we do so to our best ability so that no one need be removed from a program unnecessarily. We know that there are changes proposed for the various feeding programs, both in H.R. 7 and in the farm bill title dealing with Food Stamps and the Commodity Supplemental Feeding Program. But we do not know the final design of these modifications because neither of these measures has received full consideration by the House and Senate, and we cannot responsibly base our funding on uncertain provisions.

In many areas the President's budget request understates the funding requirements for these programs. We have allowed for this fact by providing certain increases over the budget request, while holding these increases to the maximum necessary to meet current service requirements.

As I have in the past, I want to call particular attention to the section of this title which provides funding for the Commodity Supplemental Feeding Program. We have provided an increase of $2,950,000 in this program to account for the continuation of three projects providing commodities to low income elderly individuals in Detroit, MI, New Orleans, LA, and Des Moines, IA. This dollar amount reflects the best information we could obtain regarding the cost of continuing these programs, and the bill allows for not less than this amount in the event that these cost projects are revised at a later date. We have rejected the proposal to transfer this project to the Department of Health and Human Services, because such transfer would be contrary to the historic method of operating this program and would impair its efficiency.

In our report we direct the Department to include timely information in its monthly report, "Food Program Update", so that we and the public can be kept fully apprised of the operation of this program. It is amazing to me that while data on all other feeding programs is regularly included in this document, information on CSFP is available only on a sporadic basis. It is also most interesting that while program operators are required to report program participation levels at the end of each month, it is nearly 3 months before any of this information is included in the monthly update when information is provided. This is simply not an acceptable situation, and there is no good reason whatsoever for the Department not to revise its policy regarding the reporting of the operation of the Commodity Supplemental Feeding Program.

We are also faced with a much more serious issue regarding the administration of this program by the Food and Nutrition Service, and the Office of Management and Budget. We are nearly 10 months through fiscal 1985, and OMB has yet to approve the actual fiscal 1985 allocation for this program. Local operators have been operating under fiscal 1984 guidelines, which does allow them to continue to operate, but failure to act responsibly with this budget allocation makes it virtually impossible for us to determine the true extent of interest in this program in relationship to the ability of the agency to respond. Four applications have been submitted for new programs by the States of Arizona, New Mexico, New York, and Rhode Island. These applications were rejected because the agency claims that there is not sufficient money to start these programs. But we do not know this for a fact because the allocations have not been officially completed, and also because the agency is planning on using fiscal 1985 funds to purchase food that will be used in fiscal 1986. While this may not be illegal, it is certainly a breach of faith regarding the fact that the money for this program is appropriated with the intent that it be used in the year for which it is appropriated—not for the next fiscal year.

But we cannot act in a vacuum. We need information, and we will do all that we can to get it. This is in part why our report directs the agency to keep us advised regarding the status of any application for the Commodity Supplemental Food Program. That means we want to know when applications are filed, where they are filed, what the decision is, how long it has taken, and to the extent that an application is rejected that the reason be clearly and explicitly stated. We also expect that to the extent additional appropriations are needed to deal with legitimate demand for the program that the Department will request supplementals, and not merely say funds are insufficient to approve additional applications.

There is also an important report directive regarding utility allowances for the Food Stamp Program. We direct the Department to allow States to continue to follow the practice of using a standard utility allowance. This is administratively easier, and there has not been an opportunity for full consideration of any changes in this policy. The Department should not be able to move forward with the change that it has proposed without congressional approval because this issue is so important. I expect we will hear more about this issue in the days ahead.

I am also pleased that we are providing $50 million for the Temporary Emergency Food Assistance Program. This program is too important to too many people to allow it to lapse, and it is for this reason that we are providing funding under the terms of the rule. We do so in advance of the authorization which has already been approved by the full House Agriculture Committee as part of the 1985 farm bill.

Title IV provides funding for our international agricultural programs. Funding for the Foreign Agricultural Service is essentially at fiscal 1985 levels, and will allow the agency to continue its extremely important market development cooperator program.

Funding is also provided for the Food for Peace Program, Public Law 480. This is an extremely important program, and is a part of the worldwide governmental and private efforts to provide needed food assistance to the hungry around the world. Let me emphasize that Public Law 480 is available for all needy people around the world, and is not restricted to our immediate concerns for the people of Africa.

As we have in the past, I am confident that we will respond to developing circumstances around the world, and promptly consider all supplemental appropriation requests for this program that may be warranted.

We have also provided certain directives to the Department of Agriculture to expand its use of beans in brine as part of the Food for Peace Programs. This processed commodity has been demonstrated to the private relief organizations and Agency for International Development personnel in Africa, and has met with great approval. Unfortunately, the Department of Agriculture has not moved quickly enough to approve this item as one of those eligible for the Public Law 480 program. We need to have the Department recognize that cost is not the only nor the controlling issue in our efforts to provide essential food assistance to those in need. Beans in brine meet an important nutrition test, and can go a long way in helping ease the problems of hunger. The same is true of ultra-high-temperature milk, and we would expect the Department to move to expand use of these important food items.

Mr. Chairman, obviously this bill covers a large range of programs of interest to all of our colleagues. I urge their support of the fiscal 1986 agriculture appropriations bill.

Mrs. SMITH of Nebraska. Mr. Chairman, I yield 2 minutes to the gentleman from Texas [Mr. LOEFFLER] for a colloquy with our chairman, the gentleman from Mississippi [Mr. WHITTEN].

Mr. LOEFFLER. Mr. Chairman, I thank my distinguished ranking member for yielding to me.

I would like to ask the chairman of the committee to participate in a colloquy with me.

On page 34 of our committee report, the following table reflects the committee's recommendations on special research grants. In this committee report, there is a recommendation that no money be made available for Wool Research, which is a research facility near San Angelo, TX. As I have spoken with the chairman, it is my understanding that $150,000 will be made available and it was frankly an oversight.

Mr. WHITTEN. Mr. Chairman, if the gentleman will yield, that is correct. I am sorry it was overlooked. It was not recommended by the Office of Management and Budget, but that is true of most of these programs in this bill. Most programs were restored by the Congress. I am in thorough accord with the gentleman from Texas and I expect to see that Wool Research is restored in conference.

Mr. LOEFFLER. Mr. Chairman, I thank the distinguished gentleman and I thank the distinguished ranking minority leader on our committee for their help and assistance.

Mr. WHITTEN. Mr. Chairman, I yield 5 minutes to a member of the subcommittee, the gentleman from New York [Mr. MCHUGH].

Mr. MCHUGH. Mr. Chairman, I rise in strong support of this appropriations bill, and urge my colleagues to vote for it. Under the fine leadership of the gentleman from Mississippi [Mr. WHITTEN], this bill has been fashioned so that it protects our resources and our commitments to the people of this Nation. At the same time, the bill is below the fiscal year 1985 appropriation level. This was not an easy task. However, it was accomplished due to the work and cooperation of all of the members of our subcommittee and its capable staff.

I think the bill is a balanced one. Despite the need for fiscal restraint, it addresses the basic needs of our farmers, the problems of our rural communities, and the nutritional needs of the most vulnerable of our society, our children, and the elderly. In addition, the bill provides funds for international programs of relief and cooperation.

This appropriations bill provides funds for education through extension programs, for research on food and fiber, for export development, and for protection of our natural resources, soil and watersheds. All of these programs are vital to sustaining our farmers who face a most difficult time economically. The application of new research and the development of new techniques are important to our agricultural base. Clearly, we must protect those resources that are not replaceable such as land and water. The continuation of these programs is necessary if we are to remain the breadbasket for the world.

For rural communities, the bill provides funds to continue programs such as rural housing, water and sewer loans and grants, and rural electrification and telephone service. There are just a few of the programs that help to foster a sound economy in our small and medium sized communities.

In meeting our responsibilities to those in need of nutrition assistance, the bill continues funds for the school lunch program, the food stamp program, all child nutrition programs and the special food program for women, infants and children [WIC]. The bill contains sufficient funds to maintain these programs at current service levels.

In the international area, programs such as Public Law 480 are also maintained at the fiscal year 1985 levels. However, this is one area that may need further attention given the continuing crisis in Africa. We may well need to consider additional funds for famine relief once we have reasonably reliable estimates on the food needs and actions necessary to continue to respond to this tragic situation.

I would especially like to have my colleagues note that the Committee provided direction to the Office of International Cooperation and Development to develop the Foreign Associate Expert Program. The committee expects OICD to work with other agencies to appoint recent science graduates to the Food and Agriculture Organization of the United Nations so that they may gain international experience. This should benefit our Nation as well as others. We expect OICD to see that four or five graduates are made available to the FAO for at least 2 years.

On the whole, I think the bill is a responsible one. the restorations that we made in program funding levels simply maintain current services in most instances. It is not an extravagant spending bill, and it deserves our support.

The CHAIRMAN. The Committee will rise informally in order that the House may receive a message.

MESSAGE FROM THE PRESIDENT

The Speaker pro tempore [Mr. MCHUGH] assumed the chair.

The SPEAKER pro tempore. The Chair will receive a message.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries, who also informed the House that on the following dates the President approved and signed a bill and joint resolutions of the House of the following titles:

On July 17, 1985:

H.J. Res. 325. Joint resolution to designate July 13, 1985, as "Live Aid Day."

On July 19, 1985:

H.R. 1373. An act to designate the wilderness in the Point Reyes National Seashore in California as the Phillip Burton Wilderness.

On July 22, 1985:

H.J. Res. 198. Joint resolution providing for appointment of Barnabas McHenry as a citizen regent of the Smithsonian Institution.

On July 24, 1985:

H.J. Res. 342. Joint resolution making an urgent supplemental appropriation for the fiscal year September 30, 1985, for the Department of Agriculture.

The SPEAKER pro tempore. The Committee will resume its sitting.

AGRICULTURE, RURAL DEVELOPMENT, AND RELATED AGENCIES APPROPRIATION BILL, 1986

The Committee resumed its sitting.

Mrs. SMITH of Nebraska. Mr. Chairman, I yield 7 minutes to the gentleman from Kentucky [Mr. ROGERS].

Mr. ROGERS. Mr. Chairman, I thank the distinguished ranking member for yielding.

Mr. Chairman, I rise in strong support of this bill. I want to commend

our distinguished chairman and the ranking member and all the members of this subcommittee. There are a lot of hours, of course, represented in the product that is before us at this time, many hours of hearings, many hours of study and mulling over the problems of agriculture, especially at this time, and the need for us to continue the funding for many of the programs which are the only lifeline really that many of the farmers in our Nation have in many of the programs that are contained in this appropriations bill.

There are a number of things in the bill that are of particular interest to Members of this body individually, but then the bill contains, I think, commendable programs that are essential to us at this particular time. Some of the highlights that I think are significant are on the Agricultural Research Service, the bill reduces funds by $1.3 million below fiscal year 1985, but increases by about $9.5 million above the administration request.

The Cooperative State Research Service reduces funding by $9.8 million below fiscal year 1985 and increases by about $24.8 million above the request.

The Extension Service, which is so important to our States, it holds nearly even with the fiscal year 1985 level, including some transfers from the Food Stamp Program.

Crop insurance, it denies the administration proposal to eliminate subsidies and administrative support assistance for that program.

□ 1620

There is a slight increase for rural housing, essentially holding the ownership loans and the operating loans even. It keeps the water and sewer grant and loans at the fiscal 1985 level, and retains rural fire protection funding which is important to many of us.

It maintains the approximate same floor for loan levels for telephones and electric co-ops as fiscal 1985 in the REA, and the Soil Conservation Service it holds the programs at the fiscal 1985 level, including the RC&D programs, which I think are terribly important for our countryside.

The Child Nutrition Program has approximately a $200 million increase of fiscal 1985. It keeps the milk program at the fiscal 1985 level, and there is a slight increase for the WIC Program.

Food stamps increases about $100 million over fiscal 1985. The temporary Emergency Food Assistance Program for cheese and other products, there is a slight decrease below fiscal 1985.

The Foreign Agricultural Service is at about the 1985 level.

In a State like Kentucky, facing the problems of small farmers, many of them dependent upon tobacco growing as their principal source of cash income, at a time when that program is facing problems that perhaps are unique in its history, even if the tobacco program is maintained, many of those small farmers are still in need of supplemental, additional income. And in this bill there is a provision in the report language that is of particular importance to those areas.

This bill contains $150,000 for a comprehensive research program on supplemental fruits and vegetable crops for those types of farmers. The University of Kentucky will be participating with the USDA on research on subjects from cropping to facilities to market research, transportation and the like for such supplemental alternative crops, in addition to the tobacco crop.

In Kentucky, current fruit sales are about $11 million per year, and vegetable sales about $16 million. It is estimated that another $35 million of vegetables could be sold annually, within 10 years, and that within 8 to 10 years that could exceed $100 million.

This study, 3-year study is particularly significant toward that goal.

For the REA, there is some important report language in the bill relating to the REA. Recently the REA has maintained, I think, a terribly detrimental policy relating to general funds, restricting the availability of loans to electric and telephone borrowers based on the general funds of the co-op. That practice has prevented the REA from allocating the minimum loan levels outlined in appropriation bills. That language specifically in this bill tells the REA to halt that policy. I think that is significant and will be proven to be more so as time passes.

Again I thank the chairman and the ranking member and all of the members of this subcommittee for a lot of hard work. I think we have boiled this down in this bill to the very essence. I think every dollar in there can be justified. There is not more money being spent in this time of tight money than needs to be spent, and I think it adequately funds the programs that need and justify our attention.

So I thank our subcommittee for its hard work, and of course, the full committee, and I rise in strong support of the measure and hope that it passes. I urge my colleagues to support it, and I yield back the balance of my time.

Mr. WHITTEN. Mr. Chairman, I yield 5 minutes to the gentleman from Iowa [Mr. SMITH], a long-time member of the committee.

Mr. SMITH of Iowa. Mr. Chairman, I support this bill and I commend the gentleman from Mississippi [Mr. WHITTEN], the chairman of the subcommittee, and the gentlewoman from Nebraska [Mrs. SMITH] and the others for work on this bill. I think it does as good as we could in these times of tight budgets to not only take care of the problems of operating farmers with operating programs, but also consumer, nutrition, regulatory agencies, and various research programs which are so important to the future, including a number of research programs at Iowa State University, which I am very interested in. The bill also provides for computerized and other information that we need to make our very important decisions with regard to the 1985 farm bill. I urge support of this bill.

Mrs. SMITH of Nebraska. Mr. Chairman, I yield 5 minutes to the gentleman from Minnesota [Mr. WEBER].

Mr. WEBER. Mr. Chairman, I rise in support of this bill and want to commend the committee for its work on the bill, and particularly the gentleman from Mississippi, Chairman WHITTEN, and the ranking member, the gentlewoman from Nebraska [Mrs. SMITH], for their work on a very important bill at a time that is tremendously difficult in the agricultural sector. I want to add my voice to those of my colleague who was just in the well, the gentleman from Kentucky [Mr. ROGERS], in particularly saying that I am pleased that the committee has seen fit to adequately fund the Rural Electrification Program which was in some doubt earlier in this budget cycle because of recommendations from the administration that would have had the effect of in essence gutting the REA Program.

Certainly in my part of the country and in other rural areas across the United States, it is hard to think of any program that has been over the long term more beneficial or more successful than the REA Program, both in bringing electric and telephone service to rural areas. They have done their job well, and there is still work to be done.

I commend the committee for both funding them adequately and dealing in report language with certain problems that have arisen because of the administration of this program over the last few years.

In addition, I would like to point out, Mr. Chairman, that although the bill is a good bill, and probably the best that the committee could do under the circumstances, we face a massive problem in agriculture that cannot be addressed simply by this bill or any other bill. I would like to speak specifically for a second, if I could, just in terms of the Farmers Home Administration.

This bill contains $700 million in Farmers Home loan money and $3.4 billion in farm operating loan money. Those are certainly prudent numbers from a strict fiscal standpoint.

But I would just like to share with the Members my view that we face an escalating and, indeed, cascading crisis across rural America, and particularly

in the upper Midwest that is going to render those figures, as generous as the committee has tried to be with them, wholly inadequate by this fall. We have a disastrous situation in the upper Midwest, and indeed throughout much of agricultural America.

Last spring, the whole Nation's attention was directed to this crisis. We faced a massive crisis and it was precipitated particularly in my area of the country by a drastic fall in land values. Federal and State examiners went through the banks in the Midwest and across the country and devalued land, at least in my district, by 50 percent across-the-board for most of the banks in my congressional district. They have since gone back to my congressional district, and far from revaluing that land upward, they have chosen to revalue it downward somewhat.

In addition to that immediate precipitating problem, we have faced long-term problems in agriculture of low prices and high interest rates. The Nation focused its attention on this agricultural problem last spring, and the country was suddenly sympathetic to the plight of the farmers and the farm problem was on the cover of Time, as well as we saw movies dedicated to that problem. But the massive bankruptcies that some predicted at that time did not quite materialize, at least in the number that we had anticipated they might. So many people conclude that the problem was not as severe as it was described to us last spring.

Mr. Chairman, that simply is not the case, and I am alerting the body here today, as I have done in the past, that all we did last spring really was delay the problem somewhat, and it is going to face us in spades, in my judgment, I am sorry to say, this fall.

Last spring the lending institutions across rural America decided that they were going to stick with their farm borrowers. as much as they could, and they were as generous in their lending practices as they could be. In essence, they gambled on higher prices and lower interest rates, and tried to keep their marginal borrowers in business as much as they could.

Unfortunately, those favorable conditions did not materialize, and unless something changes drastically, we are not going to see higher farm prices in the fall; we are going to see lower farm prices. And interest rates that will change very little, if at all, in the agricultural sector.

That means that those lenders that tried to be generous with their marginal borrowers in the spring are going to be in very difficult shape when it comes time to receive repayment this fall. And I beleive we will see a massive problem, a massive credit problem, develop in rural America, particularly in the upper Midwest, when those lenders seek repayment this fall.

□ 1630

At that time, substantial additional pressure is going to be put on the Farmers Home Administration to accommodate borrowers that are going to be literally shoved out of private lending institutions. Again, I commend the committee for the good job it has done.

Mr. Chairman, I intend to support the bill but I want to alert the committee as well as the Congress to this Member's opinion that the problem in agriculture in America is growing and we are going to have to come back again and again to deal with that very severe problem.

Mr. WHITTEN. Mr. Chairman, I yield 5 minutes to the gentleman from Hawaii [Mr. AKAKA], a member of the committee.

Mr. AKAKA. I thank the Chairman.

Mr. Chairman, I rise in support of the bill. I want to praise my chairman, Mr. WHITTEN of Mississippi, and our ranking minority person, Mrs. SMITH of Nebraska, the members of the committee and the staff for doing such a wonderful job in helping the farmers of our country.

As we look at agriculture in our country, in the world today there is no question in our minds that agriculture is one of the most important industries for human survival in the world. When we think of agriculture starting in backyards of farmers, growing into huge conglomerate farming and producing units, producing farm commodities for our country and also for other parts of the world, this has grown to be the largest industry in our country. It has become the backbone industry of our country. As such, it is one of the industries that our country must look to in continuing operations and continuing with the farmers so that they can continue to produce.

As we look at the problems that our farming community is facing, they are in a crisis at the present time. Many of them are suffering from financial crisis, which will mean that many of them will be going out of business.

I attended some hearings held in some of our southern States and we heard the farmers literally cry on our shoulders and beg for help that would keep them in the farming business.

Unfortunately, we were not able to help them with our farm emergency bill which was vetoed by the administration.

But we hope we can continue to help them with some of the programs that this committee has taken on, and that we will continue to help them.

One of the programs they wanted to be continued was the Soil Conservation Service. I am glad that this committee has been able to continue that service for our farmers throughout the country.

I look upon our responsibility in this committee as being very, very important for the farmers of our country.

I want to commend the members of the committee again, especially our chairman, Mr. WHITTEN, and Mrs. SMITH of Nebraska for their help and guidance on this committee.

Mr. Chairman, I urge my colleagues to support the bill.

Mrs. SMITH of Nebraska. Mr. Chairman, we have no further requests for time, and we reserve the balance of our time.

Mr. WHITTEN. Mr. Chairman, we have two more speakers on this side who have requested time.

Mr. Chairman, I yield 5 minutes to the gentleman from Illinois [Mr. DURBIN], a member of the subcommittee.

Mr. DURBIN. I thank the Chairman.

Mr. Chairman, as a Member of the House of Representatives, I represent a congressional district which was represented more than 140 years ago by a gentleman by the name of Abraham Lincoln. When he was elected President of the United States, of course, he made history not only in our Nation, but in the world. There are several facets of the Lincoln administration which are not well-known. One of them is the fact that President Abraham Lincoln created a fledgling Department known as the Department of Agriculture.

For the very first time in America, we decided as a Nation that it was a Federal responsibility for us to be concerned about feeding our Nation and in fact feeding the people of the world in many years to come.

There are many great resources of American agriculture which have come from this effort and from our people and from our Nation; our rich soil, our technological strength, our productivity, our research, and those other intangibles, the industry and intelligence of American farmers, the family values that they bring to this great country.

But I have discovered in my short time on this subcommittee and on the full Committee on Appropriations, there is another great agricultural resource in America. I refer to our chairman, Mr. WHITTEN. He has humbled so many witnesses with his encyclopedic knowledge of agricultural programs. He has stunned many witnesses in our subcommittee when they came to learn that what they thought was a new idea had been tried before. Chairman WHITTEN then reported on the results of that previous effort. He has brought more than a historical perspective to this subcommittee's effort in this bill.

He has brought the vision to the future. I particularly refer to that section of the bill where we, in the sub-

committee, paid close attention to the needs for continuing research and continuing efforts to develop technology so that American agriculture will continue to lead the world.

One of the elements is a source of great pride to those of us in Illinois. It is a proposal for a plant and animal sciences research center at the University of Illinois. This biotechnical research center answers the No. 1 agricultural research priority of the U.S. Department of Agriculture and it does it in a fashion that is fiscally responsible. It suggests that the Federal Government will be involved in the building of this center but with the commitment from the University of Illinois to pay to equip it and to pay those operating expenses necessary.

This partnership, this sharing of expense, I think tackles the reality we face today of a budget deficit.

I am happy to support this particular effort of the Agriculture Subcommittee; I am proud to be a part of this effort. Mr. Chairman, I commend it to my colleagues.

Mr. WHITTEN. Mr. Chairman, I yield 5 minutes to a member of the subcommittee, the gentleman from Oklahoma [Mr. WATKINS].

Mr. WATKINS. I thank the Chairman.

Mr. Chairman, first I would like to stand and express my support for this particular Agricultural and Rural Development Appropriation Subcommittee bill. Second, I want to thank our chairman of the subcommittee, Mr. WHITTEN from Mississippi, and also the ranking minority member, Mrs. SMITH of Nebraska, and all the subcommittee members on both sides of the aisle for their deep and sincere and genuine concern and interest in the plight of the American farmer and the plight that exists in rural America.

I want to thank the staff for their time and extra effort which they are putting in because of the crisis that we face in agriculture today.

I only want to make one statement because I think this bill addresses as well as it can today the survivability of rural America under the trying circumstances that we have. But I think as a Congress, I think as a nation, as a legislative body we are going to have to ask the question and to answer the question: Is the basic agricultural industry important for the national security and survivability of our Nation? I think the answer to that is definitely yes. I think in the months and years ahead we are going to have to decide what we are going to do and what priority we are going to have to place on meeting the needs of this Nation.

So, Mr. Chairman, I want to thank the chairman again and the other members of the committee and the staff for the job that they have done to try to shape and to fashion a bill which under the trying circumstances we have today, I think does a good job, allows us to move forward and hopefully will help agriculture and rural America survive.

● Mr. ROYBAL. Mr. Chairman, I rise in support of the Chairman's amendment providing additional moneys for FDA to continue its research activities into the transmission, prevention, and control of HTLV-III infection and AIDS. Our committee has consistently provided the funds necessary to AIDS research by the NIH, CDC, and the FDA and has closely followed their progress in the search for a prevention, treatment, and cure of this tragic illness.

We have come a long way since this tragic illness first came to national attention, but there is still much work to be done. Some of the areas identified by our Secretary of Health and Human Services as needing greater attention are:

A 5-year followup and evaluation of blood donors who are found positive by the HTLV-III screening to determine the medical significance of the test results;

A study of the impact of additional tests for HTLV-III and other retroviruses on the safety of the blood supply;

A study to clarify the means of transmission of HTLV-III among homosexual males and AIDS patients;

Additional monitoring of the HTLV-III test kits for quality control;

The review and approval of second and third generation tests for AIDS and evaluation of diagnostic and treatment products, including an eventual vaccine against the HTLV-III virus.

I am pleased with the tremendous successes we have had in combating AIDS. We have identified HTLV-III as the causative agent, we have developed a screening test for the HTLV-III virus, and have begun to educate the public about AIDS. But our job is far from over. We need to know more about the viral components of the disease, that we can move quickly in developing a vaccine. We need to develop an efficient, accurate test to screen blood donations in order to protect the Nation's blood supply. We need epidemiological studies to understand how AIDS is spreading through the population. The FDA's role in this process is vital. We now need to focus on the activities outlined above. The moneys provided for in this amendment are essential to the continued progress of the NIH, CDC, and FDA in their battle against AIDS.●

● Mrs. LLOYD. Mr. Chairman, it is becoming increasingly evident that the cost of farm programs has become the major sticking point in efforts on both sides of the Capitol to write Federal farm policy for the coming years. The triple objective of lowering market prices, maintaining farmers' incomes and reducing the program's cost has so far eluded the best designs of congressional policy makers. This bill holds the line at last years spending level while reauthorizing programs which are absolutely essential to the Department of Agriculture to maintain and which are vital, not only to the present economic well being of our farmers, but to the future of American agriculture.

Mr. Chairman agriculture is the Nation's main generator of new wealth. It is estimated that each dollar taken from the soil multiplies seven times as it travels through the Nation's financial system. It is our country's largest industry, yet not a day goes by when the press does not report on the seriousness of the conditions facing American agriculture. Bankruptcies are prevalent, and loss of farms that have been in a family for generations is commonplace. This situation demands immediate action by Congress because time is running out for many desperate farmers. Failure to act will only result in the devastating loss of more farms, not only in the Third Congressional District of Tennessee but across the Nation. For the benefit of all—farmer, consumer, industry, and labor—the importance of American agriculture to our society and our economy must be recognized and perpetuated. The American farmer must have equal opportunity under the law to maintain parity with all other segments of this Nation's economy. The future strength and prosperity of this country depends on this.●

● Mr. BRUCE. Mr. Chairman, American agriculture faces a great challenge. Competition from foreign agricultural producers in threatening the vitality of our Nation's farm industry. Benefits will be realized by the Nation whose agricultural system incorporates new knowledge with the greatest speed. With this in mind, I rise in support of H.R. 3037, and more specifically, the proposed Plant and Animal Science Research Center at the University of Illinois in Champaign-Urbana.

In the past 40 years, production costs for U.S. agriculture have risen markedly. History has proven that in any industry, a constant flow of new technology that increases efficiency and quality is necessary to reduce production costs and maintain markets. That essential flow of new technology traditionally comes from sound basic research in combination with vigorous programs of applied research, and implemented through the cooperative efforts of Federal and State institutions.

Last year, the Appropriations Subcommittee on Agriculture, Rural Development, and Related Agencies, requested the U.S. Department of Agriculture to do a feasibility study on establishing a Plant and Animal Sciences Research Center at the University of Illinois. The study concluded

that the best interests of American consumers and American agriculture can be served by establishing this center in Champaign-Urbana.

The University of Illinois in Champaign-Urbana is uniquely qualified to operate such a research center. It is centrally located, and lies in the heart of the major corn and soybean production area of the Nation. It currently has 125 scientists engaged directly in biotechnology research, a field widely recognized as essential for the prosperous future of U.S. agriculture. It also has one of the most productive contingents of USDA plant scientists, along with a host of research facilities, including 2,200 acres of fields, herds and flocks located immediately adjacent to the campus. Representative KIKA DE LA GARZA, chairman of the Agriculture Committee, personally endorsed the project after visiting the campus last October.

An historic opportunity for improving the efficiency of agricultural production awaits. Major achievements in genetics, biochemistry, physiology, and molecular biology have advanced our scientists to the threshold of a new era in agricultural productivity. U.S. agricultural scientists will either lead or be led. It is in the best interests of our nation to invest wisely n one of our most envied assets—agricultural productivity. A Plant and Animal Sciences Research Center at the University of Illinois could help ensure the superior agricultural efficiency that is essential for this Nation's economic health and security.●

Mrs. SMITH of Nebraska. Mr. Chairman, I have no further requests for time and I yield back the balance of my time.

Mr. WHITTEN. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. All time has expired.

The Clerk will read.

□ 1640

The Clerk read as follows:

H.R. 3037

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1986, and for other purposes; namely:

TITLE I—AGRICULTURAL PROGRAMS

PRODUCTION, PROCESSING AND MARKETING

OFFICE OF THE SECRETARY

For necessary expenses of the Office of the Secretary of Agriculture, including not to exceed $75,000 for employment under 5 U.S.C. 3109, $1,750,000: *Provided,* That not to exceed $8,000 of this amount shall be available for official reception and representation expenses, not otherwise provided for, as determined by the Secretary.

OFFICE OF THE ASSISTANT SECRETARY FOR ADMINISTRATION

For necessary expenses of the Office of the Assistant Secretary for Administration to carry out the programs funded in this Act, $484,000.

STANDARD LEVEL USER CHARGES (USDA)

(INCLUDING TRANSFERS OF FUNDS)

For payment of Standard Level User Charges pursuant to Public Law 92-313 for programs and activities of the Department of Agriculture which are included in this Act, $49,454,000: *Provided,* That in the event an agency within the Department of Agriculture should require modification of space needs, the Secretary of Agriculture may transfer a share of that agency's appropriation made available by this Act to this appropriation, or may transfer a share of this appropriation to that agency's appropriation, but such transfers shall not exceed 10 per centum of the funds made available for Standard Level User Charges to or from this account.

BUILDING OPERATIONS AND MAINTENANCE

For the operation, maintenance, and repair of the Washington, D.C. Agriculture building complex pursuant to the delegation of authority from the Administrator of General Services authorized by 40 U.S.C. 486, $17,800,000.

ADVISORY COMMITTEES (USDA)

For necessary expenses for activities of Advisory Committees of the Department of Agriculture which are included in this Act, $1,323,000: *Provided,* That no other funds in this Act shall be available to the Department of Agriculture for support of activities of Advisory Committees.

DEPARTMENTAL ADMINISTRATION

(INCLUDING TRANSFERS OF FUNDS)

For Budget and Program Analysis, $3,796,000; for Personnel, Finance and Management, Operations, Information Resources Management, Equal Opportunity, Small and Disadvantaged Business Utilization, and Administrative Law Judges and Judicial Officer, $15,334,000; making a total of $19,130,000 for Departmental Administration to provide for necessary expenses for management support services to offices of the Department of Agriculture and for general administration of the Department of Agriculture, repairs and alterations, and other miscellaneous supplies and expenses not otherwise provided for and necessary for the practical and efficient work of the Department of Agriculture, of which not to exceed $10,000 is for employment under 5 U.S.C. 3109: *Provided,* That this appropriation shall be reimbursed from applicable appropriations in this Act for travel expenses incident to the holding of hearings as required by 5 U.S.C. 551-558.

WORKING CAPITAL FUND

An amount of $6,000,000 is hereby appropriated to the Departmental Working Capital Fund to increase the Government's equity in this fund and to provide for the purchase of automated data processing, data communication, and other related equipment necessary for the provision of Departmental centralized services to the agencies.

OFFICE OF THE ASSISTANT SECRETARY FOR GOVERNMENTAL AND PUBLIC AFFAIRS

For necessary expenses of the Office of the Assistant Secretary for Governmental and Public Affairs to carry out the programs funded in this Act, $337,000.

PUBLIC AFFAIRS

For necessary expenses to carry on services relating to the coordination of programs involving public affairs, and for the dissemination of agricultural information and the coordination of information, work and programs authorized by Congress in the Department, $6,758,000, of which not to exceed $10,000 shall be available for employment under 5 U.S.C. 3109, and not to exceed $2,000,000 may be used for farmers' bulletins and not fewer than two hundred thirty-two thousand two hundred and fifty copies for the use of the Senate and House of Representatives of part 2 of the annual report of the Secretary (known as the Yearbook of Agriculture) as authorized by 44 U.S.C. 1301: *Provided,* That in the preparation of motion pictures or exhibits by the Department, this appropriation shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225).

LEGISLATIVE LIAISON

For necessary expenses for liaison with the Congress on legislative matters, $495,000.

INTERGOVERNMENTAL AFFAIRS

For necessary expenses for programs involving intergovernmental affairs, emergency preparedness, and liaison within the executive branch, $467,000.

OFFICE OF THE INSPECTOR GENERAL

(INCLUDING TRANSFERS OF FUNDS)

For necessary expenses of the Office of the Inspector General, including employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), $30,756,000, including such sums as may be necessary for contracting and other arrangements with public agencies and private persons pursuant to section 6(a)(8) of the Inspector General Act of 1978 (Public Law 95-452), and including a sum not to exceed $50,000 for employment under 5 U.S.C. 3109; and including a sum not to exceed $75,000 for certain confidential operational expenses including the payment of informants, to be expended under the direction of the Inspector General pursuant to Public Law 95-452 and section 1337 of Public Law 97-98; and in addition, $15,924,000 shall be derived by transfer from the appropriation, "Food Stamp Program", and merged with this appropriation.

OFFICE OF THE GENERAL COUNSEL

(INCLUDING TRANSFERS OF FUNDS)

For necessary expenses, $15,077,000; and in addition, $786,000 shall be derived by transfer from the appropriation, "Food Stamp Program", and merged with this appropriation.

OFFICE OF THE ASSISTANT SECRETARY FOR ECONOMICS

For necessary expenses of the Office of the Assistant Secretary for Economics to carry out the programs funded in this Act, $418,000.

ECONOMIC RESEARCH SERVICE

For necessary expenses of the Economic Research Service in conducting economic research and service relating to agricultural production, marketing, and distribution, as authorized by the Agricultural Marketing Act of 1946 (7 U.S.C. 1621-1627), and other laws, including economics of marketing; analyses relating to farm prices, income and population, and demand for farm products, use of resources in agriculture, adjustments, costs and returns in farming, and farm fi-

nance; research relating to the economic and marketing aspects of farmer cooperatives; and for analyses of supply and demand for farm products in foreign countries and their effect on prospects for United States exports, progress in economic development and its relation to sales of farm products, assembly and analysis of agricultural trade statistics and analysis of international financial and monetary programs and policies as they affect the competitive position of United States farm products; $46,305,000; of which not less than $200,000 shall be available for investigation, determination and finding as to the effect upon the production of food and upon the agricultural economy of any proposed action affecting such subject matter pending before the Administrator of the Environmental Protection Agency for presentation, in the public interest, before said Administrator, other agencies or before the courts: *Provided*, That not less than $350,000 of the funds contained in this appropriation shall be available to continue to gather statistics and conduct a special study on the price spread between the farmer and consumer: *Provided further*, That this appropriation shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225): *Provided further*, That not less than $145,000 of the funds contained in this appropriation shall be available for analysis of statistics and related facts on foreign production and full and complete information on methods used by other countries to move farm commodities in world trade on a competitive basis.

STATISTICAL REPORTING SERVICE

For necessary expenses of the Statistical Reporting Service in conducting statistical reporting and service work, including crop and livestock estimates, statistical coordination and improvements, and marketing surveys, as authorized by the Agricultural Marketing Act of 1946 (7 U.S.C. 1621-1627) and other laws, $59,079,000: *Provided*, That no part of the funds herein appropriated shall be available for any expense incident to publishing estimates of apple production for other than the commercial crop: *Provided further*, That this appropriation shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $40,000 shall be available for employment under 5 U.S.C. 3109.

WORLD AGRICULTURAL OUTLOOK BOARD

For necessary expenses of the World Agricultural Outlook Board to coordinate and review all commodity and aggregate agricultural and food data used to develop outlook and situation material within the Department of Agriculture, as authorized by the Agricultural Marketing Act of 1946 (7 U.S.C. 1622g), $1,680,000: *Provided*, That this appropriation shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225).

OFFICE OF THE ASSISTANT SECRETARY FOR SCIENCE AND EDUCATION

For necessary salaries and expenses for the Office of the Assistant Secretary for Science and Education to administer the laws enacted by the Congress for the Agricultural Research Service, Cooperative State Research Service, Extension Service, and National Agricultural Library, $371,000.

AGRICULTURAL RESEARCH SERVICE

(INCLUDING TRANSFERS OF FUNDS)

For necessary expenses to enable the Agricultural Research Service to perform agricultural research and demonstration relating to production, utilization, marketing, and distribution (not otherwise provided for), home economics or nutrition and consumer use, and to coordinate and provide program leadership for higher education work of the Department, and for acquisition of lands by donation, exchange, or purchase at a nominal cost not to exceed $100; $492,806,000: *Provided*, That appropriations hereunder shall be available for field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $115,000 shall be available for employment under 5 U.S.C. 3109: *Provided further*, That funds appropriated herein can be used to provide financial assistance to the organizers of national and international conferences, if such conferences are in support of agency programs: *Provided further*, That appropriations hereunder shall be available for the operation and maintenance of aircraft and the purchase of not to exceed one for replacement only: *Provided further*, That uniform allowances for each uniformed employee of the Agricultural Research Service shall not be in excess of $400 annually: *Provided further*, That of the appropriations hereunder not less than $10,526,600 shall be available to conduct marketing research: *Provided further*, That appropriations hereunder shall be available pursuant to 7 U.S.C. 2250 for the construction, alteration, and repair of buildings and improvements, but unless otherwise provided the cost of constructing any one building shall not exceed $150,000, except for headhouses connecting greenhouses which shall each be limited to $500,000, and except for ten buildings to be constructed or improved at a cost not to exceed $275,000 each, and the cost of altering any one building during the fiscal year shall not exceed 10 per centum of the current replacement value of the building or $150,000 whichever is greater: *Provided further*, That the limitations on alterations contained in this Act shall not apply to a total of $250,000 for facilities at Beltsville, Maryland: *Provided further*, That the foregoing limitations shall not apply to replacement of buildings needed to carry out the Act of April 24, 1948 (21 U.S.C. 113a): *Provided further*, That the limitation on purchase of land shall not apply to the purchase of land at Fresno, California, or to an option to purchase land at Florence, South Carolina, for a term of not to exceed one year: *Provided further*, That the limitations on construction contained in this Act shall not apply to the establishment of the National Clonal Germplasm Repository for Citrus, Riverside, California: *Provided further*, That not to exceed $200,000 of this appropriation may be transferred to and merged with the appropriation for the Office of the Assistant Secretary for Science and Education for the scientific review of international issues involving agricultural chemicals and food additives.

Special fund: To provide for additional labor, subprofessional, and junior scientific help to be employed under contracts and cooperative agreements to strengthen the work at Federal research installations in the field, $2,000,000.

BUILDINGS AND FACILITIES

For acquisition of land, construction, repair, improvement, extension, alteration, and purchase of fixed equipment or facilities of or used by the Agricultural Research Service, where not otherwise provided, $3,600,000.

COOPERATIVE STATE RESEARCH SERVICE

For payments to agricultural experiment stations, for cooperative forestry and other research, for facilities, and for other expenses, including $156,484,000 to carry into effect the provisions of the Hatch Act approved March 2, 1887, as amended by the Act approved August 11, 1955 (7 U.S.C. 361a-361i), and further amended by Public Law 92-318 approved June 23, 1972, and further amended by Public Law 93-471 approved October 26, 1974, including administration by the United States Department of Agriculture, and penalty mail costs of agricultural experiment stations under section 6 of the Hatch Act of 1887, as amended, and payments under section 1361(c) of the Act of October 3, 1980 (7 U.S.C. 301n.); $13,053,000 for grants for cooperative forestry research under the Act approved October 10, 1962 (16 U.S.C. 582a—582a-7), as amended by Public Law 92-318 approved June 23, 1972, including administrative expenses, and payments under section 1361(c) of the Act of October 3, 1980 (7 U.S.C. 301n.); $23,474,000 for payments to the 1890 land-grant colleges, including Tuskegee Institute, for research under section 1445 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (Public Law 95-113), as amended, including administration by the United States Department of Agriculture, and penalty mail costs of the 1890 land-grant colleges, including Tuskegee Institute; $27,310,000 for contracts and grants for agricultural research under the Act of August 4, 1965, as amended (7 U.S.C. 450i); $34,000,000 for competitive research grants, including administrative expenses; $5,760,000 for the support of animal health and disease programs authorized by section 1433 of Public Law 95-113, including administrative expenses; $1,202,000 for research authorized by the Critical Agricultural Materials Act of 1984; $500,000 for rangeland research grants as authorized by subtitle M of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended; $10,000,000 for grants to upgrade 1890 land-grant college research facilities as authorized by section 1433 of Public Law 97-98, to remain available until expended; $3,000,000 for higher education strengthening grants under section 1417(a)(2)(A) of Public Law 95-113, as amended (7 U.S.C. 3152(a)(2)(A)); and $1,645,000 for necessary expenses of Cooperative State Research Service activities, including administration of payments to State agricultural experiment stations, funds for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $50,000 for employment under 5 U.S.C. 3109; in all, $276,428,000.

EXTENSION SERVICE

(INCLUDING TRANSFERS OF FUNDS)

Payments to States, Puerto Rico, Guam, the Virgin Islands, Micronesia, and American Samoa: For payments for cooperative agricultural extension work under the Smith-Lever Act, as amended by the Act of June 26, 1953, the Act of August 11, 1955, the Act of October 5, 1962 (7 U.S.C. 341-349), section 506 of the Act of June 23, 1972, and the Act of September 29, 1977 (7 U.S.C. 341-349), as amended, and section 1361(c) of the Act of October 3, 1980 (7 U.S.C. 301n.), to be distributed under sections 3(b) and

3(c) of the Act, for retirement and employees' compensation costs for extension agents, and for costs of penalty mail for cooperative extension agents and State extension directors, $241,484,000; payments for the nutrition and family education program for low-income areas under section 3(d) of the Act, $60,354,000, of which $38,627,000 shall be derived by transfer from the appropriation, "Food Stamp Program", and merged with this appropriation; payments for the urban gardening program under section 3(d) of the Act, $3,500,000; payments for the pest management program under section 3(d) of the Act, $7,531,000; payments for the farm safety program under section 3(d) of the Act, $1,020,000; payments for the integrated reproductive management program under section 3(d) of the Act, $50,000; payments for the pesticide impact assessment program under section 3(d) of the Act, $1,716,000; payments for a financial management assistance program under section 3(d) of the Act, $1,000,000; payments for extension work under section 209(c) of Public Law 93-471, $983,000; payments for extension work by the colleges receiving the benefits of the second Morrill Act (7 U.S.C. 321-326, 328) and Tuskegee Institute, $17,741,000; in all, $296,752,000; of which not less than $79,400,000 is for Home Economics: *Provided*, That funds hereby appropriated pursuant to section 3(c) of the Act of June 26, 1953, and section 506 of the Act of June 23, 1972, as amended, shall not be paid to any State, Puerto Rico, Guam, or the Virgin Islands, Micronesia, and American Samoa prior to availability of an equal sum from non-Federal sources for expenditure during the current fiscal year.

Federal administration and coordination: For administration of the Smith-Lever Act, as amended by the Act of June 26, 1953, the Act of August 11, 1955, the Act of October 5, 1962, section 506 of the Act of June 23, 1972, section 209(d) of Public Law 93-471, and the Act of September 29, 1977 (7 U.S.C. 341-349), as amended, and section 1361(c) of the Act of October 3, 1980 (7 U.S.C. 301n.), and to coordinate and provide program leadership for the extension work of the Department and the several States and insular possessions, $5,979,000; of which not less than $2,300,000 is for Home Economics.

NATIONAL AGRICULTURAL LIBRARY

For necessary expenses of the National Agricultural Library, $11,340,000: *Provided*, That this appropriation shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $35,000 shall be available for employment under 5 U.S.C. 3109: *Provided further*, That not to exceed $575,000 shall be available pursuant to 7 U.S.C. 2250 for the alteration and repair of buildings and improvements.

OFFICE OF THE ASSISTANT SECRETARY FOR MARKETING AND INSPECTION SERVICES

For necessary salaries and expenses for the Office of the Assistant Secretary for Marketing and Inspection Services to administer programs under the laws enacted by the Congress for the Animal and Plant Health Inspection Service, Food Safety and Inspection Service, Federal Grain Inspection Service, Agricultural Cooperative Service, Agricultural Marketing Service, (including Office of Transportation) and Packers and Stockyards Administration, $347,000.

ANIMAL AND PLANT HEALTH INSPECTION SERVICE

SALARIES AND EXPENSES

(INCLUDING TRANSFERS OF FUNDS)

For expenses, not otherwise provided for, including those pursuant to the Act of February 28, 1947, as amended (21 U.S.C. 114b-c), necessary to prevent, control, and eradicate pests and plant and animal diseases; to carry out inspection, quarantine, and regulatory activities; and to protect the environment, as authorized by law, $281,165,000; of which $3,000,000 shall be available for the control of outbreaks of insects, plant diseases and animal diseases to the extent necessary to meet emergency conditions: *Provided*, That $1,000,000 of the funds for control of the fire ant shall be placed in reserve for matching purposes with States which may come into the program: *Provided further*, That no funds shall be used to formulate or administer a brucellosis eradication program for the current fiscal year that does not require minimum matching by the States of at least 40 per centum: *Provided further*, That this appropriation shall be available for field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $40,000 shall be available for employment under 5 U.S.C. 3109: *Provided further*, That this appropriation shall be available for the operation and maintenance of aircraft and the purchase of not to exceed two, of which one shall be for replacement only: *Provided further*, That, in addition, in emergencies which threaten any segment of the agricultural production industry of this country, the Secretary may transfer from other appropriations or funds available to the agencies or corporations of the Department such sums as he may deem necessary, to be available only in such emergencies for the arrest and eradication of contagious or infectious diseases or pests of animals, poultry, or plants, and for expenses in accordance with the Act of February 28, 1947, as amended, and section 102 of the Act of September 21, 1944, as amended, and any unexpended balances of funds transferred for such emergency purposes in the next preceding fiscal year shall be merged with such transferred amounts.

BUILDINGS AND FACILITIES

For plans, construction, repair, improvement, extension, alteration, and purchase of fixed equipment or facilities, as authorized by 7 U.S.C. 2250, and acquisition of land as authorized by 7 U.S.C. 428a, $4,262,000.

FOOD SAFETY AND INSPECTION SERVICE

For necessary expenses to carry on services authorized by the Federal Meat Inspection Act, as amended, and the Poultry Products Inspection Act, as amended, $358,494,000: *Provided*, That this appropriation shall be available for field employment pursuant to section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $75,000 shall be available for employment under 5 U.S.C. 3109: *Provided further*, That this appropriation shall be available pursuant to law (7 U.S.C. 2250) for the alteration and repair of buildings and improvements, but the cost of altering any one building during the fiscal year shall not exceed 10 per centum of the current replacement value of the building.

FEDERAL GRAIN INSPECTION SERVICE

SALARIES AND EXPENSES

For necessary expenses to carry out the provisions of the United States Grain Standards Act, as amended, and the standardization activities related to grain under the Agricultural Marketing Act of 1946, as amended, including field employment pursuant to section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $20,000 for employment under 5 U.S.C. 3109, $7,045,000: *Provided*, That this appropriation shall be available pursuant to law (7 U.S.C. 2250) for the alteration and repair of buildings and improvements, but, unless otherwise provided, the cost of altering any one building during the fiscal year shall not exceed 10 per centum of the current replacement value of the building: *Provided further*, That none of the funds provided by this Act may be used to pay the salaries of any person or persons who require, or who authorize payments from fee-supported funds to persons or persons who require, nonexport, nonterminal interior elevators to maintain records not involving official inspection or official weighing in the United States under Public Law 94-582 other than those necessary to fulfill the purposes of such Act.

INSPECTION AND WEIGHING SERVICES

LIMITATION ON ADMINISTRATIVE EXPENSES

Not to exceed $36,856,000 (from fees collected) shall be obligated during the current fiscal year for Inspection and Weighing Services.

AGRICULTURAL COOPERATIVE SERVICE

For necessary expenses to carry out the Cooperative Marketing Act of July 2, 1926 (7 U.S.C. 451-457), and for activities relating to the marketing aspects of cooperatives, including economic research and analysis and the application of economic research findings, as authorized by the Agricultural Marketing Act of 1946 (7 U.S.C. 1621-1627), and for activities with institutions or organizations throughout the world concerning the development and operation of agricultural cooperatives (7 U.S.C. 3291), $4,713,000; of which $139,000 shall be available for a field office in Hawaii: *Provided*, That this appropriation shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $15,000 shall be available for employment under 5 U.S.C. 3109.

AGRICULTURAL MARKETING SERVICE

MARKETING SERVICES

For necessary expenses to carry on services related to consumer protection, agricultural marketing and distribution and regulatory programs as authorized by law, and for administration and coordination of payments to States; including field employment pursuant to section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $70,000 for employment under 5 U.S.C. 3109, $31,455,000; of which not less than $1,582,000 shall be available for the Wholesale Market Development Program for the design and development of wholesale and farmer market facilities for the major metropolitan areas of the country: *Provided*, That this appropriation shall be available pursuant to law (7 U.S.C. 2250) for the alteration and repair of buildings and improvements, but, unless otherwise provided, the cost of altering any one building during the fiscal year shall not exceed 10 per centum of the current replacement value of the building.

LIMITATION ON ADMINISTRATIVE EXPENSES

Not to exceed $27,253,000 (from fees collected) shall be obligated during the current fiscal year for administrative expenses.

FUNDS FOR STRENGTHENING MARKETS, INCOME, AND SUPPLY (SECTION 32)

(INCLUDING TRANSFERS OF FUNDS)

Funds available under section 32 of the Act of August 24, 1935 (7 U.S.C. 612c) shall be used only for commodity program expenses as authorized therein, and other related operating expenses, except for: (1) transfers to the Department of Commerce as authorized by the Fish and Wildlife Act of August 8, 1956; (2) transfers otherwise provided in this Act; and (3) not more than $6,193,000 for formulation and administration of Marketing Agreements and Orders pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and the Agricultural Act of 1961.

PAYMENTS TO STATES AND POSSESSIONS

For payments to departments of agriculture, bureaus and departments of markets, and similar agencies for marketing activities under section 204(b) of the Agricultural Marketing Act of 1946 (7 U.S.C. 1623(b)), $990,000.

OFFICE OF TRANSPORTATION

For necessary expenses to carry on services related to agricultural transportation programs as authorized by law; including field employment pursuant to section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $20,000 for employment under 5 U.S.C. 3109, $2,466,000: *Provided*, That this appropriation shall be available pursuant to law (7 U.S.C. 2250) for the alteration and repair of buildings and improvements, but, unless otherwise provided, the cost of altering any one building during the fiscal year shall not exceed 10 per centum of the current replacement value of the building.

PACKERS AND STOCKYARDS ADMINISTRATION

For necessary expenses for administration of the Packers and Stockyards Act, as authorized by law, including field employment pursuant to section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $5,000 for employment under 5 U.S.C. 3109, $9,201,000.

FARM INCOME STABILIZATION

OFFICE OF THE UNDER SECRETARY FOR INTERNATIONAL AFFAIRS AND COMMODITY PROGRAMS

For necessary salaries and expenses for the Office of the Under Secretary for International Affairs and Commodity Programs to administer the laws enacted by Congress for the Agricultural Stabilization and Conservation Service, Office of International Cooperation and Development, Foreign Agricultural Service, and the Commodity Credit Corporation, $502,000.

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

SALARIES AND EXPENSES

(INCLUDING TRANSFERS OF FUNDS)

For necessary administrative expenses of the Agricultural Stabilization and Conservation Service, including expenses to formulate and carry out programs authorized by title III of the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1301-1393); the Agricultural Act of 1949, as amended (7 U.S.C. 1421 et seq.); sections 7 to 15, 16(a), 16(f), and 17 of the Soil Conservation and Domestic Allotment Act, as amended and supplemented (16 U.S.C. 590g-590o, 590p(a), 590p(f), and 590q); sections 1001 to 1004, 1006 to 1008, and 1010 of the Agricultural Act of 1970 as added by the Agriculture and Consumer Protection Act of 1973 (16 U.S.C. 1501 to 1504, 1506 to 1508, and 1510); the Water Bank Act, as amended (16 U.S.C. 1301-1311); the Cooperative Forestry Assistance Act of 1978 (16 U.S.C. 2101); sections 401, 402, and 404 to 406 of the Agricultural Credit Act of 1978 (16 U.S.C. 2201 to 2205); and laws pertaining to the Commodity Credit Corporation, $395,119,000: *Provided*, That not to exceed $395,119,000 may be transferred to this account from the Commodity Credit Corporation fund: *Provided further*, That other funds made available to the Agricultural Stabilization and Conservation Service for authorized activities may be advanced to and merged with this account: *Provided further*, That these funds shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $100,000 shall be available for employment under 5 U.S.C. 3109: *Provided further*, That no part of the funds appropriated or made available under this Act shall be used (1) to influence the vote in any referendum; (2) to influence agricultural legislation, except as permitted in 18 U.S.C. 1913; or (3) for salaries or other expenses of members of county and community committees established pursuant to section 8(b) of the Soil Conservation and Domestic Allotment Act, as amended, for engaging in any activities other than advisory and supervisory duties and delegated program functions prescribed in administrative regulations.

DAIRY INDEMNITY PROGRAM

For necessary expenses involved in making indemnity payments to dairy farmers for milk or cows producing such milk and manufacturers of dairy products who have been directed to remove their milk or dairy products from commercial markets because it contained residues of chemicals registered and approved for use by the Federal Government, and in making indemnity payments for milk, or cows producing such milk, at a fair market value to any dairy farmer who is directed to remove his milk from commercial markets because of (1) the presence of products of nuclear radiation or fallout if such contamination is not due to the fault of the farmer, or (2) residues of chemicals or toxic substances not included under the first sentence of the Act of August 13, 1968, as amended (7 U.S.C. 450j), if such chemicals or toxic substances were not used in a manner contrary to applicable regulations or labeling instructions provided at the time of use and the contamination is not due to the fault of the farmer, $100,000: *Provided*, That none of the funds contained in this Act shall be used to make indemnity payments to any farmer whose milk was removed from commercial markets as a result of his willful failure to follow procedures prescribed by the Federal Government.

CORPORATIONS

The following corporations and agencies are hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to each such corporation or agency and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the budget for the current fiscal year for such corporation or agency, except as hereinafter provided:

FEDERAL CROP INSURANCE CORPORATION

ADMINISTRATIVE AND OPERATING EXPENSES

For administrative and operating expenses, as authorized by the Federal Crop Insurance Act, as amended (7 U.S.C. 1516), $200,502,000: *Provided*, That not to exceed $700 shall be available for official reception and representation expenses, as authorized by 7 U.S.C. 1506(i).

FEDERAL CROP INSURANCE CORPORATION FUND

For payments as authorized by section 508(b) of the Federal Crop Insurance Act, as amended, $135,000,000.

COMMODITY CREDIT CORPORATION

REIMBURSEMENT FOR NET REALIZED LOSSES

To reimburse the Commodity Credit Corporation for net realized losses sustained, but not previously reimbursed, pursuant to the Act of August 17, 1961 (15 U.S.C. 713a-11, 713a-12), $9,195,240,000.

GENERAL SALES MANAGER

(ALLOTMENT FROM COMMODITY CREDIT CORPORATION)

(INCLUDING TRANSFERS OF FUNDS)

Not to exceed $6,089,000 may be transferred from the Commodity Credit Corporation funds to support the General Sales Manager who shall work to expand and strengthen sales of United States commodities (including those of the Corporation) in world markets pursuant to existing authority (including that contained in the Corporation's charter), and that such funds shall be used by the General Sales Manager to carry out the above activities. The General Sales Manager shall report directly to the Board of Directors of the Corporation of which the Secretary of Agriculture is a member. The General Sales Manager shall obtain, assimilate, and analyze all available information on developments related to private sales, as well as those funded by the Corporation, including grade and quality as sold and as delivered, including information relating to the effectiveness of greater reliance by the General Sales Manager upon loan guarantees as contrasted to direct loans for financing commercial export sales of agricultural commodities out of private stocks on credit terms, as provided in titles I and II of the Agricultural Trade Act of 1978, Public Law 95-501, and shall submit quarterly reports to the appropriate committees of Congress concerning such developments.

Mr. WHITTEN (during the reading). Mr. Chairman, I ask unanimous consent that title I be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The CHAIRMAN. Are there any amendments or points of order to title I?

If there are no amendments to title I, the Clerk will read.

The Clerk read as follows:

TITLE II—RURAL DEVELOPMENT PROGRAMS

RURAL DEVELOPMENT ASSISTANCE

OFFICE OF THE UNDER SECRETARY FOR SMALL COMMUNITY AND RURAL DEVELOPMENT

For necessary salaries and expenses for the Office of the Under Secretary for Small Community and Rural Development to administer programs under the laws enacted by the Congress for the Farmers Home Administration, Rural Electrification Administration, Office of Rural Development

Policy, and Federal Crop Insurance Corporation, $415,000.

OFFICE OF RURAL DEVELOPMENT POLICY

For necessary expenses, not otherwise provided for, of the Office of Rural Development Policy in providing leadership, coordination, and related services in carrying out the rural development activities of the Department of Agriculture, as authorized by section 603 of the Rural Development Act of 1972, as amended (7 U.S.C. 2204b); section 2 of the Rural Development Policy Act of 1980 (7 U.S.C. 1921), and grants pursuant to the Consolidated Farm and Rural Development Act, as amended (7 U.S.C. 1926(a)(11) and 7 U.S.C. 1932(c)), $2,037,000: *Provided*, That this appropriation shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $5,000 of this appropriation shall be available for employment under 5 U.S.C. 3109.

FARMERS HOME ADMINISTRATION

RURAL HOUSING INSURANCE FUND

For direct loans and related advances pursuant to section 517(m) of the Housing Act of 1949, as amended, $17,000,000 shall be available from funds in the Rural Housing Insurance Fund, and for insured loans as authorized by title V of the Housing Act of 1949, as amended, $3,221,000,000; of which not less than $3,220,000,000 shall be available for subsidized interest loans to low-income borrowers, as determined by the Secretary, and for subsequent loans to existing borrowers or to purchasers under assumption agreements or credit sales; and not to exceed $10,000,000 to enter into collection and servicing contracts pursuant to the provisions of section 3(f)(3) of the Federal Claims Act of 1966 (31 U.S.C. 952).

During fiscal year 1986, no more than 15,000 units may be assisted under rental assistance agreements entered into or extended during the year pursuant to authority under section 521(a)(2) of the Housing Act of 1949, as amended, and the total new obligation incurred over the life of these agreements shall not exceed $198,000,000 to be added to and merged with the authority provided for this purpose in prior fiscal years: *Provided*, That the life of the agreements entered into or extended during fiscal year 1986 shall not exceed five years.

For an additional amount to reimburse the Rural Housing Insurance Fund for interest subsidies and losses sustained in prior years, but not previously reimbursed, in carrying out the provisions of title V of the Housing Act of 1949, as amended (42 U.S.C. 1483, 1487e, and 1490a(c)), including $2,757,000 as authorized by section 521(c) of the Act, $1,843,927,000, and for an additional amount as authorized by section 521(c) of the Act as may be necessary to reimburse the fund to carry out a rental assistance program under section 521(a)(2) of the Housing Act of 1949, as amended.

AGRICULTURAL CREDIT INSURANCE FUND

Loans may be insured, or made to be sold and insured, under this fund in accordance with and subject to the provisions of 7 U.S.C. 1928–1929, or guaranteed, as follows: real estate loans, $732,000,000, including not less than $700,000,000 for farm ownership loans of which $200,000,000 shall be guaranteed loans; and not less than $28,000,000 for water development, use, and conservation loans of which $6,000,000 shall be guaranteed loans; operating loans, $3,400,000,000 of which $1,480,000,000 shall be guaranteed loans; and emergency insured and guaranteed loans in amounts necessary to meet the needs resulting from natural disasters.

For an additional amount to reimburse the Agricultural Credit Insurance Fund for interest subsidies and losses sustained in prior years, but not previously reimbursed, in carrying out the provisions of the Consolidated Farm and Rural Development Act, as amended (7 U.S.C. 1988(a)), $1,089,943,000.

RURAL DEVELOPMENT INSURANCE FUND

For loans to be insured, or made to be sold and insured, under this fund in accordance with and subject to the provisions of 7 U.S.C. 1928 and 86 Stat. 661–664, as follows: insured water and sewer facility loans, $340,000,000; guaranteed industrial development loans, $100,000,000; and insured community facility loans, $115,000,000.

For an additional amount to reimburse the Rural Development Insurance Fund for interest subsidies and losses sustained in prior years, but not previously reimbursed, in carrying out the provisions of the Consolidated Farm and Rural Development Act, as amended (7 U.S.C. 1988(a)), $560,005,000.

RURAL WATER AND WASTE DISPOSAL GRANTS

For grants pursuant to sections 306(a)(2) and 306(a)(6) of the Consolidated Farm and Rural Development Act, as amended (7 U.S.C. 1926), $115,000,000, to remain available until expended, pursuant to section 306(d) of the above Act.

VERY LOW-INCOME HOUSING REPAIR GRANTS

For grants to the very low-income elderly for essential repairs to dwellings pursuant to section 504 of the Housing Act of 1949, as amended, $12,500,000.

MUTUAL AND SELF-HELP HOUSING

For grants and contracts pursuant to section 523(b)(1)(A) of the Housing Act of 1949 (42 U.S.C. 1490c), $8,000,000.

RURAL COMMUNITY FIRE PROTECTION GRANTS

For grants pursuant to section 7 of the Cooperative Forestry Assistance Act of 1978 (Public Law 95–313), $3,250,000 to fund up to 50 per centum of the cost of organizing, training, and equipping rural volunteer fire departments.

COMPENSATION FOR CONSTRUCTION DEFECTS

For compensation for construction defects as authorized by section 509(c) of the Housing Act of 1949, as amended, $1,000,000.

RURAL HOUSING PRESERVATION GRANTS

Funds made available by Public Laws 98–396 and 98–473 for rural housing preservation grants shall remain available through September 30, 1986.

SALARIES AND EXPENSES

(INCLUDING TRANSFERS OF FUNDS)

For necessary expenses of the Farmers Home Administration, not otherwise provided for, in administering the programs authorized by the Consolidated Farm and Rural Development Act (7 U.S.C. 1921–1995), as amended; title V of the Housing Act of 1949, as amended (42 U.S.C. 1471–1490h); the Rural Rehabilitation Corporation Trust Liquidation Act, approved May 3, 1950 (40 U.S.C. 440–444), for administering the loan program authorized by title III A of the Economic Opportunity Act of 1964 (Public Law 88–452 approved August 20, 1964), as amended, and such other programs for which Farmers Home Administration has the responsibility for administering, $356,297,000, together with not more than $3,000,000 of the charges collected in connection with the insurance of loans as authorized by section 309(e) of the Consolidated Farm and Rural Development Act, as amended, and section 517(i) of the Housing Act of 1949, as amended, or in connection with charges made on borrowers under section 502(a) of the Housing Act of 1949, as amended: *Provided*, That, in addition, not to exceed $1,000,000 of the funds available for the various programs administered by this agency may be transferred to this appropriation for temporary field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), to meet unusual or heavy workload increases: *Provided further*, That not to exceed $500,000 of this appropriation may be used for employment under 5 U.S.C. 3109: *Provided further*, That not to exceed $1,600,000 of this appropriation shall be available for contracting with the National Rural Water Association or other equally qualified national organization for a circuit rider program to provide technical assistance for rural water systems: *Provided further*, That, in addition to any other authority that the Secretary may have to defer principal and interest and forego foreclosure, the Secretary may permit, at the request of the borrower, the deferral of principal and interest on any outstanding loan made, insured, or held by the Secretary under this title, or under the provisions of any other law administered by the Farmers Home Administration, and may forego foreclosure of any such loan, for such period as the Secretary deems necessary upon a showing by the borrower that due to circumstances beyond the borrower's control, the borrower is temporarily unable to continue making payments of such principal and interest when due without unduly impairing the standard of living of the borrower. The Secretary may permit interest that accrues during the deferral period on any loan deferred under this section to bear no interest during or after such period: *Provided further*, That if the security instrument securing such loan is foreclosed, such interest as is included in the purchase price at such foreclosure shall become part of the principal and draw interest from the date of foreclosure at the rate prescribed by law.

RURAL ELECTRIFICATION ADMINISTRATION

To carry into effect the provisions of the Rural Electrification Act of 1936, as amended (7 U.S.C. 901–950(b)), as follows:

RURAL ELECTRIFICATION AND TELEPHONE REVOLVING FUND LOAN AUTHORIZATIONS

Insured loans pursuant to the authority of section 305 of the Rural Electrification Act of 1936, as amended (7 U.S.C. 935), shall be made as follows: rural electrification loans, not less than $650,000,000 nor more than $1,100,000,000; and rural telephone loans, not less than $250,000,000 nor more than $325,000,000; to remain available until expended: *Provided*, That loans made pursuant to section 306 of that Act are in addition to these amounts but during 1986 total commitments to guarantee loans pursuant to section 306 shall be not less than $975,000,000 nor more than $2,345,000,000 of contingent liability for total loan principal: *Provided further*, That as a condition of approval of insured electric loans during fiscal year 1986, borrowers shall obtain concurrent supplemental financing in accordance with the applicable criteria and ratios in effect as of July 15, 1982.

REIMBURSEMENT TO THE RURAL ELECTRIFICATION AND TELEPHONE REVOLVING FUND

For an additional amount to reimburse the rural electrification and telephone re-

volving fund for interest subsidies and losses sustained in prior years, but not previously reimbursed, in carrying out the provisions of the Rural Electrification Act of 1936, as amended (7 U.S.C. 901-950(b)), $225,395,000.

RURAL TELEPHONE BANK

For the purchase of Class A stock of the Rural Telephone Bank, $30,000,000, to remain available until expended (7 U.S.C. 901-950(b)).

The Rural Telephone Bank is hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to such corporation in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out its authorized programs for the current fiscal year. During 1986, and within the resources and authority available, gross obligations for the principal amount of direct loans shall be not less than $185,000,000 nor more than $220,000,000.

RURAL COMMUNICATION DEVELOPMENT FUND

To reimburse the Rural Communication Development Fund for interest subsidies and losses sustained in prior years, but not previously reimbursed, in making Community Antenna Television loans and loan guarantees under sections 306 and 310B of the Consolidated Farm and Rural Development Act, as amended, $1,203,000.

SALARIES AND EXPENSES

For administrative expenses to carry out the provisions of the Rural Electrification Act of 1936, as amended (7 U.S.C. 901-950(b)), and to administer the loan and loan guarantee programs for Community Antenna Television facilities as authorized by the Consolidated Farm and Rural Development Act (7 U.S.C. 1921-1995), and for which commitments were made prior to fiscal year 1985, including not to exceed $7,000 for financial and credit reports, funds for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $103,000 for employment under 5 U.S.C. 3109, $30,990,000.

CONSERVATION

OFFICE OF THE ASSISTANT SECRETARY FOR NATURAL RESOURCES AND ENVIRONMENT

For necessary salaries and expenses for the Office of the Assistant Secretary for Natural Resources and Environment to administer the laws enacted by the Congress for the Forest Service and the Soil Conservation Service, $386,000.

SOIL CONSERVATION SERVICE

CONSERVATION OPERATIONS

For necessary expenses for carrying out the provisions of the Act of April 27, 1935 (16 U.S.C. 590a-590f) including preparation of conservation plans and establishment of measures to conserve soil and water (including farm irrigation and land drainage and such special measures for soil and water management as may be necessary to prevent floods and the siltation of reservoirs and to control agricultural related pollutants); operation of conservation plant materials centers; classification and mapping of soil; dissemination of information; acquisition of lands by donation, exchange, or purchase at a nominal cost not to exceed $100; purchase and erection or alteration or improvement of permanent and temporary buildings; and operation and maintenance of aircraft, $365,629,000; of which not less than $3,973,000 is for snow survey and water forecasting and not less than $4,089,000 is for operation of the plant materials centers: *Provided,* That of the foregoing amounts $290,204,000 is for personnel compensation and benefits and $75,425,000 is for other expenses: *Provided further,* That the cost of any permanent building purchased, erected, or as improved, exclusive of the cost of constructing a water supply or sanitary system and connecting the same to any such building and with the exception of buildings acquired in conjunction with land being purchased for other purposes, shall not exceed $10,000, except for one building to be constructed at a cost not to exceed $100,000 and eight buildings to be constructed or improved at a cost not to exceed $50,000 per building and except that alterations or improvements to other existing permanent buildings costing $5,000 or more may be made in any fiscal year in an amount not to exceed $2,000 per building: *Provided further,* That when buildings or other structures are erected on non-Federal land that right to use such land is obtained as provided in 7 U.S.C. 2250a: *Provided further,* That no part of this appropriation may be expended for soil and water conservation operations under the Act of April 27, 1935 (16 U.S.C. 590a-590f) in demonstration projects: *Provided further,* That this appropriation shall be available for field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225) and not to exceed $25,000 shall be available for employment under 5 U.S.C. 3109: *Provided further,* That qualified local engineers may be temporarily employed at per diem rates to perform the technical planning work of the Service.

RIVER BASIN SURVEYS AND INVESTIGATIONS

For necessary expenses to conduct research, investigations and surveys of the watersheds of rivers and other waterways, in accordance with section 6 of the Watershed Protection and Flood Prevention Act approved August 4, 1954, as amended (16 U.S.C. 1006-1009), $14,906,000: *Provided,* That this appropriation shall be available for field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $60,000 shall be available for employment under 5 U.S.C. 3109.

WATERSHED PLANNING

For necessary expenses for small watershed investigations and planning, in accordance with the Watershed Protection and Flood Prevention Act, as amended (16 U.S.C. 1001-1008), $8,922,000: *Provided,* That this appropriation shall be available for field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $50,000 shall be available for employment under 5 U.S.C. 3109.

WATERSHED AND FLOOD PREVENTION OPERATIONS

For necessary expenses to carry out preventive measures, including but not limited to research, engineering operations, methods of cultivation, the growing of vegetation, rehabilitation of existing works and changes in use of land, in accordance with the Watershed Protection and Flood Prevention Act approved August 4, 1954, as amended (16 U.S.C. 1001-1005, 1007-1009), the provisions of the Act of April 27, 1935 (16 U.S.C. 590a-f), and in accordance with the provisions of laws relating to the activities of the Department, $183,843,000 (of which $27,617,000 shall be available for the watersheds authorized under the Flood Control Act approved June 22, 1936 (33 U.S.C. 701, 16 U.S.C. 1006a), as amended and supplemented): *Provided,* That this appropriation shall be available for field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $5,000,000 shall be available for emergency measures as provided by sections 403-405 of the Agricultural Credit Act of 1978 (16 U.S.C. 2203-2205), and not to exceed $200,000 shall be available for employment under 5 U.S.C. 3109: *Provided further,* That $14,000,000 in loans may be insured, or made to be sold and insured, under the Agricultural Credit Insurance Fund of the Farmers Home Administration (86 Stat. 663): *Provided further,* That not to exceed $1,000,000 of this appropriation is available to carry out the purposes of the Endangered Species Act of 1973 (Public Law 93-205), as amended, including cooperative efforts as contemplated by that Act to relocate endangered or threatened species to other suitable habitats as may be necessary to expedite project construction.

RESOURCE CONSERVATION AND DEVELOPMENT

For necessary expenses in planning and carrying out projects for resource conservation and development and for sound land use pursuant to the provisions of section 32(e) of title III of the Bankhead-Jones Farm Tenant Act, as amended (7 U.S.C. 1010-1011; 76 Stat. 607), and the provisions of the Act of April 27, 1935 (16 U.S.C. 590a-f), and the provisions of the Agriculture and Food Act of 1981 (16 U.S.C. 3451-3461), $26,320,000: *Provided,* That $2,000,000 in loans may be insured, or made to be sold and insured, under the Agricultural Credit Insurance Fund of the Farmers Home Administration (86 Stat. 663): *Provided further,* That this appropriation shall be available for field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $50,000 shall be available for employment under 5 U.S.C. 3109.

GREAT PLAINS CONSERVATION PROGRAM

For necessary expenses to carry into effect a program of conservation in the Great Plains area, pursuant to section 16(b) of the Soil Conservation and Domestic Allotment Act, as added by the Act of August 7, 1956, as amended (16 U.S.C. 590p(b)), $21,531,000, to remain available until expended.

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

AGRICULTURAL CONSERVATION PROGRAM

For necessary expenses to carry into effect the program authorized in sections 7 to 15, 16(a), 16(f), and 17 of the Soil Conservation and Domestic Allotment Act approved February 29, 1936, as amended and supplemented (16 U.S.C. 590g-590o, 590p(a), 590p(f), and 590q), and sections 1001-1004, 1006-1008, and 1010 of the Agricultural Act of 1970, as added by the Agriculture and Consumer Protection Act of 1973 (16 U.S.C. 1501-1504, 1506-1508, and 1510), and including not to exceed $15,000 for the preparation and display of exhibits, including such displays at State, interstate, and international fairs within the United States, $190,000,000, to remain available until expended for agreements, excluding administration but including technical assistance and related expenses, except that no participant in the Agricultural Conservation Program shall receive more than $3,500, except where the participants from two or more

farms or ranches join to carry out approved practices designed to conserve or improve the agricultural resources of the community: *Provided,* That no portion of the funds for the current year's program may be utilized to provide financial or technical assistance for drainage on wetlands now designated as Wetlands Types 3 (III) through 20 (XX) in United States Department of the Interior, Fish and Wildlife Circular 39, Wetlands of the United States, 1956: *Provided further,* That such amounts shall be available for the purchase of seeds, fertilizers, lime, trees, or any other conservation materials, or any soil-terracing services, and making grants thereof to agricultural producers to aid them in carrying out approved farming practices as authorized by the Soil Conservation and Domestic Allotment Act, as amended, as determined and recommended by the county committees, approved by the State committees and the Secretary, under programs provided for herein: *Provided further,* That such assistance will not be used for carrying out measures and practices that are primarily production-oriented or that have little or no conservation or pollution abatement benefits: *Provided further,* That not to exceed 5 per centum of the allocation for the current year's program for any county may, on the recommendation of such county committee and approval of the State committee, be withheld and allotted to the Soil Conservation Service for services of its technicians in formulating and carrying out the Agricultural Conservation Program in the participating counties, and shall not be utilized by the Soil Conservation Service for any purpose other than technical and other assistance in such counties, and in addition, on the recommendation of such county committee and approval of the State committee, not to exceed 1 per centum may be made available to any other Federal, State, or local public agency for the same purpose and under the same conditions: *Provided further,* That for the current year's program $2,500,000 shall be available for technical assistance in formulating and carrying out rural environmental practices: *Provided further,* That no part of any funds available to the Department, or any bureau, office, corporation, or other agency constituting a part of such Department, shall be used in the current fiscal year for the payment of salary or travel expenses of any person who has been convicted of violating the Act entitled "An Act to prevent pernicious political activities" approved August 2, 1939, as amended, or who has been found in accordance with the provisions of title 18 U.S.C. 1913 to have violated or attempted to violate such section which prohibits the use of Federal appropriations for the payment of personal services or other expenses designed to influence in any manner a Member of Congress to favor or oppose any legislation or appropriation by Congress except upon request of any Member or through the proper official channels.

FORESTRY INCENTIVES PROGRAM

For necessary expenses, not otherwise provided for, to carry out the program of forestry incentives, as authorized in the Cooperative Forestry Assistance Act of 1978 (16 U.S.C. 2101), including technical assistance and related expenses, $12,500,000, to remain available until expended, as authorized by that Act.

EMERGENCY CONSERVATION PROGRAM

For necessary expenses to carry into effect the program authorized in sections 401, 402, and 404 of title IV of the Agricultural Credit Act of 1978 (16 U.S.C. 2201-2205), $5,000,000, to remain available until expended, as authorized by 16 U.S.C. 2204.

Mr. WHITTEN (during the reading). Mr. Chairman, I ask unanimous consent that title II be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The CHAIRMAN. Are there any amendments or points of order to title II?

Hearing none, the Clerk will read.

The Clerk read as follows:

TITLE III—DOMESTIC FOOD PROGRAMS

OFFICE OF THE ASSISTANT SECRETARY FOR FOOD AND CONSUMER SERVICES

For necessary salaries and expenses for the Office of the Assistant Secretary for Food and Consumer Services to administer the laws enacted by the Congress for the Food and Nutrition Service and the Human Nutrition Information Service, $350,000.

FOOD AND NUTRITION SERVICE

CHILD NUTRITION PROGRAMS

(INCLUDING TRANSFERS OF FUNDS)

For necessary expenses to carry out the National School Lunch Act (42 U.S.C. 1751-1761, and 1766), and the applicable provisions other than section 3 of the Child Nutrition Act of 1966 (42 U.S.C. 1773-1785, and 1788); $4,114,140,000, to remain available through fiscal year 1987, of which $842,548,000 is hereby appropriated and $3,271,592,000 shall be derived by transfer from funds available under section 32 of the Act of August 24, 1935 (7 U.S.C. 612c): *Provided,* That, of funds provided herein, $665,015,000 shall be available only to the extent an official budget request is transmitted to the Congress: *Provided further,* That funds appropriated for the purpose of section 7 of the Child Nutrition Act of 1966 shall be allocated among the States but the distribution of such funds to an individual State is contingent upon that State's agreement to participate in studies and surveys of programs authorized under the National School Lunch Act and the Child Nutrition Act of 1966, when such studies and surveys have been directed by the Congress and requested by the Secretary of Agriculture: *Provided further,* That if the Secretary of Agriculture determines that a State's administration of any program under the National School Lunch Act or the Child Nutrition Act of 1966 (other than section 17), or the regulations issued pursuant to these Acts, is seriously deficient, and the State fails to correct the deficiency within a specified period of time, the Secretary may withhold from the State some or all of the funds allocated to the State under section 7 of the Child Nutrition Act of 1966 and under section 13(k)(1) of the National School Lunch Act; upon a subsequent determination by the Secretary that the programs are operated in an acceptable manner some or all of the funds withheld may be allocated: *Provided further,* That if the funds available for Nutrition Education and Training grants authorized under section 19 of the Child Nutrition Act of 1966, as amended, require a ratable reduction in those grants, the minimum grant for each State shall be $50,000: *Provided further,* That only final reimbursement claims for service of meals, supplements, and milk submitted to State agencies by eligible schools, summer camps, institutions, and service institutions within sixty days following the month for which the reimbursement is claimed shall be eligible for reimbursement from funds appropriated under this Act. States may receive program funds appropriated under this Act for meals, supplements, and milk served during any month only if the final program operations report for such month is submitted to the Department within ninety days following that month. Exceptions to these claims or reports submission requirements may be made at the discretion of the Secretary.

SPECIAL MILK PROGRAM

For necessary expenses to carry out the special milk program, as authorized by section 3 of the Child Nutrition Act of 1966 (42 U.S.C. 1772), $11,500,000, to remain available through September 30, 1987: *Provided,* That only final reimbursement claims for milk submitted to State agencies within sixty days following the month for which the reimbursement is claimed shall be eligible for reimbursement from funds appropriated under this Act. States may receive program funds appropriated under this Act only if the final program operations report for such month is submitted to the Department within ninety days following that month. Exceptions to these claims or reports submission requirements may be made at the discretion of the Secretary.

FEEDING PROGRAM FOR WOMEN, INFANTS AND CHILDREN (WIC)

For necessary expenses to carry out the special supplemental food program as authorized by section 17 of the Child Nutrition Act of 1966 (42 U.S.C. 1786), $1,570,000,000: *Provided,* That funds provided herein shall remain available through September 30, 1987.

COMMODITY SUPPLEMENTAL FOOD PROGRAM

For necessary expenses to carry out the commodity supplemental food program as authorized by section 4(a) of the Agriculture and Consumer Protection Act of 1973 (7 U.S.C. 612c (note)), including not less than $2,950,000 for the projects in Detroit, New Orleans, and Des Moines, $36,999,000: *Provided,* That funds provided herein shall remain available through September 30, 1987.

FOOD STAMP PROGRAM

For necessary expenses to carry out the Food Stamp Act (7 U.S.C. 2011-2027, 2029) $11,891,570,000: *Provided,* That funds provided herein shall remain available through September 30, 1986, in accordance with section 18(a) of the Food Stamp Act: *Provided further,* That up to 5 per centum of the foregoing amount may be placed in reserve to be apportioned pursuant to section 3679 of the Revised Statutes, as amended, for use only in such amounts and at such times as may become necessary to carry out program operations: *Provided further,* That funds provided herein shall be expended in accordance with section 16 of the Food Stamp Act: *Provided further,* That this appropriation shall be subject to any work registration or workfare requirements as may be required by law: *Provided further,* That $345,000,000 of the funds provided herein shall be available only to the extent necessary after the Secretary has employed the regulatory and administrative methods available to him under the law to curtail fraud, waste and abuse in the program.

NUTRITION ASSISTANCE FOR PUERTO RICO

For monthly payments to the Commonwealth of Puerto Rico for nutrition assistance as authorized by 7 U.S.C. 2028, $825,000,000.

FOOD DONATIONS PROGRAMS

For necessary expenses to carry out section 4(a) of the Agriculture and Consumer Protection Act of 1973 (7 U.S.C. 612c (note)) and section 4(b) of the Food Stamp Act (7 U.S.C. 2013), $187,622,000.

TEMPORARY EMERGENCY FOOD ASSISTANCE PROGRAM

For necessary expenses to carry out the Temporary Emergency Food Assistance Act of 1983, as amended, $50,000,000: *Provided*, That, in accordance with section 202 of Public Law 98-92, these funds shall be available only if the Secretary determines the existence of excess commodities.

FOOD PROGRAM ADMINISTRATION

For necessary administrative expenses of the Domestic Food Programs funded under this Act, $82,502,000; of which $5,000,000 shall be available only for simplifying procedures, reducing overhead costs, tightening regulations, improving food stamp coupon handling, and assistance in the prevention, identification and prosecution of fraud and other violations of law: *Provided*, That this appropriation shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $150,000 shall be available for employment under 5 U.S.C. 3109.

HUMAN NUTRITION INFORMATION SERVICE

For necessary expenses to enable the Human Nutrition Information Service to perform applied research and demonstrations relating to human nutrition and consumer use and economies of food utilization, $13,562,000: *Provided*, That this appropriation shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225).

Mr. WHITTEN (during the reading). Mr. Chairman, I ask unanimous consent that title III be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The CHAIRMAN. Are there amendments or points of order to title III?

Hearing none, the Clerk will read.

The Clerk read as follows:

TITLE IV—INTERNATIONAL PROGRAMS

FOREIGN AGRICULTURAL SERVICE

For necessary expenses of the Foreign Agricultural Service, including carrying out title VI of the Agricultural Act of 1954, as amended (7 U.S.C. 1761-1768), market development activities abroad, and for enabling the Secretary to coordinate and integrate activities of the Department in connection with foreign agricultural work, including not to exceed $110,000 for representation allowances and for expenses pursuant to section 8 of the Act approved August 3, 1956 (7 U.S.C. 1766), $83,547,000: *Provided*, That not less than $255,000 of the funds contained in this appropriation shall be available to obtain statistics and related facts on foreign production and full and complete information on methods used by other countries to move farm commodities in world trade on a competitive basis.

PUBLIC LAW 480

(INCLUDING TRANSFERS OF FUNDS)

For expenses during the current fiscal year, not otherwise recoverable, and unrecovered prior years' costs, including interest thereon, under the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1691, 1701-1715, 1721-1726, 1727-1727f, 1731-1736g), as follows: (1) financing the sale of agricultural commodities for convertible foreign currencies and for dollars on credit terms pursuant to titles I and III of said Act, not more than $1,030,000,000; of which $657,000,000 is hereby appropriated and the balance derived from proceeds from sales of foreign currencies and dollar loan repayments, repayments on long-term credit sales and carryover balances, and (2) commodities supplied in connection with dispositions abroad, pursuant to title II of said Act, not more than $650,000,000, of which $650,000,000 is hereby appropriated: *Provided*, That not to exceed 10 per centum of the funds made available to carry out any title of this paragraph may be used to carry out any other title of this paragraph.

OFFICE OF INTERNATIONAL COOPERATION AND DEVELOPMENT

For necessary expenses of the Office of International Cooperation and Development to coordinate, plan, and direct activities involving international development, technical assistance and training, and international scientific and technical cooperation in the Department of Agriculture, including those authorized by the Food and Agriculture Act of 1977 (7 U.S.C. 3291), $3,917,000; and the Office may utilize advances of funds, or reimburse this appropriation for expenditures made on behalf of Federal agencies, public and private organizations and institutions under agreements executed pursuant to the agricultural food production assistance programs (7 U.S.C. 1736) and the foreign assistance programs of the International Development Cooperation Administration (22 U.S.C. 2392).

Mr. WHITTEN (during the reading). Mr. Chairman, I ask unanimous consent that title IV be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The CHAIRMAN. Are there amendments or points of order to title IV?

Hearing none, the Clerk will read.

The Clerk read as follows:

TITLE V—RELATED AGENCIES

FOOD AND DRUG ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses of the Food and Drug Administration; for rental of special purpose space in the District of Columbia or elsewhere; and for miscellaneous and emergency expenses of enforcement activities, authorized and approved by the Secretary and to be accounted for solely on the Secretary's certificate, not to exceed $25,000; $390,225,000: *Provided*, That none of the funds in this Act shall be used to develop, establish, or operate any program of user fees authorized by 31 U.S.C. 9701.

BUILDINGS AND FACILITIES

For plans, construction, repair, improvement, extension, alteration, and purchase of fixed equipment or facilities of or used by the Food and Drug Administration, where not otherwise provided, $1,450,000.

STANDARD LEVEL USER CHARGES (FDA)

(INCLUDING TRANSFERS OF FUNDS)

For payment of Standard Level User Charges pursuant to Public Law 92-313 for programs and activities of the Food and Drug Administration which are included in this Act, $25,888,000: *Provided*, That in the event the Food and Drug Administration should require modification of space needs, a share of the salaries and expenses appropriation may be transferred to this appropriation, or a share of this appropriation may be transferred to the salaries and expenses appropriation, but such transfers shall not exceed 10 per centum of the funds made available for Standard Level User Charges to or from this account.

COMMODITY FUTURES TRADING COMMISSION

For necessary expenses to carry out the provisions of the Commodity Exchange Act, as amended (7 U.S.C. 1 et seq.), including the purchase and hire of passenger motor vehicles; the rental of space (to include multiple year leases) in the District of Columbia and elsewhere; and not to exceed $25,000 for employment under 5 U.S.C. 3109; $28,416,000; including not to exceed $700 for official reception and representation expenses.

FARM CREDIT ADMINISTRATION

LIMITATION ON REVOLVING FUND FOR ADMINISTRATIVE EXPENSES

Not to exceed $21,175,000 (from assessments collected from farm credit system banks) shall be obligated during the current fiscal year for administrative expenses, as authorized under 12 U.S.C. 2249.

Mr. WHITTEN (during the reading). Mr. Chairman, I ask unanimous consent that title V be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The CHAIRMAN. Are there any points of order against title V?

Are there amendments to title V?

AMENDMENT OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WHITTEN: On page 54, line 2, strike "390,225,000" and insert "392,370,000".

Mr. WHITTEN. Mr. Chairman, this amendment is offered on behalf of the subcommittee.

Mr. Chairman, we have been advised by Secretary Heckler that budget amendments are now pending at the Office of Management and Budget to increase the resources devoted to work on acquired immune deficiency syndrome [AIDS].

These amendments involve the Centers for Disease Control, the National Institutes of Health, the Alcohol, Drug Abuse, and Mental Health Administration, and the Food and Drug Administration, a total of $37.8 million.

The amendment I offer on behalf of the Committee increases the Committee's recommendation for FDA, by $2,145,000, the full amount of the pending budget amendment. The resources for the other agencies will be addressed in the Labor-HHS Appropriation bill.

We have not yet received the budget amendments, but the paperwork is being processed by OMB, and should be submitted soon. This money will be used to develop and improve screening tests for AIDS, to assure the safety of the Nation's blood supply, to clarify the possible transmissibility of AIDS through food, and to review and approve new diagnostic and treatment products.

Mr. Chairman, I yield to my colleague, the gentleman from California [Mr. FAZIO].

Mr. FAZIO. Mr. Chairman, I rise in strong support of the bill, which goes such a long way to improve agricultural programs for the State of California in relation to the administration's budget submission, and I am particularly pleased to see the committee's action in regard to AIDS.

Mr. Chairman, I commend the subcommittee for adding the $2 million to the budget of the Food and Drug Administration to expedite the availability of diagnostic kits for potential AIDS victims across the country.

This wise and humane decision is another example of the broad support that exists in Congress for the limitation and eventual eradication of acquired immune deficiency syndrome.

As most Americans now know, the threat to public health has now clearly been extended to include every element of our population. This bill and the measure yet to come before us from the subcommittee responsible for health appropriations show significant progress in broadening the funding base for this terrible unsolved problem.

Mrs. SMITH of Nebraska. Mr. Chairman, this side supports the amendment.

Mr. GREEN. Mr. Chairman, I should like to express my strong support for this urgently needed amendment to H.R. 3037, the fiscal year 1986 Agriculture Appropriation bill, and I commend the committee, and particularly its chairman and ranking minority member for offering it. This amendment will provide an additional $2.145 million to the Food and Drug Administration [FDA] for activities to combat acquired immune deficiency syndrome [AIDS].

The Secretary of Health and Human Services [HHS] has informed the Appropriations Committee that these additional funds are essential for optimal progress in fighting this deadly epidemic. This past Friday, July 19, 1985, the Department finally responded to congressional requests for revised recommendations for funding and resources necessary in fiscal year 1986 for the Public Health Service [PHS] to deal effectively with this problem. The FDA will use these additional funds in part to expand activities related to the blood test for antibodies to the HTLV-III virus, which is believed to cause AIDS, to ensure the safety of the Nation's blood supply. Other FDA activities include studying the possibility of AIDS transmission through food, and evaluating diagnostic and treatment products, including an eventual vaccine against the HTLV-III virus.

There have been almost 4,000 AIDS cases reported thus far in 1985 alone. Over 1,000 cases have been reported in New York City, which has had the greatest number of AIDS cases in the country, 33 percent. According to the Centers for Disease Control [CDC], there have been 11,871 known cases of AIDS in the United States to date and the number of cases is doubling every year. Seventy-five percent of AIDS patients diagnosed prior to January 1983 are now dead.

At present, there is no treatment or cure for AIDS. Clearly, it is vital that we provide the necessary resources to fight this disease, for AIDS victims, for their families, and to protect the public health. The funds provided in this amendment are within the section 302(b) allocation. This is a small price to pay for a potentially great breakthrough in our efforts to fight AIDS. I urge my colleagues to support this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Mississippi [Mr. WHITTEN].

The amendment was agreed to.

The CHAIRMAN. Are there further amendments to title V?

If not, the Clerk will read.

The Clerk read as follows:

TITLE VI—GENERAL PROVISIONS

SEC. 601. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive Order issued pursuant to existing law.

SEC. 602. Within the unit limit of cost fixed by law, appropriations and authorizations made for the Department of Agriculture for the fiscal year 1986 under this Act shall be available for the purchase, in addition to those specifically provided for, of not to exceed seven hundred thirty-four (734) passenger motor vehicles of which seven hundred six (706) shall be for replacement only, and for the hire of such vehicles.

SEC. 603. Funds in this Act available to the Department of Agriculture shall be available for uniforms or allowances therefore as authorized by law (5 U.S.C. 5901-5902).

SEC. 604. Not less than $1,500,000 of the appropriations of the Department of Agriculture in this Act for research and service work authorized by the Acts of August 14, 1946, July 28, 1954, and September 6, 1958 (7 U.S.C. 427, 1621-1629; 42 U.S.C. 1891-1893), shall be available for contracting in accordance with said Acts.

SEC. 605. No part of the funds contained in this Act may be used to make production or other payments to a person, persons, or corporations who harvest or knowingly permit to be harvested for illegal use, marihuana, or other such prohibited drug-producing plants on any part of lands owned or controlled by such persons or corporations.

SEC. 606. Advances of money from any appropriation in this Act for the Department of Agriculture may be made by authority of the Secretary of Agriculture to chiefs of field parties.

SEC. 607. The cumulative total of transfers to the Working Capital Fund for the purpose of accumulating growth capital for data services and National Finance Center operations shall not exceed $2,000,000: *Provided*, That no funds in this Act appropriated to an agency of the Department shall be transferred to the Working Capital Fund without the approval of the agency administrator: *Provided further*, That not to exceed $40,001,000 shall be charged against the Working Capital Fund for personnel compensation and benefits.

SEC. 608. New obligational authority provided for the following appropriation items in this Act shall remain available until expended: Public Law 480; Mutual and Self-Help Housing; Watershed and Flood Prevention Operations; Resource Conservation and Development; Animal and Plant Health Inspection Service, Buildings and Facilities; Agricultural Stabilization and Conservation Service Salaries and Expenses funds made available to county committees; the Federal Crop Insurance Corporation Fund; and Buildings and Facilities, Food and Drug Administration.

SEC. 609. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 610. Not to exceed $50,000 of the appropriation available to the Department of Agriculture in this Act shall be available to provide appropriate orientation and language training pursuant to Public Law 94-449.

SEC. 611. Notwithstanding any other provision of law, employees of the agencies of the Department of Agriculture, including employees of the Agricultural Stabilization and Conservation county committees, may be utilized to provide part-time and intermittent assistance to other agencies of the Department, without reimbursement, during periods when they are not otherwise full utilized, and ceilings on full-time equivalent staff years established for or by the Department of Agriculture shall exclude overtime as well as staff years expended as a result of carrying out programs associated with natural disasters, such as forest fires, droughts, floods, and other acts of God.

SEC. 612. Funds provided by this Act for personnel compensation and benefits shall be available for obligation for that purpose only.

SEC. 613. No part of any appropriation contained in this Act shall be expended by any executive agency, as referred to in the Office of Federal Procurement Policy Act (41 U.S.C. 401 et seq.), pursuant to any obligation for services by contract, unless such executive agency has awarded and entered into such contract as provided by law.

SEC. 614. None of the funds appropriated or otherwise made available by this Act

shall be available to implement, administer, or enforce any regulation which has been disapproved pursuant to a resolution of disapproval duly adopted in accordance with the applicable law of the United States.

SEC. 615. Certificates of beneficial ownership sold by the Farmers Home Administration in connection with the Agricultural Credit Insurance Fund, Rural Housing Insurance Fund, and the Rural Development Insurance Fund shall be not less than 75 per centum of the value of the loans closed during the fiscal year.

SEC. 616. No funds appropriated by this Act may be used to pay negotiated indirect cost rates on cooperative agreements or similar arrangements between the United States Department of Agriculture and nonprofit institutions in excess of 10 per centum of the total direct cost of the agreement when the purpose of such cooperative arrangements is to carry out programs of mutual interest between the two parties. This does not preclude appropriate payment of indirect costs on grants and contracts with such institutions when such indirect costs are computed on a similar basis for all agencies for which appropriations are provided in this Act.

SEC. 617. None of the funds in this Act shall be used to carry out any activity related to phasing out the Resource Conservation and Development Program.

SEC. 618. None of the funds in this Act shall be used to prevent or interfere with the right and obligation of the Commodity Credit Corporation to sell surplus agricultural commodities in world trade at competitive prices as authorized by law.

SEC. 619. Notwithstanding any other provision of this Act, commodities acquired by the Department in connection with Commodity Credit Corporation and section 32 price support operations may be used, as authorized by law (15 U.S.C. 714c and 7 U.S.C. 612c), to provide commodities to individuals in cases of hardship as determined by the Secretary of Agriculture.

SEC. 620. During fiscal year 1986, notwithstanding any other provision of law, no funds may be paid out of the Treasury of the United States or out of any fund of a Government corporation to any private individual or corporation in satisfaction of any assurance agreement or payment guarantee or other form of loan guarantee entered into by any agency or corporation of the United States Government with respect to loans made and credits extended to the Polish People's Republic, unless the Polish People's Republic has been declared to be in default of its debt to such individual or corporation or unless the President has provided a monthly written report to the Speaker of the House of Representatives and the President of the Senate explaining the manner in which the national interest of the United States has been served by any payments during the previous month under loan guarantee or credit assurance agreement with respect to loans made or credits extended to the Polish People's Republic in the absence of a declaration of default.

SEC. 621. None of the funds in this Act shall be available to reimburse the General Services Administration for payment of Standard Level User Charges in excess of the amounts specified in this Act.

SEC. 622. In fiscal year 1986, the Secretary of Agriculture shall initiate construction on not less than twenty new projects under the Watershed Protection and Flood Prevention Act (Public Law 566) and not less than five new projects under the Flood Control Act (Public Law 534).

SEC. 623. Funds provided by this Act may be used for translation of publications of the Department of Agriculture into foreign languages when determined by the Secretary to be in the public interest.

SEC. 624. None of the funds appropriated by this or any other Act may be used to relocate the Hawaii State Office of the Farmers Home Administration from Hilo, Hawaii, to Honolulu, Hawaii.

SEC. 625. Provisions of law prohibiting or restricting personal services contracts shall not apply to veterinarians employed by the Department to take animal blood samples, test and vaccinate animals, and perform branding and tagging activities on a fee-for-service basis.

SEC. 626. None of the funds provided in this Act may be used to reduce programs by establishing an end-of-year employment ceiling on full-time equivalent staff years below the level set herein for the following agencies: Farmers Home Administration, 12,400; Agricultural Stabilization and Conservation Service, 2,550; and Soil Conservation Service, 14,177.

SEC. 627. Funds provided in this Act may be used for one-year contracts which are to be performed in two fiscal years so long as the total amount for such contracts is obligated in the year for which the funds are appropriated.

SEC. 628. Funds appropriated by this Act shall be applied only to the objects for which the appropriations were made except as otherwise provided by law, as required by 31 U.S.C. 1301.

TITLE VI
General Provisions 55

Mr. WHITTEN (during the reading). Mr. Chairman, I ask unanimous consent that title VI be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The CHAIRMAN. Are there any points of order or amendments to title VI?

The Chair hears none.

Mr. WHITTEN. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with an amendment, with the recommendation that the amendment be agreed to and that the bill, as amended, do pass.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker pro tempore [Mr. MURTHA] having assumed the chair, Mr. VENTO, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3037) making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1986, and for other purposes, had directed him to report the bill back to the House with an amendment, with the recommendation that the amendment be agreed to and that the bill, as amended, do pass.

The SPEAKER pro tempore. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER pro tempore. The question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the yeas appeared to have it.

Mr. LUNGREN. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device and there were—yeas 354, nays 71, not voting 8, as follows:

NOT VOTING—8

Donnelly	Gekas	Monson
Downey	Hefner	Studds
Gejdenson	Holt	

□ 1700

The Clerk announced the following pair:

On this vote:

Mr. Gejdenson for, with Mr. Monson against.

Messrs. GOODLING, LUKEN, and FRANK changed their votes from "yea" to "nay."

Mr. ANTHONY and Mr. SWEENEY changed their votes from "nay" to "yea".

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF H.R. 2121, COASTAL ZONE MANAGEMENT REAUTHORIZATION ACT OF 1985

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 214 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 214

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 2121) to provide for the reauthorization of the Coastal Zone Management Act of 1972, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Merchant Marine and Fisheries, the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Merchant Marine and Fisheries now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, and each section of said substitute shall be considered as having been read. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

□ 1710

The SPEAKER pro tempore. The gentleman from Massachusetts [Mr. MOAKLEY] is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, I yield the customary 30 minutes, for the purpose of debate only, to the gentleman from Mississippi [Mr. LOTT], and pending that I yield myself such time as I may consume.

Mr. Speaker, House Resolution 214 is an open rule providing for the consideration of H.R. 2121, the Coastal Zone Management Reauthorization Act of 1985. The rule provides for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Merchant Marine and Fisheries.

The rule makes in order an amendment in the nature of a substitute which is recommended by the Committee on Merchant Marine and Fisheries and is now printed in the bill. This amendment in the nature of a substitute shall be considered as original text for the purpose of amendment under the 5-minute rule and is to be considered by section with each section to be considered as read. Finally, Mr. Speaker the rule provides for one motion to recommit with or without instructions.

Mr. Speaker, H.R. 2121 is the bill to reauthorize the Coastal Zone Management Act. This act was first established in 1972 to encourage coastal States and communities to consolidate their efforts in the management of coastal resources, including natural, commercial, and ecological resources. H.R. 2121, the Coastal Zone Management Reauthorization Act of 1985, would authorize the appropriation of funds for fiscal years 1986 through 1991.

Mr. Speaker, the act would provide financial incentives for States to develop coastal management programs. The two main incentives that Congress provided in the Coastal Zone Management Act are Federal financial assistance of up to 80 percent of program cost for developing and implementing State coastal zone management programs, and providing grants to States to assist in the administration of federally approved programs.

Since the passage of the Coastal Zone Management Act, all 35 eligible States and territories have participated and 28 have voluntarily developed federally approved programs. The involvement of these States is the reason why the Coastal Zone Management Act has been so successful in accomplishing its goals.

Mr. Speaker, other provisions of H.R. 2121 would allow the Secretary of Commerce to make grants under sections 306 and 306A of the bill to coastal States, provided those grants are matched by a State contribution of 20 percent of the grant for fiscal year 1986, 30 percent of the grant for fiscal year 1987, 40 percent of the grant for fiscal year 1988, and 50 percent of the grant for each year thereafter. This phased decrease in the Federal share of grants would result in a 50/50 State-Federal partnership beginning in fiscal year 1989 and beyond. This provision in the bill would reflect the Committee on Merchant Marine and Fisheries' position that one of the major purposes of the act is to get coastal States to develop their own coastal management programs.

Mr. Speaker, the cost of these grant programs would be $40 million in fiscal year 1986 and would be scaled down to $35 million a year for fiscal years 1989 through 1991. This reduction in the authorization level will result in a savings of $99 million to the Federal Treasury over the 6 years. This reduction would require the States to pick up the cost of administering their coastal management programs over the period covered by this legislation.

Mr. Speaker, H.R. 2121 also changes the structure of the national program protecting inland salt water bodies. Through this program over 261,000 acres of salt water marshes, and shorelines, are being preserved for long-term research and public educational activities.

Mr. Speaker, I would like to commend the gentleman from North Carolina [Mr. JONES], and also members of both sides of the Committee on Merchant Marine and Fisheries for their bipartisan effort in bringing a bill to the House floor that will continue to protect our Nation's coastal areas.

Mr. Speaker, I urge adoption of House Resolution 214 so that the House may proceed on this important legislation.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. LOTT. Mr. Speaker, House Resolution 214 provides for the consideration of H.R. 2121 which reauthorizes the Coastal Zone Management Act of 1972 for 6 years. The rule provides for 1 hour of general debate divided between the chairman and ranking minority member of the Committee on Merchant Marine and Fisheries.

Following general debate, the bill will be considered for amendment under the 5-minute rule with the committee amendment in the nature of a substitute considered as an original bill for the purpose of amendment. Finally, the rule provides for the motion to recommit with or without instructions.

Mr. Speaker, H.R. 2121 authorizes the appropriation of funds for fiscal years 1986 through 1991 to carry out the purposes of the Coastal Zone Management Act. The authorization levels are on a declining scale to reflect the progress individual coastal States have made in developing and implementing their own management programs.

Under the provisions of H.R. 2121, the annual authorization level for basic State coastal zone management grants for administration of coastal management programs is $40 million in fiscal year 1986, gradually declining to $35 million annually in fiscal years 1989 through 1991. The bill also includes substantive changes in the act to require States to provide funding for a greater share of coastal management program costs. Under current

law, the Federal Government is responsible for up to 80 percent of such costs. H.R. 2121 would reduce the Federal share to no more than 50 percent in each year after fiscal year 1988. H.R. 2121 also reauthorizes Federal grants to States for low-cost construction and port development and the estuarine reserve system at $9 million a year.

Mr. Speaker, this authorization will continue the States' longstanding efforts to rejuvenate America's coasts, which have an effect on every State in the Nation. Today, our oceans and Great Lakes are home to more than one out of every two Americans. By the year 2000, experts predict that nearly 80 percent of the U.S. population will live within an hour's drive of a seashore, lakefront or coastal area. The coastal States' record of success as caretakers of the Nation's vast coastal resources is proof that the Coastal Zone Management Act is working, and working remarkably well. Great progress has been made in managing coastal development, promoting economic development, restoring urban waterfronts, managing coastal resources, improving public access, enhancing marine and freshwater resources, working with Federal agencies, protecting lives and property—the list goes on and on.

Mr. Speaker, since passage of the Coastal Zone Management Act, all 35 eligible States and territories have participated and 28, including my own State of Mississippi, have developed federally approved programs. In passing the act in 1972, the overwhelming vote in favor of the final bill—376 to 6 in the House and 68 to 0 in the Senate—signaled a strong congressional mandate for national coastal zone management.

We are entering a crucial period where activities in the Nation's coastal regions are intensifying, requiring skillful management from all sectors, public and private. The Coastal Zone Management Act is the only comprehensive tool which allows Federal, State, and local governments to cooperatively manage the beaches, bays, wetlands, ports and harbors, estuaries, islands, and fisheries of our Nation's coastal areas. If these grants are eliminated, most States would not have the financial resources to adequately administer their coastal management programs or meet the act's important national policy objectives.

Mr. Speaker, this bill was reported by unanimous voice vote and there were no additional views filed. I therefore strongly urge the adoption of this rule so we can proceed with the consideration of this very important Coastal Zone Management Reauthorization Act.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. MOAKLEY. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF H.R. 10, NATIONAL DEVELOPMENT INVESTMENT ACT

Mr. BEILENSON. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 223 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 223

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 10) to amend the Public Works and Economic Development Act of 1965 and the Appalachian Regional Development Act of 1965, and the first reading of the bill shall be dispensed with. All points of order against the consideration of the bill for failure to comply with the provisions of section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) are hereby waived. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Public Works and Transportation, the bill shall be considered for amendment under the five-minute rule by titles instead of by sections, and each title shall be considered as having been read. Immediately after the enacting clause of the bill is read, it shall be in order to consider, before any other amendments, the amendments printed in the Congressional Record of July 11, 1985, by Representative Howard of New Jersey, if offered by Representative Howard or his designee, said amendments shall be considered en bloc and shall be in order although amending portions of the bill not yet read for amendment, and said amendments shall not be subject to a demand for a division of the question in the House or in Committee of the Whole. Said amendments shall not be subject to amendment but shall be debatable for not to exceed twenty minutes, to be equally divided and controlled by the proponent of the amendment and a Member opposed thereto. If said amendments are adopted, it shall be in order to consider the bill, as modified by said amendments, which shall be considered to have been adopted in the House and in the Committee of the Whole, as an original bill for the purpose of amendment under the five-minute rule by titles instead of by sections, and each title shall be considered as having been read. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments, as may have been adopted, and the previous questions shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

□ 1720

The SPEAKER pro tempore. The gentleman from California [Mr. BEILENSON] is recognized for 1 hour.

Mr. BEILENSON. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentleman from Tennessee [Mr. QUILLEN] pending which I yield myself such time as I may consume.

House Resolution 223 is the rule providing for the consideration of H.R. 10, the National Development Investment Act and Appalachian Regional Development Act Amendments of 1985. The rule waives section 402(a) of the Congressional Budget Act against consideration of the bill and provides for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the committee on Public Works and Transportation. The rule further provides that the bill will be read for amendment by titles rather than sections in order that its consideration may be expedited.

The rule also makes in order the consideration of amendments by the gentleman from New Jersey and chairman of the Public Works Committee [Mr. HOWARD] that were printed in the CONGRESSIONAL RECORD of July 11, 1985. The amendments are to be considered en bloc and are to be the first amendments considered after the conclusion of general debate. The chairman's amendments are to be debatable for no more than 20 minutes and shall not be subject to amendment. House Resolution 223 provides that if the chairman's amendments are adopted by the House. The bill as modified by those amendments shall be considered as original text during proceedings under the 5-minute rule. The rule also makes in order the consideration of one motion to recommit.

Mr. Speaker, section 402(a) of the Budget Act, as Members know, prohibits the consideration of any measure that authorizes the enactment of appropriations for a fiscal year if the measure is not reported from the committees to which it was referred by May 15 preceding the fiscal year for which the authorization is made. H.R. 10, which authorizes appropriations for the coming fiscal year and for ensuing fiscal years, was referred to the Committee on Banking, Finance, and Urban Affairs as well as the Committee on Public Works. While Public Works did in fact file its report on May 15 of this year, the Banking Committee chose to take no action on the bill. Consequently, consideration of H.R. 10 by the House would be in technical violation of section 402(a) of the Budget Act.

Mr. Speaker, my colleagues will be interested to know that on June 6 of this year, the gentleman from Rhode Island [Mr. ST GERMAIN], who chairs

the Banking Committee, wrote the chairman of the Rules Committee requesting that a rule be granted for H.R. 10 and indicating that the Banking Committee's failure to report in no way constitutes an attempt to delay the bill's consideration. In addition, the gentleman from Pennsylvania [Mr. GRAY] indicated in a letter to the Rules Committee chairman that the Budget Committee has no objection to waiving this technical violation of the Budget Act. I make these points to assure my colleagues that the waiver is recommended by the Rules Committee in light of the fact that there appears to be no opposition to its adoption.

Mr. Speaker, the amendments which Chairman HOWARD will offer to the bill will have the effect of lowering its authorization levels to those assumed in the first concurrent resolution on the budget for fiscal year 1986 adopted by the House on May 23 of this year. The rule before the House would ensure that if the amendments are adopted, Members would retain the opportunity to further amend affected provisions of the bill.

H.R. 10, which was reported by the Committee on Public Works and Transportation without amendment, consists of two titles. Title I, the National Development Investment Act, authorizes and consolidates programs of the Economic Development Administration; $530 million are authorized for each of fiscal years 1986, 1987, and 1988 for purposes of financing development projects in economically distressed areas in the United States and for the formulation of economic development plans for such areas.

Title II, the Appalachian Regional Development Act Amendments of 1985, authorizes $723 million over 5 years for the nonhighway programs which are administered by the Appalachian Regional Commission in order to promote economic development in the severely distressed region which it serves. The bill also authorizes $2 billion for fiscal years 1986 through 1992 to complete the Appalachian Highway System—a step which is considered crucial to the area's development. Should the House adopt the amendments to be offered en bloc by Chairman HOWARD, the total authorization levels in the bill will be reduced significantly for all programs included.

Both titles also include a variety of statutory modifications designed to improve the efficiency and effectiveness of the programs of the Economic Development Administration and the Appalachian Regional Commission. One example of such an amendment is a requirement that half of grant funds appropriated for EDA Administration be spent by the end of the seventh month of the fiscal year for which they were appropriated. The bill also requires that the Federal share of any project of the ARC—with the exception of highway construction—may not exceed 50 percent.

The open rule now before the House, Mr. Speaker assures all Members the opportunity to offer germane amendments during the consideration of H.R. 10. I urge my colleagues to adopt the resolution so that we can begin to consider the important issues which are addressed in the bill.

Mr. QUILLEN. Mr. Speaker, I yield myself as much time as I may use.

Mr. Speaker, the National Development Investment Act is an important bill. The rule has been ably explained, and I will not be redundant.

Mr. Speaker, we know that the administration wants to do away with the Appalachian Regional Commission and with the Economic Development Administration. I was on the Public Works Committee and helped draft the legislation to create the Appalachian Regional Commission. It has done a great job for the Appalachian area. I live in the heart of it. The Appalachian Regional Commission has opened up access to that area, bringing on economic development, and it has served a good purpose.

I would urge the Members of this House to consider seriously the continuation of these two programs as outline by the Committee on Public Works and Transportation. I think it is a fine thing that we do this. Obviously the funds have been reduced. But the bill brings back into focus the original purpose of the Appalachian Regional Commission and the Economic Development Administration. It does what it should do, and that is to create jobs and construction, and the money is not wasted.

Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania [Mr. CLINGER].

Mr. CLINGER. Mr. Speaker, this is a good rule. I would point out that the bill that we will be bringing to the floor under this rule contains a committee amendment which would make the authorization in this bill consistent with the House budget resolution.

In fact, Mr. Speaker, the amendment that we will bring exceeds anything that we have done yet in terms of a freeze, because the House budget resolution would call for a 10-percent cut in these programs, so what we are doing here is really a freeze, plus a 10-percent cut. So that, I think, would bring us, and does bring us, into line with the House budget resolution.

Mr. Speaker, this bill constitutes a significant reform of the legislation we have had in the past under the Economic Development Administration and the Appalachian Regional Commission. Criticisms were made last week of the fact that vast amounts of the country were eligible for aid under the EDA legislation, up to 80 percent. This bill would substantially correct that abuse, and clearly it is an abuse. This would limit eligibility. It would bring the eligible areas down to those that are really most needful, the ones that are hurting the most, the ones that need some minimal investment at the Federal level in order to get their economic house in order and to begin to create the jobs that are necessary in those pockets of poverty throughout our country. So eligibility is limited under this bill.

The second thing this does is it addresses another criticism that was made of the bill, which was that the loan program was out of control, that we had vast numbers of loans that were in default or about to go into default. In essence, we recognize that criticism, and we have restructured the program so that the loan program that would be in existence would be strictly administered at the local level. They are in a much better position to monitor these loans and determine who should be receiving help and who should not, and then monitoring and making sure that the loans are kept current. So we have reformed that element of the bill.

□ 1730

We do accentuate planning and I would point out that it is because of the EDA that we have in place throughout this country planning people who are able and they are in place to help, particularly in our rural areas, to help them come up with and devise economic strategies for their areas. These people are very creative. They are knowledgeable. The expertise is there and we would continue that kind of support.

Last week, Mr. Speaker, we had voted on this issue, on the issue of EDA, and the vote was 318 against an amendment to delete all funding for EDA and 95 votes in favor. I think that demonstrated broad-based support for this legislation.

We also heard a number of success stories of things that have been accomplished through this agency, success stories that bespeak, I think, the fact that this has been an effective agency. It has created jobs. It has preserved jobs that otherwise would have disappeared and it has done so with a very, very modest investment of Federal dollars.

This is not a huge boondoggle, a huge pork-barrel program. It is a very targeted program and it will be even more targeted in the future.

Mr. Speaker, I think this is a good bill that we are considering. It is a much tighter bill. It is a targeted bill. It is a focused program. It is going to be built on the success stories that we have had in the past, while eliminating those areas and programs that have not proven effective.

It recognizes, Mr. Speaker, that there is a continuing role for the Federal Government, albeit a modest one, in the economic development problems of this country.

Again, it is a good rule and I urge support of the Members for it.

Mr. QUILLEN. Mr. Speaker, I urge adoption of the rule so that the House can get down to business and pass the legislation when it is brought to the floor.

Mr. Speaker, I have no further requests for time.

Mr. BEILENSON. Mr. Speaker, I urge my colleagues to support the rule.

Mr. Speaker, I have no further request for time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. QUILLEN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 406, nays 12, not voting 15, as follows:

[Roll No. 255]

Messrs. STUMP, HUNTER, and ARMEY changed their votes from "yea" to "nay."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.J. RES. 187, APPROVING "COMPACT OF FREE ASSOCIATION"

Mr. PEPPER, from the Committee on Rules, submitted a privileged report (Rept. No. 99-224) on the resolution (H. Res. 235) providing for the consideration of the joint resolution (H.J. Res. 187) to approve the "Compact of Free Association," and for other purposes, which was referred to the House Calendar and ordered to be printed.

NATIONAL DISABILITY IN ENTERTAINMENT WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 86) to designate the week of July 25, 1985 through July 31, 1985, as "National Disability in Entertainment Week," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but I simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution as follows:

S.J. RES. 86

Whereas the thirty six million people with disabilities in our Nation still face attitudinal barriers that prevent the full exercise of their civil liberties;

Whereas the entertainment industry is a powerful educational tool that has a significant impact on the images the Nation perceives;

Whereas the entertainment industry has been making strides in increasing both the quantity and quality of the portrayals and employment of people with disabilities in the media;

Whereas the continued involvement of the entertainment industry is vital to changing the stereotypes of people with disabilities;

Whereas the entertainment industry, the Federal Government, and the Nation should recognize the great potential for contribution from those with disabilities: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of July 25, 1985, through July 31, 1985, is designated as "National Disability in Entertainment Week" and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe the week with appropriate programs, ceremonies, and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

LUPUS AWARENESS WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 57) to designate the week of October 20, 1985, through October 26, 1985, as "Lupus Awareness Week," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker reserving the right to object, I do not object, but simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, under my reservation, I would like to yield to the gentleman from New York [Mr. GILMAN].

Mr. GILMAN. Mr. Speaker, I am pleased to take this opportunity to express my strong support for Senate Joint Resolution 57, which designates October 20 through 26 as "Lupus Awareness Week." I would also like to thank the gentleman from Pennsylvania [Mr. BORSKI] for sponsoring the House companion measure, House Joint Resolution 197, which I am proud to have cosponsored.

It is appropriate that we consider this resolution today, while concerned people and members of lupus awareness organizations from across the United States are attending a Lupus Convention in Dallas, TX. The convention began on July 13 and will last until the 27th. Our consideration of Senate Joint Resolution 57 will, I am certain, bolster the spirit and hope of all those in attendance who have dedicated their time and energy to this worthy cause.

The disease, lupus erythematosus, is an immunological disorder characterized by chronic inflammation of the connective tissues. Its symptoms include severe pain in the joints, and increased susceptibility to infections, rashes, and bruises. Sadly enough, these symptoms are worsened by exposure to sunlight, thus depriving lupus victims of the mental and sometimes physical healing power of the Sun. Although lupus is usually restricted to the extremities, it can also cause damage to major body organs, and in worst cases, lupus can even cause death.

Lupus erythematosus affects a staggering 50,000 people each year, but unfortunately is less understood than multiple sclerosis, muscular dystrophy, and cystic fibrosis, which claim less victims per year. Although these three diseases are less widespread than lupus, they are no less tragic. All four diseases, including lupus, are presently incurable. However, with lupus the problem of not having a cure is compounded by a significant lack of awareness. Although lupus erythematosus is not a rare condition, doctors who are unfamiliar with the disease often misdiagnose lupus victims who could have been effectively treated to reduce the severity of the condition.

Through the work of the Lupus Foundation of America, Inc., its constituent chapters and other concerned individuals, much progress has been made to support lupus victims and their families, to encourage funding for research and to increase awareness of lupus. In specific, I am familiar with the work of the Rockland and Orange Chapter of the Lupus Foundation of America, Inc., an all-volunteer health organization dedicated to lupus and located in my congressional district.

In spite of the progress that has already been made to increase the awareness of lupus erythematosus, there is still much work that needs to be done to educate the public, the Government, and most especially those in the medical profession about the incidence of lupus. Accordingly, I urge my colleagues to join in support of this measure. By passing Senate Joint Resolution 57, we can add to the progress that has already been achieved by organizations and people such as those currently gathered in Dallas at the Lupus Convention by giving them something to build upon, talk about, and hope for.

Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I urge my colleagues to fully support the measure.

● Mr. BORSKI. Mr. Speaker, I rise in support of Senate Joint Resolution 57, which designates the week of October 20–26, 1985, as "Lupus Awareness Week." I am proud to have sponsored this resolution, and would like to express my thanks to the many Members who joined me as cosponsors.

Lupus erythematosus, or lupus, is a debilitating disease of the body's immune system, and there is no cure yet known for it. The body's immune system attacks healthy tissue, resulting in severe inflammation and scarring. Lupus may only affect the skin in some victims, while in others it may damage major body organs. Lupus can cause kidney and heart disease, pleurisy, and pneumonia. In some cases, the disease may result in death.

Lupus affects over 500,000 Americans, with more than 50,000 new cases diagnosed yearly. While the disease can affect people of all ages, over 70 percent of its victims are women, often in their child-bearing years.

Lupus is largely unknown among the general public, even though it is more common than multiple sclerosis, muscular dystrophy, and leukemia. Further, it is often misdiagnosed, preventing victims from receiving the treatments that could possibly reduce the severity of the disease.

For these reasons, it is critical to increase the awareness of the general public to the symptoms, diagnosis, and possible prevention of lupus. "Lupus Awareness Week" is an important part of the effort to increase public awareness and promote early diagnosis and improved treatment.

I want to thank the Lupus Foundation of America for their leadership in bringing this issue to the attention of Congress. The Lupus Foundation is aggressively leading the fight to combat and ultimately defeat this illness.

It is my hope that this resolution can mark a unification of our concern and our efforts, on the part of Congress, the Lupus Foundation, and the general public, to finding an end to one of the most baffling, painful and injurious diseases now confronting the American public. Lupus Awareness Week is a heartening step in the right direction.●

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 57

Whereas Lupus Erythematosus is a disease of unknown cause that affects over five-hundred thousand people in the United States, 90 percent of whom are women in their childbearing years;

Whereas Lupus Erythematosus, though not a rare disease, is unfamiliar even to some physicians which may result in the

disease being misdiagnosed or diagnosed too late;

Whereas Lupus Erythematosus in the most severe form can be fatal;

Whereas The Lupus Foundation of America, Inc., its constitutent chapters, and other voluntary health organizations are established throughout the United States to serve and support victims of lupus and their families, encourage funding for research and increase public awareness; and

Whereas the public and the Federal Government are not sufficiently aware of the incidence of Lupus Erythematosus: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of October 20, 1985, through October 26, 1985, is designated as "Lupus Awareness Week" and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe the week with appropriate programs, ceremonies, and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

RECOGNIZING BOTH PEACE CORPS VOLUNTEERS AND THE PEACE CORPS ON THE AGENCY'S 25TH ANNIVERSARY

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution (H.J. Res. 305) to recognize both Peace Corps volunteers and the Peace Corps on the Agency's 25th anniversary, 1985–86, and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object but simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, under my reservation, I yield to the gentleman from Michigan [Mr. PAUL HENRY], who is the chief sponsor of House Joint Resolution 305.

Mr. HENRY. I thank the gentleman for yielding.

I simply point out, Mr. Speaker, that this resolution is a resolution of commendation for roughly 120,000 volunteers who have served in the Peace Corps in its 25-year history in over 90 countries across the world.

There were five former volunteers who presently serve in this body who joined in cosponsoring this resolution of tribute. I thank the gentleman from New York [Mr. GARCIA] for the speedy consideration of the resolution.

Mr. HANSEN. Mr. Speaker, under my reservation, I would yield to the gentleman from New York [Mr. GILMAN].

Mr. GILMAN. Mr. Speaker, I rise today to encourage my colleagues to support House Joint Resolution 305, legislation honoring the 25th anniversary of the Peace Corps. As a cosponsor of this resolution, I commend the gentleman from Michigan [Mr. HENRY] for introducing this commemorative legislation in the House. It is especially appropriate that the gentleman from Michigan brings this bill before us, since it was in a speech given at the University of Michigan by the then-Presidential candidate, John F. Kennedy, that the concept and dream of a Peace Corps was first introduced.

President Kennedy's dream was realized when the Peace Corps was established by the Peace Corps Act of 1961. The Peace Corps was later made an independent agency by title VI of the International Security and Development Cooperation Act of 1981.

The corps has experienced tremendous growth since its inception. The number of volunteers serving in the Peace Corps has grown from the meager 864 that served in the first year of operation to more than 5,000 volunteers today. Our Peace Corps volunteers range in age from 21 to 83 years, serving in 60 countries throughout Africa, Latin America, Asia, the Near East, and the Pacific. More than 120,000 Americans have volunteered during the 25 years of the Peace Corps' existence.

Peace Corps volunteers are trained for a 9-to-14-week period in the appropriate local language, the technical skills necessary for their particular job, and the cross-cultural knowledge needed to adjust to a society with customs and attitudes different from their own. These volunteers serve usually for a period of 2 years, working primarily in the areas of agriculture, rural development, health, and education, while living among the people with whom they work. These are 24-hour jobs that have generated the well-deserved Peace Corps slogan "It's the toughest job you'll ever love."

This important work is made possible solely through the efforts of the Peace Corps volunteers. Let us celebrate the 25th anniversary of the Peace Corps by recognizing this demonstrated caring and desire of the American people to help others help themselves.

The year-long celebration of the 25th anniversary of the Peace Corps will begin with a symposium on October 21, 1985, at the University of Michigan. The theme of this symposium, and the many other symposiums scheduled throughout the year is "The U.S. Stake in the Developing World."

Accordingly, I urge my colleagues to join us in supporting House Joint Resolution 305 to honor the Peace Corps. It is vitally important that we show appreciation of the tremendous contributions made to developing countries by the thousands of Peace Corps volunteers by adopting this resolution.

Mr. Speaker, I thank the gentleman from Utah.

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 305

Whereas the United States Peace Corps is beginning its twenty-fifth year of providing volunteers to serve in countries of the developing world in helping people help themselves in their reach for a better life;

Whereas over one hundred and twenty thousand Americans have served in the Peace Corps in over ninety countries around the world in programs that have significantly added to bridges of understanding between the people of the United States and the peoples of the countries it has been privileged to serve;

Whereas Peace Corps volunteers have returned to their communities enriched by the experience, more knowledgeable of the world and the challenges of building a lasting peace;

Whereas Peace Corps volunteers continue to maintain open channels of communication with their friends in the country where they served, thereby continuing to build solid commitments of understanding; and

Whereas the response of Americans to Peace Corps' call for service in seeking long-term solutions to the complex human problems of hunger, poverty, illiteracy, and disease continue to exceed its recruitment requirements: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the period October 1, 1985, through September 30, 1986, shall be the official time set aside to reflect on the achievements of the Peace Corps during its twenty-five years, as well as to consider innovative ways that the talents and expertise of its volunteers and other bilateral volunteer programs might be used in the future; the President is authorized and requested to issue a proclamation setting forth October 1, 1985, through September 30, 1986, as a period of time to honor Peace Corps volunteers past and present, and reaffirm our Nations' commitment to helping people in the developing world help themselves.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

□ 1800

MULE APPRECIATION DAY

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service to be discharged from further consideration of the joint resolution (H.R. Res.

76) to designate October 26, 1985, as "Mule Appreciation Day", and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The clerk read the joint resolution, as follows:

H.J. RES. 76

Whereas on October 26, 1785, the father of our country, George Washington, received the first jacks from King Charles III of Spain to breed the first American mules;

Whereas mules bred from these jacks began a tradition of service to our Nation in agriculture, mining, transportation, territorial exploration, war, and countless other endeavors;

Whereas mules have been such an important part in the building of this country; and

Whereas this is the bicentennial anniversary of the arrival of the first mules in America: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That October 26, 1985, is hereby designated as "Mule Appreciation Day". The President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to recognize October 26, 1985, as "Mule Appreciation Day".

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the joint resolutions just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 2817

Mr. EVANS of Illinois. Mr. Speaker, I ask unanimous consent to have my name withdrawn as a cosponsor of H.R. 2817.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

TEXT OF PROPOSED AGREEMENT BETWEEN THE UNITED STATES AND THE PEOPLE'S REPUBLIC OF CHINA CONCERNING PEACEFUL USES OF NUCLEAR ENERGY—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 99-86)

The SPEAKER pro tempore laid before the House the following message from the President of the United States, which was read and, together with the accompanying papers, without objection, referred to the Committee on Foreign Affairs and ordered to be printed:

(For message, see proceedings of the Senate of today, Wednesday, July 24, 1985.)

CITY DEMONSTRATES NEED FOR FLOOD CONTROL PROJECT

(Mr. BOULTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOULTER. Mr. Speaker, yesterday the citizens of Wichita Falls, TX, overwhelmingly demonstrated their support for the Lake Wichita-Holliday Creek Flood Control Project. Not only did they demonstrate their support, but they also demonstrated true financial commitment. Yesterday the citizens voted to issue municipal bonds to fund a do it yourself flood control plan in the amount of $9 million. Mr. Speaker, for over 40 years Wichita Falls has been plagued by severe flooding and the bureaucratic Federal Government has failed to provide any assistance. Even though last week's House passage of the 1986 appropriations for water projects brings funding closer, the citizens of Wichita Falls are tired of waiting. They have said enough is enough, and are going ahead with a city financed plan that will provide some, though not all, of the protection they need.

I commend the citizens for their intiative. Wichita Falls has shown both the community spirit to get things done and the necessary commitment to justify their request for Federal assistance to complete this project. With Federal funding to complement the city's input, the citizens will be protected to the level of a 100-year-flood. This will enable the city to continue to grow and prosper, thus creating jobs and economic opportunity. I urge my colleagues to act swiftly on legislation to make this project a reality.

THE UNANIMOUS DECLARATION OF DEPENDENCE ON MARINE RESOURCES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas [Mr. ALEXANDER] is recognized for 5 minutes.

● Mr. ALEXANDER. Mr. Speaker, when this Nation declared its independence in 1776, we did so with a complete faith in the greatness of the American spirit and the ingenuity of the American mind. As the needs of our Nation grew, so did demands on our resources.

Today we find many of those traditional resources near depletion. In the last century man consumed half the Earth's fossil fuels. The remainder will be gone within the next 50 years. Almost half of the world's population is malnourished, while the specter of increased famine and disease looms perilously in the paths of developing nations in Africa, South America, and Asia. After only two centuries of existence, our society finds itself menaced by the pollution of our soil, rivers, forests, and air. We are threatened by the depletion of our mines, ground waters, and natural resources.

The message is clear. America must once again call on the genius of its sons and daughters, the spirit of its people, and set out once again to affirm its independence and preserve for future generations the freedoms that we have come to enjoy.

Mr. Speaker, recently I had the opportunity to speak at the dedication of the new education and research center of the Marine Resources Development Foundation. This nonprofit foundation was established in 1970 by the distinguished Ian Koblick, known to many as "The American Cousteau." Ian has overseen the work of the foundation for the past 15 years in its efforts to foster prudent development of the vast resources of the world's oceans.

To increase public awareness of the oceanic development, Ian Koblick has proposed an international "Declaration of Dependence," affirming the commitment of the world's business leaders, scientists, political leaders, and others to exploring new horizons in marine development and research.

I include a copy of this "Declaration of Dependence" in the RECORD, and encourage my colleagues to study its contents. It espouses important principles for our future, and points our Nation in a direction we must follow—for our own survival and our future independence.

DECLARATION OF DEPENDENCE

In 1776 independence from colonial rule was a matter of survival. Two centures later we are faced with a new and more powerful adversary. Today survival has become a fight against resource depletion, over consumption, waste and pollution. Since the turn of this century, land resources (soil, forests, mines, lakes and rivers) have been diminished or depleted at an ever increasing rate. In 50 years the world's land resources will not support its spiraling population. We have reached that point in time and growth where we must think and plan for new sources of tomorrow's food, fresh water, energy and minerals.

To this end Marine Resources Development Foundation has established an education and research center in Key Largo, Florida. The nonprofit Foundation was established in 1970 by Ian G. Koblick, ocean pioneer and leading authority on "Living and Working in the Sea," which is the title of his recently published definitive work on underwater habitats and their meaning to man's survival.

An abundance of indisputable facts and predictable trends substantiate the population versus resources crisis. We are past the time for derisive gloom and doom comments, past the time of inaction. We can no longer afford to wait and watch, and work only when resource development is profitable. To break away from the restrictions of apathy, ignorance, and funding, creative ideas and strong motivating influences are needed now.

As a step in this direction the Marine Resources Development Foundation has prepared a special document entitled the Declaration of Dependence. This document patterned after the Declaration of Independence is an attempt to mobilize the support of leading marine scientists and citizens of influence.

The oceans which cover 71 percent of our planet have all the resources needed to adequately sustain a growing population. We must formulate plans now, as a national priority, to tap this abundant marine resource.

IN CONGRESS, JULY 24, 1985

THE UNANIMOUS DECLARATION OF DEPENDENCE ON MARINE RESOURCES

When in the course of human events it becomes necessary, for the survival of man and his planet, to arouse a common awareness of impending disasters, to spread knowledge of the overconsumption and abuse of the Earth's resources, it is time for man to recognize his communion with Nature and that which Nature's God entitles him, and to act forthrightly to replenish, maintain and enhance a wholesome environment.

We hold these truths to be conspicuously evident that all men are created with equal and inalienable rights and among these are the right of fresh air, clean water and the sustenance of life from land and water resources. These are the basic elements of man's Dependence on Earth for survival. When man knowingly, inadvertently, ignorantly or fortuitously transgresses this Dependence he acts against all mankind and Nature.

To secure man's vital rights and to abolish hunger, malnutrition and reckless and wanton pollution of our land, water and sky we must be aware of the imminent problems and disasters and muster strong defenses and concerted aggressions against all that threatens to restrict or destroy life, liberty and the pursuit of happiness.

This Declaration of Dependence, of ecological dependence, advances the proposition that all men of good conscience should actively promote the engendering of a high priority national affirmation and effort to inventory resources, evaluate resource utilization and develop programs that will provide what is essential to nurture mankind now and in the future.

In the absence of thorough scientific evidence, we accept the probabilities and implications presented in generalized reports and observations indicating that almost half the world's population is undernourished, that statistical projections indicate that the world's population may double in fifty years, that all the arable land on Earth cannot feed all the people, under present conditions, for more than twenty-five to thirty years.

Furthermore, we are losing six billion tons of topsoil each year. The world's largest minority group, the hungry, the malnourished, grows by approximately one million people each week. The march, which could become a stampede, from areas of hunger to those of affluence has already begun, as evidenced by Central America's northern migrations and the plight of East Africans. China's population has reached the billion mark. Man has consumed half the world's supply of fossil fuels in the last century. The rest will be gone in fifty years. Wanton exploitation has destroyed or diminished ecological system and food chains that were thousands of years in developing. We have annihilated many species and subspecies and weakened others without ever knowing their ecological significance to natural harmony.

Population and irrigation demands have put the world on the edge of water bankruptcy. Eighty percent of man's illnesses can be attributed to impure or inadequate water supplies and this condition is aggravated by an increasing spread of acid rain, ground and water pollution from toxic chemicals and industrial wastes affecting all life on Earth.

As a nation, in 30 years, we have spent vast amounts of money on our space program. With all of its accomplishments, it has not yielded a single bite of food, a single drop of water, or a single watt of energy. However, the new technology developed through space exploration can have direct application to marine resource development.

We, here, in unanimity, declare what must be done. We must develop the world's resources, most importantly, Marine Resources. The oceans cover seventy-one percent of our planet and represent a nearly inexhaustible supply of food, fresh water, energy and minerals.

We are beyond theory. We have the skill and tools at hand to develop efficient processes of desalinization to produce fresh water; aquaculture techniques to produce high protein feed and food with genetically engineered micro-algae using only sea water and sunlight; conversion methods to produce limitless energy from ocean tides, currents and thermal changes, and to extract hydrogen for a combustion based economy; extraction techniques to produce minerals and medicines from ocean water rich in pharmaceutically active compounds.

We are on the verge of breathing oxygen under water without cumbersome tanks and equipment. Man will know and feel a new freedom of exploration. Greater numbers of people will visit the depth of our oceans and investigate their wonders. Underwater habitats for research and recreation are becoming a reality. We have a sizeable population of marine scientists working on a broad array of projects that could bring to Earth the fruits of the Ocean.

Lacking is national organization, communications, prioritizing programs, and essential government, public and private sector recognition and support.

We, therefore, the representatives of the Congress of Marine Resources, appeal to the Governors and the governed to remove the blindfolds and restrictions imposed by apathy, affluence, disinterest and ignorance which result in a lack of vision and voice to see and decry insufficiency of action and coordination of effort.

Viable, nationally coordinated programs are needed now to alter the course of impending events. We, in Congress, assert the urgent need to establish a national policy for marine resources development which will have the force and financing to achieve attainable objectives. We concur on setting as a specific goal, to be reached with in 25 years, the abolition of hunger on Earth, and within an economically feasible and scientifically possible framework.

We must return to all men their inalienable right to sustenance from their planet's resources.●

LET CITIZENS HELP RETIRE THE DEBT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. GROTBERG] is recognized for 5 minutes.

● Mr. GROTBERG. Mr. Speaker, how often have we heard the two little words, budget deficit, spoken in this Chamber? Those two little words describe something we all know is far from small. We are always looking for painless ways to reduce a deficit which could conceivably be the most destructive force in our children's and grandchildren's future. Today, I'm introducing a bill which in a small way gives all citizens a chance to take part in deficit slashing while Congress goes through the painful, but necessary, exercise of program reductions.

My bill would allow a taxpayer to designate at the time a tax return is filed that any portion over $1 of an overpayment be used to reduce the public debt of the United States. The Secretary of the Treasury would be instructed to transfer the designated funds to a special account, which already exists, to reduce the debt. It adds no new layer of bureaucracy. Many of my constituents don't believe they pay enough taxes. This allows those individuals a chance to voluntarily contribute an extra amount.

I don't presume to believe that this bill will solve our deficit problem, but I think this legislation would afford our constituents an opportunity to be a part of the process and the ongoing solution. I urge my colleagues to support this idea.●

THE RECIPROCAL TRADE AND ADJUSTMENT ACT OF 1985

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. MCDADE] is recognized for 5 minutes.

● Mr. McDADE. Mr. Speaker, I am today reintroducing legislation to toughen the U.S. response to unfair trade practices by foreign competitors. This legislation, that I introduced in the 98th Congress as H.R. 1974, is known as "The Reciprocal Trade and Investment Act of 1985." The need for enactment of this bill is even greater today.

The American people have become all too familiar with what American

businessmen have long known—that our foreign competitors are not abiding by the rules that must exist to govern free trade.

Free trade must be fair trade.

The bill expands the list of actions that are defined as unfair trade practices under U.S. law. It also gives the President new powers to retaliate against unfair trade practices that hurt American products in all industries—from automobiles to agricultural exports as well as to the service industries.

In addition, this legislation is designed to counter foreign governmental subsidies for agriculture and other products which give them an unfair advantage over U.S. exports in overseas markets. This bill also focuses on trade practices of other nations that create barriers to prohibit or reduce the export of American service skills ranging from computer software to fast-food franchises.

Services related to computers, systems management, and data processing are and should continue to be an increasingly important part of the American export market.

Adoption of this act would authorize the President to place restrictions on any foreign investment and service contracts in our country, if necessary, to persuade other nations to hold these unfair trade practices. Under current law, the President can only retract previously granted trade concessions or imposed duties, fees or the restrictions on foreign imports. This bill would require the President to identify and access the impact on trade of foreign barriers and inform Congress of what will be done to eliminate those barriers. This legislation empowers Congress to request formal investigation and action in language which would strengthen section 301 of the Trade Act of 1974. This bill expands on legislation with similar provisions which passed the other body in the 97th Congress, but was not acted upon by this House of Representatives.

I urge my colleagues to join me in cosponsoring the Reciprocal Trade and Investment Act of 1985. Mr. Speaker, I ask unanimous consent that a digest of this legislation appear immediately after my statement in the RECORD.

THE RECIPROCAL TRADE AND ADJUSTMENT ACT OF 1985

Amends the Trade Act of 1974 to establish provisions dealing with foreign trade barriers. Directs the United States Trade Representative, (USTR), through the Interagency Trade Organization established pursuant to the Trade Expansion Act of 1962 to identify, analyze, and estimate the impact of practices that constitute significant barriers to or distortions of: (1) U.S. exports of goods and services; and (2) foreign direct investment by U.S. persons, especially if it has implications for trade in goods or services.

Set forth factors to be considered by the USTR in such analysis. Directs that the USTR update the analysis annually. Requires the USTR to consider foreign subsidization of exports which are like or competitive with U.S. exports to be an act which constitutes a significant barrier to, or distortion of, U.S. export of goods. In addition, it directs the USTR to submit the analysis to the appropriate Congressional Committees and it requires the report to include any action taken to eliminate such trade barriers. Directs the USTR to consult with Congress on trade policies. Directs Federal agencies to furnish information and other assistance to prepare such analysis. Authorizes the President to respond to a foreign entity's unfair trade practices by taking action against any goods or sector of such entity without regard to whether the goods of sector were involved in the unfair trade practice. Authorizes the President to propose legislation to protect U.S. trade rights or to eliminate unfair trade practices. Requires such legislative proposals to be given priority treatment. Requires a summary of a petition for a trade investigation by the USTR to be published in the Federal Register, rather than the entire petition as in current law, if the USTR decides to begin an investigation with respect to the issues raised by the petition. Authorizes the USTR to initiate an investigation in order to advise the President concerning the exercise of the President's authority to take action against unfair trade practices. Directs the USTR to consult with the appropriate congressional committees before beginning such an investigation. Authorizes the USTR to delay for up to 90 days any request for consultation by a foreign entity concerning a petition for investigation into unfair trade practices. Directs the USTR to publish notice of the delay in the Federal Register and to report to Congress the reasons for the delay. Changes the definition of "commerce" for purposes of foreign trade investigations to include: (1) services associated with international trade, whether or not related to specific goods (currently products); and (2) foreign direct investment by U.S. persons with implications for trade in goods or services. Defines "unreasonable", "unjustifiable," and "discriminatory" for purposes of such investigations. Prohibits makng information which the USTR has received in a trade investigation available to the public, if: (1) the person who provided the information makes a specified certification; (2) the USTR determines that such certification is well-founded; and (3) the person providing the information provides an adequate nonconfidential summary. Authorizes the USTR to use the information in trade investigations or to make it available to the public in a form which cannot identify the person providing the information. Sets forth the principal U.S. negotiating objectives with respect to trade in services, foreign direct investment, and high technology products. Directs the USTR to develop and coordinate the implementation of U.S. policies concerning trade in services. Requires Federal agencies responsible for regulating any service sector industry to advise and work with the USTR concerning: (1) the treatment afforded U.S. services sector interest in foreign markets; or (2) allegations of unfair practices by foreign governments or companies in a service sector. Authorizes the Secretary of Commerce to establish a service industries development program. Sets forth the goals of the program. Expresses the policy of the Congress that the President shall: (1) consult with State governments on trade policy issues affecting the regulatory authority on non-Federal governments or their procurement of goods and services; and (2) establish one or more intergovernmental policy advisory committees on trade.

Authorizes the President to establish policy advisory committees representing non-Federal governmental interests to provide policy advice on trade negotiating objectives, bargaining positions, and the implementation of trade agreements. Authorizes the President to negotiate to reduce trade barriers in foreign direct investment by U.S. persons, especially if such investment has implications for trade in goods and services. Authorizes the President to enter into agreements concerning high technology industries. Requires the Department of Commerce to submit a report to Congress analyzing factors, not addressed by this Act, which significantly affect the competitiveness of U.S. high technology industries and which have a potential for high sales growth in world markets. Authorizes the President to proclaim the modification, elimination, or continuance of any existing duty, duty-free, or excise treatment, or any additional duties to carry out agreements concluded under this Act. Requires the President to exercise this authority only with respect to specified items listed in the U.S. Tariff Schedules. Provides for the termination of such authority within five years after the enactment of this Act.●

H.R. 8—THE WATER QUALITY RENEWAL ACT OF 1985

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. LANTOS] is recognized for 5 minutes.

● Mr. LANTOS. Mr. Speaker, when the House voted on H.R. 8, the Water Quality Renewal Act 1985, I was unavoidably detained while holding a hearing in my congressional district on the subject of Federal tax reform, and, therefore, I was unable to cast my vote on this important issue. I wish to be certain, however, that my consistent and enthusiastic support for this bill is known.

The Congress enacted the Clean Water Act in 1972 to reduce the pollution of our Nation's streams, rivers, and lakes by municipal sewage and industrial discharge. A great deal of progress has been achieved under that farsighted legislation. Despite significant increases in population and industrial discharges, we have seen important successes in reducing the pollution of our Nation's waters.

Since 1982, however, many of the specific programs and general authorizations of the original Clean Water Act have expired, and we have attempted to operate without a regular authorization. Passage of the Water Quality Renewal Act of 1985 is essential to close these gaps and to remove uncertainties in funding and delays in implementing essential programs to maintain and improve our water quality.

Mr. Speaker, I strongly oppose the amendment offered by Mr. STANGELAND of Minnesota which would allow

companies to opt for weaker, locally imposed limits on industrial pollutants. This amendment would drastically slow down compliance with clean-water standards, and it would undermine and defeat the purposes of the Clean Water Act.

Mr. Speaker, I also strongly oppose the amendment offered by Mr. PURSELL of Michigan to freeze funding for water quality programs at 1985 levels. The Public Works and Transportation Committee, as directed in the House budget resolution, has already made reductions of $600 million in programs under its jurisdiction. The Water Quality Renewal Act is consistent with the House-passed budget resolution. The funding provided in this legislation is essential, and the funding reduction proposed by Mr. PURSELL would only further delay long-needed action to clean up our waters.

I welcome the passage of this act. Our Nation's waters are a precious natural heritage. This act is essential to insure that they are protected from further pollution and to remedy some of our failures in the past to take action such as this.●

ONE HUNDRED AND EIGHTIETH ANNIVERSARY OF BIRTH OF CONSTANTINO BRUMIDI

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. ANNUNZIO] is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, on Friday, July 26, 1985, we commemorate the 180th anniversary of the birth of Constantino Brumidi, that "Michelangelo of the Capitol," whose imperishable works of art add so greatly to the splendor and beauty of our Capitol.

It is appropriate that Congress once again recognize the contributions of the "Michelangelo of the Capitol" on this anniversary day. For the occasion, Cornelius W. Heine, Executive Director of the U.S. Capitol Historical Society, who has studied Brumidi art in the Capitol for 5 years, has written an article bringing into focus the art and the artist. I submit for the RECORD this article entitled "An Artist's Contribution to America."

AN ARTIST'S CONTRIBUTION TO AMERICA

(By Cornelius W. Heine, Executive Director, U.S. Capitol Historical Society)

Holding fast to the last rung of a ladder on the scaffolding from which he had just fallen, Constantino Brumidi dangled precariously 80 feet above the Rotunda floor. Just before his strength ebbed, Captain Landman was able to secure ropes about him and lower the 75 year old artist gently to the floor below. It was October 1, 1879. That was the last time the aging artist was to apply his brush and paints to the walls of the Capitol. He continued to prepare sketches from which his assistant, Felippo Costaggini, executed the frescoes on the belt of the Rotunda. Brumidi, tired in spirit, and strength, died four months later in 1880. For 25 years he had labored tirelessly throughout the Capitol completing a vast amount of lasting art—clearly the work of a master artist. Following his death, the memory and the recognition of Brumidi's immense contribution was lost sight of. Thanks to Mrs. Myrtle Cheney Murdock, wife of the congressman from Arizona, Brumidi's life and contributions were once again highlighted in 1948. Mrs. Murdock's research culminated in her magnificent book "Constantino Brumidi—The Michelangelo of the Capitol." Those many Americans, greatly interested in the art of the Capitol, are indebted to the work of Mrs Murdock.

Brumidi's life is the story of the power of the meaning of America and of one man's attempt to portray its principles through art as his payment for the freedom he found. Seeking that freedom, Constantino Brumidi left his native Italy in 1852, leaving behind a land caught up in political turmoil. He landed in New York City on September 18, 1852, the anniversary of the date upon which President George Washington laid the cornerstone of the Capitol in 1793. Penniless and downtrodden, Brumidi did some art work in New York City and for a time in Mexico. In 1855 the artist came to Washington. At the Capitol, fate brought him into contact with Captain Montgomery Meigs, who was in charge of the construction and decoration of the great dome, and who was looking, vainly, for an artist skilled in fresco. This old world art form was the decorative treatment of large sections of ceilings and walls, wherein the painting was done on freshly laid plaster with the pigment suspended in pure water. The art then became a permanent part of the structure itself. When Meigs found that Brumidi was a fresco artist, he hired him. Before commencing his work, Brumidi wrote a prayer as his preface to an achievement that grows larger with each passing year. He said, "My one ambition and my daily prayer is that I may live long enough to make beautiful the Capitol of the one country on earth in which there is liberty."

Though conditions in Italy in the mid-nineteenth century induced Constantino Brumidi to come to America for a new life, it was, in another sense, in his native Italy wherein through long years of study, his skill as an artist was nurtured and sharpened. There at the *Accademia di San Luca*, he had studied under the greatest artists and sculptors of the time—Vincenzo Camuccini, Antonio Canova, and Berthel Thorwaldsen. It was there he executed outstanding artistic achievements, which were to be precursors to his later work in the Capitol. In his interior decoration of the Dome of the Church of the *Madonna dell Archetto*, Brumidi's art was acclaimed as approaching that of the great masters. But of most significance for the future of the United States Capitol, Brumidi was evolving concepts and techniques that he would later apply in his greatest works in the Capitol. The central figure in the Dome of the Church of the *Madonna dell Archetto* surrounded by angels is somewhat analogous to the later Eye of the Dome painting in the Capitol, depicting Washington surrounded by a circle of maidens representing the original thirteen states. Similarly, in the Capitol room where Brumidi strove to excell in every possible way—the President's Room, his four madonnas in the ceiling call to mind also his earlier adornment of the Church of the *Madonna dell Archetto*, with four madonnas on the pilasters, representing the theological virtues.

So as with many other individuals who contributed to the greatness of America, our nation is indebted to the heritage and the culture which they brought with them from their native lands. In Brumidi's case it was the sensitive skill and ability to use great art to portray the principles upon which a new nation had been founded. Both the land of his heritage, Italy, and the United States of America—his chosen country, can be justly proud of Constantino Brumidi.

However, when Constantino Brumidi first arrived on the Capitol scene in 1855, he had little inkling of such monumental undertakings as the Eye of the Dome and the President's Room. Nor were the officials of the Capitol yet convinced of his technical skill. Thus, Captain Meigs and the leaders of Congress gave the newly arrived artist a chance to prove himself by undertaking the fresco decoration of the House Agriculture Committee Room (H-144). There he completed his first fresco and the first completed in the Capitol, as he depicted the Seasons of the Year. When the officials reviewed that work, they were greatly pleased. They marveled, as had the critics of Rome earlier, of the beautiful hues of colors and the harmony of the whole execution. Brumidi had passed the test and the way was now open for him to begin a quarter-century of art in the Capitol.

Not long thereafter, the Capitol officials contemplated the decoration of the canopy of the dome. Brumidi was commissioned to execute the decoration of this almost 5000 square feet canopy at a cost not to exceed $40,000. The undertaking represented a tremendous challenge to even the most skilled fresco artist. But it was one to which Brumidi was equal. While Secretary of the Interior Usher, who was in charge of the Capitol in 1863, expressed concern that progress on the "Eye of the Dome" was too slow, once Brumidi had completed his cartoons and was ready to apply oils to the plaster, this mammoth work was finished in less than one year in 1864. The official title given to the work was "The Apotheosis of George Washington" and it represented the deification of the First President and the principles that he and the nation exemplified. In historical retrospect, few if any artists living at that time could have been better suited to bring life through art to the canopy of the great dome than Constantino Brumidi. He must have called upon all the techniques and skills learned over a quarter of a century before in his native Italy. First he had to have the ability to plan and envision the overall concept, to know exactly the size required, so that his 15 foot figures would appear life-like in size to the visitors eye 181 feet below. His mastery of fresco required the prior knowledge, almost in scientific exactitude of the colors and the varying shades as they would appear when finally dried. This was all the more difficult, in that the colors were originally applied on wet dark brown plaster, giving no hint, except to the Master skilled in *"buono fresco,"* in how the shades would eventually turn out. The final Masterpiece was finished before the Second Inauguration of President Abraham Lincoln. Sometime prior to that time on the box in the grouping where Mercury, Protector of Travelers and Merchants, is advising Benjamin Franklin, Robert Fulton, and Samuel B. Morse, Brumidi affixed his signature and the date 1865.

Following his unexcelled achievement of the "Eye of the Dome" painting, Constan-

tino Brumidi moved to the Senate side, where he decorated the halls and corridors, which today bear the title "The Brumidi Corridors." There he was assisted by some 25 or more artisans. But it is believed that he personally executed the frescos in the ceilings and many of the animals and birds which adorn the walls.

Brumidi also applies his skills in many of the committee rooms in the Senate wing of the Capitol. In the room now used by the Vice President's staff is the beautiful fresco of "the South being welcomed back into the Union of the States." Nearby, in the much larger room—once the Senate District of Columbia Committee Room—and now the Senate Democratic Policy Committee Room, the walls and the ceilings are all equisite Brumidi. Four major fresco paintings decorate each wall, beginning with "Physics" on the north wall and continuing clockwise with "Geography." "History" and lastly the "Telegraph." Groupings representing the Three Graces are found in each corner of the ceiling and the entire ceiling contains special decorative motifs of the artist Brumidi. In the three room suite now used by the Senate Appropriations Committee, Brumidi spent many arduous hours of workmanship, when these rooms were the Indian Affairs Committee Room and the Naval Affairs Committee Room. In the latter room, now used by the Senate Appropriations Committee, Brumidi used a theme symbolic of the sea and marine life. Figures from Greek and Roman mythology and a variety of half-human-half sea creatures adorn the room. Since the committee rooms are used for official legislative work, visitors rarely see the remarkable art treasures within them. In the case of the Senate Appropriations Committee Room, Committee Chairman, Mark Hatfield had the central door off the main corridor converted to open glass, so that visitors may look in and see the art of Brumidi and the room itself whenever the Committee is not in session.

Many art historians believe that the high point in Brumidi's Capitol oddessey came with his decoration of the President's Room. Perhaps, realizing this room would be used by Presidents of the United States down through the years, Brumidi exerted every effort to reach the near-perfection of his artistic ability. The art in the President's Room reveals not only Brumidi's mastery of form and harmony of colors, but his gifted technique of using light and shadow to convey a three-dimensional quality to the figures. Cherubs appear as if their arms are actually reaching out from the flat wall. Outstanding portraits of Benjamin Franklin, George Washington, William Brewster, and Americus Vespucius adorn the walls. As in his earlier work in the Rotunda, Brumidi sought to depict principles both underlying the founding of the new government and the work that would go on within the walls of the Capitol. Thus he achieved through the depiction of four beautifully executed Madonnas in the ceiling of the room. Holding symbols of the principle or virtue being depicted, the madonnas represent the Executive, for whom the room was designed; Religion, representing the higher moral values by which mankind is guided, Legislation, which is the official duty of the Congress, and Liberty, which was that principal of human dignity that brought people to a new land and caused them to create a government, based on that human dignity.

Of Brumidi's work in the Capitol, there seemed almost no end. He even designed exquisite monumental bronze stairways—two each for the House and Senate, which were modeled and cast by other artisans and represent the highest art-form of bronze work found anywhere in the United States.

When Constantino Brumidi uttered his prayer that he be given time to beautify the Capitol, he perhaps had no number of years in mind. As his 25th year of his labor of love approached, age, the work of years, and personal hardships had taken their toll. By the late 1870's, he was back in the Rotunda to begin his last art work in the Capitol—the freize bordering the base of the Dome and entitled "America in History." It was there, while working on the grouping of William Penn and the Indians, that Brumidi's fall occurred.

While art historians and critics continue to study the work of Erumidi, there appears to be a growing recognition of the mastery of his art. The amount of his art is almost baffling to the mind. He must have been absorbed in his art and followed the early Latin motto *Labore est Orare*—work is prayer.

The Capitol is a treasure house of art and particularly the treasure house of Brumidi's art. As we approach the 180th anniversary of the birth of Constantino Brumidi, his art is bringing more and more acclaim. After being forgotten for many years, he is now being referred to as the Michelangelo of the Capitol. Once his remaining paintings and work sketches of his original paintings in the Capitol as left to his son and later auctioned off, found little public interest. Today even his work sketches are prized by collectors. The work sketch of "The Telegraph" referred to earlier was acquired by the curator of the Senate at a cost of some $27,000.

Increasing recognition has been given Brumidi by the Congress in recent years. Leading such recognition, Congressman Frank Annunzio introduced in 1966 a House Resolution to memorialize Brumidi with a marble bust and the late Senator Paul Douglas introduced a similar resolution in the Senate. These efforts were supported by the Honorable Peter Rodino and former Senator John O. Pastore. On April 30, 1968 the dedication of the bust of Constantino Brumidi by the sculptress Jimilu Mason took place in the Capitol Rotunda. That marble bust now rests on a pedestal across from the Senate Foreign Relations Committee Room and amid the corridors where Brumidi worked so ardently during his lifetime.

But while the art of Brumidi is now receiving the due it deserves, what of Brumidi the man. In one sense Constantino Brumidi cannot be spearated from his art. His life was art and his obsession was to beautify a single building—the Capitol of the United States. He lived in an age where the care of family records and the interest in recording history was not what it is today. Perhaps, in the future historians will study further the man apart from his art. But for now the legacy of Constantino Brumidi is the vast array of fresco art in the Capitol of the United States. It is the nation's treasure created by one who poured out his love for America through his art. Here in the Capitol, all the years of apprenticeship under the masters and his own artistic work in the palaces and churches of Italy came to distillation in the majestic "Eye of the Dome" painting; in the President's Room; and in the halls and corridors of the Capitol.

Constantino Brumidi's family and descendents recognized his unique greatness among artists. Lola Germond Brumidi, his wife and model for many of the figures in his Capitol paintings saw that he was buried in her family plot upon his death, even though circumstances had caused their parting earlier. Today, the great-grand niece of Lola Germond Brumidi, Mildred Thompson, helps to keep alive the memory and the contributions of Constantino Brumidi. Mrs. Thompson frequently shares insights into various aspects of Brumidi's work in the Capitol and elsewhere. She has pointed out that despite his massive production of art in the Capitol, Brumidi's works of art may also be seen in the frescoes in St. Aloysius Church on North Capitol Street in Washington, in St. Stephen's Church in New York City, and in the form of portrait paintings held in private collections. Recently, the U.S. Capitol Historical Society acquired the Brumidi portrait of Mrs. Edward Clark, wife of the Architect of the Capitol when Brumidi did his principal works, and donated it to the Capitol collection.

Many years ago President Herbert Hoover said: ". . . The Caitol is this national stage on which the drama of our political life is played. Here we fought the battles that tested the foundation of our government. We face similar problems of our time; and in centuries hence, some other Americans will face the great problems of their time. For our task and their tasks there is need of a daily inspiration of surroundings that suggest not only the traditions of the past, but the greatness of the future."

Constantino Brumidi spent a quarter century working to create "that daily inspiration of surroundings" of which President Hoover spoke. He strove through art to go beyond the "inspiration of surroundings" by symbolically depicting some of the fundamental principles underlying the founding of the United States—courage, freedom of the individual, justice, and faith that this nation, so conceived, would endure. Brumidi's legacy is the nation's legacy. Millions of visitors have passed through the Capitol and continue to do so. Some of these visitors and the lawmakers who serve within the Capitol, at times glance upwards upon the masterful art of one man, who wanted to repay the nation which gave him the freedom he yearned for. The verdict of history looks kindly, I believe, upon his repayment, as the Nation and the Congress of the United States pause to honor Constantino Brumidi on the 180th anniversary of his birth—July 26, 1985.●

REFORM OF THE HOUSE RULES

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Kansas [Mrs. MEYERS] is recognized for 60 minutes.

GENERAL LEAVE

Mrs. MEYERS of Kansas. Mr. Speaker, I ask unanimous consent that all Members who participate tonight may have 5 legislative days to revise and extend their remarks, and to submit extraneous and supportive material in conjunction with the special order.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Kansas?

There was no objection.

Mrs. MEYERS of Kansas. Mr. Speaker, I rise to discuss a matter of

great concern to many Members of the House of Representatives, and that is reform of the rules by which we conduct the people's business.

As the chairman of the House Republican Task Force on Congressional Reform, my office has embarked on an exhaustive research project, identifying numerous instances and cases where House rules could and should be modified to allow a more democratic participation in the legislative decisionmaking process.

On July 11, I introduced House Resolution 220, which calls for the consideration of another House Resolution, No. 164, introduced previously by our distinguished minority leader [Mr. MICHEL].

I have today filed a petition to discharge the resolution from the Rules Committee.

While I am not unaware of partisan considerations which may affect consideration and discussion of this reform proposal, I truly believe that Members on both sides of the aisle can work together in a spirit of statesmanship toward a package of reforms which will benefit the entire House.

I am very willing to work with all of my colleagues in this worthwhile process of reexamining the rules by which we work together. I earnestly seek the support of Members of the majority who, while we may differ on other substantive issues, are willing to consider ways and means to make this body run more efficiently; be more sensitive, and responsive to the people and be more productive and effective in resolving the many important issues facing America today.

Before I proceed, Mr. Speaker, I would like to yield to my friend, the gentlewoman from Nevada [Mrs. VUCANOVICH].

Mrs. VUCANOVICH. Mr. Speaker, I want to thank my colleague, Congresswoman MEYERS, for holding this special order so that we can discuss the problems certain Members have with the rules of this House. I would like to focus my remarks on committee ratios and proxy voting.

First, addressing the Democrat leadership's desire to hide behind the protection of strength through numbers—it seems that the Democrats don't play with a full deck even when they stack the deck.

Unfair committee ratios are an obvious attempt to squash reasonable and constitutional debate of important issues. The leadership of the House is simply protecting its private viewpoint from possible defectors who may have a different view.

By loading the committees with heavyhanded numbers of Democrats, Mr. O'NEILL, Mr. WRIGHT, and their lieutenants have made sure that the only viewpoint on an issue is their view!

How do you freethinking, intelligent Democrats feel knowing that your leadership has chosen its view and has planted it in every committee, no matter what you think? What happens to your voice if you differ from your leaders?

I call on every single colleague of mine, Republican and Democrat, to demand that TIP O'NEILL allow fair and equitable representation on all committees that reflect the true ratio of this body.

And to compound the attempted censorship of views of the loyal opposition in committees by the Democrat leadership, Mr. O'NEILL and company continue to define democracy as "four votes, one man"—better known as proxies.

Not only are minority viewpoints suppressed; they are voted down by Members who are not even there and there are ghosts who the leadership has claimed are vital to their committee. If they are so vital, Mr. Speaker, let's have them present in committee, voting their own position. We should not condone the practice of proxy voting passing legislation.

The American people are demanding we make important well-informed decisions on the floor and we can't even get the benefit of committee member's knowledge because they are not attending—they are voting by proxy.

By continuing this practice of absentee representation, the Democrat leadership has simply said to the American voter, "I will give you full representation on the floor of the House, but I don't have to in committee."

It seems the Democrats want to give the people only half of their voice in Congress.

□ 1810

I thank the gentlewoman for holding this special order, and I am glad to have been able to participate.

Mrs. MEYERS of Kansas. I thank my colleague for her remarks.

There is a view that Congress is unable to cope effectively with today's widespread problems. Such a view has been around for almost 40 years and probably existed before that. Congress responded with the Legislative Reorganization Act of 1946 and with it reformed committee jurisdictions. In the 1970's Congress took steps toward improving congressional capabilities and efficiency with which it meets its legislative, investigative, and oversight responsibilities. Of the number of actions taken in this direction, four stand out: The Legislative Reorganization Act of 1970, the Technology Assessment Act of 1972, the Budget and Impoundment Control Act of 1974, and the Committee Reform Amendments of 1974.

Many good things have been accomplished with the passage of these reforms, such as modifying floor voting procedures to save time and announcing each year's anticipated schedule to enable Members to plan accordingly. Unfortunately, the Congress has done little else to improve its methods of operations since the 1970's. There remains much that needs to be accomplished.

Found in House Resolution 164 are a series of reform proposals that deserve the attention of Members on both sides of the aisle. Legislation I have introduced would bring House Resolution 164 to the floor for 10 hours of debate. Thoughtful discussion and input from all Members would provide great insight into ways that the rules could be improved.

I am one of the freshmen, one of the new kids on the block, and concede that I have more to learn about the House than others. However, as a freshman I have been frustrated by a number of things. Scheduling is a terrible problem for all of us. There are committee hearings to attend, constituents to meet, legislative issues and priorities to become familiar with, votes to cast, debates to both listen to and participate in, and on and on.

We need to organize the time of all Members so that we are better able to represent and serve our constituents. The task force which I chair is not the first to suggest such reforms. There has been a Commission on Administrative Review, another Task Force on Reform, the Commission on More Effective Government, and the Select Committee on Committees, to name a few. What we need to do is stop, listen, and learn from what these people were trying to tell us.

In 1979 a survey was done of both Republican and Democratic members of the Select Committee on Committees. I am submitting a copy of this survey for the RECORD.

SURVEY OF HOUSE MEMBERS

Because of the short time available to the Select Committee in which to complete its work, committee members sought a variety of means through which to evaluate Member opinion on various organization options. The Bolling Committee, in 1973, held extensive public hearings on committee reorganization. It was the feeling of the Select Committee that such generalized hearings could not be held in view of the committee's early reporting deadline.

The committee therefore sought alternative means to determine Member sentiment toward reorganization. In June and July, staff of the Select Committee interviewed more than forty Members of the House. The interviews were held off the record, but they provided valuable early input which served to shape future committee decisions. In October 1979, the staff of the Select Committee drafted two questionnaires on specific reorganization proposals. In all, more than two hundred House Members responded to the survey questionnaires. The text of the questionnaires, and the response totals are included in this section.

QUESTIONNAIRE 1.—COMBINED RESPONSES OF REPUBLICAN AND DEMOCRATIC MEMBERS SELECT COMMITTEE ON COMMITTEES, NOV. 16, 1979

	Democrat			Republican			Combined		
	Yes	No	Undecided [1]	Yes	No	Undecided [1]	Yes	No	Undecided [1]
A. GENERAL									
1. Please indicate whether or not you agree with each of the following general statements about committee system revision:									
(a) The House committee system is in disarray and comprehensive revision of the system should be given high priority	82	28	12	46	11	5	128	39	17
(b) Despite appearances of disarray, the committee system is functioning about as well as can be expected and does not require major reorganization	25	85	12	13	44	3	38	129	15
(c) A carefully developed comprehensive revision of the committee system will attract wide support among Members	30	45	47	17	25	20	47	70	67
(d) Most Members would be more likely to accept a relatively few modest changes, rather than a comprehensive revision	85	13	24	47	8	7	132	21	31
(e) Committee system revision is so necessary that it should be pursued even if Members see themselves adversely affected by specific jurisdictional or other changes	85	22	15	46	10	6	131	32	21
(f) Committee system revision should be limited to changes which do not affect Members' positions or jurisdictions	16	93	13	7	50	5	23	143	18
	Importance								
	High	Medium	Low	High	Medium	Low	High	Medium	Low
2. Following is a list of possible goals or objectives of committee system revision: Please indicate, for each, the level of importance you believe it should have.									
(a) Strengthen authority of committee chairmen	32	44	46	5	26	31	37	70	77
(b) Strengthen role of leadership	52	42	28	13	21	28	65	63	56
(c) Improve information resources	68	35	18	33	15	14	101	50	32
(d) Rationalize jurisdictions	97	17	8	57	3	2	154	20	10
(e) Strengthen oversight	84	32	6	50	9	3	134	41	9
(f) Reduce fragmentation	101	15	6	53	6	3	154	21	9
(g) Improve hearing process	52	45	25	20	26	16	72	71	41
(h) Reduce costs of committee operations	40	48	34	38	17	8	78	65	42
(j) Consolidate committee system by reducing number of units and assignments	79	28	15	42	14	6	121	42	21
(i) Control growth of committee staffs	69	36	17	43	14	5	112	50	22
(k) Develop means of cooperation between committees	84	31	7	39	18	5	123	49	12
B. COMMITTEE STRUCTURE AND ASSIGNMENTS									
1. Do you believe the number of subcommittees should be reduced?	98	9	15	51	8	3	149	17	18
If so, what should be the maximum number of subcommittees (except for Appropriations): 5 (71), 6 (47), 7 (8), 8 (7), other (40).									
2. Do you believe the total number of subcommittee assignments per Member should be limited?	95	7	20	57	3	2	152	10	22
If so, what should be the maximum number of subcommittee assignments per Member? 3 (48), 4 (66), 5 (23), 6 (6), other (38).									
C. COMMITTEE RULES AND PROCEDURES									
1. Under which conditions, if any, should committees be allowed to close their meetings to the public: Security.									
2. Should Members be authorized to take leaves of absence from assigned committees, without losing seniority, to serve temporarily on other committees?	68	37	17	26	24	12	94	61	29
3. Should proxy voting in committee be prohibited?	33	83	6	47	14	1	80	97	7
4. Should the quorum required for the transaction of business and the marking up of legislation be increased from one-third to one-half to correspond with the quorum required to report a measure?	42	66	14	46	12	4	88	78	18
D. COMMITTEE ADMINISTRATION, FUNDING, AND STAFFING									
1. Should committees be required to publish advance monthly calendars of future committee/subcommittee meetings and hearings?	73	32	17	41	14	7	114	46	24
2. Please indicate your agreement or disagreement with each of the following statements or proposals (which do not necessarily reflect the views of the Select Committee or its Members) regarding committee staff:									
(a) Committee staffs, generally, are too big	69	33	20	47	10	5	116	43	25
(b) So long as committee workloads increase, committee staffs should keep pace	51	47	24	20	31	11	71	78	35
(c) Large subcommittee staffs have contributed to the fragmentation and unmanageability of the House committee system	70	30	22	44	7	11	114	37	33
(d) Subcommittee independence is a positive factor in the committee system and thus requires independent staffing	55	44	23	18	33	11	73	77	34
(e) Staffing of subcommittees should be under the control of full committees rather than function independently	57	48	16	34	22	6	91	70	22
(f) Some kind of ceiling or cap should be imposed on committee/subcommittee staffs overall	89	19	14	59	2	1	148	21	15
(g) The number of subcommittees per committee on which, under the rules, chairmen and ranking minority members have independent authority to appoint 1 staff member should be reduced from 6 to 4	65	28	29	38	9	15	103	37	44
(h) Committee minorities should be entitled to appoint a full ⅓ share of committee/subcommittee staffs	52	42	28	59	1	2	111	43	30
(i) The expansion of Members' personal staffs has become a serious problem, too	42	64	16	24	32	6	66	96	22
E. OVERSIGHT									
1. In general, do you believe that House committees are doing an adequate job of oversight?	26	84	12	3	55	4	29	139	16
2. Currently, about ½ the standing committees centralize all or part of their oversight activities in oversight subcommittees; other committees decentralize oversight through their regular subcommittees. Which arrangement in your experience, produces more effective oversight?									
(a) A single oversight subcommittee	27	39	56	14	38	17	41	77	73
(b) Each subcommittee doing its own oversight	48	24	50	32	11	19	80	35	69
(c) A combination of (a) and (b)	45	24	53	18	16	28	63	40	91
3. The Government Operations Committee under the rules, is required to review and report biennially on the oversight plans of House committees in order to assure effective coordination of oversight.									
(a) Do you believe this requirement achieves the needed coordination?	14	64	44	5	47	10	19	111	54
(b) Should the Government Operations Committee's authority to coordinate oversight be strengthened?	47	38	37	25	22	15	72	60	52
(c) Should the committee's coordinating role be eliminated?	23	60	39	16	32	14	39	92	53
(d) Should this coordinating role be assigned to the Committee on House Administration (and its Accounts Subcommittee) in connection with its consideration of committee funding resolutions?	16	65	41	10	22	19	26	87	60
(e) Should the coordinating function be performed by the House leadership?	29	53	40	14	32	16	43	85	56
4. Should committees be required to do more systematic "Foresight" work, analagous to oversight, in order to anticipate new and developing policy concerns?	90	9	23	46	8	8	136	17	31
5. Overall, are you satisfied that the legislative branch support agencies (Congressional Research Service, General Accounting Office, Congressional Budget Office, and Office of Technology Assessment) are adequately supporting the work of House committees?	88	17	17	45	13	4	133	30	21
6. If you have experienced committee oversight efforts which you believe were unsuccessful, which of the following factors, if any, were significantly responsible for lack of success:									
(a) Lack of commitment or determination on the part of the committee	71	13	38	41	3	19	112	16	57
(b) Partisan differences within the committee	24	57	41	22	23	17	46	80	58
(c) Inexperienced, untrained staff	29	52	41	13	29	20	42	81	61
(d) Too few staff	12	65	45	4	40	18	16	105	63
(e) Inadequate support from GAO, CRS, OTA, or CBO	10	3	6 4	2	3	4 4	12	6 6	8
	GAO	CRS	OTA CBO	GAO	CRS	CBO	GAO	CRS OTA	CBO
(f) Lack of cooperation from executive agency(ies)	58		25 39	34	13	15 20		82 38	52
(g) Lack of access to specialized expertise	40		40 42	20	22	20		60 62	62
(h) Inadequate planning	73		12 37	35	5	22		108 17	59
(i) Lack of clear congressional intent in statute or legislative history; absence of standards or objectives by which to measure performance	65		18 39	33	11	18		98 29	27

F. COMMITTEE COSTS REDUCTION									
1. In general, do you believe significant reductions can be realized in the cost of committee operations without reducing committee effectiveness?	69	29	24	48	7	8	117	36	32
2. Please indicate for each of the following categories of committee costs whether you believe there is a potential for signficant reductions:									
(a) Staff compensation	46	39	37	30	20	12	76	59	49
(b) Staff fringe benefits	29	47	46	14	28	20	43	75	64
(c) Travel	62	30	30	36	12	14	98	42	44
(d) Supplies and equipment	34	45	43	16	24	32	50	69	75

	Yes	No	Undecided	Yes	No	Undecided	Yes	No	Undecided
A. COMMITTEE JURISDICTIONS—OBJECTIVES									
The way in which committee jurisdictions are structured or aligned should, presumably, be related to certain general objectives. Please indicate whether you agree or disagree with each of the following possible objectives:									
1. Improved coordination in the consideration of related policy issues	30	1	1	73	2	2	103	3	3
2. Enhanced opportunity to bring a broader variety of viewpoints and expertise to bear on major policy issues	20	6	6	54	8	15	74	14	21
3. More expeditious consideration of legislation at the committee level	21	9	2	60	8	9	81	17	11
4. Greater opportunity for specialization in specific policy areas	17	6	9	57	6	14	74	12	23
5. More evenly balanced workloads among committees	23	4	5	63	6	8	86	10	13
6. Reduced need for witnesses to appear before several committees on the same subject	27	1	4	65	6	6	92	7	10
7. Greater deliberation, more selectivity, less haste in committee consideration of legislation	23	6	3	54	6	17	77	12	20
8. Reduction of jurisdictional duplication and overlap among committees	31	0	1	70	2	5	101	2	6
9. Retention of present jurisdictions and procedures so as to prevent possibility of new problems resulting from change	5	23	4	14	51	12	19	74	16
10. Discourage excessively close relationships which tend to develop between committees and the agencies and interests they oversee	16	8	8	44	17	16	60	25	24
B. COMMITTEE JURISDICTIONS—OPTIONS									
Each of the following options for dealing with committee jurisdicitons would advance one or more of the objectives listed above. For each option, please indicate whether you favor or oppose it:									
1. Provide for fewer committees with broader, more comprehensive jurisdicitons	15	15	2	40	23	14	55	38	16
2. Provide for more committees with narrower, more specialized jurisdictions	5	25	2	2	63	12	7	88	14
3. Whatever the number of committees, assure that each has broad jurisdiction over related subjects	25	2	5	62	6	9	87	8	14
4. Insofar as possible, provide exclusive jurisdiction over any one subject in one committee	27	3	2	52	9	16	79	12	18
5. Retain the present number of committees and seek objectives through transfers of jurisdiction and/or use of multiple referral procedures	13	13	6	17	38	22	30	51	28
6. Realine committee jurisdictions to correspond with—									
(a) Jurisdictions of Senate committees	4	19	9	12	38	27	16	57	36
(b) Jurisdictions of Federal departments and agencies	16	9	7	22	28	27	38	37	43
7. Abolish committees with narrower jurisdictions and lighter workloads and transfer jurisdiction to other committees	18	10	4	48	11	18	66	21	22
8. Transfer portions of the jurisdictions of committees with heavier workloads to committees with lighter workloads	17	8	7	32	19	26	49	27	33
C. SPECIFIC JURISDICTIONAL CHANGE									
1. Following are several options for organizing jurisdiction over energy. For each please indicate whether you would find the option acceptable:									
(a) Establish a single energy committee by transferring jurisdiction from existing committees	20	10	2	44	21	12	64	31	14
(b) Consolidate nontax energy jurisdiction in 3 Committees with major energy responsibility (Commerce, Science and Technology, and Interior); require sequential referral of all bills with energy provisions reported by other committees to 1 of the 3	5	20	7	18	37	22	20	57	29
(c) Concentrate energy jurisdiction in 2 committees, 1 for research and development, the other for regulation, etc	9	17	6	13	36	28	22	53	34
(d) Leave energy jurisdiction unchanged and establish an ad hoc committee, without legislative authority, for steering, policy, and coordination purposes	5	23	4	9	50	18	14	73	22
(e) Abolish joint referral of energy bills; refer each bill to the appropriate "lead" committee and provide limited sequential referral (under strict time limits) where coordination is necessary	20	6	6	32	21	24	52	27	30
2. In addition, which of the following options do you prefer:									
(a) Environmental aspects of policy should be located within the appropriate energy committee	27	2	3	43	18	16	70	20	19
(b) Environmental aspects of energy policy should be located in a separate committee	2	22	7	18	38	21	20	60	28
3. If none of the above options is satisfactory, please summarize your views or recommendations regarding energy jurisdiction [1]									
4. In view of the widely varying workloads and jurisdictions among House Committees—									
(a) Which committee(s), if any, do you believe should be abolished and their jurisdiction(s) transferred to other committees? [2]									
(b) What new committees, if any, should be established from the jurisdictions of existing committees? [3]									
5. For the committees on which you serve, please indicate by committee and subject matter those areas in which you have found significant jurisdictional conflict with other committees [4]									
6. For each of the following, please indicate whether you agree with the proposal for jurisdictional change (not necessarily those of the select committee or its members):									
(a) Transfer jurisdiction over water policy from—									
(i) Interior to Public Works	8	14	10	10	30	37	18	44	47
(ii) Public Works to Interior	11	10	11	36	13	28	47	23	39
(b) Transfer railroad transportation jurisdiction from Commerce to Public Works	12	14	6	25	28	24	37	42	30
(c) Consolidate jurisdiction over health matters in—									
(i) Commerce	14	8	10	27	22	28	41	30	38
(ii) Ways and Means	5	14	13	7	39	31	12	53	44
(iii) New Committee on Health	9	13	10	20	32	25	29	45	35
(d) Separate education and labor jurisdictions	12	11	9	33	30	14	45	41	22
(e) Combine jurisdiction over labor, postal service, and civil service in 1 committee	19	9	4	41	19	17	60	28	21
(f) Combine jurisdiction over pension and retirement programs in 1 committee	28	2	2	54	12	11	82	14	13
(g) Consolidate all environmental policy jurisdiction in 1 committee	14	12	6	39	26	12	53	38	18
7. What other specific transfers of jurisdiction between committees would you recommend? [5]									
D. INTELLIGENCE									
1. Currently, 4 House committees are authorized to receive information about CIA covert activities: Select Intelligence, Foreign Affairs, Appropriations, and Armed Services.									
(a) Should intelligence information be provided to fewer committees to protect its security?	17	7	8	24	36	17	41	43	25
(b) Should the present system be continued to assure effective oversight of covert activities?	10	13	9	31	24	22	41	37	31
(c) If fewer committees should be authorized to receive intelligence information which committee(s) should be so authorized? [6]									
2. Would you favor a single joint House-Senate Committee on Intelligence?	18	10	4	25	32	20	43	42	24

QUESTIONNAIRE 2.—COMBINED RESPONSES OF REPUBLICAN AND DEMOCRATIC MEMBERS—SELECT COMMITTEE ON COMMITTEES, JAN. 14, 1980—Continued

E. MULTIPLE REFERRAL PROCEDURES									
The referral of bills, or parts of bills, to 2 or more committees is designed to assure that all committees with jurisdiction and expertise review legislation in their fields, though the process often delays or blocks legislation. Please indicate whether you agree with the following possible changes in the multiple referral process:									
1. Impose mandatory time limits for reporting, favorably or unfavorably, all measures multiply referred (joint, split, sequential)	21	4	7	47	16	14	68	20	21
2. Abolish joint referrals and rely on split and sequential referrals	9	13	10	22	24	31	31	37	41
3. On all joint referrals, designate a lead committee and permit that committee to seek a rule, if the other committee(s) to the referral have not reported within a specified time after the lead committee reports, and manage bill on the floor	17	5	10	51	7	19	68	12	29
4. When a measure is jointly referred and subcommittees of each of the committees in the referral are considering the measure, permit those subcommittees to merge temporarily as a "special" committee to report directly to the House	10	15	7	39	14	24	49	29	31
F. ADDITIONAL RECOMMENDATIONS/COMMENTS									
See footnote 7.									

[1] Question C.3. Broad oversight by several—leadership limits time for consideration under sequential referrals.
[2] Consolidate to every extent possible, smooth out referral system.
[3] Environmental aspects must be protected.
[4] Make jurisdictions flexible—able to change from Congress to Congress.
[5] Several of the above are preferable to the present structure—hence, I have checked those which are at least better than what we have.

Mrs. MEYERS of Kansas. My colleagues will note something interesting. A majority of both Democrats and Republicans in this survey agreed that the committee system was in disarray, that the committee system revision is so necessary that it should be pursued even if Members saw themselves adversely affected by specific jurisdictional or other changes, that the number of subcommittees should be reduced and the committee staffs are too big. That is both Democrats and Republicans. And they agreed to all of this, even though it would personally affect them.

If there are issues about which a significant number of us can agree, then our goals should therefore become quite clear and we do have common ground for discussion. A former Member of Congress once said a Congressman has become an expanded messenger boy, an employment agency, a getter-outer of the Navy, Army, and Marines, a ward healer, a wound healer, troubleshooter, law explainer, bill finder, issue translator, resolution interpreter, controversy oil pourer, glad hand extender, business promoter, convention goer, civil ills skirmisher, veterans' affairs adjuster, ex-servicemen champion and watchdog of the underdog.

Does that sound familiar? That statement was made 36 years ago, in 1949. In 1965, former chairman of the House Rules Committee, Richard Bolling, a Democrat from my area of the country, also considered one of the leading experts of congressional reform, commented, "With such a patchwork of assignments which sometimes take up to 90 percent of the time of Members and their staffs, there is little time left for the primary function of a legislator, making laws."

At this time I yield to the gentleman from Illinois [Mr. MICHEL], our distinguished minority leader, who introduced the package of rules that we would like to have considered here on the floor.

Mr. MICHEL. I thank the gentlewoman for yielding, and I want to commend her for taking this special order to discuss the matter of reforming this House, a matter about which we on this side of the aisle have strong feelings.

Mr. Speaker, Rick McIntyre ought to be here in this Chamber. He isn't. His absence tells a story that could fill volumes of the CONGRESSIONAL RECORD. The events which led up to his loss of a congressional seat he rightfully won reflect a pattern of mismanagement and misuse of this institution.

This Chamber has been under Democratic control since 1955, 30 years straight. Never before in the history of this House has a party held power for so long.

Unlike wine and cheese, power does not improve with age. It tends to become corrosive and abusive. Those who hold power for that length of time forget the House of Representatives isn't their's—it's the people's.

That's why we offered the McIntyre House reform amendments. We want to make the legislative process more open, accountable and efficient. That is why the majority has done nothing with them. They don't want what we want.

The Speaker once said, "we have too much openness." I beg to disagree. We don't have enough openness. Among other things, the CONGRESSIONAL RECORD fails to present an accurate picture of what is said and done on the House floor. We're proposing to make the RECORD a verbatim account of this Chamber's proceedings.

Accountability—that's really just another word for representation. You can't represent people if you can hide your positions from them. If this Chamber is truly going to be the people's house, the key issues have to come up for debate and vote, so the people can know where their lawmakers stand. As Sam Rayburn once said: "I think this House should be allowed on great measures to work its will." On this score, the majority party has let the people down.

Key initiatives, such as enterprise zones and immigration reform remain frozen in committee. As the rules stand now, Members can petition to discharge a committee from consideration of a bill. But signatures can't be made public until they reach the required number of 218. This secrecy takes public pressure off those who haven't signed.

We proposed that the signatures be made public as soon as 100 Members sign. That figure is low enough to ensure openness yet high enough to discourage abuse of this procedure.

Congress is a billion-dollar boondoggle. Just to take 1 example, our postage costs are 10 times what they were in 1970. Last year, the House alone sent out 586 million pieces of mail. That's too much mail and a whole lot more than Congress received.

The McIntyre amendments direct the Franking Commission to study abuses in this area, with a view to achieving at least a 10-percent cost reduction.

We're proposing a number of other reforms. They'll be explained later. For now, I just want to offer this closing observation.

Eleven years ago, the Speaker was serving as majority leader. On May 9, 1974, the Democratic caucus rejected a proposal for rules reform. He explained their action with these words: "The name of the game is power, and the boys don't want to give it up."

No, the work of this House should not be a game, and its name should not be power. We're here to do the people's business as fairly and efficiently as we can. Let's acknowledge that by passing the McIntyre reform amendments.

I want to applaud the gentlewoman again for what she has done here to bring to the attention of the House that array of reforms that we now present to the House of Representatives again in the name of McIntyre reforms, because we think that symbolizes exactly what we are talking about here.

Mrs. MEYERS of Kansas. I thank the gentleman for his remarks. I appreciate his being here tonight and I congratulate our distinguished leader for introducing this package of reforms. I am pleased that the gentleman could be here with us to participate in this special order tonight.

At this time I yield to my colleague, the gentleman from Kansas [Mr. WHITTAKER].

Mr. WHITTAKER. Mr. Speaker, I commend my colleague, the gentlewoman from Kansas, JAN MEYERS, for giving us this opportunity to focus on some reforms needed to make this body more accountable and fair. Through her leadership of the House Republican Task Force on Congressional Reform, Congresswomen MEYERS is making a great contribution to making this institution more representative and democratic. As a newly elected Member of this body, JAN has distinguished herself as one who is willing and able to take on the age-old issue of making the House more fair, open, and honest.

Many of our constituents sit in the gallery of this great Chamber wondering why many of us are not here on the House floor tending to our duties. They come to understand that much of the work—indeed, most of the work—done by Congress takes place in the committee rooms scattered about Capitol Hill. With a few notable exceptions, most of the substantive battles in hammering out legislation are fought away from this Chamber, in committee.

My Energy and Commerce Committee is quickly becoming one of the most productive committees in the Congress. As the Washington Post recently observed, it's there that we shape legislation that affects every American who "breathes, drinks, eats, smokes, watches TV and movies, listens to the radio, drives, plays the stock market, needs medical care, pays for insurance, enjoys sports, worries about hazardous waste and nuclear powerplants, buys faulty products, rides the railroads or gets buried." I happen to think that's important work. That's why I am keenly concerned about the need to make membership on all House committees more fair and representative.

The minority party, the Republican Party, holds 42 percent of the seats in this House. Yet, on some of the key committees, where critical decisions are made nearly every day, we're woefully underrepresented. For instance, on the Appropriations Committee, we hold only 22 of 57 seats, or 36 percent. On the Rules Committee, which dictates the way in which every piece of legislation is considered on the House floor, we hold 31 percent of the 13 seats. On the Ways and Means Committee, we hold only 13 of the 36 seats, or 36 percent of the seats. Believe it or not, the distribution of subcommittee assignments is even less equitable than for full committee seats. That's right: of the 1,673 subcommittee slots, we Republicans hold only 39 percent.

Mr. Speaker, I respectfully request that the chart reflecting the imbalance of committee and subcommittee assignments be printed in the RECORD so that our colleagues can see the inequity which has raised my concern.

COMMITTEE AND SUBCOMMITTEE RATIOS IN THE 99TH CONGRESS

The House has 770 committee slots and 1,673 subcommittee slots (not counting slots for nonvoting delegates). If the Republican Party's share of these totals matched its strength in the House, it would have 14 more committee slots and 46 more subcommittee slots. This problem is important because these bodies often make decisions by narrow margins. And the discrepancy is greatest where it matters most. On the three exclusive committees (Appropriations, Rules, Ways and Means), Republicans have only 37 percent of the committee slots and 35 percent of the subcommittee slots, compared with their 42 percent of House seats. See the table below:

FULL COMMITTEE

[1] No subcommittees.

There are three measures pending before the House Rules Committee which would address the imbalance in committee assignments. House Resolution 24, introduced by my friend Mr. DANNEMEYER, would correct the disproportionate seating of members of House committees. House Resolution 110, the Committee Improvements Act of 1985, offered by Mr. LOTT, would restore equitable party ratios on all committees. And House Resolution 164, the McIntyre House Reform amendments, offered by the minority leader, Mr. MICHEL, would require membership to reflect the ratio of majority to minority members of the whole Congress. Mr. Speaker, each of these measures is languishing in the Rules Committee. If we had a fighting chance on that committee—or any other committee, for that matter—we might take some meaningful steps to making this body more fair and representative.

Mr. Speaker, allow me to cite one other statistic that should be of interest. In House races in 1984, where both major parties fielded candidates, Republicans won just over 50 percent of the total popular vote. But, on the committees and subcommittees of this body, we're considered lucky to have 40 percent representation. That's not fair. What's more, that 50 percent of American voters know that's not fair. They expect equity in this body. And, if they can't get if from the current majority party, they might encourage some of their friends to join them in voting for Republicans in the elections to come.

Mr. Speaker, we Republicans climbed into this ring knowing what to expect. I gladly entered my fourth term serving the people of the Fifth District of Kansas. We aren't asking the majority party's heavy-weights to take a fall. We're just asking you to give us a fighting chance.

□ 1820

Mrs. MEYERS of Kansas. I would like to thank my colleague, the gentleman from Kansas, for his incisive remarks and for calling our attention to those figures.

Mr. Speaker, I would like to yield to the distinguished chairman of the Republican Study Committee, my colleague from California [Mr. LEWIS].

Mr. LEWIS of California. I thank the gentlewoman for yielding to me.

Mr. Speaker, before going on with my own remarks, JAN, I would like to express my deep appreciation for the work that you have done in connection with the vital, indeed, the fundamental job we have to do in terms of reorganizing this House.

It is very clear to anybody who even takes a cursory review of the way this place operates that there is a need for not just light, there is a need, indeed, for radical change in the House of Representatives. If the public had an

opportunity to sit where we are, and viewed the exercise of power that we watch day in and day out, they would be more than appalled. Indeed, I think there would be the groundswell that could lead to revolution out there in the hinterlands.

It has been said many a time that power does corrupt and that absolute power corrupts absolutely. It is not the power per se in my view, but rather the arrogance that often goes with power held too long. This I say not in a partisan sense. You have heard commentary earlier regarding some of the partisan difficulties that we face in the House. But the fact is that most of the public recognizes that the vast percentage of the problems we face in this country really have very little to do with partisan politics. If we would come together representing the people, seeking change and solution to problems instead of spending so much of our time in partisan bickering. Indeed, the House would have a chance of regaining the confidence it needs on the part of the public to effectively lead.

The difficulty we have historically in our country is that oftimes one party gets a good deal of control in the House and they extend that control for too long a period of time, and with that extended control comes that element of arrogance of which I speak.

Indeed, at this point in time it is clear to those who control this place that they dominate the place, and it is their right to exercise their power at free will with little consideration for the voice of the minority. The absolutely unbelievable distortion of the committee apportionments; that which takes place in terms of using the rules here to dominate debate. The inability of people operating in a nonpartisan way to have the minority's voice heard in the mix where decisions are made is a fundamental violation of our democratic process.

It is so important that not just our Members, but America focus upon the work that you are about, my colleague, that indeed, if they begin to get an understanding, you yourself, will be responsible for a piece of that revolution that I personally am beginning to sign onto myself.

The work that you are about is not just fundamental to we who represent the minority, but I think very important to the future of the world's greatest deliberative body. This institution will be much better off as a result of your contribution, and I appreciate it.

Mr. Speaker, what we're discussing here today boils down to one question: Shall the rules of this House foster leadership or raw power?

These terms often get confused, but leadership is as different from raw power as music is from noise.

True leaders are like orchestra conductors. They strive for harmony and balance in a room full of talent and temperament. They try to make sure that no one section overpowers the others, so that everyone can contribute to the final product. Leadership is really a creative act, whether the product is a symphony or a well-crafted piece of legislation.

Now look at those who deal in raw power. Raw power isn't creative, it's destructive. Instead of working for harmony, power players just turn up the volume and try to drown out anyone who disagrees. They might get a fleeting rush of satisfaction from making the loudest noise, but they don't make anything of value.

Leadership makes us proud. Raw power leaves us bitter.

The great leaders of the House always understood this. Perhaps the greatest of them all was Sam Rayburn. He put it this way:

> We're all grown up now. A man's got to lead by persuasion and kindness and best reason . . . You can't lead people by driving them.

Just as musicians or craftsmen respect their instruments, true leaders take care not to abuse the rules of the House. Again, Sam Rayburn set the example. He didn't arbitrarily fix committee ratios; instead he relied on the Parliamentarian of the House, Lewis Deschler, to work out a fairly routine process for translating party strength in the Chamber to party strength in committees.

Unfortunately, not every officer of the House has been a Sam Rayburn. At some points in history, the rules have been abused. In 1910, the Republicans were in the majority, a position they had held for 15 years straight. Over that period, they had lost sight of the need for harmony and balance. Their leaders grew rude and arrogant—even to their own rank and file.

Resentment grew. Eventually a bipartisan coalition rose up and forced reforms in the rules. An Alabama Democrat named Oscar Underwood explained the reformers' case in words that have a contemporary ring:

> We are fighting a system and that system is the system that enables the Speaker, by the power vested in him, to thwart and overthrow the will of the majority membership of this house.

One of the reforms that grew out of this revolt was the discharge petition. And now, 75 years later, the discharge petition is again part of a reform movement. Thwarted time and again in our efforts to bring key issues up for a floor vote, we want to make the discharge petition a more effective instrument by bringing it into the sunshine.

Does reform have a chance in 1985? I think it does. Many Members on both sides of the aisle are distressed at the way the House is run. In fact, even the Speaker and the majority leader have spoken of the need for fairness and civility. In 1977, the Speaker made these promises on taking office:

> I pledge to be patient, good-tempered and courteous toward individual Members. I pledge best to employ the talent of the House for full and fair consideration of issues that come before us. . . . I pledge to remain cool and unshaken, guarding the permanent laws and rules of the House from being sacrificed to temporary passions, prejudices and interests.

And here's what the majority leader wrote in his fine book "Reflections of a Public Man:"

> The assumption of mutual honor, I have come to learn, is not merely a staid and stuffy formal prop for sagging egos. It is part of the very oxygen which fuels the bloodstream of the Congress. Without it, our national task of legislating would be a vastly different and more difficult thing.

Well, I'm afraid that the task of legislating has become different since the days of Sam Rayburn—and the officers of the majority must take their share of the responsibility. Their actions have not always matched their words. But it doesn't have to be that way. The House of Representatives can be a place of harmony and balance, a place ruled by reason instead of raw power. And reforming the rules can be a good first step toward that goal.

Mrs. MEYERS of Kansas. I thank the gentleman from California [Mr. LEWIS].

Mr. Speaker, at this time I would like to read a quote from Mr. Bolling, who worked very hard. A Democrat from the Kansas City area who worked very hard on Rules, and in his Book entitled, "A House Out of Order," written in 1965, Mr. Bolling stated:

> The Legislative Reorganization Act of 1946 appeared to make great changes in the institutional form of the Congress. However, time has brought disappointment. The reduction in the number of standing committees has been offset by the creation of more and more standing subcommittees within each full standing legislative committee. The work of Congress, therefore, remains fragmented and uncoordinated.

Mr. Speaker, I yield to the gentleman from Pennsylvania [Mr. RIDGE].

Mr. RIDGE. I thank the gentlewoman for yielding.

Mr. Speaker, I want to commend the gentlewoman for her initiative. A process as important as policy and the positive approach that you have taken toward institutional reform and hopefully, the bipartisan support that you are trying to nurture through this initiative is indeed an admirable one, and I appreciate the time to share a few thoughts with you and exchange a few ideas with you as part of that process.

I believe there is a quote attributed to Alexander Hamilton about the House of Representatives. It says: "Here, sir, the people govern."

Having served just a term and a half, and still pretty much a novice, but

having been around long enough to appreciate the process, I kind of suspect that if the people knew precisely and accurately how we govern, they would yearn for many of the same reforms that the gentlewoman is promoting.

I think the approach that the gentlewoman has taken is not a critical one, it is a constructive one. Indeed, all legislators on both sides of the aisle hopefully will view your efforts and similar efforts in the future in that fashion. I know that in the resolution that you have drafted and are promoting there are many institutional reforms, and I wanted to just address a couple of them in a very practical and real way confronting the problems that you and I and our fellow legislators confront on a day-to-day basis.

The oversight reform recommendation that you have included in your package is indeed a necessary one, and you suggest that committees would be required to formally adopt and submit to the Government Operations Committee by March 1 of the first session their oversight plans for that Congress.

□ 1830

Coincidentally, it matches very comfortably with a view that I have that we would be a lot better off if we went to a 2-year budget process and exercised a great deal more oversight. We have tendency, as an institution, to be very responsive to problems, often in a crisis situation, and we respond to those problems more often than not in a bipartisan effort, and we respond to them by authorizing and then appropriating money, hoping to find a solution. Rarely do we follow the money out the door to see whether or not it properly addressed and then redressed the problems that we initially confronted.

So the oversight reform indeed is an important measure.

The multiple referral to committees, we saw a perfect example of that particular problem today with regard to the synfuels debate that we had on the floor. Clearly, we had an issue that our fellow Congressmen and Congresswomen wanted to address. There were some policy objections, of course, to the Synfuels Program and there was a concern, some procedural objections, that the individual committees that had concurrent jurisdiction had not had the opportunity to work their will.

Indeed, we have such a decentralized system that we literally have hundreds of committees and subcommittees, and multiple referral has not proven to be as effective as it has proven to be somewhat cumbersome, and then, again, the situation that we saw today is clearly a demonstration of that problem.

Proxy voting, I think it is pretty clear, is a tool, a mechanism, that is used again by our colleagues on both sides of the aisle. I am not confident at all that it is used in a manner that responsible legislators approve of, although it is a necessity at times because again of the decentralized nature of our system, the reliance on efforts in the committees and subcommittees, and when we have that proliferation of subcommittees and we have competing demands on individual legislators' time, it is, therefore, not unusual or unique that we would have a proxy voting mechanism.

But clearly, if we are to meet the gentlewoman's objective, and I think the objective of responsible legislators everywhere to have a responsive and responsible system, a representative system, then clearly we do not want to abuse our responsibility as legislators, and clearly when those many, many occasions arise when we all leave proxies to be voted on our behalf, oftentimes in support of or against individual amendments that we may only have a vague idea about, and as we well know, many of those amendments arise spontaneously and the vote can be cast on an amendment, procedural or substantive, by someone holding our proxy, and we have not addressed that ourselves and left explicit instructions. I am not saying it is an abuse of the process; I am saying that because of the decentralized nature of our system, we come to rely on it too heavily.

The gentlewoman has also asked this body to take a look at the number of committees and subcommittees and I think that ties neatly in with that recommendation that you have made, as well, and indeed it is a very strong one and hopefully one that will be endorsed by majority Members on both sides of the aisle.

Finally, scheduling reform, as the gentlewoman well knows and appreciates, during this 1st session of the 99th Congress, the responsibilities of individual Members, you have read the litany, a marvelous litany of tasks that we are called upon to do on a daily basis. If we narrowed it down, I guess we would have to say that we have to be ombudsmen and deal with bureaucracy and help our constituents work their way through the system, and we have to be legislators and have to do all those other things that you mentioned in that litany.

Yet, we rarely have a schedule that we can rely upon, that our staffs, who work so diligently with us can rely upon to serve the constituents who send us here. So often it is the case that we begin the week not knowing when the week will end. It is difficult if not impossible to schedule functions at home, meetings with constituents at home, addressing those real problems, real personal and people problems back home in the district.

So I realize the gentlewoman has prepared a summary of quite a few recommendations, and I appreciate the opportunity to express my support for her initiative and my particular concern about four or five of these particular areas.

Mrs. MEYERS of Kansas. I would like very much to thank the gentleman from Pennsylvania for being with us tonight and participating in this special order and for emphasizing those particular reforms that he thinks are most important.

Mr. Speaker, it is interesting to note that the House has 770 committee slots and 673 subcommittee slots, not counting slots for nonvoting delegates.

If the Republican Party's share of these totals matched its strength in the House, it would have 14 more committee seats and 46 more subcommittee seats. This inequity is important because these bodies often make decisions by narrow margins. The discrepancy is greatest where it matters most.

On the three major committees, Appropriations, Rules, and Ways and Means, Republicans have only 37 percent of the committee slots, and 35 percent of the subcommittee slots, compared with 42 percent of the House seats.

This is only one example of the types of reforms that we are suggesting, and I urge that my colleagues on both sides of the aisle join me in making the House of Represenatives more fair and efficient. We hope that the discharge petition is successful and that we will be considering this package of rules that was submitted by our distinguished minority leader.

These do have to do with a number of reforms that have already been mentioned by my colleagues tonight: Oversight reform, multiple referral of legislation, the joint referral of bills to two or more committees would be abolished and replaced by a system wherein the Speaker would designate a committee of principal jurisdiction.

Committee elections and organization. The House would be required to elect its committees not later than 5 legislative days after the convening of a Congress. This year I think it was into February before all of our committees were appointed.

Committee ratios. The party ratios on committees, which we have already referred to on several occasions, would be required to reflect the party ratio in the House, and especially on those important committees of Appropriations, Ways and Means, and Rules.

Subcommittee limits. Each House committee except Appropriations would be limited to not more than six subcommittees.

A proxy voting ban. I do not know how many Americans know that frequently so much of the work in this body is done in committees. Many im-

portant votes are cast in committees, and I do not know how many of our constituents know that many of these votes are cast by proxy, by a piece of paper that we sign a day ahead of time.

As one of my colleagues mentioned, it is sometimes necessary now, because if we have two committees that are scheduled at the same time, it is necessary that one sign one of the proxies. However, if we had scheduling reform and did not have such a proliferation of committees and subcommittees, it would not be necessary to rely so heavily on proxies.

Majority quorums. A majority quorum would be required for the transaction of business on all committees and subcommittees.

Committee documents. All committee documents and prints would require the formal approval of the committee and must carry a clear disclaimer to the contrary on their cover if it has not been approved by the full committee.

There are many of these rules. All Rules Committees reporting on special rules providing for the consideration of legislation would be required to include a justification and explanation of any comments received from the Budget Committee on any Budget Act waivers. It is important that if we have to waive the Budget Act that we explain why; that there be a strong justification for doing so.

Reforms in committee staffing. In riders, appropriations riders, the present rule prohibiting limitation amendments to appropriation bills, unless a complicated procedure is gone through, would be abolished, thus permitting limitation amendments to be considered simultaneously with other amendments.

Measures could not be considered under suspension of the rules unless by direction of the committees of jurisdiction or upon written request by the chairman and ranking member of the committees of jurisdiction.

Copies of discharge motions and signatures would be made available by the Clerk for public inspection at any time after 100 Members have signed the motion. Now no one can see who has signed discharge petitions.

□ 1840

Verbatim accounts of floor and committee remarks would be required in the published RECORD and made clearly distinguishable from any extensions or extraneous material. Any substantive alteration of floor or committee verbatim accounts would be subject to investigation by the Ethics Committee. Members or their designees would still be permitted to make technical, grammatical, or typographical corrections, of course, in their verbatim remarks, but not substantive changes.

A new House broadcast rule would establish a House broadcast system under the authority of the Speaker and a bipartisan broadcast advisory board.

The Committee on Rules would be authorized and directed to study the operation of House rule XI regarding committee procedures and staffing, the number of subcommittee and member subcommittee assignments, and report back its findings and recommendations to the House; and certainly House scheduling reform so we do not end up with overlapping committees. It would involve the Speaker of the House in consultation with the majority and minority members, and the Rules and House Administration Committees would be authorized and directed to study current House scheduling with a view to implementing a system of full work weeks, designated committee meeting times, a fixed legislative floor schedule, and established district work periods, and report the findings to the full House.

The House Commission on Congressional Mailing Standards would be authorized and directed to study the current House franking rule. The committee must approve by vote with quorum present the hiring of consultants or temporary staff detailed with other agencies. No committee report could be filed until the chairman has consulted with the ranking minority member, making the committees much more representative.

There are 25 suggested reforms here. If this body could discuss this for 10 hours, I think it would be educational. It would reveal to the American people some of the abuses that I think are going on and some of the problems in scheduling that all of us on both sides of the aisle have.

Mr. Speaker, I appreciate very much the participation of my colleagues in this special order tonight, and I urge all Members to sign the discharge petition so that we can consider this package of rules.

● Mr. DAUB. Mr. Speaker, I have introduced a resolution which will permit the American people true representation in Congress by prohibiting the use of proxy voting in the committees of the House of Representatives. If it is true, as Woodrow Wilson once commented, that "Congress at work is Congress in committee," then we should adopt this resolution to insure the integrity of the proceedings.

The vast bulk of the truly significant work and legislative decisions made by the House of Representatives are accomplished through committees. Given the size of our membership and the complex nature of the business at hand, there can hardly be any alternative. Our fundamental responsibilities to maintain the integrity of the legislative process, however, are not lessened because we chose to proceed under this committee system.

Now I understand the arguments for maintaining proxy voting:

"There are just too many votes."

"There are too many issues."

"There are too many meetings."

"There are too many commitments of my time."

I do not understand, however, what any of those arguments have to do with the basic notion of responsible Government. Is it too much to ask our Members to represent their particular constituents' interests in person? Do the Members have any more important interests that their participation on the floor and in committee? Are our Members so overworked that having to cast important votes in person will stretch them too far? I doubt it.

My colleagues on the other side of the aisle are frequently extolling the virtues of opening up the system of Government and being truly democratic—with a small d. There is much talk of participation openness and candor in the process. Yet the reality is that the committee system in conjunction with proxy voting vests a committee chairman with the ability to manipulate the committee function. Committee chairmen frequently can acquire a majority of votes through proxies on a partisan basis and eliminate the reason for any Member to attend the committee meeting, listen to testimony in the committee meeting, or even vote in the committee meeting.

Even with this kind of abuse, the issue is something much more than simply a partisan matter. Proxy voting strikes at the fundamental principles of our democratic system of Government; the right of Americans to travel to the seat of Government and be heard, the right of Americans to expect legislation to develop from meaningful debate and compromise, and the right of Americans to expect that their Representative is just that—"Representative."

Visit most any committee function on any given day and then try to suggest to me that the testimony is being heard and understood by all the Members, that there is meaningful debate, and that all the interests of each of the members of the committee are being represented. How can we be truly responsive to the issues of the day when Members infrequently attend hearings and only participate when necessary to accompliish some parliamentary procedure? Morever, how can we be truly democratic when Members hold a fistful of proxies and the issues are resolved by a single Member before the debate even begins? Without meaningful participation by all committee members, the

committee system is only expedient, certainly not democratic.

For this reason, I urge all my colleagues to join with the 42 Members from both sides of the aisle who have cosponsored House Resolution 154. The integrity of the system and our democratic principles are at issue.●

● Mr. LOTT. Mr. Speaker, I am pleased to join in this special order of the gentlelady from Kansas [Mrs. MEYERS] on the subject of House rules reform. I not only want to commend the gentlelady on taking this special order, but on her initiative on introducing a special rule as the first step in bringing the Republican House reform package to the floor under the discharge procedure.

Mr. Speaker, as a member of the minority party on the Rules Committee I am all too familiar on how difficult it is to bring any meaningul House reform proposals to the floor. For three consecutive Congresses now I have introduced a package of House reform proposals called the "committee improvement amendments." On occasion my majority colleagues have been kind enough to grant me a hearing, but nothing much has happened beyond that. Why? Well, I think it should be obvious that the majority is fairly comfortable with the status quo—our present way of doing things. And, I suspect if we had been in control of the House for as long as the Democrats have, we might also have that attitude of not wanting to make waves or rock the boat.

Many of these rules do work to the advantage of the majority. Proxy voting and lopsided majority party representation on committees are but two examples. They make it easier for the majority to operate and prevail. But that begs the question of whether they are fair or democratic procedures. The fact is, they are neither. We need to abolish proxy voting and restore equitable party ratios on committees as the Republican reform package would do.

Another central problem of our institution is the proliferation of subcommittees we've had over the last decade. I think at last count there were some 146 House subcommittees—up from 119 just 10 years ago—a 22-percent increase. And yet, the number of standing committees has remained relatively constant over that period. The number of House Members has remained the same. What all this means is that we have the same people with the same time available expected to do much more work. Many Members have over six subcommittee assignments. We're spread too thin, and as a result we're doing a poor job of legislating. It's little wonder that the majority needs such phantom legislative devices as proxy voting and one-third quorums to do business.

What the Republican reform package would do would be to limit each committee, except Appropriations, to no more than six subcommittees, and each Member to no more than four subcommittee assignments.

This would result in the elimination of some 16 subcommittees—an 11-percent reduction. It would also result in a substantial reduction in the number of subcommittee assignments of Members.

Not only would these changes make it possible to eliminate the need for proxy voting and to restore majority quorum requirements, as our package would do, but they would make possible a reduction in committee staff. Our proposal would call for at least a 10-percent reduction in existing committee staff. Moreover, it would require the House to establish and abide by overall committee staff ceilings each year before committee expense resolutions are adopted. With the reduction in subcommittees there should be no problem in reducing the staff we have. House committee staff is now around 1,800—up over 100 percent from a decade ago. While a case might be made that we were understaffed then, an even stronger case can be made that we are highly overstaffed now.

Mr. Speaker, while I have not touched on all of the provisions in the Republican reform package, I have attempted to focus on the central problems of this institution and how we would resolve them. I hope the Rules Committee will break with precedent and take a serious look at what has been sincerely proposed on this side. Although this is a Republican initiative, it is not partisan. I think my colleagues will agree after looking at this that it is in the best interests of the House as an institution to make our workload more manageable and our procedures more fair and democratic. I again commend our House reform corps group for taking this special order and keeping these issues before us.●

● Mr. McKERNAN. Mr. Speaker, I am pleased to have the opportunity to speak today on the issue of House rules reform. In the day-to-day flurry of legislative activity, it is easy to lose sight of the importance of focusing on the rules which govern House proceedings. Yet, they are the mechanism which ensures that major legislative business will be carried forward. House rules are the vehicle which should enable all Members of Congress, and thus all citizens of the United States, to have a fair and equal opportunity to be represented in the legislative process.

Rules are the wheels and sprockets of the legislative process—they need constant attention to ensure that they are in good working order. It is clear, however, by the very fact that we are here today, that all is not in good working order in the House. We are all too well aware that the McIntyre-McCloskey seating dispute involving Indiana's Eighth District came as close as any event in recent history to derailing this body from its proper legislative track. We must not forget the lessons we learned from this event.

The McIntyre-McCloskey issue developed into more than just a question of who won and who lost on November 6, 1984. Likewise—the issues that are being discussed today, such as committee ratios and quorums, and numbers of subcommittees—go far beyond being a question of mere numbers. The McIntyre-McCloskey issue helped focus attention on the problems in this institution. These problems are often cast in a partisan light, but they affect every Member of the House, and, more importantly, every one of his or her constituents.

Issues such as committee ratios, proxy voting in committees, the proliferation of subcommittees, the franking privilege, scheduling of the workload of the House—must be examined, and reforms made, if we are to carry out the business of the House as the founders of our country intended.

As just one example, the overall underrepresentation of the minority party on committees and subcommittees is well-documented. And, the overriding importance of the committee and subcommittee system in legislative decisionmaking only serves to magnify this imbalance.

Another issue of recurring interest is the accuracy of the CONGRESSIONAL RECORD. The importance of ensuring that the RECORD is an accurate representation of the proceedings of the House cannot be overestimated. The CONGRESSIONAL RECORD is supposed to be an accurate and precise record of this body's proceedings—and it is our collective duty to ensure that it is by enacting reforms to help make the RECORD truly a verbatim account of what happens on the floor.

Our serious consideration of these and other reforms is imperative. I commend my colleague, Congresswoman MEYERS, for her leadership on this issue, and look forward to working with her to achieve this goal.●

● Mr. MILLER of Ohio. Mr. Speaker, last week, in an effort to give notice that a majority of the Members of the House were against the House rule that presently permits each Member of this body to send out, at Government expense, six districtwide postal patron mailings a year, I offered an amendment to cut $10 million from the official mail account of the legislative appropriations bill. Though this amendment fell a few votes short of passage, in retrospect I felt that if I had been able to present this issue in a

more direct fashion it may have passed.

Toward this end, I plan to introduce a bill to amend the House rule that presently permits each Member of this body to make six postal patron mailings a year from six to three annually. As I mentioned in my floor remarks last week, this could result in savings in mail costs alone of up to $22 million a year.

We heard during the debate on the legislative appropriations bill how our incoming mail has increased over the years and how the appropriations allocation for official mail was a bareboned proposal. Little mention was made of the fact that only 3 to 4 percent of the mail costs incurred by the legislative branch of Government go for personal letters to constituents.

What then, one is compelled to ask, does the balance of this official mail account pay for? The largest and most costly form of mail sent out by the Congress is clearly newsletter mail sent out under the bulk rate. Figures show that almost three times as much mail is sent out by the Congress as it receives, and that, not too surprisingly, the year's when the volume of outgoing mail are the highest are the even numbered election years when Members of Congress are most intent in telling their respective constituencies of the great job they are doing. I don't think anyone in this Chamber can in good conscience deny that six districtwide postal patron mailings annually are an unnecessary extravagance that we as Members of Congress could and should cut back on.

It is one thing to talk of reform, it is another thing to act on it. I hope this body will have what it takes to follow through on many of the proposals put forth here today. We talk of efficiency and fairness in Government—it is time we started practicing it.●

● Mr. LAGOMARSINO. Mr. Speaker, I'd like to commend the gentlelady from Kansas for bringing this matter to the attention of the House and our viewing audience. Those who watch us on TV must wonder from time to time at the things that go on on the House floor. With good reason.

What they are watching, in essence, is a rigged game. The rules are rigged in favor of the majority party, the party of the Speaker, the Democrats. Because they have a majority of the votes in the House, they operate as they please. Unlike any other Government body, agency, or court in this land, the the Congress makes it own rules. And when it feels like it, it breaks them with impunity. It is a tyranny of the majority, with no rights accorded to the minority. This despite the fact that in the last Congressional elections, last November, nearly half the people who voted, voted for the Republican candidate for the House. These voters, in effect, are disenfranchised by the rules adopted by the Democratic majority in the House.

Rules, for example, that deny Republicans seats on House committees in proportion to their numbers. That deny us a fair share of the staff appointments on House committees, and a fair share of the operating funds.

But the minority party and the people they represent are not the only ones who are cheated by these rules. The public as a whole, Democrats, Independents, and Republicans are denied access to and knowledge of House processes, by such practices as systematic falsification of the CONGRESSIONAL RECORD and committee hearing transcripts, by committees which operate without quorums and with proxy votes, and by the regular waiver of even those stacked House rules, even of the law, whenever it suits the needs of the majority leadership.

How long can this body continue to operate with a stacked deck? How long will it be before people begin to realize that the largest democratic body in the most democratic of nations operates under autocratic rule? That there are no rights for the minority in this House?

I submit, Mr. Speaker, that this charade will not go on indefinitely. The people watching us today, on TV sets in living rooms across the Nation, are aware of what is happening. They see the rules invoked against our rights as a minority. Even more important, they see the results of this tyranny; a budget which violates every rule of the House; a deficit which prevents people from buying homes; a national debt which our great-grandchildren will still be paying off; and a House which by its own rules shames the very concept of fair play and democratic rule.●

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mrs. VUCANOVICH) to revise and extend their remarks and include extraneous material:)

Mr. GROTBERG, for 5 minutes, today.

Mr. MCDADE, for 5 minutes, today.

(The following Members (at the request of Mr. EVANS of Illinois) to revise and extend their remarks and include extraneous material:)

Mr. ALEXANDER, for 5 minutes, today.

Mr. LANTOS, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. SOLARZ, for 5 minutes, today.

Mr. MARTINEZ, for 5 minutes, July 25.

Ms. OAKAR, for 60 minutes, July 30.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. COUGHLIN, following the remarks of the gentleman from North Carolina [Mr. BROYHILL], on House Resolution 227, in the House, today.

Mr. DREIER of California, following the remarks of the gentleman from Ohio [Mr. REGULA], on House Resolution 227, in the House, today.

Mrs. ROUKEMA, following the remarks of Mr. BARTLETT during consideration of H.R. 3038, in the Committee of the Whole, today.

Mr. GREEN, in support of the Whitten amendment during consideration of H.R. 3037, in the Committee of the Whole, today.

(The following Members (at the request of Mrs. VUCANOVICH) and to include extraneous matter:)

Mr. SCHUETTE.
Mr. KEMP in three instances.
Mr. PORTER.
Mr. GROTBERG.
Mr. GINGRICH.
Mr. BROOMFIELD.
Mr. ROTH.
Mr. COBEY.
Mr. JEFFORDS.
Mr. MICHEL in two instances.
Mr. HENDON.
Mr. GEKAS in two instances.
Mr. CRANE.
Mr. MCCAIN.
Mr. GREGG.
Mr. WYLIE in two instances.
Mr. BOULTER.

(The following Members (at the request of Mr. EVANS of Illinois) and to include extraneous matter:)

Mr. DURBIN.
Mr. RANGEL.
Mr. FASCELL in two instances.
Mr. KOLTER.
Mr. DYSON.
Mr. MATSUI.
Mr. HAMILTON.
Mr. STALLINGS.
Mr. COELHO in two instances.
Mr. HUBBARD.
Mr. MAVROULES.
Mr. FORD of Michigan.
Mr. GEJDENSON.
Mr. VENTO.
Mr. SKELTON.
Mr. SCHUMER.
Mr. DOWNEY of New York.
Mr. LEVIN of Michigan.
Mr. AUCOIN.
Mr. SMITH of Florida.
Mr. LEHMAN of Florida.
Mr. DWYER of New Jersey.
Mr. HOYER.

JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee did on this day present to the President, for his ap-

proval, a joint resolution of the House of the following title:

H.J. Res. 106. Joint resolution designating August 1985 as "Polish American Heritage Month".

ADJOURNMENT

Mrs. MEYERS of Kansas. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 43 minutes p.m.) the House adjourned until tomorrow, Thursday, July 25, 1985, at 10 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1744. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to limit the price of scientific and technical reports sold by the Secretary of Commerce to their fair market value, and for other purposes; to the Committee on Energy and Commerce.

1745. A letter from the Director, Defense Security Assistance Agency, transmitting the Department of the Army's proposed Letter of Offer to Korea for defense articles and services estimated to cost $53 million, pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

1746. A letter from the President of the United States, transmitting a report on the justification for request for appropriations to meet unexpected urgent refugee and migration needs, pursuant to 22 U.S.C. 2601(c)(3); to the Committee on Foreign Affairs.

1747. A letter from the Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting a report of political contributions for John Blane, of Illinois, as Ambassador to the Republic of Chad, pursaunt to 22 U.S.C. 3944(b)(2); to the Committee on Foreign Affairs.

1748. A letter from the Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting a report of political contributions for Richard W. Bogosian, of Maryland, as Ambassador to the Republic of Niger, pursuant to 22 U.S.C. 3944(b)(2); to the Committee on Foreign Affairs.

1749. A letter from the Administrator, Veterans Administration, transmitting a draft of proposed legislation to amend title 38, United States Code, to clarify the authority of the Chief Medical Director or designee regarding disciplinary actions on certain probationary title 38 health care employees; to the Committee on Veterans' Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. FASCELL. Committee on Foreign Affairs. H.J. Res. 3 Joint resolution to prevent nuclear explosive testing (Rept. No. 99-221. Referred to the House Calendar.

Mr. DIXON. Committee on Appropriation. H.R. 3067. A bill making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1986, and for other purposes. (Rept. No. 99-223. Referred to the Committee of the Whole House on the state of the Union.

Mrs. BURTON of California. Committee on Rules. H. Res. 235. A resolution providing for the consideration of H.J. Res. 187, a joint resolution to approve the "Compact of Free Association", and for other purposes. (Rept. No. 99-224. Referred to the House Calendar.

[Omitted from the Record of July 23, 1985]

REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of rule X, bills and reports were delivered to the Clerk for printing, and bills referred as follows:

Mr. MITCHELL. Committee on Small Business. H.R. 2540. A bill to authorize the appropriation of funds to the Small Business Administration, and for other purposes, with an amendment, referred to the Committee on the Judiciary for a period ending not later than September 24, 1985, for consideration of section 9 of the amendment. (Rept. No. 99-222, Pt. I). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. TORRICELLI (for himself, Mr. VOLKMER, Mr. SCHEUER, Mr. FUQUA, Mr. LUJAN, and Mrs. SCHNEIDER):

H.R. 3065. A bill to amend the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 to authorize a program of research, development and demonstration for innovative or experimental treatment technologies for use in remedial actions; jointly, to the Committees on Energy and Commerce, Public Works and Transportation, and Science and Technology.

By Mr. YOUNG of Missouri (for himself, Mr. SHAW, Mr. OBERSTAR, Mr. GRAY of Illinois, Mr. TOWNS, Mr. STANGELAND, Mr. PETRI, and Mr. SUNDQUIST):

H.R. 3066. A bill to authorize the Architect of the Capitol to redesign and reconstruct the East Plaza of the U.S. Capitol in order to provide increased security and for esthetic purposes; to the Committee on Public Works and Transportation.

By Mr. DIXON:

H.R. 3067. A bill making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1986, and for other purposes.

By Mr. BURTON of Indiana:

H.R. 3068. A bill to promote equitable personnel practices and to eliminate discrimination within the Federal civil service; to the Committee on Post Office and Civil Service.

By Mr. DELLUMS:

H.R. 3069. A bill authorizing the President to issue a posthumous commission of brigadier general to Lt. Col. Charles E. Young, U.S. Army; to the Committee on Armed Services.

By Mr. DIOGUARDI:

H.R. 3070. A bill to provide housing assistance to the homeless through emergency food and shelter, renovation and conversion of facilities for use as shelters, and provision of housing and services in the transition to independent living; to the Committee on Banking, Finance and Urban Affairs.

By Mr. GRAY of Illinois:

H.R. 3071. A bill to prevent the denial of employment opportunities by prohibiting the use of lie detectors by employers involved in or affecting interstate commerce; to the Committee on Education and Labor.

H.R. 3072. A bill to direct the Administrator of General Services to renovate the public building at 425 Second Street, NW. in the District of Columbia for use as a homeless shelter; to the Committee on Public Works and Transportation.

By Mr. GROTBERG:

H.R. 3073. A bill to amend the Internal Revenue Code of 1954 to provide a mechanism for taxpayers to designate overpayments of income tax for purposes of reducing the public debt of the United States; to the Committee on Ways and Means.

By Mr. JEFFORDS (for himself, Mr. VENTO, Mrs. SCHNEIDER, Mr. KOSTMAYER, Mr. TOWNS, Mr. GEJDENSON, Mr. MACKAY, and Mr. MARKEY):

H.R. 3074. A bill to grant the consent of Congress to two or more States to enter into compacts for the purpose of developing conservation and electric power plans and for other purposes and to delegate the authority to regulate certain rates for the sale of electricity at wholesale to the States; to the Committee on Energy and Commerce.

By Mr. McDADE:

H.R. 3075. A bill to amend the Trade Act of 1974 to ensure reciprocal trade opportunities, and for other purposes; jointly, to the Committees on Ways and Means, Foreign Affairs, Energy and Commerce, Judiciary, and Rules.

By Mr. AUCOIN (for himself, Mr. ST GERMAIN, Mr. GONZALEZ, Mr. BOLAND, Mr. WYLIE, Mr. MCKINNEY, Mr. FOLEY, Mr. ANTHONY, Mr. ARCHER, Mr. BARTLETT, Mr. BORSKI, Mr. CAMPBELL, Mr. CARPER, Mr. CARR, Mr. CHANDLER, Mr. COELHO, Mr. COUGHLIN, Mr. DAUB, Mr. DICKS, Mr. DREIER of California, Mr. ERDREICH, Mr. FAUNTROY, Mr. FRANK, Mr. GREEN, Mr. GROTBERG, Mr. HOYER, Mr. HILER, Mr. KANJORSKI, Ms. KAPTUR, Mr. KEMP, Mr. KLECZKA, Mr. KOLBE, Mr. LAFALCE, Mr. LEHMAN of California, Mr. LEVIN of Michigan, Mr. LOEFFLER, Mr. LUNDINE, Mr. MANTON, Mr. MCCOLLUM, Mr. MCDADE, Mr. MITCHELL, Mr. MORRISON of Connecticut, Mr. NELSON of Florida, Mr. SHUMWAY, Mr. TORRES, Mr. VANDER JAGT, Mr. WATKINS, Mr. WORTLEY, and Mr. WYDEN):

H.J. Res. 350. Joint resolution to designate the week of October 6, 1985, through October 13, 1985 as "National Housing Week"; to the Committee on Post Office and Civil Service.

By Mr. BURTON of Indiana:

H.J. Res. 351. Joint resolution to condemn the government of Vietnam for violations of human rights; to the Committee on Foreign Affairs.

By Mr. GARCIA:

H.J. Res. 352. Joint resolution to designate November 11, 1985, as a day to honor the musical works of Irving Berlin; to the Committee on Post Office and Civil Service.

By Mr. MICA:

H.J. Res. 353. Joint resolution to provide that the funds appropriated for the Commission on the Ukranian Famine shall remain available until expended; jointly, to the Committees on Foreign Affairs, and Appropriations.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BIAGGI:

H.R. 3076. A bill for the relief of Joseph-Paul Ferraro and Weiner Broadcasting Co.; to the Committee on Energy and Commerce.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 56: Mr. GINGRICH, Mr. SPENCE, Mr. YOUNG of Alaska, Mr. STUMP, and Mr. LEWIS of Florida.

H.R. 72: Mr. SLAUGHTER.

H.R. 79: Mr. SMITH of New Hampshire.

H.R. 147: Mr. HOWARD.

H.R. 237: Mr. ANDERSON, Mr. DELAY, Mr. GONZALEZ, Mr. LEVIN of Michigan, and Mrs. LLOYD.

H.R. 580: Mr. MOODY, Mr. EDGAR, and Mr. MAZZOLI.

H.R. 976: Mr. DUNCAN.

H.R. 1207: Mr. CLAY.

H.R. 1284: Mr. OWENS, Mr. NEAL, and Mr. FEIGHAN.

H.R. 1353: Mr. LOWRY of Washington.

H.R. 1508: Mr. VENTO, Mr. HEFTEL of Hawaii, Mr. BERMAN, Mr. CROCKETT, Mr. SCHEUER, Mr. GOODLING, and Mr. WILSON.

H.R. 1591: Mr. NIELSON of Utah, Mr. CLINGER, Mr. PETRI, Mr. HENRY, Ms. KAPTUR, Mr. SUNIA, and Mr. APPLEGATE.

H.R. 1616: Mr. HEFTEL of Hawaii and Mr. MATSUI.

H.R. 1659: Mr. WRIGHT, Mr. GRAY of Pennsylvania, Ms. FIEDLER, Mr. ATKINS, Mr. BRYANT, Mr. HILER, Mr. JACOBS, Mr. KLECZKA, and Mr. LEVIN of Michigan.

H.R. 1719: Mr. BURTON of Indiana.

H.R. 1985: Mrs. SCHROEDER.

H.R. 2025: Mr. THOMAS of California, Mr. MINETA and, Mr. MCCANDLESS.

H.R. 2119: Mr. LEHMAN of Florida and Mr. YATES.

H.R. 2162: Mr. LUNDINE.

H.R. 2226: Mr. LUKEN.

H.R. 2337: Mr. OLIN.

H.R. 2472: Mr. SUNIA.

H.R. 2504: Mr. OWENS, Mr. STUDDS, Mr. O'BRIEN, Mr. UDALL, Mr. DASCHLE, Mr. MAVROULES, Mr. WEAVER, Mr. DWYER of New Jersey, Mr. MORRISON of Connecticut and Mr. SCHUMER.

H.R. 2522: Mr. MCKINNEY and Mr. SAVAGE.

H.R. 2578: Mrs. BENTLEY, Mrs. BOXER, Mr. DORNAN of California, Mr. HORTON, Mr. LAGOMARSINO, Mr. LEVIN of Michigan, Mr. MARTINEZ, Mr. MRAZEK, Mr. NELSON of Florida, Mr. ORTIZ, Mr. ROE, Mr. SHELBY, Mr. SMITH of New Jersey, and Mr. WAXMAN.

H.R. 2587: Mr. HYDE, Mr. DARDEN and, Mr. MONSON.

H.R. 2589: Mr. FAZIO, Mr. MARTINEZ, and Mr. KOLTER.

H.R. 2620: Mr. CLAY and Mr. MILLER of California.

H.R. 2685: Mr. LEHMAN of Florida and Mr. LIPINSKI.

H.R. 2781: Mr. BURTON of Indiana.

H.R. 2866: Mr. MILLER of Ohio, Mr. GROTBERG, Mr. SAXTON, Mr. PORTER, Mr. CHAPPIE, Mr. CONYERS, and Mr. TALLON.

H.R. 2999: Mr. DE LUGO, Mr. THOMAS of Georgia, Mr. FAZIO, Mr. TOWNS, Mrs. LLOYD, Mr. MITCHELL, Ms. MIKULSKI, Mr. LEVIN of Michigan, Mr. WAXMAN, Mr. MCEWEN, Mr. EDWARDS of California, Mr. KOSTMAYER, Mr. NIELSON of Utah, Mr. CONYERS, Mr. LELAND, Mr. SILJANDER, Mr. OBERSTAR, Mrs. COLLINS, Mr. MARKEY, Mr. SMITH of Florida, Mr. MCGRATH, Mr. KOLBE, Mr. MOODY, Mr. ADDABBO, Mr. LUKEN, Mr. MORRISON of Connecticut, Mr. KOLTER, Mrs. BENTLEY, Mr. RICHARDSON, Mr. LAGOMARSINO, Mr. MAVROULES, Mr. FUSTER, Mr. STOKES, Mr. HUTTO, Mr. BARNARD, Mr. SCHAEFER, Mr. BOULTER, Mr. WEBER, Mr. GINGRICH, Mr. KASICH, Mr. MILLER of Washington, Mr. MARTIN of New York, Mr. SOLOMON, Mr. DORNAN of California, Mr. WHITEHURST, Mr. MARTINEZ, Mr. MRAZEK, Mr. LANTOS, Mrs. BOXER, Mr. BARNES, Mr. YOUNG of Alaska, Ms. OAKAR, Mr. WORTLEY, Mr. TRAXLER, Mr. FLORIO, Ms. KAPTUR, Mr. PARRIS, Mr. LOWERY of California, Mr. COELHO, Mr. CHAPPELL, Mr. GALLO, Mr. MINETA, Mr. VENTO, Mr. CONTE, Mr. ECKART of Ohio, Mr. CHANDLER, Mr. FAUNTROY, and Mr. DWYER of New Jersey.

H.R. 3006: Mr. EDGAR.

H.R. 3050: Mr. HUTTO, Mr. ORTIZ, and Mr. CHAPPELL.

H.R. 3031: Mrs. HOLT.

H.J. Res. 112: Ms. SNOWE.

H.J. Res. 144: Mr. KRAMER.

H.J. Res. 200: Mr. SWIFT, Mr. TAUKE, Mr. LIGHTFOOT, Mr. BEDELL, Mr. EDGAR, Mr. LANTOS, Mr. GONZALEZ, Mr. MOAKLEY, Mr. EARLY, Mr. BOLAND, Mr. PURSELL, Mr. BOEHLERT, Mr. AKAKA, Mr. MINETA, Mr. ROBERTS, Mr. BONIOR of Michigan, Mr. MORRISON of Washington, Mr. CONYERS, Mr. OWENS, Mr. O'BRIEN, Mr. MCGRATH, Mr. BARNES, Mr. TOWNS, Mr. DARDEN, Mr. ROE, Mr. WAXMAN, Mr. JACOBS, Mr. WOLF, Mr. SMITH of Florida, Mr. GINGRICH, Mr. BERMAN, Mr. ADDABBO, Mr. WEISS, Mr. HERTEL of Michigan, Mr. GRAY of Illinois, Mr. BUSTAMANTE, Ms. KAPTUR, Mr. SABO, Mr. HEFTEL of Hawaii, Mr. BEVILL, Mr. BRUCE, Ms. SNOWE, Mr. BLILEY, Mr. ST GERMAIN, Mr. GALLO, Mr. DONNELLY, Mr. DANNEMEYER, Mr. LUJAN, Mr. HARTNETT, Mr. KINDNESS, Mr. FRENZEL, Mr. DERRICK, Mr. MARTINEZ, Mrs. BURTON of California, Mr. DEWINE, Mr. COELHO, Mr. MOORHEAD, Mr. LAFALCE, Mr. LAGOMARSINO, Mr. SPRATT, Mr. KOLTER, Mr. BARTLETT, Mr. STRATTON, Mr. JEFFORDS, Mr. BRYANT, Mrs. ROUKEMA, Mr. STANGELAND, Mr. GUARINI, Mr. KOSTMAYER, Mr. COUGHLIN, Mr. CROCKETT, Mr. EVANS of Iowa, Mr. MILLER of Washington, Mr. LOWRY of Washington, Mr. SHELBY, Mr. FLIPPO, Mr. DIXON, and Mr. CALLAHAN.

H.J. Res. 207: Mr. KEMP, Mr. DICKINSON, Mr. LIVINGSTON, Mr. RUDD, Mr. NICHOLS, Mr. SHAW, Mr. BLILEY, Mr. SAXTON, Mr. ROBERT F. SMITH, Mr. LIGHTFOOT, Mr. EDWARDS of Oklahoma, Mr. CLINGER, Mr. MOORHEAD, Mr. MCEWEN, Mr. CRAIG, Mrs. ROUKEMA, Mr. LENT, Mr. RINALDO, Mr. GUNDERSON, Mr. MCKERNAN, Mr. EVANS of Iowa, Mrs. COLLINS, Mr. ECKERT of New York, Mr. NIELSON of Utah, Mr. STANGELAND, Mr. CONTE, Mr. STRANG, Mr. HENRY, Mr. MACK, Mr. PACKARD, Mrs. MEYERS of Kansas, Mr. HILLIS, Ms. SNOWE, Mr. TAUKE, Mr. ROBERTS, Mr. KRAMER, Mr. SKEEN, Mr. BROWN of Colorado, Mr. ROTH, Mr. LUJAN, Mr. BROYHILL, Mr. EMERSON, Mr. STENHOLM, Mr. LUNGREN, Mr. THOMAS of California, Mr. MCCOLLUM, Mr. STUMP, Mr. HOPKINS, Mr. MCCANDLESS, Mr. MADIGAN, Mr. BLAZ, Mr. HAMMERSCHMIDT, Mr. QUILLEN, Mr. COURTER, Mr. SLAUGHTER, Mr. PARRIS, Mr. GROTBERG, Mr. HYDE, Ms. FIEDLER, and Mr. BURTON of Indiana.

H.J. Res. 259: Mr. HYDE, Mr. O'BRIEN, Mr. ROSE, Mr. DASCHLE, Mr. LAGOMARSINO, Mr. BEILENSON, Mr. WEISS, Mr. HEFTEL of Hawaii, Mr. RUDD, Mr. LUNDINE, Mr. FUQUA, Mr. THOMAS of Georgia, Mr. HUGHES, Mr. DAUB, Mrs. BYRON, Mr. STANGLAND, Mr. BARNARD, Mr. HATCHER, Mr. CLINGER, Mrs. KENNELLY, Mr. VENTO, Ms. KAPTUR, Mr. LANTOS, Mr. REID, Mr. ENGLISH, Mr. TOWNS, Mr. MINETA, Mr. HORTON, Mr. WORTLEY, Mr. MATSUI, Mr. EVANS of Illinois, Mr. FROST, Mr. RANGEL, Mr. BRYANT, Mr. GREEN, Mr. SABO, Mr. KEMP, Mr. BORSKI, Mr. RINALDO, Mr. CONTE, Mr. KASTENMEIER, Mr. TRAXLER, Mr. COURTER, Mr. DYMALLY, Mr. ADDABBO, Mr. WAXMAN, Mr. DE LA GARZA, Mr. JEFFORDS, Mr. SMITH of New Jersey, Mr. COOPER, Mr. GEJDENSON, Mr. BONER of Tennessee, Mr. ROYBAL, Mr. RAY, Mr. KINDNESS, Mr. NELSON of Florida, Mr. BADHAM, Mr. MAZZOLI, Mr. RITTER, Mr. COELHO, Mr. MORRISON of Washington, Mr. CARR, Mr. MURPHY, Mr. HERTEL of Michigan, Mr. BREAUX, Mrs. VUCANOVICH, Mr. OWENS, Mr. WATKINS, Mr. LUNGREN, Mrs. BOXER, Mr. GARCIA, Mr. FISH, Mr. LAFALCE, Mr. BIAGGI, Mr. MORRISON of Connecticut, Mr. DORNAN of California, Mr. ATKINS, Mr. FAZIO, Mr. MARTINEZ, Mr. ROE, Mr. MCKINNEY, Mrs. HOLT, Mr. WILSON, Mr. EVANS of Iowa, and Mr. PANETTA.

H.J. Res. 296: Mr. SHELBY, Mr. SOLOMON, Mr. FISH, Mr. WORTLEY, Mr. SAXTON, Mr. CHANDLER, Mr. COYNE, Mr. MADIGAN, Mr. PURSELL, Mr. MCHUGH, and Mr. MOORHEAD.

H.J. Res. 305: Mrs. BOXER, and Mr. MADIGAN.

H.J. Res. 323: Mr. WILSON, Mr. LIPINSKI, Mr. STANGELAND, Mr. SUNIA, and Mr. MONSON.

H.J. Res. 333: Mr. TORRICELLI, Mr. DEWINE, Mr. VANDER JAGT, Mr. DANIEL, Mr. RINALDO, Mr. EMERSON, Mr. FAZIO, Mr. QUILLEN, Mr. LELAND, Mr. ANNUNZIO, Mr. STANGELAND, Mr. LUKEN, Mrs. BOXER, Mr. LAGOMARSINO, Mrs. COLLINS, Mr. CHAPPIE, Mr. SHUMWAY, Ms. KAPTUR, Mr. YOUNG of Missouri, Mr. HORTON, Mr. DAUB, Mr. WORTLEY, Mr. DE LA GARZA, Mr. HUGHES, Mr. FEIGHAN, Mr. JACOBS, Mr. BERMAN, Mr. SMITH of Florida, Mr. ROE, Mr. HOWARD, Mr. HOYER, Mr. MONTGOMERY, Mr. ADDABBO, Mr. CROCKETT, Mr. DWYER of New Jersey, Mr. SUNIA, Mr. WEISS, Mr. MARTINEZ, Mr. KINDNESS, and Mr. CHANDLER.

H.J. Res. 336: Mr. KOSTMAYER, Ms. KAPTUR, Mr. STARK, Mr. SNYDER, Mr. BEILENSON, Mr. HAYES, Mr. LANTOS, Mr. RAHALL, Mr. MORRISON of Connecticut, Mr. MRAZEK, Mr. GEJDENSON, Mr. BARNES, Mr. FAUNTROY, Mr. DE LUGO, Mr. CROCKETT, Mr. SMITH of Florida, Mr. REID, Mrs. JOHNSON, Mr. DE LA GARZA, Mr. GARCIA, Mr. TOWNS, Mr. DELLUMS, Mr. LEHMAN of Florida, Mr. MARKEY, Mr. MATSUI, Mr. MAVROULES, Mr. HORTON, Mr. SAXTON, Mr. SCHEUER, Mr. FORD of Michigan, Mr. TORRICELLI, Mr. LEVINE of California, Mr. FAZIO, Mr. REGULA, Mr. RANGEL, Mr. MITCHELL, Mr. CARPER, Mr. LOWRY of Washington, Mrs. SCHNEIDER, Mr. HOWARD, Mr. SEIBERLING, Mr. BEDELL, Mr. LEACH of Iowa, Mr. SABO, Mr. MCKERNAN, Mrs. SCHROEDER, Mr. ECKART of Ohio, Mr. TRAXLER, Mr. CONYERS, Mr. KASTENMEIER, Mr. STOKES, Mr. BERMAN, Mr. TAUKE, Mr. MCHUGH, Mr. LEVIN of Michigan, Mr. ROE, Mrs. BOXER, Mr. ADDABBO, Mr. MOAKLEY,

Mr. DOWNEY of New York, Mr. MCCURDY, Mr. FOGLIETTA, and Mr. WEISS.

H.J. Res. 340: Mr. MOORHEAD.

H. Con. Res. 69: Mr. LUKEN.

H. Con. Res. 129: Mr. WILLIAMS, Mr. BEREUTER, Mr. COBLE, Mrs. KENNELLY, Mr. WEBER, Mr. HEFNER, Mr. DIOGUARDI, and Mr. KEMP.

H. Con. Res. 169: Mr. FAZIO, Mr. WEISS, Ms. MIKULSKI, Mr. SUNIA, Mr. BRUCE, Mr. LEHMAN of Florida, Mrs. BOXER, and Mr. FORD of Tennessee.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 821: Mr. BURTON of Indiana.

H.R. 2817: Mr. EVANS of Illinois.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3011

By Mr. COBEY:

—Page 13, line 6, strike out "$104,069,000" and insert in lieu thereof "$104,469,000, of which $400,000 shall be for completion of restoration of Estey Hall in Raleigh, North Carolina".

By Mr. CONTE:

—Page 52, after line 8, insert the following:

DEPARTMENT OF THE TREASURY

ENERGY SECURITY RESERVE

(Rescission)

Except as otherwise provided in this section, all of the funds appropriated to the Energy Security are hereby rescinded. This rescission shall not apply to:

(1) funds transferred from the Energy Security Reserve by this Act;

(2) $500,000,000, which may not be used for payments with respect to projects or modules under the Energy Security Act; and

(3) such amounts as may be necessary to make payments for projects or modules for which obligations were entered into under the Energy Security Act before the date of enactment of this Act.

H.R. 3038

By Mr. FRENZEL:

—Page 13, line 20, strike out "$10,954,000" and insert in lieu thereof "$10,779,000".

—Page 15, line 7, strike out "$7,759,000" and insert in lieu thereof "$7,635,000".

—Page 34, line 10, strike out "$9,368,694,000" and insert in lieu thereof "$9,218,795,000".

—Page 34, line 15, strike out "$195,840,000" and insert in lieu thereof "$192,707,000".

—Page 34, line 21, strike out "$61,119,000" and insert in lieu thereof "$60,141,000".

—Page 35, line 7, strike out "$760,547,000" and insert in lieu thereof "$748,378,000".

—Page 35, line 20, strike out "$516,160,000" and insert in lieu thereof "$507,901,000".

—Page 37, line 15, strike out "$144,400,000" and insert in lieu thereof "$142,090,000".

—Page 38, line 8, strike out "$22,000,000" and insert in lieu thereof "$21,648,000".

—Page 38, line 13, strike out "$3,000,000" and insert in lieu thereof "$2,952,000".

—Page 38, line 20, strike out "$500,000" and insert in lieu thereof "$492,000".

—Page 39, line 8, strike out "$235,000,000" and insert in lieu thereof "$231,240,000".

By Mr. HENRY:

—Page 31, after line 9, insert the following new item:

NSF APPROPRIATIONS CEILING

Notwithstanding any other provision of this Act, the total amount appropriated under this Act for the National Science Foundation shall be $1,501,800,000.

—Page 27, after line 21, insert the following new item:

NASA APPROPRIATIONS CEILING

Notwithstanding any other provision of this Act, the total amount appropriated under this Act for the National Aeronautics and Space Administration shall be $7,510,000,000.

SENATE—*Wednesday, July 24, 1985*

(Legislative day of Tuesday, July 16, 1985)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the Honorable ALAN K. SIMPSON, a Senator from the State of Wyoming.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Father in Heaven, the democratic process is an inefficient system and it moves slowly—as do the wheels of justice. Cumbersome though it be, it guarantees the greatest good for the greatest number as a political system designed to provide for the interests of the individual citizen, local, State, regional, and national, plus the interests of those of special groups. Thank Thee, Gracious God, for the vision and wisdom of our founders who gave us this incredible legacy. Forgive our impatience when the process fails to move as fast as we think it should. Forgive the criticism of those whose demands are not met. Forgive the cynicism of those who expect the impossible and respond with acrimony and bitterness when disappointed. Gracious God, help the 100 Senators who are supposed to work the system fairly in response to this massive array of issues, many of which are in conflict. Give them grace as they struggle with this immense task. In Jesus' name. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore [Mr. THURMOND].

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, July 24, 1985.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable ALAN K. SIMPSON, a Senator from the State of Wyoming, to perform the duties of the Chair.

STROM THURMOND,
President pro tempore.

Mr. SIMPSON thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDING OFFICER (Mr. COHEN). Under the previous order, the acting majority leader is recognized.

SCHEDULE

Mr. SIMPSON. Mr. President, I am fortunate—because of the various hats I have been wearing—to have a little hair remaining on my head. We will now get on with the activities of the day.

The two leaders will be recognized under the standing order for 10 minutes each.

Special orders for not to exceed 15 minutes each have been noted for Senators PROXMIRE, DIXON, HATFIELD, MATTINGLY, and EVANS.

If time permits, there will be routine morning business, not to extend beyond the hour of 12 noon, with statements limited therein to 5 minutes each.

At the hour of 12 noon, a live quorum will begin under the provisions of rule XXII of the Standing Rules of the Senate, to be followed by a cloture vote on the motion to proceed to S. 43, the issue of the line-item veto.

The Senate is expected to turn to other legislative and executive items that have been cleared by unanimous consent. Activity is taking place to try to obtain those clearances. I believe there will be progress there. Therefore, rollcall votes can be anticipated throughout the session of the Senate today.

Mr. President, I reserve the remainder of the time of the majority leader.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDING OFFICER. Under the previous order, the acting minority leader is recognized.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the time of the minority leader be reserved for his later use.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER (Mrs. KASSEBAUM). Under the previous order, the Senator from Wisconsin [Mr. PROXMIRE] is recognized for not to exceed 15 minutes.

THE CHAPLAIN'S PRAYER

Mr. PROXMIRE. Madam President, as usual, the Chaplain's prayer was most germane and relevant. We have a marvelous Chaplain. Although he was appointed by the Republican majority, I think he has overcome that handicap and is doing a superlative job.

The Chaplain started out this morning by saying the democratic process was an inefficient system. We have learned that in this body.

MYTH OF THE DAY: THAT THE CONGRESS LACKS CHARACTER AND WISDOM

Mr. PROXMIRE. Madam President, it is a widely held belief in this country that the Congress has the character of a wimp and the intelligence of a backward, grade school dropout. That belief is wrong. It is today's myth of the day. For 200 years it has always been open season on the Congress. Will Rogers once said that this country has only one native criminal class: The Congress. More recently one observer opined referring to the Congress that half of the Members are waiting to be discovered and the other half are afraid they will be. Mr. President, there have been times in the past when it has been very hard to defend the Congress. The Congress has suffered individual scandals and humiliations that have sullied the entire body. Most recently Abscam accomplished that purpose. This year the entire Congress or at least a large majority of the Congress when it comes to spending and taxing seems to lack the brains to come in out of the rain or the character to cast even one vote for responsible fiscal policy if it means the loss of a vote in the next election.

The series of immense Federal deficits represents the biggest moral and intellectual failure of our Government in this generation. Who is responsible for that failure? One institution: The Congress. The Congress and the Congress alone can authorize appropriations. The Congress and the Congress alone can raise the taxes to pay for Federal expenditures. We cannot pass the buck. The spectacular failure of our Federal Government to bring the budget under control is not the failure of the President or the pressure groups or the people of the country. They cannot spend or tax. Only the Congress can do that. The failure of fiscal policy is the failure of the Con-

gress. So why then do I call it a myth that the Congress has the character of a wimp and the intelligence of a very dull child? I call it a myth because the Congress is in my judgment now prepared to begin to act to bring the fiscal train back on track. It will take time, maybe 15 years or more. It will take character including the will to vote to cut a large number of popular spending programs and even tougher to increase taxes on everyone. It will take the intelligence to do this in a way that can persist through the recessions that characterize any free economic system and will certainly plague the American economy before we achieve a responsible fiscal policy. This is the biggest challenge the Congress has faced in a very long time. Why do I believe that the Congress will face up to this challenge? Because I have served in this body long enough to have talked to enough of my colleagues often enough and in sufficient depth to have found that, given the opportunity to vote for fiscal responsibility, they will do so. And if they are not given that opportunity, they will create it.

Frankly, Madam President, my contention that the widespread belief that the Congress lacks character and good sense is a myth, is at this point, only a judgment. It may be a fact. But this Senator believes it is a myth and the Congress over the next several years will have the brains and the will to prove the myth was a bum rap. It will take a while. But we'll see.

WHY THE ADMINISTRATION IGNORES EVEN SMALL NUCLEAR CONSULTATIVE SUCCESSES

Mr. PROXMIRE. Madam President, at the end of the June meeting of the Standing Consultative Commission, the United States and the Soviet Union announced a joint communique stating "a common understanding" of the obligations of the two nuclear superpowers if there should be a nuclear incident. The United States and the U.S.S.R. agreed to make a full exchange of information about any "unauthorized" threat or nuclear explosion. In commenting on this SCC agreement in the July 1 New York Times, Flora Lewis writes that the purpose of the exchange is to prevent retaliation if one side assumes after a nuclear explosion that the other side is involved in a terrorist attack.

Madam President, this is good news, although limited good news. The Standing Consultative Commission does not provide any institutional basis for actually negotiating arms control. It does provide a forum for reconciling suspicions of violations of arms control agreements. Its participants meet secretly. They only disclose what both of them agree they wish to disclose about their meetings. Three years ago, the U.S. Arms Control and Disarmament Agency reported that the SCC had satisfactorily resolved suspicions by the United States of Soviet cheating on SALT I. So we had known before this latest report that the SCC had a record of working to correct violations or allay suspicions of treaty violations at least once.

In the June meeting, the SCC reported that Soviet and United States participants also signed an understanding "intended to further enhance the viability of the Anti-Ballistic Missile Treaty." This vague understanding is mildly encouraging. It would mean a lot more if it could report a U.S. challenge to the U.S.S.R. to explain how the Soviets can claim compliance with the ABM Treaty when their giant radar at Krasnoyarsk appears to be a conspicuous violation. If the Soviets cannot justify this radar deployment, the administration should renegotiate the treaty.

Similarly, the United States should answer the Soviet charge of U.S. violation of the ABM Treaty by its vigorous progress in preparing to build the star wars ICBM defense system. The administration has dismissed the charge with virtually no explanation.

Flora Lewis calls the agreement by the two superpowers to cooperate to stop a nuclear terrorist act against either superpower a small forward step that both should hail and build on. Why haven't they? Are both superpowers unwilling to admit that the adversary is willing to cooperate and work together to prevent at least one kind of nuclear threat?

Each superpower has taken pains to loudly tell the world that the other side will not negotiate to stop the nuclear threat. Gorbachev has repeatedly charged that the Reagan administration is stubbornly insisting on the impossible demand of calling for a Russian reduction in offensive nuclear missiles at the same time it pushes a massive antiballistic program that could destory the Russian deterrent, especially if the Soviets accepted the central U.S. arms control proposal to drastically reduce the Soviet's mammoth ICBM arsenal.

On the other hand, President Reagan has denounced the U.S.S.R. for their bullheaded stubbornness in refusing to negotiate any nuclear reduction anytime, any place, under any conditions. As the President has said, it takes two to tango. He's willing, but the President charges his tango partner would rather engage in empty denunciation than dance. For either Gorbachev or Reagan to credit the other with cooperation under these circumstances would contradict the propaganda of both.

Madam President, this mutual determination to blame the other side for failure may constitute the prime obstacle to any significant arms control progress. Some hardline, right-wing critics have blamed previous Republican as well as Democratic administrations as "too success oriented"; that is, too willing to make damaging concessions to the Soviets in order to get credit for signing an arms control treaty. The charge was never valid. No objective expert has shown that any of the five major treaties negotiated with the U.S.S.R. contained concessions damaging to U.S. security interests.

No one would charge that the Reagan administration is success oriented, with respect to arms control. In fact, quite the contrary; in its 4½ years in office, it has an impeccable failure orientation. It has the total absence of the suggestion of a whisper of an arms control record to prove it. The administration's refusal to make even a small point of its minor achievement in agreeing with the U.S.S.R. to work together to stop nuclear terrorism shows how firmly it is attached to this failure orientation.

Madam President, I ask unanimous consent that the article by Flora Lewis in the July 1 New York Times entitled, "A Small U.S.-Soviet Step" be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, July 1, 1985]

A SMALL U.S.-SOVIET STEP

GENEVA.—In the midst of renewed stridency between Moscow and Washington, the two have managed to agree on how to face the possibility of nuclear terrorism.

Vice President George Bush told a conference here Saturday that there is also a search for a Soviet-American "consensus that terrorists who use or threaten to use nuclear weapons be dealt with jointly and swiftly."

Terrorism is increasing and so is the danger of involving a nuclear weapon. America and Russia accept their common interest in not letting someone else trigger a catastrophe.

A little-noticed communiqué at the end of the Standing Consultative Commission's meeting here last month announced that the two countries have signed "a common understanding" of their obligations if there should be a nuclear incident.

The S.C.C., which meets twice a year, is the official Soviet-U.S. body for complaints about noncompliance with arms control treaties, and proposals to improve their execution. It isn't involved with talks on new treaties.

In the "understanding," the two countries promised to tell each other immediately all they know about an "unauthorized" nuclear explosion or threat, presumably on the hot line. This is to prevent the risk of retaliation on one side's mistaken supposition that the other has launched a sneak attack. Terrorists might provoke that, by accident or even by mad design.

The S.C.C. also signed an understanding "intended to further enhance the viability of the A.B.M. (Anti-Ballistic Missile) Treaty," somewhat surprising in view of mutual accusations and the failure so far of

the Geneva arms negotiations to start moving. The U.S. says the Russians are violating the treaty by building a forbidden radar, and the Russians say the U.S. has launched an "open conspiracy" to violate it with "Star Wars."

It is a measure of how strained relations still are, and how deep our mutual suspicions, that neither side wants to call attention to the fact that they have recently been able to reach some small agreement.

There seems almost to be shared embarrassment in admitting a step forward. The big propaganda trumpets are all blaring out how intransigent each side finds the other. Each is insisting that it is up to the other to make next move. Meanwhile, negotiations are marking time.

Mikhail Gorbachev, the Soviet leader, has hinted at another walkout. The U.S. isn't taking the threat seriously. But there is a danger that this public posturing will reach a point where Moscow feels it has to act or lose faith.

Up to now the negotiations have served mainly as a platform for public recrimination. Of course, a propaganda war doesn't kill anybody, but it does increase the chance of adding still more to the grotesque nuclear arsenals on both sides. The astronomer Carl Sagan calculates that they are already "many tens of times" above the level that would cause nuclear winter if they were set off.

Russians and Americans can see that they dare not let somebody they can't control move in on the nuclear menace game. But they can't see how to reduce their mutual menace.

There isn't even much awareness of each other's preoccupation. U.S. officials analyzing Soviet behavior tend to assume that it is all about manipulating opinion in the West. But the chances are that Mr. Gorbachev is more concerned now with his problems at home.

He made two important speeches recently, one at the late Konstantin Chernenko's home base of Krasnoyarsk, one at late Leonid Brezhnev's base of Dnepropetrovsk, both big military industrial centers. The speeches expressed his effort to launch important personnel changes and to revise the economic plan. He has a deadline if he is to win elbow room to make his ideas work—the Communist Party Congress next February.

But if Mr. Gorbachev was deliberately tough toward the U.S. so as to placate the stubborn old men whom he is trying to make swallow some hard domestic decisions, he failed to appreciate the impact outside the U.S.S.R. It is hard to tell whether Moscow is again miscalculating Western reaction as it did during its campaign against Euro-missiles, or just doesn't care.

The S.C.C. "understanding" shows some agreement can be reached when it is seen to be in urgent common interest. The two countries are right to see control of any possible nuclear terrorists, but one wonders if they are really in control of their own monstrous nuclear sausage-machines.

LESSON OF THE CAMBODIAN TRAGEDY

Mr. PROXMIRE. Madam President, although most Americans have paid only fleeting attention to the slaughter of millions of Cambodians during Pol Pot's regime in the late seventies—the literary world has devoted some attention to the subject.

This desire to tell the Cambodian story can be seen clearly in Edmund Keeley's new book, "A Wilderness Called Peace."

Mr. Keeley details this bloody era in Cambodian history through the diary excerpts of a woman who experienced it.

In addition, there is a fictional character in the book who represents the United States, and the United States' failure to help stop the barbaric Khmer Rouge regime.

Mr. Keeley is true to history and makes no attempts to distort facts—however unpleasant they may be to an American reader.

While the crimes committed against the Cambodians and against humanity are truly the worst documented since the Holocaust, most Americans do not realize the human destruction involved in this situation.

Madam President, the story told in this book is yet another vivid reminder of the genocide the Cambodian people were forced to endure.

But, it is also a reminder of the helplessness one can feel watching this heinous crime occur, with no means to prevent it.

A helplessness that we should never have to feel in the face of genocide again.

Now is the time we can make certain we are never that helpless again.

Now is the time we must ratify the Genocide Convention.

The treaty, as we know, has been reported for the sixth time to the U.S. Senate by the Foreign Relations Committee. It is now on the calendar. It was on the calendar yesterday. There is no reason why it cannot be taken up. I appreciate that the majority leader has a very full agenda between now and the August recess, but I earnestly hope that that treaty will be taken up as soon as possible.

It is recommended by the Reagan administration, by every President in the last 25 or 30 years. It is supported by every religious group in America and by the American Bar Association. The only opponents are the far-out right wing—Ku Klux Klan—Liberty Lobby group which have been discredited so often.

This treaty represents a chance for the United States to take a firm stand against what has happened to the Cambodians—and to help ensure it never happens again.

Madam President, too many times in the past we have allowed this opportunity to slip through our hands.

Now we must seize the opportunity and ratify the Genocide Treaty.

VITIATION OF ORDER FOR RECOGNITION OF SENATOR DIXON

Mr. PROXMIRE. Madam President, I understand that Senator DIXON does not need his special order. I ask unanimous consent that it be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MATTINGLY. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR MATTINGLY

The PRESIDING OFFICER. Under the previous order the Senator from Georgia [Mr. MATTINGLY] is recognized for not to exceed 15 minutes.

Mr. MATTINGLY. Thank you, Madam President.

LINE-ITEM VETO SUPPORT

Mr. MATTINGLY. Madam President, I intend to use most of the time that I have today to comment on and bring to the attention of my colleagues the range of support that now exists and, in fact, continues to build on behalf of Senate bill 43, the item veto legislation, that I have introduced and which has been cosponsored by 46 of our colleagues.

I shall take a short moment, though, to express a special thanks to the distinguished junior Senator from Washington, Senator DANIEL J. EVANS. Senator EVANS has lent a unique and invaluable perspective to the issue that we are discussing and, in fact, it is in great part due to his efforts and support that we who favor the item veto trial have been able to gather so much support for the ideas that its opponents refuse to allow the matter to be brought before this body for a vote.

Senator EVANS, who has been given by the people of the State of Washington the distinct privilege of holding the Senate seat once occupied by our friend, the esteemed Senator Henry "Scoop" Jackson, has served as a three-term Governor of the State of Washington. I wonder how many of our colleagues, however, are aware of the fact that the National Governors Association included him in its list of the top 10 Governors of the 20th century.

I am sure that they were not advised of that fact by my friend, Senator EVANS, because he is as modest as he is capable.

To all of us who favor the item veto legislation, the formidable talents and energy of our distinguished colleague have provided a key ingredient in what I am confident will be, at some point, our recipe for success.

And that success, Madam President, will in the final analysis be a result of the support that Senate bill 43 gathers from the American people.

Madam President, I ask unanimous consent that materials related to Senate bill 43 be printed in the RECORD at the end of my remarks today.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. MATTINGLY. Madam President, let me comment briefly on some of these items.

In today's Atlanta Constitution, Prof. Donald Ratajczak, director of the Economic Forecasting Project at Georgia State University and perhaps known to my colleagues as a frequent guest of one of the early morning network television shows, writes about the line-item veto legislation. He says:

Congress created a strong case for the line-item veto in its budget resolution deliberations last week. According to the Budget Reform Act, Congress was expected to first establish a target for total expenditures. The idea was good, but the execution as been atrocious. For all practical purposes, the Budgetary Reform Act is no longer operational in Congress. Still, budgetary control is sorely needed. By using a line-item veto, the administration can more effectively restore spending targets, as most Governors currently do. It is clear that Congress has failed in its budgetary responsibility. The President should now be given the tools he needs to bring more order to the current budgetary mess.

I might add that I believe that is a popular opinion among the people of my State and across the United States. There is a budget mess and they want this Congress to get on with doing something about it.

I will include the remainder of that column in the RECORD for the benefit of my colleagues to read.

Also in an editorial in the Providence, RI, Journal entitled "Line Items and President's Veto Power" that appeared this Monday, it is stated:

The need for (line-item veto) has been steadily amplified in recent years by Congress' proven inability to cut Federal spending.

In yesterday's Los Angeles Times, our distinguished colleague, Senator KENNEDY, wrote and I quote:

. . . The massive nature of the modern appropriations process overwhelms the primitive veto power, and the President acquiesces in bills that by any standard are badly flawed. By giving the President a stronger role, the line-item veto would instill a new and needed measure of Presidential accountability in Federal spending and reduce the excesses of a congressional process that too readily focuses on individual districts and separate interests, not the national interest.

I might add, Madam President, that Senator KENNEDY's support for the item veto emphasizes the strong, bipartisan support for the proposal and is indicative of its passage when it comes to a vote.

An editorial in the Wall Street Journal on June 21, of this year, asserted:

The manner in which the Senate disposes of the line-item veto bill will tell the public a lot about how serious our lawmakers are in their posturings about bringing the budget under control.

Now, Madam President, I bring to the attention of my colleagues another article, entitled "Available: A Proven Way To Reduce the Deficit." I have placed a copy of this article, which appears in the August edition of the Reader's Digest, on the desk of each Senator. I hope everyone will take time to read it because it provides an interesting look at the item veto proposal and the value of such a weapon in the fight for fiscal responsibility.

I hope all my colleagues review this material. I believe that support of the concept generally and Senate bill 43 specifically continues to grow and this growing support provides a strong basis for further efforts this year to bring this legislation to the attention of the Senate and provide everyone with an opportunity to vote on the merits of the proposal.

As usual the people of our Nation are ahead of their legislative representatives, not in recognizing that something must be done to reduce the deficits that present such a looming and potentially disastrous problem in the future, but in recognizing that new methods of dealing with the problem are needed. They recognize that the well-intentioned and in some cases truly heroic efforts of some Members of Congress to restore fiscal balance have not been successful.

The latest statistics contained in the June 1985 copy of the "Economic Indicators" pamphlet produced for our Joint Economic Committee by the Council of Economic Advisers provides further, disturbing proof of this fact. The Federal budget deficit through the first 7 months of fiscal year 1985 was $118.7 billion. That is more than $10 billion greater than the deficit for the first 7 months of the prior year. Last year's budget deficit was more than $185 billion; projections for the current fiscal year estimate that the deficit will be $213 billion. Receipts during this fiscal year have been higher than last, but they have been exceeded by an increase in outlays from last year during the same period by $10 billion.

That proves, Madam President, that the people of our country are not undertaxed. They are overspent.

Total Federal debt will have doubled between fiscal year 1980 and fiscal year 1985 and that enormous increase, as we all know, has taken place during the administration of a President who has consistently worked for a reduction in the level of Federal spending. I need not point to the clear support that the American people have expressed for that position last November.

The fact that Federal spending has continued to rise is evidence of the need to explore new methods and try other means to halt the explosive growth of outlays.

S. 43 does not give any authority to the President that the Constitution would prohibit. The men who wrote that document wanted the President to play an integral role in the legislative process. I do not think that there can be any dispute about the contention that Congress has effectively removed the President's legitimate veto authority in many instances. Passing continuing resolutions after the expiration of the fiscal year, dumping the result on the President's desk and daring him to veto it, is not the careful, considerate, and deliberate process envisioned by the founders.

The fact that the item veto would not be able to be applied to the so-called entitlement programs should not dissuade the Congress from allowing it to be used on the other, discretionary elements of the budget. Perhaps we should examine the possibility of bringing all spending back on budget where the Congress would have to exercise its judgment each year about funding levels and outlays.

Madam President, the house is too late and the potential problems too severe to allow an excess of institutional jealousy and a zeal to protect turf and fiefdoms to intrude on our ability to do what must be done.

We appropriate money today in an atmosphere that is heavily weighted toward the spending side. All you have to do is attend one subcommittee markup of the Appropriations Committee or one full committee meeting of the Appropriations Committee to see it. The unique blend of special interest pleas and pledges elicits a far greater response from Congress than does the generalized view of the electorate that somehow, spending must be reduced. Senate bill 43 would provide the President with a weapon that could be wielded on behalf of the Chief Executive's national constituency and that would help in redressing the imbalance that now exists between the pressure for spending reductions and the pressure for an ever-increasing level of spending.

To those who say that the item veto would not save much money, I ask: How much is much?

Let me point out to my colleagues the comments of Prof. Judith Best, distinguished teaching professor of political science at New York State University in Cortland.

Professor Best, to whom I am much indebted for her brilliant work on the item veto issue, has written:

Perhaps to some who are used to thinking of budget items in the billions, budgets in the hundreds of billions, and deficits in the trillions, several billion dollars in annual savings is a mere drop in the bucket, but to the man on the street even $1 billion is a very great deal. If a few billion dollars in savings makes no difference, then a few extra billion in expenditures makes no difference either. It is thus that trillion-dollar deficits are built.

Madam President, let me read for the benefit of my colleagues a letter I received recently from OMB Director David Stockman. According to some of the item veto opponents, Director Stockman has expressed reservations about its effectiveness. Let us put that to rest right now.

DEAR MACK: I am writing in response to your concern about comments, attributed to me, concerning my support for a grant of line-item veto power to the President.

Let me assure you that I strongly support the President's view that the line-item veto would provide an effective tool for restraint in spending. Nothing in my remarks before a recent American Enterprise Institute conference concerning the efficacy of the line-item veto should be construed to imply otherwise.

My remarks on that occasion simply were designed to illustrate the obvious—that in order to make the line-item veto effective, it would be necessary that a President would have the political will to use it in a manner that would sharply curtail unneeded and wasteful spending. No one should have any doubt that Ronald Reagan would in fact have the will to use it wisely and well.

As we look into the future, however, I believe that all of us must recall that constitutional safeguards alone offer no assurances of success in the absence of strong political leadership. As we work together to promote fiscal sanity at the Federal level, I'm sure that you will agree that fiscal leadership on the part of both the Congress and the President will be necessary to achieve our desired goal.

Thank you for the opportunity to clarify my views on this important subject. You can be sure of united administration support behind your efforts to make the line-item veto power an effective weapon in the battle against wasteful spending.

Sincerely,

DAVID A. STOCKMAN,
Director.

Madam President, I will take just a moment to list for the benefit of my colleagues the letters of support and other items that will be included in the RECORD at the conclusion of my remarks:

A letter from the Attorney General of the United States, Edwin Meese; a letter from the Secretary of the Treasury, Jim Baker; a letter from David Stockman; a letter from Peter Grace, of the President's private sector survey on cost control; a letter from Richard Lesher of the National Chamber of Commerce; a letter from Howard Jarvis of the American Tax Reduction Movement; a letter signed by the American Association of Physicians & Surgeons, American Bankers Association, American Business Conference, American Electronics Association, Business Executives for National Security, Chamber of Commerce of the United States of America, Citizens for America, Coalitions for America, Competitive Enterprise Institute, Conservative Caucus, Council for Citizens Against Waste, Free the Eagle Citizen's Lobby, National Association of Wholesaler-Distributors, Public Advocate, Students for America, United States Business & Industrial Council; the National Federation of Indepedent Business, the American Bankers Association, once again, the American Farm Bureau, and many others.

Mr. President, the last item for which I ask unanimous consent to submit for the RECORD is a list of Federal receipts and outlays from 1789 to 1985. If there is any doubt that the Government is spending too much money, these figures should remove them.

Francis Bacon told us, Madam President, that "he that will not apply new remedies must expect new evils; for time is the greatest innovator."

Our times, Madam President, demand S. 43 as a new remedy or we will continue to face the fiscal evils that our profligacy will bring.

I urge my colleagues to support the cloture motion.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TABLE 9.—BUDGET RECEIPTS AND OUTLAYS, 1789–1990 [1]

[In millions of dollars]

Fiscal year	Budget receipts	Budget outlays	Budget surplus or deficit (–)
1789–1849	1,160	1,090	+70
1850–1900	14,462	15,453	–991
1901–1905	2,797	2,678	+119
1906–1910	3,143	3,196	–52
1911–1915	3,517	3,568	–49
1916–1920	17,286	40,195	–22,909
1921–1925	20,962	17,323	+3,639
1926	3,795	2,930	+865
1927	4,013	2,857	+1,155
1928	3,900	2,961	+939
1929	3,862	3,127	+734

EXHIBIT 1

OFFICE OF THE ATTORNEY GENERAL,
Washington, DC, May 14, 1985.

Hon. MACK MATTINGLY,
U.S. Senate,
Washington, DC.

DEAR SENATOR MATTINGLY: This letter responds to your request for the views of the Department of Justice on S. 43, your bill to provide the President with authority to veto individual items of appropriation.

The President expressed his approval of this legislation in his State of the Union Message. The Department, as well, fully suports the concept of the item veto. We believe it is critical that the President be granted such authority to gain control of federal government expenditures. Line item veto authority is used responsibly by 43 State Governors; it is time that the President be granted such authority in an effort to halt the nearly half-century practice of government living beyond its means.

Your proposal to accomplish this worthy objective provides that for a two-calendar-year period each item of any general or special appropriations bill or joint resolution is to be enrolled and presented to the President as a separate bill. An item is generally defined as any numbered section and any unnumbered paragraph of the specified forms of legislation. This procedure would permit the President to veto any of these separate bills, and, therefore, to have the power to veto individual items of appropriation.

We appreciate and strongly support your efforts and we would be happy to work with you and others in Congress to realize one of the most important goals of this Administration.

Sincerely,

EDWIN MEESE III,
Attorney General.

THE SECRETARY OF THE TREASURY,
Washington, DC, February 12, 1985.

Hon. MACK MATTINGLY,
U.S. Senate,
Washington, DC.

DEAR MACK: This is in response to your January 17 letter to former Secretary Regan requesting his support for S. 43, to provide for a line item veto. As President Reagan made clear in his State of the Union address, the Administration is firmly behind your proposal.

I look forward to working with you to enact the line item veto, and appreciate your leadership on this important issue.

Sincerely,

JAMES A. BAKER III.

EXECUTIVE OFFICE OF THE PRESIDENT, OFFICE OF MANAGEMENT AND BUDGET,
Washington, DC, February 15, 1985.

Hon. MACK MATTINGLY,
U.S. Senate,
Washington, DC.

DEAR MACK: Thank you for recent letter concerning S. 43, legislation that you are sponsoring to provide the President with authority to veto individual items in appropriations bills.

As the President stated in his State of the Union address of February 6, 1985, the Administration supports enactment of S. 43. In our view, the authority that S. 43 would confer upon the President would be a major step forward in getting unnecessary Federal spending under control.

I look forward to working with you to ensure early passage of this important legislation.

Sincerely,

DAVID A. STOCKMAN,
Director.

FOUNDATION FOR THE PRESIDENT'S PRIVATE SECTOR SURVEY ON COST CONTROL, INC.,
Washington, DC, January 26, 1985.

Hon. MACK MATTINGLY,
U.S. Senate,
Washington, DC.

DEAR MACK: Many thanks for your letter and the copy of S. 43.

I applaud your efforts and initiative.

We will do everything we can to help.

All the best,

Sincerely,

J. PETER GRACE.

CHAMBER OF COMMERCE OF THE UNITED STAES OF AMERICA,
Washington, DC, January 30, 1985.

Hon. MACK MATTINGLY,
U.S. Senate Office Building,
Washington, DC.

DEAR MACK: Thank you for your recent letter concerning legislation for a line item veto, S. 43. The Chamber supports the passage of such an amendment. Giving the President the power to veto specific spending bills would lead to greater fiscal discipline. We are quite pleased with your efforts on this issue.

We are in the process of gathering political support in favor of S. 43. Directions have been sent to our field offices for the purposes of influencing members of Congress. Also, I would like to extend an invitation to you to appear on our cable television network. BizNet. This will give you an opportunity to convey your message to the public.

It will be a pleasure to work with you in the 99th session of Congress.

Sincerely,

RICHARD L. LESHER,
President.

AMERICAN TAX REDUCTION MOVEMENT,
Los Angeles, CA, May 13, 1985.

Hon. CHARLES McC. MATHIAS, Jr.,
Chairman, Senate Committee on Rules and Administration, Russell Senate Office Building, Washington, DC.

DEAR MR. CHAIRMAN: In his quest to reduce government spending, the President's key weapon is missing—the line item veto. My organization, the American Tax Reduction Movement, supports Senator Mattingly's S. 43 to give the President this power.

This line item veto allows each funding measure to stand on its own merits. It will prevent items from being hidder from view under "more worthy" appropriations.

Today, the President is given two choices: take the suit, shirt, tie, cufflinks, handkerchief, and shoes or take nothing at all. The President should have the option to take what he chooses and leave the rest. Congress will still have the power to override any presidential veto.

The governors of 43 of our 50 states have been given the line item veto power by state legislators. That is why state governments are in better financial condition than the federal government. The failure of the Congress to permit a president this power is the major reason the federal government has had a deficit every year for the last 19 years.

The 600,000 member American Tax Reduction Movement is dedicated to lower taxes and sensible government spending. The adoption of the line item veto is a step toward those goals.

For the American Tax Reduction Movement I urge you to pass S. 43 to the full Senate.

Yours in lower taxes,

HOWARD JARVIS,
Chairman.

MAY 13, 1985.

Hon. MACK MATTINGLY,
U.S. Senate,
Washington, DC.

DEAR SENATOR MATTINGLY: We the undersigned organizations strongly support your efforts to secure a statutory Presidential line-item veto authority. As you are aware, the relentless increase in Federal spending has brought into focus the need for appropriations reform. The politics of parochial of self-interest remain very strong and Congress is under continuous pressure to preserve programs that benefit local constituencies.

The line-item veto would create a new force within the appropriations process. It would allow the President to exercise his veto authority on individual expenditures without jeopardizing entire spending bills, thus making the President an active participant in trimming the Federal deficit.

In his televised budget address to the nation on April 24, President Reagan said with regard to line-item veto: "If Congress can't bring itself to do what's right—they should at least give me what 43 Governors already have—a line-item veto. Then I'll make the cuts; I'll take the responsibility and the heat. And I'll enjoy it."

Congress needs line-item veto to enhance its efforts to reduce Federal spending. Your bill, S. 43, which establishes a two-year trial period for Presidential line-item veto authority, provides an excellent vehicle for Congress and the President to work together to bring deficit spending under control. We believe that S. 43 deserves the full support of your colleagues, and look for forward to working with you toward ensuring its passage.

Sincerely,

American Association of Physicians and Surgeons, American Bankers Association, American Business Conference, American Electronics Association, Business Executives for National Security, Chamber of Commerce of the United States of America, Citizens for America, Coalitions for America, Competitive Enterprise Institute, Conservation Caucus, Council for Citizens Against Waste, Free the Eagle Citizen's Lobby, National Association of Wholesaler-Distributors, Public Advocate, Students for America, United States Business and Industrial Council.

NATIONAL FEDERATION OF INDEPENDENT BUSINESS,
Washington, DC, February 28, 1985.

Hon. MACK MATTINGLY,
U.S. Senate,
Washington, DC.

DEAR MACK: On behalf of the 500,000 members of NFIB, I would like to thank you for sponsoring S. 43, a bill which would give the President line-item veto authority over appropriations.

In a recent poll, the members of NFIB indicated their support for Presidential line-item veto authority by a 67 percent majority. In our opinion, a line-item veto could serve as a significant tool in efforts to reduce the burgeoning federal budget deficits. Giving the President such authority would recognize the responsibility he shares with Congress in regaining control over federal spending.

We believe S. 43 offers a responsible line-item veto approach in that it will enhance the President's control over spending without encroaching on the appropriations authority of Congress. Under this approach, the President could reject specific items in an overall appropriations bill without vetoing the entire bill. In addition, under the structure of this bill, the Congress could override the President's veto of a specific item if there was strong objection to it, just as the Congress might override the President's veto of an entire bill.

NFIB appreciates your leadership in this effort to lead our government back to fiscal responsibility.

Sincerely,

JOHN J. MOTLEY III,
Director of Federal Legislation.

AMERICAN BANKERS ASSOCIATION,
Washington, DC, July 23, 1985.

U.S. SENATE,
Washington, DC.

DEAR SENATOR: The American Bankers Association supports the Senate Leadership as they attempt to proceed to consideration of S-43, the bill providing the line-item veto. As you are aware, cloture must first be invoked in order to proceed with Senate debate on S-43.

We urge you to support the Senate Leadership and vote for cloture so that the line-item veto can be debated. The line-item veto is important legislation. It would constitute long-term institutional reform and impose external discipline on government spending and borrowing.

This measure is too important to be held up on a procedural basis. It deserves the opportunity to be debated on its merits. Again, the American Bankers Association urges you to support the Senate Leadership motion to invoke cloture on the motion to proceed to consideration of S-43.

Sincerely,

EDWARD L. YINGLING.

LINE-ITEM VETO

DEAR SENATOR: As the debate continues on S. 43, a bill to give the President line item veto authority over appropriations, the National Federation of Independent Business (NFIB) would like to remind you of our strong support for this legislation.

The half million small business owners who belong to NFIB believe that a line item veto could serve as a significant tool in achieving and maintaining control over the federal budget. NFIB would like to see this legislation voted on by the full Senate and therefore urges you to support the motion to proceed to S. 43 and to support any cloture motions connected with the bill.

Given the crisis we face with ever rising budget deficits, new means of controlling the budget must be considered. S. 43 has been structured to overcome the constitutional concerns of other line item veto proposals and it deserves full consideration and a vote.

JOHN J. MOTLEY III,
Director of Federal Legislation.

[Telegram]

Hon. MACK MATTINGLY,
Senate Office Building,
Washington, DC.

Current budget impasse makes it imperative that the President be given item veto. Urge your vote for cloture on S. 43 and yes vote on the bill.

JOHN C. DATT,
Executive Director, Washington Office,
American Farm Bureau Federation.

CHAMBER OF COMMERCE OF THE
UNITED STATES OF AMERICA,
Washington, DC, July 22, 1985.

MEMBERS OF THE U.S. SENATE: The U.S. Chamber of Commerce urges you to vote for both cloture on the motion to consider S. 43, the line-item veto bill, and the legislation itself.

S. 43 has the bipartisan support of 47 senators. It deserves the consideration of the full U.S. Senate.

The control of Federal spending is the most important issue facing American business. The U.S. Chamber believes that line-item veto will promote fiscal discipline in Congress.

Sincerely,

ALBERT D. BOURLAND.

[From the Washington Post, July 12, 1985]

THE "GANG OF 535"

Sen. Mark Hatfield's basic premise ["Line by Line, a No-Account, Veto," op-ed, June 25] is that the line-item veto, rather than being a panacea for budget woes, would transfer political power from the legislative to the executive branch. As far as the budget question goes, anything has to be better than the way Congress had handled the purse strings the last decade or so.

Every October we watch the debacle of 535 elected officials working late into the night to come up with a compromise budget. Occasionally it gets done before the spending authority has expired, all of which is to little avail since another 10 or 15 percent is spent in supplemental appropriations.

The transfer of political power is even more interesting. Sen. Hatfield says that the president could "undercut legislative intent" by selective use of the veto. Since 1972, when Congress took large powers away from the executive branch, we have had undercutting of executive intent (especially in foreign affairs) by legislative committee. The intent of the "Star Wars" program, for example, has been changed by reducing appropriations for certain programs necessary for development and not others. That's like buying a car with a V-8 and getting only four pistons.

Congressmen are continually voting for the best "pork" for their districts and not necessarily in the best interests of the country. If the line-item veto were to increase the power of the executive branch, so be it. The interest of the country is more important than the nest-feathering of the "Gang of 535."

FRED STENGER,
Fayetteville, Pa.

[From the Los Angeles Times, July 23, 1985]

LINE-ITEM VETO: OUT OF THE SHAMBLES

(By Edward M. Kennedy)

Growing support for the line-item veto in the Senate and the House is a reflection of the Pogo Principle in contemporary politics—"We have met the enemy, and they is us."

The budget process is in shambles, the deficit is out of control, and Congress is the problem. Our system of checks and balances, which functions adequately, even brilliantly in most areas, is out of kilter in the area of the budget. Congress has too much power over the purse, and the President has too little. The line-item veto, while neither the miracle cure that proponents promise nor the disaster that opponents fear, is one of the few available tools to redress the balance.

The fundamental issue is fiscal responsibility, and it has little to do with partisan politics or the current budget wars that pit a Republican President against a Democratic House—and even against his own Republican Senate. A larger principle and a longer perspective are at stake.

When 100 senators and 435 representatives have primary responsibility for the budget, no one is adequately responsible. The traditional veto power of the President, which worked well until the 1970s, is still sufficient to keep most other legislation in check. But it is too unwieldly to impose significant discipline on the appropriations process. In 1983 and 1984 the 98th Congress produced 623 bills that were sent to the White House and signed into law. Only 27 were appropriation bills, but they made up in size and scope for what they lacked in number—dispensing hundreds of billions of dollars across the entire range of myriad federal programs.

Very occasionally Presidents have been bold enough to veto one or another of these behemoth appropriations bills because they objected to particular provisions. More often the massive nature of the modern appropriations process overwhelms the primitive veto power, and the President acquiesces in bills that by any standard are badly flawed. By giving the President a stronger role, the line-item veto would instill a new and needed measure of presidential accountability in federal spending and reduce the excesses of a congressional process that too readily focuses on individual districts and separate interests, not the national interest.

In any event the line-item veto is hardly a riverboat gamble. Forty-three states already give a similar power to their governors, who universally regard it as an indispensable tool of budget control—at least until they become U.S. senators.

Presidents since Grant have sought the line-item veto, but until now Congress has refused to cede the power—and with considerable justification, because earlier Congresses seldom brought in budgets that were unbalanced. Today Congress has only itself to blame for the irresistible pressure to yield some of its power to the President. We gave away the Treasury with the massive tax cuts and huge increases in military spending of the past four years and the country will continue to sink into an irreversible morass of deficits unless corrective action is taken.

Everybody talks about balancing the budget, but nobody is currently doing much about it. Congress claims that it's the President's fault for failing to use the veto—"stop us before we spend again." The President pleads in turn that he fervently detests the deficits but does not have the power to fight them fully. So let's give it to him. Let's help him live up to his own rhetoric—and let's also see to it that Congress will be looking over its shoulders as it packages and passes future appropriations bills.

[From the Providence Journal, July 22, 1985]

LINE ITEMS AND PRESIDENT'S VETO POWER

Tomorrow, the U.S. Senate will vote, for the second time in as many weeks, on a motion to kill a filibuster of bill S. 43, the line-item veto. The need for such a measure has been steadily amplified in recent years by Congress's proven inability to cut federal spending. If the filibuster can be stopped (60 votes are needed), the bill is expected to pass the Senate with ease.

Sponsored by Sen. Mack Mattingly, a Georgia Republican, the measure would require that each item in an appropriations bill be sent to the President as a separate bill. This would allow the President to veto expensive "pork barrel" expenditures by which individual legislators buy the support of special interests back home.

With the authority to make item vetoes, the President could significantly alter the traditional budget process. The horse-trading of federal money among members of

Congress has in recent years produced last-minute package deals that are truly unconscionable. Appropriations that the Congress can't agree on during floor debate are, at the session's end, rolled into a "continuing resolution," which the President must either approve or veto in toto.

Last year's continuing resolution—totaling more than $500 billion—included more than half of all federal spending for the current fiscal year. It would be wildly impractical for the President to veto a package that includes so many essential appropriations; in signing it, he approves a vast amount of pork as well.

The filibuster against proceeding on the bill is led by Republican Sen. Mark Hatfield of Oregon. He asserts that the item veto would shift too much power from the Congress to the President, creating what Senator Hatfield calls "an open invitation to political mischief." Horse hockey! The governors of 43 states have item-veto authority, and there is simply no evidence that it can be used to install a ring in the legislature's nose. Those who see the item veto as a partisan contrivance should check in with Sen. Ted Kennedy, who isn't exactly a stingy reactionary. Even he supports it.

A second objection by opponents is that the item veto couldn't touch most federal spending, such as entitlement programs. This is true, but it rests on the cockeyed assumption that if the President can't veto the largest budget items, he shouldn't be given authority to veto smaller ones. That is a transparent plea for the sanctity of the pork barrel.

Neither of these arguments addresses the fact that S. 43 would give the President item-veto authority for only two years. That is a reasonable time to experiment with a power that otherwise could be conferred only by amending the Constitution. If, at the end of two years, the item veto proves to harbor even half the faults its opponents claim, that will be reason enough not to reinstate it. On the other hand, if it helps the President cut pork projects from a $900-billion budget, it will have earned its keep.

When the Congress shows, as it did last week, that it lacks the will to eliminate even the cost of elevator operators for the Capitol's automated elevators, that is symptomatic of the need to extend the President's veto power. Ronald Reagan says that he has the will to cut into the disgraceful waste of taxpayers' money. He deserves the chance to prove it.

[From the Athens (GA) Banner Herald, Feb. 25, 1985]

MATTINGLY'S LINE-ITEM VETO PLAN SHOULD BE CONSIDERED

Senator Mack Mattingly, R-Ga., appears to be gaining support for his proposal that the president be given a line-item veto on a two-year trial basis.

Almost 50 senators, including some fiscally minded Democrats as well as Republicans, endorsed the proposal when it was presented. President Reagan urged Congress to adopt it, and many other concerned Americans have offered their support.

Both houses should adopt the measure quickly, so that it can be put into effect this year.

Mattingly's proposal has several advantages over previous suggestions that a constitutional amendment be proposed to grant presidents this authority to influence budget-making.

First, it could be adopted much easier since it is a law rather than a proposed amendment. The time-consuming process of receiving approval in the states could be avoided.

Second, it proposes a trial rather than a permanent change. If Congress decides after two years that the plan has not helped, it could decide not to extend it or propose a constitutional amendment to make it more permanent.

The amendment is not being touted as the answer to budget deficits or other spending programs. It is being offered as one means to help foster responsibile spending. The president could become a more active partner in the budget process, and many non-essential proposals could be eliminated or postponed.

Congress would not be abdicating its power over the budget, since it would retain the power to override a presidential veto and it could throw out the whole idea after two years.

The line-item veto has been used successfully in 43 states, including California, where Reagan served two terms as governor. On the basis of his experience there, he argues that it could be a powerful tool against wasteful or extravagant spending in Washington.

Some opponents argue that the effect on the deficit would be minor because there is so little non-defense discretionary spending in the budget. But if that is true, they have little reason to oppose the trial.

Others argue that the system has served well for many years, so why change it. But has it really served well? Isn't our reluctance to change one of the reasons we have so many problems?

The Mattingly proposal is a reasonable effort to improve a system that is obviously flawed. It should be given a fair trial, then kept or abandoned as appropriate.

[From the Atlanta Journal, June 28, 1985]

SEN. MATTINGLY WINS A ROUND IN HIS CASE FOR ITEM VETO

Senator Mack Mattingly of Georgia has won a round in his fight for a line-item veto by default—but it is a short-term victory to be savored. The item veto was imperiled in a Senate committee chaired by Charles McC. Mathias of Maryland, a Republican, but a long-time friend of budget deficits and federal spending, particuarly for public employees. Mathias would have done away with Mattingly's proposal for a two-year test of the veto before it ever saw the Senate floor.

Mattingly is learning, however. He threatened to tie the veto plan to an appropriations bill, a wrong-headed but time-honored way of beating the system. Mathias allowed it to go to the floor.

Though Mathias and a few liberal Republicans oppose it, Mattingly has the support of 47 members of the Senate, including a great many Democratic powerhouses. They know a couple of things. They know that the current budget process, with 13 unwieldy appropriations bills that must be signed or vetoed by the president must be put into narrower focus. They know that the item-veto, with a provision for overriding by a two-thirds vote, works in 43 states.

None sees the item veto as a cure for red ink. At best, it might shave 1 percent or 2 percent from a given appropriations bill. Over time, however, those percentage points can add up. Most important, the threat of the veto of individual budget items should force Congress to act more responsibly, to avoid pork-barrelling and see-no-evil backscratching on pet projects. It is instructive how President Reagan's adamance against signing a years-old water project cornucopia has resulted in House and Senate scaling down the measure and insisting on larger local contributions.

The week's events in a House-Senate conference on budget resolutions shows the need for the item veto and muddies the ease of its opponents. The conferees are deadlocked on how to resolve their differences. Key House members are talking about going ahead with individual spending bills without so much as a target. We've been here before and $200-billion annual deficits prove it.

Mattingly must persist and prevail. The item veto is a small weapon with great long-term and psychological effects.

[From Savannah (GA) Morning News, May 17, 1985]

PASS LINE-ITEM VETO

Two years is all Sen. Mack Mattingly is asking to determine whether his proposal to give the president line-item-veto authority is worthwhile. That's a fair enough request by Georgia's junior senator.

After two years, if the Mattingly bill passes, Congress would reassess the line-item authority. If Congress by then should decide the president had abused the authority, or hadn't really needed it, then that would be that. If Congress, on the other hand, should decide that it's not a bad idea after all, then it would extend the authority.

So why not act and give the Mattingly bill a chance to prove itself?

The thought here is that line-item veto authority would work on the national level, just as it has worked well in the 43 states now according that authority to their governors. Georgia is one such state.

Another thought here is that neither President Reagan nor any one president after him would abuse the authority. Presidents, irrespective of party affiliation, have to maintain a degree of working cooperation with their lawmakers; to abuse the authority would be to court disaster where a president's own programs are concerned. Even a fellow party member isn't going to allow his president to push him around.

A line-item veto would help to streamline spending legislation by thwarting the temptation for members of Congress to tack unrelated spending amendments onto legislative measures going through the enactment process. It would be, as Senate Majority Leader Robert Dole says, "a proper remedy for the problem of overspending."

Under the present system, a president must approve or veto a bill in its entirety. If a bill contains 95 percent of provisions that both the president and Congress agree are good, but 5 percent of porkbarrel amendments tacked on like suckers clinging to the back of a whale, a president often has to accept the non-essential 5 percent in order to preserve the essential 95 percent.

With authority to veto line items in a measure, a president can say yes to the larger part and no to the smaller.

Would that, under the Mattingly bill, cast a president in the role of dictator? Absolutely not. The Mattingly bill would allow an override of a vetoed line item by a majority vote of each chamber. That's different from the present requirement of a two-thirds majority in each chamber for an override.

Also, the Mattingly bill contains the two-year-reassessment feature, which would protect Congress from an unreasonable presi-

dent. It's fair legislation, and in the public's interest.

Senator Dole wants the Mattingly bill passed after Congress returns from its Memorial Day recess. It should pass, go on to the House, pass there, and then be accorded the chance to work.

[From the Washington Times, Feb. 11, 1985]

A SIZZLING BIG MACK

If the line-item veto is too much for Congress to contemplate as a constitutional amendment, why not a two-year trial? A novel idea, and Georgia Sen. Mack Mattingly deserves special commendation for thinking of it. Sen. Mattingly's bill may have picked up enough support already to ensure passage in the Republican-controlled Senate. Perhaps it would take the appointment of Tip O'Neill as ambassador to Ireland to get it through the House.

A line-item veto, if only for two years, would have profound power to remake the budgetary process. Rather than heightening controversy over each spending issue, the device could well drain the budgetary process of demagoguery. Presidents propose budgets, as they say in civics class, but "chief executives" are much less active participants than is commonly supposed. As things work now, Congress is allowed to beat up on presidents for deficits not of their making.

Presidents have been known to beat up on Congress, of course, but that's just the point. Too much who-shot-Johnism removes the debate from sincere efforts to manage the taxpayers' money and restrain spending. If Sen. Mattingly's bill, which has President Reagan's blessing, becomes law, then the burden of demonstrating its usefulness will rest with the administration, and both sides will have to get serious.

Some conservatives have fought the line-item veto because of a misplaced constitutional fastidiousness. Appropriations are supposed to arise from Congress, and that's that. The point ignores two centuries of congressional recklessness, and conservatives should be the first to grasp the lessons of history.

The real fight will be in the Democrat-controlled House, of course. Perhaps Mr. O'Neill's legions will be brave. Perhaps they will seize on the measure to challenge the president's intentions, to place the burden on him if he thinks he knows so much. Perhaps he will be waiting for them.

[From Savannah (GA) Evening Press, Feb. 10, 1985]

LINE-ITEM VETO NEEDED

Suddenly last Wednesday night, Mack Mattingly, our junior senator, was in the spotlight. President Reagan mentioned him by name and the television camera covering the State of the Union address picked him up.

A nice plug for the old Empire State of the South, the Cracker State, or just plain ol' Georgia by any sobriquet. But when the senator and his admiring constituents finish taking bows, the fact remains that more than showmanship was involved in that allusion to the Georgia senator. The president was addressing a serious matter.

The matter is the proposal by Senator Mattingly of line-item veto authority for the president. The Georgia lawmaker proposed this in the last term of Congress, but the measure fell by the wayside for reasons of other more pressing business.

What he is proposing again is authority for the president to go through an appropriations bill, item by item, and approve or disapprove, also item by item.

Under present law, a president must accept or veto an entire measure, and appropriations bills have a way of picking up tacked-on pork-barrel projects during their final stages of passage. A bill can be 99-percent to a president's liking, but he must also approve that pesky 1 percent or risk delaying or killing many worthwhile projects. Too many presidents have had to grin and bear it by signing bills that contained boondoggle items.

The Mattingly proposal is sensible. It contains an override feature much in favor of the Congress—requiring only a majority to override a line-item veto rather than the present two-thirds requirement for an entire bill. And it would apply only to appropriations bills; thus, the two-thirds requirement would not be eliminated entirely.

Another favorable feature is that the Mattingly bill would be experimental, containing a "sunset" provision. That means Congress would have to renew it two years hence; if by then Congress should deem it had proved unworkable, that would be the end of it.

Many States, Georgia included, accord their governors line-item veto authority. The provision has worked well. Why not on the federal level as a means of streamlining the enactment and signing of legislation, as well as protecting the taxpayer—which is its main purpose?

[From Savannah (GA) Evening Press, May 22, 1985]

GIVE VETO A TEST

Forty-three state governors have the authority to use the line-item veto. It works for them and it would work on the federal level.

Congress should give this authority to the president. The result would be a tighter control on federal spending and a reduced deficit.

Georgia's Sen. Mack Mattingly has offered a bill that would introduce the line-item veto. The proposal, now before the Senate Rules Committee, has 46 co-sponsors. There's nothing radical about the idea. Sen. Mattingly's bill would provide for a two-year trial period in which to test its effectiveness.

"New methods are clearly needed to restrain the growth of federal spending," Sen. Mattingly told the Rules Committee. As he pointed out, the legislative process has eroded presidential options on spending.

Congress passes omnibus bills that contain a mixture of good and bad spending proposals and the president has to choose between a veto of the good to halt the bad and acceptance of the bad to get the good.

In the throes of confusion as a congressional session prepares to close, unwise spending proposals are passed without proper deliberation. In an effort to placate special interests, lawmakers make rash decisions. With the line-item veto, a president could discourage this practice and save the taxpayers money.

Automatically the line-item veto would inhibit the practice of tacking unrelated spending proposals onto important appropriations measures.

Congress would not be hurt or deprived of its authority by adopting the line-item veto. Instead, congressional integrity would be protected, for there would be less partisan legislating, less catering to special interests, and the president would catch the political flak.

Foes who say the line-item veto would upset the constitutional balance are quite simply wrong. Congress would retain the power to override presidential vetoes and would continue to have the final say on spending.

We say it's time to give Sen. Mattingly's proposal a fair trial. If it failed to fulfill its supporters' expectations it could be abandoned, and if it worked the public would be delighted.

[From the Atlanta Journal, Feb. 17, 1985]

MATTINGLY RIDES THE RIGHT HORSE ON LINE-ITEM VETO

Ideas take a long time to filter up or down, as the case may be. The notion of a line-item veto power for the president is an example. This newspaper and others have been urging it for three years as a vital step toward curbing the spending appetites of Congress. Sen. Mack Mattingly (R-Ga.) has pushed it, cajoled his colleagues and has seen one version of it go down to narrow defeat.

Mattingly's persistence now may be rewarded. President Reagan, after a visit from the senator and after the up and down filtering of the idea through press, public and Congress, endorsed it heartily in his State of the Union Message, even singling out a beaming Mattingly.

To his credit, the persistent and frugal Mattingly has obtained 46 other Senate signatures—Democrats and Republicans, liberals and conservatives.

The item veto seems a worthy effort, particularly now that Mattingly has reworked it into a two-year trial by statute, rather than constitutional amendment. Those who are queasy about another Reagan proposal, a constitutional amendment mandating a balanced federal budget, ought to jump at the line-item veto as an interim step that might remove the need for the sterner measure.

The item veto, which Congress could override by a two-thirds vote, is needed to save Congress from itself. Representatives, by necessity, do a good bit of horse-trading and log-rolling for local or pet projects. Congressmen face a lot of pressure from the famed special interests (and we include the Pentagon in that category).

The president in most cases has little leeway. Once he submits a budget to Congress, it comes back to him in the form of 13 monster appropriations bills or one continuing resolution. His choices are to sign them or veto them, with the usual risks of "shutting down the federal government" or "freezing Social Security checks at the Post Office." He too must horse trade because so often the spending bills come with pet presidential policy measures attached.

The government will spend in the vicinity of $973 billion in the coming year. It has run deficits ever since Congress "reformed" its budget process in 1974. The states, on the other hand, are showing record financial well-being. It is not an accident that 43 governors are armed with veto power over legislative spending items.

The line-item veto prevents Congress from hiding profligacy in massive packages. It would allow the president to focus taxpayer attention on pork-barrel dollars or hidden social agendas. It would force Congress to face those items in an up or down vote if members chose to try to challenge the president.

A great deal of Washington gamesmanship could be avoided. If the president wanted to do away with the Legal Services Corporation for instance, he could try it out in the open instead of using recess appointments to name board members interested in killing it by attrition. If the president wanted to rein in military pensions or college student loans, those items could be isolated for proper debate.

[From the Atlanta Journal, July 21, 1985]

SENATOR MATTINGLY'S VETO PLAN IS SURFACING IN NICK OF TIME

The timing couldn't be better for Sen. Mack Mattingly of Georgia. His cherished plan to give the president the line-item veto is heading for the Senate floor next week even as the federal budget process is bogged down, paralyzed really, in a tangle that is by far the worst of the sorry deadlocks of recent years.

Even the most casual observer can see that Congress' ability to even arrive at a budget, much less prepare an accurate one, is going aglimmering. Clearly Congress must re-reform its budget procedures and there must be new tools to deal with the irresponsible spending that produces annually underestimated deficits and overestimated revenues.

One of those tools—and it is a tool, not a panacea—is Mattingly's proposal for a two-year test of the line-item veto, a weapon to cut spending that's in use in 43 states and has the support of a bare majority of the U.S. Senate. If the president has the power to strike individual appropriations, he can save Congress from itself by pruning the log-rolling and pork-barrelling that is part of multi-headed compromises.

His power would not be absolute, but would be subject to override. Attention could be focused nicely on individual expenditures, instead of the huge catch-all bills that slide through now without public scrutiny. A congressman could vote on an item on its own merits instead of as part of a package deal of several other items. There would be fewer worries about extraneous riders.

What we've had lately is budgeting by brinkmanship. At the end of nearly every fiscal year, the president faces those 13 appropriations bills that he must sign or risk shutting down the government. This year, he might not even have that option. This Congress is heading toward the new year with few prospects of even the usual irresponsible continuing resolution, much less individual bills framed within spending targets. The paralysis demonstrates the need for Mattingly's plan, to choose just one reform.

The item veto is being held hostage this week by a filibuster led by a handful of Senate Republicans. A vote to end the delay may come Tuesday. Some two more votes must be rounded up before then to stop the filibuster. Since even Sen. Edward Kennedy supports that vote, the talking will end and Mattingly should have his floor test. Calls from a certain hospital switchboard this weekend might guarantee it.

The line-item veto is no shift in the constitutional balance of power, as its hysterical critics allege. It is a device that might shave at most 1 percent to 3 percent of federal spending in a good year. Its effects will be long-term and hardly can be said to be disruptive.

The real shift in the constitutional balances of power is going on right now on Capitol Hill. Congress is abdicating its budget responsibilities and its charge to promote the general welfare. Especially prudent Americans might consider that a constitutional crisis.

[From the Atlanta Constitution, July 24, 1985]

CONGRESS MAKES GOOD CASE FOR LINE-ITEM VETO

(By Donald Ratajczak)

Congress created a strong case for the line-item veto in its budget resolution deliberations last week.

The major argument against providing the president with veto rights against individual portions of a spending bill is the presumed tilt it could cause in political power. The president, it is argued, would be in greater control of all spending.

Some members of Congress argue that their control over budgetary matters will diminish if they are unable to attach spending provisions that are not wanted by the administration to bills that the administration strongly endorses.

However, Congress was unable to compromise on a spending blueprint to be used in controlling the size of appropriations.

If Congress cannot provide itself with a binding ceiling on total spending, allowing that body to continue attaching appropriations measures to unrelated bills is fiscal irresponsibility.

Indeed, the line-item veto will not diminish any budgetary authority that the Congress currently is exercising. Instead, the line-item veto will provide some budgetary controls where none now exist.

After the Budget Reform Act was passed in 1974, Congress created rules that appeared to provide control over a disorganized budgetary process.

Previously, appropriations were determined on a program-by-program basis. Compromises usually were resolved by adding resources to favored programs. As a result, the sum of all appropriations normally exceeded levels that most members of Congress felt were economically prudent.

According to the Budget Reform Act, Congress was expected to first establish a target for total expenditures. If subsequent testimony indicated that more spending on a given program was worthwhile, Congress either was expected to cut other programs to adhere to the spending guidelines or alter the spending on revenue targets.

As a result, budget-busting appropriations could be readily identified.

The idea was good, but the execution has been atrocious. This year, the Senate and House cannot agree upon a budget target. By failing to accept program cancellations, the House appears to be establishing budgetary savings that can be eliminated by supplemental appropriations as the budgetary year progresses.

SENATE REFUSES

The Senate refuses to go along with this charade. Therefore, no spending limits have been approved. For all practical purposes, the Budgetary Reform Act is no longer operational in Congress.

Still, budgetary control is sorely needed. By using a line-item veto, the administration can more effectively restore spending targets, as most governors currently do.

Congress still has the power to override the president, if he uses his veto to alter their priorities. It also can withhold appropriations for programs the administration desires if the president wields too heavy a line-item veto on Congress's pet projects.

If the Congress is so upset about losing authority to the president, it can reduce the override majority necessary to offset a veto. However, it is clear that Congress has failed in its budgetary responsibility.

The president should now be given the tools he needs to bring more order to the current budgetary mess.

[From the Wall Street Journal, July 23, 1985]

SOMETHING FOR THE FARMERS

Congress this week will prove once and for all that it is institutionally incapable of federal budget management. It will attempt to pass, before the August recess, a bill calling for nearly $40 billion in farm subsidies over the next three years. That's $12.5 billion above the Senate budget resolution "ceiling."

Individual congressmen know this is crazy. How can Americans, or the world at large, have any confidence in a legislative body that professes grave concern about budget deficits while at the same time handing out subsidies with reckless abandon? Yet such is the level of political courage in the House and Senate that members don't want to face their rural constituencies during the recess without having first written out a generous check. And this was supposed to be the year for farm-policy reform.

What instead happened was that Congress found it had three mutually antagonistic goals in writing the farm bill. It decided that all three did not have the same importance. By far the highest priority was "protection" of farmer income. In actual practice, that mainly meant protecting big farmers. According to the USDA, 12% of the nation's 2.4 million farmers got nearly half of last year's subsidy payments. Dairy farmers did best, with subsidies averaging $22,800. The House Agriculture Committee last week simply rubber-stamped a dairy subsidy bill written by the industry itself. "Protecting" income, in the language congressmen understand, means buying votes.

Goal number two, very much lower on the priority list, is to increase farm commodity exports. Price-support levels for major farm exports were set so high by Congress in 1981 that they have been pricing American farmers out of world markets. Farm products are a major U.S. export, so declining sales have been an important cause of the U.S. trade deficit, which congressmen wring their hands over when they are not wringing their hands over the budget deficit. But of course (see priority number one) they are not going to cut support levels, or at least not until after the 1986 elections. Instead, the government will pay farmers the difference between the income support "targets" and market prices, plus export subsidies. The Treasury will bleed profusely. There is no guarantee this will cure the trade deficit, but it will certainly boost the budget deficit.

Which brings us to priority number three. Priority number three is to get the farm bill's cost back below that $27.5 billion ceiling. That priority is the odd man out, to be sacrificed to the other two. Senate strategists in effect decided last Friday to go full speed this week on getting a farm bill passed, whatever the cost. The budget will be worried about when everyone comes back from vacation in September. Bon voyage.

There are other interesting little quirks to the House and Senate farm bills. For four years now, big land speculators in the West have been plowing up substandard range land and planting it in winter wheat. Envi-

ronmentalists are furious at this "sodbusting," which they say threatens a new dust bowl in Montana and other states where rainfall is light and topsoil marginal. They are right. Sodbusting, pure and simple, has been financed by Uncle Sam through investment incentives in the tax law combined with agricultural subsidy programs. In the farm bills, Congress proposes to pay the farmers up to $40 an acre to take some 25 million to 30 million acres out of use. As one observer puts it, "Uncle Sam paid them to put the land into production; now he is paying them to take it out." Nice deal.

The bill written by the dairy lobby for the House "does not deal candidly with U.S. dairy farmers or the public concerning the costs," a USDA letter to the chairman of the House committee said last week. In short, it underestimates them, not uncommon for farm bills. Even $40 billion for the total farm bundle may be a conservative guess.

We're told that senators and representatives are becoming increasingly edgy with one another over budget issues. They see a process collapsing before their eyes. Mr. Reagan is offering to do the cutting for them if they will give him a line-item veto. They may never get a better offer.

[From the Wall Street Journal, July 22, 1985]

TWO SENATORS

Only two U.S. senators now stand in the way of giving the line-item veto bill a chance to be voted on in the Senate. Last Thursday, a vote to end a filibuster against consideration of the item veto came up at 57-42, three votes shy of the needed 60. One supporting senator was away on family matters, so when the next cloture vote comes up, probably tomorrow, two votes would stop the filibuster and give the item veto an honest test.

What's the point of preventing the Senate from having the opportunity to vote this bill up or down once and for all? The moment that the item veto is removed from the Senate's agenda, Congress will be back with its Sisyphean rock at the bottom of the budget mountain. Congress is heading toward another December continuing resolution, with the federal accounts written up by the unelected staffers of the appropriations subcommittees.

Surely it's only a matter of time before constituents, challengers and home-town editors begin to figure out what a Ponzi scheme the federal budget has become for incumbents. A $900 billion budget and a $200 billion deficit is the sort of thing voters will eventually decide to hang on someone, and come November 1986 it won't be Ronald Reagan.

The item veto's purpose would be to give one major player in the process responsibility for saying no. It would therefore include someone within the system who is to be held accountable for spending. The high political stakes of modern incumbency have undermined Congress's ability to bear public, identifiable responsibility for long-term spending discipline. Sens. Hatfield, Byrd and Weicker have been orating that the item veto would upset the balance of power. What power? The only real purse-string power held in Washington now belongs to the special interests (see Sen. Byrd's remarks printed nearby). They built that $900 billion budget, they testify professionally on its behalf before committees like Sen. Weicker's and they'll defund the campaign of any formerly supportive incumbent who resists them.

It's just possible the Senate would like to alter this hapless game. Among Democrats voting to end the filibuster were Sens. Kennedy, DeConcini, Leahy, Nunn, Dixon and Pell. That doesn't mean they'd vote for the item-veto bill itself, but they're at least willing to open the door toward a vote on the bill.

Of these Democrats, only Sen. Leahy is up for reelection in 1986. All other Democratic incumbents up for reelection—Glenn, Hart, Dodd, Cranston, Ford and Eagleton—voted for the filibuster. So did two incumbent Republicans—Specter and Packwood. No doubt these senators have reasons for not giving the item veto a chance. What's becoming harder to understand is how all of them can defend what they do now as responsible management of their constituents' taxes.

NOTABLE & QUOTABLE

Senate Minority Leader Robert Byrd (D., W. Va.), filibustering on July 18:)

Mr. President, I feel that this breadth of opposition to the bill certainly is worthy of reference at this point. So I would like to read into the Record a list of these 41 organizations that have contacted my office expressing opposition to the line-item veto. They are as follows:

The AFL-CIO; the American Library Association; the United Mine Workers of America; American Association of University Women; the American Federation of Government Employees; the National Urban League; the Communications Workers of America; the American Council on Education; the United Automobile Workers of America; the National Association of Federally Impacted Schools; the United Steelworkers of America; the Committee for Education Funding; the American Federation of Teachers; the National League of Cities; the International Ladies Garment Workers Union; the International Union of Bricklayers & Allied Craftsmen; the Service Employees International Union; the Paralyzed Veterans of America; the United Food & Commercial Workers International Union; the Lutheran Council in the U.S.A.; the Food & Allied Service Trades Department of the AFL-CIO; Congress Watch; the Amalgamated Clothing & Textile Workers Union; Common Cause; the National Farmers Union; the Americans for Democratic Action; the Seafarers International Union of North America; the United Church of Christ, Office for Church in Society; the National Association of Letter Carriers; the United States Student Association; the Brotherhood of Railway & Airline Clerks; the Council of Great City Schools; the American Federation of State, County & Municipal Employees; the Children's Defense Fund; the Consumers Union of America; the National Council of Senior Citizens; the Coalition on Block Grants and Human Needs; the National Association for the Advancement of Colored People; and the American Association of Retired Persons.

Mr. President, I feel that this is a clear indication of the broad interest in this matter throughout the country.

[From the Wall Street Journal, July 18, 1985]

A SENATOR'S CHOICE

Over the next 48 hours, each of the 100 members of the U.S. Senate will have to make a choice about the way the government manages the people's money. Bill S.43, which would give the president a line-item veto over individual appropriations, is finally before the Senate. The bill's opponents, led by Sen. Mark Hatfield (R., Ore.), are attempting to kill it with parliamentary procedures that would prevent the full Senate from voting on the measure. The bill appears to have enough votes for passage, but whether 60 votes exist to kill Sen. Hatfield's filibuster is uncertain.

We suspect that most senators have thought about the item veto and its possible usefulness. With the voting finally at hand, however, senators might want to give some thought to how comfortable they are with the budgetary status quo. It is our sense that the politics of managing a federal budget now totaling $900 billion simply don't square with what most thought they'd be doing in Washington when they entered public life.

We're not talking about the traditional hardball of big-league politics. Men and women have come to Washington and played that game well and honorably since 1789. We're talking about something more peculiar to modern American politics.

The 535 members of the Senate and House now preside over a set of government functions, a bureaucracy and a federal budget whose scale is unimaginably large and complex. Each January the members return to Washington and again set to work at the task of parceling out $900 billion or whatever, which happens to be quite a few more billions than their constituents are willing to contribute in taxes. The Constitution quite specifically assigns this function to Congress, and for that reason the process and its participants command a certain level of respect. But that's not the only reason so many people pay their respects to the members.

The main reason is that federal spending is big bucks. You have the power of the purse over that much money and you get a lot of respect. But the respect now accorded the members isn't the same as it was, say, in 1960 when John Kennedy undertook to revitalize America. By comparison, Washington was a lean and vibrant place then. Today it's a built-up town of associations—thousands upon thousands of them, all pressing some legitimate claim on that $900 billion.

Over the course of any budget process now there will be deals, political payoffs, pork-packed supplementals, grand-scale log-rolling between liberals and conservatives, continuing resolutions written when the rest of the country is literally asleep and campaign solicitations mailed out to all those endlessly polite and deferential association people. We were struck last Friday by an item in the Journal's Washington Wire column: "At a $500-a-head fund-raiser for Rep. Rostenkowski, lobbyists received buttons saying, 'I did more than write Rosty.'" This is what the Founding Fathers had in mind when they wrote Article I, Section 7 of the Constitution?

A prominent senator called our office recently, and the discussion turned to the floundering budget process. "We're institutionally incapable of changing," the senator said. "And there's no use you wasting your time writing editorials slamming us for spending. We won't change because we can't." This man is a liberal.

We're certain this view of the institution's debilitating paralysis is shared by many more Democratic senators than have cosigned Sen. Mack Mattingly's item-veto proposal. We also doubt that many senators take seriously Sen. Hatfield's current filibustering argument that the item veto

would shift the balance of power unfairly in the president's favor. And we doubt that many have been distracted by the red-herring argument that the item veto's reach won't significantly reduce the deficit. Surely the senators who will be casting votes on the motion to shut off the filibuster know what the real issue here is.

The issue is that there are two words a politician needs to be able to say: yes and no. We now have a federal presence where the two words most used are yes and yes. That's why we have a $900 billion budget. Congress has demonstrated beyond a doubt that it cannot change this on its own. Its budget process has become the equivalent of trying to walk down the world's longest rising escalator.

The presidential item veto would provide one significant outside presence responsible for saying no. Yes, of course, Sen. Hatfield is right—the item veto won't wave away the deficit overnight. But the item veto will clearly allow individual members to sometimes step off the escalator of a political spending system that is no longer edifying or admirable. Senators might find that the public respect accorded them then would be far more genuine and satisfying.

[From the Wall Street Journal, July 11, 1985]

GOODBYE TO ALL THAT

David Stockman could hardly have picked a more appropriate day to resign. It was on a day when Tip O'Neill came out of a White House cocktail session chortling that he had busted up the centerpiece of the Reagan-Dole anti-deficit package, a Social Security freeze. It was a day when the House Agriculture Committee approved a generous dairy price support bill written, in large part, by the dairy industry itself. It was a day of dejection in the markets as the world watched Washington's spending-control efforts running aground once more.

Who can blame Mr. Stockman for leaving his White House frustrations behind for a desk at Salomon Brothers? At a Wall Street investment house, a bright young man can actually accomplish something. He can finance a skyscraper or a bridge, or a corporate takeover. He can sign binding contracts with his opposite number's John Hancock also on the dotted line—no more of those slippery political promises. He can make as much money as his talents will allow.

No one has ever doubted Mr. Stockman's talent. Indeed, we now hear Rep. William H. Gray III (D., Pa.), chairman of the House Budget Committee, complaining that Mr. Stockman's departure "leaves us in the lurch." In other words, if the budget process fails once more it won't be the fault of Tip O'Neill. It will be because the man who knows all the numbers fled to Wall Street and President Reagan didn't stop him. Now *no one* knows the numbers. This last point at least is almost believable.

We ourselves haven't minded seeing Mr. Stockman lose certain battles. In his legitimate concern about the large federal deficit he often has been too willing to join forces with tax boosters. That route was tried in 1982 when Mr. Reagan suffered the famous TEFRA swindle, agreeing with Congress to a $100 billion tax increase for spending cuts that never materialized. The new taxes didn't dent the federal deficit either.

But during all the time Mr. Stockman was taking deserved flak for his tax-increase feelers we never doubted his sincerity about spending cuts. His occasional bitter outbursts over battles lost to the military-congressional complex, or the agriculture lobby, or congressisonal logrollers, made this abundantly clear. Under him, OMB produced incisive documentation of the economic irrationality of Amtrak, the Job Corps, military retirement and dozens of other congressional sacred cows.

In an intellectual sense, the tax issue has been resolved. No one with any credentials believes anymore that the government can tax its way to solvency. The principle of a flatter tax schedule, designed to encourage more productive-effort and more useful investment, has support on both sides of the aisle.

There is widespread intellectual agreement as well that Congress spends too much money. It is one of the favorite stump themes of individual congressmen. They know it will win voter empathy. But as a body, Congress has proved beyond doubt in the 10 years it has had its own "budget process" that it is incapable of setting budget priorities and living with the revenues that American taxpayers are willing to yield for federal purposes. Organizational changes of the early 1970s converted Congress into a bazaar where the objective is to ensure that every member gets his share of the spending. And there's always the fond hope of scrounging up some new revenues.

The answer is not likely to be found in "cuts" hammered out in House and Senate budget resolutions. Speaker O'Neill abolished most of the hope for that Tuesday. Yesterday's agreement between Mr. Reagan and the congressional leadership on a new budget "framework" did little to revive hopes.

The answer is to give the president responsibility for the final outcome of the budget and hold him accountable to the voters. As things stand now, the president can legitimately say that he does not have sufficient control to be held accountable.

Giving the president a line-item veto, as the Mattingly bill now in the Senate does, would restore accountability. The president could edit out the excesses of the congressional bazaar. He could bargain over "entitlements." He would be less susceptible to lobbying pressures than would individual congressmen.

As a side benefit, the federal budget director would again have useful work to do. Should a talented replacement for Mr. Stockman be found, he would be less likely to follow Mr. Stockman's trail to Wall Street in search of relief from acute frustration.

[From the Wall Street Journal, July 10, 1985]

LOWELL WEICKER'S ITEM VETO

President Reagan met with congressional leaders last night to negotiate over the federal budget. Or, so he and the congressmen and the press seemed to think. What last night's summit illustrates, however, is that the president lacks the effective means, namely a line-item veto, to truly enter into the budget "process" at all.

As an example, consider HR 2577, the fiscal 1985 supplemental appropriation calling for some $11 billion to $12 billion for such items as the Commodity Credit Corporation, Social Security and the Postal Service.

The bill is a classic trough of unneeded spending, with large sums for "family social services," job-training schemes, and, of course, water projects. Yet somehow, we can't picture Mr. Reagan credibly threatening a veto over cocktails with Tip O'Neill. The president complains about the water projects. Tip reminds him the bill also contains $2 billion in aid to Israel and mutters something about Bitburg. Yes, but it also has money for more "job-training" boondoggles, Mr. Reagan complains. "Along with aid to the contras, Mr. President," Tip notes, asking him to "get serious" and consider a tax increase.

With just the blunt tool of a non-item veto, Mr. Reagan can only hack at a fiscal sausage that is designed, ground, cooked and sliced in Congress. The Washington's Post's Howard Kurtz recently described this process as it shaped Senate action on HR 2577. Lowell Weicker had two bills involving the handicapped stalled before a committee chaired by Orrin Hatch. Meanwhile, two Utah projects—$2 million for an energy research center and $3 million for a radiation clinic—were stalled before Sen. Weicker's appropriations subcommittee. "The two men conferred; the rest is legislative history," Mr. Kurtz put it.

Daniel Inouye wanted $2 million for four trauma-care centers, one for Hawaii, "Officials say it is understood . . . that another (will be) in Weicker's home state of Connecticut. A third center . . . will be in Utah."

All this comes amidst an interesting shift in the debate over a proposed presidential line-item veto. Early criticisms focused on the veto's alleged ineffectiveness, since it arguably would cover "only" the federal spending that now comes in the form of individual appropriations. Yet Maryland Sen. Charles McC. Mathias, a line-item critic, refuted this criticism well recently on our letters page. Sen. Mathias's complaint, in effect, was that the item-veto would work too well allowing the president to cut a project Mr. Mathias wants for Chesapeake Bay—or to allow it through in exchange for a critical vote on some larger spending bill.

For all the screams about creating some new tool of coercion, the line-item veto already exists. As HR 2577 illustrates, there are 535 line-item vetoes, one for each member of Congress to use in representing his limited constituencies. Also, these individual line-item vetoes, rather than focusing accountability, hide it among a morass of votes, deals, speeches and amendments. And they tend to generate spending, not control it.

A presidential line-item veto would merely counterbalance these smaller interests and allow the dispersed national interest in keeping spending under control to be represented. Before Mr. Reagan participants in negotiations with Congress he should demand what Sen. Weicker and 534 other members of Congress already exercise: a line-item veto.

[From the Wall Street Journal, June 21, 1985]

FIRST STEP

The Senate Rules Committee took one small step for mankind yesterday. It reported out a bill that would legislatively give the president the power of line-item veto over spending measures. We have become more convinced than ever of the importance of investing this authority in the modern presidency, and look forward to seeing the measure brought to the floor soon by Majority Leader Bob Dole.

Let us say quickly that we certainly don't want to leave the impression that the item-veto bill escaped from the Rules Committee with the imprimatur of Commerce Chairman Mac Mathias, alleged Republican of

Maryland. As has been evident the past week from Sen. Mathias's role in undermining the confirmation of Brad Reynolds to a high position in the Reagan Justice Department, Mr. Mathias marches very much to some other drum. And, indeed, Sen. Mathias's Rules Committee reported out the bill with an unfavorable recommendation.

The fact remains, however, that the item-veto measure sponsored by Sen. Mack Mattingly of Georgia has the sponsorship support of 47 members of the Senate. Nor is this bill the hopelessly quixotic effort of a band of like-minded Republicans. The Mattingly bill has the support of significant Democrats: Biden of Delaware, Proxmire of Wisconsin, Hollings of South Carolina, Exon and Zorinsky of Nebraska, Boren of Oklahoma. We call these Democrats significant in that they have one, important common interest—a strong belief that federal spending must be brought under control.

Indeed, the fact that it is possible to find 47 members of the Senate willing to publicly align themselves with a measure like this reflects the growing realization in Washington that something is fundamentally flawed in the modern budget process. When this bill comes to the Senate floor for debate, much will be said about tipping the balance of power and giving the presidency a virtual stranglehold on federal spending. But the plain truth is that precisely the opposite problem lies at the bottom of the spending impasse.

Once a president sends Congress his budget, he becomes a virtual spectator to the process. Oh sure, he can huff and puff about what he will or won't accept, but the total dollar amounts and number of programs in the appropriations bills have become so huge and unwieldy that the process has lost coherence. The executive and legislative branches both bear responsibility for how tax dollars are spent but answer to different political constituencies. As the system now exists there is no way for the two branches to negotiate their differences in a precise or prudent way. The current system is merely a 12-month slugfest, often settled in the dark of the night by continuing resolutions only committee staffers pretend to understand.

Providing the president with the potential power to veto single spending items would force both the White House and Congress to make clear spending choices. The manner in which the Senate disposes of the Mattingly item-veto bill will tell the public a lot about how serious our lawmakers are in their posturings about bringing the budget under control.

[From the Wall Street Journal, May 13, 1985]

S. 43

We watched with great interest last week as the U.S. Senate tried in its budget deliberations to figure out how to slash the budget in an economically significant way while simultaneously retaining such vital national commitments as Amtrak and the Small Business Administration. By week's end, the White House compromised with Congress: In return for some marginal spending cuts for Amtrak, the Job Corps and whatnot, plus a freeze on Social Security increases, the White House agreed to cut the real growth in spending for the Defense Department to zero.

The more we watch this process, the more we think Washington is overlooking one other significant way to save time and money: Abolish the White House.

Who needs it? The executive branch exists to inject into the political process some sense of direction or discipline, but it no longer has the tools to spike the narrow-interest logrolling inevitable in the 535-person committee at the other end of Pennsylvania Avenue. Indeed, the presidency looks more and more like a hapless intruder into the village calm of the nation's capital.

Consider, for instance, that the White House's current resident carried 49 states in the past election, and that he was given nearly 60 percent of the popular vote after four years of widespread coverage of his desire to severely cut back the federal presence in the American economy. Every voter in America knew that Ronald Reagan was not Howard Baker or Gerald Ford. And presumably the president believes that the results of the November election are the way our political system tells an incumbent president to follow his own well-advertised instincts. So, two weeks ago, Mr. Reagan went on national television to describe in detail his desire to eliminate most of the federal programs he said he wanted to eliminate back in 1981.

Now consider again last week's "compromise": The president gives away the one thing he campaigned for—restoration of the nation's defense—and virtually caves in on the one thing he campaigned against—the 20-year proliferation of domestic spending programs. So much for the imperial presidency. Sen. Domenici assures us this will not kill any weapons programs; they will only be stretched out, which means that over a period of years the cost of the weapons will be increased in the name of balancing the budget.

Getting the president to stipulate that he can live with zero growth in defense is in fact absolutely all that has been accomplished in the compromise. Everything else is meaningless. Next comes negotiations with the House Democrats, then comes the negotiations with the conference committee, then comes the negotiations with the appropriating committees in both houses and their conferences. Finally when Congress cannot pass a budget at all, there comes the negotiations with the faceless congressional staffers who will write the "continuing resolutions" in the last hours of the fiscal year.

If any further evidence was needed that the White House is now playing by Congress's rules, it was Mr. Reagan's statement Friday that "I have the agreement of the Senate that if this represents a cut in [defense] spending beyond where we should go, I will be returning for a supplemental appropriation." If so, Mr. Reagan will probably have to take a ticket to get in line behind the likes of Republican Sen. Al D'Amato of New York as he tries to get funding added back for mass-transit subsidies. "Supplemental appropriations" is a device Congress has used for two years to appropriate money effectively out of public view. Little national coverage, no accountability, no one takes heat for anything, everyone gets reelected. It is unfortunate to see Mr. Reagan indicating his willingness to participate in this.

We prefer the proposal the president made in his budget speech the other night: "If Congress can't bring itself to do what's right, they should at least give me what 43 governors already have—a line-item veto. Then I'll make the cuts; I'll take the responsibility, and the heat. And I'll enjoy it."

The process of establishing the item veto starts tomorrow. Sen. Charles Mathias (R., Md.) is scheduled to hold a hearing on S. 43—the bill introduced by Sen. Mack Mattingly of Georgia and co-sponsored by 46 senators that would create a legislated line-item veto power over appropriations for the president. This is the one proposal on the horizon that would correct the present imbalance between executive and legislative branches, allowing each do to its job and the government to form a budget with some priorities, or indeed any budget whatever.

Sen. Mathias is reportedly no friend of the item veto, and he did not join his many Republican colleagues in co-sponsoring the Mattingly bill. What is at issue at this point in the process, however, is whether the Rules Committee will send the item-veto legislation on to the full Senate, with or without a favorable recommendation.

Once in the Senate, the item veto's fate falls to Majority Leader Bob Dole, who alone is able to bring the bill onto the floor for debate. Sen. Dole surely deserves some kind of credit for keeping all those budget balls in the air. But as the great compromise—Social Security cut and all—moves over to the fun House, the importance of keeping the Mattingly item-veto bill alive becomes more urgent.

[From the Wall Street Journal, Apr. 18, 1985]

GETTING SERIOUS

They're doin' it again. "It" is the congressional budget process. This Monday the Senate will begin floor deliberations over what the process calls a "budget resolution." Bear in mind that this is April and that for the last two years the "process" has lasted until December, when a "continuing resolution" has been cobbled together in the dark of night by congressional staff assistants no one has ever heard of, let alone voted for. But—lest readers judge us too cynical—things could be different this year.

Congress's budgeteers this year are likely to encounter two new elements alien to their status-quo politics. The first is the new White House-GOP budget that reduces outlays in part by *killing* many long-lived federal programs. The second is the probability that Majority Leader Bob Dole will schedule a vote on Sen. Mack Mattingly's bill to legislatively empower the president to veto line items in this year's budget. Critics of the item veto can no longer claim the administration wouldn't use it, and coupled with the proposals to close out programs it is the one proposal that could decisively change the process that has put the budget out of control.

Indeed, the program-killing budget proposal and the Mattingly item veto constitute the only serious attempt we're likely to see this year to enact spending control that the markets would recognize as spending control. The alternatives—notably an across-the-board spending freeze emerging from the House Budget Committee—do little more than defer an eventual return to the current, economically debilitating status quo.

The tradition-busting significance of what Bob Dole brought away from this negotiations with the White House becomes clearer when you see a simple list of the programs to be eliminated. Those that would cease to exist with this budget or in a few years are: general revenue sharing, the postal subsidy, the Small Business Administration, the Job Corps, urban-development grants (UDAG), the Amtrak subsidy, the FmHA rural-housing program, direct loans from the Ex-Im Bank and Conrail via a sell-off. Programs to

be phased out over time are the crop-insurance subsidy and the Rural Electrification Administration. Spending reductions and significant changes in spending formulas would touch some 28 other programs affecting students, farmers, the Medicaid program, federal workers and pensioners, scientists and others.

To get the cuts and terminations, of course, President Reagan agreed to back off from his military budget. In return, he got the support of the leaders of his fellow Republicans in the Senate. Now he will be asked to compromise with the full Senate, then with the Democratic leaders in the House, then with the full House, then with the Conference Committee. And no one can make any of the deals stick. As Barry Goldwater says, "There will be more attempts to amend this bill than any bill that ever came to the floor."

So on recent form next week's budget news will probably degenerate into a din of whining about "pragmatism" and how we can't to it what with the '86 elections only 500 days away. Then Congress and the White House will embark on a confusing and debilitating round of compromises over "saving" UDAG grants, Amtrak subsidies and the like. By the end of the session, the president will have compromised a half-dozen times on the military budget, the spending interest will have run amok, and we will have a "budget" like all other recent budgets.

Imagine how much more productive and rational the process would be if Congress enacted the legislative line-item veto. This budget's program terminations amount to a public listing of where Ronald Reagan's item vetoes would fall. Anyone who wanted to save these programs would be required to give up something in bargaining, and the president would have recourse if Congress failed to deliver. With this mind-clearing discipline, the bargainers could bypass this swamp and get down to bedrock bargaining. That means cutting a deal over this budget's two most volatile aspects—Social Security cost-of-living adjustments and defense spending.

By proposing the actual elimination of moribund federal programs, the president and Majority Leader Dole have taken a first, significant step in breaking the cycle of budget failure. But this is not enough without something to instill some discipline in the process. The next step, which needs to be taken before the opportunity of enacting this budget is lost, is for Mr. Dole to move the Mattingly item veto onto the Senate calendar and for Mr. Reagan to lobby actively for its adoption in both houses. Then spending control and deficit reduction will at least have a fighting chance.

[From the Wall Street Journal, Mar. 8, 1985]

MR. REAGAN'S ITEM VETO

Here is how a presidential line-item veto works:

On Tuesday, congressional Democrats sent the White House a farm bailout bill that they said would increase outlays by $429 million over the next few years. The White House said Tuesday the bill would increase federal spending by $1 billion to $2 billion. By Wednesday afternoon, the spending bill's actual cost to the nation's taxpayers was quite clear. It would be $0.00.

The bill is dead, killed by what may be fairly regarded as a line-item veto.

We and others, notably Sen. Mack Mattingly of Georgia, have been arguing recently that investing line-item veto authority in the presidency would be the most productive, efficient and feasible way to restore rationality to the federal spending process. Sen. Mattingly now has a bill, with nearly 50 bipartisan co-sponsors, that would give the item veto a two-year trial. It is not often that a public-policy proposal receives such a clean chance to demonstrate its attributes and probable effects, but the Reagan farm veto did just that.

Though attached to an African aid bill, the farm bailout was for practical purposes a single, clearly targeted appropriation. That is what Mr. Reagan vetoed, nothing more and nothing less. Now compare this veto with the one Mr. Reagan would have been required to cast last year against the appropriation bill for "agriculture, rural development and related agencies."

There were well over 100 individual spending categories in that bill, ranging from all the various farm credit programs, food stamps and related welfare spending, on through the Food and Drug Administration. It added up to a single, $30-billion lump of federal spending. As with the other 12 multibillion-dollar appropriation bills, a president is required either to veto the whole thing or let it pass. The expansion and complexity of the federal role has made the current veto power indiscriminate and obsolete. The item veto would be precise, discriminate and effective.

The president and Congress are now spending $900 billion annually on hundreds upon hundreds of programs that few Americans know exist or rarely see. When the budget dust clears, the average voter today is very hard put to make an informed judgment about who exactly decided to spend money on what. With an item veto, the president could both take the heat for spending cuts and sharpen public debate over individual spending decisions.

Such a need was made abundantly clear this week by the activities of the Senate Budget Committee. On Tuesday the committee voted a huge cut in defense spending. And the next day they resumed fattening the domestic accounts and trading pork. Farm spending went up $6 billion. The president's plan to end a brain-dead program like rural electrification was reversed. Fritz Hollings, the great defense cutter and heretofore unknown train buff, stoutly defended the committee's decision to continue Amtrak subsidies. More aid for urban development and mass transit was whooped through. By noon yesterday, Louisiana's Sen. Bennett Johnston was mocking "this mating dance of spending cuts" and asserting the inevitability of a tax increase. This is the status quo, and we invite opponents of the item veto to come forth and defend it.

These opponents say Capitol Hill will simply cast special-interest votes and let the president clean up the mess, encouraging political irresponsibility. But in Tuesday's House vote on the farm bailout, 65 members of the House switched their votes to oppose the bill, suggesting it's more likely that presidential leadership will tip many fence-sitters toward responsibility. Similarly, we suspect that if the item veto existed, the budget committee wouldn't be wasting its time bogged down in sludge like Amtrak.

The item veto won't make the acrimony of budget politics disappear, but it will make it more productive by forcing tough and serious political decisions. Both the president and Congress would have to work more closely to cut deals over their priorities. In a sense, the person who holds the key to all this is Senate Majority Leader Bob Dole.

The more intense politics of the item veto would put a special burden on the congressional leadership. But we suspect Mr. Dole is precisely the person who holds the political skills needed to make the item veto work in a way that gives all players a chance to benefit. The scheduling of a debate and vote on the Mattingly bill is in Mr. Dole's hands. After a week that witnessed both a successful presidential item veto and the breakdown of the budget committee, it is clear that the Mattingly bill deserves the Senate's highest priority.

[From the Wall Street Journal, Feb. 26, 1985]

RESCUE THE SENATE!

Don't be surprised if they start putting up bunkers soon around the Capitol building in Washington; it's becoming increasingly evident that the gentlemen and ladies of Congress are under siege. The nation's governors are holding their annual meeting in Washington this week, for example, and had great sport ridiculing the Hill's quixotic attempts to cut the budget.

When a parade of senators and House members came before the governors to describe the heavy burden of budget-reduction, the state executives practically hooted their federal colleagues out of the room. California's Republican Gov. George Deukmejian described their presentations as "a lot of hand-wringing." Massachusetts's Democratic Gov. Michael Dukakis, taking up the issue of fiscal responsibility, mocked the visitors from Capitol Hill for not doing in four years what most governors have been doing in a single session. "These guys," he told his fellow governors, "tell us it's painful and excruciating and, 'Oh, it's so difficult.' " The governors laughed.

Today the governors will stop laughing and start voting on a series of resolutions approved by their association's executive committee. One of those resolutions calls for empowering the president with a line-item veto over appropriations. Currently 43 of these 50 governors hold a similar line-item veto authority. It would be most informative to have someone like Gov. Deukmejian sit down on one of our TV-interview programs and explain the political dynamics of the item veto to Washington's politicians and pundits. We suspect that what he and many other governors would say is that the item veto is the indispensable tool in any effort to extract spending discipline from a body of legislators.

If we have learned anything from these first weeks of budget politics, it is that the Washington status quo—the politics of self-interest—is very likely to again grind the budget process into dust. Right now it's the farmers. Barely into a new session, the Senate stumbled into gridlock last week over the farmers' bailout and the Meese confirmation vote. The paralyzed Senate recessed after midnight Friday and came back for more on Saturday, when Majority Leader Robert Dole was finally able to cut a deal with farm-state Democrats. This may be February, but Washington's politics is already resembling the manic eleventh-hour continuing-resolution atmosphere of late November 1984.

Surely it must be evident to serious Republicans and Democrats by now that Congress has some severe institutional problems that operate independently of any individ-

ual politician's assertions about spending freezes or reductions in cost-of-living increases. There is little reason to believe that these institutional weaknesses will not again cause the annual budget gridlock that is turning Congress into an unfortunate laughingstock. The remarks by Govs. Dukakis and Deukmejian make it evident that high officials from both parties are willing to lob bombs inside the Beltway. And speaking at a White House dinner for the governors Sunday night, President Reagan likened Washington to "the Twilight Zone."

What we have now in Washington is a budgetary system that has the appearance but rarely the substantive results of serious politics. It is political burlesque. The line-item veto would create a significant new force outside the congressional system. The president would have to make his priorities explicit. Congressional Republicans and Democrats would have to bargain with the president. Both sides would have to do what is rarely done now—make choices.

The vehicle most likely to return serious politics quickly to Washington is Sen. Mack Mattingly's bill to legislatively give the president a line-item veto for two years. Mr. Reagan endorsed the experiment in his State of the Union address. The bill currently has 47 co-sponsors, including six Democrats as well as the majority leader and other ranking Republicans. But it remains mired in the parliamentary swamps. The stately procedures of the Senate are not tampered with lightly, only when farm senators unleash a filibuster against a cabinet nominee in order to get a vote on their land speculators bailout bill.

The Hill needs help. Sen. Dole's earnest efforts at a budget solution have been thwarted, and the Senate is already dissolving into an orgy of politics as usual. Senators of both parties ought to be concerned about the future of the World's Greatest Deliberative Body. And they could start to rescue themselves if more Democrats signed up on the Mattingly bill, and if Sen. Dole and the Republican leadership turned their full ingenuity toward ensuring an early vote.

[From the Wall Street Journal, Feb. 7, 1985]

VOTE THE VETO

Last Thursday, Sen. Mack Mattingly of Georgia met privately with the president and told him that he is now within several votes of the number needed to enact line-item veto authority for the president.

Last night, Ronald Reagan went up to Capitol Hill and in his State of the Union address urged Congress to enact Sen. Mattingly's bill.

What's behind this sudden momentum on the item veto? Votes. Sen. Mattingly gave the president a letter urging him to publicly endorse the bill. The letter had 47 signatures. They fill three pages with great senatorial flourishes—Bob Dole, Phil Gramm, John Warner, John Chafee, Larry Pressler, John East, Alan Simpson, Arlen Specter. They have signed on to the Mattingly line-item veto bill from all the current pigeonholes—pragmatists, ideologues, moderates. The signatories include as well a Who's Who of fiscally sane Democrats—Fritz Hollings, Joe Biden, Bill Proxmire, David Boren, James Exon, Edward Zorinsky.

It is altogether appropriate to undertake a serious push for spending discipline in the same week that Washington officially started deciding how to spend $973 billion. The existing veto, which can shut down several departments at once, has become pointlessly destructive. It is obsolete.

Because the Mattingly item veto would be enacted legislatively, not via a constitutional amendment, it could become effective on passage. The House of course would have to vote for it as well. The first thing people will say about this is: Forget it. The second thing they will say is: What if the president barnstorms around the country in 1986 waving the Senate's act of fiscal responsibility in the face of Tip O'Neill's colleagues? And the third thing people will say is: Why would the House vote against something that would allow it to lay all the blame for these terrifying spending-cut decisions on Ronald Reagan?

The Mattingly bill would require every spending item in an appropriations bill to be enrolled as a separate bill for presentation to the president. His item veto could be overridden by a two-thirds vote. This law would expire in two years, when it would require renewal. The burden of usefulness obviously would rest on the item veto's supporters.

This last provision will surely elicit a great horselaugh from the item veto's opponents. They argue that so little non-defense discretionary spending resides in the budget that the item veto's effect on the deficit would be insignificant. This facile argument deserves a high-school debater's answer: If the thing is so harmless, what's the harm in giving it a try? In point of fact, the line-item veto is opposed because it would be all too efficient at reordering the political culture of Washington.

The item veto's real threat to the status quo does not lie in its ability to chisel dollars off the top of this $973 billion block of wood. Its power is that it turns the president from a passive to an active participant in the budget process. The other day Budget Director David Stockman parried agricultural policy with members of the Senate Budget Committee, hinting at administration backing for a farm-credit bailout in exchange for Senate action reducing permanent price-support subsidies. Any child can see that this kind of bargaining would be tipped decisively toward budget discipline if Mr. Stockman were backed with a president's power to zap spending for the individual handouts being pushed by individual senators.

More broadly, with an item veto looming, both the president and Congress would have to make their priorities clearer than they do now. The president might conceivably make clear that he wants his Ag Department reforms, opposes the land speculators' bailout, and wants to abolish urban-development grants, defund Legal Services and achieve five key Grace Commission reforms. Such a list wouldn't merely reflect a shuffling of budget accounts, but the president's view of what are and are not appropriate responsibilities of the national government. Congress, including the fiscally sane Democrats, would lay competing priorities and legitimately held beliefs on the table. They would do deals. They would do politics. But spending restraint would be dealt a better hand.

If the budget process is now perceived to be a captive of special interests, that is because the budget process is largely a captive of Congress, which quite properly represents special interests. The line-item veto would enable the president to pose his national constituency against Congress's particular constituencies. For many unfortunate reasons, Congress has evolved the budget into what is now essentially a secret activity. With the budget now approaching $1 trillion, that concealment is irresponsible and indefensible. It must stop. And the quickest way to stop it is to enact the Mattingly line-item veto bill.

STATE UNIVERSITY
COLLEGE AT CORTLAND,
Cortland, NY, January 30, 1985.

Senator MACK MATTINGLY,
U.S. Senate,
Washington, DC.

DEAR SENATOR MATTINGLY: After a careful examination of your proposal to give the President a two-year statutory line item veto authority over appropriations bills, I write to express my support. It is my considered judgment, as expresed in my article, "The Item Veto: Would The Founders Approve?" Presidential Studies Quarterly, Spring 1984, that the item veto is necessary to restore the balance of power between the legislature and the executive that the Founders deemed essential for good government. Although I would prefer a constitutional amendment, I support this bill as an experiment and a first step for I respect the concerns of those wary of constitutional change. I wholeheartedly agree that constitutional amendments should not be made lightly and that the burden of proof lies with those proposing constitutional amendments.

In the process of forming my judgment on your proposal, I have reviewed the literature and weighed and considered the several objections to the proposal. I conclude that your proposal meets the raised objections, constitutional, political, practical and ministerial, either fully or on balance. I have considered each of these objections separately and formulated a response, which I have attached. Please feel free to use any of these thoughts you find cogent.

Three simple statements of fact have a bearing on the item veto: 1. The veto was created by the Founders to be an internal control on government. 2. Congress has eroded the veto power. 3. Government spending is out of control. While the item veto is not the only or the sufficient solution to the problem of government spending, it is a solution to the imbalance of power. To be the sufficient solution to the imbalance of power, it would have to take the form of a constitutional amendment. What Congress can give, Congress can take away.

A statutory item veto authority may be justified on practical political grounds, but it must also overcome that objection which has proven fatal to previously made statutory proposals—their unconstitutionality. In my judgment your proposal is constitutional for it does not change the requirement of presentment to the President or the provisions for reconsideration and override, and it is based on the congressional power, implicit in Article I, Section 5, to define a bill.

There are many practical arguments for the item veto, but the compelling argument is constitutional principle. It is fidelity to the separation of powers with its checks and balances. As Hamilton said, in Federalist 71, without the checks and balances, "such a separation must be merely nominal, and incapable of producing the ends for which it was established." The foremost, though not the exclusive, end was to prevent legislative dominance, as is clear from Hamilton's elaboration:

"It is one thing to be subordinate to the laws, and another to be dependent on the

legislative body. The first comports with, the last violates the fundamental principles of good government; and, whatever may be the forms of the Constitution, unites all power in the same hands. The tendency of the legislative authority to absorb every other has been fully displayed and illustrated. . . . in governments purely republican, this tendency is almost irresistible. The representatives of the people, in a popular assembly, seem sometimes to fancy that they are the people themselves, and betray strong symptoms of impatience and disgust at the least sign of opposition from any other quarter; as if the exercise of its rights, by either the executive or judiciary, were a breach of their privilege and an outrage to their dignity."

Hamilton may not have been foresighted enough to predict the specific means of encroachment, that Congress would abuse its power to define a bill in order to encroach on the veto power, but he did foresee the general tendency. Indeed, on reading his last sentence above, one would think that he had actually overheard the objections to the item veto reform made by a few of our representatives—so aptly does he describe them.

The veto is an indispensable check and balance, and the Founders intended that it be frequently and forcefully used as an essential internal control on government. The Founders saw in the veto the means of providing the benefits of reconsideration and anticipation. Abusing its power to define a bill, Congress has trespassed. Having transgressed, will it rectify? The more cynical analysts may believe that this proposal has the same prospect of passage as the fox locking the chicken coop, but I do not share this view. Political Scientists teach their students that there are two theories of representation: the delegate, who is the faithful representative of his small part of the whole, of the special, narrow, local interests of his particular constituents, and the trustee, who, knowing that the whole is greater than any of the parts or even their sum, acts for the good of the whole. Which, the students ask, is the model followed by our representatives? The answer, I believe, is both—as the situation requires. On occasion a policy that transcends the clash of special interests and institutional jealousy of power is needed. On such occasions many of our delegate representatives are capable of being trustees. This proposal is such an occasion. It is an opportunity to revitalize one of our constitutional checks and balances; it is an opportunity for statesmanship.

It is possible for our representatives to be statesmen; it is possible because it must be possible if men are capable of self-government. The fundamental policy of "supplying by opposite and rival interests the defect of better motives" is a prudent and necessary policy, but there are times when there is no substitute for "better motives". The establishment of the policy is the work of Founders, of men who in creating it, transcended it. That policy could only be created by men of "better motives". It can only be recreated by men of "better motives".

Since I believe your proposal is a first step in reanimating the Founders' fundamental policy of government, I not only support your proposal, I honor the commitment that you and your colleagues in this endeavor have to be our fundamental constitutional principals.

Sincerely,

JUDITH A. BEST,
Distinguished Teaching Professor,
Political Science.

OBJECTIONS TO THE LINE-ITEM VETO CONSIDERED

(Prepared by Judith A. Best)

THE CONSTITUTIONAL OBJECTION

The objection is that the proposal is unconstitutional because it would change the Constitution, specifically the veto power, by act of Congress alone.

The response is as follows: Article I, Section 5 of the Constitution permits this procedure. Nothing in Article I, Section 7 is violated by this procedure. Under this proposal, all bills must be presented to the President. He may sign or veto all bills. He must return vetoed bills with his objections. Congress may override any veto with a two-thirds majority of each House.

Under Article I, Section 5, Congress possesses the power to define a bill. Congress certainly believes that it possesses this power since it and it alone has been doing so since the first bill was presented to the first President in the first Congress. If this construction of Article I, Section 5 is correct, the definition of a bill is a political question and not justiciable. "Prominent on the surface of any case held to involve a political question is found a textually demonstrable constitutional commitment of the issue to a coordinate political department." *Baker* v. *Carr*, 369 U.S. 186 (1962). "A textually demonstrable constitutional commitment" of the issue to the legislature is found in "Each House may determine the Rules of its Proceedings." If Congress may define as a bill a package of distinct programs and unrelated items, it can define distinct programs and unrelated items to be separate bills. Either Congress has the right to define a bill or it does not. Either this proposal is constitutional or the recent practice of Congress informing omnibus bills containing unrelated programs and ungermane items is constitutionally challengeable. If the latter, the President would be well advised to bring such suit against the next omnibus bill.

THE IMBALANCE OF POWER—IMPERIAL PRESIDENCY OBJECTION

The objection is that the proposal would create an imbalance of power, concentrating more power in the executive thus leading to an imperial Presidency.

The response is as follows: The imbalance already exists and the proposal is an attempt to restore the original equilibrium. This objection appears to be compelling because it invokes a principle convincing to both the theoretical and the practical reason. The good once attained, innovations must be retrogressions or once you're at the top, any movement must be downward. A proper balance of powers once established, any change must destroy the balance. The logic of this argument, however, is not convincing because it is based on the incorrect factual assertion that no charge has yet occurred. The fact is that the balance of power has already been disturbed by Congressional practice, by encroachment on the veto. The proposal is not an innovation, but a restoration.

The objection is unwarranted if not absurd because an imperial President has an absolute veto not a qualified one. Congress would still have the power to override any Presidential veto. The objection is invalid because this proposal is limited to appropriations bill and has a two year sunset provision. The very existence of this line item veto would depend upon simple majorities in each House of Congress. What Congress can give, Congress can take away. A more valid objection to this proposal is that it gives too little, not that it gives too much.

Although the less than charitable might describe this objection as the pot calling the kettle black, for it is Congress that has managed to encroach on the veto power through such things as riders, non-germane amendments and pork-barrel provisions in omnibus bills, nonetheless the balance of power objection is on its face so serious that it deserves a respectful hearing and the strongest possible rebuttal.

Much of the opposition to the line item veto is based on jealousy of institutional prerogative, and this jealousy is usually a good thing. A "prudent jealousy," Madison said, is "the first duty of Citizens," and is one of the effectual "personal motives" the Founders decided to employ "to resist encroachments" on the separation of powers. Jealousy of institutional prerogative is desirable and necessary to preserve our balanced system of government. But, prerogative means prerogative and not license. The constitutional prerogative, the exclusive and unquestionable right of Congress, is to pass or to refuse to pass bills and resolutions and to override presidential vetoes by two-thirds votes. Congress has no prerogative to exclude the President from the legislative process or to debilitate the veto.

Opponents charge that with the item veto, "the President can frustrate a decision of the Congress on any individual program." (Hatfield, S13446, Oct. 4, 1984) Yes, indeed.

Exactly so. To frustrate, to check, to thwart the decision of ordinary majorities of Congress and thus provide the benefits of reconsideration is precisely what the veto is for. The logic of this objection would support a Congress that produced just one bill each session, a Congress that lumped all bills into one grand all-encompassing measure, thus giving the President but one opportunity to veto, to take all or nothing. This objection is not merely an objection to the item veto, it is an objection to the veto itself, to the veto as it was created and intended to operate. Either the opponents do not understand, or they do not agree with the Founders concept of the separation of powers. Under the separation of powers, Congress was not given the plenary power to legislate. The legislative power was divided, and one-sixth of it was given to the President (one-sixth being the difference between an ordinary majority and a two-thirds majority). That one-sixth of the legislative power is the President's prerogative, his exclusive and unquestionable right.

In terms of legislation, Congress was given the first word and the last word, not the only word, not the unimpeded, unfrustrated word. Congress alone can initiate the lawmaking process by passing a bill. The President cannot initiate a bill. Congress has the last word because it can override a veto. The President does not have an absolute veto. But in between, the President was given the power to frustrate, to check, to thwart. The reason why is most succinctly stated in "Memorial and Remonstrance" where Madison asserted, "The preservation of a free Government requires not merely, that the metes and bounds which separate each department of power be invariably maintained; but more especially that neither of them suffered to overleap the great Barrier which defends the rights of the people." The "great Barrier" is limited government, government with internal controls, with the checks and balances that enforce the "policy of supplying by opposite and rival interests, the defect of better motives."

The "new science of government" that our Founders believed made democratic republics viable was a science of process. In a government of laws and not of men, in a free government of, for and by a huge and heterogeneous people, the highest morality is, as the great constitutional scholar, Alexander Bickel, said, "the morality of process." Men, who cannot and do not agree on such substantive issues as abortion, school prayer, the nuclear freeze or even various appropriations, can and must still agree on the process by which such decisions are to be made. In a continental country with such a wide variety of religious, ethnic, occupational, racial and social interests, the general will, what all can will, is our constitutional forms and procedures. In any contest or dispute among free and civilized men, the rule of law, the rules that govern the contest are the sine qua non. It is the faith of the democratic-republican that if we follow the constitutional process the public good will emerge.

To violate the process, to defeat or finesse the rules, to disregard the ordained form is to destroy the "great Barrier which defends the rights of the people." That form and process are fundamental can be seen in the great battle cry of our revolution: Taxation without representation is tyranny! Not taxation is tyranny, but taxation that emerges from a defective procedure is tyranny. According to our Founders, the qualified Presidential veto is part of the correct process. Any legislative practices that finesse the veto, that avoid subjection to the full force of the veto, violate the morality of process. If the form is wrong, if the procedure is defective, the law is tyrannical. Legislative practices, particularly in appropriations bills, do debilitate the veto. Restoration is imperative.

THE PASSING THE BUCK OBJECTION

The objection is that the proposal would decrease responsibility in Congress because Congress could abandon restraint altogether and evade difficult decisions by passing almost everything and leaving it to the President to make the hard choices.

The response is as follows: The proposal will increase the responsibility of Congress because it will mitigate that pernicious form of reciprocity—I'll vote for your pork, for your special interest, if you'll vote for mine—because the payoff for such log-rolling will be much more doubtful. Without the coercive effect of the omnibus bill, the President can scuttle the deal, nullify the bargain. He might well find that one of the items in the trade off is more rational than the other; he might even find that one is in the national interest and the other a mere venality. The incentive for sordid bargaining decreases if the President can undo such bargains in whole or in part.

The Founders asked the common sense question: are men more likely to be responsible when they believe someone can say no to them, or when for all practical purposes they believe no one can? It is clear their answer was the former. Part of the purpose of the veto power is to provide the benefits of anticipation, benefits that have been largely lost because of the omnibus bill. Though anticipation of a veto may and probably will tempt some to abandon restraint altogether, the Founders believed that it would increase the restraint of most. Here institutional pride and jealousy of departmental power and reputation also play a role. When the President vetoes, he must give his reasons so that Congress may reconsider and possibly override his veto. Those reasons are part of the public record. A Congress that flagrantly abdicted its responsibility would be subject to public censure and shame. A Congress that made a practice of hiding behind the President would not escape the notice of the media and the wrath of the people.

The passing the buck objection is based in part on a confusion of ends and means and in part on a policy that is contrary to the policy of the Founders. First, it is highly desirable that our elected representatives be responsible, but that responsibility is merely part of the means and not the end of government. Service in government is far more than a school in character development for elected representatives. That the office can contribute to the making of the man, that the awesome duty of office may and sometimes does improve a man's character cannot be denied, but the opposite is also possible. Some degree of virtue in our representatives is necessary, and that virtue, that responsibility is promoted in a number of ways, most notably by free and frequent elections and a free press to publicize failures of responsibility. The assumption is that the people will choose responsible men in the first place, and remove those who do not measure up. Let us be careful not to confuse ends and means, and let us remember that the final purpose of government is not to develop the virtue of the leaders, but to secure the safety of the people.

Second, although the policy of seeking and depending upon virtue in governing officials is part of a long and honorable tradition, and the Founders did not totally abandon it, yet it was not their central policy. To place sole reliance on responsibility, to place sole reliance on virtue itself, was, to the Founders, the height of imprudence. Their policy was the policy of "opposite and rival interests." Their policy was the separation of powers and the checks and balances. The whole weight of history was on their side. Reliance on virtue had been tried, and it failed to provide safety.

Finally, the pass the buck argument is an argument that in principle applies not just to the item veto proposal but to the veto itself and thus is in opposition to the Founder's policy. Surely the legislature would find it harder to evade responsibility if the Constitution permitted no veto at all. The very existence of the veto power already allows some passing of the buck. Responsibility is a fine quality, and we are right to expect it of all our elected officials, but safety comes first. The people must be protected from bad laws and errors. That protection lies in the checks and balances, that protection lies in a frequently and forcefully used veto power that can be overridden by a two-thirds vote of each House of Congress. The Founders were not about to issue blank checks to any man. It is just too dangerous. Increased responsibility or increased safety? The Founders' answer is safety, for they understood that basic axiom of political science: ruling—law-giving—is for the safety of the ruled, not for the interest, advantage or even the virtue of the rulers.

THE IRRESPONSIBLE PRESIDENT OBJECTION

The objection is that the proposal could permit a President to use the item veto to punish political opponents and uncooperative members of his own party, and to further his personal or ideological interests.

The response is as follows: The proposal contains sufficient safeguards against the abuse of power. First, the sunset provision in this proposal obviates this objection. Such behavior on the part of the President would guarantee the end of the line item veto, and the President would be fully aware of this fact. Second, the two-thirds override of a veto provision in the Constitution was created to forestall and counter just such a danger. The Founders believed that this provision alone sufficed. Such actions on the part of the President would be perceived by members of both parties as attacks on the independence of Congress, and men of both parties would stand together to resist the President. They have already done so in the past. Institutional loyalty and jealousy of power and prerogative are fundamental norms of the Congress. Third, such an abuse of power by the President could not escape the notice of the media and the wrath of the people. The President would be held to public censure and shame. History demonstrates that the people will not support presidential attacks on the separation of powers whether those attacks take the form of purging or packing. When the people are aroused, Congress is not reluctant to censure or even to bring impeachment proceedings against the President.

THE INSIGNIFICANT SAVINGS OBJECTION

The objection is that the proposal would not achieve meaningful reductions in the Federal deficit because it cannot be applied to such expenditures as entitlement programs or interest on the national debt.

The response is as follows: The objection is a strawman since no one claims that it is a panacea. It is a beginning, a good faith effort to respond to a serious problem and the will of the people. It should and must be followed by other proposals for strengthening the budget process and reducing the deficit. "Every great journey begins with a single step."

The objection is itself a symptom of the disease. Perhaps to some who are used to thinking of budget items in the billions, budgets in the hundreds of billions and deficits in the trillions, several billion dollars in annual savings is a mere drop in the bucket, but to the man on the street even a billion dollars is a very great deal. If a few billion dollars in savings makes no difference, then a few extra billion in expenditures makes no difference either. It is thus that trillion dollar deficits are built.

THE IMPERIAL CLERK OBJECTION

The objection is that the proposal would create an imperial enrolling clerk with the discretion to determine what constitutes a bill and thereby undo or distort the will of the Congress.

The response is as follows: The Congress and each chamber thereof will still control the format. The clerks are employees of the chambers, hired and fired by the chambers, subject to the will and commands of the chambers. The task assigned to the clerks is purely ministerial.

A more cogent objection to this proposal is precisely that Congress would still control the format and could subvert the intention and make the item veto meaningless by drafting an omnibus bill in "one section or one unnumbered paragraph." Senator Baker made this very point in 1984.

THE PARTISAN OBJECTION

The objection is that the bill creates a partisan advantage.

The response is as follows: The issue is not a partisan one because for every pet project of the Democratic party open to a line item veto by a Republican President, there is a pet project of the Republican party open to

a line item veto by a Democratic President. Although the proposal has a two year sunset provision, the proposal is made with the clear intention of renewing and institutionalizing it if it passes the test of experience.

One important variation of this objection is that a Democratic or liberal President could veto items in defense appropriations passed by Congress. The special status of this argument arises from the national government's exclusive responsibility for defense. Most other domestic items vetoed by a President could be funded by the individual states, but no state could fund a national defense project.

The response to this is as follows: Neither party has a monopoly of concern for the survival of the country. Neither department of government, neither the Congress nor the President, has a claim to unchallengeable judgment about what is needed for defense. If one party is derelict in its duty to the national defense, the proper solution lies in the ballot box, not encroachment on the checks and balances. If one department is derelict in its duty to the national defense, the proper solution lies in the checks and balances, the vigorous revitalized veto and the possible override by Congress.

Conservatives and the Item Veto: A Reply to Congressman Mickey Edwards

In his article, "A Conservative's Case Against The Item Veto," Washington Post, February 8, 1984, Congressman Mickey Edwards makes his case against the line item veto for the President, saying that it is a conservative's case, and chastising his fellow conservatives for supporting a proposal that he believes is incompatible with their philosophical principles. While he invokes old American political principles, he misapplies and misunderstands those principles, and therefore, I believe his case ultimately fails.

When it comes to constitutional issues such as the separation of powers and the checks and balances, let us fervently hope that we are all conservatives as we are all liberals. Our Constitution was established on the classically liberal principles that just government rests on the consent of the governed and protects the natural rights of men. The Constitution is undeniably a classically liberal document. A conservative, as I understand the term, is one who desires to preserve the established order, in this American context, the constitutional order designed and ordained by the Founders. The perpetuation of our political institutions, therefore, requires that all true American liberals must also be conservatives, and all American conservatives must also be true liberals. The principles that American conservatives desire to preserve are liberal principles.

Mr. Edwards argues from the fundamental American principle of the diffusion of power. He attacks both concentration of power and change. He argues that "the harder it is to write and rewrite laws, the greater the protection for the people." These ideas and principles are clearly conservative, are clearly reflective of the Founder's views, and yet they are perversely applied against the item veto. The item veto would make it "harder" to write and pass laws, and in all likelihood make it necessary to rewrite them more often. The item veto would reduce the concentration of power in the legislature by revitalizing the veto power. If Mr. Edwards believes, as he says, "Difficulty in bringing about change is again a cardinal virtue," then it would follow that he would support a proposal on the item veto because it is more difficult to muster a two-thirds majority in each chamber than an ordinary one. The argument does not make sense unless the term change refers only to an alteration and reduction in the power of Congress to avoid and finesse the veto. The change he fears is not change in the laws per se but rather change in the current law-making process, a process in which Congress now presents the President with all or nothing choices, a process which has warped and weakened the veto depriving it of the vigor the Founders desired. That this is indeed the case is indicated by his explication of the central philosophy of conservatism.

Mr. Edwards argues that opposition to the concentration of power "is the single philosophical element" which unites all conservatives of the American tradition. He is right, but he tends to find the danger of concentration only in the Presidency. In this he differs markedly from the Founders and from Madison in particular. For our Founders, a concentration of power in the hands "of one, a few, or many," was to be feared and resisted. (Federalist 47). Mr. Edwards believes that because congressional power is in the hands of many rather than one, it is less dangerous. The Founders would not agree. The many, when they unite, when they act in concert, when they engage in such practices as logrolling, can be as dangerous and tyrannical as one man. Mr. Edwards may believe that in principle the legislature is the least dangerous branch of government, but that view was definitely not the view of the Founders. The Founders feared legislative dominance, and because they did, they divided the legislature into two chambers. They did not divide the executive. Indeed, they exerted themselves to create a strong, vigorous and independent executive.

This is not to say that they saw no danger in executive power, for they did and they took steps to avert the danger. Rather, it is to say, as did Madison in Federalist 51, that, "In republican government, the legislative authority necessarily predominates." He concludes that the first remedy for this dangerous imbalance is bicameralism and different modes of election to each chamber. But, even this, he says, is not enough, for the "weakness of the executive" requires further fortification, the fortification is the veto power. According to our Founders, it is not the veto power that is to be feared, but its absence and its debilitation.

As I have argued elsewhere, the Founders intended that the veto be frequently and forcefully used, not only to prevent bad laws and errors, but to institutionalize the benefits of reconsideration and to produce that anticipation which brings self-control. If the Founders were with us today and saw the extent to which Congress has encroached on the veto power with its omnibus bills filled with riders, non-germane items and pork barrel, they would support proposals to rehabilitate the veto power.

Mr. Edwards case is conservative, if to be a conservative means the desire to preserve any existing power relationship or any current practice however debased or decayed. In such a case even successful radicals must be called conservative since they too wish to preserve the changes they have brought about. It seems to me that the true conservative, in fact the true statesman, is the man who works to preserve, to renew, to recover and to restore the balance established in our original constitutional solar system.

The Item Veto Is Needed

(By Judith A. Best)

Why does the president need an item veto? Most arguments for the item veto for the president focus on the federal deficit and the failure of Congress, which has the constitutional power of the purse, to control federal spending. The item veto would allow the president to pick and choose among the elements of a bill. He could accept some and reject others, and Congress could override his veto with a two-thirds vote. In choosing the item veto as a solution to Congress' lack of self-control, its proponents seek to revitalize an internal control on the government that was established by the Founders.

"In framing a government," said James Madison, "the great difficulty lies in this: you must first enable the government to control the governed, and in the next place oblige it to control itself." To accomplish this second great task, as every school child should know, the Founders established the separation of powers and with it checks and balances.

The only way to prevent the abuse of power, said the Founders, was to check one power with another. Congress was given the legislative power, but to prevent bad laws and errors, the president was given the veto power. The veto power actually is part of the legislative power, because it requires more than a simple majority of each house of Congress to override a veto.

The veto power, the power of returning all bills with objections, is an internal control on government. Because a veto can be overridden its purpose is to make possible an institutional means of reconsideration and to require greater evidence of good, mature judgment before a bill, challenged by the president, can become a law. Also, because the veto is not absolute, because it can be overridden, the legislature can check a potential abuse of power by the president.

The policy behind all of our governmental institutions is the Madisonian "policy of supplying, by opposite and rival interests, the defect of better motives." Under this policy, power must be divided and the power of one office used to check the power of another. One ambition will check another; one interest will restrain another. The veto power was designed to provide Congress with a rival. The president was to be a vigorous, competent rival who could force Congress to take a sober second look at questionable proposals, and who could force Congress to control itself by anticipating a veto.

Statements by the Founders indicate that they intended the veto to be used frequently, on ordinary occasions, because reflection and reassessment in the light of objections from those in different situations and with different interests was necessary to avoid errors and to produce good laws. When men exercise their calm and sober judgment, without giving in to their passions or interests, they are capable of ruling themselves.

The Founders' intentions for the veto were clear: it was to be a working control on Congress. What is equally clear is that since the founding, Congress has developed practices such as log-rolling and attaching special-interest riders and non-germane amendments to bills, especially to vital bills. These practices have weakened the veto by allowing Congress to make the president an offer he can't refuse. He must either accept proposals he deems unwise and unjustifiable or lose things he deems vital.

This practice is particularly true of appropriations bills where the president is given an all or nothing choice: accept pork-barrel proposals or shut down the entire government. Such proposals subvert the rational process of reconsideration and convert the veto power into a very dangerous game of "chicken." An item veto is needed to revive this indispensable internal control.

The major objection to giving the president an item veto is that it would be a step further toward an imperial presidency. This is not the case. A truly imperial president would have an absolute veto, and the proposed item veto, like the existing veto, can be overridden by a two thirds vote.

Opponents argue that the president already has sufficient power to check congressional excesses. But the fact is that the 1974 Budget Control Act took away from the president the impoundment powers which had been used for more than fifty years to control spending. In addition, congressional rules on germaneness, which prevented Congress from attaching special-interest riders to vital bills dealing with another subject, are now largely ignored.

To give the president an item veto would merely restore the vigor of an original internal control that has been weakened by legislative practices the Founders did not anticipate. They insisted that the government should be obliged to control itself. Since Congress is demonstrably unable to do so in the budgeting process, something must be done to compel it to control itself. An item veto would revitalize a control instituted by the Founders; it would not create an imperial presidency but rather prevents bad laws. And let us remember that "bad laws are the worst form of tyranny."

CONGRESSIONAL RESEARCH SERVICE,
THE LIBRARY OF CONGRESS,
Washington, DC, March 13, 1985.

From: American Law Division
Subject: Constitutional Questions Raised by S. 43 in Establishing Item Veto

This is response to your request for a brief consideration of S. 43, 99th Congress, proposing to create the item veto by statute, by reference to the constitutional discussion in our report entitled "Constitutionality of Empowering Item Veto by Legislation," dated January 4, 1984.

The bill would achieve the item veto through direction to the officer of the originating legislative body to take any appropriations bill passed in the same form by both Houses and to divide it into separate bills conforming to the numbered sections or unnumbered paragraphs of the original bill. These bills are then sent to the President who may sign or veto each separate bill as he wishes. Congress could override any veto as it currently does.

Without elaborating in any detail the discussion in the previous report, we can summarize the constitutional considerations as follows: Under the Constitution, the President must sign or veto bills coming to him from Congress, irrespective of the fact that any particular bill may contain provisions he favors and other provisions he does not favor. The President's veto power is an intrusion into the lawmaking function of Congress which the Constitution specifically provides for. Expansion of the President's power in this respect implicates the separation of powers doctrine, which is one of the bedrock principles of our constitutional governance. Whether that expansion would be unconstitutional is, of course, another question, requiring evaluation whether it would violate an express provision of the Constitution or, if not, whether it would be invalidated because of its disruption or potential disruption of the assigned functions of one or another branch.

"Explicit and unambiguous provisions of the Constitution prescribe and define the respective functions of the Congress and of the Executive in the legislative process. . . . These provisions of Art. I are integral parts of the constitutional design for the separation of powers." *INS* v. *Chadha*, 103 S. Ct. 2764, 2781 (1983). The relevant sections of the Constitution require passage by both Houses of Congress of a bill in the same form, presentation to the President, and his signature or the enactment of the bill over his veto by the required majorities. Departure from these processes leading to a greater intermixture of functions as between the legislative and executive branches seems to raise a presumption that constitutional boundaries have been crossed. "It emerges clearly that the prescription for legislative action in Art. I, §§ 1, 7, represents the Framers' decision that the legislative power of the Federal Government be exercised in accord with a single, finely wrought and exhaustively considered, procedure." Id., 2784.

Evident it would appear to be that simply to authorize the President to pick and choose among provisions of the same bill would be to contravene this procedure. In S. 43, however, a different tack is chosen. Separate bills drawn out of a single original bill are forwarded to the President. In this fashion, he may pick and choose. The formal provisions of the presentation clause would seem to be observed by this device. The question that would appear to be raised is whether the provisions setting forth Congress' role in lawmaking have been complied with. Both Houses have passed a single bill and this bill comprises the no-doubt numerous compromises within each House and between the two Houses; the resulting bill may be balanced and contain provisions accepted by some in return for acceptance of provisions they wish. This bill is then separated into what may be artificial parts and transformed into separate bills as a ministerial act by an employee of one House. These bills are then sent to the President without ever being passed again by the two Houses. Does this process comport with Article I?

Of course, it is true that the Constitution does not mandate compromise in bills passed by Congress, it only makes compromise possible. And even under S. 43, Congress retains its ability to ensure that any compromises are kept inviolate from the President's veto. The officer dividing up the bill must make separate bills out of numbered sections and unnumbered paragraphs. Nothing would prevent Congress from protecting a compromise by placing two or more disparate provisions into the same section or paragraph.

But the more interesting question is whether Congress may comply with Article I through passage of a single bill and then direct its separation into a series of bills which Congress then does not again take up. Each House has the power under Article I, § 5, cl. 2, to "determine the Rules of its Proceedings," and in S. 43 this power is exercised in § 2(b) by deeming each enrolled bill to comply with clauses 2 and 3 of § 7. The bicameralism requisite, however, arises from § 1 of Article I, vesting legislative power in the two Houses. *INS* v. *Chadha*, *supra*, 2783. Therefore, the issue is a not insubstantial one, inasmuch as upon its resolution turns the answer to the question whether the President's power under the presentation clause is legally enhanced or whether the enlargement is simply a *de facto* one.

Because there is no judicial precedent and no known legislative precedent in the congressional context to apply to the fact situation, it is not possible to attempt any definitive resolution of this question. However, the resolution may lie in the observation that compliance with the bill if enacted and its effectuation is wholly within Congress' discretion. Congress in passing the original bill may combine into single sections any of a number of disparate parts and in fact it could enact a lengthy and complex measure in one numbered section or one unnumbered paragraph comprising the entire bill. Because Congress retains full control over the process, it would perhaps be excessive formalism to require that each separated bill be again passed by both Houses. While true, perhaps, to the letter of Article I, such a requirement would in fact be unnecessary to achieve what Article I necessitates in the process of lawmaking.

Not only must we be concerned, when considering separation of powers issues, with specific constitutional provisions which a governmental action may violate, but there are as well structural and "inherent" guaranties of separation. Thus, in *Myers* v. *United States*, 272 U.S. 52 (1926), the Court held unconstitutional a legislative limitation upon the President's power to remove officers of the executive branch, not because any specific provision of the Constitution conferred on the President or denied to Congress the power of removal under the circumstances, but because the Court discerned in the nature of executive power the necessity of having removal authority. The Court has since distilled the doctrinal essence to be applied in the absence of a specific constitutional provision to be, first, whether the action of the moving branch threatens to prevent another "from accomplishing its constitutionally assigned functions," and, second, where there is a "potential for disruption" it must be determined "whether that impact is justified by the overriding need to promote objectives within the constitutional power" of the moving branch. *Nixon* v. *Administrator of General Services*, 433 U.S. 425, 442-443 (1977); *Nixon* v. *Fitzgerald*, 457 U.S. 731, 753-754 (1982).

Here, it would appear to be evident that a successful conferral upon the President of the item veto would constitute an enlargement of presidential power and a diminution of congressional power, simply as a matter of fact. Whether this shift of power would constitute, in constitutional terms, a potential for prevention of the exercise by Congress of its constitutionally assigned functions would present a nice question. However, if the matter is analyzed in terms of the most probable operation of an enacted S. 43, rather than in terms of its formal provisions, it would appear to be unnecessary to reach that question. Again, the key would seem to lie in the observation that compliance with an enacted bill and its effectuation is wholly within Congress' discretion. As noted above, Congress could combine into one numbered section of a bill two or more disparate provisions. It can avoid the intended operation of S. 43 by ensuring that the President may not pick and choose among the items with which it is most concerned.

Of course, Congress may also put in differently numbered sections various items

which it wishes to be enacted together and the President may choose to frustrate congressional wishes. In that event, the intent of S. 43 would be effectuated and the power shift would occur. But Congress could accomplish that very same shift by in fact passing separate bills containing the various provisions which it otherwise would put into the same bill. The power shift would occur, but would anyone suggest that Congress could not cause that power shift in this way? If the one would be valid, would not rejection of the other be adherence to pure formalism?

The key would seem to be that congressional discretion, congressional power, to bring about a particular result or to avoid a particular result is preserved.

To conclude, two questions are raised about S. 43 in terms of the Constitution. First, would the bill in operation violate the lawmaking procedure set out in Article I because the separated bills would not be passed again by both Houses? Bills that in fact were not passed through ordinary lawmaking would be sent to the President. While it is literally true that S. 43 would achieve this result, it is arguable that Congress' power to prescribe its own rules and its control over the features of the one original bill would militate against a finding that literal noncompliance effectuated a constitutional violation. Second, would enactment of S. 43 result in an unconstitutional shift of power between Congress and the President? While this shift might occur, the degree to which it would and the power to reverse the shift would continue to remain with Congress. In that fact would probably lie the basis to reject the argument as too formalistic.

JOHNNY H. KILLIAN.

[From Reader's Digest, August 1985]

AVAILABLE: A PROVEN WAY TO REDUCE THE DEFICIT

(By Donald Lambro)

When the Massachusetts legislature sent Gov. Michael Dukakis a dangerously unbalanced 1985 budget, he deleted $58 million in dubious expenditures—from recreational boat ramps to grants for the state's wealthiest communities. Then, having balanced the budget, Dukakis signed it into law.

Similarly, Illinois Gov. James R. Thompson eliminated $136 million of less-than-vital items from his state's 1983 budget, and California Gov. George Deukmejian blue-penciled a whopping $1.3 billion from his 1984 and 1985 budgets. In so doing, they helped keep their treasuries out of the red.

These governors—and 40 others throughout the country—wield an immensely powerful weapon, the line-item veto, which allows them to delete or reduce individual budget items from appropriations bills sent them by their legislatures. The veto may be overridden by a legislative vote, but surprisingly, this seldom occurs. Over the past decade the line-item veto has saved state taxpayers billions of dollars.

Yet, at a time of $200-billion federal deficits, it is a tool denied the President of the United States by the Constitution. If Congress sends him a spending package loaded with unnecessary appropriations and pork-barrel projects, he has only two options: either veto the entire bill, or spend the additional money and drive taxpayers deeper into debt.

This "like it or lump it" choice faced President Reagan last October when Congress dropped a $458-billion appropriations bill on his desk, the largest appropriations package in American history. Designed to keep hundreds of federal agencies—from the Defense Department to health and welfare programs—running through the current fiscal year, the bill also included hundreds of wasteful expenditures that cried out for a Presidential veto: among them, $400,000 to study the 1932-33 famine in the Ukraine and $2 million to "reconstruct in its original form" a lighthouse at Nantucket, Mass. The President had little choice but to sign. A full veto might have shut down vital programs for weeks until Congress hammered out a new bill.

The line-item veto has been sought by Presidents since the days of Ulysses S. Grant. Franklin Roosevelt, Harry Truman and Dwight Eisenhower all asked for it, to no avail. Yet it may be an idea whose time has come. The deficit for 1985 is expected to hit $213 billion, and the national debt is costing taxpayers $130 billion this year *in interest alone.*

All of this has fueled a bipartisan movement to find new ways to pound the deficit into submission. At the National Governors' Association meeting in February, Democratic and Republican governors gave solid approval to a resolution urging Congress to grant the President the line-item veto. It's not a panacea for "erasing the deficit," cautions Dukakis, a liberal Democrat, but a vital weapon "to ensure fiscal stability."

No one agrees more than Sen. Mack Mattingly (R., Ga.). "The full veto worked fine in a bygone era when budget bills were relatively small and dealt with only a few programs," he says. "But nowadays the President needs a modern precision tool to trim the fat."

Mattingly has introduced legislation to give the President the line-item authority possessed by most governors. Mattingly's proposal specifies that each spending item within an appropriations package would be a separate bill, thus skirting the constitutional obstacle that prohibits a President from vetoing sections of a single bill. The law would also retain Congress' authority to override each item veto with a two-thirds vote. Finally, to assuage Congressional fears that the line-item veto could be abused, the law would expire in two years unless extended by Congress.

Mattingly's bill, which has 47 cosponsors, including six Democrats, appears headed for Senate passage. But prospects in the House, where the Democratic leadership opposes the bill, remain uncertain.

This year Congress will send the White House a federal budget approaching $1 trillion in a grand total of 13 appropriations bills. Unless the Mattingly bill is enacted, the President will have to sign bills containing unnecessary and wasteful items, or use the veto and bring worthwhile programs to a halt.

Here are a few of the programs that cry out for a line-item veto. These alone would save an estimated total of nearly $30 billion in just three years:

1. Buried in the $36-billion Agriculture and Rural Development appropriations bill are school-lunch subsidies for non-needy children. Deleting this item would not touch free and reduced-price lunches for poor and low-income students. Savings: $2 billion.

2. The Rural Electrification Administration is an outdated Depression-era program that dishes up heavily subsidized loans—at interest rates as low as two percent—including some wealthy electric cooperatives and telephone utilities.[1] Phasing out REA's direct loans and loan guarantees would save $1.6 billion.

3. Nearly 40,000 localities (most of which, unlike the federal government, maintain healthy budget surpluses or balanced budgets) receive revenue-sharing largess from the U.S. Treasury. Uncle Sam also gives money away to such wealthy communities as Beverly Hills, Calif., which gets more than $200,000 a year, and Palm Beach, Fla., which received $73,478 in 1985. Revenue-sharing grants account for only 2.5 percent of all local expenditures, and their elimination would still leave states and localities with about $100 billion a year in federal grants-in-aid. Savings: $12.5 billion.

4. Although founded to help small businesses get started, the Small Business Administration grants most of its loans to established businesses or to entrepreneurs who could raise private capital. In fact, a minuscule 0.2 percent of America's 14.3 million small businesses are getting SBA credit. Elimination of this program would save $5.3 billion.

5. Buried in foreign-economic-aid bills, which include vital humanitarian aid to the world's hungry, are funds for the Export-Import Bank. The Ex-Im Bank is a prime example of corporate welfare. Many of its subsidized loans, which go to foreign customers to buy U.S. products, benefit a handful of corporate giants, including Boeing and General Electric. Economic-trade analysts say such loans have a "negligible" effect on the U.S. balance of trade. Abolishing Ex-Im's direct loans would save $3.9 billion.

6. Begun under Lyndon Johnson's Great Society, the Job Corps is the government's costliest training program. Each slot cost taxpayers $15,200 a year—more than the cost of tuition, room and board at Yale. Nearly two-thirds of all trainees do not finish the program, and of those who do, only a third are employed a year after leaving. Without a line-item veto, the President will most likely have to swallow this program as part of the huge labor, health and human services, and education bill. Shutting down the program would save $1.3 billion.

7. Health-professions training subsidies were established in 1963 to alleviate a serious nationwide shortage of doctors, nurses and other health specialists. Today, however, there is an oversupply of such personnel. In fact, a federal advisory panel predicts that in five years the United states will have an excess of surgeons, neurosurgeons, eye specialists and general practitioners. Terminating any further health-profession school subsidies would save $512 million.

8. The U.S. Army's $5-million DIVAD Air Defense Gun is so inaccurate that its primary mission has been changed from shooting down maneuvering airplanes, which it has had trouble doing, to knocking out hovering helicopters, which it hasn't been able to do very well either. Yet the Army wants to purchase a total of 614 DIVADs for more than $4 billion. Vetoing further funds for the DIVAD could save $2 billion.

Until Congress gives the President the same authority exercised by the vast majority of the nation's governors, he will continue to be boxed in by wasteful catchall appropriations bills. Says Sen. Joseph R. Biden, Jr. (D., Del.), "The line-item veto is intended to let the President out of that

---

[1] See "Power Play on the Potomac," Reader's Digest, September '84.

box so he can begin to play a more active role in cutting away at the deficit."

A majority of governors want the President to have line-item-veto power, and an October 1983 Gallup poll shows that 67 percent of the public does too. If you agree, then write your Senators and Representative and tell them to vote for this proven, waste-cutting tool.

GEORGE V. GRUNE,
Pleasantville, NY, July 15, 1985.

Hon. DANIEL EVANS,
Senate Office Building,
Washington, DC.

DEAR SENATOR EVANS: Cutting the deficit is still a matter of highest priority and will continue to be for some time to come. Certainly, it has been a concern of ours at Reader's Digest; "A Proven Way to Slash the Deficit," appearing in the August issue, is the fourth article touching on the subject this year.

Along the same lines, I addressed the National Press Club last month, at which time I referred to a major campaign co-sponsored by The Business Roundtable and The Digest. It was a four-page advertisement addressing the budget crisis and inviting readers to write their members of Congress via a business reply postcard. So far, more than a million cards have been received and forwarded to you. In fact, the enclosed article carries another appeal for readers to write Congress.

Because the subject is so vital, I am enclosing a copy of my remarks and a release detailing the results of a Gallup poll on the subject of the deficit. I hope you will find time to read them and that you will find them thought-provoking.

With every good wish,

GEORGE GRUNE.

[From Reader's Digest]

GALLUP POLL RESULTS

WASHINGTON, June 27.—A Gallup Poll sponsored by Reader's Digest taken last weekend has revealed that 54 percent of the American people consider reduction of the federal deficit to be "the most important domestic priority facing the United States in the next few years." This compares with just 45 percent who consider tax reform the "most important."

The figures were revealed by George V. Grune, Chairman of the Board and Chief Executive Officer of The Reader's Digest Association, which commissioned the poll. Mr. Grune spoke at a National Press Club Newsmaker's breakfast this morning (June 27). The Gallup Poll, Mr. Grune said, covered 1000 Americans nationwide and asked what they believed were the priority issues of the next few years. Deficit reduction was the leading issue, with a 54 percent response, which increased to 64 percent among college graduates.

Political views did not seem to matter in gauging the responses, Mr. Grune said. Fifty-four percent of Republicans felt that deficit reduction was "the most important priority", while 53 percent of Democrats and 56 percent of Independents responded in the same way.

"One can only wonder," Mr. Grune said, "in light of all this, whether some Congressmen welcomed tax reform as a kind of smoke screen to deflect attention from the much more important and difficult issue—the deficit."

"Certainly tax reform is important, but no single issue of our time has greater potential to influence the quality of our lives and the lives of future generations than the soaring, stubborn, staggering federal deficit," he added.

The Reader's Digest official described the results of an advertisement in the magazine's May issue, sponsored by the Business Roundtable, an organization comprised of 200 U.S. corporations, including The Digest. The four-page advertisement described the deficit crisis and included a reply card that readers were invited to return to The Digest, where they were tabulated by Congressional district. Every two or three days every Member of Congress received a computer print-out telling him or her how many people in his district had responded.

To date, Mr. Grune noted, "One million cards have poured into our offices. They have been tabulated and the numbers and names sent to the Congressmen."

The Reader's Digest chairman urged his listeners from the media to use their influence to persuade Congress to come to some resolution on deficit reduction. "Let's realize, as that Gallup Poll has shown us, that Americans care, deeply, about the deficit," he said. "Let's give it the prominence in print and the television news programs that it deserves. Let us all unite in a campaign to lick this monster. There has never been a better opportunity. The people care. Now the media must begin to force Congress to care. So let's turn up the heat."

WILL 535 CONGRESSMEN CARE WHAT 1 MILLION AMERICANS THINK?

(An address by George V. Grune, Chairman and Chief Executive Officer, the Reader's Digest Association, Inc.)

Good Morning. Although I have been introduced to you, I want to repeat one or two of the items that tell you who I am. Not because of ego, but because it will help to explain why I am here. But first let me offer a disclaimer concerning who I am not. I am not an economist. So this is not going to be a learned talk about the "dismal science." I am the chairman and chief executive officer of the Reader's Digest Association, a large multi-national corporation doing about $1.4 billion in business annually. In other words, I am a businessman. I am also a husband. I am a father. I am a consumer. I am a taxpayer. And in every one of these roles, I am being deeply affected by what I believe is the most pressing national and international issue of our time. The federal budget deficit.

During the past two weeks the attention of the world has been rivited on the plight of forty hostages held prisoner by a group of hijackers. Newspapers have gone to their largest type-fonts for headlines. Television has devoted major coverage. The President of the United States has been quoted extensively. Experts in terrorism have been interviewed at length. Governments friendly to the United States have offered their help in trying to resolve the crisis.

All of this is entirely appropriate. Lives are at stake. And our frustration grows because as individuals, we cannot do anything but watch. But here on the domestic front, there is a crisis of enormous proportions that we can do something about. That crisis is the federal budget deficit. I wish most fervently that somehow we could find ways to dramatize the significance of the federal budget deficit in our lives.

For if it is not resolved—and quickly—the deficit crisis will affect hundreds of millions of lives in virtually every nation on earth. If it is not resolved—and quickly—it will affect the lives of our children—and their children—and their children's children.

Where are the headlines screaming about the deficit crisis? Where are the Presidential press conferences devoted to the deficit crisis? Where are the television specials discussing the deficit crisis? Where are the experts offering their views of ways to resolve the crisis? Where are the offers of help from friendly countries? Where indeed are the expressions of concern that say we must halt the deficit?

If they are here in Washington, we haven't heard them. If they are on the front page of the New York Times, we haven't read them. If they are in television specials, we haven't seen them.

Yet we know the concern is out there. How do we know? We know because more than one million Americans have engaged in that great American custom of writing their Congressman. More than one million Americans have said to those Congressmen, "Halt the Deficit!" Now the question becomes, "Will 535 Congressmen listen to one million Americans?" So far, they have not. And because they have not, I would like to change the title of this talk. I think a more appropriate title might be, "How You Can Help Halt the Deficit." And when I have finished, I think you'll understand why.

Let me take you back a few years. I quote from an editorial in a major New York newspaper. (Quote) How long can the federal government continue to spend far more than it collects in taxes or other receipts from the citizens? For six consecutive years, the amount of money spent by the federal government will have been considerably in excess of the flow of tax funds to the U.S. Treasury during the same period. (Unquote) That was David Lawrence writing in the New York Herald Tribune in January 1965. (The editorial was reprinted in the April 1965 issue of Reader's Digest.) The six consecutive deficit years mentioned would have taken us back to 1959. So we can point to 1959 as the first "Year of the Deficit."

In 1965, just twenty years ago, Lyndon Johnson was proposing a budget in which expenditures were expected to be $127.4 billion. Today the deficit is expected to exceed $220 billion, almost twice the amount of the entire federal budget twenty years ago!

Digest articles through the years have warned about the effects of the growing deficit. And interestingly, some of them made the point that Congress would not act unless the people demanded action. In 1967 we quoted House Appropriations Chairman George Mahon of Texas, who said "Congress is not going to practice restraint unless the message comes through loud and clear from the people. I'm waiting to hear from constituents who really want to lower outlays as I do."

In 1979, when President Jimmy Carter proferred a budget with a $29 billion deficit, we noted that an Associated Press poll found that "70 percent of Americans believe that politicians will not work to wipe out the deficit."

More recently, we have carried two articles describing the exciting potential of Peter Grace and his commission, and pointing to the fact that fiscal sanity can be restored to the federal budget. One of those articles quoted Mr. Grace as saying in the New York Times, "Congress is the biggest single obstacle to restoring fiscal sanity to the federal budget. We never said cutting spending was going to be easy," he added. "But the time has come for Congress to stop clowning around and get serious."

I tell you all this because I want to emphasize that we at Reader's Digest are not strangers to the problems of the deficit. Nor are the fifty million men and women who read our magazine every month, and who represent one household in every four in America.

Against this background, we became aware earlier in the year that the Business Roundtable, of which we are one of two hundred American member companies, was preparing a major campaign to call attention to the deficit and its consequences. Reader's Digest had worked with them before on a series of public service advocacy ads, and we knew of their strength to move people. In 1975, The Roundtable and The Digest collaborated on a series of a dozen adds, one a month, on various aspects of the American economic system. These explored such basic economic topics as the role of profits in our society, the impact of inflation, the question of size in business, product quality, taxes and government spending, unemployment and the plight of American business abroad. The subjects were basic; the language was clear and simple. The results were gratifying. The ads had an impact! People cared, deeply, about our economic system and wanted to keep it healthy. Even more dramatic illustration of that caring was the fact that we sold 6,620,000 reprints of those ads to individuals and organizations!

The Roundtable's current campaign has two basic objectives: (1) Something has to be done to end the deficit. (2) The campaign has to be taken to the people of the United States.

Our publisher, associate publisher and editor-in-chief worked on a proposal that would unite the Reader's Digest and the Roundtable in a joint campaign to enable Americans everywhere to express their views. The result: a four-page advertisement in our May issue. It described the crisis, invited readers to engage in that unique American custom of writing their Congressman, and included a business reply postcard that we promised to deliver to Representatives, Senators and, ultimately, to President Reagan. You each have a copy of that ad.

Our data processing people tabulated the responses in a way to enable us to deliver to every Member of Congress a print-out of the voters in his or her district who had responded! So far, something like one million cards have poured into our offices! They have been tabulated and the numbers and names sent to the Congressmen. Here are just a few examples:

In our own state of New York, Senator Alfonse D'Amato received 49,198 names of people who responded to the ad. Will he act to halt the deficit?

California Senator Alan Cranston received 98,998 cards. Will he act to halt the deficit?

Senator Paula Hawkins of Florida, whose constituents include many thousands of retired people on fixed incomes, received 58,909 cards. Will she act to halt the deficit?

Senator Mark Hatfield of Oregon, who is chairman of the Senate Appropriations Committee, received 15,667 names of constituents who replied. Will he act to halt the deficit?

In our Congressional District of New Castle, in Westchester County, our Congressman, Joseph DioGuardi, received one thousand, seven hundred forty four responses. Will he act to halt the deficit?

And in own Congressional district, the fourth district in Connecticut, My Congressman, Stuart McKinney, received one thousand, seven hundred sixy nine responses. Will he act to halt the deficit? (I plan to ask him that question!)

While we were publishing the Roundtable advertisement, that organization itself was active in a grass-roots program. A large briefing book was sent to every one of their member organizations. A covering letter from Robert Beck, their chairman, who is also the chairman of the Prudential Insurance Company of America, stressed the importance of the campaign. The book contained this chilling paragraph: "The federal deficit threatens our jobs, our standard of living and the futures of our children and grandchildren. It is America's number one problem. And if nothing is done to bring it under control, our nation is sure to suffer."

And the Roundtable is far from the only national organization that is concerned about the deficit. Richard Lesher, head of the United States Chamber of Commerce, said "We are enthusiastic supporters of deficit reduction through spending restraint. The Chamber of Commerce has taken the position that it is willing to let certain pet programs in the budget be sacrificed if the overall effect would help reduce the deficit."

Herbert Stein, who is a senior fellow at the American Enterprise Institute, has said, "By running large budget deficits, we are choosing to have higher consumption for ourselves today and to make future standards of living somewhat smaller than they would otherwise be. The present generation of Americans may want to do just this. This generation of Americans has probably not made the decision, in favor of themselves as against the future, that is implicit in the large deficits we are running. The choice has never been presented to them in that way, and they would not make such a decision if it were presented thus. So, a decent regard for the future requires that we take steps to reduce the looming budget deficits."

If the American people were presented with a choice, would they indeed choose to mortgage the future to pay lavishly for the present? Just last weekend, Reader's Digest went after the answer to that question. We asked the Gallup organization to poll 1,000 Americans across the nation to ask what they believed were the priority issues of the next few years! Fifty-four percent of those polled indicated that reducing the size of the federal budget deficit should be one of our most important priorities over the next few years! Interestingly, the importance of reducing the deficit was even more evident to college-educated people. They registered a sixty-four percent rating of deficit reduction as one of our most important priorities. And this is one issue on which partisanship does not matter. The "most important priority" response came from 54 percent of Republicans, 53 percent of Democrats and 56 percent of Independents. Despite all of the publicity surrounding the issue of tax reform, and despite Mr. Reagan's traveling around the country and urging Congress and the American people to fight for his program, reform, only 45 percent felt that tax reform should be one of the most important priorities. One can only wonder, in light of all this, whether some Congressmen welcomed tax reform as a kind of smoke screen to deflect attention from the much more important and difficult issue—the deficit.

Certainly tax reform is important, but no single issue of our time has greater potential to influence the quality of our lives and the lives of future generations than the soaring, stubborn, staggering federal deficit.

Last Sunday's New York Times had a four-column article with this lead: "This year's effort to reduce the Federal budget deficit will reach a critical crossroad next week. After two weeks of sparring, conferees from the House and the Senate are faced with trying to reach a compromise on the crucial issues of Social Security and the military budget, but no one can see a solution at this moment." That article, buried on page 22, proved to be correct. As you know, the House and Senate conference on the budget broke up just yesterday when the conferees reached a deadlock on Social Security. Meantime, the chairman of the House Budget Committee has accused the President of trying to "bust up" the budget process, and the White House is sending messages through Larry Speakes that "prospects for compromise are not good."

Adding to the pressure, Congress will be getting away for its July Fourth recess without resolving the most pressing domestic issue facing us. Few would deny our legislators their holidays, but I suggest that walking away from our nation's most urgent problem is a poor way to mark our nations' Independence Day.

And as much as one may admire Senator Bill Proxmire, I don't think it adds to the quality of this debate when he is quoted in the New York Times as saying that if he were a gambling man, he would bet that "the deficit in 1986 will be just about where it is in 1985."

At the moment, we do not share that pessimism. And we do not intend to let the matter drop. Indeed in our August issue, we have an article strongly urging that the President be given what Congress wants—and needs—right now."

And now I want to urge you to lead in this campaign. The media has enormous built-in strength to focus public attention on issues. Collectively, we represent tremendous power and tremendous influence. We must fight in our way for a future that will allow our children and their children to enjoy the same economic security that we have. Please join in. Please give the deficit the attention it deserves. Find ways to put it on the front pages—every day, until it is resolved. Let's realize, as the Gallup Poll has shown us, that American care, deeply, about the deficit. Let's give it the prominence in print and in the television news programs that it requires. Let us all unite in a campaign to lick this monster. There has never been a better opportunity. The people care. Now the media must begin to force Congress to care. So, let's turn up the heat. Let's focus the attention of Congress on solutions. Let's let them know that Americans expect decisions—not postponements. If we don't fulfill our responsibilities, the chances of resolving the issue will grow less, and less, and less. We cannot allow that to happen.

What will you do?

Thank you.

Mr. MITCHELL. Mr. President, the proposal before us is described as a constitutionally permissible grant of power to the President, necessary to let him selectively veto parts of spending bills to reduce the $200 billion deficits which his fiscal policies have helped produce.

There are three things wrong with this approach.

It is not constitutional.

It is not necessary.

It will not reduce the deficit.

The need for this new power is based upon the allegation that Congress has eroded the President's veto power by passing omnibus legislation containing many different provisions, thus forcing a President to make the unpleasant choice of vetoing provisions he supports if he wants to eliminate provisions he opposes.

It is claimed that the congressional practice of attaching riders to appropriations bills is a recent and intolerable burden on the veto power and must be redressed by passage of a line-item veto to let the President pick and choose which sections of an appropriation he would approve.

It is pointed out that 43 of our State Governors have the item veto power, that no State which has it has ever repealed it, and that the President of all the States should not be less powerful than the chief executives of 43 of the States.

And, of course, it is claimed that even if these institutional concerns did not warrant the grant of a line-item veto power, the deficit emergency we face does.

But these claims are not supported by the facts.

Since our Nation's beginning, Presidents have vetoed a total of 2,413 bills. Ninety-seven of these vetos have been overridden. That is fewer than 50 overrides a century. If that is not evidence of the potency of the Presidential veto power as it stands, then nothing is.

The veto power gives to a President who can command the support of just one-third-plus-one Members of either House of Congress unlimited power to veto every spending bill the whole Congress passed. A President need only persuade 34 Senators to uphold his decision and no bill can be enacted against his will.

That is a powerful bargaining tool with which to confront a recalcitrant Congress.

The bill's supporters claim that President's cannot veto omnibus appropriations bills. But the very first bill President Reagan vetoed was precisely such a bill, House Joint Resolution 357, the continuing appropriation for fiscal 1982.

And his veto was not overridden. Congress rewrote the bill and reduced the spending to which the President objected.

In 1982, the President twice vetoed an omnibus appropriation—again, exactly the kind of all-encompassing legislation that it is claimed he cannot veto. And those two vetoes were sustained by the House of Representatives.

In both cases, the veto proved a potent bargaining tool to eliminate spending programs the President disapproved.

In all, President Reagan has exercised his veto power 40 times in the past 4½ years. Congress has overridden 4 of the 40 Reagan vetoes, precisely 10 percent. That is the reality behind the claim that the veto power has been eroded.

The claim that the use of legislative riders and omnibus bills is a recent development is just as unsupportable on the evidence.

Congress has been attaching riders to legislative enactments since the time of the Civil War. That was one of the reasons why the proposed Confederate Constitution included a line-item veto. That was one of the reasons that encouraged many States to adopt the mechanism.

There is absolutely nothing novel about the passage of unrelated measures by any legislative body, whether this Congress or any one of its forebears.

It is inaccurate to make the claim that omnibus legislation of the kind we have today is somehow a novel, unprecedented legislative development which poses novel and unprecedented threats to the veto power.

For half a century, defense funding, to take just one example, has been enacted in an omnibus bill that includes new weapons and ongoing operational costs.

Presidents of both parties have had little difficulty in determining when a particular legislative rider makes a bill unacceptable. President Reagan's vetoes demonstrate this as do the vetos of virtually all his predecessors.

The claim that a power granted to 43 of our State Governors is a power the President ought to have makes little sense.

Governors do not have the responsibility of financing the national defense. States are not financially responsible for major domestic, national programs such as Social Security and veterans benefits.

The functions of State governments and of the national Government are so different that the superficial similarities pale by comparison.

And as a practical matter, the line-item veto has not proven an unmixed blessing for the States which have it. In some States—such as California—it has the effect of making the legislature delay appropriations until private deals can be struck with the Governor over spending.

Courts have had to order States to mail out welfare and retirement checks because of governmental paralysis resulting from the standoff caused by line-item vetos.

Line-item veto powers and the manner in which they are exercised have been and continue to be subject to court challenge. The courts have handed down conflicting rulings. One court has said it permits a Governor to reduce spending as well as to block it. Another court has disagreed.

President Reagan had the use of the line-item veto during his 8 years as Governor of California, a period in which the State's budget almost doubled and two State tax increases were enacted. His line-item veto supposedly reduced spending by 2 percent on average each year.

Studies have repeatedly shown that the States in which line-item veto authority exists have a higher per capita spending rate than the others. That simply confirms common sense: Chief Executives are just as reluctant to slash popular spending programs as legislators.

Those are the general arguments made for a line-item veto authority. I do not find them persuasive in the abstract. And when I consider the measure we are asked to approve, which entails specifics rather than abstractions, it is an even less attractive proposal.

We are not being asked to approve an abstract, generalized grant of power. We are faced with a concrete and quite specific proposal. It is a proposal I cannot endorse.

First and foremost, the legislation seeks to alter the Constitution by legislation rather than the proper route of constitutional amendment.

The Congress has been asked to walk down this road before on a variety of measures. Whenever we face the difficulties implicit in amending the Constitution, there are some who believe we can change the document without being bound by the requirements of a constitutional amendment: A two-thirds congressional vote and ratification by 38 States.

But we cannot. The argument that we should pass this measure anyway and let the courts decide whether or not it is constitutional hardly deserves a response.

We are, each of us, sworn to uphold the Constitution.

We cannot and should not enact legislation which is clearly and on its face unconstitutional as this measure is.

It is unconstitutional because it seeks to change, by legislation rather than by constitutional amendment, clear and definite provisions of the Constitution.

Article I, sec. 7 reads, in part:

> * * * Every bill which shall have passed the House of Representatives and the Senate, shall, before it becomes a law, be presented to the President of the United States; if he approves it he shall sign it, but if not he shall return it, with his objections to that House in which it shall have originated * * *

Nothing can be clearer. The Constitution does not say he shall return those parts he disapproves. It does not say he shall sign those parts he approves. The Constitution very clearly and explicitly says "* * * If he approves it he shall sign it, but if not he shall return it * * *." There is nothing ambiguous about that wording or its intent.

Yet this proposal seeks to bypass that very clear constitutional requirement by the subterfuge of allowing a Clerk of the House to take apart every appropriation bill and to reenroll its numbered provisions and its unnumbered paragraphs into separate bills for presentment to the President for his approval or veto.

The Constitution grants no such power to the Congress. It clearly says "Every bill which shall have passed the House of Representatives and the Senate * * *." Little bits of legislation enrolled separately are not what have "passed the House and Senate."

An argument has been made that Congress, by virtue of its right to write rules for itself, also has the right to define "bill" any way it chooses.

Such an assertion finds support neither in common sense nor in constitutional history. The very fear that the legislature might resort to some subterfuge such as calling bills something else led Madison to include in the same article the further provision that "Every order, resolution, or vote to which the concurrence of the Senate and House of Representatives may be necessary * * *" shall also be presented to the President for his approval.

Nowhere is there any authority, express or implied, for the Congress to unilaterally determine that a segment of a previously passed bill can be separately enrolled and remain a bill that has been passed by both Houses.

When we seek by legislation to change the Constitution, we should remember that the Supreme Court has consistently held, as recently as last year, that "The plenary authority of the Congress * * * is not open to question, but what is challenged here is whether Congress has chosen a constitutionally permissible means of implementing that power." [*I.N.S.* v. *Chadha*]

Congress does have plenary authority "in all cases in which it has substantive legislative jurisdiction * * * so long as the exercise of that authority does not offend some other constitutional restriction." [*Buckley* v. *Valeo*]

This proposal most definitely offends another constitutional restriction; it is therefore beyond our authority to enact.

What is obvious, of course, is that Congress has the authority, if it should wish to exercise it, of granting the President extensive leeway to approve or disapprove appropriations.

In fact, that has been done. In the Budget Act, the President has been effectively and legally given the very power it is now claimed he needs.

The rescission authority in the Budget Act, which has been in force since 1975, gives every President the right to selectively rescind congressionally-approved spending for programs as he chooses. A rescission is subject to congressional action. So is a veto.

If proponents of this line-item veto feel, as they apparently do, that the existing rescission authority limits the use of Presidential rescission, nothing prevents their bringing to the Senate floor a proposal to correct that by changing the Budget Act.

There is little in this President's experience with the rescission authority which could be read as a compelling argument for a line-item veto power. Since this proposal has a 2-year lifespan, President Reagan is the only one to whom its authors can intend it to apply.

In 1981, President Reagan proposed 208 rescissions, totaling $16 billion. Congress approved $14 billion worth, 90 percent. This mirrors the experience of this President with the veto, where only 10 percent of his vetoes have been overridden.

In subsequent years, the President has not used his rescission powers as much. In 1982, he wanted to rescind $9½ billion in appropriated funds; Congress gave him six.

In 1983 the President asked for $1½ billion in rescissions. In 1984, he asked for just $660 million.

The decision of the President not to request rescissions is his to make. Nothing is gained by second-guessing it. But it is evident that the power to rescind funds for specific programs exists, can be used, and that the formidable persuasive powers that any President has can be mobilized to gain congressional support for such action.

If those who feel the President is hamstrung by some claimed inability to veto omnibus spending bills want to alter the Budget Act to make it harder for Congress to refuse a rescission, that remains a constitutionally permissible and politically feasible approach.

But there is absolutely no need to do violence to the Constitution in order to expand the powers of this President or any other.

Presidents had, for 50 years, a virtually unlimited impoundment authority which they could and did use. That impoundment authority was curtailed only when one President attempted to use it for policy changes that he could not persuade Congress to accept.

And this proposed line-item veto authority contains within itself precisely the same potential for misuse.

Appropriations bills represent policy judgments reached by a majority of the Congress. They may not be policy judgments shared by the President. But the President has explicit veto authority to seek to reverse such judgments. He has at his command all the persuasive powers of the Presidency to make his policy stick.

The inference in this proposal is that policy judgments occur elsewhere in the legislative process and that appropriations are merely the funds with which to carry out already agreed-upon policy. That is simply not the case. In many instances, Congress imposes a condition on an appropriation precisely in order to impose a policy judgment. This line item veto would permit the President to accept the funds for purposes he supports and dispense with the conditions under which Congress has said they can be spent.

It would make a rubber stamp of the legislative body. And it would, of course, almost immediately result in the rewriting of appropriations bills to frustrate such a possibility.

In that connection, it is pertinent to note that although the proposal before us is termed a "line item" veto, it is not at all a line-item veto power. Even its chief sponsor acknowledged before the Rules Committee that it is a "section and paragraph" veto authority.

The reason for that is that Congress does not, for the most part, enact appropriations by line item.

Congress appropriates by accounts. The Defense appropriations bill, for example, does not contain a line that reads "40 MX missiles." It contains an account for strategic programs in which MX missile funds are included.

There are about 1,100 federal budget accounts in all. But the 50 largest accounts add up to more than 80 percent of total spending. It is hard to see, as committee witness Dr. Allen Schick pointed out, how the President could "pluck high spending items from appropriations bills."

More to the point, as the Rules Committee reported, the nondefense discretionary spending which is presumably the target of this line-item veto bill consists of 846 budget accounts of which just 12 make up half the total dollars spent. But the President's rescission requests for this year only included 3 of these 12 accounts.

When these factual realities are set against the broad abstractions with which this proposal is being defended, it is quite clear that the line-item veto is not necessary. It gives the President a less refined approach to specific spending items than the rescission authority he already has. It adds nothing to his power to establish policy beyond his already existing veto power.

So what is the urgency about this grant of power to the executive branch?

Proponents claim that our fiscal emergency has made it essential to enact this bill. But that is the least convincing argument of all.

As written, this line-item veto applies only to current year appropriations. Some of the largest budget accounts, such as those financing various income benefits, are not annually ap-

propriated. The line-item veto could not reach them.

Another enormous budget expenditure is interest on the debt. That also is not annually appropriated.

The total budgetary amount which is annually appropriated is just over 26 percent of the Federal budget. Of that amount, 15 percent is defense spending and 11 percent is nondefense. The principal reason for the relatively small size of annually controllable appropriations is that prior-year authorizations, which make up a substantial portion of the defense budget, for instance, cannot be reached by the line-item veto.

So the actual amount of spending that is controllable by this mechanism is about a quarter of total spending.

Proponents of this measure argue that the President would use this power to eliminate waste in the defense budget. The facts are directly contrary, since he has not done so in his budget submissions each year, even though he has absolute control over those decisions.

Proponents have also claimed that another President might well target defense spending. That claim is not persuasive, since we are debating a proposal with a 2-year lifespan.

Even assuming that this President were willing to cut defense spending, the fact remains that defense appropriations are divided as to accounts, not as to specific bases or missiles, or tanks.

This proposal does not give the President authority to reduce budget accounts, only to veto entire sections. So it is difficult to see how specific items could be reached by this mechanism.

If, on the other hand, we accept that the President's preference for increased defense spending would remain unchanged in the face of a line-item veto power, he would be able to exercise this power on just $128 billion of a trillion-dollar budget.

As I already pointed out, 12 of the accounts in this area make up $64 billion of the spending, and the President has proposed to rescind programs in three. The line-item veto will not give him more surgical precision than he now has to excise specific programs from these accounts. It would give him only the option of vetoing entire accounts.

In practical terms, that means that instead of asking for a rescission of $100 million in veterans health programs, as he has done this year, he would have the option of vetoing the entire $7.9 billion in this account.

It is incomprehensive that anyone can consider this as flexibility or precision to veto decisions.

I need not and will not reiterate the many other valid arguments made by my colleagues about the pernicious effects of this proposal. It seems to me to be obviously unconstitutional, and to make little sense on the practical merits.

But I would like to address briefly the claim argue that congressional appropriations are uncontrolled because they involve compromise: That Senators and Representatives accept some spending they would not each individually approve in order to obtain approval for spending they do approve.

This allegation has been represented as a fundamental failing in the legislative branch which can only be corrected by substituting one man's judgment for that of 535.

But surely the essence of legislating—and more importantly, the entire essence of governing a large and diverse nation—is compromise. And if compromise does not consist in accepting less than perfection, then the word has no meaning.

As elected representatives of the people, we are forced time and time again to reach compromises among the desires of various of our constituents. Our constituents are not, as some would describe them, "narrow interest groups."

I see nothing narrow about the fact that the people in the northern part of my State of Maine, which has no large cities, are more interested in rural programs than the people in the southern part, which contains most of the State's population centers.

I see nothing narrow in the fact that Senators from Western States have a greater interest in water projects than Senators from Eastern States. I see nothing inherently wrong with the fact that Senators who represent States with large cities are concerned about the problems of those cities.

This seems to me to be precisely what the Framers anticipated when they provided for representative government and when they created a bicameral legislature.

It is unwise and shortsighted for us today to overthrow their carefully crafted balance of powers in order to enhance a power that the President already has and has failed to use extensively. The bill purports to solve a problem it cannot solve. And it solves a problem that does not exist.

It cannot have a substantial impact on the budget in its 2-year duration because it reaches only to the 11 percent of spending that the President does not want to increase.

And because it is a blunter instrument to control spending than the powers the President already has, it gives him no more flexibility to manage spending.

It is an ill-conceived notion, and its enactment would be unconstitutional. I urge my colleagues to reject it.

Mr. NICKLES. Mr. President, giving the President line-item veto power on appropriation bills is not a new issue in the Senate. In 1983, I coauthored an amendment expressing the sense of the Senate that line-item veto authority be given to the President. That was the last time this matter was considered before the full Senate. The bill now before us, S. 43, would give the President statutory authority for a 2-year period to exercise an item veto on appropriation bills. This is urgently needed.

As drafted, this proposal for an item veto addresses many of the concerns that have been raised in the past. It establishes by statute a line-item veto on the basis of a precedent already used by the House of Representatives, known as the Gephardt rule. It specifically defines what an "item" of appropriation constitutes. Under this procedure, the enrollment of the appropriation bill would, in effect, allow each item of appropriation to be enrolled separately, thereby avoiding the constitutional controversy. Furthermore, it would retain the constitutional two-thirds veto override by both Houses of Congress and would sunset after 2 years. Also, according to the Senate parliamentarian, it would not be subject to a constitutional point of order on the Senate floor.

My State of Oklahoma has given this power to its Governor along with 42 other States. It has been shown on the State level to be an effective tool for cost control. This can be seen in the annual deficits and surpluses that States have experienced compared to their Federal counterpart. For 1983, all but two States realized budget surpluses. This is in stark contrast to the Federal deficits. If it works for the States, why not for the Federal Government?

We can experience similar results on the Federal level if only we would give the President this authority. For example, in fiscal year 1983, the President sent to the Congress requests for appropriations of $497.9 billion, the Congress approved $510.8 billion, an increase of $12.9 billion. If the President had the power to reject portions of these appropriation bills that we sent him, we might have seen the fiscal year 1983 deficit reduced substantially.

When an appropriation bill comes before the President, he has two options—either sign it or veto the entire bill. He has very little input or ability to be able to make some constructive changes or reductions in the budget through the appropriations process.

Congress is the one that passes these bills. Congress is the one that is really the guilty culprit when it comes to ever-escalating Federal spending.

I ask, why not provide additional accountability for our Federal Government and improve our ability to control Federal spending by giving the President this important budgetary tool? I urge the adoption of this bill.

Mr. DURENBERGER. Mr. President, I rise to oppose consideration of S. 43. Despite broad agreement that the current high budget deficit is a problem, there is surprisingly little agreement on its cause. Proponents of the item veto as a solution assume that deficits are structurally rooted in the balance of power between Congress and the Executive [OMB]. However, even were this certifiably so, the short-term deficit remains unreachable by the item veto. Meanwhile, experts on the legislative and budget processes rate the item veto as far more certain to increase the power of the executive—and with it the President's ability to implement their programs—than to establish a long-term dynamic toward balanced budget.

The Mattingly legislation adopts a statutory approach, intended to accomplish much the same purpose and effect of a constitutional amendment. However, in addition to raising policy issues regarding the balance of executive and legislative powers, the proposal also raises novel legal questions, and could lead to perverse behavior designed to circumvent the stature:

SECTION-BY-SECTION ANALYSIS

NEW ENROLLMENT PROCEDURES

The Secretary of the Senate and Clerk of the House would be directed to have their enrolling clerks enroll as a separate bill each "item" of any bill making general, special, supplemental, deficiency or continuing appropriations originating in their respective House as a separate bill. Each such "item" would bear the designation of the measure to which the item had been attached before enrollment, as well as a separate bill or joint resolution number.

DEFINITION AS "BILL"

A bill derived through the above described process would be deemed to be a "bill" under Clauses 2 and 3 of Article 7 of the Constitution.

"ITEM" DEFINED

An "item" would include any numbered section or unnumbered of any appropriations bill.

SUNSET

The provision would be in effect for two calendar years, beginning with its enactment.

ANALYSIS OF ISSUES

The major advantages of the Mattingly legislation are: First, it could be enacted much faster than a constitutional amendment; and second, it has a 2-year "sunset," making the provision essentially experimental.

However, the statutory approach raises a number of procedural obstacles, including:

BINDING CONGRESS

If passed, this statute would be an implicit exercise of Congress' rulemaking powers. However, Congress cannot be bound by the acts of previous Congresses. This is particularly true for the House, which is not a "continuing body," while the Senate arguably, though not necessarily, is. Because most, if not all, appropriations legislation originates in the House, the House could decide to waive the requirement as it sees fit. While debate over an omnibus bill might well reflect an expectation that it will be separated into its component parts, the House could arbitrarily decree otherwise. Thus, the legislation might be seen as an uncertain grant of power from the Senate to the House.

DEFINING THE BILL

The provision essentially redefines a bill, the definition of which has evolved through tradition. There is a question as to whether the courts would sustain such an interpretation, especially when the measure might be seen as an unconstitutional delegation of Congress' powers to the President via statute, rather than constitutional amendment.

If the legislation were solely a change to the rules of the House and Senate, rather than statute, judicial review might be limited. However, such an approach could conceivably make a waiver a mere formality observed in all appropriations legislation.

DEBATING FORMAT

Undoubtedly, Members of both Houses would seek to circumvent the strictures of the legislation. Instead of omnibus appropriations, omnibus paragraphs would result, probably with little attention to their internal consistency. Such a result would dim coherence of legislation, and result in logrolling not only over whether provisions are included in a bill, but which paragraphs they are included in. In addition, other innovations would arise. A dollar appropriation might appear in one paragraph, and the second paragraph could apportion that amount in a way that makes it difficult for the President to veto either. Finally, it is likely appropriations committees would rely more heavily on report language. In short, the Mattingly legislation, if nothing else, would lead to dramatically different styles of legislative drafting.

DEFINING A PARAGRAPH

The bill defines an "item" as an unnumbered paragraph. It does not define a paragraph, so it is unclear whether a long bill consisting of a single paragraph would be determined to be one or several paragraphs. At the very least, the bill should define a paragraph.

LEGISLATIVE APPROPRIATIONS

Most item veto proposals have exempted appropriations for the legislative brand from item vetoes. The Mattingly legislation would not.

No evidence has been found that the framers of the Constitution considered the utility of the item veto when setting forth the President's veto power under article I, section 7. Some scholars adduce that this was due to the fact that the legislative innovation of the omnibus appropriation—developed as a means to constrain the President's veto power—did not come into being until much later. However, with the advent of omnibus appropriations in the mid-1800's, many perceived the need to readjust institutional relationships through the item veto. (Some assert that omnibus appropriations were themselves "readjustments" to the unanticipated increase in the use of vetoes for policy purposes about that time.) In 1861 the Confederate constitution provided for the item veto, and following the Civil War, several States revised their constitutions to include this tool. Today, 43 State constitutions provide for some version of the item veto.

The State experience demonstrates great variance in the item veto concept. Essentially, the item veto allows the executive to veto provisions of bills, rather than entire bills. However, the item veto could: First, apply to legislative as well as appropriations language; second, apply to provisions having the effect of appropriations, such as entitlements, entitlement eligibility measures, tax expenditures, and so forth; and third, include the power to reduce, as well as reject, spending measures. For example, Alaska's Governor may expand or reduce both legislative and appropriations provisions, while Colorado, by contrast, only permits its Governor to veto unconstitutional provisions in bills.

While State experiences have generally been regarded as positive, many argue that they are not translatable to the Federal level because first, most States have balanced-budget requirements; second, many State legislatures meet irregularly and are less sophisticated than their executive counterparts; and third, most State constitutions do not mandate the rigorous system of checks and balances reflected in the Federal Constitution. The item veto, therefore, is often characterized as an "uncertain grant of power" to the President.

OPERATION OF THE ITEM VETO

President Reagan draws on his California experience to endorse the item veto concept, citing it as "a powerful tool against wasteful or extravagant spending." It is indeed a powerful tool, but its use is not confined merely to opposing extravagance.

The major argument in favor of the item veto is that it can be used to stymie "logrolling," helping to purge uneconomical "pork barrel" projects from the budget. This view emphasizes the role of the Office of Management and Budget as a counterweight to the "iron triangle" politics practices by agencies. There is nothing inherent in the item veto, however, which constrains the President from using this tool for that purpose alone. For example, the President could become the preeminent "logroller" of the legisla-

tive process, dispensing favors and retribution to individual Congressmen based on their support or opposition to his programs. Moreover, different Presidents will come to office with differing notions as to what should be cut, from a programmatic standpoint. Where Reagan might focus his cost-cutting on grant programs, a Mondale or Hart administration might prove equally determined to reduce defense spending. Clearly, the item veto could drastically increase the power of any President to implement his policies and programs.

However, unless the item veto power given to the President is broad, Congress will probably be able to circumvent such authority, with potentially perverse outcomes. For example, if the authority did not extend to entitlement programs or tax expenditures, Congress might be tempted to embody more spending measures in this form, making the budget even more difficult to control. Similarly, Congress could "pack" line-item appropriations, making it so that several projects are funded by a particular allocation formula. Indeed, unless the President were given the power to alter the legislative language governing the allocation of funds, the mere power to reduce spending on individual line items would be sufficient to kill a project's funding.

Other possible unwanted side effects of item vetoes include: First, extensive negotiations on the budget between the President and Congress would result in slower enactment of appropriations and more, not less, deadlocks in the budget process; and second, Congress could "pass the buck" to the President, counting on his role as budgetcutter to restrain spending under politically popular programs.

Finally, there is the institutional concern that the President would be able to substitute his judgment for that of the legislature, making Congress subservient and unable to enact dependent appropriations. To the extent that omnibus appropriations represent "coordinated policy based on broad themes," such policymaking power would be disrupted with uncertain results.

LIMITED USES

Perhaps no example better illustrates the limitations of the line item veto than that of its potential applicability to the current fiscal year's deficit. A 1984 report by the House Budget Committee points out that 54 percent of the $928 billion budget for fiscal year 1985, or $503 billion, comprises uncontrollable expenditures, including entitlements and interest on the debt. Of the remaining $425 billion, 40 percent, or $168 billion, comprises prior year authority and is already obligated. The committee concluded that of the remaining $257 billion, Reagan would be unlikely to seek reductions in the $173 billion defense budget, and points out that the President's fiscal year 1985 budget only contemplated a $2 billion reduction in domestic spending levels.

Most of these cuts are from programs such as "Older Americans, Head Start," mass transit, and other grant programs—and have become the basis for changes that the administration lacks fairness.

While a Reagan administration armed with the item veto would undoubtedly seek to cut pork barrel projects from defense and civilian programs alike, political constraints would make it difficult for any administration to unilaterally impose such cuts in the absence of a reasonable degree of consensus. For example, a Senator might not vote for the defense budget if a key base in his State were likely to be dismantled and so a President would promise to keep the wasteful expenditures to insure support for his overall program.

CONCLUSION

The item veto is a budget-balancing tool of uncertain value. Its main application would be toward cutting pork barrel projects inserted in the budget as part of legislative compromise, with unpredictable consequences for the legislative process itself.

In the absence of a balanced budget requirement to complement the item veto, the President's bargaining power in the legislative process would increase significantly, but his uses of this power would vary, depending on his programmatic or fiscal proclivities. At best, the item veto would be an instrument of fine tuning—the cumulative effect of its consistent use having a significant long-term effect. At worst, the item veto could accentuate sharp and undesirable policy wings between administrations of different ideologies, possibly adding to economic confusion and disarray, permitting the President and one-third minority of either House to dominate budget policy.

The State experience shows that the item veto is a useful, and perhaps necessary, complement to the balanced budget requirement. Under the strict fiscal discipline of balanced budgets, the likelihood that the item veto would be used principally to root out extravagance is greater than without such discipline. Unfortunately, the bill we are being asked to consider does not require a balanced budget. If it did I might support it.

Clearly, a constitutional amendment—which would take so long to implement as to be irrelevant to the current deficit crisis—would be the riskiest course, since it would be hardest to repeal if experience subsequently proved the grant of item veto power to be unwise or unworkable. The statutory route is safer in this regard. Some House Members have suggested a still-safer alternative of putting a 2-year sunset into any expansion of the President's recision authority under the 1974 Budget Act. This would be enough to make a President circumspect about using these powers in a confrontational mode with Congress.

Mr. President, I am sympathetic to the motives of the distinguished Senators from Georgia and Washington, who have brought up a measure to provide the President with line-item veto powers. They are as concerned as I am about the prospect of continued massive Federal budget deficits. And, I agree that extraordinary action is called for if Congress and the President are to solve this burgeoning problem, which constitutes a growing, unconscionable mortgage on America's future. But by the same token, I cannot agree that the line item-veto, in any form, is an appropriate remedy to our institutional dilemma.

There can be little doubt that during the past two decades, the President's ability to lead has diminished considerably, as Congress has used a variety of means to constrain his options and increase our own. If it could be accurately diagnosed that, somehow, Congress increased its power through this process, then it might follow that the needed response is to increase the President's powers vis-a-vis the Congress. But that is not what has happened. Congress' constitutional powers have not changed one iota. What has changed is the way Congress uses, and all too often abuses, its powers.

Sadly, as an institution, we have lost much of our self-discipline. And this, more than any other factor has limited the President's historic ability to lead in cooperation with congressional leaders. In fact, many of the so-called reforms we adopted in the 1970's have had the effect of diminishing party and congressional leadership to the point where today there is an appalling lack of discipline in the legislative process. Increasingly, we find ourselves unable to forge consistent governing coalitions on the difficult issues of the day.

Instead, Congress has come to rely on a never ending series of shifting and undependable coalitions. This phenomenon, in turn, has increased our dependence on logrolling of the kind reflected in omnibus appropriations legislation.

Clearly, omnibus appropriations are but a symptom of the malady afflicting the Congress. The item veto would treat this symptom. But it would fail to treat its cause, which is the fragmentation of congressional and party leadership. Congress would do well to exhaust its efforts to restore self-discipline before we concentrate an unprecedented degree of authority in the hands of the executive branch, and thereby give the President extraordi-

nary powers to impose his discipline upon us. The effect of such a shift would be a turning point in our system of government, potentially opening the way for sharp and undesirable policy swings between Presidents of different ideologies.

Mr. President, there is no evidence that, by itself, item veto power would be sufficient to constrain deficit spending. Not only do entitlement programs, payments on the debt, and multiyear contracting procedures limit the applicability of the Senators' proposal, since appropriations bills aren't needed to permit spending in these areas. But the President would be inclined to use the item veto for logrolling, to the extent that he would no more be able to work with key congressional leaders to ensure passage of his programs than he was before accruing this new power. In short, the item veto would merely make the President the preeminent logroller. It would not reform the system. In fact, it would surrender to it.

Mr. President, before Congress seriously considers the item veto, we should take a hard look at the factors that have resulted in the decline of party and legislative discipline. These factors include the present congressional committee system, campaign finance law, the nature and scope of the congressional and executive budget processes. I will be happy to work with my distinguished and most able colleagues toward this end.

Mr. HATCH. Mr. President. I thank my colleagues for the opportunity to address myself briefly to the substantial issues presented by this bill. Based on my reading of the Constitution and my concerns about the effects of this proposal, I have grave reservations about a bill, or a constitutional amendment for that matter, to grant the executive branch an unprecedented line-item veto authority. Despite my reservations about the soundness of this measure's constitutional policy, I have voted and will continue to vote to bring this bill to the floor. I would like to state my reason for supporting cloture on a bill about which I harbor grave reservations. Congressional inability to restrain the growth of deficit spending is the greatest constitutional crisis of our generation. For 25 of the past 27 and 46 of the last 54 years, Congress has run a deficit. These deficits have become the pattern in good or bad economic times without distinction. Federal Government spending policies are indeed haphazard, willy-nilly, and out of control. The stability and longevity of our institutions are threatened by this profligacy. Senator MATTINGLY deserves great credit for focusing the Nation's attention on this crisis. The Senator from Georgia correctly perceives that Congress' budget policies are out of control. Because this bill carries that message, it certainly deserves to come up for debate.

My study of this bill and our current constitutional crisis tend to indicate that S. 43 is not good constitutional policy. The Constitution itself recommends that we deal with crises by limiting Government authority, rather than by expanding central Government authority. The framers did not solve the problems of the Articles of Confederation by centralizing all authority in the Executive, but by diffusing authorities to limit Government and make it more accountable to the people. This could lead us to the conclusion that Congress can best attack the spending crisis by preserving the constitutional principle of limited Government embraced by the balanced-budget amendment, rather than by altering the revered constitutional separation of powers doctrine. The balanced-budget amendment would put limits on Congress and make it more accountable to the people, rather than expand the power of the Executive to participate in the legislative arena of setting spending priorities.

As I have mentioned, Senator MATTINGLY deserves commendation for making the Nation aware of the vagaries of Congress' spending avarice. President Reagan as well deserves great credit for focusing attention on the need for some device to control Federal spending. In his State of the Union Addresss on January 25, 1984, the President stated that:

> Some 43 of our 50 States grant their Governors the right to veto individual items in appropriation bills without having to veto the entire bill. California is one of those 43 States. As Governor, I found this line-item veto was a powerful tool against wasteful or extravagant spending. It works in 43 States. Let's put it to work in Washington for all the people. I would be most effective if done by constitutional amendment. The majority of Americans approve of such an amendment just as they and I approve of an amendment mandating a balanced Federal budget.

By mentioning the line-item veto in conjunction with the balanced-budget and tax-limitation amendment, the President seemed to suggest appropriately that a line-item veto amendment might not be necessary at all if the House of Representatives had concurred with the Senate last year in adopting the balanced-budget amendment to control indiscriminate Federal spending. The balanced-budget amendment embodies the most sound constitutional tool against the spending crisis.

The item-veto amendment is based on the theory that the power of the Chief Executive should be strengthened to check Federal spending. Because under the Constitution the President must approve or disapprove a bill in its entirety, I can understand his frustration with the difficult choice of vetoing an entire spending bill which funds vital Government services and which also contains some extravagant or unnecessary items. President Eisenhower described this dilemma in the following words:

> The necessity of accepting or rejecting a bill in its entirety prevents the President from considering separable provisions on their own merit.

Presidents Reagan and Eisenhower are not the only Chief Executives to have requested line-item veto authority. In fact, at least five other Presidents have expressed their support for such a change in the Constitution. They are Presidents Grant, Hayes, Arthur, Franklin, D. Roosevelt, and Truman. This alone speaks for the need to give this some debate and to fully examine these issues. I would be pleased to see the Senate give this measure the courtesy of a full examination on the merits. I, for one, am confident that such an examination will convince the Senate to opt for a sounder constitutional remedy than an item veto.

As this list of Presidential supporters for an item-veto amendment suggests, this is not a new concept. A brief historical review will give some perspective about this bill. A provision for vetoing portions of bills first appeared in the Constitution of the Confederacy. Robert H. Smith, author of this first American item veto, explained that the President needs power "to arrest corrupt or illegitimate expenditures and at the same time approve other parts of the bill." Since the Civil War, every New State added to the Union, with the exception of Nevada, has granted its Governor some form of item-veto power. Usually it has been limited to appropriation bills.

The first proposal to amend the U.S. Constitution to provide an item veto came from Representative James C. Faulkner of West Virginia in 1876. Since then, over 140 similar proposals have been introduced in Congress. In over 100 years since the first item-veto proposal appeared in Congress, five hearings have been held on the subject. The first hearing in more than a quarter of a century on this topic was held before the Constitution Subcommittee, of which I am chairman, last year. It is ironic that no hearings were held on this subject for 27 years during which time the Federal Government has run a deficit in all but 2 years and the Federal debt has grown from $272 billion to nearly $1½ trillion.

As I mentioned at the outset, the Constitution prevents the President from exercising an item veto. Article I, section 7, requires explicitly that "every bill," not portions of bills, be approved or rejected by the President. No language in the Constitution even hints at an item-veto authority for the

Chief Executive. Moreover the Constitutional Convention never discussed the possibility of an item veto and no President has ever presumed to exercise such power in the absence of constitutional authorization. Therefore, unless amended, the Constitution itself counsels against an item-veto bill.

The more substantial constitutional concerns, in my opinion, deal with the potential that an item veto could disturb the delicate balance of powers set up by our Nation's foundational document. A permanent item veto could potentially alter the historical separation of powers balance between the executive and the legislative branches. The item-veto posits that a concentration of power in the Executive would permit more decisive and efficient response to our budgetary crisis. The spirit of the Constitution, however, was to resist centering too much authority in any single entity.

James Madison, father of the Constitution, considered the delicate separation of powers to be key to our constitutional framework. In the Federalist, No. 47, he stated:

> No political truth is certainly of greater intrinsic value, or is stamped with the authority of more enlightened patrons of liberty than that . . . the accumulation of all powers, legislative, executive, and judiciary in the same hands, whether of one, a few, or many . . . may justly be pronounced the very definition of tyranny.

Alexander Hamilton echoed those sentiments in the Federalist, No. 66:

> That important and well-established maxim . . . requires a separation between the different departments of power.

These quotes are not offered to insinuate that the item veto threatens all liberty, but to emphasize the importance the framers placed upon the preservation of the principle of dividing vital powers amongst executive, legislative, and judical branches.

The framers of the Constitution wanted to avoid an "imperial executive," an "imperial legislature," or an "imperial judiciary." Accordingly, they withheld from the President legislative authorities over the purse strings of the Nation. The framers wanted budgetary priorities to be set by Congress, the representatives of the people. The item veto clearly gives the President broad power to become involved in the minutiae of budget policies.

We must remember that the Constitution will still be governing two centuries from today as it has already preserved our liberties for 200 years. In that sense, I have concerns that a restructuring of the balance of powers—although seemingly important at the present—could have significant unanticipated effects 100 years from now. It is a natural tendency during times of political stress and difficulty, as our budget impasses have become, to prefer the institutions of Government that move expeditiously and decisively. We must ask ourselves, however, whether the benefits of expedition and decisiveness are worth their price in terms of the Constitution's balance. As I have stated, my judgment, at this juncture, is that the Senate would be far wiser to respond to the crisis Senator MATTINGLY has helped bring once again to our attention by adopting a balanced-budget amendment.

Perhaps I could state as well my observations about how this proposal might disrupt our separation of powers. The executive branch desires an item veto precisely because it does not want to accept portions of a bill it considers undesirable as part of an overall favorable bill. Under an item veto, Congress would lose its exclusive discretion to mix undesirable with desirable as it sees fit. The executive branch would instead mix desirable with undesirable as it sees fit. In this sense, the presumption concerning who determines the proper mix of legislative priorities will shift from Congress to the Executive. A President will possess, with an item veto, considerable legislative power to determine which priorities ought to be linked with others in legislation. The Executive's gain would be the legislature's loss. This is a fundamental restructuring of the balance of powers in an area hitherto reserved by the Constitution solely to the Congress.

In addition to my constitutional qualms, I also would like to present to the Senate some thoughts about the practical workings of an item veto. Perhaps my most crucial practical concern is that Members of Congress will be required to cast votes on measures whose final provisions are uncertain. Let me state this concern in hypothetical terms. As we all know, we often have to decide to support a bill which contains many items we oppose because on balance we think the good aspects of the bill outweigh the bad. Thus a Senator could make such a judgment and support a bill only to have the President strike from the bill the only provisions which he supported in the bill. At that point, his support would turn to opposition. He might vote to override unsuccessfully, but it is too late. That Senator has facilitated passage of legislation he opposes. This, of course, is not a very good case for the principle of legislative accountability which could be very clouded by the twists and turns of an item-veto confrontation. Moreover, it is theoretically possible under this scenario for legislation to be enacted that is opposed in its final form by nearly every Member of Congress.

Another aspect of a President's new authority to play a pivotal role in the form of legislation may result in less deterrence for pork-barrel items than current Executive authority to veto an entire bill. Under the present system, there is often a powerful disincentive to jeopardize a particular legislative mix by adding some pork-barrel project that may attract a veto. The item veto may establish an incentive in the opposite direction, namely pork barrels may be added either to force the President to take the politically embarrassing step of vetoing a popular program or to grant Members of Congress the chance to case politically popular votes in reliance on the President's subsequent veto. Indeed more pork barreling may occur to ensure sufficient majorities to override item-vetoed programs.

We have heard much evidence about the success of the item veto in the States. We should not expect, however, the same kind of success experienced in some States. The primary spending problems of the Federal budget are not pork-barrel projects, but defense spending, entitlements, and interest payments, none of which are a part of State budgets. Moreover the item veto would not apply at all to entitlements, leaving the defense budget a major target of item vetoes, which could be problematical in times of national defense vulnerability. Returning to the coverage of the item veto, it obviously would only reduce interest payments to the extent it reduces spending in other major areas of Federal spending. In fact, since the item veto does not apply to entitlements or interest payments and should be wielded only sparingly against defense spending, its actual coverage would be limited to less than 10 percent of the Federal budget.

In conclusion, I would like to commend again the Senator from Georgia for his efforts in identifying Congress as the source of our current constitutional spending crisis. Due to my desire to see this issue debated, I will continue to vote for cloture. For my part, however, I lean at the present against voting to approve S. 43 and would instead deal with this constitutional crisis as the Constitution itself seems to suggest—by limiting the power of Congress and making it more accountable to the real governors, the people. This is vastly preferable, in my mind, to disrupting the separation of powers embodied in the Constitution.

Mr. LAUTENBERG. Mr. President, I rise in opposition to S. 43.

The budget deficit poses a grave threat to our economic future. Policies in effect over the past 4 years have increased the annual budget deficit almost fourfold. The national debt has doubled in the last 5 years. To finance that debt, we have borrowed funds from abroad, driving up real interest rates and the value of the dollar. And, that inflated dollar has produced a trade deficit that threatens the long-term markets of American industry,

and threatens the jobs and economic security of American workers.

We face a serious problem, Mr. President. But, the bill before us is no solution. Under the bill, each numbered section or unnumbered paragraph of an appropriation bill would be enrolled as a separate bill by the Secretary of the Senate or the Clerk of the House. That separate bill would then be subject to a separate veto by the President. This new procedure would expire after 2 years.

The proponents of the bill argue that it would give the President the power to reject, to surgically remove, so-called special interest appropriations that the Congress may include in an appropriations bill. As a practical matter, the bill will not work that way. It address paragraphs or sections in appropriations bills, not specific lines. In practice, paragraphs or sections of appropriations bills cover more, for example, than just one water project, or one power project.

Indeed, the power to reach particular projects or program items already exists, under the Impoundment Control Act of 1974. If a President wants to delay the obligation of budget authority, he can submit a proposal for a deferral. It is up to Congress then to disapprove of the deferral and present that disapproval to the President. A President can also propose rescinding budget authority which then needs the approval of both Houses. For 1981, the Congress approved $14.5 billion out of $16.2 billion in recissions requested. For 1985, the President proposed less than $2 billion in recissions.

But, practicality aside, the Congress must ask some tough questions about the item veto as proposed by S. 43. Despite its tempting simplicity, it is not the answer to our budget problems.

First, the item veto would miss most of the Federal budget. It permits no item veto of entitlement programs—programs like Social Security, which pay benefits automatically to people who are entitled to them. There could be no item veto of interest on the national debt. Under this administration, at least, there would surely be no item veto of foreign aid or defense budget accounts. What's left is 11 percent of the budget. The President could item veto all of it, and we would still have a budget deficit.

Second, the item veto would likely result not in less spending, but different spending. It would allow the President to set priorities, instead of the Congress. Individual Senators would surrender a great deal of the power they now have to address the needs of the people they represent.

I, for one, believe it essential that we expand the Superfund, to clean up toxic waste dumps. The Senate Environment and Public Works Committee, on which I serve, has reported a bill that would substantially increase cleanup funding. The President opposes providing the funds at the level that I, the committee, and the people of New Jersey think essential. I daresay, that if he had the chance, the President would item veto Superfund.

The same could be said about funding for Amtrak, which is an essential part of our region's infrastructure—or to fund the Urban Development Action Grant Program—which has played a key role in revitalizing local economies in my State and the Nation. The President opposes funding these programs, and if given the chance, he would item veto them.

The bill would ironically subject to item veto one area of the budget where economies have been made. Ask the students who have a harder time getting loans. Ask mothers who have a harder time feeding their children. Ask the mayors, whose roads and rails and public works are in need of repair. The budgets have been cut.

The President from 1980 to 1985 asked for $2.249 trillion in discretionary appropriations, the kind of appropriations subject to the item veto. The Congress enacted a total of $2.237 trillion—less than the President requested. Of course, the priorities were different—some programs received more funding than the President requested and others received less—but total spending was below that requested by the President. The item veto would guarantee not less spending, but different spending and the losers would the people that Members of Congress represent.

I would like to make a third point. What may be good for the States may not be good for the Nation. The proponents argue that the line-item veto works well for so many Governors around the country that it should be tried on the Federal level. Yes; the Governor of my State exercises a line-item veto power. But there are differences.

The New Jersey Legislature presents a single appropriations measure for the entire State budget. One might argue that an item veto is necessary, lest the Governor be forced to send the whole funding measure back over one or two disagreements. The Congress passes many more appropriations measures, ideally 13 regular appropriations bills. And, while we have relied on continuing resolutions to package several bills, when we have failed to reach all 13, the President has not hesitated to use his power to reject a continuing resolution. He vetoed a continuing resolution in 1982.

Moreover, the line-item veto can be a diversion. A Governor can point proudly to all the money he has saved with the item veto. But, often he cuts spending that would not have been approved in the first place were it not for the veto. A legislator can work to fund a pet program at more than he or she thinks realistic, knowing that the Governor will cut it down to size. He gets the credit for being generous, knowing the Governor will have to force discipline. That is not real budget cutting. That is playing politics with the item veto.

The fourth and final point I would like to make concerns the sanctity of our Constitution. Mr. President, we are talking about changing the balance of power between the branches of our Government, changing a system of checks and balances that we have learned to respect and preserve. We should hesitate to tinker with the basic design of our Government, the basic design laid out by the framers of the Constitution.

Mr. President, the economy of our Nation cannot suffer much longer the failure to reduce our budget deficit. Difficult decisions must be made. A Senate-House budget conference has been meeting off and on, and now, unfortunately, off, to fashion a budget that will begin to reverse the ominous trend of the last 5 years. We must move forward on real solutions to the budget deficit. The line-item veto is a detour, Mr. President. A detour that will take us no further along toward our destination.

For the benefit of my colleagues, I ask unanimous consent that at the conclusion of my remarks two editorials in opposition to the line-item veto, one from the New York Times, and the other from the Philadelphia Inquirer, be printed in the RECORD.

I urge my colleagues to oppose S. 43.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Philadelphia Inquirer, July 23, 1985]

REJECT BID FOR LINE-ITEM VETO

The Senate is tied in more knots than usual over whether to give presidents the power to veto "line items" in spending bills. President Reagan wants this power, maintaining that it would better enable him to control spending and reduce budget deficits. So would the abolition of Congress. He might as well ask that, for that would be the effective result. Recognition that the stakes are that high has prompted a bipartisan filibuster. An attempt to shut it off is expected today.

Currently the President must veto an entire spending bill, which typically provides funds for a vast collection of projects and programs. If he objects to only one, he must decide whether killing it is worth sinking all the others with it. A line-item veto would permit him to pick off specific programs.

Obviously that would be a useful tool, yet most federal spending still would be beyond its reach. Some 45 percent of spending goes to entitlement programs. Anyone meeting the programs' criteria is entitled to the money. Only changes in fundamental laws can reduce such spending. Another 15 percent covers interest on the nation's debt, which must be paid. Then 27 percent of spending goes to the Pentagon, and Mr.

Reagan is unlikely to veto many items there. That leaves only thirteen percent of all spending realistically within reach. This veto would be little more than an ax with which Mr. Reagan finally could fell all the programs such as Amtrak upon which he has chopped so relentlessly since 1981.

The power of the purse is Congress's primary authority, awarded by the Constitution. By bargaining among interests from all over this diverse nation, Congress apportions spending so that everyone gets a share. Sure, some projects are little more than "pork barrel" giveaways; there is some waste. Yet in the final analysis, this continuous process of bargaining and trading enables coalitions to be knitted, which ties the regions into the national system, enabling governance itself.

Give the President the power to veto specific items and Congress would lose leverage forcing him to bargain. Such a surrender of authority would knock asunder the careful balance of institutional powers wrought so finely by the framers of the Constitution. It would permit a Ronald Reagan to dismantle social programs unimpeded. The same authority would permit a liberal president to run roughshod over programs conservatives treasure.

This proposal is a distraction, a nonanswer to deficits and a serious threat to the system's checks and balances. No senator should approve this emasculation of congressional authority. Until a solid Senate majority is persuaded of that, let the tongues of those senators who understand this issue's importance wag on.

[From the New York Times, July 17, 1985]

THE LINE-ITEM DIVERSION

For more than a century, every President has wanted a veto power over individual items in appropriation bills. Congress, concerned more than its own power than for the Federal exchequer, has scotched the idea every time. The issue is once again before the Senate. It deserves the same fate.

Line-item appropriation vetoes would relieve the President of the duty to weigh the pros and cons of bundled expenditures. Every President since Ulysses Grant has vowed to wield the veto against "waste"—none more insistently than President Reagan. But alarming extravagance can always be resisted by vetoing an entire package, too. The bundling annoys Presidents because it has been an important element in their annual negotiations with Congress. Presidents want to tip the power balance in their favor, but no strong case for needing extra power.

Mr. Reagan recalls his line-item veto power as California Governor, and notes that 42 other governors enjoy it too. So why not the President?

Because a governor is not the President, Commander in Chief, Diplomat in Chief, Economist in Chief and Communicator in Chief. Governors may need the added authority to influence their legislatures. But Presidents, especially Mr. Reagan, have made no persuasive showing that they now need to destroy Congress's last significant power, the power of the purse.

Much as it might alter the political power balance, the line-item veto would not directly affect most appropriations. It could not reach three-fourths of the Federal budget. Social Security costs could not be vetoed without first rewriting the underlying law. The same goes for other entitlement programs, like Medicare or farm subsidies. Interest on the national debt is veto-proof, and so, by and large, is the defense budget.

Ignoring these limitations, Presidents like to portray the item veto as a scalpel for removing the pet projects of special interests that Congress won't resist. As if the White House served no special interests.

A further reason for opposing the item veto is that it might give Presidents excessive influence over individual members of Congress. The White House could, for example, threaten to veto perfectly legitimate expenditures of importance to individual legislators because they dare to oppose the President on other issues. Presidents loom large enough in the political careers of legislators.

At best, this proposal would alter spending patterns at the margin. At worst it's a power grab, upsetting Federal checks and balances that have worked pretty well. This debate is a poor substitute for doing something substantial about the alarming budget deficits.

CLOTURE MOTION

The PRESIDING OFFICER (Mr. HUMPHREY). One hour having passed since the Senate convened, the clerk will report the motion to invoke cloture.

The bill clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the motion to proceed to the consideration of S. 43, to provide that each item of any general or special appropriation bill and any bill or joint resolution making supplemental, deficiency, or continuing appropriations that is agreed to by both Houses of the Congress in the same form shall be enrolled as a separate bill or joint resolution for presentation to the President.

Bob Dole, Ted Stevens, Mack Mattingly, Barry Goldwater, Warren P. Rudman, Thad Cochran, Pete Wilson, John Warner, Chuck Grassley, Jesse Helms, Strom Thurmond, Phil Gramm, Jeremiah Denton, William L. Armstrong, Chic Hecht, Mitch McConnell.

CALL OF THE ROLL

The PRESIDING OFFICER. Pursuant to rule XXII, the Chair now directs the clerk to call the roll to ascertain the presence of a quorum.

The bill clerk called the roll, and the following Senators answered to their names:

[Quorum No. 14 Leg.]

Baucus	Humphrey	Symms
Gore	Kassebaum	
Hatfield	Mattingly	

The PRESIDING OFFICER. A quorum is not present. The clerk will now call the names of the absent Senators.

The bill clerk resumed the call of the roll, and the following Senators answered to their names:

Abdnor	Bingaman	Burdick
Andrews	Boren	Byrd
Armstrong	Boschwitz	Chafee
Bentsen	Bradley	Chiles
Biden	Bumpers	Cochran
Cohen	Hecht	Packwood
Cranston	Heflin	Pell
D'Amato	Heinz	Pressler
Danforth	Helms	Proxmire
DeConcini	Hollings	Pryor
Denton	Inouye	Quayle
Dixon	Johnston	Riegle
Dodd	Kasten	Rockefeller
Dole	Kennedy	Roth
Domenici	Kerry	Rudman
Durenberger	Lautenberg	Sarbanes
Eagleton	Laxalt	Sasser
East	Leahy	Simon
Evans	Levin	Simpson
Exon	Lugar	Specter
Ford	Mathias	Stafford
Garn	Matsunaga	Stennis
Glenn	McClure	Stevens
Goldwater	McConnell	Thurmond
Gorton	Melcher	Trible
Gramm	Metzenbaum	Wallop
Grassley	Mitchell	Warner
Harkin	Moynihan	Weicker
Hart	Murkowski	Wilson
Hatch	Nickles	Zorinsky
Hawkins	Nunn	

The PRESIDING OFFICER. A quorum is present.

VOTE

The PRESIDING OFFICER. The question is, Is it the sense of the Senate that debate on the motion to proceed to the consideration of S. 43, a bill providing for line item veto, shall be brought to a close? The yeas and nays are automatic under the rule. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. DECONCINI. Mr. President, on this vote I have a pair with the senior Senator from Louisiana [Mr. LONG]. If I were at liberty to vote, I would vote "yea." If the senior Senator from Louisiana were present and voting, he would vote "nay." Therefore, I withhold my vote.

Mr. CRANSTON. I announce that the Senator from Louisiana [Mr. LONG] is necessarily absent.

The PRESIDING OFFICER (Mr. GRASSLEY). Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 58, nays 40, as follows:

[Rollcall Vote No. 158 Leg.]

YEAS—58

Abdnor	Gramm	Nickles
Armstrong	Grassley	Nunn
Biden	Hatch	Pell
Boren	Hawkins	Pressler
Boschwitz	Hecht	Proxmire
Chafee	Heflin	Quayle
Cochran	Heinz	Roth
Cohen	Helms	Rudman
D'Amato	Hollings	Simpson
Danforth	Humphrey	Specter
Denton	Kassebaum	Stevens
Dixon	Kasten	Symms
Dole	Kennedy	Thurmond
Domenici	Laxalt	Trible
East	Leahy	Wallop
Evans	Lugar	Warner
Exon	Mattingly	Wilson
Garn	McClure	Zorinsky
Goldwater	McConnell	
Gorton	Murkowski	

NAYS—40

Andrews	Bradley	Chiles
Baucus	Bumpers	Cranston
Bentsen	Burdick	Dodd
Bingaman	Byrd	Durenberger

Eagleton	Lautenberg	Riegle
Ford	Levin	Rockefeller
Glenn	Mathias	Sarbanes
Gore	Matsunaga	Sasser
Harkin	Melcher	Simon
Hart	Metzenbaum	Stafford
Hatfield	Mitchell	Stennis
Inouye	Moynihan	Weicker
Johnston	Packwood	
Kerry	Pryor	

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

DeConcini, for

NOT VOTING—1

Long

The PRESIDING OFFICER. On this vote, the yeas are 58, the nays are 40. Three-fifths of the Senators duly chosen and sworn not having voted in the affirmative, the motion is not agreed to.

LINE-ITEM VETO

Mr. DOLE. Mr. President, we had one live pair, so we are back to where we have been; and that is, had everybody been present, the vote would have been 59 to 41. I think we have had a fair shot at trying to proceed to this legislation. I regret that those on the other side would not let us proceed to the legislation itself and then do our battle. But the rules permit that and they have that right. I do not have any quarrel with those who have done that, except those who talk about the rules changes and then participate in the process.

But, in any event, it is a matter of particular interest to the President. I indicated to the President, in a visit this morning, that we would not get cloture. It seemed to me the die was fairly well cast. There were not enough flexible Senators and there was no way cloture would be invoked at this time. But there are maybe other ways to get a vote on the issue.

I have been supporting the line-item veto for a number of years. I am not the principal sponsor in this area, but I understand the sponsors of this legislation, the distinguished Senator from Georgia, the principal cosponsor, and the distinguished Senator from Washington, Senator EVANS, do plan to pursue this matter at another time.

In just a few moments, I will ask unanimous consent that the motion to proceed to S. 43, the line-item veto, be withdrawn, which will be followed by routine morning business until about 2 o'clock. At 2 o'clock, we will turn to the equal access to justice bill offered by Senator GRASSLEY. There will be a rollcall vote.

Following that legislation, since we are unable to get an agreement on a number of these bills, we are going to start calling up legislation today, tomorrow, and Friday without any time agreements to see if we can get some movement that way. So I suggest that there will be votes for the balance of the week. If Senators wish to avoid that, then I hope they would help us work out some of these minor details that are hanging up five or six rather minor pieces of legislation. If we could accomplish all of that without protracted debate, it is certainly satisfactory to the majority leader.

I yield to the distinguished Senator from Georgia whatever time he may need.

Mr. MATTINGLY. Mr. President, let me just assert my view that the request to withdraw the motion to proceed does not signal the end of this legislation. It is merely, really, the beginning of the next stage in this legislative battle.

The Senate, I believe, has now demonstrated to a watching public that a clear majority of its Members desire to consider the merits of the line-item veto as a budget too. That expressed will has been temporarily frustrated but I am confident that there will be an opportunity later this year for the Senate to pass the measure. I believe that the bill would pass if we were able to vote on it. Apparently that perception is shared by its opponents. The problems that we face and the people we represent demand that we not evade our responsibilities or avoid making difficult decisions.

I thank my colleagues who have supported the efforts to debate the bill. Indeed, I appreciate the contribution made by its opponents because I believe that the legislation has been clearly strengthened as a result of the rigorous examination it withstood. I encourage the continued involvement of all Senators in this critical issue and look forward to an opportunity for the proponents of the legislation to make their case for the bill at a time when it could conceivably be the pending business when offered as an amendment to another piece of legislation. Thank you, Mr. President.

Mr. EVANS. Mr. President, at the close of this third vote to end debate on the motion to proceed to S. 43, the line-item veto, I remain optimistic—optimistic on two fronts.

First, that a majority of Members of this body support this legislation granting the President item veto authority. And only through a procedural obstacle have the opponents mustered sufficient strength to keep this issue from an up-and-down vote.

During the past week I have listened with interest and anticipation to my distinguished and learned colleagues opposing the item veto—interest to learn more of their points of view and anticipation while eagerly awaiting debate. Debate never became a reality. S. 43 was stalled in its starting blocks through the use of obstructionist Senate procedure, which has not afforded this Congress the opportunity to debate the merits of this issue itself.

We have taken three votes seeking the support of 60 Senators to bring to a close this filibuster—a filibuster not on the legislation, but on the motion to proceed to this issue. Falling one vote short, we leave this issue for a brief period of time. But not without serving notice once again that some day, somehow, somewhere, we will fully debate and vote on this issue.

Mr. President, this leads me to my second sense of optimism. Events of this past week have offered a dramatic example of the desperate need to seek changes in the rules that guide Congress. I can only hope that this will help us abandon the primitive procedures that no longer work.

We have proven thus far incapable of effective budgetary action. We have missed every budget deadline so far this year, in spite of the best efforts of those who work daily in that field. Generally, the budget process is in shambles. Through the use of filibusters on motions to proceed to legislation, not the legislation itself, the majority leader can no longer set this Senate's agenda.

These examples are symbolic of a greater problem—the abuse of rules of the Senate that could ultimately bring this Government to a standstill.

At the beginning of the second session of this 99th Congress, many proposals will once again be submitted to change the way we do business. When considering these proposals, I suggest that we all remember the agonies of this past week.

Mr. CRANSTON. Will the majority leader yield briefly?

Mr. DOLE. I am happy to yield the floor.

Mr. CRANSTON and Mr. HATFIELD addressed the Chair.

The PRESIDING OFFICER. The Senator from California.

Mr. CRANSTON. Mr. President, I would briefly like to state that I am delighted that the majority leader has recognized that this is not the time when the Senate is prepared to cope with this issue. There is significant opposition to the line-item veto primarily because of the concern about undermining the power of the purse which is one of the strongest elements of the strength of this Congress. Second, there is concern about undermining the balance of powers between the executive and the legislative branches of our Government. And, third, there is a concern that this would really not lead to savings but would lead to more expenditures rather than less.

The majority leader stated that it was those on the other side that had prevented it from coming to a vote, and I trust he meant those on the other side of the issue, not on the other side of the aisle.

Mr. DOLE. I did.

Mr. CRANSTON. The majority leader confirmed that was his view.

Obviously, Republicans as well as Democrats did not wish to see the line-item veto become the law of the land.

I thank the majority leader.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, having created this particular situation and with no apology for having done so, but with great pride, from that standpoint we have stopped what was to be one of the most dangerous proposals that has come before this Senate during my 19 years. I believe in always laying my cards face up on the floor, on the table, or wherever I may be. Since I am on the floor now, I guess I would lay them on the floor. But I want to say to the leadership—and I want to say to the opponents—that I am very happy the leadership has pulled this down.

I have heard the proponents indicate they will use every appropriation, some appropriation, whatever, or some other bill. I would like to say to the leadership now particularly that I feel just as strongly about this issue as I did. In fact, we stood here for 5 days and offered to debate it with any proponent, and no proponent of the measure ever appeared on the floor to debate it except under special order of business. We have had ample opportunity to have a debate on this issue. I do not look forward to seeing the appropriations bills being made the vehicle for nongermane items, nor certainly subject to a point of order as we have gone through that circus before with abortion, school prayer, and a few other issues. I only remind my colleagues here that we are reaching the end of the fiscal year. We do not have a budget resolution. I think the country expects the Senate to be about the business that affects this country most vitally. The line-item veto is not one of them.

I do not think there is a Senator on this floor amongst the proponents or the opponents who believes if somehow the Senate got to a vote up-or-down on the line-item veto and it happened to pass the Senate that it would get through the House of Representatives. We are in an exercise of futility to waste any more of the Senate's time on this issue. That should have been proven by now. It was not 59 to 41. We never would have gotten beyond the 59 measure because there would have been those Senators who would not have permitted that to happen. So let us not suffer any illusions about what the strength or the weakness of this issue is. This issue will not pass on this floor.

I want to say as one Senator only, if I have to stand here as one person, I will fight it on every issue, and bring any matter pending before the Senate to a halt in order to stop this so-called mad piece of legislation of trying to throw the whole balance of power of this Constitution out of kilter. I just want to make it very clear I am ready to go to battle at any time, and I am ready to go to debate at any time. But as far as I am concerned we are not going to have that opportunity on this floor, and I am exercising the prerogatives of the Senate under the rules of the Senate. Let me say to the leader I would vote to change this rule. I would be the first to change this rule. But as long it is the rule of the Senate I am going to exercise every legitimate rule of the Senate and every procedure of the Senate I can to stop the line-item veto.

There is only one prerogative that a chairman of a committee has. If we do not have a budget resolution, we may not have an appropriation bill. I have only one prerogative—to call a meeting of the Appropriations. And I can assure the Senate if we look toward to seeing that appropriation bill being used as a vehicle, I may not even call a meeting and report any bill.

So I want to make it clear that on this battle, if they want to wage it down the line, I am ready to do battle any time. I feel just as strongly, and will wage every bit of effort I can against this measure.

I thank the Senator.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. Mr. President, I have stated I have cleared the request which I will make in just a moment with the distinguished minority leader, Senator BYRD.

Again, I thank Members on both sides of the issue. I did not intend to differentiate by party lines. Of course, the great proportion of the no votes came from the Democratic side. I think there were seven Republicans. That left 46 voting in the affirmative. But in any event, I understand there are strongly held views on this issue.

But I do wish to commend particularly the distinguished Senator from Georgia, Senator MATTINGLY, and the distinguished Senator from Washington, Senator EVANS, for their persistence, and also thank the President for his support. The President did not prevail on this issue. But he was unrelenting in his effort. He made a number of telephone calls. In fact, he commented on this legislation briefly again this morning.

I also want to include special thanks to the distinguished Senator from Delaware, Senator BIDEN. I just say that this is a very difficult issue. There are very strongly held views. There are some on each side of the aisle with differing views. I assume that if Senators MATTINGLY, BIDEN, and EVANS, and others decide to raise the issue later that they will find some opportunity. I think the record speaks for itself. The vote was 58 to 40 today. It only requires, depending on how many are here, 51 to pass the legislation. So at least on the record it would indicate there are sufficient votes to pass this legislation. Maybe some would slip away. Maybe some would not. There was never any real reason to debate the bill. The bill was never before us. Had the bill been before us I assume there would have been a number of proponents on the Senate floor making their views heard.

THE PEOPLE WON AGAIN

Mr. BYRD. Mr. President, the people won again today when cloture was not adopted on the motion to proceed to the consideration of S. 43.

Some have argued that the Senate should have adopted the motion to proceed so that Senators could then debate the bill.

Some Senators asserted that an extended debate or filibuster, whatever one wants to call it, on a motion to proceed is not the norm around here and that any debate on the bill should await adoption of the motion to proceed. I must say that a filibuster on a motion to proceed is not unique.

I have asked the Journal Clerk to supply statistics on instances going back 20 or 25 years involving filibusters on motions to proceed.

The Journal Clerk has prepared that information; and, I ask unanimous consent to have printed in the RECORD a list of motions to proceed that have been filibustered, going back 25 years—to and including 1961.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MOTIONS TO PROCEED TO CONSIDER

1961

S. Res. 4 (rule XXII—cloture).
Mansfield motion to proceed.
Cloture not invoked on motion to proceed (37–43).
Motion to proceed laid on the table (47–35).

1965

H.R. 77 (National Labor Relations Act).
Mansfield motion to proceed.
Cloture not invoked on motion to proceed (45–47).

1967

S. Res. 6 (rule XXII—cloture).
McGovern motion to proceed.
Cloture not invoked on motion to proceed (53–46).
Resolution laid on table.

1969

S. Res. 6 (rule XXII—cloture).
Hart of Michigan motion to proceed.
Cloture not invoked on motion to proceed (50–42).
Resolution laid on table.

1971

S. Res. 6 (rule XXII—cloture).
Pearson motion to proceed.
Cloture not invoked on motion to proceed (48–37).

Cloture not invoked on motion to proceed (50-36).
Cloture not invoked on motion to proceed (48-36).
Cloture not invoked on motion to proceed (55-39).
Motion to proceed indefinitely postponed.

1975

S. Res. 4 (rule XXII—cloture).
Pearson (and Mondale) motion to proceed.
Cloture invoked on motion to proceed (73-21).
Motion to proceed agreed to (69-26).
Cloture invoked on resolution (73-21).
Resolution agreed to (56-27).
H.R. 6219 (voting rights).
Mansfield motion to proceed.
Cloture invoked on motion to proceed (72-19).
Motion to proceed agreed to (63-13).
Cloture invoked on bill (76-20).
Bill passed (77-12).
S. Res. 145 (disapproval of President's removal of price controls on petroleum, etc.).
Mansfield motion to proceed.
Cloture not invoked on motion to proceed (54-38).
Resolution laid on the table.
H.R. 5900 (Labor Relations Act).
Mansfield motion to proceed.
Cloture invoked on motion to proceed (66-30).
Cloture not invoked on bill (58-31).
Cloture invoked on bill (62-37).
Bill passed (52-45).
H.R. 10647 (supplemental appropriations).
Mansfield motion to proceed.
Cloture petition filed on motion to proceed.
Additional cloture petition filed on motion to proceed.
Cloture petitions vitiated by unanimous consent.
Bill considered by unanimous consent.
Bill passed (71-24).

1978

H.J. Res. 638 (Equal Rights Amendment Extension).
RC Byrd motion to proceed.
RC Byrd files cloture on motion to proceed.
RC Byrd withdraws motion to proceed.
Weicker motion to proceed.
Senate adjourns—motion dies.
RC Byrd motion to proceed agreed to (voice vote).
Joint Resolution passed (60-36).
S. 3279 (Aircraft Noise).
RC Byrd motion to proceed.
RC Byrd files cloture on motion to proceed.
RC Byrd withdraws motion to proceed.
(Bill not considered).

1980

H.R. 5200 (Fair Housing).
RC Byrd motion to proceed.
Cloture invoked on motion to proceed (62-32).
Cloture not invoked on bill (54-43).
Bill returned to Calendar.

1982

S. 1630 (Criminal Code).
Baker motion to proceed.
Cloture not invoked on motion to proceed (45-46).
Motion to proceed withdrawn.
S. 1992 (Voting Rights).
Stevens (for Baker) motion to proceed.
Cloture invoked on motion to proceed (86-8).
House companion bill passed (85-8).
H.R. 6211 (Highways).
Baker motion to proceed.
Cloture invoked on motion to proceed (75-13).
Bill passed (56-34).

1983

S. 602 (Radio Marti).
Baker motion to proceed.
Cloture invoked on motion to proceed (62-33).
Bill passed (voice vote).
H.R. 3706 (Martin Luther King, Jr. Holiday).
Baker motion to proceed.
Cloture filed on motion to proceed.
Withdrew cloture motion by U.C.
Motion to proceed withdrawn.
Bill considered by U.C.
Bill passed (78-22).
S. 1715 (Natural Gas).
Baker motion to proceed.
Cloture invoked on motion to proceed (86-7).
Bill returned to Calendar by U.C.
H.J. Res. 290 (Free Entry of Olympiad Effects).
Baker motion to proceed.
Cloture motion filed on motion to proceed.
Cloture motion withdrawn by U.C.
Joint Resolution considered by U.C.
Joint Resolution passed (voice vote).

1984

S. 2851 (Depository Institutions).
Baker motion to proceed.
Cloture invoked on motion to proceed (89-3).
Motion to proceed agreed to (95-2).
Cloture invoked on bill (95-6).
Bill passed (89-5).
S. Res. 66 (Senate T.V.).
Baker motion to proceed.
Cloture invoked on motion to proceed (73-26).
Motion to proceed agreed to (67-32).
Cloture not invoked on resolution (37-44).
Resolution returned to Calendar by U.C.
S. 2527 (Highways).
Baker motion to proceed.
Cloture invoked on motion to proceed (70-12).
Motion to proceed agreed to (voice vote).
Cloture motion filed on bill.
Cloture motion withdrawn.
Bill did not reach 3rd reading.

Mr. BYRD. Mr. President, I congratulate the distinguished Senator from Oregon [Mr. HATFIELD], who led the opposition to the motion to proceed to S. 43. I wish to assure him that I will join him if efforts are made to offer the line-item veto as an amendment to any appropriations bill.

I think Senator HATFIELD is entirely correct: The appropriations bills should not be subjected to this legislation, and a point of order should lie against such an effort, because it would constitute legislation on an appropriations bill.

Mr. President, from time to time in the past few days I have alluded to this bill, S. 43, as a so-called line-item veto bill, and I indicated that at some point I would state my reasons for referring to it as a so-called line-item veto.

S. 43, in fact, did not provide for a line-item veto in its purest form. I have to say that I believe that any effort by statute to provide a line-item veto to the President in its raw and pure form would be unconstitutional. I think that only a constitutional amendment could give a line-item veto power to the President. S. 43 would not do that. It would not give the President a line-item veto in the pure form.

The content of the bill is set forth in the bill as follows:

* * * to provide that each item of any general or special appropriation bill and any bill on joint resolution making supplemental, deficiency, or continuing appropriations that is agreed to by both Houses of the Congress in the same form shall be enrolled as a separate bill or joint resolution for presentation to the President. . . .

It is obvious from this reading of the purpose of the bill, as I have just stated, that if the bill had been enacted into law, it would not have given to the President a line-item veto. It does not say that the President may take an appropriations bill and may elect to strike any sentence, any figure, any paragraph, any language, any verbiage that he may choose to strike. S. 43 does not say that. If it did have that specific language then it would be the line-item veto.

The Consitution provides for the President to have a qualified veto power. He can veto any bill or joint resolution. But he cannot pick and choose from a bill and say: "I will take this line and I will strike out line so and so. I will strike out lines, let us say, 10 and 11 on page 2. I will also strike lines 4, 5, 6, and 7 on page 3, and I will strike out all of page 4. I will strike out title 1, section 10," and so on. He cannot do that. He has to take it all or leave it all. The ability to pick and choose as I have outlined would be the pure line-item veto. S. 43 does not purport to give such power to the President. I know that Senators have been talking about a line-item veto, and I have as well, although I usually have referred to a so-called line-item veto in my comments on S. 43.

What that bill actually would do is it would require the enrolling clerk of the House take an appropriation bill as passed by both Houses and break that bill into several parts, the number depending on what the enrolling clerk finds in the bill. The enrolling clerk, being mandated by this legislation were it to pass, would break down an appropriations bill into as many parts as have numbered sections and unnumbered paragraphs.

The several small parts would then be enrolled as separate bills and sent to the President. So that the President, in the case of the continuing resolution last year, would receive more than 2,000—I think 2,047—little bills or resolutions, that being the number of numbered sections and unnumbered paragraphs within last year's continuing resolution.

I am right, am I not, I ask the Chair? I have reference to the continuing resolution that was passed last September, I believe. Am I correct, that that piece of legislation could have been broken into 2,047 parts, or at least over 2,000 parts?

The PRESIDING OFFICER. The Chair is advised that the number is 2,043.

Mr. BYRD. I thank the Chair. The enrolling clerk of the House having done his work, more than 2,000 little bills would then have been sent to the President, and each would carry a number: H.R. 1-A, H.R. 1-B, H.R. 1-C, and so forth—heaven only knows.

The President then would be able to exercise the veto power—which he has now under the Constitution on entire bills—on any one, or more, or all of those little bills or resolutions resulting from the dismemberment, limb by limb, of the continuing resolution which had earlier passed both Houses.

That action, in the judgment of many of us, would not comport with the requirements of the Constitution. Why not? Because section 7 of article I of the Constitution, paragraph 2 reads as follows:

> Every Bill which shall have passed the House of Representatives and the Senate, shall, before it become a Law, be presented to the President of the United States; if he approve he shall sign it, but if not he shall return it, . . .

And so forth.

For the enrolling clerk to have broken that bill or resolution, which had actually passed both bodies, down into 2 parts or 3 or 100 or several hundred or thousands of parts and enrolled as separate bills for the President's signature or veto would not comport with the requirements of section 7, paragraph 2 of article I of the Constitution, which says, "Every Bill which shall have passed the House of Representatives and the Senate, shall, before it becomes a law, be presented to the President. . . ." Paragraph 3, section 7, article 1 provides the same requirements for:

> Every Order, Resolution, or Vote to which the Concurrence of the Senate and House of Representatives may be necessary (except on a question of Adjournment) shall be presented to the President of the United States;

And so on.

The constitutional requirement is that not just one bill or another may be presented to the President, but "every" bill and every resolution which shall have passed both bodies "shall" be presented to the President.

But to break down a bill, such as the continuing resolution of last fall to which I was referring into 2,043 parts and have the enrolling clerk prepare 2,043 separate resolutions or bills to send to the President simply would not comport with the provisions of the U.S. Constitution, because not one of those little dismembered pieces of legislation would have ever passed either or both Houses. However, the enrolling clerk might have styled them, not one of those little bills or resolutions would have ever "passed" either House, to say nothing of both Houses. They would simply have been enrolled as several separate and distinct bills and given each a number by the enrolling clerk of the House of Representatives under the instructions of S. 43. They would have been given several and distinct numbers by that enrolling clerk and sent to the President.

Neither the House nor the Senate would have acted upon any one of those separate little measures before their presentation to the President.

So to sum up, Mr. President, S. 43 really would not give the real line-item veto to the President of the United States. S. 43 would provide that appropriations bills should be broken up into many parts by the enrolling clerk of the House of Representatives, enrolled and sent as separate different bills to the President, and then, of course, he could pick and choose which of those he wanted to approve and which of those he wanted to veto. That is it.

So in that sense, I think, S. 43 would have been unconstitutional because the requirements of the Constitution in regard to the passage of bills and resolutions would not have been met. Indeed, S. 43 did not purport to give the President the pure line item veto power with respect to appropriations bills and resolutions passed by both Houses of Congress.

Mr. President, I compliment those on both sides of the aisle and those on both sides of the question. I do especially compliment Mr. HATFIELD for his leadership again, and I compliment Mr. CRANSTON on the excellent work that he did in keeping tab on this side regarding the votes.

We will be waiting and ready at the pass if there is any other effort this year or next year. If the President is going to be given the line item veto power, it should be done by constitutional amendment. I am not now saying I would support that effort, but that is the way to go if it should be done.

In closing, I say that the Senate was correct in rejecting, as it did, the motion to close debate on the motion to proceed to take up S. 43. The Senate was constitutionally correct, institutionally correct and it correctly protected the interests of the people who sent us here to do that very thing.

I congratulate, in closing, those Senators on the Republican side of the aisle who joined in supporting Senator HATFIELD's successful effort. It was not easy for them to stand firm against the White House pressure for cloture.

Mr. President, I ask unanimous consent that a column in the Washington Post by David S. Broder, under instant date titled "Where Reagan is No Conservative" be printed in the RECORD at the close of my remarks.

There being no objection, the column was ordered to be printed in the RECORD, as follows:

WHERE REAGAN IS NO CONSERVATIVE

Should President Reagan be given the power he is seeking to veto individual items in spending bills passed by Congress? Today, he must veto, or threaten to veto, an entire appropriation bill to get at specific provisions he finds objectionable. Would an item veto give him a more effective weapon to reduce the deficit?

As a believer in the federal system, I was strongly inclined, by the example of 43 states that give their governors the item-veto power, to think the president should have similar authority. But as I began studying the issue, arguments from fiscal and constitutional conservatives made me understand this is not the simple proposition it seems.

The Senate opponents of the measure include two southern Democrats, Howell Heflin of Alabama and John Stennis of Mississippi, who served as judges in their states and are as consistent in their conservative interpretations of the Constitution as any two men in Congress. When Stennis says, as he did in debate last week, that giving this power to the president "would gradually destroy the legislative branch of this government," it is not prudent to disregard the argument.

The same thing is true about one of the most vocal opponents of the companion House measure, Rep. Mickey Edwards (R-Okla.). Edwards, a former law professor, has headed the American Conservative Union and is a longtime supporter of Reagan's. The last thing in the world he wants to do so thwart Ronald Reagan, but he has been conducting a furious correspondence and lobbying campaign with fellow-Republicans to persuade them that the line-item veto is a real Trojan horse.

Of course, presidents already have the power to veto appropriation bills, as they do any other form of legislation. But they must veto the whole bill and risk being overridden if two-thirds of the senators and representatives are persuaded that the bill, on balance, is a good one.

But if the president can single out an individual item in the comprehensive appropriation bill for veto, he is taking on only those legislators with a special interest in that item.

In Edwards' view, that "shifts the president's power from the level of persuasion to the level of blackmail." One of Edwards' arguments is that a future Democratic President—a Gary Hart, say—could use an item-veto to kill the MX missile or B-1 bomber program and could make the veto stick even if all 435 House members and 64 of the 100 senators thought that decision risked the nation's security.

For those who don't see great likelihood of a liberal Democrat's succeeding Reagan in the White House, Edwards appeals to the traditional legislative sense of power and prerogative.

And here, he and the more liberal Republicans such as Mark Hatfield of Oregon and Charles McC. Mathias of Maryland, who are leading the Senate opposition to Reagan's request, are certainly on sound political and constitutional ground.

Mathias provided an example in debate of what the shift might mean in his case. "For example," he said, "if President Reagan does not like my position on the issue of school prayer, and if he acquires the power to kill funds for the program that I have long supported to save the Chesapeake Bay . . . then the president . . . has a hostage.

"He can hold the Chesapeake for the ransom of my support . . . for state-sponsored prayer in school or any other subject that he might want my support on. . . . In my opinion it would destroy the balance that exists between . . . the executive and legislative branches."

That it would shift power is unquestionably correct. Whether the critics are right in saying it would "destroy the balance" and cripple the legislative branch is considerably less clear.

Oklahoma's governor has the item-veto power, backed by a requirement for a balance state budget, and yet Edwards concedes that its Legislature is hardly a toothless, enfeebled institution.

When Hatfield, a former governor of Oregon, was expounding on the "mischief" a presidential item-veto could bring, his Republican colleague Dan Evans, a former governor of neighboring Washington, said it hardly seemed "radical" to him for the national government to do what 43 states already do.

It is a close question, in my view. Experience might show that the item-veto power is no more malign in the hands of a president than it has been for governors. But these are not ordinary times. We have a budget deficit crisis and any president given this new power would be tempted to use it, as Hatfield said, for "radical" surgery. Much as I believe that the deficit needs to be cut, I am not convinced that it would be wise policy or healthy precedent for Reagan to be given a greater degree of unilateral power to determine how the cutting is done.

On balance, I think it best that he be forced to negotiate those decisions with Congress—and Congress with him—as the makers of the Constitution intended. On this issue, I think the conservatives are right, and Reagan is not voicing the conservative position.

LINE-ITEM VETO

Mr. DOLE. Mr. President, I have indicated that the line-item veto issue will remain with us, even though we did not succeed in proceeding to the bill on this occasion. But I want to take this opportunity to thank the distinguished Senator from Georgia, Senator MACK MATTINGLY, for his outstanding leadership on the issue.

It was Senator MATTINGLY who pursued the question of the line-item veto in the 98th Congress, and it was he who developed the concept of a 2-year legislative trial of the procedure by changing the definition of what constitutes an appropriation "bill" which the President may sign or reject. As a member of the Rules Committee, I was pleased to work with MACK MATTINGLY on his proposal, S. 43, and to help clear the way for the Rules Committee to consider the proposal. It is regrettable that the committee could not have given a favorable recommendation—but this battle is far from over.

Mr. President, Senator MATTINGLY understands the importance of the item veto as it relates to our budget problems. We simply cannot afford to pass up any new tool that can help us in the fight to reduce spending and budget deficits. The line-item veto is a very important tool in that fight, and I will continue working with Senator MATTINGLY to secure passage of this important proposal. I believe we—and he—ultimately will prevail, and I know President Reagan very much appreciates our efforts.

UNANIMOUS-CONSENT REQUEST TO WITHDRAW S. 43

Mr. DOLE. Mr. President, I ask unanimous consent that the motion to proceed to S. 43, the line-item veto, be withdrawn.

The PRESIDING OFFICER (Mr. MCCONNELL). Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business not to extend beyond the hour of 2 p.m. with statements limited therein to 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

AGENDA

Mr. DOLE. Mr. President, we had a meeting with the President this morning at the White House. I thought I might give a brief report to my colleagues because we discussed what might be accomplished between now and the commencement of the so-called August recess.

The President's remarks were primarily directed at the budget, and his strong plea that we get a budget. That means a budget resolution. That means an agreement between Republicans, Democrats, House-Senate conferees, and he would like to have that done and out of here before we leave on the 2d of August. The President started off with that statement. It was discussed throughout the meeting with all of my colleagues who were there at the White House and the President ended on that note. So I think there is not much question about the President's feeling about the budget deficit. He also indicated that we should try to pass the farm bill before we leave on August 2. That is a view with which I strongly agree.

Many of us in wheat-producing States are getting a little frustrated about not knowing what the program is before the wheat is planted. There is still some hope that the Agriculture Committee can report out a bill if we can get consent to meet, which I understand is being objected to by the other side of the aisle. The farm bill is a matter of priority with the President of the United States. The American farmer deserves better than we are giving him by not passing a bill. We should have an opportunity to meet, report out a bill, do it today, bring it up tomorrow, and start the debate. So I hope there will be no further foot-dragging by either party, members of the committee on either side, thereby not permitting the Senate Agriculture Committee to meet.

In addition, the President mentioned the DOD authorization bill. I understand from the distinguished chairman of the committee and a member of the conference, Senator GOLDWATER, that what he thought was the likelihood of completion is now marginal. But if that could be completed, it would be very helpful.

Then there is the supplemental appropriations bill, which includes humanitarian aid for Nicaragua, funds for water projects, and literally hundreds of other items. We were advised, which came as a surprise to me and I think as a surprise to the distinguished chairman of the Appropriations Committee, that it is being held up because the Senate added 341 amendments. I find that hard to believe but I will check that with the distinguished chairman of the Appropriations Committee, Senator HATFIELD, That is the reason being given by the chairman of the House Appropriations Committee for not going to conference, that it was so loaded with amendments that it takes a while to sift through them. I assume if there were that many amendments, they must have been technical in nature, not substantive.

In any event, that may be the problem.

The President would like to complete action on that particular item, however.

That was, in essence, the conversation. The President looks good. He obviously has lost some weight. His voice is not quite as strong as it was. But it has only been 10 days since major surgery. I think everyone there probably agreed that he has had a remarkable recovery. Everyone there, Democrat and Republican, including the distinguished leader on the other side, wished the President well and wanted him to get well. We can argue about the issues when he gets to feeling better. We did not argue today. It was more of a pleasant exchange. It was a very good visit, lasting about 1 hour.

Mr. President, as I indicated before, it will be our intention at approximately 2 o'clock to turn to an original bill by Senator GRASSLEY dealing with equal access to justice. A rollcall vote is expected on final passage of the Grassley bill.

That will be followed either by the FTC authorization or by the Consumer Products Safety authorization bill, which should commence, hopefully, by 3 o'clock. I am not certain how long those matters will take.

We will announce this afternoon what our intention will be for tomorrow and Friday and what bills we hope to call up.

Mr. President, I noted the distinguished chairman of the Appropriations Committee is on the floor and has confirmed the suspicion I had, that the reference to 341 amendments is grossly overstated. In fact, they are technical, as I indicated. There is progress on the conference and that legislation may be before us before the week is out, I understand.

Mr. HATFIELD. Yes.

If the leader will yield, I will respond to the leader that there is a meeting going on after we finally got the House of Representatives to agree to appoint conferees, which was long delayed. We were ready to do business in the Senate shortly after we passed the supplemental. The House finally agreed to appoint conferees.

We came together in our first session the day before yesterday. We outlined the job at hand. We set the procedure in place to finish up that work. We hope to have a meeting this afternoon. Subcommittees have been meeting between the two Chambers. We expect to complete the supplemental by the end of the week. I believe we can move as well on the fiscal year 1986 bill. We had markups yesterday and we will have them again today and tomorrow. I will say to the leader we should have at least two of the fiscal year 1986 bills reported to the floor before the recess, perhaps three, and we will have completed the supplemental as well.

Mr. DOLE. I thank the chairman of the Appropriations Committee. At least we are planning on two and possibly three appropriations bills next week on our schedule.

Mr. BYRD. Mr. President, I understood the distinguished majority leader to state that he could not say when to expect the farm bill, but the Agriculture Committee had made a request to meet. At what time?

Mr. DOLE. Three o'clock.

Mr. BYRD. Has it been cleared on the side of the majority leader?

Mr. DOLE. Yes.

Mr. BYRD. I know it was cleared over here yesterday or the day before for action on one of those days.

Mr. DOLE. There was an earlier objection and when they discovered that Senator HELMS had to go to the hospital, they took off their objection.

Mr. BYRD. I would not describe it as that. It can be cleared on this side for the afternoon, I believe. I will check that.

Mr. DOLE. I hope we can clear it because we would like to proceed.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ANDREWS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. (Mr. COCHRAN). Without objection, it is so ordered.

AUTHORITY FOR COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY TO MEET

Mr. ANDREWS. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be authorized to meet during the session of the Senate on Wednesday, July 24, between the hours of 3 p.m. and 5 p.m. to mark up S. 616, the Farm bill and related issues.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, there is no objection on this side, I am happy to say.

Mr. ANDREWS. We appreciate that, I am happy to say to the Democratic leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ANDREWS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

TRIBUTE TO SENATOR MARK O. HATFIELD

Mr. WEICKER. I rise at this point to pay a special tribute to my chairman on the Appropriations Committee and dear friend, MARK HATFIELD.

His handling of the issue before us is indicative of both his political skills and the quality of the man. He grabbed onto an issue that few were eager to fight. He marshaled a formidable case against it and responsibly used the tools of the legislative process to carry the day. Throughout this debate he has been thoughtful, persuasive, and unfailingly gracious to ally and opponent alike. As such, this debate has been vintage HATFIELD.

Mr. President, in a word, he is the model of how a Senator should conduct himself in the best traditions of this body. I thank him and commend him for his leadership on this matter.

THE PLIGHT OF SOVIET JEWRY

Mr. TRIBLE. Mr. President, I rise today to draw attention to the ongoing persecution of Jews by the Soviet Union and its client states.

For years now, the Call to Conscience has served to remind the world that freedom is under assault in the Soviet Union. The fundamental right to worship God is under attack by the Soviet state. Jews who seek only to practice their faith suffer a wide range of abuses, ranging from simple harassment to outright imprisonment.

Persecution of this sort is an affront to the human conscience. It is an example of the manner in which the Soviets use fear as a tool of Government. It is also a forceful rebuke to those who would argue that the Soviet Union is "just like us."

The Soviets' oppression of the Jews is particularly poignant at this time. On August 1, we will mark the 10th anniversary of the signing of the Helsinki accords. With this agreement, the Soviets pledged to respect the rights of religious expression and free emigration. This was a solemn promise on the part of the Soviets, but it has been broken time and time again.

Jewish emigration from the Soviet Union remains at precipitously low levels, and the ranks of refuseniks in the U.S.S.R. continue to swell. Moreover, the Soviets are waging a growing campaign of anti-Semitism, and individual Jews continue to be singled out for particularly harsh punishment.

Let me cite just two examples. In December 1984, Uli Edelshtein was sentenced to 3 years in prison camp after being charged with illegal drug trafficking. Edelshtein had earlier applied unsuccessfully to emigrate to Israel; he is said to have irritated Soviet authorities further by teaching Hebrew without official authorization.

Also in December 1984, Yosef Bernstein was sentenced to 4 years in prison for allegedly resisting arrest. Yet, his sole offense was his persistent effort over the past 5 years to emigrate to Israel with his wife, Faina. He is reported to have suffered severe damage to one eye after being attacked by two other inmates upon his arrival at prison.

These are but 2 of the estimated 2½ million Jews in the Soviet Union, all of whom are subject to the hostility of the Soviet regime. The United States and other free nations must make every effort to ease the plight of the Soviet Jews.

The upcoming summit meeting between President Reagan and the Soviet leadership offers an opportunity to address this urgent issue. Recently, I and many of my colleagues wrote to the President asking that, during his meetings with Mikhail Gorbachev and others, he question the Soviets' continued persecution of the Jews and press for the freedom of Edelshtein, Bernstein, and other prisoners of conscience. It is imperative that we pressure the U.S.S.R. to halt this heinous practice, and I ask unanimous consent

that a copy of the letter to President Reagan be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, DC, July 19, 1985.

President RONALD REAGAN,
The White House,
Washington, DC

DEAR MR. PRESIDENT: We urge you to take advantage of your upcoming summit meeting with Mikhail Gorbachev to address the Soviets' persecution of Jews, Christians, and other religious believers.

As you know, the Soviet Union's attempts to suppress religious activities have been unrelenting. Despite its participation in the Helsinki Accords and other international human rights agreements, the U.S.S.R. steadfastly opposes most expressions of religious faith.

Repression by Soviet authorities not only limits the opportunity for worship, but also severely restricts access to religious instruction and religious texts. Moreover, the Sovets continue to imprison believers solely for practicing their faith.

The upcoming Soviet-American summit offers an opportunity to express America's outrage over the anti-religious policies of the U.S.S.R. In this, his first meeting with an American President, Mr. Gorbachev must be made aware that our commitment to religious freedom for people everywhere remains strong and steadfast.

The ongoing plight of Andrei Sakharov and Anatoly Shcharansky bears witness to the Soviets' hostility toward religion. So, too, does the persecution of Uli Edelshtein, Yosef Bernstein, Balys Gajauskas, Anna Chertkova, and countless others.

The release of these and other prisoners of conscience would be a welcome step toward improving Soviet-American relations. We urge you, during your meetings with Mr. Gorbachev, to press vigorously for these and other prisoners' freedom, and to argue for an end to Soviet persecution of all religious believers.

We pledge you our support in this important task.

Dick Lugar, Paul Trible, Rudy Boschwitz, Jeremiah Denton, Warren B. Rudman, Mack Mattingly, J. J. Exon, Steve Symms, Don Nickles, Frank H. Murkowski, Gary Hart, Lawton Chiles, Strom Thurmond, Thad Cochran, David L. Boren, Paul Sarbanes, Frank R. Lautenberg, Dave Durenberger, Larry Pressler, Albert Gore, Jr.

A GREAT DAY OF CELEBRATION—JULY 24

Mr. HATCH. Mr. President, Utah is a unique State in that it recognizes two significant dates in its history: Admittance to the Union as the 45th State on January 4, 1896, and the founding of the Salt Lake Valley and subsequent settling by the Mormon pioneers on July 24, 1847.

I am sure most of you are familiar with the story of the Mormon pioneers; it is a remarkable one. It is a story of extreme hardship and difficulty endured by a people who were persecuted for their religious beliefs. In a country founded upon and governed by principles of freedom and opportunity, the Mormons were forced by those who hated them to seek a better life elsewhere.

It was autumn in 1846 when the Mormons first began their preparations for the 1,000-mile trek across the plains from Missouri to the western frontier. Under the guidance of their capable leader, Brigham Young, they sought refuge in the isolated, desolate desert far from their enemies. They left under adverse circumstances and the journey was a long, difficult one. The winter was bitter and costly for many of those early pioneers, yet they continued to forge on—many with their families and loved ones buried behind them.

In April 1847, Brigham Young set out in search of a settling place with an advance party consisting of 143 men and 3 women, and some 70 wagons, 90 horses, 52 mules, 66 oxen, 19 cows, and dogs, chickens, seed, implements, and a 6-pound cannon. And, on July 23, Brigham Young ventured from the trail to a point of elevation where he could view the Great Basin of Salt Lake. It was there that he gazed into the barren, desolate, desert land which he predicted would one day rise to prominence in the West and blossom as the rose and declared, "Enough. This is the place. Drive on." One day later the pioneers entered the Salt Lake Valley.

Today, Salt Lake is Utah's capital and largest city and it is considered the "crossroads of the west." It is a thriving vibrant business and family community, and that same pioneer spirit which was first manifest in the 1840's has been kept alive for 138 years and is still present today. Salt Lake and its surrounding valley stand as a monument to the early pioneers who sacrificed to secure religious freedom and the chance to live their lives free from persecution and religious intolerance.

July 24 is a great day of celebration in Utah and it is also a day to celebrate for me personally. You see, my ancestors were some of the early pioneers in Utah, themselves having endured much hardship in settling the valley—and it is also the day my parents were married 62 years ago in 1923.

S. 1486—INTRODUCTION OF THE EQUAL COMMERCIAL CREDIT

Mr. DURENBERGER. Mr. President, when I introduced the Economic Equity Act on May 20, 1985, I did so with a strong commitment to eliminate barriers which limit women's full participation in our society. The bill being introduced today represents a perfect example of the historical purpose for the Economic Equity Act.

Mr. President, the purpose and intent of the Equal Credit Opportunity of 1972 was to make credit equally available to all credit customers free of discrimination on the basis of sex, race or marital status. Business and commercial credit transactions were not exempted from the law. Despite the existence of the Equal Credit Opportunity Act of 1972 misinterpretation of current law creates barriers which limit talented women, who possess the potential to be successful, tax paying citizens. In some cases a woman is still required to produce a spouse to participate in the process even when the woman clearly has established sufficient collateral and meets all other financial requirements. Still others are encouraged to remain dependent on their spouses and in some cases remain dependent on the Federal welfare system. I am pleased to see organizations such as Minnesota based, Women's Economic Development Corp., a private nonprofit organization providing a vehicle for women entrepreneurs to develop, refine and pursue their own businesses. Through WEDCO hundreds of women have profited from its resources.

The Equal Credit Opportunity Act of 1972 should provide equal protections for women however, commercial and business loans do not appear to provide those protections as they are currently interpreted. The Equal Credit Opportunity Act of 1972, prohibits a creditor from asking about an applicant's sex, race, color, and national origin. It also restricts creditors from asking an applicant personal questions unrelated to the specific merits of the loan and which specifically discriminate against women. The act restricts a creditor's ability to seek information about an applicant's spouse and assures that each credit worthy individual can obtain separate credit. Current law prohibits discrimination and sets forth penalties against such practices.

Currently, 11 different agencies have enforcement of the act with respect to the lenders they ordinarily regulate. The Federal Trade Commission enforces the act with respect to lenders not specifically assigned to one of the other agencies. Those agencies include: The Board of Governors of the Federal Reserve System, Securities and Exchange Commission, National Credit Union Administration, Department of Agriculture, Federal Deposit Insurance Corporation, Federal Home Loan Bank Board, the Small Business Administration, and others. This bill makes it explicit that a double standard one for "businessmen" and one for "women" is unacceptable and contrary to congressional intent.

This bill amends the Equal Credit Opportunity Act to clarify its application to business and commercial loans. It will make explicit that rules should be applied by a uniform standard without regard to sex, race, or marital

status. This measure will make a significant impact in ending the barriers which render women as second class citizens under the law. Women who demonstrate talent and ability should be given the opportunity for self-sufficiency. The Government should not support a system which promotes discrimination or dependency in any form.

Mr. President, I commend Senator DOLE for chief sponsorship of this separate provision of the Economic Equity Act.

SPACE EXPLORATION DAY

Mr. GLENN. Mr. President, I am pleased to recognize the contributions of so many individuals who have devoted time and effort to a movement which most people today take for granted—that of space flight. In this age of the space shuttle we should remember that it was not too long ago when getting a small rocket launched was a major event. Thus, recognizing today as "Space Exploration Day" is fitting and very important to past achievement in this area.

For those of us who were involved so deeply at the beginning of humankind's space venture, it is gratifying that we have come so far so fast. Our task with regard to future space venture should include its usage for enhancing our ability to do scientific research, to locate natural resources, to communicate with others on this globe, to understand and predict natural phenomena, and to make materials with properties not achievable on Earth.

But this exploitation of space, important as it is, is not the only reason for a strong space program. For all of us who care about space, it represents the modern frontier for national adventure, for extending man's reach into the unknown, and for getting closer to answering the ultimate question.

While it is tempting to completely romanticize space activities, it is important to recognize that space has its practical applications as well. In an age of budget and resource limitations, we must be hardheaded about our goals and the costs entailed in reaching them. Space activity should be a goal of enhancing our physical, intellectual, and material progress.

If the United States is to maintain its high standing in space exploration and competition, we shall need imaginative leadership to solidify and extend previous gains. We must be clear as to what our goals are, and we must develop the infrastructure to reach those goals. That will include continuing substantial support for basic research and development, an activity that will aid not only our space program, but our economic competitive position in the world.

I wish to congratulate those people who have contributed to a successful air and space program, and challenge those who aspire to be tomorrow's aviation and space pioneers to reach for new levels of achievement that will make the next quarter century as exciting as the past one.

A TRIBUTE TO MARION "SIS" GRANT

Mr. HEFLIN. Mr. President, I would like to take this opportunity to share with my colleagues the story of a remarkable woman. I am talking about the late Marion "Sis" Bankhead Grant, who fought many battles for the retarded citizens of Walker County, AL.

On April 15, 1985, the Walker Association for Retarded Citizens complex was renamed the Marion "Sis" Bankhead Grant Center, for Mrs. Grant's years of dedicated service to the organization. The announcement was made during WARC's annual awards banquet. "Because of her love and hard work for the complex, the WARC's board of director named the center in honor of the late Mrs. Grant as a way of saying thanks," said Leonard Zakarin, executive director. The center, which Mrs. Grant's sister recalls was "the closest thing to her heart," houses the adult activities center and Skills Unlimited. Many plans are also being made to expand the center.

Mrs. Grant devoted her life to helping those less fortunate than she. She served as president of the WARC for 3 years, until the time of her death. The entire county noted her selfless devotion to the ongoing cause of serving the needs of the mentally retarded, and her abundant love and joy in such service was ever apparent to all who knew her.

Mrs. Grant is a member of the famous Bankhead family of Alabama and was a very successful person in her own right. She was the executive for a very successful chain of radio stations in Alabama. Her contributions to the cultural and civic improvement of Jasper and Alabama were immeasurable.

Mr. President, we hope all who work with our retarded citizens are as dedicated as Mrs. Grant. I hope that all who see the Marion "Sis" Bankhead Grant Center will be reminded of her lasting contributions to such a worthy cause.

Mr. President, I ask unanimous consent that an article from the Daily Mountain Eagle concerning Mrs. Grant and the building's dedication proclamation be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

WARC COMPLEX NAMED FOR GRANT

(By Linda Baker)

SUMITON.—As a commemorative remembrance, the Walker Association for Retarded Citizens complex has been renamed the Marion "Sis" Bankhead Grant Center.

The announcement was made Monday night during WARC's annual awards banquet at Jean's Restaurant.

Because of her love and hard work for the complex which houses the adult activities center known as Skills Unlimited, the WARC's board of directors named the center in honor of the late Mrs. Grant, as a way of saying thanks, said Leonard Zakarin, executive director.

Mrs. Grant was serving her third year as president of WARC and had been on the board for four years.

"Im thrilled to death about it. It will be a perpetual thing," said Zakarin about the center located near the intersection of Alabamas 5 and 195.

He read the proclamation, which read in part, "Whereas, we the members of the board of directors of the Walker Association for Retarded citizens, were privileged to serve with Marion 'Sis' Bankhead Grant, as president of our association and whereas her outstanding contribution in such capacity her selfless devotion to the ongoing cause of serving the needs of the mentally retarded citizens of Walker county and her abundant love and joy in such service was ever apparent to us and to all who knew her . . . we wish to make known to all who came before us, to all who succeed us in office and in membership, and to all who share our goals, that we desire that her name and her contribution be forever remembered and that our appreciation be expressed in a lasting manner . . ."

"This was the closest thing to her heart," Barbara Oliver, the late Mrs. Grant's sister, said about the center.

"This is a wonderful honor bestowed upon my wife. I'm proud of the things she did for this association. My family and I all appreciate it very much, said Bill Grant, the late Mrs. Grant's husband.

Plaques were presented to Bill Grant, Mrs. Oliver, sons Alec and Walter Grant, and brother John Bankhead.

PROCLAMATION

Whereas, we the members of the board of directors of the Walker Association for Retarded Citizens, were privileged to serve with Marion "Sis" Bankhead Grant, as president of our association, and

Whereas, her outstanding contribution in such capacity, her selfless devotion to the ongoing cause of serving the needs of the mentally retarded citizens of Walker County, and her abundant love and joy in such service was ever apparent to us and to all who knew her, and

Whereas, we wish to make known to all who came before us, to all who succeed us in office and in membership, and to all who share our goals, that we desire that her name and her contribution be forever remembered and that our appreciation be expressed in a lasting manner.

Now, therefore, we, the said board of directors of the Walker Association for Retarded Citizens, in special session sitting, do hereby unanimously.

Resolve: That the Walker Association for Retarded Citizens Complex, which now houses our adult activities center, Skills Unlimited; and any and all future programs, additions to this complex, acquisitions of

properties and/or buildings, wherever situated under our service domain, be named the Marion "Sis" Bankhead Grant Center, with gratitude and in her honor.

Dated at Jasper, Walker County, Alabama, this 15th day of April, 1985.

A TRIBUTE TO DORA WINTERS

Mr. HEFLIN. Mr. President, today I would like to share with my colleagues a story of true dedication and selflessness. I am referring to Mrs. Dora Winters of Bryant, AL, who was recently honored by the Alabama State Legislative for her work with the Retired Senior Volunteer Program.

Mrs. Winters typifies the ideals set forth by the RSVP Program. Her loyalty, selflessness, and devotion to the program is well known by all who work with her. She volunteered 897 hours during 1983-84, even though she missed 2 months of work when she had surgery. She coordinated attempts to weatherize the homes of elderly in Jackson County, even to the extent of neglecting repairs on her own home. She also keeps the community informed about RSVP functions and is constantly involved with the lonely and depressed in her area.

Mrs. Winters has served as coordinator for the Bryant area RSVP for the past 8 years. She also served as the energy conservation coordinator during the 50th anniversary year of TVA. Her normal volunteer work includes cheese distribution and organization of transportation and workers. She also makes doctor appointments for those people without phones, arranges transportation for those without cars, cooks meals when needed, and offers support to anyone who is troubled. Mrs. Winters, despite all her work for the RSVP, never asks for any type of compensation, money or otherwise.

RSVP Director Virginia Harden calls Mrs. Winters the organization's most active volunteer. She is also active in the county's political activities, and stays informed about all political viewpoints concerning the elderly, and ways to better life in the county. Mrs. Winters works for her community with a "zest not many of us are fortunate to experience for one day in our lifetime," says Harden.

Mr. President, I ask unanimous consent that an article concerning Dora Winters in the Valley Voice be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WINTERS WINS STATE RECOGNITION FOR SERVICES

The Alabama State legislature recently honored Mrs. Dora Winters of Bryant, Ala., for her volunteer work with the RSVP (Retired Senior Volunteer Program) and Jackson County during her lifetime.

Representative Ben Richardson presented Winters with a resolution signed by Governor George Wallace at an RSVP covered dish luncheon on May 17 at Caldwell Park.

Born in November of 1909, Winters joined RSVP on June 2, 1977. She worked 897 hours during 1983-84, even though she missed two months of work when she had surgery.

Winters has been the Bryant area coordinator for RSVP for the past eight years.

She also served as the energy conservation coordinator during the 50th Anniversary TVA grant year, when RSVP handled a $3,000 grant for weatherization in Jackson County.

Winters worked setting up meetings, finding needy people, preparing food for workers and making numerous phone calls concerning the program.

She needed repairs on her own home during this time, but according to RSVP, she never mentioned it to anyone.

Her normal volunteer organization includes cheese distribution and organization of transportation and workers.

She also makes doctor appointments for those people without phones, arranges transportation for those without cars, cooks meals when needed and offers support to anyone who is troubled. She never asks for any compensation, money or otherwise.

Winters keeps the community informed about RSVP functions and is constantly involved with the lonely and depressed in her area. According to RSVP director Virginia Harden, she is the organization's most active volunteer. She is also active in the county's political activities. She is well informed about all political viewpoints concerning the elderly, social services, schools and ways to better life in the county.

Winters works for her church, community, friends and people in general with a "zest not many of us are fortunate to experience for one day in our lifetime," said Harden.

THE NEED FOR QUICK ACTION ON FARM BILL

Mr. NICKLES. Mr. President, with the 1985 farm bill still in committee, Oklahoma farmers are once again in the dark about the coming year's farm programs. There is little question but what our Nation's agriculture industry is suffering under one of the most difficult times in history. Farmers have been placed against the wall by low commodity prices, falling land values and interest rates that remain high for them while declining for the rest of the economy.

Farmers have operated for the past 4 years under farm programs that have failed in a number of areas. They failed to provide an adequate income protection for the family farmer despite record amounts of money poured into the programs. They have failed to hold down production and in fact, had many built-in incentives to produce beyond our ability to consume and export.

One month ago, farmers in my State of Oklahoma finished harvesting this year's winter wheat crop. Right now, they are in the fields cultivating and applying fertilizer. Come September, the 1986 crop will be going in the ground.

No doubt, writing a farm bill that will improve farm income during times of budget constraints is no easy task. But, if Congress does not act quickly on the farm bill, winter wheat farmers will end up the biggest losers. As I mentioned, these are trying times for American agriculture. In order to cut production costs, farmers reduce tillage and fertilizer on set-aside acreage. However, farmers will not be able to maximize these savings on the 1986 crop without having full knowledge of program details.

With this in mind, I offer a word of encouragement to the Agriculture Committee in hopes that the farm bill or at least the wheat section of the farm bill will be placed before the Senate for consideration prior to the August recess.

NO TAX ON PERMANENT LIFE INSURANCE

Mr. PRESSLER. Mr. President, I am extremely pleased to join as an original cosponsor of Senate Resolution 199, which expresses the sense of the Senate that the final tax reform plan adopted by this body should not contain a provision to impose a tax on the annual increase in the value of permanent life insurance.

Virtually everyone agrees that tax reform is a worthy and important goal. I wholeheartedly share this position. However, meaningful tax reform should ultimately make our Tax Code simpler and fairer. I believe that a tax on what is known as the inside buildup of life insurance policies accomplishes neither of these objectives.

For the first time in our history, we are considering an age-indexed tax—one which would grow heavier with each passing year. Because the cash value of these policies increases each year, the tax would also increase. It is conceivable that the income tax payable by older policyholders might even exceed the policy's annual premium. Families with moderate and middle incomes would also be adversely affected. In 1983, 66 percent of the permanent life insurance policies were purchased by individuals with incomes under $25,000 a year.

Mr. President, I think this is an excellent point. We are not talking about the superrich. We are talking about people who have relatively low incomes and wish to protect their families.

This proposal also fails to accomplish simplicity. Instead, it would require extensive recordkeeping for life insurance companies and policyholders. While it is yet unclear what type of records would be required, from past experience it is extremely possible that in many cases, the reporting and recordkeeping expenses of insurance companies and the Government's

administrative costs would approach or exceed the tax collected. Whatever the cost, this proposal would add more, not less, complexity to our code.

Let us look for a moment at the reasons the administration offers in support of this tax. First, Treasury maintains that earnings on comparable investment products generally are not tax-free or tax-deferred. This is not true for assets which are, in fact, comparable to traditional life insurance. For instance, gains attributable to ownership of a house, livestock, grain, and shares of stock are not taxed until the gains are received upon their sales or exchanges. Taxing the unrealized appreciation of an individual's life insurance policy is truly unprecedented.

The second major argument made by Treasury is that this tax is necessary because the tax-favored treatment of inside buildup encourages individuals to save through life insurance companies rather than through other financial institutions, even though they may not need the additional coverage.

A Gallup Poll asked respondents to assume they had an unexpected $1,000 or $10,000 to add to their savings or investments. Only 3 percent chose life insurance for the extra $1,000 and less than one-half of 1 percent chose this investment for the extra $10,000. Other studies show that less than 5 percent of permanent life insurance policies are owned by individuals with family incomes in excess of $100,000. High income persons hold much smaller portions of their liquid assets in life insurance policies than do middle-income persons. However, this insurance offers vital protection to millions of families.

During 1983, South Dakotans purchased over 4.5 billion dollars worth of new life insurance and paid almost $2 million in premiums. Nationally, permanent life insurance policies paid out over $7 billion in death benefits during 1983, with approximately 63 percent going to surviving wives and children.

For generations, our Nation's tax laws have been designed to encourage people to provide for their own long-term financial security through the private insurance system. This proposed change in tax policy is contrary to the administration's policy of encouraging individual and family self-reliance. This proposal would end the viability of traditional life insurance in the marketplace. Reducing this life insurance protection will reduce overall financial security and increase the need for other forms of assistance, such as Social Security and other Government programs. Clearly, this is an undesirable effect.

How much revenue would be raised through this new tax? Treasury estimates no revenue until 1990 and then only $200 million. However, this figure assumes there would be no change in the amount of permanent insurance purchased if inside buildup were taxed. A survey just conducted found that 83 percent of the respondents felt a tax on permanent life insurance would make the product less desirable. Thus, Treasury's estimates become extremely suspect.

Everyone wants a tax system that is simple and fair for all Americans. However, the proposal to tax life insurance policyholders is neither simple nor fair. If the administration's proposal becomes law, it would produce virtually no income, while destroying a product important to the financial security of millions of Americans. I urge all of my colleagues to oppose this unfair and dangerous tax.

RECOGNITION FOR A DISTINGUISHED JURIST

Mr. BYRD. Mr. President, the Association of Trial Lawyers of America has recently announced its selections to receive the 1985 Judicial Achievement Awards. These annual national awards for judicial excellence will be presented to four judges from jurisdictions across the country at the 1985 ATLA Convention in Chicago later this month.

The four judges were selected from nominations made by association members and State trial-lawyer affiliates throughout the United States. In announcing the names of the 1985 winners, ATLA president, Scott Baldwin, said:

> These four distinguished jurists have made superb contributions to improving the quality of jurisprudence in America's civil-justice system. They have shown talent for innovation, compassion for victims in our society, and a determination to preserve the rights of those victims.

I am gratified to note that this year's Outstanding Appellate Judge Award is being presented to the Honorable Judge Kenneth K. Hall of Charleston, WV, a judge on the U.S. Court of Appeals, Fourth Judicial Circuit, composed of the districts of Maryland, North Carolina, South Carolina, Virginia, and West Virginia.

In making its decision to name Judge Hall for this year's award, the ATLA—with 60,000 members, the world's largest trial-bar association—stated that:

> In black-lung cases, Judge Hall is renowned among practitioners for his pioneering work in creating a body of law that assures that coal miners and other workers eligible for disability benefits will receive those benefits in a reasonable period of time.

Judge Hall's judicial career spans 30 years. A native of Boone County, WV, Judge Hall served in the U.S. Navy during World War II, and was awarded his J.D. degree from the West Virginia University College of Law in 1948, prior to beginning his legal practice. For 18 years, he was a West Virginia trial judge, and for 5 years, a Federal district court judge. In 1976, he was named to the U.S. appellate court. His numerous opinions on black-lung and Social Security disability claims demonstrate a steady elimination of unfair rules and procedures and a concern for workers who suffer injury or disease because of their jobs.

Two landmark opinions, Petry versus Califano (1978), and Hubbard versus Califano (1978), compelled the Secretary of Health, Education, and Welfare to evaluate the evidence rather than merely give a conclusory statement to the court when the Government denied benefits to a claimant. As a result, benefit awards to claimants at the administrative level have increased.

Other rulings by Judge Hall halted the practice of the Government's routinely accepting the opinions of consultants over those of claimants' physicians, for example, Souch versus Califano (1979), and for the first time in the appellate review process Judge Hall insisted that the court look at the realities of life in the coal mines and the workplace. For example, in Higginbotham versus Califano (1979), he ruled that the fact that a disability claimant does housework does not disprove a claim.

In summary, Judge Hall is highly regarded in the legal profession for the dramatic changes he has made in the procedures for review of benefits claims on appeal. He has insisted that the spirit, as well as the letter, of the statutory law be applied, and that common sense and decency be an integral part of the administrative and judicial review process.

For many years, I have been a friend and admirer of Judge Hall, and I was originally responsible for submitting his name for consideration for nominations to the Federal district and appellate benches. I congratulate Judge Hall on receiving this new recognition from the Association of Trial Lawyers of America, and I know that, being named 1985 Outstanding Federal Appellate Judge, presages an even more significant judicial career for him in the years to come.

[From the Charleston Daily Mail, July 23, 1985]

HALL GETS TOP APPELLATE JUDGE AWARD

(By Ron Hutchinson)

"I'd like to tell all those lawyers how happy they made a country boy from the hills of West Virginia."

With a statement that was spiced with homespun humor. U.S. Circuit Judge K.K. Hall yesterday accepted the achievement award from the American Trial Lawyers Association as the top federal appellate judge in the United States.

Hall was selected from all federal appeals judges to receive the award from the 60,000-member legal group. Hall, a federal judge for 13 years, had been scheduled to receive the award in Chicago during the ATLA con-

vention but a family illiness prevented him from attending the meeting.

Charleston attorney Stanley Preiser presented the award to Hall in ceremonies before a standing room only audience in the federal courthouse. The presentation was videotaped and will be shown at the ATLA meeting.

Calling Hall "a judicial superstar," Preiser said the judge's rulings in Social Security and black lung cases "have made the courts look at the realities of the coal mines and workplace."

Attorney Barbara Fleisher, who along with lawyer Monty Preiser nominated Hall for the award, said "The working person knows he has a real friend on the court."

In his comments. Hall praised the late Dr. I.E. Buff, former U.S. Sen. Jennings Randolph and U.S. Sen. Robert Byrd for their efforts in getting federal black lung legislation approved by Congress.

Hall likened the award to the definition of serendipity. "It is a pleasant surprise that you weren't looking for, and this is certainly a pleasant surprise for me."

Hall added, "A judge, in looking to the federal law, must determine not is it good for the country or is it pleasing, but, is it constitutional? If it is, then enforce it."

Hall became a state circuit court judge in Boone County in 1953 and was appointed as a U.S. district judge by President Nixon in 1971. In 1976, Hall was elevated to the 4th Circuit Court of Appeals in Richmond, VA. and he still maintains judicial offices in Charleston.

THE BOISE CASCADE EVOLUTION

Mr. SYMMS. Mr. President, the Idaho statesman, which covers Boise and most of central and southwestern Idaho, carried in its June 23 edition an interesting article on Boise Cascade Corp. I ask unanimous consent to have this article printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. SYMMS. Mr. President, we in Idaho are very proud of Boise Cascade, a corporation formed in Boise in 1957 by the merger of two regional lumber companies. From a modest start it has grown to be one of the 125 largest firms in the Nation with gross sales of $3.8 billion in 1984. The corporation currently employs about 27,600 people in operations from Oregon to Maine.

At its inception, the corporation owned significant acreages of timberland in Idaho and Washington. In order to most effectively utilize this timber base and its existing facilities, the firm immediately entered the paper field. It has remained basically a wood products company, shifting its emphasis from solid wood to paper products.

One of the reasons for Boise Cascade's success has been solid, progressive management. Board Chairman John Fery has been with the firm almost from the beginning and is recognized as one of the Nation's top executives.

Boise Cascade has been a good neighbor and a good citizen. Its operations illustrate that it is not only practical but profitable to utilize natural resources in an environmentally acceptable manner.

Idaho is a resource-dependent State and it's heartening to see a resource-based company like Boise Cascade evolving with changing conditions while continuing to make major contributions to society.

EXHIBIT 1

[From the Idaho Statesman, June 23, 1985]

THE BOISE CASCADE EVOLUTION

Following a record number of buys, sells and shutdowns of operations during the past 18 months, Boise Cascade has a different profile.

While the Boise-based company has been evolving from a traditional wood-products firm to a paper company for years, a recent restructuring of operations has accelerated the trend.

"I view 1984 and the first few months of 1985 as being pivotal," Chairman and Chief Executive Officer John Fery said at the company's annual meeting. "As a result of actions taken, Boise Cascade looks somewhat different than it did a year ago," he said.

The most obvious effect of the actions is to make Boise Cascade more of a paper company and less a building and wood-products company.

About 80 percent of company revenues this year are expected to come from paper and paper-related businesses, compared with 20 percent from wood and building products. Last year, the mix was 70 percent paper and related products and 30 percent building products.

That trend has been emerging since the late 1950s, when Boise Cascade entered the paper business. But the flurry of buys, sells and closures during the past 18 months has dramatized that trend.

During the second half of 1984, Boise Cascade closed three unprofitable wood-products manufacturing plants on the Washington and Oregon coasts and a large hardboard plant in Minnesota, although it left the four Idaho wood-products plants intact. The company closed or sold dozens of building materials distribution centers, including one in Nampa.

That retrenchment in wood and building products prompted the company to take an $88 million pretax charge from its 1984 earnings.

While Boise Cascade reduced its operations in building and wood products, it spent $195 million to purchase sole ownership in Boise Southern Co., which it shared equally with another company.

The primary reason for the acquisition was a Louisiana pulp and paper mill, which was expected to boost Boise Cascade's total paper production by 13 percent, company officials have said.

While the Boise Southern purchase and wood and building products restructuring were two key events last year, the list of buys, sales and closures seems endless. The company purchased six corrugated-box plants and left the envelope business.

Even by Fery's estimation, the purchase, sale or closure of more than 90 operations during the past 18 months was a record. He considers the last half of 1984 and the first few months of 1985 the most significant.

"It became a very important period for the company—not by design—but by coincidence," he said.

He said the buys and sells were consistent with the company's strategies, but they were coincidentally completed during a short period of time.

"Some of these things we had been talking about for a year or more, but they finally came to fruition," he said. "Surprised? No. Delighted? Yes."

"I am delighted with the opportunities.

I think the company today is very well positioned for the future," he said.

Fery said the acquisitions and decisions were based on company strategies developed more than 10 years ago to focus on businesses that provided the best growth opportunities.

As a result, the company turned to paper and paper-related businesses because they were less cyclical than the wood-products business and demand was growing rapidly.

Boise Cascade specifically concentrated on writing, publishing and business papers, such as those used for business forms and computer printouts, and expanded its office products network throughout the United States. It also emphasized corrugated containers, such as cardboard boxes, and composite cans that are used for everything from a quart of oil to Pringles potato chip containers.

The strategy worked. Said Fery: "We have gone from being zip in paper in 1957 to the fifth largest pulp and paper producer in the U.S. I think we are the fastest growing paper company in the U.S.

He sees more growth in the future in the paper and paper related businesses, which either grow at the rate of the economy or exceed the growth. Fery projects fast growing areas in the future will be computer printing paper, white paper, business forms, copy paper and others.

To prepare itself to compete in those areas, Boise Cascade has spent more than $3 billion to expand and ungrade facilities—primarily in paper and paper-related fields—during the past decade and spent $651 million for capital investments in 1984 alone.

Part of the cash needed for recent and future investments was freed up by selling building materials centers, an envelope division and a pulp mill in Canada—operations Fery thinks will be less profitable in the future.

Those realignments and growth trends have prompted some to question how viable Boise Cascade's wood and building products operations are and what its future is in the Northwest.

During the past five years, Boise Cascade growth has been concentrated east of the Mississippi River, while it has reduced some operations in the Northwest.

Its Northwest wood-products operations, which once supplied wood for the entire United States, now serves primarily a western market. Boise Cascade has started to manufacture wood products closer to the booming Sunbelt communities to capture a growing market and to avoid high transportation and labor costs, Fery said.

Growth in paper, office products, composite cans and corrugated containers has been faster in the east, although Boise Cascade has those types of operations in the west. For example, its paper mills are primarily in Maine, Washington, Oregon, Louisiana, Minnesota and Canada. Corrugated container plants are located coast-to-coast and include two in Idaho—Burley and Nampa.

Despite the growth in the South, Fery said: "We have not abandoned the Northwest."

He recently responded to some of the questions about Boise Cascade's decisions to retrench in its Western wood and building products operations and gave his views on Boise Cascade's future in the Northwest. Some of his answers follow.

On consolidation of wood and building products businesses: With the strong U.S. dollar and Canadian wood imports, "business is damn tough."

"We think there is far too much (wood-products manufacturing) capacity. Therefore some capacity has to go down, and we will take our share.

"Even when you get that capacity in balance, it will continue to be a highly cyclical business. And we want less of our company vulnerable to the cyclicalities of that business. But, we do see some good years in the future in this (wood-products) business. I just can't tell you when."

On future shutdowns of plants: "We have no plans today for further curtailment or shutdown of wood-products manufacturing facilities in the Northwest. We think we have taken the steps that are necessary in reducing marginal capacity. We think the future of the Northwest wood-products business—including our own—is largely dependent on the eventual balancing of supply and demand."

On wood-products employment: "We are operating today with 2,000 less people than we were five years ago . . . in the wood-products manufacturing business, and manufacturing not much less product. That's the interesting thing."

With increased automation, "We are operating with a lot fewer facilities, but we are not a whale of a lot smaller in terms of our manufacturing capability."

Idaho wood-products employment dropped from 1,382 in 1980 to 715 in 1985, primarily due to automation and shift consolidation, company officials say.

On the future in the Northwest: "As a practical matter, more of our company today is east of the Mississippi River than west. So if we just continue to maintain and expand from our present bases, there will be more growth (in the east than in the west) because we have got more to expand from.

"That will not foreclose our growing here (in the west) too. We have not said: 'Hey, let's cross this off.' . . . Our plans in the West are to grow in paper, to grow in packaging and to grow in office products to serve Western markets."

On future headquarters location: "There is no logical place (to locate Boise Cascade's headquarters) if you look at the U.S. You could say go to New York because that's where the financial community is. You could say go to Chicago or St. Louis because that's kind of the middle of the hub.

"Anyplace we go will have some advantages over Boise and some disadvantages. My point of view is we are here, and there is a cost associated with moving that I would prefer not to bear.

"And we like the living environment of Idaho and Boise, Idaho, and our people do. . . . We have no plans to leave. We would have to travel to someplace else no matter where we go, and we do think this valley offers a good living environment. We will work to improve that. But, we like it here."

TRANSACTIONS

Boise Cascade has made the following transactions:

Facility	Transaction dates
Buys:	
Purchase of joint venture partner's interest in Boise Southern Co., including 5 plants and timberland in Lousiana and Texas.	December 1984.
6 corrugated container plants in Alabama, Illinois, Indiana, Kentucky and Tennessee.	November 1984.
2 office products distribution centers and a retail store in Missouri, Kansas and Texas.	October and December 1984.
Wood chip plant and timberland in Maine.	September 1984.
Sells:	
Pulp mill and timberland in New Brunswick, Canada.	May 1985.
4 envelope plants in New York, Ohio and Pennsylvania.	March 1985.
40 wholesale and retail building materials centers in Oklahoma, Texas, Utah, Washington and Kansas.	September 1984 to June 1985.
Closings:	
Envelope plant in Illinois	March 1985.
Hardboard plant in Minnesota	December 1984.
3 wood-products plants in Oregon and Washington.	October 1984.
24 wholesale and retail building materials centers in California, Colorado, Idaho, Oklahoma, Oregon, Texas and Washington.	March 1984 to June 1985.
Openings:	
Office products distribution center in Ohio.	October 1984.
One plant to produce metal for composite cans in Maryland.	February 1984.

PROFITS MAY DOUBLE

Analysts expect Boise Cascade's profits at least to double this year, following a substantial restructuring of the company's wood and building products operations last year.

In 1984, Boise Cascade earned $2.23 a share—up from the previous year—despite an $88 million pretax charge that reduced earnings by $2.07.

Analysts predict earnings will soar in 1985, although not as high as the company's peak in 1979, when earnings per share were $6.48.

Merrill Lynch estimates earnings of $4.45 a share in 1985, and Prudential-Bache Securities projects earnings of $4.90 a share this year.

A Forbes poll published in April showed the average earnings estimate by 13 analysts was about $4.52 a share for 1985.

Three stockbrokers interviewed said the company's restructuring of its building and wood products operations and concentration on more profitable paper and paper-related businesses were primary reasons for the earnings forecasts.

ENGLISH LANGUAGE AMENDMENT

Mr. SYMMS. Mr. President, a recent series on bilingual education in the Washington Post helps underscore the need for dramatic action in securing an official status for the English language in America.

Entitled "The War of the Words," the three-part series examined the controversies of bilingual education. Although I may not agree with all statements in the series, I believe it was a reasonably fair and accurate look at a very thorny issue.

Mr. President, I ask unanimous consent that the series be printed in the RECORD at the conclusion of my remarks and that my colleagues who question my enthusiasm for the ELA please read it.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. SYMMS. Mr. President, the gut feeling one gets upon reading the series is that all is not well in the supposed utopia of bilingual education. There is a genuine battle going on in the Nation's educational trenches over the issue and the real victims are the young students.

The last installment, entitled "'Immersion' Success Fuels Debate," will particularly stick in the craw of bilingual enthusiasts. As the title suggests, the immersion method, which goes straight into mainstream English without wasting years in the students' native language, has been a roaring success where ever it has been used.

Mr. President, I wish to quote briefly from the article. Dr. Esther Eisenhower, one of the Nation's most reputable language-learning experts and Fairfax Country, VA's language program coordinator, said:

When working with a child in the native language is working against the child learning the English language, that's what I object to. In the name of a child "feeling good" about being a Turk, he's graduating from high school with a fifth-grade competency in English.

Unfortunately, this is what is happening far too often all in the name of someone's fuzzy political or educational theory.

In my own mind, and I hope in the minds of many of my colleagues, the Post's series only reinforces the need for an English language amendment.

The English language amendment [ELA) would impact directly two areas important to our Nation's unity and well-being: bilingual ballots and bilingual education. It would eliminate bilingual ballots, and would reestablsh Congress' original intent in creating bilingual education—namely, to help non-English-speaking youngsters learn our Nation's language as fast as possible.

As the Post articles demonstrate, the current practice we call bilingual education is most often a maintenance program designed to coddle a youngster in his own language and shelter him from the dominant culture. This practice retards his entrance into the mainstream and diminishes his chances of full participation in our economic system. I call it America's apartheid system.

The ELA does not affect language use in any private context: First amendment rights are fully protected at home, church, private schools, and in businesses. But English would be the language of our schools, our governments at all levels, at the ballot box, and in similar public places.

The 15 sponsors of the ELA in this body, and the founder of the ELA, former Senator S.I. Hayakawa, are not xenophobic or racist. We see the entire issue as a question of full economic and political opportunity for

our new immigrants; and as an urgent need for national unity under a common means of communication.

Mr. President, I urge all my colleagues who have not done so to closely examine my arguments in favor of the English language amendment. I would be happy to supply them with whatever material they need to make this examination.

EXHIBIT 1

BILINGUAL EDUCATION'S DILEMMAS PERSIST

(By Cynthia Gorney)

REDWOOD CITY, CALIF.—They were a mystery to Barbara Ruel, these exuberant Spanish-speaking children whose faces went empty every time she opened a reader and began to write English vocabulary on the blackboard. Even the most recent of the Central American immigrants understood some English, and Ruel was a veteran reading teacher, but every word she gave them seemed gone by the next week. They would stare at their readers and Ruel could see them struggling, as though the shapes had blurred before them.

What was she doing wrong?

Then in 1976, intrigued by a controversial idea that was gaining momentum among a few teachers, Ruel decided to try something so different that she was not certain the school administration would even allow it. Working in secret, she and her Spanish-speaking aide sat down together and wrote an entire first-grade reading primer in Spanish.

Ten words a week, Ruel told the aide—two characters, a boy and a girl, admiring spring. *Mariposa.* Butterfly. *El Pajaro Vuele.* The bird flies. Ruel ran the pages off on the school mimeograph, the aide watched the door to make sure no one was coming, and with no advance warning Ruel presented her Spanish-speaking first-graders one day with a small stapled volume written entirely in their own language.

All at once, Ruel says now, she had a roomful of voracious readers. She had children who ran to her at the end of each day to ask what stories or new sentences they might take home that night. "We could not keep up with them," she said recently. "I thought, *God, it's fabulous, it's just fabulous.* They started to read like normal first-graders read."

And as Barbara Ruel sat back in the nearly deserted lunchroom at Hoover Elementary and remembered those children, a single glimpse through the open classroom doors nearby might have hinted at the breadth of the change in the decade since Ruel stapled together her primers. The school district's hard-bound Spanish readers lay in fat stacks on the bookshelves wall-length dual alphabet charts displayed the Spanish *ll* and *ch*, and a bright construction-paper leprechaun smoked a pipe under the large bulletin board letters that identified him: *El Duende.*

Ten years ago, spurred by a Supreme Court decision arguably as significant for non-English-speaking students as *Brown v. Board of Education* was for black students, the U.S. Office of Education began a nationwide effort whose premise was unprecedented in American education. The scope was massive, affecting school districts from southern Florida to the Alaskan bush. Wielding educational research and the new mandate of the Supreme Court, officials declared that in the American public school system, every non-English-speaking child below high school age had a right to be taught in his own language—to learn basic subjects from a bilingual teacher so the child might develop self-confidence, sharpen his thinking skills and keep from falling behind in school while he was mastering English.

It was called "bilingual education," and the clamor it raised was tremendous, from the legislative battles to the heated school board meetings to the teachers who stopped speaking to each other in faculty lunchrooms. In the modern history of this nation's public schools, nothing except racial desegregation has so thoroughly entangled the classroom with intense feelings about ethnicity, politics and the meaning of becoming an American.

And although the outcry has quieted since the public debates of the early 1980s, the dilemmas of bilingual education have not. If you set out this year on a random tour of American classrooms, you would find, amidst teachers still deeply divided about the idea, half a million children now enrolled in what their schools call bilingual education—an effort that is costing local school boards and the federal government about $500 million a year.

You would find young Boston Haitians learning culture in Creole, and Mississippi Indians learning to read in Choctaw, and children of Michigan immigrants learning history in Albanian and Arabic. You would find math workbooks in Spanish, Italian reading primers, Chinese vocabulary cards, Navaho storybooks, an Earth sciences text in Laotian, a U.S. history text in Vietnamese, and color and shape charts written in the Filipino dialect Tagalog.

You would find a young Oakland teacher, the walls of her classroom bright with two-language vocabulary posters, walking the narrow rows between desks and announcing the words for the day's spelling test. "In English—*see.* 'I will *see* who studied.'" A pause for the careful penciling of a few of the children, and then: "En Espanol—*pan.* 'Me gusta el *pan.*'" I like bread. And the rest of the children hunch over their papers, murmuring the sentence as they write.

You would visit a Spanish bilingual class whose teacher speaks no Spanish; a bilingual Cambodian class whose teacher speaks no Khmer; a bilingual Chinese class whose teacher has no intention of learning Chinese and believes most dual-language education has no place in the taxpayer-funded schools of an English-speaking society.

You would watch attorneys and administrators grapple over major bilingual-education lawsuits in Illinois, California and Colorado. You would hear immigrant parents insist on English-only classes, and immigrant parents demanding improved bilingual classes. You would pick up studies that variously claim bilingual education improves, impairs or has no effect on academic performance.

And you might come across a school or two like Hoover Elementary, where for all their uncertainty and occasional misgivings, Barbara Ruel and her colleagues say what sells them on bilingual education is the children around them—children they believe would have withdrawn into failure under a constant barrage of English.

". . . Almost frightened to death," Ruel said, remembering Valentina, who came to Ruel's first-grade classroom three years ago from an elementary school where the child had been in English-only classes. "I remember my aide and I welcoming her, and her little face kind of—'Oh, my God, I can relax. Somebody's saying something I can understand for the first time in two years.'"

A decade of argument might be read into the slow unclenching of that small girl's face, in a Mexican-born schoolchild's discovery that she needed no English to make sense of her surroundings. A visitor to Hoover need drive less than 10 minutes to find junior high school teachers who think of "that warm little cocoon," as one social studies teacher called the elementary-level bilingual program, as a well-intentioned trap that produces seventh-graders unable to speak or write coherent English.

And the most fervent of bilingual education's supporters include scores of men and women who have never forgotten how it felt to be a Valentina years ago. Beatriz Arias, a Stanford education professor whose Mexican-born father sent her to a Los Angeles kindergarten in the early 1950s, still remembers being locked into a supply closet every time she spoke Spanish in the classroom. Louise Kinsley, an Arizona Navaho woman who is now 29, was in second grade when her Bureau of Indian Affairs schoolteacher drew a small circle on the blackboard and then demanded that Kinsley stand before the class with her nose pressed into the circle—the classroom punishment for speaking Navaho in school.

No one punished Kinney Kinmon Lau for speaking Chinese at Jean Parker Elementary School in San Francisco, but no one taught him in Chinese, either. He was 6 years old, the son of an immigrant carpenter in San Francisco's Chinatown, when a young lawyer in 1970 happened to find Kinney "languishing," as the lawyer puts it, in a first-grade class that treated him like any other San Francisco first-grader—the class was all in English, with no special courses like English as a Second Language to help a child who had grown up speaking Cantonese.

"Sink-or-swim" is the bilingual teachers' nickname for classes like that—you either master English, in what popular if arguable notions of American history insist is the time-honored manner, or you pass beneath the waves. In *Lau v. Nichols,* as the case came to be called, the Supreme Court ruled for the first time that sink-or-swim violated the Civil Rights Act, which prohibits discrimination by racial or national origin in any program receiving federal financial help. "There is no equality of treatment merely by providing students with the same facilities, textbooks, teachers, and curriculum," wrote Justice William O. Douglas in January 1974, "for students who do not understand English are effectively foreclosed from any meaningful education."

The court did not mandate bilingual education; it simply mandated that students receive some special help. But when the Department of Health, Education and Welfare's Office of Education convened a panel to draw up guidelines for federal enforcement of the *Lau* ruling, the panel members in 1975 decided after some argument that the government's preferred approach—directly affecting about 500 school districts, and strongly influencing many subsequent state education laws—was the controversial and politically-loaded practice of dual language teaching in the schools.

"I don't think people realized how big it was," said Edward de Avila, an Oakland-based educational consultant who helped prepare the government guidelines. "I know I didn't."

STRUGGLING IN REDWOOD CITY

Patty Swanson, her blond hair tucked under a small purple beret, dropped into an undersized wood chair one recent afternoon at Hoover Elementary and offered up the problem of Gloria. Gloria (her real name has been changed at Swanson's request) is in Swanson's bilingual fifth-grade class. The child came to Hoover in fourth grade, shy, just up from Mexico, speaking no English. Into a bilingual class she went—Hoover's Hispanic population is so large now that nearly every class is bilingual—and she began reading, as the Spanish speakers generally do at Hoover, in Spanish.

Two years later, Gloria is uneasy about English and is still reading in Spanish. When she has to get up in science class to present her work group's report on the results of their experiment, she struggles through the English words, glancing down at her notes to remember how to put the sentences together. On the face of it, Swanson said, Gloria looks like fodder for the bilingual-education opponents who complain that the "crutch" of Spanish teaching keeps children from fluency in English.

But Swanson has seen what she believes happens to the Glorias who get no teaching in Spanish—who are immersed into traditional English classrooms and then pulled away each day for a brief session in English as a Second Language. Those ESL courses are what Swanson used to teach. Every day, in a rural school on the northern California coast, she led Spanish-speaking children through the workbooks offered in ESL. *What's this? It's a book. What's this? It's a pen.*

Half the kids I worked with became big behavior problems," Swanson said. "They were so frustrated. They were so angry . . . Of the group, about a third of them survived and will do quite well. But those are the numbers you're working with in immersion."

And Gloria? To hurry her into English, Swanson is preparing her for English reading and is trying not to speak Spanish to her any longer. "Maybe in immersion she would have been forced . . ." Swanson mused. "But her conceptual stuff—she wouldn't have any idea who Christopher Columbus was. She wouldn't know the difference between transparent and opaque, or what causes a shadow."

Swanson nodded toward the other end of the classroom, where a curly-haired boy in fashionably baggy slacks was offering some arithmetic advice and horsing around in both English and Spanish. "Look at that kid—he's beaming with confidence," she said. "In math he's at the top of his class, because he hasn't missed out on concepts."

So when the class ranges from monolingual Anglos to Mexicans barely settled in this country, how does a bilingual fifth-grade teacher cope?

This is how: She has four different reading groups, one in English, one in Spanish and two just switched over from Spanish to English and working through lower-level books. She assigns and writes compositions in whatever language the student is currently reading. She teaches ESL every morning, sends the whole class out to a special bilingual science workshop, sprinkles Spanish into her arithmetic lessons when the children seem to have trouble understanding, and sandwiches chunks of English teaching between tutoring sessions with children who need the ideas explained in Spanish.

"You just sort of look at your class and feel it out," Swanson said.

It is complicated and demanding—her training never prepared her for classes that include immigrant children who didn't start school until they were 12—and it is precisely what Swanson wants to do. She is part of a new generation of Redwood City teachers—women and men hired under a controversial 1981 board resolution to accept only teachers trained to work in two languages. School districts across the country reacted any number of ways to the bilingual mandates forced on them by federal guidelines and new state laws: some ignored them, some handed the responsibility to bilingual but otherwise ill-qualified teaching aids, and some, like Redwood City, scrambled to snatch up the few bilingual teachers who were emerging with at least some theoretical training in dual-language teaching.

"You've got to compete," said Connie Williams, the energetic administrator who five years ago began setting up the city's bilingual program. "If you just wait for bilingual teachers to come to you, they don't come."

On paper, two years after the full complement of bilingual teachers finally settled in at Hoover, there is not a great deal to show for Williams' efforts so far. The test scores are mixed, with some showing slight improvement and some showing none. And there is little enthusiasm at the two junior high schools that take Hoover students; a dozen teachers, interviewed at random, said either that they could see no difference between the bilingual-class children and children taught in traditional classes, or that they believed the bilingual classes were keeping some students from learning English.

"Enormous numbers of kids I get in my class say they've been here [in the United States] four and five years, and they don't have the English language skills that kids who haven't been in the bilingual program have," said Diane Davoli, a social studies teacher at Kennedy Junior High. Like the other teachers interviewed, she was not certain what students had gone to which schools—whether the children she was describing went through five years of bilingual classes, or even whether they were telling the truth about how long they had been in the country.

"Of course the scores are low," Swanson said heatedly over the faculty lunchroom table. "They're testing kids who have only been in school one or two years."

"They're probably comparing [them to] middle-class kids," said Barbara Ruel, the teacher who experimented with Spanish reading nine years ago. "And I think that's unfair, I really do. And I don't think they're doing it because they're bad teachers. I think they're doing it because they don't understand the complexities . . . Perhaps if some of those teachers worked over here for a while—with any amount of feeling, they would understand."

IN A CHILD'S SHOES

Ruel has no classroom now; she works as a resource teacher, helping plan other teachers' curriculums. She is one of the English speakers who promised in writing that she would pass a test in Spanish competency and "cultural understanding." She studied for two years, and then four years later, by then a 43-year-old schoolteacher with 20 years' classroom experience, she reported for her test.

The examiner was a young Mexican-American woman who read an article in rapid Spanish and asked Ruel to respond. Ruel does not remember now what the article was about, but she was certain, as she listened, that it had nothing to do with the words you use to teach first-graders to read.

She remembers the blood draining from her face. If seemed to her all at once that she must be feeling precisely what a 7-year-old Mexican immigrant feels the first time a teacher calls on him in English.

Ruel failed the examination. The news came by mail, some weeks later. She had passed the "cultural understanding" section, but she had failed the language test, and she needed both. She believes she is still an entirely capable Spanish reading teacher, and that although she has not been asked to leave Hoover, she would go if they wanted her to.

But she will not go through the examination again.

[From the Washington Post, July 8, 1985]

FOR TEACHERS, 10 YEARS OF TRIAL AND ERROR—BILINGUAL PROGRAMS DISMAY ADVOCATES, CRITICS

(By Cynthia Gorney)

OAKLAND.—On March 1, nine years after state officials first began requiring bilingual education for children who speak another language more fluently than they speak English, the California State Education Code finally caught up with Franklin Elementary School.

Spurred by an Oakland parents' lawsuit demanding improved bilingual classes citywide, a judge ordered the city's schools into compliance with the state guidelines that map out the largest bilingual education effort in the nation. In California, if an elementary school has one grade with at least 10 limited-English students from a particular language group, the school has to offer a bilingual class just for them.

Inside Franklin, which sits in the midst of inexpensive rental housing that attracts new immigrants, 14 languages are spoken in the course of a normal school day. According to state regulations, the school was supposed to offer bilingual classes in Cantonese, Spanish, Vietnamese, Laotian, the Cambodian language Khmer and the Ethiopian language Tigrinya.

So this is what happened at Franklin:

Priscilla McClendon, a fifth-grade teacher who jokes that she finds challenge aplenty in just mastering English, was assigned a group of fourth- and fifth-grade Cambodians and told to promise in writing that she would learn Khmer.

Francesca Ferrari was assigned a collection of first- to third-grade Ethiopians and told to promise in writing that she would learn Tigrinya. Since state law requires at least one-third of the children in a bilingual class to be native English speakers, she got some of those, too—eight black American children and one Hispanic girl whose mother had just pulled her out of a Spanish bilingual class because she thought her daughter wasn't learning enough English.

Pat Eimerl lost her Cambodian-Vietnamese-Ethiopian-Thai-Hispanic sixth grade, which on the books had been labeled a Cambodian bilingual class, since Eimerl had earlier promised in writing to learn Khmer. Her new students, all of whom filed in one afternoon carrying the contents of their former desks, are Cantonese-speaking Vietnamese, Eimerl was told to promise she would learn Cantonese, since this was now supposed to be a Chinese bilingual class, but for weeks she refused to sign the promise.

"See, with Cambodian I'm safe, because there aren't any classes," Eimerl said (she meant language classes for teachers) on the

morning of the class shift. She was standing in the hallway, watching 11-year-old Asian boys wander back and forth in search of the right classrooms, and she was so angry her voice shook. "But there are Chinese classes. I've got three kids. I'm 40 years old. I'm not about to go try to learn Chinese."

WHO'S BEING SERVED?

Ten years ago, when federal officials began their unprecedented push for bilingual education in public schools across the country, grand hopes and promising research armed them against their critics. High school dropout rates for Hispanics were far higher than those for white students, they observed; here, they argued, was a possible remedy. Theory and their own convictions convinced them that students who learned at least part time in their native language had a much better chance in the schools; they would keep up academically, they would maintain their self-esteem, and they might in the end become literate and articulate in two languages.

A decade later, with half a million children enrolled in what their schools describe as bilingual programs, much of the whole enterprise has dismayed both its longtime critics and some of the people who most ardently believe in bilingual education. National Hispanic high school dropout rates, although not reliably monitored, are as high as ever; just under 40 percent, according to estimates by the Washington-based National Hispanic Policy Development Project. Teachers from San Francisco to Providence can be heard complaining that bilingual classes hold students back or keep them away from English. A U.S. Department of Education study, published in 1983 to vehement criticism from many bilingual educators, found "no consistent evidence" that dual-language instruction improved students' academic progress.

And bilingual advocates say schools are slapping the "bilingual" label on classes that have almost nothing to do with dual-language teaching. They also say that because some states don't require bilingual education and some schools ignore their own state requirements, more than three-quarters of the limited-English-speaking children in this country are receiving no dual-language instruction at all.

"What's going on in 90 percent of the classrooms in this country is a joke in respect to what bilingual education ought to be," said Duane Campbell, a Spanish-English bilingual teacher who now works in the bilingual teacher training program at California State University at Sacramento. "And if you're going to tell me that doesn't work, I'll agree with you. It doesn't work."

Campbell, an Iowa-born Anglo, sounds a little more embittered than many of his colleagues. Franklin is in more linguistic turmoil than most neighborhood schools. But a Washington Post inquiry into public school bilingual education found similar heat and frustration among teachers, parents, administrators and researchers—many of whom are still at odds about the classroom efforts public schools are calling bilingual education.

There is nothing simple about this. Like many broad public school programs, the term "bilingual education" covers such vast territory—gifted teachers and dreadful teachers, imaginative new workshops and rote learning in overcrowded classrooms—that it defies the kind of generalizations people seem to want when such a controversial idea is proposed as public policy. So complex is the argument that critics and advocates cannot even agree on how many children in this country come to school with what the jargon calls "limited English proficiency"; the estimates range from 1.5 million to 3.5 million.

But a look at the problems in this massive undertaking, the business of helping immigrant schoolchildren in their own language, might begin at Franklin Elementary, or Franklin Year-Round, as the school is now officially named: its side-by-side buildings now hold children in a schedule that has eliminated the summer break. Down the long hallways, the bulletin boards all acolor with spring tulips and construction paper Humpty-Dumptys, doorways frame bright classrooms crowded desk to desk with the children of the new immigration. Phumpuang Phaisan, Khadihaj Muhammed, Phonevil Pomsouvanh, Kai-Phong Mack, Alejandro Esparza—the names, in careful block lettering, fill pink and green class lists on the desk of Franklin's harried bilingual coordinator, and next to each name the numerical code for the language the child brought to school: Khmer, Tigrinya, Laotian, Cantonese, Spanish.

"If you figure just the amount of time, money and education disruption . . . the fact that English speakers have zero rights . . . this has been costly as hell," said Martha Muller, the coordinator who for the last three months has been shuffling and reshuffling names into lists that will comply with California state education laws. "The law is not meant for this kind of school. It is meant for a nice, neat, orderly Spanish-English population, or a Chinese-English population, or something. But it's not meant for a multilanguage school."

"Now that we're in compliance, it's just as ridiculous as when we were out of compliance," said Michael Phillips, who teaches his combined fourth- and fifth-grade class in both English and the Vietnamese he learned in preparation for a year's special military assignment in Vietnam. "So all my English-speaking kids have to sit there and wait while I'm translating for the Vietnamese. Now who's being served there?"

As chaotic as it is at this school, with nearly every morning bringing new immigrants to the front office to enroll their children, bilingual education at Franklin is in some of the same trouble that has plagued schools across the country for the last decade. It begins with California state law—a law, similar to those in some of the 22 states that mandate or permit bilingual classes, that lays out the number of speakers of any single language that is supposed to trigger a bilingual class.

It was violations of that requirement, among many other complaints, that moved a group of Oakland parents last fall to bring what turned into a bitterly argued lawsuit that accused the city school board of causing "irreparable injury" to thousands of students by failing to offer them bilingual classes. The documentation listed Franklin as one of the worst offenders: the school was missing teachers or aides in five languages, including Laotian and Tigrinya.

How does a school find candidates for a job like that? School officials actually interviewed a few people, Franklin principal Jay Cleckner said, although lawyers for the parents' group insisted Oakland had done far too little recruiting and hiring. But almost nobody qualified as an American classroom teacher, Cleckner said. And if a few spoke English well enough to work as classroom aides, he said, he could not keep them in part-time jobs that paid about $5 an hour and offered no benefits. "I have interviewed for aides and for teachers, people who are very qualified," Clecker said. "But they can go back to work for four times what I can pay them, and I tell them, 'Go. Take care of yourself.' "

The national shortage of qualified teachers has for some years been one of bilingual education's major problems. There is not a single Khmer- or Hmong-speaking credentialed teacher in California, which has the nation's highest numbers of refugees from Cambodia and the part of Laos that was home to the Hmong people. Even qualified teachers who speak fluent Spanish are in short supply in many states; when Houston bilingual administrator Delia Pompa was presented this year with the revised Texas mandates for bilingual education through fifth grade, she calculated that even with extensive recruiting and $1,500 bonuses for the mostly Spanish-speaking dual-language teachers, conventional teaching patterns were going to leave the district short 400 teachers qualified to work in two languages.

"Before, when Hispanics went to college, they went into teaching," said Pompa, who plans to accommodate the shortage by classroom rearrangements like teacher pairing. "Hispanics are starting to go into other professions . . . Teaching, and education in general, is going through a low period. Teaching isn't looked at as a real respected profession. You're looking at a lot of problems."

Hardly anybody seriously expects Franklin's elementary school teachers to learn Khmer or Laotian in their spare time. But one of the ways many areas have adapted to the shortage is by asking teachers to sign up for courses in languages that seem more manageable to learn. In California, state figures show that fully half the "bilingual" teachers are regular teachers who have pledged to learn dual-language teaching methods and become fluent in a second language (usually Spanish, but occasionally English) while a bilingual aide helps them with the children.

That leads to a whole new set of problems. How well those teachers are actually learning both the language and the complicated business of dual-language teaching varies wildly from school to school, particularly since many principals are dubious about the idea to begin with. One elementary school will house an after-hours class for teachers genuinely committed to learning Spanish, and usually doing so on their own time; a second will sign up "bilingual" teachers who plainly have little interest in ever learning more than a few words of the language. Even when they do try, bilingual advocates sometimes wonder what comes of their efforts: a Hispanic attorney tells of the newly trained Texas teacher who stood before a parents' group and began, "Damas y caballos," which is a salutation of sorts; it means "Ladies and horses."

And the proceedings inside the dual-language class are only as effective as the teacher who runs it. In visits this spring to more than 20 bilingual classrooms, a reporter watched one bilingual teacher review long division in English scarcely intelligible through his Spanish accent, and another teacher who spoke no Spanish and left all the Spanish business to an aide she clearly distrusted: "I don't even think she's graduated from high school," the teacher confided.

Here were teachers translating right through history and arithmetic lessons, despite linguists' warnings that simultaneous translation is the least effective bilingual

teaching method because it lets the student listen to the language he knows best. Here were teachers frustrated by school systems that hurried children into full-time English so fast that, as the teachers saw it, some of the point of bilingual education was being lost—the idea that children's English work will be stronger and more confident if they are allowed to fully develop and work in their own language at least part time for more than a year or two.

Here were teachers so tired of the whole bilingual effort—of juggling multiple two-language reading groups, battling supervisors and watching children's confusion when a school offered them dual language at one grade but then abruptly not at another—that the teachers had finally bailed out. "You go crazy—that's why a lot of bilingual teachers go out of the program, because they can't handle it," said Erlinda Griffin, a quadrilingual Filipino who left bilingual teaching seven years ago for a school supervisorial job in the central California farm city of Fresno. Griffin believes bilingual education theory, and she has seen programs that seem to her to use it successfully. "But unfortunately, they were in the minority—there were so few of them."

And here, too, were teachers, nearly all of them monolingual English speakers, convinced that the bilingual classes they had seen were in large part misguided efforts that held a lot of children back. An Arizona teacher remembered Geme, her Navaho student who had sat through five years of bilingual classes before somebody realized the boy was having trouble because he had spoken scarcely a word of Navaho before he came to school. A suburban San Francisco teacher remembered Spanish-speaking children who never seemed to make the promised transition into English. A Rhode Island counselor remembered the Puerto Rican boy, bewildered by his referral to bilingual classes, who told the counselor in flawless English that he had grown up and gone to school in Lawrence, Mass.

"This is the stuff that goes on all the time," the counselor said. "I think a lot of kids are kept in those programs simply to build up the numbers and justify the programs. We've got kids in those programs who are fluent in English."

If anybody does belong in bilingual classes, who is it to be? To this day that generates argument and still another set of complaints. Some states reserve bilingual classes only for children who speak Spanish or some other language, prompting complaints about ethnic and linguistic segregation. California requires them whenever possible to be in classes with native English speakers so the children won't be segregated and will have role models to help them learn the language.

But that doesn't satisfy everybody either. Because most bilingual classes are designed as remedial programs, aimed at moving children into English as rapidly as possible, English-speaking parents have often been disappointed when they allow their children into bilingual classes in the hope that they will learn Spanish. And in towns like Fillmore, a heavily Hispanic southern California farming community where the expansion of bilingual classes set off an angry Anglo protest this spring. English-speaking parents say their children waste time in a class taught partly in another language.

"Who's going to meet *my* daughter's needs?" demanded Judy Collins, a Fillmore parent whose husband recently proposed a controversial city council-adopted resolution making English the "official language" of Fillmore. "The amount of time that teacher is speaking Spanish is time that my child is not getting English instruction," Collins said.

It is complaints like these that have complicated the response to a generally unenthusiastic 1983 bilingual-education report by two federal Department of Education researchers. At the request of a White House policy review group, the researchers examined several hundred studies on bilingual education, many of which concluded that the classes had improved students academic performance, and found only 39 to be "methodologically acceptable." After analyzing those 39 studies, the researchers reported bilingual education producing only mixed results.

"Sometimes kids did better," said Department of Education analyst Keith Baker, the report's coauthor. "Sometimes it had no effect. And sometimes it had negative effects."

Baker and his partner, who have been criticized for their own methodology, suggested in the report that although limited-English-speaking children clearly needed some special attention, education officials might rethink their reliance on classes using native language—that full-time intensive English programs, for example, might be more effective in some cases.

Would Franklin Elementary's Francesca Ferrari, facing her tiny Ellis Island of a classroom earlier this year, have done any of her students a greater service by using their own language?

"This I do not know," she said.

"I do not know what I really think about bilingual education," Ferrari said.

When the Oakland parents' lawsuit was settled in May, with school officials committing themselves to a considerable expansion of the bilingual staff, the central office finally found some qualified teachers' aides for Franklin; a Tigrinya-speaking Ethiopian man now helps in Ferrari's classroom for 80 minutes a day. And she welcomes his presence, she said. He makes things easier for her. Last month they were working on sq words, and Ferrari did not have to go into contortions or bring lemons into class to explain squirt and squint and squid.

These are ideas the children would have grasped without translation, Ferrari said. Demonstrations, in her experience, are sometimes even more vivid than translation. But she is happy to have the aide anyway—"grateful," Ferrari said. "I think it's a sense of security for the children to have him there, I really do."

Her class no longer includes the Spanish-speaking child; it is now all Ethiopian and native English-speaking children, and in March, as a welcoming gesture, Ferrari put up an Ethiopian market poster and wrote the Tigrinya words for "How are you?" in big bright letters on a poster she taped to the classroom door. Camilla 'Ha.

Some weeks later, in discret messages conveyed through the principal's office, Ferrari was told that this had distressed the Ethiopian families. Parents of all but three of her Ethiopian students indicated on signed forms that they wished their children taught exclusively in English, so Ferrari need no longer abide by her implausible promise to learn Tigrinya.

"They don't want their culture brought in," Ferrari said. "They feel they can take care of that at home." She took the poster down and pulled Camilla Ha off the classroom door.

"IMMERSION" SUCCESS FUELS DEBATE

(By Cynthia Gorney)

SAN FRANCISCO.—In a classroom bright with wall decorations, a line of raggedly cut paper pandas stretched overhead, Liana Szeto sat cross-legged on the floor and explained the morning game to the children around her. She would start with five plastic cubes and milk carton with the top cut off, and they were to close their eyes while she hid some of the cubes under the milk carton. Then they could count the remaining cubes and figure out how many she had hidden.

Perhaps Sparky, Szeto suggested, might make the next guess.

Jesse (Sparky) Manger, a small blond boy in standard-issue kindergarten blue jeans and sneakers, squeezed his eyes shut and covered them with his hands. "Sparky," Szeto said. *"Gu yahp bihn yauh gei do go?"*

Just as she had all morning—just as she does for every full school day in a classroom that includes white children, Chinese-American children and a Chinese-Hispanic child—Szeto was speaking straight Cantonese.

Sparky, whisking his hands away and gazing at the single cube left atop the milk carton, contemplated her question: yes, he could guess how many she had left inside. *"Sei,"* he said. Szeto lifted the carton and clapped her hands in approval. Four, of course, was right.

Liana Szeto, a 27-year old Hong Kong immigrant who coaxes and performs her way through each day with a vigor that is almost exhausing to watch, speaks excellent English; she learned it both in her Hong Kong schools and in the junior high schools she attended when her family first arrived in San Francisco. But many of her students don't realize she speaks any English at all. From the first day of school last September, confronted with 24 kindergarten children who by and large spoke not a word of Cantonese, Szeto has never used English in her classroom. She uses posters, gestures, games, songs, repetition, theatrics, picture books, field trips and anything else she imagines might help her teach, but whenever she speaks—from "Please take out your pencils" to "Let's tell the story of the five foolish fishermen!"—she speaks in Cantonese.

And Sparky Manger's mother Judy, an American Airlines ticket agent who has cringed at most American's inabiliiy to manage other languages, is delighted. "With China becoming a world power, in his lifetime, it's really going to be beneficial for him to learn Chinese," she said. "I thought he was going to come home and say, 'Mom, what have you done to me?' And he's never once said anything to me about that. He loves it . . . Now he tells me his name is Jesse Wong sometimes."

There is a label in educationalese for the work Szeto is doing with these children, all of whom were sent to West Portal School because their parents wanted to experiment with a teaching method now being tried in at least 18 public school districts around the country. It is called language immersion, and although the teaching varies from school to school, the principle is the same: English-speaking children, principally from homes where nothing but English is spoken, spend either part or all of their days in classes conducted entirely in another language.

In Baton Rouge, La., fourth-grade children last month were discussing the tax

system, studying the Louisiana state government and answering written test questions about layers of the atmosphere—all in French. In Culver City, Calif., fifth-graders were working long-division problems and reading aloud stories about construction workers and shy cats—all in Spanish.

There is Spanish immersion in Tulsa, French immersion in Montgomery County, German immersion in Milwaukee and Cincinnati. San Francisco school officials, already immersing students into Spanish and Cantonese, are thinking of adding Mandarin. And although some of the programs, like San Francisco's, are too new for any serious evaluation, many administrators have reported results comparable to those out of Canada, where for 20 years public schools have been offering French immersion that University of Southern California linguistics professor Stephen D. Krashen, has written "may be the most successful program ever recorded in the professional language-teaching literature."

In the vast new array of efforts at teaching in two languages, no approach has been so carefully monitored, so widely praised for its effectiveness—and, in one of the more complicated ironies of this whole controversial field, so disturbing to advocates of the more familiar theories of bilingual education, which insist that a child should learn to read and think first in his native language. The vision of these immersion classes, of American-born children learning math and reading from teachers who never address them in English, has prompted opponents of public bilingual education to ask the obvious question: If you can drop an English-speaking child into a special all-Spanish classroom and get him working and thinking in Spanish with no damage to his psyche or test scores, why can't you do the same thing in reverse?

Isn't this a natural way to accustom Spanish speakers to English without having to teach them reading and basic skills in Spanish?

School districts in several states are already trying special all-English programs for Spanish-speakers, and the federal government, both in U.S. Department of Education reports and in increased availability of special funds, has troubled bilingual-education advocates by showing considerable interest in the idea. And the heat this argument has generated—some teachers and language experts use words like "a crock" and "a crime" to describe the practice of immersing Spanish-speakers into special all-English classes—is part of a quiet but spirited national debate about America's attitude toward non-English languages, about the role of language in an immigrant society, about the ties between language and the human spirit.

Show and tell, afternoon kindergarten and first-grade class, Culver City's El Rincon School, just outside Los Angeles. Irma Wright, her black hair curled and a carnation pinned to her lapel, summoned around her a noisy collection of children and announced who would begin.

"Tu no eres primera," she admonished a small blond girl who had clamored to be first. "Cheryl es primera."

The child nodded, resigned to the primacy of Cheryl, and said in English, "Can I be second?"

Thus it went, the children—nearly every one of them from an English-speaking home—looking entirely unconcerned that their teacher spoke to them only in rapid, native Spanish. Cheryl showed off a stuffed gray bear that she said belonged to her mother, and Wright asked, "Quien le dio eso a tu madre?" Nobody had given it to her mother, Cheryl answered. "She saw it and she got it in a store."

"Que tiene este oso en la nariz?" Wright asked, wondering what was appliqued on the end of the bear's nose. The children knew a heart when they saw one: "Un corazon!" they cried.

Irma Wright, a Hispanic woman who grew up in El Paso, has been teaching the kindergarten immersion class since 1971, when the Culver City schools opened the first U.S. version of the program that was generating so much interest in Canada. A school outside Montreal, now in its 20th year, had set off the whole experiment when a group of Engligh-speaking parents asked for a dramatic and effective way to teach their children French; by last year, according to an article in the Canadian magazine Language and Society, 115,000 Canadian children were studying in one of the French immersion programs now offered in every province.

Culver City administrators, under the supervision of linguists at the University of California at Los Angeles, followed almost precisely the original Quebec model: no English at all for the first two years (although the children are free to speak English, and the teacher must be bilingual so that she or he can understand and answer); an hour a day of Engligh reading and language arts in second and third grades; and then a steady increase of English teaching time, until by the fifth grade students are doing more than a third of their classwork in English. "When they leave the elementary school, they are functionally bilingual," said Eugene Ziff, the principal at El Rincon. "They can understand, read, write and speak Spanish in a functional manner, and they have done this without losing any of their basic skills in English."

As he has done for dozens of uncertain parents, Ziff pulled out the mimeographed sheet listing El Rincon's most recent scores on the California Test of Basic Skills, which is administered in both English and Spanish to students in the immersion classes. In 1983 the sixth-grade students were testing out a eighth-grade level on English vocabulary and comprehension. Language mechanics and expression, math concepts and computation—all showed above average scores, and in the case of language expression, far above average. Only English spelling fell slightly short.

As for their Spanish skills, the Spanish reading test scores are not quite up to the average for native language speakers, but a recent visit to Mary Nabours' fourth- and fifth-grade classroom, for example, was startling: children with names like Jennifer Feingold and Pentti Monkkonen read easily from their Spanish texts, or talked in Spanish about characters in the story they had just finished, or worked in longhand on their definitions.

"Catarata—cascada." Waterfall. "Caldo—liquido que se calienta." Broth—liquid that is heated. Their chatter with each other was in English, but at the small horse-shoe table where Nabours worked with one reading group at a time, only Spanish was allowed. Their accents ranged from good to nearly native; Nabours, who is American but lived in Mexico while studying Spanish, speaks with almost no trace of American accent. They discussed words like supongo, suppose, and interes, as in bank interest, and if their grammar was often not quite right, they plowed cheerfully through what they were trying to say. A lively red-haired girl, asked to escort the visitor down to the kindergarten, was asked in Spanish whether she found the two languages difficult to manage, and she said in slightly ungrammatical but entirely unselfconscious Spanish, "No, because I'm used to it."

"They don't have any trouble getting across what they want to say," Nabours said between bites of a sandwich in the faculty lunchroom. "The program encourages creativity in a certain way, but the main thing it encourages—this is my opinion; I can't prove it, but I feel it in every cell in my body—is this feeling of, 'I can' . . . 'If I can speak Spanish, I can do anything. I can do math. I can do science. I can do anything.' "

So why shouldn't it work in reverse? Why shouldn't Spanish speakers learn English the same way?

To answer that, teachers like Nabours believe, you must think about English and Spanish and the social roles they play here. The linguists who designed immersion programs like Culver City's have insisted the programs be used only for children who speak English, children who will go straight into an English middle school, children whose families have sought out the second language and who will never, as long as they live in North America, risk losing the language they grew up with.

CATERING TO ETHNIC GROUPS?

One six-school program in San Diego is using the Culver City model on both English and Spanish speakers, immersing them all into Spanish and then gradually working English into half the school day, but its goal is the same as Culver City's—to encourage bilingualism, and to celebrate the learning and reading of two languages rather than one.

That very notion, the idea that schools should promote bilingualism and should hold advanced classes in both languages, has been thoroughly attacked during public debates over dual-language education for Hispanics. There is still a strong feeling among many teachers and parents' groups that American schools ought to be teaching in English that offering special classes for bilingual children amounts to catering to certain ethnic groups. Indeed, the word "maintenance," commonly used to describe classes in Spanish for fully bilingual students who want to sharpen their Spanish fluency, has developed so dangerous a resonance now that most teachers and administrators hasten in interviews either to distance themselves from it ("We don't believe in maintenance here") or to confide that they personally believe in it but that the district wishes only to have students move rapidly into full-time English.

So when Spanish speakers are immersed into English, as several Texas school districts are now doing in a state-sponsored pilot program, no one imagines that they will gradually have Spanish worked back in to take over half their school day. The point is simply to teach them English, using techniques that have worked for Anglophones in places like Culver City: Speak nothing but English to the children, but let them use Spanish when they wish; use vocabulary and phrasing aimed at children just learning the language; fill the gaps with posters and pantomime and things the children can touch.

This is what it looked like on a recent morning in Houston: A plump, smiling teacher named Rachel Echavarry, travers-

ing the rows of quiet children, held up small picture cards and waited for each response.

"Jesus, what's this?"

"It's a cat."

"What's this?"

"It's a cow."

"Where is the cow?"

Hesitation. Then, tentatively: "The cow—is in—the barn."

There is nothing unique about a class like this; it is standard English as a Second Language (ESL) teaching, offered as part of many public schools' bilingual programs. The difference, at Gregory-Lincoln Education Center and the other Texas schools trying similar approaches, is that Jesus and his classmates are immersed in English all day long—they are never supposed to hear Spanish from their teachers. Indeed, many of the teachers at Gregory Lincoln do not know how to speak Spanish or any of the Indochinese languages nearly a quarter of the students arrive with; instead, in Saturday workshops and in-class training, they have studied ESL teaching techniques.

How well it works—whether these Texas children are having an easier time learning English while keeping up in their other classes—is still in some dispute.

"Thank God for the English immersion," said Linda Hunter, a fourth-grade teacher now at her 10th year at Gregory Lincoln, which used to offer an hour a day of Spanish-language instruction. Her colleague Sherilyn Kozodoy, a third-grade teacher whose class includes two Spanish-speaking children, agreed. "I had students in [my former school] who had been going to the bilingual classes for three or four years and still had difficulty with the English language," Kozody said. "They learn it much more slowly."

Some teachers are similarly enthusiastic in Texas cities like McAllen, which has attracted national attention for its English immersion pilot; and in Virginia's Fairfax County, which for seven years has insisted on intensive English instead of dual-language instruction. But preliminary Texas data indicates so far that the immersion classes there, experimentally begun four years ago in cities that also offered bilingual programs, are producing English test scores no higher than those from the bilingual classes—and there are misgivings about the experiment even among some of the administrators in charge of it.

"I had had one teacher start crying and saying, 'Look, I can't do this, it's not fair to the kids,'" Said Delia Pompa, Houston's bilingual education administrator. "There were others, to be perfectly fair, who thought it was a good option . . . I'll be honest. I would prefer a dual language program, because I don't know what kind of cognitive deficits [the immersion children] are going to have four or five years later. And I think there are going to be some."

Wallace Lambert, the social psychologist and language expert who developed the first French immersion programs in Quebec, has argued for more than a decade that to use these techniques on language-minority children is, as he wrote in a 1984 California Department of Education volume, "not only wrong but dangerous." The danger, he argues, lies in what he calls "subtractive bilingualism"—the elimination in school of the language the child first used to think, to conceive ideas and accept who he is.

"We are not removing their language from school," countered Sally Clyburn, acting instructional supervisor for the Houston schools. "We are removing the language from instruction . . . the students are using their native language. They can be seen walking to the school cafeteria, to and from the playground, using their native language."

"The child is basicaly being told, 'Your language is not worth anything,'" said William Prather, who teaches in Spanish to English speakers at Rock Creek Elementary School's Spanish immersion program in Chevy Chase and who thinks the approach is entirely wrong for non-English speakers. Teachers like Prather and Mary Nabours believe a child whose language is kept out of the classroom will probably lose much of it, if his is not the language of society at large, and that public schools do children a great disservice that way.

"It's like taking a great gift and throwing it away—and some of us fight so hard to try and learn a new language," Nabours said. "I understand it's hard to get bilingual teachers. But I also believe America has a real problem in its understanding of the importance of language . . . I don't consider a person educated unless he speaks another language. If you have a child who speaks Spanish, and you don't use that to teach him to read and write in that language, you're stealing from him. And you're stealing from society, because we need people who can speak those languages."

FAIRFAX: "ENGLISH AND ONLY ENGLISH"

(By Anndee Hochman)

A filmstrip of "Cinderella" played to the small audience of fourth-, fifth- and sixth-graders in Susan Lawrence's Fairfax County classroom at Graham Road Elementary School one recent morning, and Rosa Garcia studiously ignored it.

Instead, she bent over a reading workbook; looking intently at a row of tiny line drawings; a picture of a can, a table followed by the letter "s," a child with a spoon, a birthday cake.

"Can tables eat cake?" she read haltingly to the teacher. Then she answered her own question, giggling along with Lawrence. "No," Rosa said. Tables, she knew, cannot eat cake.

For seven years, Lawrence and other Fairfax teachers of English as a Second Language (ESL) have relied exclusively on such books of word-picture diagrams, filmstrips, flashcards, charts, charades—and patient, continual repetition—to teach children like Rosa. Her teachers will never speak to her in Spanish, nor will they talk to her classmates in their native Urdu, Farsi or Chinese.

About 3,800 students—2 percent of the sprawling Fairfax County school population—are enrolled in ESL classes. Their predominant languages are Korean, Spanish and Vietnamese, although many speak Arabic, Khmer, Chinese, Farsi, Japanese, Laotian and Urdu. In all, they speak 75 different languages, and none of them is in a bilingual class.

"When working with a child in the native language is working against the child learning the English language, that's what I object to," said Esther Eisenhower, Fairfax County's ESL program coordinator. "In the name of a child 'feeling good' about being a Turk, he's graduating from high school with a fifth-grade competency in English."

While bilingual education is an appealing notion in an ideal world, she said, there are few school systems with the funding, public support, native-language teaching materials and multilingual teachers to practice it effectively.

As proof the ESL program works, Fairfax educators point to test results—1980 and 1981 tests showed ESL students meeting or exceeding local and national norms in most subjects—and to children like Rosa, illiterate in her own language but now able to print words and chatter fearlessly in English.

Critics have claimed that affluent Fairfax County, where many students come from diplomatic and well-educated families, is not a fair setting to prove the worth of ESL teaching.

"I don't think that argument holds," Eisenhower said. "I could hardly say these are children of commanders of the Japanese navy or attaches in the Swedish Embassy." Sixty-two percent of ESL students, she pointed out, qualify for free or reduced-price lunches.

Many of Fairfax's ESL students would probably be in ESL classes no matter where they were; few teachers around the country are qualified to teach bilingual classes in Asian or Indochinese languages. And there is an active debate about whether Asian or Indochinese students, generally perceived as academically successful despite their language problems, need bilingual classes at all—particularly the Vietnamese, with their widely publicized climbs to school honor rolls.

Bilingual advocates have suggested that the newer waves of Indochinese immigrants will probably not do as well without bilingual education, since many of the earlier well-educated Vietnamese immigrants who often spoke two or three languages before they left Vietnam. The more recent immigrants, they point out, include thousands whose backgrounds are more like those of many less educated and less literate Hispanic families.

But Eisenhower and Lawrence believe the Fairfax plan will successfully move those children into English too. "I encourage them to read in their native language, to communicate with each other in their native language," Lawrence said. "But as far as the instruction goes, I feel English and only English is the best way."

THE VALUE OF NATIVE LANGUAGE

The argument over language immersion is not really about the merits of the few programs now trying in some formal and monitored way to place non-English speaking children in special all-English classes. There are not very many of those programs—most are either small experiments or are aimed at childeren like the Indochinese, who often have no bilingual teachers available—and it is highly unlikely that in the near future they could replace bilingual classes. Federal funds that can be used for special English immersion programs are limited to less than 10 percent of the $139 million budgeted for bilingual education this year.

The battle over that funding was fierce, though, with bilingual education critics wanting much more of the budgeted money to be available to English immersion-type experiments. Bilingual education advocates fought back, some of them declaring that these special immersion classes were simply a convoluted path back to the days when schools openly sent Spanish and Chinese-speaking children to fend for themselves in standard all-English classes—the kind of approach the Supreme Court prohibited 11 years ago.

So the argument is really about the value and meaning of native language in a child's schooling, and that makes it much bigger

and more complicated than the proceedings inside a few public school classrooms. "I think the issue becomes an emotional issue, and people stop looking at what kids need, and what works for kids," said Houston's Delia Pompa. "It becomes in some ways a threat, and sometimes 'I-made-it-why-can't-they,' and sometimes people bring political baggage and emotional baggage to it. I think sometimes people miss the point."

MORMON PIONEER DAY COMMEMORATION

Mr. SYMMS. Mr. President, I should like to encourage my colleagues to join with the Idaho delegation and communities throughout Idaho in commemoration of Pioneer Day. One hundred and thirty-eight years ago on this day, July 24, the first pioneers from the Church of Jesus Christ of Latter-day Saints, Mormons, entered the Salt Lake Valley in Utah.

Bands of Mormon pioneers had begun leaving their homes in Nauvoo, IL, in 1846 after a history of religious persecution. Their homes and businesses had been raided and burned. Their members and leaders had been tarred, feathered, and imprisoned under illegal sentences. Shortly after Missouri Governor Boggs signed an order calling for the extermination of the Mormons, Joseph Smith, the founder and president of the church, was shot and killed by a mob in the Carthage Jail. To escape this persecution, the church, under the leadership of Brigham Young, left their newly-built homes and set off across the plains in search of a land amidst the mountain tops, a land where they would not be persecuted.

During the long trek across the plains, the pioneers—some in wagons, some with handcarts, many on foot—experienced numerous hardships, including food shortages, diseases, adverse weather, and unfriendly Indians. Their grief over the loss of many loved ones during this time was relieved only by their belief that families would be reunited in a life to come.

After what must have seemed like an endless struggle, they finally arrived at a point overlooking the Salt Lake Valley. Here Brigham Young, very ill himself, proclaimed, "This is the place."

Following the lead of Brigham Young, the members soon set to work to make the land productive. Their lives depended on a good crop.

Disaster nearly struck as their first crops of grain were infested with crickets. Then a most beautiful and welcome sight occurred as great flocks of seagulls appeared and devoured the crickets. The farmers in southern Idaho today, I am sure, would be greatly pleased by a similar relief from grasshoppers.

As new pioneer companies continued to arrive from the East, Brigham Young began to spread the settlers out, sending groups to build cities in Utah, Arizona, and Idaho. In fact, the first city in Idaho, Franklin, as well as many others, including Rexburg and Inkom, were established by these Mormon pioneers.

In this, Idaho's 95th year of statehood, I would like to salute the values brought to Idaho by these early pioneers. The most obvious among these are self-dependence, charity, and hard work.

The Mormons traditionally are self-dependent. They believe in a day's work for a day's pay. They maintain their own welfare system. Applicants, however, are encouraged first to exhaust all other resources, including church job services and family members. Those who do receive welfare are asked to help with upkeep of the church or other such services.

The Mormon people are known for their willingness to help others, regardless of belief. Church members donate their time to work on welfare farms, in Deseret Industries thrift stores, and in food-canning facilities. Food and basic supplies generated by this process are given to welfare recipients and victims of disaster all over the world. Church members have been generous in donating their labor, such as in sandbagging and cleanup efforts in the 1976 Teton Dam flood. They are also generous in donating funds; this January, members of the church fasted one 24-hour period, giving money they normally would have spent on meals for the relief of hunger victims in Ethiopia. This special fast generated $6.5 million.

The same spirit of hard work and perseverance that brought the first church members to Idaho remains with Idahoans today. Although Idaho is currently facing severe economic and agricultural problems, history shows that her people are strong and will pull themselves through tough spots to regain economic stability.

I am proud to recognize today as Pioneer Day for the Church of Jesus Christ of Latter-day Saints, and I congratulate them for the contribution they have made to the State of Idaho and are continuing to make wherever they are found. It is values such as theirs that formed the cornerstone of our great Nation and continue to uphold the principles of government outlined by our Founding Fathers.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations and a withdrawal which were referred to the appropriate committees.

(The nominations and withdrawal received today are printed at the end of the Senate proceedings.)

AGREEMENT BETWEEN THE UNITED STATES AND THE PEOPLE'S REPUBLIC OF CHINA ON PEACEFUL USES OF NUCLEAR ENERGY—MESSAGE FROM THE PRESIDENT—PM 67

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying papers; which was referred to the Committee on Foreign Relations:

To the Congress of the United States:

I am pleased to transmit to the Congress, pursuant to sections 123(b) and 123(d) of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2153 (b), (d)), the text of the proposed agreement between the United States and the People's Republic of China Concerning Peaceful Uses of Nuclear Energy, with accompanying annexes and agreed minute. The proposed agreement is accompanied by my written determination, approval, and authorization, and the Nuclear Proliferation Assessment Statement by the Director of the United States Arms Control and Disarmament Agency concerning the agreement. The joint memorandum submitted to me by the Secretaries of State and Energy, which includes a summary analysis of the provisions of the agreement, and the views of the Director of the United States Arms Control and Disarmament Agency are also enclosed.

The proposed agreement with the People's Republic of China has been negotiated in accordance with the Nuclear Non-Proliferation Act, which sets forth certain requirements for new agreements for cooperation with other countries.

It is the first peaceful nuclear cooperation agreement with a Communist country and the only such agreement with another nuclear-weapon state (the United Kingdom and France are covered by U.S. agreements with EURATOM).

During the last several years, the People's Republic of China has developed ambitious plans for the installation of a substantial number of nuclear power stations. The proposed agreement reflects the desire of the Government of the United States and the Government of the People's Republic of China to establish a framework for peaceful nuclear cooperation. During the period of our negotiations and discussions, China took several important steps that clarify its non-proliferation and nuclear export policies. Premier

Zhao has made important statements of China's non-proliferation policy that make clear that China will not contribute to proliferation. Those statements have been endorsed by the National People's Congress, thereby giving them official status. Based on our talks with the Chinese, we can expect that China's policy of not assisting a non-nuclear weapon state to acquire nuclear explosives will be implemented in a manner consistent with the basic non-proliferation practices common to the United States and other suppliers. Further, in conjunction with China's membership in the International Atomic Energy Agency, effective January 1, 1984, China has said that it will require IAEA safeguards on its future nuclear export commitments to non-nuclear weapons states.

This agreement will have a significant, positive impact on overall U.S.-China relations. It will provide the United States and its companies an opportunity to participate in another aspect of China's energy programs, with possibly substantial economic benefit. The proposed agreement will, in my view, further the non-proliferation and other foreign policy interests of the United States.

I have considered the views and recommendations of the interested agencies in reviewing the proposed agreement and have determined that its performance will promote, and will not constitute an unreasonable risk to, the common defense and security. Accordingly, I have approved the agreement and authorized its execution.

I have also found that this agreement meets all applicable requirements of the Atomic Energy Act, as amended, for agreements for peaceful nuclear cooperation and therefore I am transmitting it to the Congress without exempting it from any requirement contained in section 123(a) of that Act. This transmission shall constitute a submittal for purposes of both section 123(b) and 123(d) of the Atomic Energy Act. The Administration is prepared to begin immediately the consultations with the Senate Foreign Relations and House Foreign Affairs Committees as provided in section 123(b). Upon completion of the 30 day continuous session period provided in section 123(b), the 60 day continuous session period provided for in section 123(d) shall commence.

RONALD REAGAN.

THE WHITE HOUSE, *July 24, 1985.*

MESSAGES FROM THE HOUSE

At 11:05 a.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 729. An act to amend the Panama Canal Act of 1979 in order that claims for vessels damaged outside the locks may be resolved in the same manner as those vessels damaged inside the locks, and for other purposes;

H.R. 1602. An act to amend the Securities Exchange Act of 1934 to authorize appropriations for fiscal years 1986 and 1987;

H.R. 1603. An act to amend the Securities Exchange Act of 1934 to authorize the Securities and Exchange Commission to subject banks, associations, and other entities that exercise fiduciary powers to the same regulations as broker-dealers, pursuant to section 14(b) of the Securities Exchange Act of 1934;

H.R. 1802. An act to amend title 5, United States Code, to establish certain requirements for the procurement by contract of certain services that are reserved for performance by preference eligibles in the competitive service; and

H.R. 2455. An act to provide for the collection of data about crimes motivated by racial, religious, or ethnic hatred.

MEASURES REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 729. An act to amend the Panama Canal Act of 1979 in order that claims for vessels damaged outside the locks may be resolved in the same manner as those vessels damaged inside the locks, and for other purposes; to the Committee on Armed Services.

H.R. 1602. An act to amend the Securities Exchange Act of 1934 to authorize appropriations for fiscal years 1986 and 1987; to the Committee on Banking, Housing, and Urban Affairs.

H.R. 1603. An act to amend the Securities Exchange Act of 1934 to authorize the Securities and Exchange Commission to subject banks, associations, and other entities that exercise fiduciary powers to the same regulations as broker-dealers, pursuant to section 14(b) of the Securities Exchange Act of 1934; to the Committee on Banking, Housing, and Urban Affairs.

H.R. 1802. An act to amend title 5, United States Code, to establish certain requirements for the procurement by contract of certain services that are reserved for performance by preference eligibles in the competitive service; to the Committee on Governmental Affairs.

H.R. 2455. An act to provide for the collection of data about crimes motivated by racial, religious, or ethnic hatred; to the Committee on the Judiciary.

ENROLLED JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on today, July 24, 1985, she had presented to the President of the United States the following enrolled joint resolution:

S.J. Res. 144. Joint resolution to authorize the printing and binding of a revised edition of Senate Procedure and providing the same shall be subject to copyright by the author.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. DANFORTH, from the Committee on Commerce, Science, and Transportation, with an amendment in the nature of a substitute and an amendment to the title:

H.R. 2796. An act to improve security standards for international air transportation.

By Mr. DANFORTH, from the Committee on Commerce, Science, and Transportation, without amendment:

S. Res. 203. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 2796; referred to the Committee on the Budget.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. GRASSLEY (for himself, Mr. HEFLIN, Mr. THURMOND, Mr. BIDEN, Mr. DOLE, Mr. METZENBAUM, Mr. DECONCINI, Mr. KENNEDY, Mr. LEAHY, Mr. DENTON, Mr. MCCONNELL, Mr. SIMON, Mr. DOMENICI, Mr. BENTSEN, Mr. WEICKER and Mr. SASSER):

S. 1487. A bill to amend section 504 of title 5, United States Code, and section 2412 of title 28, United States Code, with respect to awards of expenses of certain agency and court proceedings, and for other purposes; considered and passed.

By Mr. CHILES (for himself, Mr. ANDREWS, Mr. INOUYE, Mr. PROXMIRE and Mr. DIXON):

S. 1488. A bill to authorize appropriations for construction of certain highways in accordance with title 23 of the United States Code, for highway safety and for other purposes; to the Committee on Environment and Public Works.

By Mr. DURENBERGER:

S. 1489. A bill to amend title XVIII of the Social Security Act with respect to the payment amount for ambulatory surgical procedures, and for other purposes; to the Committee on Finance.

By Mr. ROTH:

S. 1490. A bill to amend title 18, United States Code, to allow the imposition of the death penalty for espionage, and for other purposes; to the Committee on the Judiciary.

By Mr. HEINZ:

S. 1491. A bill to amend part A of title IV of the Social Security Act to require States to utilize automated statewide management information systems; to the Committee on Finance.

By Mr. HELMS:

S. 1492. A bill to deny most-favored-nation trade status to Romania; to the Committee on Finance.

By Mr. THURMOND (for himself and Mr. DECONCINI):

S.J. Res. 171. Joint resolution proposing an amendment to the Constitution of the United States with respect to the length of the term of office of the President and Vice President and the number of terms a President may serve; to the Committee on the Judiciary.

By Mr. DECONCINI:

S.J. Res. 172. Joint resolution proposing a Constitutional Amendment to limit Congressional terms; to the Committee on the Judiciary.

By Mr. EAST (for himself, Mr. BOSCHWITZ, Mr. BURDICK, Mr. DOLE, Mr. EXON, Mr. GRASSLEY, Mr. HATCH, Mr. HEFLIN, Mr. HELMS, Mr. JOHNSTON, Mr. LAUTENBERG, Mr. LEVIN, Mr. LAXALT, Mr. MATSUNAGA, Mr. MCCLURE, Mr. MURKOWSKI, Mr. NUNN, Mr. RIEGLE, Mr. SASSER, Mr. SPECTER, Mr. STAFFORD, Mr. STENNIS, Mr. SYMMS, Mr. THURMOND, Mr. ZORINSKY, and Mr. ABDNOR):

S.J. Res. 173. Joint resolution to designate the Month of September 1985 as "National Sewing Month"; to the Committee on the Judiciary.

By Mr. HEINZ (for himself, Mr. SPECTER, Mr. PELL, Mr. CHAFEE, Mr. KENNEDY, Mr. HATCH, and Mr. BRADLEY):

S.J. Res. 174. Joint resolution to designate November 18, 1985, as "Eugene Ormandy Appreciation Day"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. FORD:

S. Res. 202. A resolution to urge negotiators for major league baseball owners and players to quickly settle their differences and avoid a scheduled players' strike; to the Committee on Labor and Human Resources.

By Mr. DANFORTH

S. Res. 203. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 2796; to the Committee on the Budget.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. CHILES (for himself, Mr. ANDREWS, Mr. INOUYE, Mr. PROXMIRE, and Mr. DIXON):

S. 1488. A bill to authorize appropriations for construction of certain highways in accordance with title 23 of the United States Code, for highway safety, and for other purposes; to the Committee on Environment and Public Works.

FEDERAL-AID HIGHWAY ACT

● Mr. CHILES. Mr. President, today I am introducing legislation to extend and reauthorize Federal highway programs for 4 years or for the period of fiscal year 1987 through fiscal year 1990.

My bill, the Federal Aid Highway Act of 1985, lays the base for a smooth transition to the 1990's when the Interstate System will be completed. It attempts to balance the need to preserve our existing highway system against the pressing need to build new capacity in the growth areas of our country. Finally, it looks beyond the Federal highway trust fund as the only source of funding for our highway programs by permitting the use of tolls to help finance important, capacity enhancement highway projects around the country. This legislation, I believe, is both fiscally prudent and realistic as it does not increase highway authorizations beyond the levels that are now authorized for fiscal year 1986 and, therefore, it does not require any new highway taxes to finance its several provisions.

Mr. President, with the exception of the Interstate Construction Program, the last several decades have seen the Federal Highway Program emphasis shift to the preservation and restoration of the existing highways. This highway funding trend has ignored the growing and obvious need for new highways and the expansion and upgrading of existing highways. The need for new highway capacity does not exist only in Florida and other traditional growth Sun Belt States, but it exists in every region of the country where pockets of growth and highway construction have developed.

From the perspective of good transportation policy, we can no longer afford to only maintain or preserve our existing systems. We must also begin to address capacity problems. In attempting to meet both the need to preserve and expand our system of highways, the limitations of Federal resources present an obvious challenge. In order to meet this challenge while not increasing Federal taxes, my legislation proposes to permit States to build new facilities and substantially expand existing facilities by using toll revenues—a financing option which is now severely limited by existing law.

I would like to now describe the main features of my legislation.

First, the Interstate Construction Program is reauthorized for 4 years at the current level of $4 billion a year with the funds to be distributed under existing formulas. The $300 million discretionary program and the one-half percent minimum allocation for all States is retained. In order to accelerate the completion of the Interstate System and meet the 1990 completion date, the bill would do the following: Most importantly, it would effectively remove the obligational ceiling for interstate construction. It would also permit States to transfer up to 10 percent of funds from other highway programs, with the exception of bridge or safety programs, into the interstate program to complete interstate gaps. Additionally, it would permit the administrative approval of the interstate cost estimates and the interstate substitution cost estimates if the Congress fails to act on time. The repeated failure of Congress over the last 3 years to approve the interstate cost estimates and the interstate substitution cost estimates in a timely manner has caused a great deal of disruption to the Interstate Construction Program.

Finally, it would relax the requirement for a 90-percent Federal contribution, giving States the option to use more than 10 percent of State and local funds on interstate construction projects.

The second major feature of my bill is to expand and reinforce user fee philosophy by permitting toll revenues to supplement highway trust fund revenues. The use of toll financing would be limited to those projects which would be new construction or major reconstruction and would result in additional capacity to address congestion problems. Other significant features of my toll proposal would include the following:

First, Federal participation in toll financed projects would be limited to 50 percent;

Second, the requirement to pay back the Federal Government for its investment in a highway when an existing free road is tolled would be eliminated;

Third, tolls would be permitted to remain in place on existing and future toll roads, bridges, and tunnels after the debt has been retired; and

Fourth, toll revenues in excess of operation, maintenance, and debt retirement needs may be retained by the State to be used for other ground transportation projects in the State.

A third major feature of the legislation is the creation of a new National System of Highways. Creation of this new system defines a national focus and looks to the period beyond 1990 when the Interstate Construction Program will be completed. It is created by combining the interstate 4-R or the Interstate Maintenance Program with the primary program and the bridges on those two systems into one new program. Funding under this new program would be distributed by a new formula based one-third on current population data; one-third on lane-miles; and one-third on fuel consumption. Present formulas incorporate several extraneous factors such as land area and rural postage route mileage which have little direct relationship to actual highway funding needs.

Creation of a new National System of Highways meets two objectives. First, it addresses the concept of a new Federal interest highway system that is beginning to take shape as interstate completion grows near. This new National System embodies our primary Federal interest in our National System of Highways. Second, by combining several existing programs in a new National System, program flexibility is greatly increased, permitting States to address their needs with much less Federal redtape. Additional flexibility would be provided by relaxing the Federal match from the current 90 percent for interstate construction and 75 percent for primary road construction, permitting States to contribute a greater share of project costs at their option.

A significant feature of the new National System of Highways would be the creation of a $300 million set aside program to be allocated on a discre-

tionary basis by the Secretary of Transportation. Priority would be given to those projects which accommodate capacity and congestion problems with the Federal share of the project cost limited to 50 percent of the total. Toll revenues would be permited to be used as the local contribution to match the Federal funds.

Creating the new National System of Highways raises the obvious question of the fate of those Federal highway programs not included in the National System. To address that question, the bill calls for a study to be completed and submitted to the Congress within 2 years to address the organization and structure of those remaining highway programs.

Finally, the balance of the bill focuses on the continuation of all other categorical programs at current authorized levels, including the National Highway Traffic Safety Administration programs, with the exception of the Alcohol Incentives Grant Program. This program was intended as a 3-year initiative to get States more involved in measures to curb drunk driving. Only $30 million of the $125 million authorized for this program has been spent and the balance of the funds continue to be available until 1988.

The 8.5 percent minimum allocation, an important feature of current law, would be continued.

Mr. President, this is a significant and major piece of legislation and for that reason, I have attempted to explain it in some detail. In order to supplement this explanation, I would request that a section-by-section analysis of the legislation be printed in the RECORD.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION ANALYSIS

TITLE I

Sec. 101 provides that title I may be cited as the "Federal-Aid Highway Act of 1985".

Sec. 102 provides that references in title I to sections or other provisions are references to sections and provisions of title 23, United States Code except where otherwise specified. Words and terms used in title I are defined as if they were used in title 23, United States Code.

Sec. 103 provides an Interstate construction authorization of $4 billion for fiscal year 1991 in addition to existing authorizations. Pursuant to 23 U.S.C 104(b)(5) such $4 billion would be apportioned on October 1, 1989. The effect of section 103 considered with existing Interstate construction authorization is to provide 4 years of Interstate construction authorizations to be apportioned on October 1, 1986, October 1, 1987, October 1, 1988 and October 1989. Under the current definition of Interstate completion the additional $4 billion authorized by this section will be needed to complete the Interstate System.

Sec. 104 retains current law to provide that no State, including Alaska, shall receive less than ½ of 1 percent of the Interstate construction apportionment scheduled by law to be made on October 1, 1986, October 1, 1987, October 1, 1988 and October 1, 1989. Sec. 104 also permits the expenditure of minimum Interstate apportionments for Interstate 4R, primary, secondary, urban and hazard elimination purposes when the apportionments are not needed for Interstate completion.

Sec. 105 provides for the approval of an Interstate Cost Estimate necessary to apportion the Interstate Construction funds that should be apportioned on October 1, 1985.

Sec. 106 provides for the approval of an Interstate Substitution Cost Estimate necessary to apportion the highway and transit Interstate substitution funds that should be apportioned on October 1, 1985.

Sec. 107 provides an obligation ceiling for Federal-aid highways and highway safety construction for fiscal years 1987, 1988, 1989, and 1990. The provisions of this section are the same as those in force for fiscal year 1985 except that Interstate construction apportionments will receive a dollar for dollar allocation of obligation authority.

Sec. 108(a) provides authorization for the Federal-aid highway programs out of the Highway Trust Fund (other than the Mass Transit Account) for the fiscal years 1987, 1988, 1989, and 1990 that are identical to that provided for fiscal year 1986 except that $50 million per fiscal year is added to the primary authorization and except that there is an Interstate 4R authorization for fiscal year 1987 of $3.15 billion that is in addition to an existing fiscal year 1987 of $3.15 billion Interstate 4R authorization. The existing fiscal year 1987 Interstate 4R apportionment will be apportioned on October 1, 1985. The fiscal year 1987 Interstate 4R apportionment provided by this section will be apportioned on October 1, 1986 in accord with amendments to 23 U.S.C. 104 made by this Act. The net effect of section 108(a) is to maintain the authorizations to be apportioned in the fiscal years 1987, 1988, 1989 and 1990 at the level for fiscal year 1986 plus $50 million. The amounts of primary funds, Interstate 4R funds and bridge funds to be used on the primary and Interstate System to be apportioned are, however, reduced by provisions of this Act which amend 23 U.S.C. 118 to set aside $300 million, $108.6 million from the primary system authorization, $137.1 million from the Interstate 4R authorization, and $54.3 million from the primary and Interstate bridge authorization for a discretionary fund to be used on the primary and Interstate systems (a National discretionary fund).

Sec. 108(b) provides authorizations for the fiscal years 1987, 1988, 1989, and 1990 for the 85 percent minimum allocation program under 23 U.S.C. 157 out of the Highway Trust Fund (other than the Mass Transit Account) of whatever amounts may be necessary.

Sec. 108(c) provides authorization for Motor Carrier Safety Grants of $50 million per fiscal year for the fiscal years 1989 and 1990 out of the Highway Trust Fund (other than the Mass Transit Account). $50 million is the level of authorizations provided in the Surface Transportation Assistance Act of 1982 for the fiscal year 1988.

Sec. 108(d) provides authorizations for the fiscal years 1987, 1988, 1989 and 1990 for transit substitution projects of $400 million per fiscal year from the general funds of the Treasury with 50 percent of the funds to be distributed at the discretion of the Secretary and 50 percent apportioned in accord with 23 U.S.C. 103(e)(4). The $400 million authorization and the 50-50 split are the same as that provided by the Surface Transportation Assistance Act of 1982 for the fiscal year 1986.

Sec. 108(e) retains the disadvantaged business enterprises provisions of section 105(f) of the Surface Transportation Assistance Act of 1982.

Sec. 109 amends 23 U.S.C. 103(e)(4) to provide for the administrative apportionment of Interstate transit and highway substitution funds.

Sec. 110(a) provides a new apportionment formula for Interstate 4R funds, Federal-aid primary system funds, and primary and Interstate bridge replacement funds. The formula is based one-third upon population as shown in the annually updated Federal census, one-third on lane miles on the primary and Interstate systems, and one-third on highway fuel consumption with no State to receive less than ½ of 1 percent of each year's apportionment.

Sec. 110(1), (2) and (3) make conforming amendments.

Sec. 110(b)(4) provides for the administrative apportionment of Interstate construction funds if the Congress should fail to approve an Interstate Cost Estimate.

Sec. 110(c) repeals 23 U.S.C. 104(b)(5)(B), the existing Interstate 4R apportionment formula.

Sec. 110(d) makes conforming amendments.

Sec. 110(e) adds a new subsection to 23 U.S.C. 104 to permit the use of 10 percent of the Interstate 4R, primary, primary and Interstate bridge, secondary and urban apportionments to complete Interstate gaps if requested by the State, approved by the Secretary and in the case of attributable urban system funds, approved by the local officials of the urbanized area involved. The Federal share payable for transferred funds shall be the same as for other Interstate construction funds.

Sec. 110(f) provides that one-half of the fiscal year 1987 Interstate 4R, primary, and primary and Interstate bridge funds, less a set-aside for a National discretionary fund, shall be apportioned as per existing law and one-half according to the amendments made by this Act. The primary authorizations provided by this Act shall be apportioned to the territories in accord with existing law.

Sec. 111(a) amends 23 U.S.C 118 to make conforming amendments and to provide that Federal-aid primary funds, Interstate 4R funds, and primary and Interstate bridge funds shall not lapse when they are unobligated but shall go into a National discretionary fund, and to provide that Interstate 4R funds, Federal-aid primary system funds, and primary and Interstate bridge funds may be obligated on the Federal-aid primary system including the Interstate System. Funds in the National discretionary fund will be available at the discretion of the Secretary for obligation on the Federal-aid primary system including the Interstate System for high cost projects to increase capacity and lessen congestion that cost more than 10 percent of a State's apportionment of Interstate 4R, primary, and primary and Interstate bridge funds in the year of application for the funds. The Secretary may allocate funds from the National discretionary fund only to States that will obligate the funds immediately and, in the case of construction work, begin work within 90 days of obligation. The Federal share payable for projects financed from the national discretionary fund shall not exceed 50 percent but may be less than 50 percent at a

State's option with the concurrence of the Secretary. A total of $300 million will be set aside annually from the Federal-aid primary system authorization, the Interstate 4R authorization, and the primary and Interstate bridge authorization to fund the national discretionary fund.

Sec. 111(b) provides that balances of Interstate 4R, primary, and bridge funds that are unobligated when this Act passes shall be expended without regard to this Act except that they shall not lapse or go into the Interstate 4R discretionary fund but shall go into the National discretionary fund created by this Act.

Sec. 112 makes conforming amendments.

Sec. 113 provides the federal share payable for funds apportioned under 23 U.S.C. 104(b)(1). The Federal share payable for projects financed with apportioned Federal-aid primary system, Interstate 4R, or primary and Interstate bridge funds on the primary system other than the Interstate System will be that in 23 U.S.C. 120(a) and the Federal share payable for projects financed with apportioned Interstate 4R, primary, or primary and Interstate bridge funds in the Interstate System will be that in 23 U.S.C. 120(c). In either instance the federal share payable may be less than the prescribed amount at a State's option with the concurrence of the Secretary.

Sec. 114 amends the toll provisions of 23 U.S.C. 129 and 301. Title 23, U.S.C. section 129(a), as amended, incorporates the toll provisions of 23 U.S.C. 301 and provides that tolls may be imposed by the States on existing Federal-aid highways without the payback of any Federal-aid funds expended on such highways if the highways are publicly owned and operated and if the State enters into agreements to use excess toll revenues for capital transportation projects eligible under title 23, United States Code.

Title 23, U.S.C., section 129(b), as amended, provides that Federal-aid highway funds may be expended in the construction of new toll highways, or the major reconstruction of any toll highways or highways which will be tolled upon the completion of reconstruction, or the construction or acquisition of any toll bridges and tunnels upon compliance with the conditions in 23 U.S.C. 129(b). The Federal share payable for projects under 23 U.S.C. 129(b) shall not exceed 50 percent and may, at the option of the State with the concurrence of the secretary, be less than 50 percent. The highway, bridge or tunnel must be publicly owned and operated. The State must agree to use any excess toll revenues for capital transportation projects under title 23, United States Code, or alternatively, to free the facility from tolls after the State has been repaid its costs.

Title 23, U.S.C., section 129(c) retains existing law to the effect that Federal-aid highway funds may be used on approaches to toll roads, bridges or tunnels and certain assessments and analyses.

23 U.S.C. 129(d)(1) retains current provisions with regard to Federal participation in the construction of ferry boats and also adds the State of Maine to States exempted from certain international water provisions.

23 U.S.C. 129(d)(2) retains existing provisions concerning approaches to ferry boats.

Sec. 114(b) repeals 23 U.S.C. 301.

Sec. 114(c) provides for the cancellation of toll agreements made before the enactment of this act upon reaching an agreement under the new 23 U.S.C. 129.

Sec. 115 amends the highway bridge replacement and rehabilitation program. Federal-aid primary system including Interstate System bridges will be eligible for funding under a combined Interstate 4R, primary, and primary and Interstate bridge program. Other bridges will be eligible for funding under 23 U.S.C. 144. The bridge discretionary program is retained at the current level to cover bridges other than primary and Interstate bridges and bridges previously funded with discretionary funds.

Sec. 116 provides for a post Interstate study to help determine the direction of the Federal-Aid Highway program when Interstate construction is complete. A report is due to the Congress within 2 years and $1,000,000 is authorized from the Highway Trust Fund (other than the Mass Transit Account) to cover the costs of the study.

Sec. 117 contains conforming amendments.

TITLE II

Sec. 201 provides that title II may be cited as the "Highway Safety Act of 1985".

Sec. 202 provides that a reference in title II to a section or other provision is a reference to a section or other provision of title 23 United States Code and that terms and words used in title II have the same meaning as if they were used in the title 23 United States Code.

Sec. 203 provides authorizations out of the Highway Account of the Highway Trust Fund for the Federal Highway Administration's and the National Highway Traffic Safety Administration's safety programs for the fiscal years 1987, 1988, 1989 and 1990 at the same level as authorizations provided for the fiscal year 1986.●

By Mr. DURENBERGER:

S. 1489. A bill to amend Title XVIII of the Social Security Act with respect to the payment amount for ambulatory surgical procedures, and for other purposes; to the Committee on Finance.

MEDICARE OUTPATIENT SURGERY SAVINGS, ACCESS, AND QUALITY ACT

● Mr. DURENBERGER. Mr. President, over the last 6 years I have worked with many of my colleagues in the Congress to promote health system reform through changing Medicare's payment policies. Since its inception in 1965, Medicare had paid hospitals and doctors their costs or charges. Basically, Medicare paid whatever bill it was sent by the providers—Medicare sent a blank check to the hospitals and doctors and said fill it in. This blank check payment system helped the health care system grow, but it also was inflationary and promoted excessive use of health care resources.

The purpose of health system reform has been to maintain or improve quality and access to health care while working the excesses of cost-based reimbursement. That is why in 1983 the Congress developed the prospective payment system for hospital inpatient care under part A of Medicare and this year why Medicare offered voluntary vouchers to Medicare beneficiaries to join health maintenance organizations. The key to these new payment systems is the setting of prices in advance based on averages across hospitals and changing the incentives of hospitals and doctors. This strategy has worked, at least for part A. Hospital length of stay has dropped sharply—2 percent in 1983 and 5.1 percent in 1984. Hospital admissions have also fallen 0.5 percent in 1983 and 4 percent in 1984. The strength of these trends is pushing the cash flow problems of the Medicare trust fund off until 1985.

Mr. President, the picture is not completely rosy for Medicare. There is still work to be done. This is why I rise to introduce S. 1489 the Medicare Outpatient Surgery Savings, Access and Quality Act. S. 1489 is part of the job we health reformers still must do for Medicare—to close all the loopholes which through paying costs or charges send the wrong economic signals to hospitals and doctors and cost Medicare and the elderly more than they should spend on health care. The bill will set a prospective rate for outpatient surgery facilities paid for Medicare beneficiaries. It also includes features to assure quality care and increased access to cost-effective health care.

The bill is only a part of a broader reform for Medicare, progress has been made on the inpatient side. This bill will set the right incentives in place on the outpatient surgery side. And, set in motion the next stage, refinement of payment for the physician services rendered to Medicare beneficiaries.

OUTPATIENT SURGERY

Outpatient surgery in hospitals is critical to Medicare payment reform because: First, it is one of the last areas of hospital services where Medicare pays reasonable cost not a fixed price, second, it is rapidly becoming a big ticket item for Medicare part B payments, and third, it will continue to expand with improved technology and the push by providers and Peer Review Organizations [PRO's] alike to encourage beneficiaries to seek alternatives to expensive inpatient hospital services.

Technological advances in medicine now make it possible to perform many surgical procedures outpatient which previously required a hospital stay. Procedures done outpatient now include such surgery commonly used by Medicare patients as implantation of intraocular lenses—cataract surgery, hernia repair, arthroscopy, and many more. The capability even to implant pacemakers for relatively healthy individuals in an outpatient setting is just around the corner.

Medicare currently pays for outpatient surgery done in doctor's offices, freestanding ambulatory surgical centers [ACS's] and the outpatient departments of hospitals. Because outpatient surgery is same day and requires no overnight hospital stay, it should

be less expensive than comparable inpatient surgery. But it does not always work that way, at least for surgeries performed in outpatient hospital departments.

The chief culprit is cost-based reimbursement—the blank check for the hospital outpatient services, Medicare pays reasonable cost—which, in practice, may or may not be reasonable.

For example, for one of the most common procedures for the elderly, cataract surgery, the fixed inpatient hospital DRG payment is about $1,500. For outpatients, without fixed prices, the charges average $2,200 and can go as high as $4,500. In other words, the costs of the procedure are lower but the price to Medicare is higher.

To put it simply, Medicare is being ripped off—and so are its beneficiaries.

Hospitals can make a lot of money because of this disparity in payment amount and they are doing it. The incentives for hospitals are even discussed publicly. In the July 1985 issue of "Healthcare Financial Management," a hospital controller explains how his institution uses a sophisticated computer program to tell physicians which procedure ought to be performed outpatient to maximize hospital revenue.

Medicare reform is based on changing incentives and it is clear that the incentive is to stack up outpatient procedure costs. This must be halted. Payment by a prospective per-case price on the inpatient side is bringing about real savings. But, these savings are in part being eaten up by the overpriced outpatient surgery which Medicare is buying.

The revenue from outpatient surgeries which hospitals save is even frequently sufficient to allow institutions to waive patient deductibles and copayments and settle for simply receiving Medicare's 80 percent of the reasonable cost. This is undermining the cost-sharing aspect of part B Medicare policy.

The trends are likely to exacerbate these problems. Outpatient surgery is growing while inpatient procedures are declining.

Since 1980, inpatient surgery has declined steadily from over 16.2 million procedures to about 15.5 million. On the other hand, outpatient surgical procedures in hospitals have grown from 3 million to over 5 million during the same period.

In recent years, the dollar volume of part B payments has increased at a rate of 20 percent per year. Freezing physician payments has held this increase down in the short term but cannot stem the tide indefinitely because 41 percent of the increase in part B payments was due to an increase in the volume.

PRO policy is likely to further contribute in this growth of outpatient volume. PRO's which now only monitor inpatient services have objectives to move patient services out of the hospital. Florida's PRO, for example, in the area of cataracts has a goal to reduce the number of inpatient cataract procedures by 51,064, the number of carpel tunnel releases by 1,267 admissions, and the number of foot procedures [DRG 225] by 2,023 admissions. Similarly, the California PRO wants to shift 27,544 cataract extractions, 5,239 inguinal hernias, 11,706 endoscopy and colonoscopy procedures, and thousands of other procedures to the outpatient setting. PRO policy is appropriate, current Medicare payment policy is not.

PROSTHESES

The high cost to Medicare of hospital outpatient services is not a problem of fraud or abuse, but of hosptials having the wrong economic incentives. The incentives are misdirected. Hospital managers are following accepted business practices for a cost-based system. The same cannot be said of the scam which has developed around the sale of intraocular lenses and other prostheses, some used in the outpatient setting, some not.

According to the Inspector General of Health and Human Services, intraocular lenses purchased last year by Medicare and its beneficiaries ranged in cost from $250 to $790 in hospitals and $146 to $408 for those implanted in other settings. In these prices are marketing costs which include enticements to doctors to encourage them to buy one produce line over another. To be frank, these are kickbacks and include trips to the Bahamas, fancy cars, and sophisticated medical equipment.

The kickback is now OK by HHS as long as it is reported by its recipients. But, the ethics of the arrangements and the added cost to Medicare due to these marketing techniques are unconscionable.

This is a clear waste of the public's money. It is even worse when you consider that these lenses cost around $55 to make and can be purchased for as little as $99 by institutions willing to shop. With the payment structure the way it is, however, as long as Medicare is willing to pass through the cost of the lens, the hospital, ASC, or doctor has no incentive to shop around and force the manufacturers to bargain.

SOLUTION

We know how to solve all these problems. The answer is fixed, prospective pricing for all the outpatient surgery Medicare and its beneficiaries purchase, regardless of setting.

Congress began to move down this path in section 934 of the Omnibus Budget Reconciliation Act of 1981. That act authorized the Secretary of Health and Human Services to establish a set of prospective facility rates for outpatient surgery performed in ASC's. The actual rates, set in 1982, equals a fraction of the amount paid for the same procedures in hospital outpatient departments. The cataract operation I talked about earlier which costs up to $4,500 in the hospital is performed for $750 on average in the ASC, inclusive of facility and lens costs.

If Medicare can get the cataract operation for $750, then there is no reason to pay more. That is why S. 1489 is modeled on the earlier act—but goes further.

The bill would extend the ASC prospective payment approach to hospital outpatient surgery for all procedures which the Secretary approves for the ASC—150 are currently approved. As a further refinement, S. 1489 would set a rate which is all-inclusive of the costs associated with a given procedure, including prosthetic devices and lab work. Professional fees are excluded at this point.

Currently, the prosthetic device—for example, the intraocular lens used in cataract surgery—is charged to the patient by the physician. The charges, as I have shown, have no relation to reasonable prices for the devices. The new payment methodology, including a rate with a fair market cost for the prosthetic devices, gives the incentive and flexibility to the facility to buy smart in the marketplace, not succumb to market tactics like kickbacks.

The single rate for each surgical procedure has many advantages. First, it will encourage hospitals and ASC's to provide service in a cost-effective manner. In a sense it will level the playing field between hospitals and ASC's. The hospitals have no incentive now to contain outpatient cost, the ASC's have to. Under this approach all settings will have to be efficient to compete.

Second, in a cost-based environment, costs go up but never come down. New technology that increases efficiency never seems to help lower costs. The bill requires the Secretary to review rates annually. She can adjust the rates accordingly.

In other industries movement on the learning curve toward higher volumes and production cost bring prices down. In health care, the old reasonable cost criterion, has traditionally sustained costs at their developmental levels indefinitely. The prospective payment approach for outpatient surgery will permit the rates to be adjusted.

The drawback of a fixed rate is that providers can do best by maximizing volume. Fortunately, we have not seen a rise in volume on the inpatient side where we use a fixed price per case. This constraint in use of hospital services can be attributed to a number of factors. Among these is peer review by the PRO's.

S. 1489 includes a provision which would require the Secretary to have

PRO's review outpatient surgical procedures. It is critically important that we guard against unnecessary procedures. PRO review will provide the constraint needed to control inappropriate surgery. This is a key provision of the legislation. It will help ensure quality outpatient care.

The cost of PRO review for outpatient surgery should be in the range of $37 million. When this provision of S. 1489 becomes law it is critical that this amount be appropriated. Otherwise, the PRO's will not have the capability to watchdog this area. I will work to encourage my colleagues in the Senate and the House of Representatives to appropriate these funds.

ASC's have proven capable throughout the country of providing quality care at a reasonable price. It is important that these institutions be allowed to compete in this new fixed price marketplace. There have been constraints applied by States which clearly discriminate against ASC's. It is not coincidental that New York State does not include a single ASC. If these institutions meet Medicare specifications, it is time they be freed up to operate. The bill includes language which would prohibit discriminatory practices to inhibit ASC development. Strengthening the ASC's will improve beneficiary access to quality same-day surgery.

Finally, the bill would eliminate the current provision in the law waiving the copayment for procedures provided in ASC's. This provision was originally adopted to help ACS's compete with hospitals. It made sense to give an incentive for beneficiaries to use the cheaper ASC. Now that the program will be moving to a fixed price for all settings, it eliminates the purpose for this policy.

Copayment is an important part of Medicare part B policy. Cost sharing is an additional safeguard against over use of services and an important tool in making the consumer conscious of the cost of care. The cost-conscious consumer will buy smarter.

It is also noteworthy that the lowering of all the payments on the hospital outpatient surgery side will invaribly help the beneficiary. It will mean lower copayments. The beneficiary who now receives his cataract surgery at Yale-New Haven Hospital is paying a copayment of $900 on a $4,500 charge. A prospective rate with a copayment in the $100 to $200 range will greatly benefit him.

PHYSICIAN PAYMENT REFORM

S. 1489 is another step toward reforming Medicare payment. However, it does not directly address the lack of economic incentives for doctors to seek out the most cost-effective setting for patient care. It also does not reflect needed reform in how and what Medicare pays doctors for services rendered.

Under the current system of paying for surgical services, Medicare makes a payment to the surgical facility and provides seperate reimbursement for the charges of all doctors involved in the case. In general, this will include the surgeon, any assistant surgeon, anesthesiologist, and radiologist or other consultants that were employed in the case. The number of doctor services varies dramatically according to the styles of practice in the facility and locale where the procedure is performed.

While there are clearly valid medical reasons for some variation in the per-case cost for professional services, the current systems of payment encourages the proliferation of professional services with no necessary relation to quality of care.

It is the doctor who decides whether a procedure is necessary, when it should be performed, how it should be performed, and where it should be performed. However, he does not have the economic incentives to seek the most cost-effective service, as well as the highest quality care. The incentives must be redirected to help doctors add economics and efficiency to their decisionmaking for patients.

To extend the payment reform process for facilities I have begun in S. 1489, I am drafting further legislation that will provide a single prospective payment to the doctor covering all the costs of an outpatient surgical procedure. The doctor would then be responsible to see that only those professional services expressly warranted by the case are provided. Further, the doctor would have a direct incentive to seek the facility that provides quality service at the lowest cost. The doctor who accepted a Medicare case under this arrangement would retain sufficient compensation, net of payments to other providers, only if those other providers are efficient.

The ultimate key to making this alternative payment system work is setting an appropriate all-inclusive payment. The basis for the facility payment portion is established in S. 1489. The physician payment legislation would extend that process to the establishment of an appropriate professional fee schedule for selected surgical procedures. An advisory panel of recognized experts would be established to develop the required fee schedule. Once the fee schedule was established, combining it with the prospective facility payment would create the all-inclusive payment for the procedure that would be paid to the attending physician.

This alternative physician payment system will significantly modify the incentives in the provision of surgical procedures. It will be another important step in the process of changing the incentives of health care providers to improve access to quality and cost-effective health care.

Mr. President, I ask unanimous consent that a summary of the bill and the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1489

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Medicare Outpatient Surgery Savings, Access, and Quality Act of 1985".

LIMITATION ON REASONABLE COST OR CHARGE

SEC. 2. (a) AMBULATORY SURGICAL CENTERS AND PHYSICIAN OFFICES.—Section 1833(i)(2) of the Social Security Act is amended by adding at the end thereof the following new subparagraph:

"(C) In no case shall the standard overhead amount established with respect to a surgical procedure under subparagraph (A) or (B) exceed the DRG rate for the same surgical procedure when provided on an inpatient basis in a hospital in the same area, as determined under section 1886.".

(b) HOSPITAL OUTPATIENT DEPARTMENTS.—Section 1861(v)(1)(K) of such Act is amended by adding at the end thereof the following new clause:

"(iii) Such regulations shall also provide that—

"(I) the amount of the costs or charges which shall be considered reasonable for facility services with respect to a surgical procedure described in section 1833(i)(1)(A) which is provided on an outpatient basis in a hospital shall be equal to the standard overhead amount with respect to the same surgical procedure when provided in an ambulatory surgical center in the same area, as determined under section 1833(i)(2)(A); and

"(II) the amount of the costs or charges which shall be considered reasonable for facility services with respect to any surgical procedure provided on an outpatient basis in a hospital shall not exceed the DRG rate for the same surgical procedure when provided on an inpatient basis in a hospital in the same area, as determined under section 1886.".

(c) ANNUAL UPDATING.—(1) Subparagraph (A) and (B) of section 1833(i)(2) of such Act are each amended by striking out "shall be reviewed periodically" and inserting in lieu thereof "shall be reviewed and updated not less often than annually to ensure timely compliance with the standards established under this subparagraph,".

(2) Section 1833(i)(1) of such Act is amended by adding at the end thereof (after and below subparagraph (B)) the following: "The lists of procedures established under subparagraphs (A) and (B) shall be reviewed and updated not less often than annually.".

FACILITY SERVICES TO INCLUDE RELATED SERVICES

SEC. 3. (a) Section 1833(i) of the Social Security Act is amended by adding at the end thereof the following new paragraph:

"(5) For purposes of this section, 'facility services' shall include all medical and other health services (as defined in section 1861(s)) which are furnished in connection with a surgical procedure specified under paragraph (1), other than the physicians' services.".

(b) Sections 1832(a)(2)(F) and 1833(i)(3) of such Act are each amended by striking out "services (including all pre- and post-operative services) described in paragraphs (1) and (2)(A) of section 1861(s) and" and inserting in lieu thereof "physicians' services and facility services, including all preoperative and postoperative services,".

(c) Section 1833(i)(4)(A) of such Act is amended by striking out "and with respect to all related services (including physicians' services, laboratory, X-ray, and diagnostic services)" and inserting in lieu thereof "and the physicians' services".

PRO REVIEW

SEC. 4. (A) Section 1154(a)(1) of the Social Security Act is amended by inserting "and subject to the requirements of subsection (d)" after "subject to the terms of the contract".

(b) Section 1154 of such Act is amended by adding at the end thereof the following new subsection:

"(d) Each contract under this part shall require that the utilization and quality control peer review organization's review responsibility pursuant to subsection (a)(1) will include all ambulatory surgical procedures described in section 1833(i)(1)(A) which are performed in the area, or, at the discretion of the Secretary, a statistical sample of selected procedures.".

NONDISCRIMINATION IN TREATMENT OF AMBULATORY SURGICAL CENTERS

SEC. 5. Section 1864 of the Social Security Act is amended by adding at the end thereof the following new subsection:

"(d) Any State having an agreement under this section must provide that no certificate of need requirement, licensure, or other regulatory requirement may be imposed on an entity which seeks to qualify as an ambulatory surgical center under section 1832(a)(2)(F)(i) which is not imposed on similar entities not seeking to qualify under such section.".

COINSURANCE AND DEDUCTIBLE TO APPLY WITHOUT REGARD TO SETTING OF AMBULATORY SURGERY OR ASSIGNMENT

SEC. 6. (a) Section 1832(a)(2)(F)(i) of the Social Security Act is amended by inserting "standard overhead" before "amount determined under section 1833(i)(2)(A)".

(b) Section 1832(a)(2)(F)(ii) of such Act is amended by inserting "standard overhead" before "amount determined under section 1833(i)(2)(B)".

(c) Section 1833(a)(1) of such Act is amended—

(1) by inserting "and" before "(E)"; and

(2) by striking out ", and (F)" and all that follows and inserting in lieu thereof a semicolon.

(d) Section 1833(a)(4) of such Act is amended by striking out "the applicable amount described in paragraph (2) of section 1833(i)" and inserting in lieu thereof "80 percent of the applicable standard overhead amount described in subsection (i)(2) of this section".

(e) Section 1833(b) of such Act is amended by striking out "(3) such total amount shall not include expenses incurred for services the amount of payment for which is determined under subsection (a)(1)(F) or under subsection (i)(2) or (i)(4), and (4)" and inserting in lieu thereof "and (3)".

(f) Subparagraphs (A) and (B) of section 1833(i)(2) of such Act are each amended by inserting "80 percent of" before "a standard overhead amount".

(g) Section 1833(i) of such Act is amended by striking out paragraph (3) and redesignating paragraph (4) as paragraph (3).

EFFECTIVE DATES

SEC. 7. (a) The amendments made by sections 2(a), 2(b), 3, and 6 shall apply to services furnished on or after January 1, 1986.

(b) The amendments made by section 2(c) shall apply on and after January 1, 1986. Prior to January 1, 1986, the Secretary of Health and Human Services shall update the amounts established under subparagraphs (A) and (B) of section 1833(i)(2) of the Social Security Act on the basis of current data to account more appropriately for the costs actually incurred.

(c) The amendments made by section 4 shall apply to contracts entered into or renewed on or after January 1, 1986.

(d) The amendment made by section 5 shall become effective on the date of the enactment of this Act.

BILL SUMMARY—1489

1. Pay a fixed prospective rate for outpatient surgeries regardless of delivery setting—outpatient hospital department or ambulatory surgery center. Currently 150 procedures will get a fixed rate. The Secretary of Health and Human Services can add further procedures to this list.

2. Include in the fixed prospective rate all facility costs including prosthetic devices (e.g. intraocular lens) and lab work.

3. Allow no fixed procedure rate to go above the amount paid for the inpatient DRG for the comparable surgery.

4. Update the outpatient prospective rate to current costs. And, require the Secretary to update the rates at least annually.

5. Mandate PRO review of medical necessity and quality of outpatient surgical procedures.

6. Prohibit discriminatory state practices against ambulatory surgical centers seeking Medicare qualification.

7. Provide a copayment for all outpatient surgery as for all other services provided under Medicare Part B.

By Mr. ROTH:

S. 1490. A bill to amend title 18, United States Code, to allow the imposition of the death penalty for espionage, and for other purposes; to the Committee on the Judiciary.

IMPOSITION OF DEATH PENALTY FOR ESPIONAGE

● Mr. ROTH. Mr. President, I am today offering an amendment to section 794, title 18, United States Code, which deals with espionage against the United States.

We have all been sickened by the recent revelations of spying against our government—allegedly carried out on behalf of foreign governments by our own citizens. Their treachery disgusts all decent Americans and causes us in the legislature to reexamine current policies, procedures, and laws designed to safeguard our secrets and deter from action those who would consider selling out their country. Clearly, present statutes are not perceived as strong enough, nor is punishment perceived as sure enough, to dissuade these traitors from their activities; activities we are told which are motivated as much by a lust for money as for political reasons—perhaps more.

My amendment will, most importantly, cure the present defects in the espionage statute so that the death penalty can be constitutionally imposed in appropriate circumstances. Certainly, espionage during time of declared war and war-like conflict involving the dedication of our military forces against a foreign power is especially dangerous to the national security and places in peril the lives of American military members engaged in operations against the enemy. In such circumstances I believe the ultimate penalty should be among the punishments available for consideration.

Likewise, there are certain classes of information the unauthorized release of which puts our security and our people in grave jeopardy. Including among those is the compromise of information concerning nuclear weapons, retaliation or defense capabilities of the United States, intelligence and counterintelligence operations, and major elements of defense strategy, among others. Because of the peril which could result from the loss by espionage of these items I view the death penalty as an appropriate punishment in such cases, especially in light of recent events which indicate that the perpetrators may just be looking for some fast bucks. Perhaps knowing that their greed may lead to this ultimate punishment will cause them to think twice. I can't believe that someone in full control of their faculties would risk their life for 50,000 KGB dollars.

Finally, this amendment will reflect the seriousness with which Congress views espionage against the United States by requiring a minimum penalty of 20 years in prison for those convicted. And in all cases, when a term of years is the penalty imposed, there will be no opportunity for early release or probation.

These are tough measures but I believe they are appropriate sanctions for one of the most serious crime a person can commit.

This bill will amend section 794 of title 18, United States Code which enumerates the offense of espionage and provides penalties for violations.

The amendments' effects would be as follows:

First. Amendment to subsection (A): Create a minimum term of 20 years imprisonment upon conviction, and provide for the sentence of death during peacetime if it is found that the offense involves enumerated areas of espionage.

Second. Amendment to subsection (B): Expands beyond congressionally declared war the circumstances of combat involving United States troops where the penalties would attach and creates a minimum term of 20 years imprisonment upon conviction. This amendment would include "Police Actions" such as the Korean and Vietnam conflicts as well as military oper-

ations such as the Grenada action as among those covered by subsection (B).

Third. Amendment in the form of subsection (D): Provides for a constitutionally-mandated hearing in which factors in aggravation and mitigation are considered prior to imposing the sentence of death.

Fourth. Amendment in the form of subsection (E): Provides that no person sentenced to a term of years for espionage is eligible for parole or probation during the term of imprisonment imposed.●

By Mr. HEINZ:

S. 1491. A bill to amend part A of title IV of the Social Security Act to require States to utilize automated statewide management information systems; to the Committee on Finance.

IMPROVEMENT TO AID TO FAMILIES WITH DEPENDENT CHILDREN PROGRAM PAYMENT SYSTEM

● Mr. HEINZ. Mr. President, we face a severe crisis in our States' aid to families with dependent children payments system. Nationally, approximately 8 percent of all AFDC payments are made incorrectly—at a time when only half of the 13 million impoverished children in our country receive AFDC. The Federal Government has now sanctioned 27 States, with more sanctions on the way. Clearly, it is in everyone's interest to have the best possible AFDC administration.

In 1979, when Medicaid payments were also in poor condition because of antiquated State administration practices, I consponsored S. 731 which mandated the Medicaid management information system. Since that time, Medicaid payments have improved substantially. Thus, I am pleased to introduce legislation which will mandate the family assistance management information system by fiscal year 1989. It is my belief that this system, developed by HHS almost 6 years ago, will provide the kind of quality AFDC administration that we must have.

The Federal Government has tried many devices to encourage the States. Presently, the Treasury will reimburse 90 percent of a State's cost to implement FAMIS. Yet, only three States—North Dakota, Alaska, and Wisconsin—have gone so far as to have their systems certified by HHS. Other States are moving ahead with the system, but some have received Federal funds and then backed out on implementation all together. Thus, if we are to bring about the quality of administration that Congress has insisted upon, we must mandate the system.

Mr. President, my legislation will ultimately save the Government money, and be certain that the neediest children are those who receive AFDC. This is what quality welfare administration should be, and we should expect no less. It is my hope that my colleagues will join me in sponsoring this urgently needed legislation, and I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1491

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) STATE PLAN REQUIREMENT.—Section 402(a)(30) of the Social Security Act is amended to read as follows:

"(30) provide for the establishment and operation (directly or by contract) of an automated statewide management information system which meets the requirements of section 413 and is approved by the Secretary;".

(b) SYSTEM REQUIREMENTS.—Section 413 of the Social Security Act is amended to read as follows:

"MANAGEMENT INFORMATION SYSTEM

"SEC. 413. (a) SYSTEM REQUIREMENTS.—For purposes of sections 402(a)(30) and 403(a)(3)(B), an automated statewide management information system must meet the following requirements:

"(1) The system must be designed to effectively and efficiently assist management in the administration of the State plan approved under this part so as to—

"(A) control and account for all the factors in the total eligibility determination process under such plan, including but not limited to—

"(i) identifiable correlation factors such as social security numbers, names, dates of birth, home addresses, and mailing addresses (including postal ZIP Codes), of all applicants for and recipients of aid to families with dependent children and the relative with whom any child who is such an applicant or recipient is living, to assure sufficient compatibility among the systems of different jurisdictions to permit periodic screening to determine whether an individual is or has been receiving benefits from more than one jurisdiction; and

"(ii) checking records of applicants for and recipients of such aid on a periodic basis with other agencies, both intrastate and interstate, for determination and verification of eligibility and payment pursuant to requirements imposed by other provisions of this Act;

"(B) control and account for the costs, quality, and delivery of funds and services furnished to applicants for and recipients of such aid;

"(C) notify the appropriate officials of child support, food stamp, social service, and medical assistance programs whenever the case becomes ineligible or the amount of aid or services is changed;

"(D) provide for security against unauthorized access to, or use of, the data in such system; and

"(E) be compatible with the claims processing and information retrieval systems utilized in the administration of State plans approved under title XIX, and State programs with respect to which there is Federal financial participation under title XX.

"(2) The system must be established and operated in accordance with an initial, and annually updated, advance automatic data processing planning document which when implemented will generally carry out the objectives of such system set forth in paragraph (1), as determined by the Secretary. Such document must—

"(A) provide for the conduct of, and reflect the results of, requirements analysis studies, which include consideration of the program mission, functions, organization, services, constraints, and current support, of, in, or relating to, such system;

"(B) contain a description of the proposed statewide management system, including a description of information flows, input data, and output reports and uses;

"(C) set forth the security and interface requirements to be employed in such system;

"(D) describe the projected resource requirements for staff and other needs, and the resources available or expected to be available to meet such requirements;

"(E) include cost-benefit analyses of alternative management systems, data processing services, and equipment, and a cost allocation plan containing the basis for rates, both direct and indirect, to be in effect under such system;

"(F) contains an implementation plan with charts of development events, testing descriptions, proposed acceptance criteria, and backup and fallback procedures to handle possible failure of contingencies; and

"(G) contain a summary of proposed improvement of such system in terms of qualitative and quantitative benefits.

"(b) REVIEW AND APPROVAL—(1) The Secretary shall, on a continuing basis, review, assess, and inspect the planning, design, and operation of statewide management information systems, with a view to determining whether, and to what extent, such systems meet or continue to meet the requirements imposed under this section, and shall approve those systems which meet such requirements.

"(2) If the Secretary finds with respect to any statewide management information system that there is a failure substantially to comply with the requirements of this section, then the Secretary shall not approve, or shall suspend approval of, such system until compliance with the requirements of this section is met or restored.

"(c) TECHNICAL ASSISTANCE.—The Secretary shall provide such technical assistance to States as the Secretary determines necessary to assist States to plan, design, develop, install, and provide for the security of, the management information systems.

"(d) MODIFIED REQUIREMENTS FOR PROGRAMS ADMINISTERED ON A COUNTY LEVEL.—The Secretary shall establish modifications of the requirement that the management information system be a statewide system, to the extent that such modifications are necessitated because aid to families with dependent children is provided through a county (or other political subdivision) program. Such modifications must provide that there be maintained a capability for statewide central eligibility clearance, and a capability for statewide reporting. Approval under subsection (b) shall apply on a statewide basis.'.

"(c) CONFORMING AMENDMENT.—Section 403(a)(3)(B) of the Social Security Act is amended to read as follows:

"(3) 90 percent of so much of the sums expended during such quarter as are attributable to the planning, design, development, or installation of an automated statewide management information system which meets the requirements of section 413; and".

"(d) EFFECTIVE DATE.—The amendments made by subsections (a), (b), and (c) shall apply to calendar quarters beginning on or after October 1, 1988, but any State may choose to have such amendments become

applicable to such State effective on the first day of any calendar quarter, selected by the State, prior to October 1, 1988.

"(e) MORATORIUM ON ERROR RATE SANCTIONS.—Section 403(i) of the Social Security Act is amended by adding at the end thereof the following new paragraph:

"(5) This subsection shall not apply with respect to the first fiscal year during all of which the State has in operation an automated statewide management information system approved by the Secretary under section 413." ●

By Mr. HELMS:

S. 1492. A bill to deny most-favored-nation trade status to Romania; to the Committee on Finance.

DENIAL OF MOST-FAVORED-NATION TRADE STATUS TO ROMANIA

● Mr. HELMS. Mr. President, it is time for the United States to stop rewarding the oppressive, tyrannical regime of Romania with most-favored-nation trade status. The United States tried, unsuccessfully, to affect Romania's repressive policies by giving that government a lucrative trade agreement. This agreement is a great economic benefit to Romania, but after 15 years Romania yet maintains the worst human rights record in the Soviet bloc—second only to the Soviet Union.

Mr. President, a few examples of human rights abuses include the mandatory registration of all typewriters, an "education tax" levied on all emigrants, the demolition of churches, and the transformation of much needed Bibles into toilet paper.

Obviously, Mr. President, the repeated and automatic granting of most-favored-nation trade status is not the solution to the problem. Therefore, I am introducing today a bill which would deny MFN to Romania.

Continuing preferential trade would condemn the people of Romania to more of the same—systematic religious persecution and total disregard for human rights. Rather, let us send a message to the people of Romania that we will no longer be Ceausescu's accomplice—that we expect improvement of the system under which they live.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1492

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the General Headnotes and Rules of Interpretation to the Tariff Schedules of the United States (19 U.S.C. 1202) are amended by inserting "Romania" after "Outer Mongolia" in headnote 3(f).

(b)(1) Notwithstanding any other provisions of law, the products of Romania shall not receive nondiscriminatory (most-favored-nation) trade treatment.

(2) No agreement may be entered into with Romania under section 405 of the Trade Act of 1974 (19 U.S.C. 2435) and no proclamation may be issued by the President under section 404(a) of the Trade Act of 1974 (19 U.S.C. 2434(a)) with respect to Romania.

(c) Notwithstanding any other provision of law, Romania may not participate, directly or indirectly, in any program under which the United States extends credit, credit guarantees, or investment guarantees. ●

By Mr. THURMOND (for himself and Mr. DECONCINI):

S.J. Res. 171. Joint resolution proposing an amendment to the Constitution of the United States with respect to the length of the term of office of the President and Vice President and the number of terms a President may serve; to the Committee on the Judiciary.

LIMITING THE PRESIDENCY TO A SINGLE SIX YEAR TERM

Mr. THURMOND. Mr. President, today along with Senator DECONCINI, I am introducing a joint resolution proposing an amendment to the Constitution limiting the tenure of a President to a single 6-year term. This is a measure that has long been needed to ensure that the office of the President will be one of emphasis on national issues and problems, and not one of concern for reelection.

Mr. President, I wish to note at the outset that the need for this amendment does not result solely from our experience with any one President. During the first term of many administrations, both Republican and Democrat, much of what the President has said or done has been interpreted as being designed to improve his chances for reelection. Few would doubt that a great temptation confronts Presidents to base policies on perceived enhancement of popularity. This temptation has no place in decisionmaking, which ought to be concerned only with what is in the Nation's best interest.

The Presidency is one of three cornerstones in our Federal system, and I am introducing this joint resolution because I believe we need to rescue it. The tempo, pressures, and problems of these times, which we in the Senate know well, have grown to a point that one must doubt the ability of even the greatest of Presidents to meet the responsibilities which come with his office at the same time he meets the demands of a mounting national campaign for reelection.

The pressures of the job combined with the pressures of campaigning can bend an incumbent President physically, just as they can bend his policies. As if it were not enough to preside over the departments and agencies of the executive branch, to be Commander in Chief of the Armed Forces and ceremonial head of state, we invite our Presidents to go to the country as candidates, defend their policies in a heavy schedule of State primaries, and exercise their powers of incumbency in a long struggle for renomination and reelection.

The idea of a single-term Presidency was not conceived in the stress of modern politics. The issue of Presidential reeligibility was heavily debated during the Constitutional Convention which concluded that unlimited succession was desirable.

But the experiences of the early Presidents renewed the advocacy of the single term, and the case was put strongly in 1828 by Virginia Representative Alexander Smyth:

> The honor, the welfare, the tranquility of the Nation, the fairness of elections require that the President should not be a candidate.

President Andrew Jackson was persistent in urging the reform in each of his annual messages to Congress. He stressed his special concern that Presidents are tempted to abuse their powers in pursuing reelection.

Many leading public figures, including Henry Clay, Benjamin Harrison, Benjamin F. Wade, and Charles Sumner, endorsed the reform in the 19th century. Rutherford B. Hayes proposed it in his inaugural address; and Grover Cleveland, accepting the Presidential nomination in 1886, described a President's eligibility for reelection as a "most serious danger to that calm, deliberate, and intelligent action which must characterize a government by the people." By 1896, the proposal to limit the President to one 6-year term had been introduced in Congress more than 50 times.

In 1912, the Democratic platform advocated a single-term President. After the general election, on February 1, 1913, the Senate, by a vote of 47 to 23, proposed such an amendment. However, the House did not adopt the resolution.

In acting to avert a repetition of Franklin D. Roosevelt's four terms, Congress voted in 1947 to adopt the George Washington precedent, amending the Constitution to set a mandatory limit of two 4-year terms. Some members argued for the single-term alternative, but such a provision was not adopted.

The major argument that has been raised in opposition to the single, 6-year Presidential term is that a President's power will be seriously diminished if he is obliged to enter the Oval Office as a lame duck. Many insist that a President gains strength from his exertions to be reelected. But by enacting the 22d amendment, Congress committed any President who wins a second term to lame duck status.

Dwight Eisenhower, the only President who, to date, has served a full second term under the limitations of the 22d amendment, did not feel that his inability to run again imposed any handicaps or loss of influence. Eisen-

hower became, in fact, a strong proponent of the single-term Presidency.

Although it is still early in his second term, I do not believe that President Reagan has shown any signs of the so-called "lame duck effect." I do not believe that we will see any such effect during his final term.

President Carter was a convert to the single term while in office. The reason, he explained:

Is that no matter what I do as President now, where I am really trying to ignore politics and stay away from any sort of campaign plans, and so forth, a lot of the things I do are colored through the news media and in the minds of the American people by, "Is this a campaign ploy or is it genuinely done by the incumbent President in the best interest of our country without any sort of personal advantage involved?" I think that if I had a 6-year term, without any prospect of re-election, it would be an improvement.

Mr. President, the Nation will gain more, it seems to me, from the services of a President who is liberated from reelection pressures than it will lose in sacrificing its right to pass upon a President's performance after 4 years. With the increased pressures of a long string of hard-fought primaries before him and the general election after that, a President's judgment on issues of substance are inevitably colored by his need to build a political base for reelection. He is harder and harder pressed to find time and attention to deal with the issues which confront him, but at the same time he is obliged to allocate increasing amounts of time and attention to his political prospects. This leads him to rely on aides whose preoccupation in politics more than on those aides directly concerned with the substance of government. As he behaves more and more like a candidate, the more he is viewed as a candidate by the media, the public and, very importantly, the international community, before whom he is the spokesman of the free world.

The 4-year cycle is being shortened by the pace of events. A newly installed President has only a short time to gear up his administration and get his program started before the Nation's attention turns to the congressional elections. There once was a haitus between the congressional elections and the start of Presidential campaigning, Presidential candidates now believe in starting early so the incumbent faces challengers when he is barely into his third year. The quadrennial cycle is allocating more and more time to politics, less and less to the serious business of government.

Mr. President, I believe as we enjoy our 210th year as a Nation, we are fortunate to have a President who is unhampered by the prospect of campaigning for reelection. The problems he must face are prodigious. They pose a serious threat to our Nation and demand his full attention, as well as our own. It is my opinion that we will serve ourselves well by giving our future Presidents more time to govern, and especially more time to face these problems unhindered by the outside pressures created during a reelection campaign. This amendment will provide them with that opportunity.

Mr. President, I ask unanimous consent that the proposed amendment be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 171

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constituion of the United States:

"ARTICLE

"SECTION 1. The term of office for the President and the Vice President shall be six years. No person otherwise eligible under this Constitution to be President shall be eligible to be President if he has previously been elected to such office, and no person who has held the office of President, or acted as President, for more than two years of a term to which some other person was elected President shall be eligible to be elected to the office of the President.

"SECTION 2. The term of office provided for the President and Vice President by section 1 of this article shall apply to the terms of office of Presidents and Vice Presidents elected after the date on which this article is ratified.

"SECTION 3. This article shall be valid only if it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years after its submission to the States for ratification."

By Mr. DECONCINI:

S.J. Res. 172. Joint resolution proposing a constitutional amendment to limit congressional terms; to the Committee on the Judiciary.

LIMITATION ON CONGRESSIONAL TERMS

Mr. DECONCINI. Mr. President, I rise today to once again introduce a joint resolution proposing a constitutional amendment to limit congressional terms. I have introduced such an amendment in every Congress since the 95th.

If I may, Mr. President, I would like to consider for a moment how the Constitution came to specify no maximum length of service for Members of the House and Senate. Under the Articles of Confederation, delegates to the national Congress were restricted to serving only 3 out of each 6 consecutive years. The drafters of the articles viewed this scheme of "rotation in office" as a check on the power accrued by veteran legislators. At the Constitutional Convention, the Founding Fathers decided to break from the articles by placing no limitation on the number of terms Members of Congress could serve. The founders believed under the new system they were forging that rotation or other limitations were unnecessary to check legislative power. The biggest check on power was the Constitution itself, under which the founders were certain no legislator had more power than any other citizen.

Although I am reticent to question the wisdom of the Founding Fathers, I must profess that I find the decision to allow unlimited terms of office unsound. In practice, this has allowed individuals to be reelected to the Senate and House for unlimited periods of time. I cannot argue that this has brought us bad government. Nor would I try to make any case which disparaged the superb leadership which both Houses of the legislature have provided the Nation. What I would argue, though, is that the absence of any limitation on service in the legislature has worked against equal and fair representation.

As you are well aware, Mr. President, the need to organize each Chamber in a reasonable and responsible fashion has over the decades evolved into what is now known as the seniority system. Under this rule, responsibilities within the committee structure of the two Houses are allocated on the basis of tenure in office. While the seniority system has in some measure helped Congress operate smoothly, it has in turn diminished equal representation of individuals and States.

If they are so inclined, senior Members, by virtue of the power and influence the seniority system confers upon them, can direct an inordinate amount of congressional time and Federal funds to address the concerns of their home States. I do not suggest, Mr. President, that senior Members exercise their powers perniciously, but rather they simply respond to political pressures; especially those emanating from their home States. States with junior members in either both or a single House are at a distinct disadvantage when competing for either congressional action or Federal dollars.

Mr. President, we are bound by oath to honor the intent of the Constitution. The Constitution clearly and unmistakably mandates that every individual, district and State receive equal treatment within the Halls of Congress. As long as Members of Congress can seek unlimited terms, however, the seniority system will continue to flourish and the intent of the Constitution will be frustrated. By limiting congressional terms, Mr. President, we can honor the intent of the Constitution and ensure that all who serve in Congress do so on equal footing.

In addition to a check against misuse of power, I believe that the amendment I propose will revive the citizen legislator. Limiting terms will open congressional seats to more people, especially the young and old who will undertake a career in public service

during or after another lifelong career. Our theory of democracy suggests that as many members of society as possible should be given the opportunity for such service. I strongly believe, Mr. President, that a constitutional limitation service in the legislature will reaffirm our faith in the representative nature of our political institutions.

On a personal note, Mr. President, I find this whole issue very troubling. When I first ran for the Senate I promised the people of Arizona that I would introduce an amendment to limit congressional terms. As I mentioned earlier, I have done so in every Congress since 1977. During my initial campaign I also promised the people of Arizona that I would limit my own stay in Senate to two terms. Nevertheless, Mr. President, I have recently announced that I would not rule out the possibility of seeking a third term in office.

As you know, Mr. President, my distinguished colleague from Arizona, [Senator GOLDWATER] plans to retire in 1986. If I choose to limit my tenure in office to two terms, forgoing reelection in 1988, Arizona will have two first-term Senators during the 101st Congress. Arizona has only very recently begun to grow and thrive, and many of my Arizona constituents are afraid that if I step down now it will have a detrimental effect on the legislative needs of Arizona well into the next century. It seems, Mr. President, that the very seniority system I oppose may, in fact, force me to retract my two-term promise.

Before I relinquish the floor, Mr. President, I would like to make two final points. First, I would like to remind my colleagues that I am not the first nor likely to be the last to call for a limitation on congressional terms. The first congressional tenure reforms were proposed in 1789. Presidents Truman, Eisenhower, Johnson, and Nixon all sought tenure reform. In 1981, Gallup polls showed 61 percent of the general public in favor of limiting Senators' terms and 59 percent for limiting Representatives' terms. Second, I would note that as a people we have decided that no person should serve as President for more than two terms, or under unusual circumstances, for as long as 10 years.

Last, Mr. President, I ask my Senate and House colleagues not to look upon this proposed amendment as a threat to their political influence, but rather that they look upon it as yet another opportunity to perfect the system of government in which we all have such a stake.

I ask unanimous consent that a copy of the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 172

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution if ratified by the legislatures of three-fourths of the several States within seven years after its submission for ratification:

"ARTICLE —

"SECTION 1. No person shall be elected to the Senate for more than two full terms. No person shall be elected to the House of Representatives for more than seven full terms.

"SECTION 2. Notwithstanding the provisions of section 1 of this article, any person may serve not more than fourteen years as a Senator or not more than fifteen years as a Representative.

"SECTION 3. For purposes of determining eligibility for election under section 1 of this article, no election occurring before the date this article is ratified shall be taken into account. For purposes of determining years of service under section 2 of this article, no service of any part of a term of office by a Senator or a Representative ratified shall be taken into account."

By Mr. EAST (for himself, Mr. BOSCHWITZ, Mr. BURDICK, Mr. DOLE, Mr. EXON, Mr. GRASSLEY, Mr. HATCH, Mr. HEFLIN, Mr. HELMS, Mr. JOHNSTON, Mr. LAUTENBERG, Mr. LEVIN, Mr. LAXALT, Mr. MATSUNAGA, Mr. MCCLURE, Mr. MURKOWSKI, Mr. NUNN, Mr. RIEGLE, Mr. SASSER, Mr. SPECTER, Mr. STAFFORD, Mr. STENNIS, Mr. SYMMS, Mr. THURMOND, Mr. ZORINSKY, and Mr. ABDNOR):

S.J. Res. 173. Joint resolution to designate the month of September 1985 as "National Sewing Month"; to the Committee on the Judiciary.

NATIONAL SEWING MONTH

● Mr. EAST. Mr. President, for the past 3 years I have been the sponsor of a joint resolution designating September as "National Sewing Month." I am pleased that Congress passed previous joint resolutions in 1982, 1983, and in 1984 which were signed into public law by President Ronald Reagan. A similar joint resolution has been introduced each year by my colleague in the House, Congressman BILL BONER of Tennessee.

This year I am proud to reintroduce the "National Sewing Month Resolution" with 25 of my colleagues in the Senate as cosponsors. I thank these gentlemen for their support of this proposal.

Mr. President, I am indebted to the chairman of the Senate Committee on the Judiciary, the Senate majority leader, and the Senate minority leader for bringing last year's joint resolution to the floor and assisting in its passage. I look forward to their continued help in having the Congress pass the resolution to President Reagan for signature.

The support I have received this year from my colleagues on the "National Sewing Month Resolution" is most encouraging, and I believe this support reflects the importance of the sewing industry to our economy.

As you know, Mr. President, "National Sewing Month" is an industrywide promotion designed to increase home sewing interest, consumer education, and family sewing participation under a single sewing theme. This coming September marks the fourth industrywide effort to revitalize the sewing spirit in America.

As my friends in the Senate know, I am a strong supporter of the family and family values. I believe that home sewing has many benefits that add to the strength of the family. It is estimated, for instance, that over 50 million Americans sew at home, and over 40 million sew at least part of their wardrobe. For many, sewing skills acquired at home and in home economics classes of local junior high and high schools, have led to valuable and creative careers in fashion design, retail merchandising, pattern making, and textiles. Home sewing contributes not only to these careers but also to individual enjoyment, pride, and creativity as well.

The home sewing industry contributes greatly to the economic life of the Nation. It employs thousands of people directly in the manufacture, wholesale, retail, and service sectors. In addition, thousands more are associated with the home sewing industry as teachers, mechanics, truckdrivers, and many other professions. The industry generates over $3.5 billion in sales annually and invests millions of dollars of capital in plans and machinery.

This September, the American Home Sewing Association will conduct an extensive nationwide promotion of "National Sewing Month." A wide variety of community groups will be joining that campaign including 4-H Clubs, the Girl Scouts, Future Homemakers of America, home economics teachers, and others.

At this point, Mr. President, I applaud the work of the American Home Sewing Association, and the approximately 19,000 retailers responsible for moving the home sewing sales in the United States to over $3.5 billion each year. AHSA retail members vary in size from small, individually owned stores to major, full-service chains, and their service provides economic benefit to communities across the country in which they work.

Over 45,000 educators, consisting of junior and senior high school teachers, college professors, extension home economists, and retailer-educators, are actively engaged in sewing skill development. This group of educators is important to growth of the home sewing

industry. AHSA, through its teacher service division, works with professional educators to support home sewing activity. In addition, the AHSA, working through a guild network of nearly 8,000 active members in chapters throughout the country, has programs for the 90 million Americans who sew at home.

In conclusion, I urge my colleagues in the Senate to support the "National Sewing Month Resolution" and to urge their constituents to support the sewing industry in the United States.●

By Mr. HEINZ (for himself, Mr. SPECTER, Mr. PELL, Mr. CHAFEE, Mr. KENNEDY, Mr. HATCH, and Mr. BRADLEY):

S.J. Res. 174. Joint resolution to designate November 18, 1985, as "Eugene Ormandy Appreciation Day"; to the Committee on the Judiciary.

EUGENE ORMANDY APPRECIATION DAY

● Mr. HEINZ. Mr. President, it is my pleasure to honor a giant of our times today. Eugene Ormandy, conductor laureate of the Philadelphia Orchestra, passed away earlier this year after 40 years with the orchestra. In that time, as music director and conductor, he brought worldwide acclaim to the Nation and to Philadelphia. Eugene Ormandy was among those responsible for bringing orchestral music out of the music hall and into the daily lives of Americans. In so doing, he earned medals of honor from the United States, France, Italy, Great Britain, and more. Originally from Hungary, Eugene Ormandy helped to bring out the very best in his adopted country.

His creation of a special Philadelphia sound marked his unique style and broadened the range of orchestral playing in this country. The worldwide tours he and the Philadelphia Orchestra performed made them very special goodwill ambassadors for our Nation.

Thus, Mr. President, it is only fitting that we set aside his birthday, November 18, 1985, as a day for him to be remembered. The legislation which Senator SPECTER and I have introduced establishes that day as "Eugene Ormandy Appreciation Day," and will allow the orchestra and the Ormandy family to hold remembrances and special appreciation for this outstanding American artist.

Mr. President, I urge my colleagues to join us in cosponsoring this tribute. It is my hope that we can move this measure through the Congress swiftly, as this outstanding man deserves no less. I ask unanimous consent that the text of the resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 174

Whereas November 18, 1985, marks the anniversary of the birth of Eugene Ormandy;

Whereas Eugene Ormandy was music director and conductor laureate of the Philadelphia Orchestra for over forty years, receiving honorary degrees from eighteen universities and medals of honor from eight nations, including the United States, France, Italy, and Great Britain;

Whereas Eugene Ormandy is known throughout the world for his extraordinary ability and innovation and his unique contribution to orchestral playing, the creation of "The Philadelphia Sound";

Whereas Eugene Ormandy performed invaluable service to the Nation through tours of China, the Soviet Union, Europe, and South America; and

Whereas Eugene Ormandy passed away on March 12, 1985: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That November 18, 1985, is designated as "Eugene Ormandy Appreciation Day" and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe the day with appropriate ceremonies.●

ADDITIONAL COSPONSORS

S. 262

At the request of Mr. BYRD, the name of the Senator from Arkansas [Mr. BUMPERS] was added as a cosponsor of S. 262, a bill to provide for the preservation of the ferroalloy industry in the United States.

S. 361

At the request of Mr. MOYNIHAN, the name of the Senator from Connecticut [Mr. WEICKER] was added as a cosponsor of S. 361, a bill to amend the Internal Revenue Code of 1954 to make permanent the deduction for charitable contributions by nonitemizers.

S. 524

At the request of Mr. ARMSTRONG, the name of the Senator from Maryland [Mr. SARBANES] was added as a cosponsor of S. 524, a bill to recognize the organization known as the Retired Enlisted Association, Inc.

S. 747

At the request of Mr. LAUTENBERG, the names of the Senator from Pennsylvania [Mr. HEINZ], the Senator from New Jersey [Mr. BRADLEY], the Senator from Delaware [Mr. ROTH], the Senator from Connecticut [Mr. DODD], the Senator from Massachusetts [Mr. KERRY], the Senator from New York [Mr. MOYNIHAN], and the Senator from Connecticut [Mr. WEICKER] were added as cosponsors of S. 747, a bill to improve the administration and enforcement of the Magnuson Fishery and Conservation Management Act.

S. 797

At the request of Mr. HATCH, the name of the Senator from Missouri [Mr. DANFORTH] was added as a cosponsor of S. 797, a bill to authorize an employer to pay a youth employment opportunity wage to a person under 20 years of age from May through September under the Fair Labor Standards Act of 1938 which shall terminate on September 30, 1987, and for other purposes.

S. 962

At the request of Mr. COHEN, the name of the Senator from Arkansas [Mr. BUMPERS] was added as a cosponsor of S. 962, a bill to amend chapter 30 of title 38, United States Code, to provide for educational assistance for apprenticeship or other on job-training under the All-Volunteer Force Educational Assistance Program.

S. 987

At the request of Mr. EXON, the names of the Senator from California [Mr. WILSON] and the Senator from Vermont [Mr. LEAHY] were added as cosponsors of S. 987, a bill to recognize the organization known as the Daughters of Union Veterans of the Civil War 1861–65.

S. 1064

At the request of Mr. PELL, the name of the Senator from Oklahoma [Mr. BOREN] was added as a cosponsor of S. 1064, a bill to provide for the continuation of the National Diffusion Network.

S. 1084

At the request of Mr. GOLDWATER, the names of the Senator from Delaware [Mr. ROTH], and the Senator from Arkansas [Mr. BUMPERS] were added as cosponsors of S. 1084, a bill to authorize appropriations of funds for activities of the Corporation for Public Broadcasting, and for other purposes.

S. 1153

At the request of Mr. D'AMATO, the names of the Senator from California [Mr. WILSON], and the Senator from Vermont [Mr. LEAHY] were added as cosponsors of S. 1153, a bill to provide for the distribution within the United States of the U.S. Information Agency film entitled "Hal David: Expressing a Feeling."

S. 1222

At the request of Mr. BRADLEY, the name of the Senator from Rhode Island [Mr. PELL], was added as a cosponsor of S. 1222, a bill to amend the Agricultural Act of 1949 to provide price support for the 1985 and subsequent crops of sugar.

S. 1259

At the request of Mr. THURMOND, the name of the Senator from Kentucky [Mr. FORD], was added as a cosponsor of S. 1259, a bill to correct certain inequities by providing Federal civil service credit for retirement purposes and for the purpose of computing length of service to determine entitlement to leave, compensation, life insurance, health benefits, severance pay, tenure, and status in the case of certain individuals who performed service as National Guard technicians before January 1, 1969.

S. 1276

At the request of Mr. LAUTENBERG, the name of the Senator from Hawaii [Mr. INOUYE], was added as a cosponsor of S. 1276, a bill to provide financial assistance to the States for computer education programs, and for other purposes.

S. 1277

At the request of Mr. BRADLEY, the name of the Senator from Arkansas [Mr. BUMPERS], was added as a cosponsor of S. 1277, a bill to amend title XIX of the Social Security Act to provide that States may provide home or community-based services under the Medicaid Program without the necessity of obtaining a waiver.

S. 1296

At the request of Mr. MATHIAS, the name of the Senator from Virginia [Mr. WARNER], was added as a cosponsor of S. 1296, a bill to amend the Immigration and Nationality Act to modify the requirement for naturalization of an understanding of the English language.

S. 1325

At the request of Mr. HEINZ, the name of the Senator from Arizona [Mr. DECONCINI], was added as a cosponsor of S. 1325, a bill to amend titles XVIII and XIX of the Social Security Act to require second opinions with respect to certain surgical procedures as a condition of payment under the Medicare and Medicaid Programs.

S. 1365

At the request of Mr. ROTH, the name of the Senator from Connecticut [Mr. WEICKER], was added as a cosponsor of S. 1365, a bill to establish as an executive department of the Government, a Department of International Trade and Industry, to establish the National Oceanic and Atmospheric Administration and the Bureau of the Census as independent agencies, and for other purposes.

S. 1373

At the request of Mr. SPECTER, the name of the Senator from Oklahoma [Mr. BOREN] was added as a cosponsor of S. 1373, a bill to amend title 18, United States Code, to authorize prosecution of terrorists and others who attack U.S. Government employees abroad, and for other purposes.

S. 1399

At the request of Mr. DOLE, the name of the Senator from North Dakota [Mr. ANDREWS] was added as a cosponsor of S. 1399, a bill to amend the Rehabilitation Act of 1973 to strengthen the Architectural and Transportation Barriers Compliance Board.

S. 1414

At the request of Mr. BENTSEN, the names of the Senator from New Jersey [Mr. BRADLEY], and the Senator from Louisiana [Mr. LONG] were added as cosponsors of S. 1414, a bill to provide additional funding and authority for the Federal Bureau of Investigation in order to improve the counterterrorist capabilities of the Bureau.

S. 1450

At the request of Mr. HEINZ, the names of the Senator from New York [Mr. MOYNIHAN], the Senator from New Mexico [Mr. BINGAMAN], the Senator from Minnesota [Mr. DURENBERGER], and the Senator from Maine [Mr. MITCHELL] were added as cosponsors of S. 1450, a bill to prohibit the Secretary of Health and Human Services from changing reimbursement levels or methodologies for home health services under the Medicare Program prior to October 1, 1986, or during a freeze period.

S. 1477

At the request of Mr. CHAFEE, the name of the Senator from Arkansas [Mr. PRYOR] was added as a cosponsor of S. 1477, a bill to amend title 38, United States Code, to increase the burial plot allowance for veterans from $150 to $250.

S. 1486

At the request of Mr. DOLE, the name of the Senator from Alaska [Mr. STEVENS] was added as a cosponsor of S. 1486, a bill to amend the Equal Credit Opportunity Act.

SENATE JOINT RESOLUTION 68

At the request of Mr. DODD, the names of the Senator from Wisconsin [Mr. PROXMIRE], the Senator from Massachusetts [Mr. KERRY], the Senator from South Carolina [Mr. HOLLINGS], the Senator from Nevada [Mr. LAXALT], and the Senator from South Carolina [Mr. THURMOND] were added as cosponsors of Senate Joint Resolution 68, a joint resolution to designate November 21, 1985, as "William Beaumont Day."

SENATE JOINT RESOLUTION 132

At the request of Mr. DANFORTH, the names of the Senator from New Mexico [Mr. DOMENICI], the Senator from Rhode Island [Mr. CHAFEE], and the Senator from Oregon [Mr. PACKWOOD] were added as cosponsors of Senate Joint Resolution 132, a joint resolution designating October 1985, as "National Head Injury Awareness Month."

SENATE JOINT RESOLUTION 141

At the request of Mr. SASSER, the names of the Senator from Arizona [Mr. GOLDWATER], the Senator from Kentucky [Mr. MCCONNELL], and the Senator from Tennessee [Mr. GORE] were added as cosponsors of Senate Joint Resolution 141, a joint resolution to designate the week beginning May 18, 1986, as "National Tourism Week."

SENATE JOINT RESOLUTION 155

At the request of Mr. PACKWOOD, the names of the Senator from Hawaii [Mr. MATSUNAGA], the Senator from Nebraska [Mr. ZORINSKY], the Senator from New Mexico [Mr. DOMENICI], the Senator from Illinois [Mr. DIXON], and the Senator from Michigan [Mr. RIEGLE] were added as cosponsors of Senate Joint Resolution 155, a joint resolution to designate the month of November 1985 as "National Hospice Month."

SENATE JOINT RESOLUTION 156

At the request of Mr. MURKOWSKI, the names of the Senator from Massachusetts [Mr. KERRY], the Senator from Kansas [Mr. DOLE], and the Senator from Oklahoma [Mr. BOREN] were added as cosponsors of Senate Joint Resolution 156, a joint resolution authorizing a memorial to be erected in the District of Columbia or its environs.

SENATE JOINT RESOLUTION 158

At the request of Mr. MURKOWSKI, the name of the Senator from Michigan [Mr. RIEGLE] was added as a cosponsor of Senate Joint Resolution 158, a joint resolution designating October 1985 as "National Community College Month."

SENATE JOINT RESOLUTION 159

At the request of Mr. JOHNSTON, the names of the Senator from Illinois [Mr. SIMON], the Senator from South Carolina [Mr. THURMOND], the Senator from West Virginia [Mr. ROCKEFELLER], the Senator from Arizona [Mr. DECONCINI], the Senator from Montana [Mr. BAUCUS], the Senator from California [Mr. CRANSTON], the Senator from Hawaii [Mr. MATSUNAGA], the Senator from West Virginia [Mr. BYRD], the Senator from Kansas [Mr. DOLE], the Senator from Florida [Mrs. HAWKINS], the Senator from Idaho [Mr. MCCLURE], the Senator from Nevada [Mr. HECHT], the Senator from Utah [Mr. HATCH], the Senator from New Mexico [Mr. DOMENICI], the Senator from Washington [Mr. GORTON], the Senator from Washington [Mr. EVANS], the Senator from Tennessee [Mr. SASSER], the Senator from Utah [Mr. GARN], the Senator from Texas [Mr. BENTSEN], the Senator from Rhode Island [Mr. CHAFEE], and the Senator from Mississippi [Mr. STENNIS] were added as cosponsors of Senate Joint Resolution 159, a joint resolution to designate the rose as the national floral emblem.

SENATE JOINT RESOLUTION 166

At the request of Mr. DURENBERGER, the names of the Senator from Michigan [Mr. RIEGLE], the Senator from Missouri [Mr. DANFORTH], the Senator from South Carolina [Mr. THURMOND], the Senator from North Dakota [Mr. ANDREWS], the Senator from Pennsylvania [Mr. HEINZ], and the Senator from Minnesota [Mr. BOSCHWITZ] were added as cosponsors of Senate Joint Resolution 166, a joint resolution to appeal for the release of Dr. Yury Orlov and other Helsinki Final Act monitors.

SENATE JOINT RESOLUTION 168

At the request of Mr. TRIBLE, the name of the Senator from New Jersey [Mr. BRADLEY] was added as a cosponsor of Senate Joint Resolution 168, a joint resolution designating August 13, 1985, as "National Neighborhood Crime Watch Day".

SENATE RESOLUTION 189

At the request of Mr. KENNEDY, the names of the Senator from Massachusetts [Mr. KERRY], the Senator from Rhode Island [Mr. PELL], the Senator from Vermont [Mr. STAFFORD], the Senator from North Dakota [Mr. ANDREWS], the Senator from Connecticut [Mr. WEICKER], the Senator from Hawaii [Mr. MATSUNAGA], the Senator from California [Mr. CRANSTON], the Senator from West Virginia [Mr. ROCKEFELLER], the Senator from Connecticut [Mr. DODD], the Senator from New Jersey [Mr. BRADLEY], the Senator from Tennessee [Mr. GORE], the Senator from Indiana [Mr. QUAYLE], the Senator from Ohio [Mr. METZENBAUM], the Senator from Michigan [Mr. RIEGLE], the Senator from South Carolina [Mr. THURMOND], the Senator from North Dakota [Mr. BURDICK], the Senator from Rhode Island [Mr. CHAFEE], the Senator from South Carolina [Mr. HOLLINGS], the Senator from Kansas [Mr. DOLE], the Senator from Indiana [Mr. LUGAR], the Senator from Maryland [Mr. SARBANES], the Senator from Georgia [Mr. NUNN], the Senator from Pennsylvania [Mr. HEINZ], the Senator from Nebraska [Mr. ZORINSKY], and the Senator from Hawaii [Mr. INOUYE] were added as cosponsors of Senate Resolution 189, a resolution to designate the week of August 18 to 24, 1985, as "Health Care Expo '85 Week".

SENATE RESOLUTION 202—URGING MAJOR LEAGUE BASEBALL OWNERS AND PLAYERS TO WORK TO AVOID A SCHEDULED PLAYERS STRIKE

Mr. FORD submitted the following resolution; which was referred to the Committee on Labor and Human Resources:

S. RES. 202

Whereas baseball is America's national pastime;

Whereas Major League Baseball is an important source of family-oriented entertainment for millions of Americans;

Whereas Major League Baseball teams are a source of local pride for fans in communities across the nation, as well as providers of substantial revenues and employment opportunities in related businesses;

Whereas the Major League Baseball Players Association has voted to strike on Tuesday, August 6, 1985, unless they have reached a new collective bargaining agreement with team owners by then;

Whereas a prolonged players' strike would result in the cancellation of hundreds of baseball games, the loss of millions of dollars to related businesses, and endanger the long-term interests of the sport;

Whereas those who would suffer greatest during a baseball players' strike would be the fans: Now therefore be it

Resolved that it is the sense of the Senate that the Major League Baseball Players Association and team owners have a responsibility to the baseball fans of America to ensure that the current season is not interrupted, and that both parties should do everything in their power to avoid a strike by players.

Mr. FORD. Mr. President, today I am introducing a resolution urging major league baseball owners and players to do everything they can to avoid a scheduled players' strike.

I know that there are crucial issues facing this body—matters of the deficit, of foreign policy, of trade. But, I must say that my heart sank last week when I read that the Major League Baseball Players Association has scheduled a strike for August 6 unless the union has reached a new collective bargaining agreement by then. The prospect for me is as vivid as the memory of those 50 agonizing midsummer days of 1981—no baseball!

It would be a tremendous disappointment to the many millions of baseball fans across this Nation if, on August 6, the gates are closed, the grandstands fall silent, and our great national pastime is put on indefinite hold. Baseball is a tremendous source of family-oriented entertainment for the people of this country. Moreover, it is a source of revenue and jobs in related industries. Most of our Nation's great cities depend greatly on baseball as a cornerstone of economic development and community identity.

Mr. President, I admit that I know very little about the specific issues involved in the current negotiations on a new collective bargaining agreement for major league baseball. In that respect, I suppose I can echo the sentiments of the average fan. We're frustrated—frustrated by the fact that the game we love so much might come to an abrupt halt, and we can't do a thing about it.

So I offer this resolution with hopes that my colleagues will overwhelmingly support it, and that we can communicate to both parties in the current baseball labor-management negotiations that they have a responsibility to the Nation's fans to keep the season going. The resolution urges them to settle their differences and avoid the scheduled August 6 strike.

Remember, without the fans, baseball would not be what it is today. And in the event of a strike, it is the fans who will suffer the most.

SENATE RESOLUTION 203—ORIGINAL RESOLUTION REPORTED WAIVING CONGRESSIONAL BUDGET ACT

Mr. DANFORTH, from the Committee on Commerce, Science, and Transportation, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 203

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of H.R. 2796. Such waiver is necessary because H.R. 2796 authorizes the enactment of new budget authority which would first become available in fiscal years before fiscal year 1987, and such bill was not reported prior to the statutory deadline imposed by section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

The authorization contained in H.R. 2796 is necessary to ensure that sufficient funds are available for the Secretary of Transportation to improve security at international airports and aboard commercial passenger aircraft. Recent international events such as the hijacking of Trans World Airlines Flight 847 have demonstrated the necessity and urgency for improving airport and aircraft security. The funds authorized to be apporpriated by H.R. 2796 are to be used by the Secretary of Transportation for research on and development of airport and aircraft security devices and techniques for detecting explosives. These funds are to be derived from the Airport and Airway Trust Fund.

AMENDMENTS SUBMITTED

CONSUMER PRODUCT SAFETY COMMISSION AUTHORIZATION

SIMON (AND OTHERS) AMENDMENT NO. 539

Mr. SIMON (for himself, Mr. LAUTENBERG, Mr. METZENBAUM, Mr. EAGLETON, and Mr. KERRY) proposed an amendment to the bill (S. 1077) to amend the Consumer Product Safety Act (15 U.S.C. 2051 et seq.) to provide authorization of appropriations, and for other purposes; as follows:

At the end of the bill, add the following new title:

TITLE II—AMUSEMENT PARK SAFETY

SEC. 201. SHORT TITLE, REFERENCE.

(a) SHORT TITLE.—This title may be cited as the "Amusement Park Safety Act".

(b) REFERENCE.—Whenever in this title an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Consumer Product Safety Act.

SEC. 202. DEFINITION.

(a) DEFINITION OF AMUSEMENT RIDE.—(1) Section 3(a)(1) (15 U.S.C. 2052(a)(1)) is amended by striking out the first two sentences following subparagraph (I).

(2) Section 3(a) is amended by adding at the end the following:

"(15) The term 'amusement ride' means any device which carries or conveys passengers along, around, or over a fixed or restricted route or course or within a defined area for the purpose of giving its passengers amusement and which is customarily controlled or directed by an individual who is employed for that purpose and who is not a consumer with respect to such device. An

amusement ride which is not permanently fixed to a site is a consumer product for purposes of this Act and an amusement ride which is permanently fixed to a site—

"(A) is not a consumer product for purposes of sections 7 and 8, and

"(B) is a consumer product for the remainder of the Act.

"(16) The term 'amusement ride operator' means the owner of an amusement ride.".

(b) Conforming Amendment.—Section 3(a)(1)(I) is amended by striking out ". The term 'food', as used in this subparagraph means all 'food' ".

SEC. 203. PUBLIC DISCLOSURE OF INFORMATION.

Section 6(b) (15 U.S.C. 2055(b)(1)) is amended—

(1) in the first sentence of paragraph (1) by striking out "the Commission shall" through the end of the sentence and inserting in lieu thereof the following: "the Commission shall, to the extent practicable, notify and provide a summary of the information to—

"(A) each manufacturer or private labeler of the consumer product, and

"(B) to each amusement ride operator who owns the amusement ride

to which the information pertains, if the manner in which such consumer product or amusement ride is to be designated or described in such information will permit the public to ascertain readily the identity of such manufacturer, private labeler, or amusement ride operator and shall provide such manufacturer, private labeler, or amusement ride operation with a reasonable opportunity to submit comments to the Commission regarding such information."; and

(2) in the second and third sentences of paragraph (1) and in paragraphs (2) and (3), by striking out "or private labeler" each place it occurs and inserting in lieu thereof" each place it occurs and inserting in lieu thereof", private labeler, or amusement ride operator".

SEC. 204. NOTIFICATION AND REMEDIES.

(a) Notification of Commission.—Section 15(b) (15 U.S.C. 2064(b) is amended by adding at the end the following: "Each amusement ride operator who obtains information which reasonably supports the conclusion that the amusement ride the operator owns contains a defect which could create a substantial product hazard described in subsection (a)(2) shall provide the information required by the preceding sentence.".

(b) Repair, Replacement, Refund.—Section 15(d) of such Act is amended—

(1) by inserting after "of such product" in the first sentence the following: "or the amusement ride operator if the product is an amusement ride"; and

(2) by inserting before ", or from doing" in the last sentence the following: ", from operating an amusement ride if the product involved is an amusement ride".

SEC. 205. INSPECTION.

Section 16(a) (15 U.S.C. 2065(a)) is amended by striking out "and" at the end of paragraph (1), by striking out the period before the last sentence in paragraph (2) and inserting in lieu thereof "; and", by striking out the last sentence, and by adding after paragraph (2) the following:

"(3) to inspect, at reasonable times and in a reasonable manner—

"(A) amusement rides which are not permanently fixed to a site, and

"(B) amusement rides which are permanently fixed to a site if the State or political subdivision in which the ride is located does not have authority to inspect the ride or if the ride was involved in a fatality or a personal injury requiring hospitalization.

Each such inspection shall be commenced and completed with reasonable promptness.".

SEC. 206. REGULATIONS.

The Consumer Product Safety Commission shall issue regulations for the administration of section 15 of the Consumer Product Safety Act, as amended by section 204, not later than six months after the effective date of this title.

SEC. 207. EFFECTIVE DATE.

The amendments made by this title shall take effect October 1, 1985.

DANFORTH AMENDMENT NO. 540

Mr. DANFORTH proposed an amendment to amendment No. 539 proposed by Mr. SIMON to the bill S. 1077, supra; as follows:

In lieu of the matter proposed to be inserted by amendment No. 539, insert the following:

NATIONAL COMMISSION ON AMUSEMENT RIDE SAFETY

SEC. . (a) The Congress finds that—

(1) the occurrence of amusement ride accidents in recent years has prompted inquiry into the necessity and desirability of Federal legislation to regulate the amusement ride industry;

(2) the regulation of such rides has traditionally been the responsibility of State and local governments and of the amusement ride industry;

(3) it is uncertain whether any Federal agency has sufficient resources or expertise to regulate the amusement ride industry;

(4) Federal involvement in the inspection and regulation of amusement rides could be costly and inefficient;

(5) voluntary comprehensive ride safety standards have been promulgated by the American Society of Testing and Materials and such standards should be evaluated by the Federal Government; and

(6) a temporary Commission to review the scope and adequacy of safety regulations and standards in the amusement ride industry could clarify the need, or lack of need, for Federal legislation regarding amusement ride safety.

(b)(1) There is established a National Commission on Amusement Ride Safety (hereinafter referred to as the "Commission").

(2) The Commission shall be composed of five members as follows:

(A) the Director of the National Bureau of Standards, who shall be chairman of the Commission;

(B) the Chairman of the Consumer Product Safety Commission (or the Chairman's designee), who shall be vice chairman of the Commission; and

(C) three members to be appointed by the President as follows:

(i) one from among State officials who administer State amusement ride safety inspection programs;

(ii) one from among professionals in the amusement ride industry who have education, training, or experience in amusement ride safety matters; and

(iii) one from among persons who represent consumers.

(3) Any vacancy in the Commission shall not affect its powers.

(4) Three members of the Commission shall constitute a quorum.

(c)(1) The Commission shall conduct a comprehensive investigation of the scope and adequacy of safety measures employed to protect the public from unreasonable risks of injury from amusement rides. Such investigation shall include a review of—

(A) Federal, State, and local laws regulating the amusement ride industry;

(B) existing voluntary comprehensive amusement ride safety standards; and

(C) self-regulation mechanisms within such industry.

(2) Such investigation shall determine for each law, standard, and self-regulation mechanism reviewed under paragraph (1)(A) through (C) of this subsection—

(A) the scope of its coverage;

(B) the effectiveness of any available sanctions or enforcement mechanisms; and

(C) the adequacy of powers to investigate violations.

In addition, the investigation shall determine the uniformity of application and quality of enforcement of the reviewed laws, standards, and self-enforcement mechanisms.

(3) As soon as practicable after the date of enactment of this Act, the Commission shall publish in the Federal Register an announcement of the investigation described in paragraph (1) of this subsection, and shall afford an opportunity for any interested persons to submit views on the subject of the investigation.

(4) The Commission may transmit to the President and to the Congress such interim reports as it considers advisable, and shall transmit its final report to the President and to the Congress not later than eighteen months after the date of enactment of this Act. The final report shall contain a detailed statement of the findings and conclusions of the Commission with respect to the adequacy of existing amusement ride safety standards and regulations, together with such recommendations for legislative, administrative, or other action as it considers appropriate.

(d)(1) The Commission may, for the purpose of carrying out this section, hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence as the Commission considers appropriate. The Commission may administer oaths or affirmations to witnesses appearing before it. In holding such hearings, the Commission, upon a vote of a quorum of its members, may—

(A) order any corporation, business, or individual to submit, within a reasonable period, such reports or answers to questions as the Commission may request, in such form and such manner as the Commission may prescribe;

(B) require by subpoena the attendance and testimony of witnesses and the production of any evidence relevant to the execution of its duties; and

(C) order any person to give testimony by deposition to any person designated by the Commission to administer oaths and to take such deposition.

(2) The Commission shall publish notice of any proposed hearing in the Federal Register and shall afford a reasonable opportunity for interested persons to present relevant testimony and data.

(3)(A) If a person issued a subpoena under paragraph (1)(B) of this subsection refuses to obey such subpoena or is guilty of contumacy, any court of the United States within the judicial district within which the hearing is conducted or within the judicial dis-

trict within which such person is found or resides or transacts business may (upon application of the Commission) order such person to appear before the Commission to produce evidence or to give testimony relating to the matter under investigation. Any failure to obey such order of the court may be punished by such court as a contempt thereof.

(B) Subpoenas of the Commission shall be served in the manner provided for subpoenas of a district court under the Federal Rules of Civil Procedure for the district courts of the United States.

(4) The Commission may pay witnesses the same fees and travel expenses as are paid in like circumstances in the courts of the United States.

(5) The Commission may request from any department, agency, or independent instrumentality of the Federal Government any information it considers necessary to carry out its functions under this section. Each such department, agency, or independent instrumentality shall cooperate with the Commission and, to the extent permitted by law, shall furnish such information to the Commission.

(6) The Commission may delegate any of its functions to individual members of the Commission.

(e)(1) Members of the Commission shall serve without compensation.

(2) While away from their homes or regular places of business in the performance of services for the Commission, members of the Commission shall be reimbursed for travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons employed intermittently in the Government service.

(f)(1) The Commission may appoint and fix the compensation of a staff director who shall be paid an amount not to exceed the minimum rate of basic pay payable for level GS-15 of the General Schedule pursuant to section 5332 of title 5, United States Code.

(2) The head of any Federal agency may detail, on a reimbursable basis, any of its personnel to assist the Commission in carrying out its duties under this section.

(3) The Commission shall cease to exist upon submitting its final report required under subsection (c)(4) of this section.

INVESTIGATION OF CERTAIN ACCIDENTS

SEC. 6. (a) The National Bureau of Standards of the Department of Commerce may investigate any accident involving an amusement ride at a fixed site amusement park if—

(1) such accident caused death or serious personal injury, or could have caused death or serious personal injury;

(2) an appropriate authority of State or local government requests, in writing, that the Secretary of Commerce conduct such an investigation; and

(3) the Secretary of Commerce makes a determination to conduct such an investigation.

(b) Upon conclusion of such an investigation, the National Bureau of Standards shall issue a final accident report containing its findings, conclusions, and recommendations. Such report shall include—

(1) findings of the causes of the accident, including a scientific and technological examination of the material, physical, and chemical conditions that contributed to the accident;

(2) recommendations for actions or procedures which could have prevented the accident; and

(3) recommendations for actions or procedures to prevent similar accidents.

(c) The National Bureau of Standards shall transmit a copy of any such report to—

(1) the authority of State or local government which requested such investigation; and

(2) any other appropriate person or organization, as determined by the Secretary of Commerce.

(d) Nothing in this section shall be construed to limit or affect any existing authority of the Secretary of Commerce.

(e) The provisions of section 8 of the National Bureau of Standards Authorization Act for Fiscal Year 1983 (15 U.S.C. 275b) shall not apply to any service performed pursuant to this section.

(f) The provisions of this section shall be effective until Congress enacts legislation regarding amusement ride safety in response to the report submitted by the Commission under section 5 of this Act.

PUBLIC BUILDINGS SERVICE AUTHORIZATION ACT

STAFFORD AMENDMENT NO. 541

Mr. DOLE (for Mr. STAFFORD) proposed an amendment to the bill (S. 1030) to authorize appropriations for the Public Buildings Service of the General Services Administration for fiscal year 1986; as follows:

On page 2, line 19 strike "$2,397,924,000" and insert in lieu thereof "$2,401,868,000".

On page 4, line 9 strike "$124,150,000" and insert in lieu thereof "$128,094,000".

On page 6, insert in alphabetical order in the list:

"Missouri, St. Louis, Mart Federal Building.....	$3,944,000"

NOTICES OF HEARINGS

SUBCOMMITTEE ON OVERSIGHT OF GOVERNMENT MANAGEMENT

Mr. COHEN. Mr. President, I would like to announce that the Subcommittee on Oversight of Government Management, Committee on Governmental Affairs, will hold a markup of S. 1134, the Program Fraud Civil Penalties Act of 1985, and S. 992, the Congressional Reports Elimination Act of 1985, on Wednesday, July 31, at 2 p.m., in room 342 of the Dirksen Senate Office Building.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Committee on Energy and Natural Resources to continue the consideration of the nomination of Charles A. Trabandt, of Virginia, to be a member of the Federal Energy Regulatory Commission.

This hearing will take place Monday, July 29, 10 a.m., SD366 of the Senate Dirksen Office Building in Washington, DC.

For further information regarding this hearing, please contact Nan Morrison at 202-224-7143.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Wednesday, July 24, to consider the nominations of Russell F. Miller to be Deputy Inspector General of the U.S. Synthetic Fuels Corporation; and William P. Horn to be Assistant Secretary for Fish and Wildlife, Department of the Interior.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on Intelligence be authorized to meet in closed session, during the session of the Senate on Wednesday, July 24, to hold a hearing on the National Intelligence Strategy.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON CIVIL SERVICE

Mr. DOLE. Mr. President, I ask unanimous consent that the subcommittee on Civil Service of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Wednesday, July 24, to hold a hearing on the GAO report on Pay Equity.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Wednesday, July 24, 1985, in order to receive testimony concerning the nominations of Douglas H. Ginsburg, to be Assistant Attorney General for the Antitrust Division, and Richard Kennon Willard, to be Assistant Attorney for the Civil Division.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. ANDREWS. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be authorized to meet during the session of the Senate on Wednesday, July 24, between the hours of 3 p.m. and 5 p.m. to mark up S. 616, the farm bill, and related issues.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

TEXTILE IMPORTS

● Mr. CHAFEE. Mr. President, last week, Senators ROTH, DANFORTH, and I wrote to President Reagan to express our outrage over the administration's failure to control the surge of textile imports into the United States.

The import increases have posed a grave situation for the American textile industry, including that of my own State of Rhode Island, and we can no longer sit back and watch our constituents lose their jobs to foreign imports.

I ask that the text of our letter be printed at this point in the RECORD.

The letter follows.

U.S. SENATE,
Washington, DC, July 18, 1985.

The PRESIDENT,
The White House,
Washington, DC.

DEAR MR. PRESIDENT: We are writing to let you know about our personal concerns about the Administration's efforts to control textile and apparel imports and to urge you to give your attention to this matter.

Recently, we received a letter from five members of the Cabinet urging us not to support S. 680. The Administration's opposition to this legislation, we understand, relates to a number of issues, in particular concerns that the legislation would trigger losses in U.S. exports, spur inflation, and violate our international obligations.

These are concerns which we fully appreciate. Moreover, we are also aware of the efforts the Administration has made, particularly in the last two years, to tighten up on the existing import controls on textiles and apparel including greatly increased numbers of calls on imports, easier procedures for demonstrating market disruption, more stringent rules of origin and more restrictive bilateral agreements.

Nevertheless, we are shocked at the failure of the Administration to get this situation under control. For whatever reason, there has been a tremendous increase in textile and apparel imports over the last five years, an increase that was not supposed to have been possible with the Multi-Fiber Arrangement in place. This increase has had a devastating impact on communities in each of our States and is causing great hardship and fears among many of our constituents. Our constituents no longer find the MFA as currently enforced a credible response to the textile and apparel trade issue and frankly, we agree.

A continuation of this situation is simply unacceptable. Either the Administration will seize the initiative immediately and take action to correct this situation or there is no question but that the Congress will act. Though we feel that a negotiated settlement of this situation is preferable to legislative action, time is running out. First, the Administration must act immediately to stringently enforce the current MFA. Second, the MFA renegotiation must be expedited, the U.S. negotiating position must be tough and action must come soon or an increasing number of members will be forced to seek a legislative solution.

As far as we are concerned, an effective control system for this sector must deal with the total trade picture. For too long now, our system has been trying to catch up with production overseas as it moves from country to country, and from product to product. In fact, the system has encouraged this development. When we decide that we want to control imports of a particular product, we need to know that the controls cannot be circumvented.

It has become increasingly obvious to us and many others that to be truly effective our import control system must apply to all countries, including the European Community. Tightening up on the rest of the world, while excluding one region, only forces the production to that weak link in the system. Imports from the European Community rose more than 50 percent between 1983 and 1984 and accounted for about 20 percent of the total increase in imports over the last five years. Besides, how can we support a policy that discriminates against a region of the world that potentially is the most rapidly growing future market for U.S. exports.

Likewise, it is critical that the Multi-Fiber Arrangement be expanded to cover all fibers, not just cotton, wool and man-made fibers. This another major weak link in the current system. Imports of other fibers, namely silk, linen and ramie, accounted for about 20 percent of the growth in imports over the last five years. So long as some fibers, or some countries, fall completely outside the arrangement, the potential for greatly increased imports remains real.

We know you believe very strongly in the merits of an open trading system. So do we. But, it has long been recognized that the textile and apparel sector presents a special circumstance. Action is needed now to restore confidence in the multilateral system for controlling trade in this sector.

This is a matter of very deep concern to us and we appreciate greatly your attention to this issue. We are hopeful that the Administration will move with dispatch on this matter.

Sincerely,

JOHN H. CHAFEE,
JOHN C. DANFORTH,
BILL ROTH, JR.,
U.S. Senate.●

BARRIERS TO ADOPTION

● Mr. SIMON. Mr. President, a few weeks ago the Labor and Human Resources Committee held the second of two hearings on the barriers to adoption. Too many children suffer from the lack of a permanent family because of obstacles such as the lack of cooperation between States, entanglement in the system, and improper tracking or placement in foster care.

Another barrier noted was the lack of effort toward recruitment, especially of black families. In Chicago, however, an extraordinary man spearheads a program called "One Church, One Child." Father George Clements began the program in January of 1981. The success of "One Church, One Child" provides inspiration and demonstrates that obstacles can be overcome. The program now reaches black churches in Kansas, Louisiana, and Missouri.

Father Clements receives a great deal of support from the director of the Illinois Department of Children and Family Services, Gordon Johnson. Under the direction of Mr. Johnson, the department has increased both its efforts and resources in the pursuit of placing special needs children.

I am proud to represent a State which is the leader in finding homes for children. I ask that the testimonies of Father Clements and Mr. Johnson be inserted in the RECORD.

STATEMENT OF FATHER GEORGE CLEMENTS

Some of us at this hearing may be of sufficient vintage that we can recall that hit song of yesteryear, "You Gotta Accentuate the Positive, Eliminate the Negative, Latch on to the Affirmative and Don't Mess With Mr. In-Between."

Those lyrics take on added meaning today as we address "Barriers to Adoption." Child care advocacy is replete with prophets of doom, harbingers of disaster. If there is one facet of child care that all seem to agree on, it is that we are literally besieged with a multitude of problems associated with dependent children.

However, I maintain that the members of this committee need not be continually beaten over the head with these numbing problems. Today I intend to accentuate the positive. Of necessity I must touch on some problems, but I intend to dwell on solutions.

All over America we are blessed with millions of families who would like to open their homes and their hearts to homeless children this morning. Step into virtually any village, town, hamlet, or city, and you are certain to find Americans who would love to adopt children. If we accept this premise of a plethora of families waiting and hoping to adopt, why then does America have so many homeless children?

The answer should be obvious. It is because we still have this bewildering maze of obfuscating regulations and stipulations and guidelines and norms and standards and requirements and ordinances and modifications and statutes and precepts that are strangling our ability of simply placing a homeless child with a family that wants that child.

A further complication is that individual States have established statutes that are peculiar to that particular State. This leads us to the mind-boggling posture of one State's laws flatly contradicting another State's laws. In popular jargon this translates into some States being labeled "enlightened" and other States, "unenlightened." Why should a family be penalized simply because they happen to live in an unenlightened State as opposed to an enlightened State.

Accentuate the positive! The United States of America simply must set up Federal guidelines as definitive norms for every State in the union. After all, we are dealing with the most precious object in the world, a human being. We simply no longer can afford this cavalier attitude of allowing Oregon to go one way, while Florida takes off in the opposite direction. I am willing to allow all kinds of latitude to the States when it comes to credit buying or insurance norms or real estate regulations or utility guidelines. However, I certainly am not willing to grant that same latitude when those States are dealing with the destiny of the most precious objects on the face of the Earth—children.

Once individual States are aligned into sensible Federal guidelines, let us then take the next logical step. A method must be devised whereby we link up the homeless child with the family seeking a child—anywhere in America, any in America! This Nation has created the most sophisticated technology

known to mankind. Let us put that technology to use for homeless children.

I am sounding the call for a national computerization of all adoptable children and all prospective adoptee families throughout this land. If we can computerize airline tickets, surely we ought to be able to computerize homeless children. Not only is this accentuating the positive, but it is also eliminating the negative—eliminating the roadblocks that hinder adoption.

Some will find it vulgar to link the almighty dollar with child advocacy. However, the bitter truth is that cost effectiveness is right at the top of the priority items in America today. Computerization of adoptions on the national level would amount to a resultant savings of millions of tax dollars.

I am hopeful that this Senate committee will promote this national computerization of homeless children. My lone voice crying in the wilderness will never be heard. However, a collective roar from the most august body of parliamentarians in the world will resound all over this land. Let us accentuate the positive with the most sophisticated technology known to mankind, that of the United States of America.

In January of 1981, I founded an organization known as "One Church, One Child." This organization takes cognizance both of the moral sensitivity of America's black church goers as well as their responsiveness to their ministers. "One Church, One Child" asks each church in our black communities to accept the responsibility of at least one family in that church adopting a child.

Specifically, "One Church, One Child" is asking the minister in the congregation to allow our organization to enter that church with a formal presentation advocating adoption. This program consists of addresses by a professional in the field of adoption and a couple that have already adopted. We also provide visual aids, movies, slides, brochures, etc., on adoption. The program is rounded off with a question and answer period. If, as a result of this program, a couple in that particular congregation actually adopts a child, then that church officially becomes a "One Church, One Child" congregation.

When this program began in Chicago, Illinois in 1981, that city had in excess of 700 homeless black children (homeless in the context means a child who is involved in some type of temporary situation). Today we are extremely proud to state that we now have roughly 40 homeless black children in Chicago. Moreover, there were 90 black infants seeking adoption. Today there are none and we have a waiting list of black parents seeking black infants throughout the State of Illinois.

"One Church, One Child" can now be found in Missouri, Kansas, and Louisiana, as well as Illinois. Indeed, "One Church, One Child" accentuates the positive.

STATEMENT BY GORDON JOHNSON, DIRECTOR ILLINOIS DEPARTMENT OF CHILDREN AND FAMILY SERVICES

During the past five years the Illinois Department of Children and Family Services has made tremendous strides in finding permanent homes for children with special needs. The methods used have proven that children with special needs—older children; sibling groups; children who are mentally, physically or emotionally handicapped, and children who belong to minority groups—can be placed with families committed to providing them with understanding, stability, and love.

The Department's commitment to permanency for children and the commitment of financial incentives at the Federal level in the form of 96-272 resulted in an adoption initiative which encompassed specialized services and innovative adoptive family recruitment campaigns for waiting school-age children.

The number of adoption staff has been increased, and intensive training efforts for the adoption staff have been implemented. Greater attention has been given to children in foster care who have been overlooked in the past with regard to consideration for adoption. Adoption statistics are at a higher level than they have been in the past five years. This is largely due to:

A systematic administrative case review system,

Legislative changes governing termination of parental rights,

Establishment of the Adoption Information Center of Illinois with its statewide toll-free adoption hotline number,

Hiring of qualified staff who specialize in adoptions, and

Continuous public service media campaigns,

All of these steps have contributed to the increase in the numbers of childen being adopted in our state.

ILLINOIS ADOPTION STATISITICS

	Fiscal year—				
	1980	1981	1982	1983	1984
Children freed	458	595	677	849	922
Children placed	517	592	847	900	936
Adoptions consummated	475	555	798	933	945
Subsidies initiated	277	293	493	648	670

When we began our adoption initiative, the largest number of children in need of adoptive homes were black children. Black children also waited longer for adoptive homes that white children. An intensive effort has been made to place waiting black children in adoptive homes. With a change in staff attitudes, a change in practices and agency procedures, and the elimination of bureaucratic barriers that prevented black families from considering adoption, this agency has reduced the number of waiting black children. In February, 1980, in Cook County (Chicago) alone there were more than 700 black children waiting for adoptive homes. I am pleased to announce that as of June, 1985, this number has been reduced to 55 black children.

A major factor in the successful reduction of waiting black children in Illinois was the launching of the One Church, One Child recruitment program. This innovative program was the response of Father George Clements, a black priest from Holy Angels Church in Chicago, to the former Director Gregory L. Coler and myself, then serving as his deputy director.

We were convinced that there were many black families who would reach out to adopt black children in need of permanent homes. We carefully reviewed the adoption procedures of the Illinois Department of Children and Family Services and eliminated insensitive and bureaucratic barriers that prevented black families from considering adoption. Revisions were made in agency criteria/policy/procedures to reflect cultural differences in minority adoptions. We let people know that external requirements such as family income and housing were flexible. Adoptive parents were allowed to live in apartments and did not need to own their home. Both parents could work outside the home and still adopt. Single parents could make excellent adoptive parents and provide the attention and nurture children need.

Additional black social workers were hired to help increase the adoptive placement of black children. Adoption services were designed for and located in the black community. To assure that adoptive services were located in the black community, the black church, one of the most important institutions in the black culture, became the base for our recruitment efforts. Training programs designed to educate adoption specialists in all areas relating to minority culture life styles and special recruitment techniques were provided on an ongoing basis.

Finding black families was not the major problem. Keeping families throughout the preparation process was another matter. Some of the best insights our social work staff found for retaining black families were:

An agency staff member must contact the family within 24 hours to schedule an appointment.

An appointment should be scheduled within two weeks of the inquiry. Prolonged waits only discourage prospective adoptive parents.

Only such information as is necessary to begin the process should be taken by phone.

It was imperative that we, as a state agency, assume that any black family who contacted us was interested in providing a home for one of our waiting children. Our experience taught us that our agency staff must build relationships with black applicants that recognize and accept the feelings of these families and respond sensitively and immediately.

Of all children under state guardianship in Illinois who have been adopted in the past two years, more than 40 percent are black youngsters. In Fiscal Year 1983, 374 of 933 total adopted children were black. In Fiscal Year 1984, 395 of 945 adopted children were black.

Our current agency rule recognizes that a child's racial and cultural heritage is an important part of the identity which he brings to any family. The child's needs shall be the primary consideration when exploring adoptive resources. Our agency rules and procedures require that we make a maximum of six months of diligent search for an adoptive resource of the child's own racial background. The diligent search includes listing the child with the Adoptive Listing Service, featuring the child in appropriate newspapers, conducting television media recruitment efforts, and making contacts with other adoption agencies. The purpose of this rule and procedure is to ensure that every effort is made to include black families for adoption consideration.

In Fiscal Year 1984, 40 children out of 936 adoptive placements (4%) were placed transracially for adoption. Our policy permits such placements, and indeed full consideration is given to adoptive applicants who have provided care for a child of a different race, especially when there is strong evidence that bonding has occurred, On the other hand, we have been so successful in finding black families for both foster care and adoption that we seldom find it necessary to consider transracial placements involving black children.

Subsidized adoption, of course, is a key to finding loving homes for waiting children of all races. The projected savings in foster care costs in our state for Fiscal Years 1983

and 1984 has been estimated at more than $14 million.

Children with physical and mental disabilities—developmentally disabled children—wait perhaps the longest for adoptive homes. In 1984, the Governor's Planning Council on Developmental Disabilities funded a project in the Chicago metropolitan area to train our agency staff to assess and place developmentally disabled children for whom adoption was the plan. On October 1, 1984, we received a grant from the Department of Health and Human Services to increase the adoptive placement of developmentally disabled children.

Once again we realized that we had to consider the internal as well as the external barriers to adoption of these children. Our own adoption staff had to be trained in the specialized area. We began by helping staff look at societal and their own personal attitudes toward people with disabilities.

Birth parents and adoptive parents of children with developmental disabilities advised us how services for these children are often fragmented between different agencies and departments and frequently are difficult to find. We are currently linking families to needed services and, in fact, linking the child welfare system to the developmental disability service system. We have found that many of these service agencies are willing to help us find adoptive families for our waiting developmentally disabled children.

Parents also told us that other parents with developmentally disabled children can often be more helpful than agencies. Our current recruitment contracts include monies for hiring adoptive parents to assist us in recruitment and family preparation activities, and for start up costs for parent support groups.

Developmentally disabled children are featured in all of our adoption recruitment efforts. We have made a special effort to reach parents and professionals familiar with the needs of disabled people. We have found that such persons are adopting children with diabilities. The "child" comes first. They see a child before they see a disability.

During the past fiscal year we have identified a total of 117 developmentally disabled children in placement who could benefit from adoption. Of that number, 78 children are in need of adoptive resources. During this same time period, 65 developmentally disabled children have been placed with adoptive families, and 54 developmentally disabled children have had their adoptions finalized.

Illinois is a member of the Interstate Compact and enjoys a reciprocal arrangement with other states. Children being placed for adoption in other states include special needs children.

Finally, we have learned that we do not need "special families" to adopt these "special children". We need families who can love and learn to care for the special needs of these children. This has helped us realize that we simply need to let people know that disabled children are waiting for adoptive homes, and that prospective adoptive parents will receive help in the specialized care a particular child may need.

Thank you for the opportunity to present testimony for consideration by the committee and to present the views of the Illinois Department of Children and Family Services. We stand ready to assist you and this committee in any way we can in providing services to children and their families.●

HUMAN RIGHTS VIOLATIONS IN CHINA

● Mr. HUMPHREY. Mr. President, I wish to bring to the attention of my colleagues a letter sent by me and Mr. HELMS to Mr. Reagan. The human rights violations of China's population policy have been well-documented. We feel it necessary to keep these violations at the fore of public attention, especially in light of the current visit of the Chinese President. The letter follows:

U.S. SENATE,
Washington, DC, July 23, 1985.

President RONALD REAGAN,
The White House,
Washington, DC.

DEAR MR. PRESIDENT: In recent weeks the press has given much attention to human rights violations occurring in South Africa. Congress has seen fit to enact sanctions on economic and military interaction between our two nations.

We are also aware that, coinciding with the visit of Chinese President Li Xiannian, new agreements have been reached with China regarding nuclear proliferation and economic relations.

Mr. President, in the interest of continuing this nation's awareness of human rights violations in foreign countries—as is being done in South Africa—and with the intention of reaching still more agreements with the Mainland Chinese, we bring to your attention once again the abuses of the Chinese population program.

The excesses of the "one child" policy have been well documented by such authors as Aird, Gupte, Mosher, Butterfield and the Washington *Post*'s Weisskopf. The private lives of couples are strictly monitored and menstrual periods are meticulously tracked. Prohibitions on early marriage and second children are strictly enforced. However, the most horrifying violations involve the use of coercion—women are forced to undergo IUD implantation, sterilization and abortion.

Mr. President, you have a unique opportunity to pursue with Li Xianninan appropriate solutions to the abuses of human rights propagated by the Chinese family planning program. We urge you to seek assurances of the Chinese President that rights violations will cease to be officially sanctioned, that violators will be severely punished, and that documentation to this effect be made public.

Sincerely,

Senator JESSE HELMS.
Senator GORDON J. HUMPHREY.●

NATIONAL YOUTH WORK PROGRAMS

● Mr. SIMON. Mr. President, over the last few years we have heard much about the creation, or recreation, of a Youth Conservation Corps. I strongly believe in the concept of national service, and believe that national youth work programs would be an appropriate way to address the dual problems of youth unemployment and training. It would not be magic. We will not do away with the effects of poverty and poor education, the damage of drug abuse and juvenile crime, but we owe own young people a change. A version of a youth corps would help thousands have that chance.

I ask that an article from the New York Times by Ford Foundation President Franklin Thomas be printed in the RECORD. The article describes successful municipal and State programs which enlist young people to provide services which are most needed in the area, ranging from staffing homeless shelters in New York to clearing salmon streams in California. The variety of these programs and their successes show us that the concept is a sound one. The magnitude of the problems of youth unemployment and the need for training and experience make clear that when Congress passed the American Conservation Corps last year, we were responding to a real need in a productive way. We should again consider such a program because the problem has not gone away. We see the problem increasing. A useful service is performed with public service programs for youth and young lives are helped to achieve goals and gain experience. As a nation, we all gain.

The article follows:

NATIONAL SERVICE FOR JOBLESS YOUTH

(By Franklin Thomas)

Despite the economic recovery, the labor market seems to have shut down for young people. While it is estimated that five to six million part-time jobs will become available this summer, this number falls far short of demand and will have only a limited impact on the mounting year-round jobless rate for youth.

While total national unemployment hovers near 7.2 percent, youth joblessness stands at 16 percent for whites, 24 percent for Hispanics, 43 percent for blacks. The reasons for this failure to absorb young workers are familiar: industrial and technological changes generate fewer entry-level jobs; manufacturing has fled the inner city for suburbs and now, increasingly, for other shores; many youngsters are not adequately taught workplace skills and attitudes.

This summer, before more teenagers are abandoned to the ranks of the unemployable, let us renew the idea of national youth service. Proponents of such a program share the conviction that young people represent a vastly underused resource that should be encouraged to offer itself in the service of our society, economy and national defense. They believe a system of youth service might help dampen the incidence among youth of drug and alcohol abuse, crime and vandalism, unwanted pregnancies and other symptoms of alienation. Most important, national service could be more than a repair shop for social damage or a means of keeping youngsters occupied: it could help them sort out their identities, build lifetime principles and develop a greater respect for self and society.

Congress last year passed a bill that would have created an American Conservation Corps to put youngsters to work in parks and public lands. President Reagan vetoed that bill. The strongest leadership on behalf of youth service, however, has come from states and municipalities. Consider these examples:

The New York City Volunteer Corps. Many participants in this city-funded organization are high school dropouts. Members earn $80 a week staffing a shelter for the homeless, rehabilitating city parks and taking oral histories from residents of a geriatric center. Those completing the 12-month program are awarded cash and educational vouchers to provide free schooling.

The California Conservation Corps. Assignments for this $35 million a year program funded by California's Natural Resources Department range from repairing dams to clearing salmon streams to assisting forest-fire brigades.

The Northwest Youth Corps. This summer-only environmental program in Eugene, Ore., has a unique feature: roving crews of young workers are hired directly by private businesses for short-term assignments. The logging industry has used the corps to assist in replanting forests after timber harvests.

In all, more than 30 such programs are taking shape around the country. While some, such as Pennsylvania's year-old Conservation Corps, are targeted at the economically disadvantaged, others, like the California corps recruit members from a wide spectrum of social and educational backgrounds. One notable effort, in the East Harlem section of New York City—the Youth Action Project—specifically seeks society's most difficult youngsters and helps them devise their own community service programs.

Not only do these programs help develop values and attitudes that go with responsible adulthood, studies show that work experience—even part-time jobs—together with education and skill training can significantly improve a young person's long-term employment and earnings prospects.

The Federal Government should study the successful examples of local youth service programs to design a national program. Clearly, a number of concerns would have to be considered: for example, program design, the extra costs imposed on a deficit-burdened budget, the impact on military recruitment, rural vs. urban settings, attitudes of organized labor, etc.

Despite such problems, national service is a compelling idea that merits trying. The important point is making the commitment before youth unemployment rates get even worse.●

RECESSION ON THE RIVER

● Mr. COCHRAN. Mr. President, the inland barge and towing industry continues to suffer in the grip of a severe economic depression. The following July 14 New York Times article notes that 16 barge companies employing more than 1,000 rivermen have gone out of business in Greenville, MS, since 1981 alone.

Many of my colleagues know that this is not a problem unique to my State of Mississippi, but is a national economic problem affecting our entire transportation system from the Great Lakes to Oregon.

I urge my colleagues to read this article by William E. Schmidt in the New York Times, which accurately describes the harsh impact the budget and trade deficits continue to have upon the water carrier industry.

The article follows:

[From the New York Times]

THE RECESSION ON THE RIVER

(By William E. Schmidt)

By almost every measure, these are perhaps the hardest of times along the nation's rivers and waterways. Here, as elsewhere on the Mississippi, the volume of freight crossing the once-bustling docks has plunged 30 percent since its 1978 peak. Hundreds of barges stand idle waiting for cargo.

Many of the towboat operators who earned their living moving grain, petrochemicals and coal down to New Orleans have gone bankrupt or are just barely hanging on. "This industry is on its knees," said Howard Brent, the owner of Brent Towing, a family-owned business that has been working the river out of Greenville, Miss., since 1941. "We're at a one-hundred-year low."

Rivermen whose fathers and grandfathers pushed barges up and down the Mississippi now find themselves out of work and out of hope. That's because the river is the economy in towns like Helena, Ark., and Greenville, where more than 1,000 rivermen have been laid off since 1981. "The small, independent river operator who flourished in a number of small towns is a vanishing breed," said Jack Baskin, who was the president of one of 16 barge companies that have gone out of business in Greenville since 1980.

The pilots and boatmen who work the Mississippi have always known it to be a treacherous river. But the economic currents have not been this turbulent since the late 19th century, when the expansion of the railroads sank most of the major steamboat lines. River business, in fact, did not begin to rebound until the 1930's, when the Federal Government stepped in, not only directing the United States Army Corps of Engineers to invest billions in navigational aids and port improvement projects, but also temporarily running its own barge line to help establish routes and markets that private operators took over and expanded in the 1950's.

But these days, most of the nation's 25,000 miles of inland waterway are facing economic problems, from the Great Lakes to the Mississippi, says Harry Cook, president of the National Waterways Association. "The problem is mainly the world economy, coupled with the strength of the dollar abroad; American industry is off and so are the exports of grain and coal and steel that are moved on the waterways," Mr. Cook said.

Now, however, businessmen, barge owners and port administrators say they have something else to worry about: renewed talk in Washington about requiring local governments and private companies to pay a larger share of the cost of much-needed navigation, channel and port improvements, public works projects which historically have been paid for by the Federal Government.

Cost-sharing agreements were at the center of a compromise reached last month between Senate Republicans and the Administration, aimed at resolving a 10-year-long debate that has effectively frozen hundreds of millions of dollars of Federal money destined for scores of river and port improvement projects, including more than $625 million due to be spent at Memphis and four other ports along the lower Mississippi.

The Carter Administration held back the funds. The Reagan Administration has similarly refused to spend the money, arguing that users who benefit financially from the projects must share anywhere from 20 to 60 percent of the cost of port improvements, lock and dam construction and harbor dredging.

Among other things, the proposal under discussion in the Senate would over 10 years double to 20 cents a gallon the tax on diesel fuel paid by towboat operators, and earmark the revenues for channel and harbor projects. "I'm so far underwater now I'm using a snorkel, and the Federal Government is trying to put another tax on me," complains Mr. Brent, in Greenville. "They're going to drive us out of business."

CONGRESSIONAL RESISTANCE

There is no guarantee that Congress will eventually approve the kind of cost-sharing formulas being considered by the Senate. On the House side, there has been sharp resistance to cost-sharing.

The debate over ending an era of Federal involvement in river commerce comes just as the most expensive public works project in the history of the Army Corps of Engineers has opened. The 234-mile Tennessee-Tombigbee Waterway, a chain of locks and canals in eastern Mississippi and western Alabama, was officially dedicated in June. It is intended to provide inland shippers a shorter and less expensive water route to the Gulf of Mexico, as well as stimulate one of the nation's most economically backward regions.

But after spending some $2 billion on the project, the Administration now would prefer that state and local governments, rather than the Federal Treasury, take the lead in finding the money to help develop ports and harbors. As it turns out, the Tenn-Tom, as it is known locally, couldn't have opened at a worse time. With waterway business down nationally, traffic along the Tenn-Tom is likely to be well short of the expectations that boosters had for it in the 1970's.●

KEY TO LATIN AMERICAN ECONOMIC REVIVAL

● Mr. McCLURE. Mr. President, it is basic to the Marxist philosophy that private property must be abolished. Wealth must then be redistributed. The notion then goes that there will be no classes; no rich, no poor. However, common sense tells us that merely reshuffling meager assets from one group to another will not result in a decent living for those in the impoverished Third World. What good does it do to divide up what is already inadequate? The only economic system that will provide genuine rewards is one that provides for the actual growth of existing wealth. Experience has shown that socialism stifles economic growth. When the marketplace is under the tinkering hand of the bureaucracy, we can expect the bureaucracy to thrive, and the marketplace to languish.

As we view with dismay the turmoil in Central America, we are more and more aware that without economic progress, there can be no political stability. Yet this economic progress seems unlikely without an infusion of capital. During the 1970's, massive amounts of foreign aid, through the

auspices of the World Bank and its ilk, were channeled into the Third World. Yet still more investment will be necessary to stimulate real economic health. We must encourage governments in that part of the world to foster conditions that will encourage private-sector investment. Foremost, I believe, those governments must recognize that private property is essential for economic and social justice, and that the freedom to work, to save, and to invest and see the rewards of this endeavor is essential to human dignity. It also seems clear that investment in a country that threatens confiscation is a fool's bargain.

Our Latin American neighbors are rich in natural resources, and in what is more important, people who are ready to work for their own economic betterment. What will be necessary is an infusion of private sector capital.

J. William Middendorf II, U.S. Permanent Representative to the Organization of American States, in an address before the International Conference on Latin America sponsored by the Center for International Relations in San Jose, Costa Rica, on February 22, 1985, expands on these points. I ask that this address be printed in the RECORD, so my colleagues and their staffs can examine in depth the steps that must be taken to foster economic health and political stability in Latin America.

The address follows.

ADDRESS BY AMBASSADOR J. WILLIAM MIDDENDORF II

It is a pleasure for me to join the illustrious group here in the discussion of the conference theme: "Basic Freedoms in Latin America: Their Past, Present and Future Prospects." The fact that this historic conference is treating both the political and economic aspects of Latin America's situation is indicative of what Secretary of State George P. Shultz stated in his testimony before the Senate Committee on Foreign Relations, entitled "The Future of American Foreign Policy: New Realities and New Ways of Thinking" [Current Policy No. 650], January 31, 1985:

The United States seeks peace and security; we seek economic progress; we seek to promote freedom, democracy, and human rights. The conventional way of thinking is to treat these as discrete categories of activity. In fact, as we have seen, it is now more and more widely recognized that there is a truly profound connection among them. And this has important implications for the future.

Secretary Shultz expanded on these points by saying: . . . it is more and more understood that economic progress is related to a political environment of openness and freedom. It used to be thought in some quarters that socialism was the appropriate model for developing countries because central planning was better able to mobilize and allocate resources in conditions of scarcity. The historical experience of Western Europe and North America, which industrialized in an era of limited government, was not thought to be relevant. Yet the more recent experience of the Third World shows that a dominant government role in developing economies has done more to stifle the natural forces of production and productivity and to distort the efficient allocation of resources. The real engine of growth, in developing as well as industrialized countries, turns out to be the natural dynamism of societies that minimize central planning, open themselves to trade with the world, and give free rein to the talents and efforts and risk-taking and investment decisions of individuals.

PRIVATE AND STATE SECTOR APPROACHES TO DEVELOPMENT

It is becoming more and more obvious throughout the hemisphere that without a dynamic free enterprise system, governments can neither stimulate nor sustain economic growth nor diversify their economies to foster economic development. Too often in the past, one heard the truism that first must come a proper infrastructure, but this has led to vastly overblown bureaucracies of government-owned means of production far beyond such basic infrastructure requirements as roads, utilities, and communications. Without an efficient and limited public sector at a manageable economic cost—and without an overall environment conducive to sound investment—privately owned enterprises are unlikely to make their full contribution to development and commerce.

Economic development can no longer be financed externally through massive amounts of foreign aid or foreign borrowing, which were hallmarks of the 1960s and 1970s. Now growth, if it is to come, must begin with each country's climate to attract and keep in country local savings and to attract foreign savings, i.e., having a set of motivations and attitudes that are concretely expressed in the absence of civil conflict, a system of generally accepted and enforceable property rights, and the ability of individuals to enjoy the fruits of their labor without confiscatory systems of taxaton or arbitrary seizure of property. If government controls too much of the means of production, as is the case in many of the high-debtor countries in our hemisphere, or if it is inefficient and ineffective or all of the above, or if it pursues policies that significantly distort free-market decisionmaking, the overall prospects for economic development suffer, and international commerce with it. As Secretary Shultz noted in the testimony I cited earlier: . . . recent experience has fueled a broad and long-overdue skepticism about statist solutions, central planning, and government directions.

This intellectual shift is partly the product of the extraordinary vigor of the American recovery. The United States has revised its tax system to provide real incentives to work, to save, to invest, to take risks, to be efficient. We have reduced government regulation, intervention, and control. We have opened opportunities for freer competition in transportation, finance, communication, manufacturing, and distribution. Last year's real growth in GNP [gross national product] was the sharpest increase since 1951; inflation was the lowest since 1967. The overall result was the creation of over 7 million new jobs in 2 years.

It is our sincere hope that the factors behind our present success in the United States will be emulated in Latin America because a return to sound economic policies in all of the hemisphere would be mutually beneficial and ultimately create a better standard of living for all. We are all one hemisphere, and what affects the Latin countries affects us all. Clearly, it is in my own country's trading interest, since we are running a $20 billion trade deficit with Latin America, largely as a result of its sharply curtailed imports from us. It is also in the interest of the world's financial institutions which have major loan exposures there. Finally, the ability of the hemisphere to withstand communist adventurism and narco-terrorism depends on sound economic policies for economic recovery.

As one who has worked with the Latins for 30 years, I don't think I can emphasize strongly enough my feeling that Latin America must work toward a better balance between government and free enterprise, which at present is so heavily skewed toward state ownership.

Unfortunately, we seem to be losing the semantic battle for the minds of Latin Americans when we extol the virtues of free enterprise. It is an unfortunate fact that Marxist teachers have infiltrated primary schools in many Latin American countries. From that key position, they take advantage of their young charges' formative years to make them feel that Marxism is the natural state of affairs of any society. Therefore, anyone who opposes it must be against humanity. Foreign private direct investment becomes "economic imperialism" in the Marxist-Leninist lexicon, and this economic imperialism opposes a "new international economic order" which calls for redistribution of the world's wealth. In the Marxist lexicon, we are in a zero-sum game where, if one group is to attain greater wealth (read "the exploiter"), another group must lose it. None of this helps to encourage the much-needed new capital to come in to create the jobs so desperately needed in countries with unemployment levels ranging up to 30% and 40%. In fact, one wonders if Marxists in countries with non-Marxist governments don't hope to keep unemployment levels high, in the hopes that the resulting unrest might help bring them to power.

The trend toward government ownership is clearly seen in Mexico, where, according to trend data, there were only 84 government enterprises in 1972. By 1982, there were 760. During the same period, total government spending as a percentage of gross national product increased from 23% to 46%. By 1982, following the bank nationalization, the great majority of Mexico's major industries were under government control, and the government's share of total capital formation had reached 45%. It is an interesting footnote that in the period 1957-72 (during most of which Dr. Ortiz Mena, now president of the Inter-American Development Bank, was finance minister), Mexico's compound annual rate of GDP [gross domestic product] growth was 6.6%, whereas during the period 1973-83, after the oil boom began, this GDP growth rate averaged 4.7%. Even in Brazil—where in 1979 President Figueiredo created as special ministry with the objectives of (1) selling government-owned enterprises to the private sector, where feasible; (2) restricting the indiscriminate growth of state-owned enterprises; and (3) strengthening the free enterprise system—little progress has been made and the spending of government and its companies approaches 50% of the gross domestic product.

A good sign for positive change is that some of the empirical research which has been conducted on the macroeconomic consequences of the statist "solutions" so long favored in most of Latin America is beginning to receive wider publicity and beginning to affect the thinking of high-level pol-

icymakers. Ke-Young Chu and Andrew Feltenstein, in their paper "Relative Price Distortions and Inflation: The Case of Argentina, 1963-76" (International Monetary Fund, *Staff Papers*, Volume 25, September 1978), for example, estimated that, in Argentina, government transfers to cover public enterprises' losses were proportionately 10 times as inflationary as the financing of private enterprises' losses through commercial bank borrowings, primarily because it is assumed that only in the former case are the losses translated into high-powered money through central bank financing of the government deficit. Because the state in Argentina owns the vast majority of its industrial production, and since most of these state-owned industries operate at enormous losses which only government printing presses can make up, the inflation rate there last year approached 700%.

Other equally devastating findings are discussed in *Public Enterprises in Mixed Economies*, by Robert H. Floyd, Clive S. Gray, and R.P. Short:

For 25 developing countries for which data were available, Short estimates the average (weighted by GDP) overall public deficit, before reduction by government current transfers, at 5.5 percent of GDP during the mid-1970's. He further estimates that the overall deficit in developing countries increased by 2.5 percentage points of GDP between the late 1960s and mid-1970s.

Defining the "budgetary burden" of public enterprises as the residual of government transfers and loans, less loan service payments by the enterprises, Short estimates this burden to average 3.3 percent of GDP for 34 developing countries, compared with a 4.4 percent estimate for the central government's overall budget deficit in these countries. In other words, public enterprises accounted for three-fourths of the central government deficit in the countries in question.

As I have witnessed during the last 30 years, the Latin American countries have suffered ever more stifling bureaucratization of their economies. Government intervention—often buttressed by nationalist and/or socialist ideologies—has resulted in substantial increases in:

State ownership of economic activities in, for example, extractive industries, manufacturing, financing, and international trade and commerce, far beyond the traditional limits of infrastructure and often accomplished through expropriation without adequate compensation;

Regulation of private economic activity via money, credit, and exchange controls, licensing systems, and price and wage controls;

The state's consumption share of gross national product; and

Government investment expenditure—typically more than half of national capital formation.

INFORMAL ECONOMY

In spite of these trends, which amount to a fight for survival on the part of free enterprise in many parts of Latin America, there are several counter-trends. A good example of how the private sector can triumph in spite of governmental restrictions is revealed in the study by Peruvian businessman and economist Hernando de Soto. Because it takes a person 6 months to get government approval to set up a simple business in Peru, an informal economic system has grown to rival the more traditional business. According to de Soto, an informal economy developed and grew despite the tremendous handicap of being illegal.

De Soto's study estimates that the informal economy of Peru now accounts for 90% of Lima's garment industry, 25% of its furniture industry, 60% of housing construction, and even a good part of the automobile and truck industries. The informal Peruvian economy, says the study, has grown so fast that it now accounts for an estimated 60% of the total Peruvian economy, and almost none of this output is counted in the official $22 billion Peruvian gross domestic product. Perhaps most important is the free enterprise system's ability to create jobs: in Peru, an estimated two out of every three jobs are now in the informal sector.

Another factor Mr. de Soto's study points out is that South American economies often have two kinds of private sectors: one that is seriously burdened by excessive regulation and hampered by bureaucratic inefficiency but is officially sanctioned, and a second one which is far more in accord with free market principles but whose existence is barely acknowledged. This difference is made clear by an experiment documented by a study group from Mr. de Soto's Institute for Liberty and Democracy, in which it tried to set up a legal garment firm without easing the way with bribes. Acording to a *Wall Street Journal* article:

It took a lawyer and three others 301 days of full-time work, dealing with 11 government agencies to complete the paperwork—which, when laid end-to-end, measured 102 feet. (One of the researchers then tried the same experiment in Tampa, Florida, and finished it in 3½ hours.)

DEBT CRISIS MANAGEMENT

As we all know, Mexico's extreme illiquidity in August of 1982 precipitated the "debt crisis." The response was a provision of immediate emergency assistance by the U.S. Government and other creditors which led to the development of a rescue package and an IMF [International Monetary Fund] stabilization program. By the spring of 1983, the U.S. Government had developed a strategy designed to deal with the liquidity problems, primarily of the major countries, and to encourage the adoption of needed stabilization measures. What has not been widely understood is that the strategy was not intended to be one of "solution" for the "debt crisis" but rather one of "management" of the crisis with the central purpose of preventing the liquidity problems from developing into a crisis of the entire international financing system.

I think it would be helpful to recall the elements of the U.S. Government strategy for management of the debt crisis as reaffirmed at the Williamsburg summit:

Credible economic stabilization measures to be undertaken by the individual debtor countries;

Sustainable economic growth in the OECD [Organization for Economic Cooperation and Development] countries, combined with the maintenance of open markets;

Support from the IMF and other international financial institutions for economic adjustment; and

The provision of bridge financing by creditor governments when needed.

I think we can all agree that, up to now, the strategy has succeeded in its central purpose of avoiding the development of a systemic crisis while, at the same time, supporting stabilization efforts in the debtor countries.

NOT YET OUT OF THE WOODS

I believe that, with what I have said up to this point, it should be clear that we are not out of the woods. In fact, I would agree with the testimony of Dr. Norman Bailey, former Assistant to the President for International Economic Affairs, before the Subcommittee on Western Hemisphere Affairs of the U.S. House of Representatives on January 29, 1985: ". . . Unfortunately, we have always been in the woods and the path out of them is obscure and easily lost." Agreement with this statement stems not from an attitude of pessimism but rather from an acute recognition that the real world is pregnant with danger—the economists' definition of the real world being "the nominal world minus inflation" notwithstanding.

One is led to this opinion by simple arithmetic. At the end of 1981, the Latin American countries owed approximately $297 billion. At the end of 1984, their external indebtedness amounted to about $371 billion. Despite the high visibility of U.S. banks in this situation, they, nevertheless, only hold one-fourth of this debt, the rest being held by foreign banks, multilateral lending institutions, and governments. After 3 years of crisis and austerity, Latin America, therefore, has increased its indebtedness by about $75 billion on which, by the way, interest is due. About $34 billion of the $75 billion was lent by commercial banks in countries reporting to the Bank for International Settlements, and of the $34 billion, $12.6 billion was lent by U.S. banks, During the period 1981-84, as a result of rescheduling agreements, the debt service ratio—i.e., interest and principle payments as a percentage of foreign exchange earnings (export earnings from goods and services)—of the debtor countries declined from 51.2% to 43.3% of merchandise exports. The ratio of net interest payments to merchandise exports declined somewhat to about 35% in 1984, demonstrating the sensitivity of these economies to both export growth and the changes in world interest rates.

From the point of view of the balance of payments, we have seen Latin America accumulate a $74 billion merchandise trade surplus in the period 1982-84 inclusive, but one which is apparently largely due to tremendous cuts in imports. The most recent estimates indicate that the value of Latin American exports in 1984 was still somewhat below 1981, although export volume showed an increase. During the same 3-year period, debt service payments amounted to $109 billion, and new money and the surplus on the trade balance amounted to about $148 billion, which I read to mean that approximately $39 billion was spent on services, fled the region, or was added to international reserves. Even under optimistic assumptions, the World Bank, the Inter-American Development Bank, and others have concluded that it will be the end of the decade before 1980 prerecession per capita levels of gross domestic product will again be achieved.

MAJOR UNCERTAINTIES

There remain a number of major uncertainties which render the global economic environment pregnant with danger. Highest on my list of uncertainties is the debt crisis, where we are by no means out of the woods, despite a recent spate of news articles to the contrary.

One fact which is often overlooked is that the country with the largest external debt in the world is not Brazil or Argentina, it is the United States of America. By the end of

June last year, foreigners had lent our treasury $171 billion, which was 15.6% of the total. The foreign debt of the American private sector at the end of June 1984 was estimated to be another $299 billion. It has been estimated that, by the end of May this year, the United States will become a net international debtor for the first time since shortly before World War I. Perhaps, when we bemoan the international "debt crisis," we should remember the words of John Donne: "Ask not for whom the bell tolls, it tolls for thee." Nevertheless, the size and growth of our economy, coupled with positive encouragement of free enterprise by President Reagan's policies, give us grounds for more optimism than in those countries where the parastatal, government intervention model predominates.

With regard to international debt prospects, Assistant Secretary of State for Economic and Business Affairs Richard T. McCormack posed two questions in a speech delivered last November ("The Medium-Term Outlook for the World-Economy," November 22, 1984, Current Policy No. 664):

First, is our [worldwide] present success in reducing these [balance-of-payments] deficits based on a draconian depression of activity . . . that is not sustainable either socially or politically?

Second, is the present outlook viable only under the most favorable assumptions and vulnerable to new shocks, such as OECD recession or higher interest rates?

SOLUTIONS

I believe these questions remain valid, but for these questions to be given favorable answers in a historical sense, the "debt crisis" must be genuinely resolved. And for a genuinely favorable resolution, the solution must be sought in the reform of the domestic economies of the debtor countries of the hemisphere themselves.

The economic policies necessary to achieve such a reform are relatively easy to summarize. In terms of monetary policy, there must exist positive inflation-adjusted interest rates, realistic exchange rates, economically sound measures to control inflationary pressures, and measures to induce the return of flight capital. In terms of fiscal policy, the governments of our Latin American neighbors must reign in parastatal enterprises—which, for the most part, are deficit-ridden and a major source of inflation—reform their taxation and tax collection systems, and reduce subsidies. Simply put, they must put their own houses in order by creating clear and stable rules of the game for economic activity—clear rules which encourage productive activity by offering a secure climate for investment, both domestic and foreign.

What is needed was succinctly defined by Secretary of State George P. shultz in his address of December 6, 1984, entitled: "Democracy and the Path to Economic Growth" [Current Policy No. 641].

I am calling here for the reversal of state ownership and anti-import policies. These policies have placed stifling controls on private agriculture and industry. They have made them dependent on restricted markets. They have built costly protectionist barriers at national frontiers. And they have produced inefficient state enterprises that divert resources from more productive activities.

I call, instead, for a development strategy that works through an open economy, one that rewards initiative, investment, and thrift.

MAINTAINING AN OPEN MULTILATERAL TRADING SYSTEM

The world economy continues to be involved in a process of adjustment. Simply put, this adjustment involves converging the levels of consumption and production. During the 1970s, many countries lived beyond their means, as reflected in their unsustainable balance-of-payment positions. This situation must now be corrected by either increasing the "means" of living more modestly or both. While this process is not cost free, it is inevitable and has as its ultimate goal the restoration of sustainable noninflationary global economic growth.

A key element in this adjustment process is the maintenance of an open multilateral trading system, which is essential to position the countries of the hemisphere for servicing their external debt and for enabling the export and import sectors of all our economies to make their contributions to domestic economic recovery and growth. I also want to make three further points.

First, protectionism poses a serious threat to the prospects for a medium-term recovery in the world economy. Virtually all economic projections are predicted on open trade. If the assumption about the maintenance of open trading policies is removed, the medium-term outlook for the world economy becomes bleak.

Second, protectionism poses a fundamental threat to the strategy that has fostered development since 1945. International trade is a powerful engine of growth. The experience of the 1960s and 1970s demonstrated that countries with "inward-looking" development strategies—characterized by liberal import regimes, adequate incentives for producers, and the maintenance of realistic exchange rates and prices as well as positive real interest rate—have performed better than countries with "outward-looking" development strategies. Protectionism would threaten the viability of the "outward-looking" strategies with far-reaching consequences for economic efficiency and world trade.

The postwar strategy in many Latin countries of industrializing through import substitution, with its high tariff barriers, has been disappointing. It has fostered dual economies, crippled development in the agricultural sector, resulted in frequent balance-of-payments crises, and contributed to rapid urban growth and political instability. Studies by the OECD and the World Bank both recognize that a substantial relaxation of import restrictions coupled with moves toward appropriate exchange rates are necessary to expand exports and overcome the shortage of foreign exchange that most developing countries (except for some of the oil exporters) seem to face.

It should not come as a surprise that the development strategies based on import substitution have produced such poor results. Import substitution carried to excess is a little like a soccer team that plays only itself. Competition hones the skills and tactics of a soccer team, and, by definition, Brazil could never have won the world soccer championship if it had not been willing to play against foreign teams. Moreover, import substitution policies often also violate the law of comparative advantage since they amount to a dirigiste attempt to outguess the marketplace.

For these reasons, developing countries are urged to use great caution in applying import-substitution measures, and such countries are encouraged to focus more actively on the possibilities which exports offer their economies, while striving to keep our markets open to those exports. Since the 1970s, many of the more successful developing countries have been pursuing precisely such a strategy. The economic success stories, such as Taiwan, South Korea, and Singapore, have all adopted policies which emphasize exports as a means of promoting rapid industrialization.

In recent years, these and other countries have shifted toward more liberal trade and payment regimens. Often, these moves have not been as rapid nor as encompassing as we might want. But overall, particularly in East and Southeast Asia, there has been a clear tendency of the more economically progressive and successful countries to move in the direction of liberalizing trade barriers and adopting policies aimed at stimulating exports. The U.S. Mission to the OAS has recently chaired meetings of the ambassadors of the ASEAN [Association of South East Asian Nations] countries with the Andean OAS ambassadors, with the thought that fellow "developing countries" along the Pacific rim might compare notes so that the most successful features of each economic system might be examined.

Third, protectionism is, by definition, "anti-adjustment." It is an administrative way of delaying adjustment to changes in competitive positions stemming from changes in technology and productivity. We must jointly and severally rise to the challenge of structural adjustment rather than run away from it. Renewed growth and the reinvigoration of all our economies demand it.

I would like to note here that the U.S. commitment to an open multilateral trading system remains firm, as was demonstrated yet again in President Reagan's call for a new round of trade negotiations under the GATT [General Agreement on Tariffs and Trade] in his State of the Union Address. It has been contended that no country has an entirely open system. In this imperfect world, however, the United States is still the most open market among the major trading nations, as witnessed by our recent horrendous trade deficits. What is needed in the new trade round is a rededication to work toward perfecting the multilateral trading systems so that opportunities for fair trade can be increased for all participants. By fair, we mean that the goal posts should be the same width for each side. If ours is 20 feet wide and our trading partner wants his to be only 2 feet, we're going to lose a lot of games, and nobody believes that's fair.

VAST CAPITAL NEEDS

Latin America still needs vast amounts of capital for progress or, indeed, to maintain present living standards. According to an Inter-American Development Bank study, between now and the year 2000, Latin America and the Caribbean will have to create 100 million new jobs, since half the population is under 20, and birth rates are running at 3% (with Mexico's at 5.8%). The average cost for creating one new job in the region is estimated at $12,500, leading to an approximation that $1.25 trillion in capital will have to be generated in the next 15 years—a figure perhaps twice the amount of all transfers of funds to the hemisphere in the past 15 years, which includes the huge borrowing splurge of the 1970s.

For Latin America, if the decade of the 1960s can be considered as the decade of official aid from the developed countries (including the Alliance for Progress) and the decade of the 1970s as the decade of com-

mercial bank lending (nearly $300 billion), then the decade of the 1980s must be the decade of foreign direct investment. Why? Because, regarding future prospects for official aid, it would be prudent not to expect that support via the International Monetary Fund, the World Bank, and other multilateral lending institutions will be a replacement for private sector lending—and I stress the word replacement—for a number of reasons.

First, the sums needed are simply too large.

Second, virtually all industrialized country governments, including that of the United States, are grappling with the issue of controlling their own government deficits.

Third, it is unlikely that industrialized country central banks will be as accommodating toward these deficits as they were in the 1970s.

Further, it is now widely recognized that Latin America will not receive even remotely the same high level of borrowed capital from the banking systems to which it became accustomed during the 1970s, particularly in light of debt servicing problems on existing loans.

Of course, borrowing is only one of the three types of international monetary transfers—the other two being direct aid, either government-to-government or multilateral, and foreign direct investment. It is obvious to all that foreign direct investment, if it can be gotten, has the advantage over the other two of providing management know-how, technical skills, and technology transfers resulting in a high degree of export potential and, therefore, of being a source for valuable foreign exchange.

In order to attract the scarce and needed capital—in competition with other countries also aggressively seeking it, such as members of the OECD and the Pacific Basin countries—the climate for investment must be much more conducive in Latin America. The best test of this is found where local investors themselves find it attractive to reinvest their own funds and where there is no capital flight.

CAPITAL FLIGHT

Just at the time when Latin America needs so much more new capital, there has been the reverse trend of hemorrhaging capital outflows through flight capital.

Henry C. Wallich, member of the Board of Governors of the U.S. Federal Reserve System, in a recent incisive paper entitled, "Why is Net International Investment So Small?," made the following comments:

There seems little doubt that substantial capital exports have taken place from the countries that were borrowing. Unfortunately, one must assume that in large part this represents capital flight. The assets, thus acquired, probably do not produce income and taxes from the capital-exporting country, and probably are not available to strengthen its foreign exchange position and its economy generally. In other words, given economic and political conditions of the capital-exporting countries, these foreign assets are not likely to play the same constructive role for the home countries that capital exports from developed countries have ordinarily played. To be sure, changes in the politics and economic policies of the respective countries, giving adequate protection to the owners of capital and a positive real return on domestic assets, may change that situation. They may convert what today is flight capital into an important resource for the country.

The irony of this situation is that, in fact, Latin Americans own plenty of capital. It is just not located inside Latin America—the amounts in Swiss and Miami banks and in San Diego condominiums probably far exceed the liquid funds in the home countries. Indeed, generations of Latins claim they have been brought up to get their money out into "safer" havens as soon as they make it. This trend has to be reversed if Latin America is to grow at all.

Henry Wallich further states: For the [world's] eight largest [non-U.S.] borrowers over the years 1974–1982, . . . calculation[s] show an increase in debt (equity and direct investment included) of $317 billion, while the current account deficit adjusted for changes in official reserves, amounts to only $207 billion. Thus, there seems to have been a capital outflow of $110 billion. The degree to which borrowing financed this capital outflow differs among countries. For Brazil, only 12 percent of the inflow was compensated by outflows; for Mexico, 45 percent; for Venezuela, almost the entire inflow was absorbed into outflows.

Nearly 100% capital flight? Clearly, with a change in domestic policies away from the parastatal-import substitution approach to economic development, there is reason to believe that this money could be attracted back to Latin America, which would, of course, be a major contribution to a lasting solution of the debt crisis and job creation.

In his February 8, 1985, address, "The International Debt Situation in an American View: Borrowing Countries and Lending Banks," Henry C. Wallich states further:

Unfortunately, one must assume that a large part of the borrowed money went for consumption in the form of excessive imports of high-priced oil and various consumer goods. Frequently this spending was financed through government budget deficits, caused by subsidies and other unproductive expenditures, including purchase of weapons. A worldwide shift from negative real interest rates to significantly positive real rates, and the consequent rise in debt service, also used up some of the funds borrowed.

In adding up incremental investment, capital flight, and increased outlays (in nominal terms) for consumption, there is a danger of over-explaining the absorption of borrowed funds. The best judgment seems to be that the borrowing countries experienced a substantial increase in their income and debt-carrying capacity and that these benefits of added investment could be enhanced in future, if measures are taken to induce flight capital to return.

It may be that this audience will find itself closer to the Henry Wallich school of thought on flight capital than the point of view expressed to me recently by a prominent Argentine economist that, at least in the Argentine case, the term "flight capital" was misleading and that more accurate terminology would be "portfolio diversification."

OTHER SOLUTIONS

While it is relatively easy to diagnose the ills resulting from excessive government involvement in our economies, it is far more difficult to find constructive solutions. In many of the countries of our hemisphere, the state-owned sector is so large, relative to the domestically owned pool of private capital, that a simple sale of those state enterprises that are running the largest deficits would be difficult (who would want to buy them?), and attracting foreign capital for this purpose also would be difficult, for well-known political reasons. Indeed, there are still many in Latin America who would view selling off parastatals to "transnationals" in the some way as they view foreign direct investment—selling off their "national patrimony." There have been ideas floated that some debt could be exchanged for equity in the parastatals. Brazil considered this for a time, but may have given up on the idea, at least for the present.

However, I believe that there are other potential and feasible solutions over the long term, for, as President Reagan has said, "Developing countries need to be encouraged to experiment with the growing variety of arrangements for profit-sharing and expanded capital ownership that can bring economic betterment to their people."

One such method of expanded capital ownership is advocated by Dr. Louis O. Kelso and Patricia Hetter in their book, La Economia de los Dos Factores: Un Tercer Camino. The plan involves employee stock ownership plans, which are nothing less than having the employees of the corporation also become the stockholders, i.e., owners.

There are now approximately 8,000 corporations in the United States using these plans, and the experience with them has been quite good—productivity goes up, worker income is linked to profitability, etc. While they are only one form of expanded capital ownership, the point I am trying to make is that there are alternatives to state ownership, and they should be explored and adapted to the conditions existing in each of the countries of our hemisphere. Indeed, Costa Rica and Guatemala have rapidly increasing employee stock ownership plans.

But the benefits of expanded capital ownership go far beyond the economic, as has recently been demonstrated in the La Perla project in Guatemala. La Perla is a 9,000-acre coffee and cardamom plantation in northern Guatemala. It has 500 full-time employees, about 1,500 family members, and approximately 4,000 other people dependent on the economy of the estate. In September 1984, the farm's owners set up a trust in which they allocated 40% of the stock. The stock will be paid for out of the future profits of the farm, but upon the signing, full voting rights were passed through to an employee association.

Early this year, 120 insurgents attacked the estate and actually took control of the center. The insurgents, however, were then attacked and driven off the farm by 200 armed workers, and a number of workers and insurgents were killed. In the week following the attack, the estate's 300 unarmed worker-owners petitioned the owners for additional rifles to defend against future insurgent attacks and volunteered to help pay for them through a payroll deduction plan. As Joseph Recinos (a representative of the Solidarity Union of Guatemala, a movement aimed at expanded capital ownership as a means of economic and social reform), has stated:

We can more clearly see what the true message of ownership and of vested interest in the free enterprise system means in viewing the La Perla model. There is no greater significance to the concept of defending the free enterprise system than a worker laying down his life to defend the company in which he is co-owner.

If we want to prevent further Nicaraguas or El Salvadors, the American Government must address the problem of economic and social justice in Central America. Promoting broad capital ownership as an alternative to

Marxist philosophy in Latin America, if they are actively pushed now as foreign policy objectives, can go a long way in giving people a vested interest in protecting the free-enterprise system.

Norman Kurland, one of the founders of the Center for Economic and Social Justice (a group whose goal is the promotion of employee stock ownership plans) stated in a Washington Times interview last September.

To win over Marxism-Leninism you have to go beyond the military. Of course, you have to be militarily strong. On the other hand, there is an ideological battle. Marx and Engels stated that you could sum up the entire philosophy of communism in a single sentence: Abolish private property.

The entire case of Marxism-Leninism disappears if we prove to the world that private property is essential for providing economic and social justice, and for providing human dignity to people in the Third World.

Marx was wrong. However, we cannot simply attack him on the basis of the problems he was focusing on but rather on the basis of the means that he would use. The solution is not to make enemies of the owners but to make owners out of the nonowners.

FOREIGN DIRECT INVESTMENT

Over the past 4 years, it has been made clear to me, in visits to every country in the hemisphere, that private foreign direct investment can play the key role in future trade and commerce. Indeed, it is the catalyst for economic development and international economic integration through the world trading system, as well as being perhaps the only remaining source of capital, technology, and management know-how on a scale needed for economic survival.

It seems intuitively obvious that the high-debtor countries of our hemisphere must take strong steps to court foreign direct investment as the most attractive alternative to new bank financing. Foreign direct investment has the advantage of not requiring fixed interest payments. Earnings are repatriated only if the investment is profitable. Local enterprises are able to sell to multinational companies and often gain access to new markets and distribution channels, both nationally and internationally. Finally, and most importantly, foreign direct investment creates real jobs as opposed to state-funded make-work jobs.

Unfortunately, the trend has been in the other direction. In 1950, U.S. direct investment in Latin America accounted for nearly 50% of the total U.S. investment overseas. By 1970, this figure had dropped 17% in Latin America and was 3% in Asia and the Pacific. At the end of 1982, the stock of U.S. direct investment was down 15% in Latin America and had doubled to 6% in Asia and the Pacific. In a time when total flows of U.S. foreign investment were declining, flows to the Far East rose sharply.

I am encouraged by the increasing recognition of the importance of internal factors for the revitalization of Latin American economies now being expressed by prominent Latin Americans. Brazilian Senator and former Planning and Finance Minister Roberto Campos stated the issues succinctly in his speech, "The New Demonology": "The United States has become the magnet for Euorpean and Japanese investors precisely because they have two things we lack—a strong currency and stable rules of the game."

The prominent Argentine economist, Marcos Victorica, has also addressed these issues. Mr. Victorica estimates that Argentine capital abroad amounts to about $27 billion and that much of this capital left the country during the early 1980s, despite the fact that real interest rates in Argentina amounted to about 20%—double U.S. real interest rates—and he has ascribed these developments to a lack of confidence. Regarding policies affecting foreign direct investment, Mr. Victorica has noted one of the key difficulties (such as exchange controls): "No one will come in [to invest] where a way out is forbidden."

Argentine Presidential Secretary General German Lopez recently spotlighted this problem in comments reported on the Buenos Aires government radio network, when he stated that, "President Alfonsin is determined to modernize the country and that, to this end, there is no alternative but to resort to foreign capital so that the investments that will contribute to Argentine development are made." The only way to make up for the time lost, Lopez states, is to urgently attract investments, adding that:

I want to say that the past 10 years have been very dramatic for Argentina and that I consider that in reviewing, in weighing our responsibilities, we are sometimes unfair. We have made mistake after mistake for virtually 50 years. We have practiced a sort of political cannibalism destroying each other. [Therefore] President Alfonsin is firmly determined to modernize Argentina in order to put it at the level of efficiency asked by public opinion.

Recently, the newly elected President of Uruguay, Julio Maria Sanguinetti, said that "those of us who historically defended a greater role for the State now have to say that we must reestablish equilibrium and that as a result our direction will be to reduce to the maximum extent expenditures of the State, and to encourage as much as we can private production."

I am pleased to see that some leaders of Andean Pact countries are taking a new look at their investment policies. During his recent visit to the United States, President Belisario Betancur of Colombia addressed a number of our business leaders on April 2. He said:

The Latin American experience of the past 10 years shows that self-sustained development is not stable if it is mainly dependent on a growing foreign debt. The development effort should be based on domestic savings and productive investment, supplemented by foreign loans. . . . From these considerations you may well understand why I said that . . . it was better to have more partners and fewer creditors.

We have made a proposal to the member countries of the Cartagena agreement to modify Decision 24 providing more flexible terms in keeping with foreign investment needs. The idea is to allow new investment in certain areas to be 100% foreign when the recipient country decides that its development needs so warrant.

It is now generally recognized by potential investors that one of the difficult impediments to foreign investment in Latin America has been the Calvo Doctrine. Many countries in the hemisphere incorporate the doctrine and other restrictions in their constitutions, in other laws, or in multilateral agreements, such as the Andean Pact decision 24. With regard to decision 24, I am pleased to note that there is increasing recognition on the part of member governments of the pact that more flexibility is required by member governments on foreign investment policies. This was one of the principal causes for Chile's withdrawal from the pact in 1976. Moreover, under the dynamic leadership of Craig Nalen, the Overseas Private Investment Corporation (OPIC) recently signed agreements with Colombia and Ecuador. These agreements were the result of countless hours of patient and persistent negotiation between Lorin S. Weisenfeld, Assistant General Counsel of OPIC, and various officials of Colombia and Ecuador, and it is to be hoped that other Andean Pact countries will follow.

While the United States rejects the Calvo Doctrine on the theory that the investor's government has an independent interest in fair treatment for its nationals, the Calvo Doctrine has unquestionably had a negative impact on the ability of foreign governments to provide diplomatic protection in the event of a miscarriage of justice. This doctrine had its origin in the early part of this century as a reaction to perceived abuses of protection by the United States and European powers on behalf of their investors and traders in the last century.

In countries that subscribe to the Calvo Doctrine, the foreign investor is considered to have agreed that all disputes—including those relating to expropriation—will be definitively resolved through local legal processes, and to have renounced any right to invoke the diplomatic protection of his home government in the event those processes give rise to a miscarriage of justice following expropriation. In the 1960's and 1970's, there were over 300 major expropriations in the hemisphere (excluding the $1.85 billion in thousands of unsettled expropriation claims of former U.S. investors in Cuba) where compensation was not arrived at through international arbitration and was often grossly inadequate or delayed in many cases. Corporate boardrooms around the world have long corporate memories, and as Cicero said to Atticus, "It is the right given to any man to err, but to no one, unless he is a fool, to persist in."

Another negative consequence of this policy is that potential U.S. investors are constrained from obtaining OPIC insurance coverage because of requirements limiting possible litigation to local courts, and of a prohibition of direct subrogation.

The United States has long favored an open international investment system. A major U.S. goal in the 1980s is to reverse the trend toward government-induced distortions in the investment process through international understandings and voluntary guidelines leading to a more open investment climate in which investment flows are able to respond to market forces.

RECENT POSITIVE STEPS

As part of continuing efforts in this area, the U.S. delegation to the 14th annual General Assembly of the OAS introduced a resolution entitled "Promoting Economic Justice Through Strengthening Private Direct and Indirect Investment in Latin America and the Caribbean." The operative part of the resolution reads as follows:

To instruct the General Secretariat to conduct a study of requirements necessary for the creation of economic and regulatory environments conducive to attracting and fostering direct and indirect investment in the countries of Latin America and the Caribbean. This study should identify the various private and official, multilateral and national agencies involved in the promotion of investment while also considering and evalu-

ating the growing variety of arrangements for profit-sharing and expanded capital ownership now available for the promotion of economic justice with a view to identifying operational mechanisms and sources of funding for cooperative efforts with said agencies that may be implemented in the framework of the OAS.

While the resolution did not come to a formal vote, the U.S. delegation was able to secure agreement, as noted in the rapporteur's report, that these topics would be taken up by the Permanent Executive Committee of the Inter-American Economic and Social Committee of the OAS in 1985. I view this agreement as a major achievement and a major step forward for Latin America, not because U.S., Japanese, or other OECD investors have any shortage of opportunities to invest at home or abroad, but because of the potential benefits to our own hemisphere that foreign direct investment brings in terms of improving standards of living.

The Reagan Administration is actively pursuing two programs in Central and South America which aim to improve the investment climate: the Caribbean Basin Initiative (CBI) and bilateral investment treaties. The CBI, by granting various products access to the U.S. market, provides important incentives for the private sector. Bilateral investment treaties offer important protection for investments. The intent of both programs is to stimulate additional foreign investment.

As you know, the key elements of the bilateral investment treaties are:

New and existing investment to be granted national treatment or most-favored-nation treatment, whichever is more favorable, but both sides are allowed to list exceptions to national treatment in specified sectors of economic activity;

Conditions for expropriation which accord with international law principles, including payment of prompt, adequate, and effective compensation;

Unrestricted transfer of capital, returns, compensation, and other payments into and out of the host country; and

Dispute settlement procedures involving third-party arbitration both for disputes between the host country and a national or company of the other country and disputes arising between the governments.

While these treaties are generally reciprocal in their provisions, the major inducement for the developing country is the assurances such a treaty offers a foreign investor.

As a result of the leadership of Bill Brock of USTR [U.S. Trade Representative], several countries have negotiated such agreements with us. In this hemisphere, we signed treaties with Panama in 1982 and with Haiti in December 1983. We are also very close to agreement with Costa Rica, and we have had negotiations with Honduras and El Salvador.

While the treaties mentioned above are laudable achievements for the parties concerned, in all candor, much remains to be done for our hemisphere to realize its full economic potential.

CONCLUSION

I titled my remarks today, "Free Enterprise: Key to Latin American Economic Revival." I would like to end on a positive note. Simon Bolivar said 150 years ago that Bolivia was a beggar sitting on a throne of gold. In an expanded sense, this is still true for resource-rich but extremely poor Bolivia and for several other countries in Latin America. The hemisphere is so rich in natural resources and populated by men and women of such talent and good will that there is no reason that our hemisphere cannot have a bright economic future. All that is needed is for the economic and political leadership of Latin America to reembrace the wisdom of their own founding fathers, Simon Bolivar and San Martin. These men of vision, along with our own Founding Fathers, were swept up with the liberalizing writings of Locke, Rousseau, Hume, and Adam Smith, which called for a separation of political and economic power and emphasized the sanctity of private property. Similar wisdom can be found in the words of Muhammad Ibn Khaldoun, the 14th century Arab jurist, historian, and statesman: "When incentive to acquire and obtain property is gone, people no longer make efforts to acquire any. This leads to destruction and ruin of civilization."●

SALUTE TO BILL CARLSON

● Mr. DURENBERGER. Mr. President, each year, the Mankato Exchange Club honors an individual who has made contributions to the community in the true spirit of the golden rule.

The recipient of this year's Golden Deeds Award is Bill Carlson, founder of Carlson Craft, a company which has grown to become the third largest firm wholesaling wedding and social stationery in the Nation.

At the time that Bill Carlson retired in 1974, his company had 550 employees, many of them students at Mankato State University. When he and his wife Betty founded Carlson Letter Service in their home in 1946, the total assets of the business were $300.

In his retirement, Bill has been active in his church, in Rotary, the United Way, and the Mankato Rehabilitation Center. Because of the outstanding entrepreneurial spirit and civic example set by Bill Carlson, I ask that an article about him be printed in the RECORD.

The article follows:

CARLSON BECAME JOB-GIVER TO THOUSANDS OF STUDENTS

(By Sue Menton)

NORTH MANKATO.—Even after Bill Carlson had made it in the business world, he never forgot what it was like to be a student with only $30 in his pocket.

Carlson, who will receive the Exchange Club's Golden Deeds Award on Thursday, came to Mankato in 1936, the height of the Depression to attend Mankato Commercial College.

"I had $130 in my pocket, and $100 of it went for tuition," Carlson recalled, sitting in the kitchen of his North Mankato home that overlooks the city.

That, he said, is why students were always welcome to apply for part-time jobs at his Carlson Wedding Service, later renamed Carlson Craft. Most of his employees were Mankato State students, and the company was willing to work around their schedules. In return, students "learned to dovetail their schedules with our busy time," printing invitations for spring and summer weddings.

"I remembered my own days as a student. I had to put myself through school, and my $30 didn't last long."

Pressed to name the accomplishment that means the most to him, Carlson cited his association with young people. "The business directly affected the lives of several thousand people, many who either wouldn't have received an education or who would have had to go into debt to get it."

Carlson said his fortuitous choice of Mankato Commercial College over two other schools he had been considering was based on the quality of the school's brochure. That fact, he said, was kept in mind later in his own business, when he stressed quality presentations in his promotional material.

After two years at MCC, he was hired as a bookkeeper at the regional office of National Refining Co. Then World War II broke out. "I saw the handwriting on the wall and joint the National Guard."

His ability to type, a skill most servicemen lacked, gave him a lot of breaks, he said, including desk jobs and early promotions.

After his discharge in 1946, he returned to Mankato, married Betty Hoffman, whom he had met at a church group before enlisting, and went to work as a bookkeeper at Swanson's Wallpaper and Paint.

He also had a little business on the side, mineographing form letters for other businesses, in the couple's home under the name of Carlson Letter Service.

"It was," he says describing the quality of those early efforts, "pretty crude."

Calrson would pick up orders on his lunch break, and his wife would type them in their back bedroom.

Business started slowly—the first month they made a $25 profit—but it steadily expanded.

He stumbled into the printing business when he accepted an old hand printing press and multigraph in exchange for a print job. Included with the printer was an instruction book that showed how to print napkins and stationery.

Carlson Wedding Service traces its actual start to July 1948, when a woman from his church asked if he could print her wedding invitations. The first of the multitude of brides who would send Carlson-printed invitations was LaJean Swan, who married Eugene Hartman, now of rural Madison Lake.

In September of that year, Carlson "took the plunge, quit my job, and went into [the printing business] full time. The relatives thought I was crazy."

Carlson said he likes to tell people, "Nobody told us we couldn't start a business on less than $300, and we were dumb enough not to know it."

At the time Carlson retired and sold the business in 1974, he had 550 employees on the payroll of what was the nation's third largest firm wholesaling wedding and social stationery.

Although only 59, Carlson decided to retire because there were more things he wanted to do.

"I realized that we could do many things in the business, but we couldn't manufacture time."

While he was working, he was involved only in his church, the First Christian Church, and the North Mankato Rotary Club. After retiring, he continued his church work, serving on local, regional, and national posts.

In addition to Rotary and the United Way, he became involved with the Mankato Rehabilitation Center, and was chairman of

the building committee when the new Map Drive facility was undertaken.

The Exchange Club's Golden Deeds Award that he will receive later this week is given to a person who has made "contributions to the community in the true spirit of the Golden Rule."

Carlson said that when he learned he had been chosen to receive the award, he was immediately taken back to his high school graduation where, as the class valedictorian, his speech was based on the theme, "Do unto others."

"It looks like I've come full circle," he observed.●

THE FARM CREDIT RELIEF ACT

● Mr. PRYOR. Mr. President, this morning the Banking Committee held hearings on S. 1151, the Farm Credit Relief Act. As the Senate considers the farm crisis in this country, we cannot neglect the small, rural banker, who is the credit lifeline to the farmer. The interdependence of commercial banks and their customers is especially strong in rural communities, and both are in danger of collapse.

No other sector of the economy is as dependent on credit as the farmer. Land, expensive equipment, seed, fertilizer, and fuel—all must be financed on the basis of what may be produced later that year. Farmers can sometimes put off paying for a new baler or milking equipment, but fertilizer and seed payments cannot be postponed.

There are 4,300 farm banks in the United States, banks with at least 25 percent of their loans in agriculture. These banks, by and large, have a special and unique relationship with the farmers in their areas, a relationship which does not exist in larger, city banks. The banker and farmer have probably grown up together and attend church together. The banker knows if the farmer is a good credit risk and extends credit accordingly. The banker also deals personally with the feed store owner, the farm equipment dealer, and the other businesses who depend upon the health of the agricultural economy.

Typically, these banks are quite small and are are not linked with urban banks or money center institutions. Banks of less than $25 million in assets extend more than 30 percent of the total ag credit from banks, and 70 percent of all ag credit comes from banks of less than $100 million in assets. In my own State of Arkansas, I'm proud to say, out of 252 banks, more than 240 hold agriculture loans. Even if the farmer does not get all of his farm credit from the local bank, he keeps his checking and savings accounts there. Of course, the commercial ag banks hold only 25 percent of the Nation's farm debt, but the portion of the farm debt held by the commercial ag banks represents approximately 50 percent of the short-term, operating loans.

Due to factors largely beyond the farmers control, low commodity prices have left him with little income to pay off money that he borrowed in the late 1970's. What's more, declining land prices have eroded collateral values. The farm debt crisis, therefore, seems to be as much a bank problem as a farm problem.

Traditionally, farm banks have been healthier than other banks. They have had better returns on capital and assets and fewer bad loans. Of the 59 bank failures this year, however, 33 have been ag banks, compared to 25 ag bank failures in 1984, and the Federal regulators have concluded that ag bank troubles will get worse before they get better.

A few facts illustrate the seriousness of today's problem:

Farm debt has nearly doubled in the last 4 years. At the same time farm income fell from $32 billion to $20 billion, and land prices have fallen 15 to 25 percent, or 75 percent in some areas.

The number of classified ag loans in Arkansas has roughly doubled since last year.

Earlier this year the Agriculture Department announced that 360,000 of the Nation's 2.4 million farmers are in serious debt trouble; that is, they have committed up to 70 percent of their available assets as collateral for loans. I suspect the number may be even higher.

Although ag banks make up roughly one-third of our commercial banks, they account for more than half of all recent bank failures.

In January of this year a farm bank consultant told the Wall Street Journal that approximately 20 percent of the $210 billion farm debt—$45 billion—would have to be written off. This is debt held by both banks and production credit associations. In comparison, the total loan losses for the entire banking system in 1983 was a mere $8.4 billion. The FDIC insurance fund now totals $17 billion. The FDIC could probably absorb the several hundred small bank failures predicted by the Independent Bankers Association, but we need to remember that many superbanks have a large agricultural portfolio as well—$2 billion in ag loans by Bank of America.

I believe that the Farm Credit Relief Act is a reasonable approach to this problem. It is not a bank bailout bill or a farm bailout bill. Rather, I prefer to call it the Rural Economy Survival Act.

The essential ingredients of S. 1151, sponsored by Senator DIXON and myself, are as follows:

ADMINISTRATION OF THE ACT

The FDIC would have ultimate power to approve eligibility under the act, but the initial recommendation would come from the State banking commissioners or the Comprtroller of the Currency—depending upon whether State chartered or national banks are involved. A bank would not be declared eligible unless it could clearly show that once given the relief contemplated under the act, it could then show a net profit. There must also be no evidence of fraud or gross mismanagement by the ag bank.

REAPPRAISAL OF ASSESTS

A qualified bank would be allowed to reappraise its buildings, fixed assets and equipment to fair market value and book into the capital accounts of the bank any increase between the current book value and the fair market value.

WRITEOFF OF PROBLEM LOANS

The qualified agricultural bank would be allowed to renegotiate the debt of a problem borrower to a level at which the borrower could assure renewed cash flow. Any loss experienced by the bank could be written off over a 30-year period. Only banks having assets of $200 million or less and which are located in agricultural areas would be eligible to participate.

OTHER REAL ESTATE

The qualified bank would be allowed to reappraise the other real estate carried on its books and charge off any loss between the book value and the fair market value of this real estate over a 30-year period. Any expenses incurred in connection with the ownership of the other real estate could be written off over a 20-year period.

SALE OF INVESTMENT PORTFOLIO

The qualified agricultural bank would be allowed to mark all of its securities in its investment portfolio to market, sell the securities at fair market value, and write off any loss over a 30-year period.

S. 1151 has a number of attractive elements:

Qualified banks would be carefully determined by both local and Federal regulators.

Poorly run banks would be ineligible.

The bill takes a realistic approach to bad debt by using the actual market value of assets.

Bank losses can be spread out over a long period of time.

The writeoff is in line with accepted accounting practices.

There is precedent for this approach in our response to the savings and loan crisis of 1982.

Most important, it does not cost the Government a dime, in contrast to some interest rate buy-down proposals.

Mr. President, I am not a member of the Banking Committee, but as a member of the Agriculture Committee, I am painfully aware that all of our work on production questions will be fruitless unless the agricultural bank stays in business to extend the local credit that our farmers must have.●

THE GROWTH OF FREDDIE MAC

● Mr. HECHT. Mr. President, today I wish to recognize the Federal Home Loan Mortgage Corporation on its 15th anniversary.

The past 15 years have seen many changes in the mortgage finance industry. Fifteen years ago, few people knew that mortgages were sold, that they ever left the shelf of their neighborhood savings and loan. But now, mortgages trade freely, tapping the capital markets for additional sources of funds. Since Freddie Mac's inception, that has been the Corporation's unwaivering mission: To link the Nation's mortgage lenders with its capital market investors—and to do so profitably. For more than a decade Freddie Mac has brought tremendous commitment and constancy to the secondary market for conventional mortgages: Freddie Mac is responsible for building that market from nothing to what it is today.

Freddie Mac has seen the many changes in the mortgage marketplace, and has grown with it. At the time the Corporation was chartered by Congress in 1970, no more than 5 percent of all conventional home mortgages were sold into the secondary market. Largely because of Freddie Mac's pioneering leadership, the secondary market is established and expanding:

Secondary market sales of conventional mortgages have grown from $8 billion in 1974 to $88 billion in 1984—a 1,000-percent increase.

During its first full year of operation, Freddie Mac purchased 21,000 mortgages valued at $778 million. That wasn't a bad start and could have probably maintained its own momentum for years to come. But compare those figures to those purchase figures in 1984: Over 567,000 mortgages valued at $21.6 billion.

Through its leadership in the secondary market for conventional mortgages, Freddie Mac has sought to promote mortgage securities as attractive investments, with high quality, low risk, and competitive yields. The Freddie Mac Participation Certificate, or PC, introduced in 1971 was the Nation's first conventional pass through security. This year, Freddie Mac has over $71 billion of these PC's outstanding. Today, Freddie Mac PC's are widely regarded as benchmark instrument within the conventional mortgage securities market and enjoys widespread investor acceptance.

I think these figures are a telling reflection of Freddie Mac's effective role as a pathfinder in America's housing, financial industry—and it will continue to find even more innovative ways to tap sources of additional mortgage credit for America's homebuyers in the future.●

THE IMPORTANCE OF NURSING EDUCATION AND THE PROPOSED INSTITUTE OF NURSING

● Mr. HEINZ. Mr. President, I am very pleased that the Senate has passed the "Nurse Education Amendments of 1985." This legislation recognizes the Federal Government's responsibility to support the educational activities that are needed to develop a core of nurses with advanced and specialized training—nurses who will then share this expertise with others through teaching activities so that all nurses, and all patients, will benefit from this targeted Federal support.

Shifting economic incentives in today's health care marketplace are creating major expansions in nursing responsibility in all facets of health care. Increasing health care costs, and decreasing financial resources in Federal programs such as Medicare and Medicaid, will lead to a reexamination of decisions on which health practitioners will be reimbursed for providing different types of services. In the future nurses may be counted on to perform more and more of the services that were once performed by physicians. With the mounting evidence that the prospective payment mechanisms may result in hospital patients being discharged "sicker and quicker," thereby imposing a heavier burden on skilled nurses in nursing homes and other settings, members of the nursing profession would become even more critical as caregivers. And as future changes in health care financing mechanisms affect the scope, quality, and costs of services in hospitals, long-term care facilities, and community-based settings, it should be obvious that the need for well-trained nurses will become even more critical.

According to the 1984 HHS Report to the President and Congress on the Status of Health Personnel in the United States, by 1990 this Nation will have fewer than half the nurses with graduate education needed to satisfy the health care needs of our people. Similarly, we will face a shortage of nurses with geriatric training needed to care for the burgeoning elderly population unless efforts to increase geriatric training are continued and expanded. Clearly, the real question to address for manpower policy is "Are there enough personnel with the appropriate and necessary training?"

The Nurse Education Amendments of 1985 recognize our responsibility to ask the right question and target support for areas of nurse training where critical shortages exist. It is consistent with the President's 1984 message calling for more appropriate use of Federal support for health professions and nursing education, and it is consistent with my colleagues' and my own commitment to deficit reduction.

As chairman of the Special Committee on Aging, I am especially aware of the need for well-trained nurses. As the number of elderly nursing home residents increases in the future, nurses and nurses aides with geriatric training will be needed to assure that those homes are sources of quality health care and not just custodial services. Further, since 95 percent of the elderly population resides at home, either independently or with their families, community health nurses must receive training in geriatrics and gerontology in order to help older people maintain their ability to live independently. According to a recent NIA Report on Education and Training in Geriatrics and Gerontology, the minimum target for nursing faculty members in geriatrics is 750 in the year 1990, which will require almost a doubling of the current number, and a doubling again for a total of 1,500 by the year 2000.

Certainly some of the financial support provided by the Nurse Education Amendments of 1985 will go to nurse training programs in geriatrics and gerontology. In the future, however, I would like to see more funding targeted specifically to those programs. In fact, I have introduced a bill, the "Geriatric Research, Education and Training Act of 1985" (S. 1100 or GREAT), which would authorize increased funding for geriatric and gerontological training programs for nurses and other health professionals, and I will be working with the Appropriations Committee to incorporate parts of GREAT into the amounts appropriated for education and into committee language directing these amounts toward geriatric training.

While I unreservedly support the "Nurse Education Amendments" and commend the excellent work that has gone into them at the committee level, I am disappointed that it does not establish a National Institute of Nursing within the National Institutes of Health. The creation of this Institute is the next step needed to complement this bill and to improve Federal support for advanced nurse education. Research has already shown that nurse practitioners can provide high quality primary care at lower costs per patient visit, and that geriatric nurse practitioners can reduce the need for diagnostic tests and shorten hospital stays for elderly patients. A National Institute of Nursing would further promote research into innovative and cost-effective methods of health care delivery. Last year's House version of the Health Research Extension Act contained a provision creating a National Institute of Nursing, and the Senate accepted that provision in conference. I hope that this year's conference committee will once again support the National Institute of Nursing.

Finally, I commend my distinguished colleague, Senator HATCH, and the other members of the Labor and Human Resources Committee for their excellent work in putting together this fine piece of legislation. Nursing personnel are an invaluable national resource and this bill will provide critical support for their efforts to continue providing quality services throughout the health care continuum.●

HUMAN RIGHTS VIOLATIONS IN GUATEMALA

● Mr. SIMON. Mr. President, I would like to express my concern about the recent human rights violations that have occurred in Guatemala against the Apoyo Mutuo Human Rights Group.

Apoyo Mutuo is a group comprised of the friends and relatives of persons who have recently disappeared or been abducted in Guatemala. Early this year, the group staged a public demonstration to protest the Government's lack of action on their case and, with that, Gen. Meija Victores publicly proclaimed that the group was infiltrated by subversives. Shortly thereafter, in early May, two of the group's leaders were found brutally murdered. Since that time, at least four others of the leaders have fled abroad and those that remain within the country have received death threats.

The group met with a governmental commission months ago and provided it with a list of disappeared persons, as well as proof and eyewitness accounts as to the indentity of the abductors, many of whom were members of the Armed Forces. Since that time, no action has been taken.

I urge the Government of Guatemala to take strong action to bring to justice those who are guilty of human rights violations and to guarantee the safety of the courageous members of Apoyo Mutuo.●

PASSIVE EXPOSURE TO CIGARETTE SMOKE

● Mr. STEVENS. Mr. President, the potential health hazards of secondhand, or sidestream, cigarette smoke have received increasing attention from the scientific community. The concentration of known carcinogens found in the smoke released from a cigarette between puffs is, in some instances, more than 52 times that found in the smoke inhaled by the smoker. The health effects of passive exposure to this smoke has become an active research topic among epidemiologists and other public health specialists. Although the results of this scientific inquiry into so-called passive smoke are not yet all in, the conclusions of most completed studies point to significantly increased health risks for those exposed over a period of time to secondhand tobacco smoke.

I ask that excerpts from an article published in the American Journal of Epidemiology concerning a recent study of passive exposure to cigarette smoke be printed in the RECORD.

The material follows:

PASSIVE SMOKING IN ADULTHOOD AND CANCER RISK [1]

(Dale P. Sandler, Richard B. Everson and Allen J. Wilcox)

Sandler, D. P. (National Institute of Environmental Health Sciences, Research Triangle Park, NC 27709), R. B. Everson and A. J. Wilcox. Passive smoking in adulthood and cancer risk. *Am J. Epidemiol* 1985; 121:37-48.

Overall cancer risk from adult passive smoking has been examined using smoking by spouse as the measure of exposure. Information on smoking by spouse was obtained for 518 cancer cases and 518 noncancer controls. Cancer cases were identified from a hospital-based tumor registry in North Carolina. Cases included all sites except basal cell cancer of the skin and were between the ages of 15 and 59 years at the time of diagnosis. Cancer risk among individuals ever married to smokers was 1.6 times that among those never married to smokers ($p < 0.01$). This increased risk was not explained by confounding by individual smoking habits, demographic characteristics, or social class. Elevated risks were seen for several specific cancer sites and were not limited to lung cancer or other "smoking-related" tumors. Risks from passive smoking appeared greater among groups generally at lower cancer risk (females, nonsmokers, and individuals younger than age 50 years), but were not limited to these groups.

NEOPLASMS; RISK; SMOKING; TOBACCO SMOKE POLLUTION

Passive exposure to cigarette smoke has been linked with a variety of health consequences in humans, including bronchitis and pneumonia in infants (1), reduced pulmonary function (2) and acute respiratory disease in children (3-5), and decreased airway function in otherwise healthy adults (6). Several reports have also focused attention on a possible association between passive exposure to cigarette smoke and lung cancer (7-10).

In a case-control study by Trichopoulos and colleagues (7), 51 white females with lung cancer and 163 controls from an orthopedic service were compared with regard to smoking histories of husbands. Women who were not smokers but were married to smokers were at two- to threefold risk for lung cancer compared with nonsmoking women who were not married to smokers. An updated report of this study involving 77 nonsmoking lung cancer cases and 225 nonsmoking controls confirmed the twofold risk among passive smokers (8). In a prospective study from Japan, Hirayama (9) observed 245 lung cancer deaths among 91,000 married women. The lung cancer death rate for nonsmoking women married to smokers was nearly twice that for nonsmoking women married to nonsmokers and was one-half that for women who themselves smoked. Emphysema was the only other cause of death to exhibit such a pattern, although the trend was not statistically significant. Most recently, Correa et al. (10) reported a twofold risk for lung cancer among nonsmokers married to smokers. In contrast, analysis of data from an American Cancer Society study in the United States failed to demonstrate an association between passive exposure to cigarette smoke and lung cancer risk (11).

Many of the constituents of mainstream cigarette smoke which is actively inhaled by the smoker are present in reduced quantity in exhaled smoke (12) which is then passively inhaled by the nonsmoker. These same constituents are also contained in sidestream smoke which is released from the cigarette between active puffs and is also inhaled by the passive smoker. One might expect to find, as did Hirayama (9) for lung cancer, that for smoking-related sites, the cancer risk in individuals passively exposed to cigarette smoke might fall between that for smokers and that for nonsmokers. Risk from passive smoking might also be expected to be much lower than that from direct smoking.

However, some chemicals appear in higher concentration in sidestream smoke than in mainstream smoke, making the exposure from passive smoking qualitatively different (12, 13). The health consequences from passive smoking may, therefore, differ from those of direct smoking. These chemicals, many of which are known carcinogens, might lead to increased risk for cancer at sites not shown to be related to direct exposure to cigarette smoke. In comparing sidestream with mainstream smoke, Brunnemann (in refs. 12 and 13) found 52 times as much dimethylnitrosamine, 16 times as much naphthalene, 28 times as much methylnaphthalene, 3.4 times as much benzoαpyrene, and 5.6 times as much toluene, for example, in sidestream smoke as in mainstream smoke. While the concentrations of these chemicals are higher than in mainstream smoke, actual exposure from passive smoking is heavily influenced by the amount of smoke generated, the volume of ambient air, room ventilation, and the manner in which the cigarettes are smoked.

Differences in the route of inhalation of sidestream and mainstream smoke might also account for differences in site-specific effects. Wynder and Goodman (14), for example, have proposed that if sidestream smoke components are inhaled through the nasal passages, gaseous components but not smoke particulates would reach the lung.

As a preliminary exploration of the hypothesis that passive exposure to cigarette smoke may be carcinogenic, we examined adult passive exposure to cigarette smoke in relationship to cancers of all sites. Since active and passive smokers may differ in the mix of carcinogens to which they are exposed, it is not obvious which sites might be at highest risk of cancer among passive smokers. Since active smokers are also passively exposed, candidate sites might be drawn from those that have been linked with active smoking. However, there may be additional sites whose relationship to smoking has been obscured. In studies comparing smokers with nonsmokers, passive smokers are often included in the nonsmoking group.

[1] From the Epidemiology Branch, Biometry and Risk Assessment Program, National Institute of Environmental Health Sciences, Research Triangle Park, NC.

Received for publication January 23, 1984, and in final from April 12, 1984.

Reprint requests to Dr. Dale P. Sandler, Epidemiology Branch, Mail Drop A3-02, National Institute of Environmental Health Sciences, P.O. Box 12233, Research Triangle Park, NC 27709.

The authors thank Dr. James P. Browder and the staff of the Cancer Data Base, North Carolina Memorial Hospital for allowing the use of the tumor registry for case identification, and David L. Shore, Karen L. Milne, and Sue W. Ward for assiting in data management and analysis.

This would make it difficult to detect small differences in risk due to passive smoking. We report here on cancer risk from passive smoking using smoking histories of spouses as a measure of passive exposure to cigarette smoke during adulthood.

DISCUSSION

We have found a significantly elevated overall cancer risk for individuals passively exposed to cigarette smoke. This cannot be readily explained by a number of other factors, including individual smoking habits and two measures of social class: education and broad occupational category. Elevated risks were seen for several specific cancer sites and were not limited to lung cancer or other "smoking-related" tumors. These findings might relate to other factors we have not measured or to deficiencies in study design. However, we have not been able to identify a possible confounder or a bias of selection or recall that could have caused the difference in smoking patterns of spouses between cases and controls. Study subjects and interviewers were told simply that the study was designed to look at smoking patterns in families.

Cases and controls were similar with regard to their own smoking histories. This was partly because of the choice of friend controls who tended to have similar smoking histories and because known smoking-related sites were underrepresented in the case population. Cases included in the study were generally younger than those with smoking-related tumors. Unavoidable delays between case identification and completion of interviews also contributed to the lack of smoking-related cancers. Persons with lung cancer and other smoking-related tumors were more likely to have died before they could be interviewed. In addition, because of the special interests of physicians at the hospital from which cases were identified, breast cancers and gynecologic cancers were overrepresented. As a result of this unintentional matching on smoking status, risks from passive smoking and direct smoking cannot be compared.

The route of exposure for the passive smoker is via inhalation. Reports of effects on upper respiratory tract function (2-6) are consistent with this. There has also been a report of mutagens measured in the urine of passive smokers (17), indicating that components of cigarette smoke enter the bloodstream and are circulated throughout the body of the passive smoker. Another report indicated that enzyme activity can be induced by passive exposure to cigarette smoke (18). These findings are tentative, but do suggest that an overall increase in cancer risk or an increase in risk for specific nonrespiratory sites following passive exposure to cigarette smoke is plausible.

Our study was intended to consider a range of effects similar to what might be measured in a prospective study of a cohort of individuals who are passively exposed. Such an approach serves to single out sites which appear to be important as well as to investigate whether passive exposure might increase susceptibility to additional insults, thereby increasing cancer risk overall. Two reports in the literature use prospectively collected data (9, 11). One of these (11), however, does not provide data on cancer risks at sites other than the lung, and neither report provides data on overall cancer risk from passive exposure to cigarette smoke. Data from the Japanese study recently presented by Hirayama, however, indicate that cancer risk may be increased at sites other than the lung and that risk may not be limited to smoking-related sites (Hirayama, personal communication: presented at Hawaii Cancer Conference, 1984).

For this study, passive exposure during adult life is determined from a questionnaire report of the number of years of married life during which a spouse smoked. Misclassification of exposure status is likely for individuals who never married but have lived with other persons who smoked. Slightly more controls than cases reported never marrying, which might lead to differential misclassification. However, we reanalyzed our data, excluding subjects who never married, and found the results to be the same. When only married subjects were included, the odds ratio for cancers of all sites combined was also 1.6. We made no allowances for multiple spouses, other members of the household who smoke, or passive exposures which occur outside of the home. Quantity smoked, too, is an approximate measure. The reported number of cigarettes smoked per day by the spouse is simply the average daily amount smoked during that time period. No allowance was made for changes in smoking habits of the spouse over time or for time since last exposure if the spouse did not smoke during the entire married interval.

Nonetheless, we found smoking by spouse to be significantly associated with overall cancer risk. The odds ratio of 1.6 was not substantially altered by adjustment for age, race, sex, smoking status, education, or occupation. Risk was limited to individuals younger than age 50 years, who were at approximately twofold risk. Risk was also greatest for females and nonsmokers, although not entirely limited to these groups.

When smokers and nonsmokers are considered separately, the twofold risk among nonsmokers is highly significant and is not altered by adjustment for potential confounding factors. The 30 percent increase in risk among smokers whose spouses also smoke is only of borderline statistical significance, but is also unchanged by adjustment for other factors. The groups for whom risk from passive smoking appeared greatest are those groups generally at lower cancer risk overall. It may be that the small risk imposed by passive exposure during adult life is difficult to detect statistically in individuals at risk from other causes. Also, women who smoke may tend to smoke less, start later, and inhale differently than men. This would allow for a greater impact of passive exposure among women, regardless of their own smoking status. In addition, very few nonsmoking men are married to smokers, making it more difficult to detect a risk among males. In our data, only 10 percent (10/96) of nonsmoking males were married to smokers, whereas 51 per cent (189/370) of nonsmoking females were married to smokers.

The increased cancer risk from passive exposure was not limited to sites generally thought to be smoking-related (12, 13). In fact, because of our case selection procedures and delays in interviewing cancer cases, individuals with cancers of smoking-related sites were only a small proportion of total cases. If cancers of the esophagus, respiratory tract, oral cavity and pharynx, urinary tract, and pancreas are designated smoking-related, the odds ratio for smoking-related tumors is 1.3, whereas the odds ratio for other sites is 1.7 ($p < 0.01$). Evidence is accumulating that cancer of the cervix should also be included among those sites that are smoking-related (19-21). When the cervix is included, the odds ratio for smoking-related sites is 2.0 and for other sites is 1.5, both of which are statistically significant.

Only 22 lung cancer cases are included in this report, with an odds ratio of 1.9 among passive smokers. Although not statistically significant, it is consistent with the level of risk reported in other studies. For women and for nonsmokers, the risk of lung cancer among those passively exposed was significantly increased despite very small numbers. The odds ratio for individuals under age 50 years was of borderline significance. Hirayama (9) reported a two-fold risk for women married to smokers and found that risks were also greatest among younger women (as measured by husband's age). While Garfinkel (11) didn't find an overall relationship of passive exposure to lung cancer risk, the relative risk among women married to smokers was in the same direction. Relatively few women in Garfinkel's cohort were under age 50 years, which might explain these inconsistent results.

In a study reported by Correa et al. (10), a twofold relative risk was seen among nonsmokers married to smokers. The risks were similar for males and females, although the number of nonsmoking males with lung cancer was very small. Among smokers, males who were light smokers with wives who were heavy smokers had a relative risk of 1.5. Trichopoulos et al. (7, 8) also reported an overall twofold lung cancer risk which was statistically significant among nonsmoking women married to smokers.

The studies reported by Trichopoulos et al. (7, 8), Correa et al. (10), and Hirayama (9) all suggest a dose-response relationship, although different measures of dose were employed in the three studies. In our study, there was no apparent dose-reponse using either years married to a smoker or average amount smoked by spouse as the measure of dose, but the number of lung cancer cases may be too small to expect a consistent trend. Evaluation of dose is not straightforward and depends on factors which we did not measure, such as room ventilation and smoking "style" of the spouse.

We found a twofold cervical cancer risk, which persisted after adjustment for level of education, among women whose husbands smoked. We did not collect data on sexual activity of cases or spouses. We also see an increased risk of breast cancer. Since the sociodemographic risk factors for these two sites are not the same, this supports the conclusion that the apparent excess cervical cancer risk is not entirely due to confounding by social class. Buckley et al. (22) reported a fourfold risk of cervical cancer among women whose husbands smoked, but after adjustment for number of sexual partners of the husband, the resulting two fold relative risk was not significant. Similar results were reported by Brown et al. (23). Hirayama (9) did not find elevated cervical cancer risk among women whose husbands smoked. This may relate to differences in the ages of the women studied or to differences in risk from other factors.

No previous study has reported a positive association between breast cancer and either passive or direct exposure to cigarette smoke (24-26). In a recently reported study by Rosenberg et al. (27), the relative risk for breast cancer was approximately 1.0 for ex-smokers, current smokers, and heavy smokers as compared with non-smokers. The crude odds ratio of 2.2 that we report is not reduced by adjustment for a number of potential confounding variables. Risk is not seen among women older than age 50 years

or among women with less than a high school education, but is fairly constant across all other groups. Petrakis (28) has detected nicotine in breast fluid of nonlactating women who smoked, which may lead to alterations in breast tissue. This would support a possible role for passive smoking if passive exposure also caused such an effect.

One other site for which we find an association with passive exposure, endocrine glands, is not generally thought to be smoking-related. The number of tumors here is small, of which 11 are thyroid tumors.

In summary, passive exposure to smoking by spouse is related to an overall risk of cancer in our data. This association persists after adjusting for possible confounding factors. Associations with several specific tumor sites are also statistically significant, including some which are not ordinarily regarded as smoking-related. Further studies are required to confirm this broad spectrum of carcinogenicity by passive smoking and to explore the unexpected site-specific findings.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER [Mr. DENTON]. Morning business is closed.

S. 1487—EQUAL ACCESS TO JUSTICE

Mr. GRASSLEY. Mr. President, I ask unanimous consent that it be in order to send the enclosed bill to the desk and ask for its immediate consideration.

Mr. BYRD. Mr. President, reserving the right to object, What is the request?

Mr. GRASSLEY. I ask unanimous consent that it be in order to send the enclosed bill, which is the language of the equal access to justice bill that has been worked out, to the desk and ask for its immediate consideration.

Mr. BYRD. Mr. President, reserving the right to object.

Mr. President, I understand that the matter has been cleared on this side. I remove my reservation and have no objection.

Mr. GRASSLEY. Mr. President, I also say to the Senator from West Virginia that I have another unanimous-consent request that deals with the order for the bill.

Mr. President, has the bill been reported yet?

The PRESIDING OFFICER. The bill has not been reported.

The clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 1487) to amend section 504 of title 5, United States Code, and section 2412 of title 28, United States Code, with respect to awards of expenses of certain agency and court proceedings, and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Iowa?

There being no objection, the Senate proceeded to consider the bill.

Mr. GRASSLEY. Mr. President, I further ask unanimous consent that the bill be limited to the following time agreement, to be equally divided: 30 minutes on the bill, to be equally divided between the Senator from Iowa [Mr. GRASSLEY], and the Senator from Delaware [Mr. BIDEN] or their designees; that no amendments be in order; that no motions to commit the bill be in order; and that the agreement be in the usual form.

I further ask unanimous consent that, following the conclusion or yielding back of time on the bill, the Senate proceed to a vote on final passage of the bill, without any intevening action.

Finally, I ask unanimous consent that, following the vote on the final passage of the Grassley bill, the Senate proceed to Calendar Order No. 218, H.R. 2378, the House companion bill to the Equal Access to Justice Act, and the Senate proceed to pass that bill without debate or amendment.

Mr. BYRD. Mr. President, reserving the right to object, would the Senator be willing to leave off the final paragraph of the request just now and we can deal with that when we come to it?

Mr. GRASSLEY. Yes.

The PRESIDING OFFICER. Without objection, the remainder of the request of the Senator from Iowa is agreed to.

Mr. GRASSLEY. Mr. President, I yield myself 7 minutes.

Mr. President, today we finally finish up some unfinished business from the closing days of the 98th Congress. By our action today, we will send to the President for signature, a bill to reauthorize and make permanent the Equal Access to Justice Act [EAJA]. As you know, the purpose of the Equal Access to Justice Act is to allow prevailing private parties the chance to recover litigation expenses in actions against the Federal Government, where the Government cannot prove that its conduct is substantially justified.

Before this landmark legislation was first passed in 1980, small businesses and individuals of limited means who were confronted by arbitrary Government actions faced a "Hobson's choice" they could capitulate in the face of meritless action or they could fight the Government in court with the knowledge that even if they won, the cost of the legal victory would be high. With the enactment of the Equal Access to Justice Act, the legal playing field has been leveled. Now those with modest means have an equal access to the judicial process.

The bill we pass today is a revised version of H.R. 5479 from the 98th Congress. You will recall, that bill passed both houses unanimously last October. Much to our dismay and surprise, the President vetoed it on November 9, 1984. In his veto message, the President objected to a provision that he believed would lead to extensive discovery on how the Government's action under challenge was formulated. He also expressed concern about a provision allowing interest on a fee award.

This bill that we pass here today addresses the President's concerns. The Department of Justice and the Office of Management and Budget support the bill's passage. Thus we are assured the President will sign it. At the same time, this bill remains faithful to its underlying purpose of providing a means of redress for small businesses and individuals against unjustified Government agency actions. The clarifications and revisions we pass today are needed to fill in gaps in the law's coverage. Moreover, we also make this law a permanent regulatory reform.

The bill that we pass today is identical to H.R. 2378, a measure that passed the other body on June 24. It is a bipartisan product of much thoughtful negotiation between Members of Congress, the administration, and interested parties.

This bill makes a most important clarification from prior Equal Access to Justice Act. It states clearly that when deciding whether a prevailing party shall be awarded fees, a court or adjudicative officer shall evaluate both the Government's arguments made in the litigation and the agency action that made it necessary for the private party to seek relief. Thus, if the agency action that led to the litigation is not substantially justified, a prevailing party could be eligible for an Equal Access to Justice Act award, irrespective of the merits of the Government's arguments once they get to court. That is because the purpose of the Equal Access to Justice Act is to make Government bureaucrats think long and hard before they start an enforcement action. The focus of the Equal Access to Justice Act is not on making Government litigators behave once in court.

Consistent with the general rule that successful litigants are ordinarily entitled to fees for their litigation of a fee application, a prevailing Equal Access to Justice Act party is eligible to recover attorney's fees for the fee litigation itself, subject to the Equal Access to Justice Act's terms, in any case in which the Government's position in the case, as defined in the bill, was not substantially justified.

These clarifications are necessary because of a few court opinions that failed to focus on the incentive for careful agency action that we created in 1980. At the same time, this bill responds to the President's stated objections about unbridled discovery of the agency deliberative process. As a safeguard, this bill directs courts considering fee applications to look only to the record developed on the merits of the case. No "fishing expeditions" will be allowed, so as to turn the fees case into a second major litigation.

Among its other provisions, the bill makes the Equal Access to Justice Act applicable to cases litigated before agency boards of contract appeals. The bill also makes the Equal Access to Justice Act's coverage retroactive to October 1, 1984, thus ensuring that no meritorious claimant is left without redress, simply due to last year's failure at Equal Access to Justice Act reauthorization.

Mr. President, with regard to H.R. 2378, to amend section 504 of title 5, United States Code, and section 2412 of title 28, United States Code, with respect to awards of expenses of certain agency and court proceedings, and other purposes, the Committee on the Judiciary does not intend that this measure authorize any additional budget authority for fiscal year 1985 than that already available to the Federal agencies affected by this legislation. The committee intends that any fiscal year 1985 costs incurred from the bill will be absorbed from existing funds.

Mr. President, this bill enjoys the widest possible support. In addition to support from the administration that I already mentioned, and the cosponsorship mentioned, this bill is supported by the Office of Advocacy of the U.S. Small Business Administration, the Administrative Conference of the United States, the American Bar Association, Small Business United, the U.S. Chamber of Commerce, the Small Business Legislative Council, the American Civil Liberties Union, the National Senior Citizens Law Center, and the Alliance for Justice, among others. Special thanks go to the National Federation of Independent Business for their tireless efforts to reenact the Equal Access to Justice Act.

Mr. President, this law has worked well during its 3-year test period and has done so at a minimal cost to the Government. For example, the original act has cost less than $4 million in fees and expenses so far. This amount is dramatically less than the $100 million annual cost estimate of the Congressional Budget Office in 1981 and the even higher original estimate by the Justice Department.

At the same time, there is ample evidence that the Equal Access to Justice Act has had a positive effect on the regulatory and enforcement actions of Federal bureaucrats. When agencies think about this law, as I know they do, they are sure to think twice before acting contrary to a small business person's or an individual's rights. This is even more true with the passage of this bill, which provides for the fees payment out of the offending agency's budget.

Mr. President, I mentioned that the old Equal Access to Justice Act expired on October 1, 1984. Thus parties harmed by arbitrary Government agency actions since that time have not had the benefit of this law's protection. Therefore, time is of the essence. I urge the bill's passage here today.

Mr. President, I retain control of my time, and yield the floor.

Mr. DOMENICI. Mr. President, would the chairman of the subcommittee yield for a question? The House report on H.R. 2378 states that "Agency action found to be arbitrary and capricious or unsupported by substantial evidence is virtually certain

not to have been substantially justified under the act." Does this statement in the House report accord with the subcommittee chairman's understanding of the meaning of the substantial justification standard under the Equal Access to Justice Act?

Mr. GRASSLEY. I would not say it the same way, because I want to make it clear that the EAJA case over the fees issue is a separate and distinct inquiry. Just because an agency loses on the merits of the case doesn't mean that it is automatically going to be liable for a fee award. The EAJA does not provide for automatic fee shifting. However, I would say that where the agency action is found by a court to be arbitrary and capricious or where there is little or no factual support for the agency action, the Government—as a practical matter—has its work cut out for it to prove substantial justification. Indeed, in the case of an arbitrary and capricious finding, I believe the plain meaning of the words strongly suggest that the Government was not substantially justified. I believe that this view is consistent with the committee report on S. 919, a bill we passed unanimously in the closing days of the 98th Congress.

Mr. DECONCINI addressed the Chair.

The PRESIDING OFFICER. The Senator from Arizona is recognized.

Mr. DECONCINI. Mr. President, on behalf of Senator HEFLIN, who is, I believe, in markup today in a very important committee, I will control the time on the minority side.

Mr. President, I take this opportunity to state my strong support for the Equal Access to Justice bill before us. It is the product of 3 years of experience under the original version of the bill drafted by Senator DOMENICI and myself. In addition, numerous hearings have been held during this and the previous Congress on how to continue to perfect its provisions to insure equal access to our system of justice by all parties aggrieved by actions of the Government. The principles of the equal access law have been successful and the modifications offered by H.R. 2378 extend and clarify the original law which expands the liability of the United States in certain administrative and court proceedings. I want to especially thank Senator DOMENICI, for working so closely on this some years ago when we first started. Of course, I want to thank Senator Grassley of Iowa, who has led a charge here second to none in trying to get this passed. I know his early attempts had even far more far-reaching jurisdiction of this bill which I supported, and I know we both share the belief that the Internal Revenue ought to be included in this. But be that as it may, the best that can be done is the bill we have before us, and without the Senator from Iowa, we would not be here today.

Also, I want to especially thank the Senator from Alabama, the ranking member of the subcommittee, Mr. HEFLIN, who has labored long and hard in the negotiations. Between these two leaders we are presented with a satisfactory bill, one that is important and one that I am very pleaded to see become permanent law. GRASSLEY, and HEFLIN for their sustained efforts to make the original 3-year experiment a part of our permanent law.

Before the Equal Access to Justice Act [EAJA], small businesses, faced with unjustified Federal agency actions, were confronted with a difficult choice—to comply without question to Government regulatory enforcement which they believed improper, or challenge the Government, often at a cost exceeding the fine or penalty imposed. The record under EAJA has proven it to be an important incentive to small businesses facing unjustified Federal agency actions.

Perhaps of greater importance, it has been an incentive to Federal agencies to more carefully select their cases and not pick on small firms because they are easy targets unlikely to defend themselves. During the 3 years that the EAJA was in effect, legitimate agency enforcement policies were not hampered nor were courts and agencies clogged with frivolous claims for relief.

The EAJA as first enacted in 1980 with a sunset of October 1, 1984. H.R. 2378 would permanently reauthorize the statute and was passed by the House on June 24, 1985. The bill now pending before the Senate is widely supported by the small business community and the administration. I urge the swift passage of the bill.

Mr. President, I also would like to thank members of the staff of the various committees: Alice Milder of Senator GRASSLEY's staff; Art Briskman of Senator HEFLIN's staff; Bob Fiedler of my staff, and the very able law assistant that we have with us this summer, Melinda Kelley, who has done a magnificant job in putting this together.

Mr. GRASSLEY. First of all, I want to associate myself with the remarks of the Senator from Arizona, and to the extent to which he complimented many Senators who worked on this. I only add the name of Senator THURMOND because I particularly thank him for waiving the referral of the bill, we are now on, to committee so it could be held at the desk. But Senator DECONCINI and Senator DOMENICI pioneered in this area and they deserve the credit for the origination of the legislation that now brings us to reauthorization. I think the fact that we are reauthorizing a bill that has been tried for 4 years and has not been costly to the taxpayers has brought much discipline to the way the bureaucracy operates against individuals and small businesses in this country speaks for itself. They deserve praise for their pioneering, and in particular, my good friend, Senator HEFLIN from Alabama, who worked very closely with me on this legislation. I want to acknowledge all.

Mr. President, I thank the Senator from Arizona for what he has already said.

Mr. THURMOND. Mr. President, I rise in support of the Equal Access to Justice Act.

In this age of burgeoning government regulation and increasing bureaucratic intrusions into our daily lives, there is a heightened need to provide our citizens a fair chance to challenge unreasonable government actions. This reauthorization of the Equal Access to Justice Act will ensure that individuals will not be deterred from challenging unjustified governmental actions because of the expense involved.

Because of the need to preserve this right, I worked closely with Senator GRASSLEY, other members of the Senate Judiciary Committee, and the administration in the last Congress to obtain passage of a reauthorization bill. Unfortunately because of certain unacceptable provisions in that bill, it was vetoed by President Reagan.

In response to concerns that were raised by the President, I urged the Department of Justice to work diligently with members of the House and the Senate Judiciary Committees to develop acceptable language. Senator GRASSLEY should be commended for his leadership in this body on this matter.

Because of the successful effort to reach a consensus measure, I have agreed to waive the referral of this bill to the Judiciary Committee in order to expedite Senate consideration of this important legislation.

Mr. President, since this is a consensus package, the bill does contain new language on several points. One critical point, which was emphasized by Senator GRASSLEY, is that the award of attorney fees requires an inquiry separate and distinct from the final disposition of the merits in any case. Accordingly, the issues of "substantial justification" relative to the fee award is a separate and distinct inquiry from whatever standard of review has been applied to the merits of the case. Therefore, there could be cases where an agency loses on the merits because a court has found its action to be arbitrary and capricious, but where no attorney fees would be awarded because the Government was substantially justified in the position it had taken.

The application of the provisions of the bill to an administrative agency determination of a fee award occurs as follows: The issue of awarding attor-

ney fees will come after the disposition on the merits. When the awarding of attorney fees is at issue, the burden of proof to be met by the Government is that the Government was "substantially justified" in its position. In a subsequent appeal of the administrative determination of the fee issue, a district court would decide if there was "substantial evidence on the record taken as a whole" that the Government had met this burden.

Mr. HEFLIN. Mr. President, I rise today in strong support of the Equal Access to Justice Act. This act provides that when an individual or small business is involved in litigation against the Federal Government on either the administrative or judicial level and prevails, that individual is entitled to recoup legal expenses and costs, if the Government cannot show that its conduct was substantially justified.

This law provides the average citizen with the resources to fight Government overregulation. It further serves as a strong deterrent to arbitrary Government action.

I have supported the Equal Access to Justice Act since it was first enacted in the 96th Congress and it is my belief that it is now time to make this legislation permanent.

As a former Chief Justice of the Supreme Court of Alabama, I fervently believe that everyone is entitled to his or her day in court. We cannot continuously subject the citizens of this great country to the demands of Government regulations and massive resources of regulators without providing them with the resources to fight regulations which may be unjust. This legislation provides more than a forum—it makes justice more accessible.

It expands the eligibility limitation to include: First, individuals with a net worth of $2 million or less; second, businesses and units of local government with a net worth of $7 million or less; third, certain nonprofit organizations; and fourth, agricultural cooperative associations.

It clarifies confusion caused by the earlier act concerning the meaning of the phrase "position of the United States," this legislation defines "position of the United States" to include the action or failure to act by the Government upon which the administrative proceedings or civil action is based, as well as the litigation position. However, the bill would limit the determination of whether the Government's position was "substantially justified," to the record developed during the administrative hearing or civil action. In effect, the bill limits discovery in E.A.J.A. fee proceedings to respond to earlier concerns raised by the administration. The legislation also allows the agency, rather than the adjudicative officer, to make the final decision on fee awards at the agency level.

Further, this bill will extend coverage of the equal access to justice act to proceedings before an agency board of contract appeals.

This bill makes changes in the original equal access to justice act in the names of fairness. I believe in its purpose and its possibilities. But I am profoundly disappointed that in our attempt to enact this meaningful legislation, the provisions covering proceedings under the Social Security Act, at the administrative hearing level are unable to be incorporated because of institutional opposition.

I realize these provisions raise concerns about the cost to the Government, but these same "fears" were raised before the Equal Access to Justice Act was initially adopted in 1981. The Congressional Budget Office in 1981 estimated that the cost of the legislation would be approximately $150 million annually. The fact is that between the effective date of the act (October 1, 1981) and October 1, 1984, approximately $3.9 million had been awarded under the act.

Under the current provisions of the Equal Access to Justice Act, administrative proceedings where the Government is represented by counsel are covered. However, this provides limited coverage, such as the five pilot adversarial projects relating to social security claims implemented by the Secretary of Health and Human Services. In addition, the Equal Access to Justice Act now covers court proceedings, including appeals from social security cases.

My concern is that the process discourages those who desperately depend on disability payments from protecting that income. Unquestionably, there is abuse in the system but to punish the whole because some take advantage, distorts our concept of justice.

Oftentimes individuals dismissed from disability rolls cannot afford an attorney and they are forced to face a contorted process alone. The initial decision to continue or remove individuals from disability rolls is made at the State level and appeals are made to Administrative Law Judges of the Social Security Administration. In 1980, State agencies were denying 70 percent of the initial claims of which nearly 60 percent were allowed in appeal. In 1982, 67 percent of these cases were allowed on appeal.

In fiscal year 1984, Administrative Law Judges in the Social Security Administration rendered about 337,000 decisions, and of these about 65 percent resulted in an effective reversal of the denial of the claim made at the State level.

In an attempt to ease the burden placed upon these individuals, Congress passed the Social Security Disability Reform Amendments of 1984, providing for payment of benefits to claimants appealing the termination of their eligibility through the Administrative Law Judge appeals level.

I would like to see the proceedings before administrative law judges covered by the Equal Access to Justice Act, because of the importance of the outcome to these individuals.

I can think of no group more worthy of protection than those individuals who depend upon their disability payments on a month-to-month basis.

While I believe this is an area ripe for protection, political realities dictate otherwise. And this seems to be a fight which will have to be fought another day.

I have worked with my colleagues in the Senate and in the House of Representatives to formulate legislation which will be acceptable to all parties. In the spirit of compromise, this legislation is before the Senate today.

I believe very strongly in the overall purpose of the Equal Access to Justice Act—to enable people without the means a chance to fight arbitrary Government action. I lend my support and ask my colleagues to do likewise, because justice without equality is not justice—just a hollow promise.

This is legislation with a history of proven success and it will ensure an even more successful future, with our support.

Thank you, Mr. President.

Mr. DOLE. Mr. President, I am pleased to join Senator GRASSLEY and others in cosponsoring this permanent authorization of the Equal Access to Justice Act. As chairman of the Subcommittee on Courts of the Senate Judiciary Committee in 1980 when the EAJA was first enacted into law, I have a particular interest in seeing this much-needed legislation pass the Senate. Our 4 years of experience under the EAJA have demonstrated that the fears of those who opposed the bill in 1980 have not come to fruition. There has not been a large increase in litigation as a result of the law, nor has there been a heavy financial burden imposed on the Federal Government as a result of attorneys fees awards. What the EAJA has accomplished is what it was intended to accomplish—it has provided the means for small business and individuals to successfully defend themselves against unwarranted and unjustified bureaucratic intrusion by the Federal Government.

I regret that we were unable to enact a permanent reauthorization by last year's October 1 deadline. Nonetheless, there probably were legitimate issues which still needed to be resolved in the bill we passed last year. The prompt negotiations which began at the beginning of this Congress have resulted in a truly consensus authori-

zation which should be supported by all. By allowing attorneys fees for administrative hearings which are adversarial in nature, the bill offers a commonsense solution for an issue which seemed irreconcilable in the last Congress. Moreover, by having the Government's position determined under the EAJA by viewing the record as whole, the parties involved have come up with a sound solution which effectively balances the interests of all.

Mr. President, I would like to commend Senators GRASSLEY, THURMOND, DOMENICI, DECONCINI, HEFLIN, and BIDEN for all the work they put into developing the bill we are passing today. Small businesses and individuals throughout the country who have been, or may become, a victim of unwarranted and unjustified Government actions owe these Senators a special debt of gratitude.

Mr. WEICKER. Mr. President, today is a great day for small business as the Senate proceeds to extend the Equal Access to Justice Act. I rise in support of the bill before us and am confident that all of my colleagues in the Senate will join me in doing so.

The Equal Access to Justice Act [EAJA], first enacted in 1980, represented a major step and accomplishment for the small business community. It provided for the first time that small businesses and individuals could collect attorneys' fees in cases where the Government could not demonstrate that it was substantially justified in the actions it brought against them. Before that, small business had no effective means to fight against abusive and unwarranted intrusions by Federal agencies. Often small businesses were forced to accept, without adequate recourse, objectionable Government actions because the legal costs in fighting back were simply too high. Since the private party in actions against the Government must meet certain financial eligibility requirements, the law is available only to small businesses and individuals for whom financial constraints would otherwise chill their efforts to challenge the Government.

Mr. President, at the time EAJA was enacted, critics expressed doubts about both its merits and costs, and conjectured that it might ultimately cost the Government hundreds of millions of dollars in attorneys' fees awards. No one who supports fair dealing by the Government could legitimately argue then or now with the merits of EAJA. Those who opposed EAJA, citing fear of frivolous claims and projected huge costs to the Government in the award of fees, have clearly been wrong. As Frank Swain, the chief counsel for advocacy at the SBA, has noted, EAJA has proven to be "an important incentive to small businesses facing unjustified Federal agency actions . . . it has been an incentive to Federal agencies to more carefully select their cases and not pick on small firms because they are easy targets unlikely to defend themselves. During the 3 years that the EAJA was in effect, legitimate agency enforcement policies were not hampered nor were courts and agencies clogged with frivolous claims for relief."

Mr. President, virtually every small business person, every small business association and every supporter of small business supports the extension of EAJA. The enactment of EAJA in 1980 represented an historic moment in recognizing the legitimate rights and needs of small business; extension of the act in the bill before us today is a signal to all that those rights and needs are as strong today—if not stronger—as they were in 1980.

Indeed, Mr. President, the bill now before the Senate not only extends EAJA but recognizes that certain adjustments had to be made in the act to ensure that its provisions applied to a greater number of small businesses and extended as well to cases that heretofore had not been subject to compliance. Under the bill before us, parties eligible for reimbursement for individuals is increased from a net worth of $1 million to a net worth of $2 million, and for sole owners of unincorporated businesses, partnerships, and corporations, is increased from a net worth of no more than $5 million to a net worth of $7 million. Perhaps most significant is that the bill extends the coverage of the act to boards of contract appeals cases where abuses against small business are frequently most onerous and costly.

The extension of EAJA to these cases is a major step in permitting small businesses to deter unreasonable government actions in areas most critical to their survival. The bill also clarifies that awards may result when the original agency mistake costs a small business or citizen money to litigate, even when the Government surrenders at the outset of the case. This corrects previous ambiguous language that permitted some courts to rule that fees were not warranted if the Government's conduct in the case were reasonable and it reached the courtroom stage. In addition, all claims paid by the agency will be paid out of agency's annual budget and not from agency requests for additional funds.

Mr. President, I applaud all who worked so diligently to craft this bill which not only makes essential clarifications of EAJA, but most important, reauthorizes and extends its provisions. This bill is vital to small business and I urge my colleagues to support it.

Mr. SASSER. Mr. President, this legislation reauthorizing the Equal Access to justice Act [EAJA] is of critical importance to our small business community. As one who has been actively involved in modifying the EAJA to better serve small business, I am pleased that this matter is once more before the Senate.

As has been noted, the EAJA helps insure that small businesses, in the face of improper government regulatory enforcement, can have their day in court. All to often small business owners who find themselves in such a situation would accept an inequitable out-of-court settlement, solely because they could not afford attorney expenses.

The EAJA has helped turn this situation around. In the words of Frank Swain, chief counsel for advocacy with the Small Business Administration, "The record under EAJA has proven it to be an important incentive to small businesses facing unjustified federal agency actions."

I am particularly pleased that this legislation contains language extending coverage under the EAJA to appearances before agency boards of contract appeal. This section of S. 1487 incorporates legislation I introduced in the 98th Congress to rectify this area of uncertainty in the application of the EAJA.

This issue first came to my attention, Mr. President, when I learned that coverage under the EAJA had been limited through a series of court cases. The upshot of these court rulings was that the EAJA did not apply to appearances before agency boards of contract appeal. Testimony before the Judiciary Committee during the 98th Congress pointed out that this was a "serious misconstruction of the act."

Whether or not this is the case, it is clear that extending coverage of the EAJA to agency boards of contract appeals would make this act a much more valuable tool for small business owners. Indeed, this theme was sounded repeatedly during the Judiciary Committee hearings. The hearing record contains several calls for extending the EAJA along the lines of my legislation.

This change was a part of the EAJA reauthorization bill passed last year which was vetoed by the President. I am pleased that language extending coverage under the EAJA to agency boards of contract appeals has been retained in S. 1487. I urge my colleagues to join in supporting this measure and I express my sincere hope that the President will not veto this measure when it is sent to his desk this year.

Mr. DECONCINI. Mr. President, the Senator from Iowa is generous in his kind remarks in relation to my involvement in this bill. I appreciate it very much.

I want the record to clearly indicate that if it was not for the leadership of

the Senator from Iowa over the past several years—I know it has not been easy for him, and I have seen him struggle—we would not, flatly, be here today passing this bill.

Mr. President, I am prepared to yield back the balance of my time on this side.

The PRESIDING OFFICER. Does the Senator from Iowa yield back his time?

Mr. GRASSLEY. Mr. President, I yield back the balance of my time.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There appears to be a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The bill is before the Senate, and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill was ordered to a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Arizona [Mr. GOLDWATER] is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Mississippi [Mr. STENNIS] and the Senator from Louisiana [Mr. LONG] are necessarily absent.

The PRESIDING OFFICER (Mr. PRESSLER). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 95, nays 2, as follows:

[Rollcall Vote No. 159 Leg.]

So the bill (S. 1487) was passed, as follows:

S. 1487

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. AMENDMENTS TO SECTION 504 OF TITLE 5.

(a) AWARDING OF FEES IN ADVERSARY ADJUDICATIONS.—

(1) DETERMINATION OF "SUBSTANTIALLY JUSTIFIED".—Subsection (a)(1) of section 504 of title 5, United States Code, is amended by adding at the end thereof the following: "Whether or not the position of the agency was substantially justified shall be determined on the basis of the administrative record, as a whole, which is made in the adversary adjudication for which fees and other expenses are sought.".

(2) CLARIFYING AMENDMENT.—Subsection (a)(1) of such section is amended by striking out "as a party to the proceeding".

(3) DECISION OF AGENCY TO BE FINAL ADMINISTRATIVE DECISION.—Subsection (a)(3) of such section is amended by adding at the end thereof the following: "The decision of the agency on the application for fees and other expenses shall be the final administrative decision under this section.".

(b) DETERMINATION OF FEES DELAYED IN CASE OF APPEAL.—Subsection (a)(2) of section 504 of title 5, United States Code, is amended by adding at the end thereof the following: "When the United States appeals the underlying merits of an adversary adjudication, no decision on an application for fees and other expenses in connection with that adversary adjudication shall be made under this section until a final and unreviewable decision is rendered by the court on the appeal or until the underlying merits of the case have been finally determined pursuant to the appeal."

(c) DEFINITIONS.—

(1) PARTY.—Paragraph (1)(B) of section 504(b) of title 5, United States Code, is amended to read as follows:

"(B) 'party' means a party, as defined in section 551(3) of this title, who is (i) an individual whose net worth did not exceed $2,000,000 at the time the adversary adjudication was initiated, or (ii) any owner of an unincorporated business, or any partnership, corporation, association, unit of local government, or organization, the net worth of which did not exceed $7,000,000 at the time the adversary adjudication was initiated, and which had not more than 500 employees at the time the adversary adjudication was initiated; except that an organization described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)(3) exempt from taxation under section 501(a) of such Code, or a cooperative association as defined in section 15(a) of the Agricultural Marketing Act (12 U.S.C. 1141j(a)), may be a party regardless of the net worth of such organization or cooperative association;".

(2) ADVERSARY ADJUDICATION.—Paragraph (1)(C) of such section is amended—

(A) by inserting "(i)" before "an adjudication under";

(B) by inserting before the semicolon at the end thereof the following: ", and (ii) any appeal of a decision made pursuant to section 6 of the Contract Disputes Act of 1978 (41 U.S.C. 605) before an agency board of contract appeals as provided in section 8 of that Act (41 U.S.C. 607)"; and

(C) by striking out "and" at the end thereof.

(3) POSITION OF THE AGENCY.—Paragraph (1) of such section is amended—

(A) by striking out the period at the end of subparagraph (D) and inserting in lieu thereof "; and"; and

(B) by adding at the end thereof the following:

"(E) 'position of the agency' means, in addition to the position taken by the agency in the adversary adjudication, the action or failure to act by the agency upon which the adversary adjudication is based; except that fees and other expenses may not be awarded to a party for any portion of the adversary adjudication in which the party has unreasonably protracted the proceedings.".

(d) APPEALS OF FEE DETERMINATIONS.—Subsection (c)(2) of section 504 of title 5, United States Code, is amended to read as follows:

"(2) If a party other than the United States is dissatisfied with a determination of fees and other expenses made under subsection (a), that party may, within 30 days after the determination is made, appeal the determination to the court of the United States having jurisdiction to review the merits of the underlying decision of the agency adversary adjudication. The court's determination on any appeal heard under this paragraph shall be based solely on the factual record made before the agency. The court may modify the determination of fees and other expenses only if the court finds that the failure to make an award of fees and other expenses, or the calculation of the amount of the award, was unsupported by substantial evidence.".

(e) AWARDS PAID FROM AGENCY FUNDS.—Subsection (d) of section 504 of title 5, United States Code, is amended to read as follows:

"(d) Fees and other expenses awarded under this subsection shall be paid by any agency over which the party prevails from any funds made available to the agency by appropriation or otherwise.".

SEC. 2. AMENDMENTS TO SECTION 2412 OF TITLE 28.

(a) CLARIFYING AMENDMENTS.—Section 2412 of title 28, United States Code, (relating to costs and fees) is amended—

(1) in subsections (a) and (b) by striking out "or any agency and any official of the United States" each place it appears and inserting in lieu thereof "or any agency or any official of the United States"; and

(2) in subsection (d)(1)(A) by inserting ", including proceedings for judicial review of agency action," after "in tort)".

(b) DETERMINATION OF "SUBSTANTIALLY JUSTIFIED".—Section 2412(d)(1)(B) of title 28, United States Code, is amended by adding at the end thereof the following: "Whether or not the position of the United States was substantially justified shall be determined on the basis of the record (including the record with respect to the action or failure to act by the agency upon which the civil action is based) which is made in the civil action for which fees and other expenses are sought.".

(c) DEFINITIONS.—

(1) Subparagraph (B) of section 2412(d)(2) of title 28, United States Code, is amended—

(A) in clause (i) by striking out "$1,000,000" and inserting in lieu thereof "$2,000,000"; and

(B) by striking out "(ii)" and all that follows through the end of the subparagraph

and inserting in lieu thereof the following: "or (ii) any owner of an unincorporated business, or any partnership, corporation, association, unit of local government, or organization, the net worth of which did not exceed $7,000,000 at the time the civil action was filed, and which had not more than 500 employees at the time the civil action was filed; except that an organization described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)(3) exempt from taxation under section 501(a) of such Code, or a cooperative association as defined in section 15(a) of the Agricultural Marketing Act (12 U.S.C. 1141j(a)), may be a party regardless of the net worth of such organization or cooperative association;".

(2) ADDITIONAL DEFINITIONS.—Subsection (d)(2) of such section is amended—

(A) by striking out the period at the end of subparagraph (C) and inserting in lieu thereof a semicolon; and

(B) by adding at the end thereof the following:

"(D) 'position of the United States' means, in addition to the position taken by the United States in the civil action, the action or failure to act by the agency upon which the civil action is based; except that fees and expenses may not be awarded to a party for any portion of the litigation in which the party has unreasonably protracted the proceedings;

"(E) 'civil action brought by or against the United States' includes an appeal by a party, other than the United States, from a decision of a contracting officer rendered pursuant to a disputes clause in a contract with the Government or pursuant to the Contract Disputes Act of 1978;

"(F) 'court' includes the United States Claims Court;

"(G) 'final judgment' means a judgment that is final and not appealable, and includes an order of settlement; and

"(H) 'prevailing party', in the case of eminent domain proceedings, means a party who obtains a final judgment (other than by settlement), exclusive of interest, the amount of which is at least as close to the highest valuation of the property involved that is attested to at trial on behalf of the property owner as it is to the highest valuation of the property involved that is attested to at trial on behalf of the Government.

(d) PAYMENT OF AWARDS.—Paragraph (4) of section 2412(d) of title 28, United States Code, is amended to read as follows:

"(4) Fees and other expenses awarded under this subsection to a party shall be paid by any agency over which the party prevails from any funds made available to the agency by appropriation or otherwise.".

(e) INTEREST.—Section 2412 of title 28, United States Code, is amended by adding at the end thereof the following:

"(f) If the United States appeals an award of costs or fees and other expenses made against the United States under this section and the award is affirmed in whole or in part, interest shall be paid on the amount of the award as affirmed. Such interest shall be computed at the rate determined under section 1961(a) of this title, and shall run from the date of the award through the day before the date of the mandate of affirmance.".

SEC. 3. AWARDS IN CERTAIN SOCIAL SECURITY PROCEEDINGS.

Section 206 of the Equal Access to Justice Act is amended—

(1) by striking out "Nothing" and inserting in lieu thereof "(a) Except as provided in subsection (b), nothing"; and

(2) by adding at the end thereof the following:

"(b) Section 206(b) of the Social Security Act (42 U.S.C. 406(b)(1)) shall not prevent an award of fees and other expenses under section 2412(d) of title 28, United States Code. Section 206(b)(2) of the Social Security Act shall not apply with respect to any such award but only if, where the claimant's attorney receives fees for the same work under both section 206(b) of that Act and section 2412(d) of title 28, United States Code, the claimant's attorney refunds to the claimant the amount of the smaller fee.".

SEC. 4. REPEAL OF LIMITATION ON PAYMENT OF AWARDS.

Section 207 of the Equal Access to Justice Act (P.L. 96-481) is hereby repealed.

SEC. 5. AWARDS FOR CERTAIN FEES AND OTHER EXPENSES.

Section 208 of the Equal Access to Justice Act is amended by adding at the end thereof the following: "Awards may be made for fees and other expenses incurred before October 1, 1981, in any such adversary adjudication or civil action.".

SEC. 6. TREATMENT OF EXPIRED PROVISIONS OF LAW.

(a) REVIVAL OF CERTAIN EXPIRED PROVISIONS.—Section 504 of title 5, United States Code, and the item relating to that section in the table of sections of chapter 5 of title 5, United States Code, and subsection (d) of section 2412 of title 28, United States Code, shall be effective on or after the date of the enactment of this Act as if they had not been repealed by sections 203(c) and 204(c) of the Equal Access to Justice Act.

(b) REPEALS.—

(1) Section 203(c) of the Equal Access to Justice Act is hereby repealed.

(2) Section 204(c) of the Equal Access to Justice Act is hereby repealed.

SEC. 7. EFFECTIVE DATE.

(a) IN GENERAL.—Except as otherwise provided in this section, the amendments made by this Act shall apply to cases pending on or commenced on or after the date of the enactment of this Act.

(b) APPLICABILITY OF AMENDMENTS TO CERTAIN PRIOR CASES.—The amendments made by this Act shall apply to any case commenced on or after October 1, 1984, and finally disposed of before the date of the enactment of this Act, except that in any such case, the 30-day period referred to in section 504(a)(2) of title 5, United States Code, or section 2412(d)(1)(B) of title 28, United States Code, as the case may be, shall be deemed to commence on the date of the enactment of this Act.

(c) APPLICABILITY OF AMENDMENTS TO PRIOR BOARD OF CONTRACTS APPEALS CASES.—Section 504(b)(1)(C)(ii) of title 5, United States Code, as added by section 1(c)(2) of this Act, and section 2412(d)(2)(E) of title 28, United States Code, as added by section 2(c)(2) of this Act, shall apply to any adversary adjudication pending on or commenced on or after October 1, 1981, in which applications for fees and other expenses were timely filed and were dismissed for lack of jurisdiction.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. DECONCINI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

H.R. 2378—EQUAL ACCESS TO JUSTICE

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 218, H.R. 2378, the House companion bill to the Equal Access to Justice Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The bill clerk read as follows:

A bill (H.R. 2378) to amend section 504 of title 5, United States Code, and section 2412 of title 28, United States Code, with respect to awards of expenses of certain agency and court proceedings, and for other purposes.

Mr. DOMENICI. Mr. President, I rise once again in support of H.R. 2378, the Equal Access to Justice Act. I say once again because I initially introduced the predecessor of this bill in 1977 during the 95th Congress as S. 1001. This body voted overwhelmingly in favor of the Equal Access to Justice Act on five separate occasions prior to approval by the House of Representatives in 1980. When the House approved the bill, they inserted a sunset provision, setting an expiration date of September 30, 1984 on the act, so that Congress could monitor the workings of the legislation. The Members of this Chamber accepted this alteration, and the Equal Access to Justice Act was signed into law.

During the 98th Congress, Senators GRASSLEY and DECONCINI and myself introduced S. 919 to make the Equal Access to Justice Act a permanent part of the law of the United States. Both the Senate and the House unanimously passed this legislation. Included in that bill were provisions to correct judicial interpretations inconsistent with the original intent of the act, to make technical corrections, and to extend the Equal Access to Justice Act uniformly throughout the federal system. The President, however, took exception to the interest provision of the bill and expressed concern that the bill as written could lead to extensive discovery proceedings and lengthy litigation. He also expressed concern about the potential for disparate treatment of litigants. Consequently, he vetoed the bill last November.

At the beginning of the current session I once again introduced, as S. 380, the Equal Access to Justice Act. That marked the fourth time I had done so. A comparable House version is now before us. I rise in support of enactment of H.R. 2378.

We have entered the age of Federal regulation and there are very few elements of life, commercial or otherwise, where the Federal Government does not play some role. Often, this Government action is arbitrary and capricious. The committee hearings over the years are replete with examples of what happens to individuals and small

51-059 O-86-14 (Pt. 15)

business owners who, prior to the Equal Access to Justice Act, challenged such Government action: the man from Oklahoma who spent over $30,000 in legal fees to defend successfully against a Labor Department ruling against him involving $14,000; the small businesswoman from Pennsylvania who was effectively put out of business by a legal dispute with the General Services Administration in which she was eventually exonerated. It is no wonder, therefore, that many individuals and small businesses faced with an unjustified Government action gave up right away and didn't challenge the Government action because the cost of proving that they are right was more than they could afford.

The purpose of the Equal Access to Justice Act is to reimburse individual Americans who successfully litigate against the Federal bureaucracy. This will force Government agencies to be responsible for their conduct and will provide those with modest means with access to the courthouse door.

Generally, under the prevailing "American Rule" regarding the payment of litigation fees and costs, each party is responsible for its own attorney's fees and court costs. Prior to the initial passage of the Equal Access to Justice Act, therefore, each party engaged in litigation involving the Government was largely responsible for the payment of his or her own attorney's fees and other expenses incurred during litigation, even if he or she successfully challenged the Government action. For many citizens, the costs of challenging a Government action precluded taking action against the Government, especially when the cost of contesting the Government action exceeded the amount at stake. In such cases, many individuals perceived that it was more practical to suffer the slings and arrows of outrageous Government action than it was to fight back.

The Equal Access to Justice Act focuses on those individuals for whom the cost of litigation may be a deterrent to redressing their grievances. It seeks to ensure that certain individuals and business entities will not be deterred from seeking review of, or defending against, unjustified governmental action because of the expense involved in securing the vindiction of their rights. It reduces the disparity in resources between individuals and business entities with limited resources and the Federal Government. Under this bill, the Government will be liable to a prevailing party for attorney's fees and certain other adjudication costs unless the position of the Government meaning the action or failure to act by the Government upon which the administrative proceeding or civil action is based, as well as the Government's litigation position—is substantially justified or unless special circumstances would make an award unjust. Additionally, language has been added limiting the scope of the determination of whether the position of the United States was substantially justified in order to respond to some of the concerns raised in the President's veto message. Finally, this bill contains a provision extending the protection to cases pending at the date of its enactment and covering cases filed on or after October 1, 1984, and disposed of before the date of its enactment. These provisions are essential to ensure that no party is denied the protection of the act solely because of the failure of the President to approve the bill last year. It is our intent that the protection afforded by the Equal Access to Justice Act be deemed continuous from the date of its first enactment.

In the 3 years that the Equal Access to Justice Act was in operation, Congress monitored the act to gauge its effectiveness in combating overregulation and in restoring the balance between the regulatory powers of our Federal Government and our citizens, who said that the Government could be arbitrary, capricious, and unresponsive. The Committee on the Judiciary of the Senate concluded that the act in large measure worked as intended. It found that the very existence of the act tended to restrain regulatory activities, which in turn restrained agency actions which go beyond Congress' intent. In addition, it was determined that the cost of the program was only approximately $3.7 million over 3 years, certainly a small price to pay to protect our citizens from governmental excesses.

The success of the program can, to a great degree, be measured by the support it has garnered. During the hearings on S. 919 during the 98th Congress, the Department of Justice, the Small Business Administration, the Administrative Conference of the United States, the National Labor Relations Board, the American Bar Association, the National Federation of Independent Businesses, the Small Business Legislative Council, McQuiston Associates, Small Business United, the Small Business Legal Defense Committee, the Women's Association of Government Contractors, the Alliance for Justice, the Washington Legal Foundation, and the Center for National Labor Policy all testified in favor of making the Equal Access to Justice Act a permanent part of the law of the land. Many of these organizations also testified in favor of H.R. 2378 this year. Not a single witness testifying in regard to either S. 919 or H.R. 2378 opposed the extension of the Equal Access to Justice Act.

Mr. President, the essential concept of the Equal Access to Justice Act is that when a small business or individual citizen prevails in litigation with the Federal Government that was initiated by the Federal Government, then that individual or business entity should be reimbursed for his or her attorney's fees and costs if the Government's position was not substantially justified. By requiring litigants who prevail to be entitled to fees, this bill will prevent spurious suits and will insure the contesting of meritorious disputes with a fair presentation of the issues. They say that "You can't fight city hall," and the prevailing attitude of many today is that even if you do fight the Federal Government and win in court, you still lose because of the cost. We must eliminate the possibility of such Pyrrhic victories. The average American must be made to feel that he or she can question the exercise of the Government's discretionary power as to its reasonableness without incurring large costs if he or she prevails. We are fortunate to live in a society where one has the right to challenge the actions of one's government, but the protection afforded by that right is diluted when the average citizen is deterred from exercising that right because of the fear of incurring a substantial financial loss in the process. We cannot permit such a condition to exist. Equal justice is not available when one cannot afford to fight.

Mr. President, in closing I thank the distinguished Senators from Arizona and Iowa for their efforts on behalf of the Equal Access to Justice Act. Their diligent work on behalf of this bill over the years has ensured its continuation. Without their help, we could not have accomplished this goal.

Mr. BUMPERS. Mr. President, I strongly support H.R. 2378, the House version of the Equal Access to Justice Act amendments.

On March 7, 1985, I introduced S. 615, the provisions of which are reflected in the House bill we vote on today. Much work on this issue has been done since last November when the President vetoed H.R. 5479, which reauthorized the Equal Access to Justice Act. Hopefully the President will reconsider his position on this issue and sign this legislation into law.

As every Member of this body knows, this measure will allow small businesses to be reimbursed for their costs and attorneys fees if they challenge Federal agencies in court and are successful. This measure, for reasons that escape me entirely, was vetoed by the President last year.

The reasoning for this bill, which merely extends a policy which Congress wisely established 5 years ago, is simple. We believe that if a small business successfully challenges the Federal bureaucracy in court, or if an agency unfairly accuses a small business of violating the law and the businessman vindicates himself, he should be able to recover his costs. Every

Member of Congress knows on a personnel level that there are genuine cases of bureaucratic abuse. These cases of injustice are the very reason why many Members are motivated to seek public office in the first place. And there is not a Member of this body who has not found on his or her doorstep citizens who have been wronged by their own Government. At worst, a career or a life may be ruined; at best, the individual has been wrongly accused and has had to incur great expense to clear his name. I do not say this to take a cheap shot at the Federal bureaucracy, but there are certainly those in Government who, from time to time, exercise very poor judgment.

Until the Equal Access to Justice Act, there was little that Members of Congress could really do for people who had suffered such a wrong. As a general rule, the Government is not subject to suit save when Congress says so, and the remedy of a private relief bill is cumbersome and impractical. Equal access to justice made the promise of justice to these people who had gone to great expense to challenge agency wrong, or who had successfully defended themselves against wrongful agency action.

The legislation has wide support from such groups as Small Business United, the Small Business Legal Defense Committee, the Small Business Legislative Council, the Independent Business Association of Wisconsin, the National Federation of Independent Business, the Chamber of Commerce of the United States, the National Association of Manufacturers, the National Tire Dealers and Retreaders Association, the Menswear Retailers of America, the National Small Business Association, the American Bar Association, the ACLU, and the Alliance for Justice.

The PRESIDING OFFICER. The question is on third reading.

The bill was ordered to a third reading, read the third time, and passed.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. DECONCINI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

STATE OF EMERGENCY IN SOUTH AFRICA

Mr. KENNEDY. Mr. President, the Government of South Africa has launched a new attack on its own people.

Last Saturday, State President P.W. Botha issued a formal proclamation announcing the transfer of "emergency powers" to the South African security forces and granting the South African police Draconian powers of search, seizure, and arrest. Since then, the authorities have closed down 36 townships and arrested over 650 people. Not since 1960—in response to the widespread disorders that erupted after the Sharpeville massacre—has such an assault been attempted by the South African Government on its own people.

But even martial law cannot bring order to a society that is so fundamentally disordered. The repression may get worse and the jails may overflow, but the unrest will continue and the discontent will spread—so long as apartheid exists.

The newspapers are now filled with stories of wholesale arrests—of lawyers, union leaders, church workers, and civil rights activists. But there aren't enough jails in South Africa—or on Earth—to hold all the people who oppose apartheid. As one UDF leader put it, "There is a state of terrorism in South Africa. The oppressed people are the enemies of the state."

And the killing continues. Over 500 people have been killed over the past 10 months. Every day, innocent men, women, and children are being struck down by the bullets and truncheons of the South African security forces.

The issues of endemic violence and political reform are not separable. It is a false dichotomy to argue, as the South African Government does, that "First we must restore order and then we can carry on with our reforms." There can be no lasting peace in South Africa without justice, and there will be no justice until apartheid is dismantled. In the absence of significant and fundamental reform, the Government's efforts to impose order by brute force is bound to fail. As President Kennedy said in 1962 on the first anniversary of the Alliance for Progress, "Those who make peaceful revolution impossible will make violent revolution inevitable."

The first step is for the South African Government to lift the state of emergency. The next step is for the Government to release all political prisoners. As Beyers Naude, the Secretary General of the South African Council of Churches has stated, "There can be no solution unless the doors of the jails are opened and political prisoners are released unconditionally." With one stroke, the South African Government can restore order to that troubled land—if only it will release Nelson Mandela and Walter Sisulu and all other political prisoners, and if only it will enter into a dialog with these leaders on the future of the country that belongs to all of them.

White South Africans have it within their power to halt this spiraling descent into more and more violence and to achieve a lasting peace inside their country—but the price for that peace is meaningful change and an end to apartheid. Reverend Naude spoke for all South Africans when he made this plea to State President Botha: "Before the whole country goes up in flames, hear the cries for peace and justice in our land."

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

(Mr. TRIBLE occupied the chair during the quorum call.)

Mr. KASTEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. WEICKER). Without objection, it is so ordered.

CONSUMER PRODUCTS SAFETY COMMISSION AUTHORIZATION

Mr. KASTEN. Mr. President, I ask unanimous consent that the Senate now turn to Calendar Order No. 138, S. 1077, the Consumer Products Safety Commission authorization bill.

Mr. BYRD. Mr. President, reserving the right to object, I do object.

The PRESIDING OFFICER. Objection is heard.

Who yields time?

Mr. KASTEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KASTEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KASTEN. Mr. President, I ask unanimous consent that the Senate now turn to Calendar Order No. 138, S. 1077, the Consumer Product Safety Commission

Mr. BYRD. Mr. President, reserving the right to object. I would like to inquire as to whether or not an amendment dealing with the legislative veto is going to be brought up against this bill.

Mr. KASTEN. I would say to the Senator that it is not the intention of the leadership on either side to consider this issue. It is a difficult one, a contentious one, one in which a compromise may be reached, and a number of Senators want an opportunity to review it. So it is not my intention and it is not the intention of the Senator from Kentucky to have the consideration of the legislative veto question on this piece of legislation.

Mr. BYRD. Mr. President, I have no feelings one way or the other as to the bill itself. I may not have any problem with the legislative veto language.

However, I was shown the language this afternoon and I had asked if we could have overnight in which I could take a look at that language. I may

not have any problem with it, but I do feel constrained to object unless I can have some understanding with regard to that particular language. I may have no problem with it by tomorrow.

Mr. DOLE. Will the Senator yield to me?

Mr. KASTEN. I am pleased to yield to the majority leader.

Mr. DOLE. Mr. President, I support the legislative veto. I think maybe we have a compromise in the works. I know the distinguished Senator from Michigan, Senator LEVIN, and the Senator from Iowa, Senator GRASSLEY, visited with Senator HATFIELD about the original provision that he was opposed to. That information has now been submitted to the distinguished minority leader. Senator HATFIELD believe it removes some of the real problems he had.

What I would hope is that we would not have it offered to both bills. I am going to support it on the FTC authorization bill.

But I would hope that the distinguished Senator from Iowa would let us bring up the consumer product safety bill without pressing the legislative veto and give the distinguished minority leader overnight to take a look at it. He may discover it is satisfactory or may need some minor change and we would not have a problem. All I am trying to do is get some bills passed so that we can do some things in September that we have discussed.

Mr. GRASSLEY. Will the Senator yield?

Mr. KASTEN. I am pleased to yield to the Senator from Iowa.

Mr. GRASSLEY. Mr. President, along the line of what the distinguished floor leader just said, that he would hope that we would not bring it up on this one as opposed to the FTC bill, we are not talking about a generic legislative veto approach. We are talking about a legislative veto approach that would apply to the FTC, and for whatever good reasons there is that it should be on the FTC are also those very good reasons that it should be on the Consumer Product Safety Commission, as well. So what you are saying is that on a bill that Senator LEVIN and I feel that a legislative veto ought to be applicable to, that I ought to just let that bill leave the Senate without the protection for the Congress and the protection for the people that ought to be in there on the regulations of one as opposed to the regulations for the other. I cannot accept the responsibility for letting that happen. That is what would be happening.

I think, as I tried to plead with the Senator from Wisconsin and as the Senator from West Virginia has just said, we have made considerable progress on this, particularly with Senator HATFIELD, who was a major obstacle, a person who did not like what we were doing, who now, with a rewrite, has signed off to that extent. It seems to me that if the Senator from West Virginia could have the night to study this and whatever his view might be, but let us just postulate that he would like it, it seems to me something would be gained by letting both lay over until tomorrow and have both be taken care of in the same manner.

But I cannot accept the point of view that I should let a bill go that ought to have a legislative veto on it just because maybe it has not gotten the attention that the Federal Trade Commission has gotten.

Mr. KASTEN. Let me just reply to the Senator. As he knows, he would have the choice of designing that amendment as to whether it would be an amendment that would pertain only to the Federal Trade Commission or an amendment that would apply generically. That is a decision that he, as the author of the amendment, along with the cosponsors would have to make.

I, too, support the legislative veto. We have some differences on some of the details. But that amendment could be generic or it could be applied to the FTC. The debate, I believe, would be very similar under any circumstances.

It is my hope that we could work with the leadership, avoid the legislative veto question completely, and discuss and pass the legislation before us, Senate bill 1077, the Consumer Product Safety Commission. It is under those circumstances that I hope we can proceed.

Mr. LEVIN. If the Senator will yield, I think, as a practical matter, the generic amendment option is not a real one. As the person who would be offering that, I think it is unlikely we could get all the people together who would be involved in a generic amendment. I think it is possible, however, that we could pull those forces together relative to the amendment on just a bill or on two bills.

So I do not think the generic amendment is a practical possibility. I do think it is a practical possibility, given Senator HATFIELD's position, as I understand it now, assuming Senator BYRD and others are able to support this or acquiesce in this approach, that we could offer it on a specific bill or bills.

Mr. KASTEN. Mr. President, in reply to the Senator, I understand there may be some differences, but a third option might be to debate or to craft the amendment on the Federal Trade Commission bill, which will be discussed maybe on tomorrow, and simply have the legislative veto amendment apply to both the Consumer Product Safety Commission and the Federal Trade Commission. That would be a third possibility, depending on that amendment.

Mr. LEVIN. I would be willing to offer it in that form if Senator GRASSLEY would be, but that would be something Senator GRASSLEY should give some thought to.

Mr. KASTEN. It could be either way. I, therefore, repeat my unanimous-consent request.

Mr. BYRD. Mr. President, further reserving the right to object, let me make it clear beyond any doubt whatsoever that I have no interest in opposing or supporting either the Federal Trade Commission bill or the consumer product safety bill at this point. Of course, I will vote eventually on both. The only thing I am a little concerned about is the language of an amendment which was shown to me late in the afternoon. I believe the language may entail some expedited parliamentary procedure. I feel that the Senate ought to have a chance overnight to look at what this language would do. Tomorrow morning, I may have no problem at all with it.

The statement that has been make that this would not be a generic legislative veto helps some. But all I want is just an overnight to look at the language.

What would be the position of the manager in the event the legislative veto language is offered?

Mr. KASTEN. I think, in the event the legislative veto language were offered on this piece of legislation, it would be my view that the leadership, either the floor manager of the bill or our leadership, would, in fact, move to table that legislation on this bill.

Mr. BYRD. By tomorrow morning I might not be interested even in supporting a tabling motion. I may have no problem with it. But, in the event I do, then what happens? Will there be a tabling motion made?

Mr. KASTEN. My hope is we will complete the Consumer Product Safety Commission authorization within the next 40 minutes, that we will not have a discussion at all of the legislative veto, and that we would reserve the entire discussion and debate on the legislative veto for the FTC bill, which is following immediately. In case we would, in the next hour or two, have an amendment coming up on the legislative veto question, I am told by the majority leader that he would move to table that legislation or that I would move to table that legislation, because we are going to work to keep this bill clean of the legislative veto argument.

Mr. BYRD. Do I understand that would be the case whether it is introduced today or tomorrow?

Mr. DOLE. Mr. President, let me clarify what I have discussed briefly with the Senator from Michigan.

What the manager would like to do is bring up the consumer product safety bill and there will be an amendment by the distinguished Senator from Illinois, Senator SIMON, and maybe other amendments.

If we could get an agreement, we do intend to bring up the FTC authorization bill tomorrow. And at that time, if the legislative veto were offered—I am a cosponsor—it seems to me it could at that time be made to apply both to the Consumer Product Safety Commission and the Federal Trade Commission.

It would be my hope at that time that we would have disposed of this bill. The distinguished minority leader would have had overnight and beyond to take a look at the so-called Grassley-Levin language and might be willing to suggest, as the distinguished chairman of the Appropriations Committee has, that he has no objection.

Then, the amendment will be offered by Senators GRASSLEY and LEVIN to the FTC authorization bill applying to FTC, and also the Consumer Products Safety Commission. But it would not be generic. It would be limited to those two.

Mr. GRASSLEY. Mr. President, will the Senator yield to me?

Mr. DOLE. If this is offered, I will move to table.

Mr. BYRD. Mr. President, on that assurance by the distinguished majority leader, I have no objection.

Mr. GRASSLEY. Will the Senator yield?

Mr. KASTEN. I am pleased to yield to the Senator from Iowa.

Mr. GRASSLEY. Is there any reason why—if this is the procedure and tomorrow would be the time—you cannot take this bill up today to the point through all of the debate except the final vote, let it lay over to be the first order of business tomorrow, and if there is some sort of agreement on it to add it at that point as a separate item to the FTC when it comes up as a following bill? Is there any reason why that cannot be done? You want to accomplish something between now and 6:30. That is very legitimate.

I would like to have you take into consideration what unknown amount of time might have been accomplished already in shortening the debate on this issue as a result of the work which Senator LEVIN and I have done on this compromise to this point. Whatever unknown amount of time that is, I would like to have that be taken into consideration.

Mr. KASTEN. Mr. President, I will say to the Senator that it is my understanding that we are going to try to finish this bill tonight, because we want to put it behind us. That is the hope of the majority leader. So we will consider the Simon amendment—and I understand the Senator from Missouri may have an amendment to that amendment. We will go in that direction. But it is my hope, too, and the hope of the majority leader, to finish this bill because the debate on the legislative veto amendment is going to be a long and protracted debate. The distinguished Senator from Kentucky, the ranking member of the Consumer Subcommittee, has assured me of that. So it is our hope that we can put the Consumer Product Safety Commission reauthorization issue behind us. Then we can deal with the legislative veto question applying to the Consumer Product Safety Commission and the FTC, if that is the desire—to use the vehicle of the FTC reauthorization bill to do that.

Mr. FORD. Mr. President, will the distinguished Senator yield?

Mr. KASTEN. I am pleased to yield.

Mr. FORD. Mr. President, I will not agree to any time limit as it relates to legislative veto amendments. I will put that up front so that everyone will understand. If you want to go with the legislative veto on this particular legislation tomorrow, unless the majority leader agrees to table it, then I will object to any kind of time agreement.

Mr. GRASSLEY. Mr. President, will the Senator yield?

Mr. KASTEN. I am pleased to yield to the Senator.

Mr. GRASSLEY. What we are also dealing here implicitly is not only letting this bill go through clean as an understanding but there is a commitment made—is there not—that there will be a motion to table, as per the recent statement, any legislative veto?

Mr. FORD. No. The distinguished Senator misunderstood me on this particular piece of legislation. Now, if a move to table comes up tonight—the motion is made to table it—that suits me fine. Otherwise, you do not have a time agreement tonight. You will not get one tomorrow on the Consumer Product Safety Commission as it relates to legislative veto. It is another thing on the Federal Trade Commission. I may take that same position on the Federal Trade Commission legislation as it relates to legislative veto. But tonight, unless the majority leader moves to table, there is no way for you to move it expeditiously.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1077) to amend the Consumer Product Safety Act (15 USC 2051 et seq.) to provide authorization of appropriations, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Commerce, Science, and Transportation, with an amendment:

On page 2, line 17, strike "adding at the end thereof", and inserting immediately after paragraph (9)"

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Consumer Product Safety Commission Authorization Act of 1985".

DISCLOSURE TO CONTRACTORS

SEC. 2. Section 6(a)(8) of the Consumer Product Safety Act (15 U.S.C. 2055(a)(8) is amended by striking "or employees' and inserting in lieu thereof ", employees or representatives of the Commission (including contractors)".

CHRONIC HAZARD ADVISORY PANEL

SEC. 3. Section 28(b)(1) of the Consumer Product Safety Act (15 U.S.C 2077(b)(1)) is amended by inserting "that may be the subject of the Panel's investigation" immediately after "product".

AUTHORIZATION OF APPROPRIATIONS

SEC. 4. Section 32(a) of the Consumer Product Safety Act (15 U.S.C. 2081(a)) is amended—

(1) by striking "and" at the end of paragraph (8);

(2) by striking the period at the end of paragraph (9) and inserting in lieu thereof a semicolon; and

(3) by inserting immediately after paragraph (9) the following:

"(10) $35,000,000 for the fiscal year ending September 30, 1986; and

"(11) $35,000,000 for the fiscal year ending September 30, 1987.".

Mr. KASTEN. Mr. President, I am pleased to bring before the Senate today, S. 1077, the Consumer Product Safety Commission Authorization Act of 1985, which was reported unanimously by the Senate Commerce Committee on May 16.

The last Consumer Product Safety Commission Authorization Act expired at the end of the 1983 fiscal year. During the last session, the Senate passed a new reauthorization bill, S. 861, but it was later stalled as a result of controversy over the legislative veto. The bill before us today is identical to S. 861, as passed by the Senate, except that this new bill does not contain a legislative-veto provision.

In keeping with efforts to reduce the budget deficit, this bill authorizes the Consumer Product Safety Commission at $35 million for each of the next 2 years—$1 million less than current authorization for the Commission. In addition to the authorization, the bill includes two provisions which will improve Commission procedures. The first change will allow the Commission to disclose product hazard information to Commission contractors without first requiring Commission verification of the accuracy of that information. The second change relaxes the conflict-of-interest criteria for members of the Commission's chronic hazard advisory panels. Neither of these changes was controversial when the Senate approved the last Consumer Product

Safety Commission authorization bill in 1983.

Mr. FORD. Mr. President I support S. 1077, the CPSC Authorization Act of 1985. This bill reauthorizes the CPSC for 2 years—fiscal years 1986 and 1987. The authorization level for both years is $35 million. I am not sure that $35 million is enough, but I am certain that anything less would prevent the CPSC from carrying out its mandate of protecting the American people from death and injury due to unreasonably dangerous consumer products. OMB had originally proposed $25 million for fiscal year 1986, then came back with $33.7 million. The administration wanted to abolish this agency in 1981 and when we defeated that plan it seems that now they decided to starve it to death. I am pleased that Senator KASTEN has decided not to let that happen and is proposing an authorization at the same level as in the last authorization. This amount represents not a freeze, but a $1 million cut from the CPSC's 1985 appropriation.

This agency's budget and staff have been slashed by over one-third in the last 5 years. In fiscal year 1974, the CPSC's first annual budget was almost $31 million. Now 12 years later, the fiscal year 1986 proposed budget represents a decrease in real dollar terms of over 50 percent. No other Federal health and safety agency has sustained cuts of this magnitude—not the EPA, not OSHA, not the FDA, or the FTC.

The CPSC is an agency with an important mission and with many tools available to it to carry out that mission. However, if the agency does not have the money or the staff to use those tools it cannot protect the public adequately from unsafe products. In 1983, the Consumer Federation of America estimated that in the 12 years of the Commission's existence there have been 5 million fewer deaths and disabling injuries in household accidents and a total economic savings of $14.4 billion. A Roper Poll, released in August 1984, showed that the CPSC was one of the most highly regarded Federal agencies covered by the survey. The American public gave the CPSC a positive rating of 78 percent.

Clearly, the Commission has an important role to play in our society. But to serve the American public effectively, it must have the resources to not only investigate accidents after the fact, but to prevent them from happening.

The CPSC has not had authorization legislation since 1981. It is important that we enact such legislation this year.

I urge my colleagues to vote in favor of S. 1077.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

AMENDMENT NO. 539

(Purpose: To provide for amusement park safety)

Mr. SIMON. Mr. President, I send an amendment to the desk, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Illinois [Mr. SIMON] proposes an amendment numbered 539.

Mr. SIMON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add the following new title:

TITLE II—AMUSEMENT PARK SAFETY

SEC. 201. SHORT TITLE, REFERENCE.

(a) SHORT TITLE.—This title may be cited as the "Amusement Park Safety Act".

(b) REFERENCE.—Whenever in this title an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Consumer Product Safety Act.

SEC. 202. DEFINITION.

(a) DEFINITION OF AMUSEMENT RIDE.—(1) Section 3(a)(1) (15 U.S.C. 2052(a)(1)) is amended by striking out the first two sentences following subparagraph (I).

(2) Section 3(a) is amended by adding at the end of the following:

"(15) the term 'amusement ride' means any device which carries or conveys passengers along, around, or over a fixed or restricted route or course or within a defined area for the purpose of giving its passengers amusement and which is customarily controlled or directed by an individual who is employed for that purpose and who is not a consumer with respect to such device. An amusement ride which is not permanently fixed to a site is a consumer product for purposes of this Act and an amusement ride which is permanently fixed to a site—

"(A) is not a consumer product for purposes of sections 7 and 8, and

"(B) is a consumer product for the remainder of the Act.

"(16) The term 'amusement ride operator' means the owner of an amusement ride.".

(b) CONFORMING AMENDMENT.—Section 3(a)(1)(I) is amended by striking out ". The term 'food', as used in this subparagraph means all 'food' ".

SEC. 203. PUBLIC DISCLOSURE OF INFORMATION.

Section 6(b) (15 U.S.C. 2055(b)(1)) is amended—

(1) in the first sentence of paragaph (1) by striking out "the Commission shall" through the end of the sentence and inserting in lieu thereof the following: "the Commission shall, to the extent practicable, notify and provide a summary of the information to—

"(A) each manufacturer or private labeler of the consumer product, and

"(B) to each amusement ride operator who owns the amusement ride

to which the information pertains, if the manner in which such consumer product or amusement ride is to be designated or described in such information will permit the public to ascertain readily the identity of such manufacturer, private labeler, or amusement ride operator and shall provide such manufacturer, private labeler, or amusement ride operation with a reasonable opportunity to submit comments to the Commission regarding such information."; and

(2) in the second and third sentences of paragraph (1) and in paragraphs (2) and (3), by striking out "or private labeler" each place it occurs and inserting in lieu thereof ", private labeler, or amusement ride operator".

SEC. 204. NOTIFICATION AND REMEDIES.

(a) NOTIFICATION OF COMMISSION.—Section 15(b) (15 U.S.C. 2064(b) is amended by adding at the end the following: "Each amusement ride operator who obtains information which reasonably supports the conclusion that the amusement ride the operator owns contains a defect which could create a substantial product hazard described in subsection (a)(2) shall provide the information required by the preceding sentence.".

(b) REPAIR, REPLACEMENT, REFUND.—Section 15(d) of such Act is amended—

(1) by inserting after "of such product" in the first sentence the following: "or the amusement ride operator if the product is an amusement ride"; and

(2) by inserting before ", or from doing" in the last sentence the following: ", from operating an amusement ride if the product involved is an amusement ride".

SEC. 205. INSPECTION.

Section 16(a) (15 U.S.C. 2065(a)) is amended by striking out "and" at the end of paragraph (1), by striking out the period before the last sentence in paragraph (2) and inserting in lieu thereof "; and", by striking out the last sentence, and by adding after paragraph (2) the following:

"(3) to inspect, at reasonable times and in a reasonable manner—

"(A) amusement rides which are not permanently fixed to a site, and

"(3) amusement rides which are permanently fixed to a site if the State or political subdivision in which the ride is located does not have authority to inspect the ride or if the ride was involved in a fatality or a personal injury requiring hospitalization.

Each such inspection shall be commenced and completed with reasonable promptness.".

SEC. 206. REGULATIONS.

The Consumer Product Safety Commission shall issue regulations for the administration of section 15 of the Consumer Product Safety Act, as amended by section 204, not later than six months after the effective date of this title.

SEC. 207. EFFECTIVE DATE.

The amendments made by this title shall take effect October 1, 1985.

Mr. SIMON. Mr. President, I have offered an amendment which I think is important. It goes to the fundamental issue, and that is whether we are going to be responsive to the public or to a varied private interest. My amendment says that the Consumer Product Safety Commission—which until 1981 had jurisdiction to inspect permanent amusement rides in this country—jurisdiction be restored with the exception that any State that has inspec-

tion or if a local governmental unit has an inspection, then the Federal Government would not get involved. It is no try for Federal power, but it is an intent to protect the public. This summer roughly 200 million people in this Nation are going to go to the permanent amusement parks, and most of the parents are going to assume that those rides are inspected. Unfortunately, in 26 States those rides will not be inspected.

I first got interested because back a couple of years ago three boys were on a ride in the State of Illinois. There was an accident. They were hospitalized, and I discovered there was no inspection. How did we lose inspection? You remember that massive Reconciliation Act of 1981, a monstrous thing that I am pleased to say I voted against, but tacked in that bill without the knowledge of most of us—there were a few people who knew—was the withdrawal of the authority of the Consumer Product Safety Commission to inspect rides. So I want to restore that. I want to see that the public has some protection.

I am pleased to say that my amendment is endorsed by all three major consumer groups: Consumer Federation of America, Consumer Union, and Congress Watch. My amendment does basically three things: No. 1, authorizes inspection; two, there would be a clearing house so that if defects are found in rides anywhere in the Nation, if the defect is found in the State of Kentucky, it will be reported to Washington, and in the State of Wisconsin or any other State they could know about it; third, there be post-accident inspection authority.

What I want is this amusement ride industry treated as any other industry.

Of course, some Senators have received mail from the amusement ride industry that they do not want to be inspected. Of course they do not want to be inspected. No industry wants to be inspected. Every industry from time immemorial has resisted inspection.

This is not an industry that is suffering. This is an industry that is growing.

Let me read a couple of sentences from the Wall Street Journal.

Consumers are in the mood to splurge on fun, says Astrodome in Houston. Traffic has picked up 20 percent at Frontier City, Oklahoma. In California, Disneyland sees an excellent chance of setting its highest yearly attendance record since 1980.

Let me add this: In the last 4 years since we have taken off inspections, injuries have doubled.

I say to this body that here is an area where the issues are clear cut. I do not want to have to say to some paralyzed child somewhere, "Sorry, we did not want to provide inspection protection for you because the industry did not want it."

There are a number of newspaper endorsements of my amendment. I know of not a single newspaper endorsement anywhere on the other side.

Mr. President, I ask unanimous consent that Senator LAUTENBERG, Senator METZENBAUM, and Senator EAGLETON be added as cosponsors.

The PRESIDING OFFICER (Mr. GORTON). Without objection, it is so ordered.

Mr. SIMON. I read from a letter in the Wall Street Journal of July 18, 1984, last year. Nancy Harvey Steorts, who was then the chairman of the Consumer Product Safety Commission, wrote in support of their coverage of amusement rides. Incidentally, she is an appointee of President Reagan. She writes in response to Commissioner Terrence Scanlon, who I regret to say is now the chairman of the Consumer Product Safety Commission, and who has written they should not have that authority.

The mission of the U.S. Consumer Product Safety Commission is directly and clearly related to such problems. Let us look at them.

There were nearly 10,000 amusement-ride injuries treated in emergency rooms last year, almost double the number for 1980.

Ten people have already died as a result of amusement-ride accidents this year, exceeding the annual average for the past 10 years, and, the season is still young.

Some 26 states have no amusement-ride legislation or regulation; and there are wide variations in the 24 states which do have regulations.

I will skip some of it that simply reinforces what she has to say.

The legislation would allow the Commission to work cooperatively with the industry and state and local governments in the development of standards for design, operation and maintenance of amusement rides; investigate accidents and consumer complaints; implement corrective action; require manufacturers to report in a timely fashion any hazards of which they are aware; . . .

The Commission would approach this problem in the cooperative non-confrontational spirit which has characterized its activities under the Reagan administration. If we are permitted to work together with the industry and other levels of government, the problem will be solved—and the consumer will benefit.

That is the Reagan appointee who served as chair of the Consumer Product Safety Commission talking about my amendment.

Incidentally, I also ask unanimous consent that Senator KERRY be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMON. Mr. President, I ask unanimous consent to have printed in the RECORD the full letter to which I just referred.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

AMUSEMENT RIDES ARE OUT OF CONTROL

Re Commissioner Terrence M. Scanlon's article (editorial page, July 11) on amusement-ride safety regulation:

The mission of the U.S. Consumer Product Safety Commission is directly and clearly related to such problems. Let us look at them.

There were nearly 10,000 amusement-ride injuries treated in emergency rooms last year, almost double the number for 1980.

Ten people have already died as a result of amusement-ride accidents this year, exceeding the annual average for the past 10 years, and, the season is still young.

Some 26 states have no amusement-ride legislation or regulation; and there are wide variations in the 24 states which do have regulations.

The Commission has jurisdiction only over mobile amusement rides such as those in traveling carnivals. Since 1981, it has had no authority over fixed-sites rides at theme and amusement parks.

Because there is no consistency of safety standards for fixed-site rides from state to state, the consumer has no way of knowing the level of safety on any particular ride.

As Chairman of the Commission, I feel strongly that we cannot simply "look the other way" when an apparent hazard such as this presents itself. This is a nation of informed consumers who expect their Federal government to respond to such problems.

Two such responses are bills introduced in Congress this session to restore the Commission's authority over fixed-site rides. If one of these bills were passed, it would not mean that hordes of federal inspectors would suddenly descend on our amusement parks. It would simply set into motion a process leading to implementation of consistent, effective standards.

The legislation would allow the Commission to work cooperatively with the industry and state and local governments in the development of standards for design, operation and maintenance of amusement rides; investigate accidents and consumer complaints; implement corrective action; require manufacturers to report in a timely fashion any hazards of which they are aware; and impose fines up to $500,000 for failure to do so.

The Commission would approach this problem in the cooperative non-confrontational spirit which has characterized its activities under the Reagan administration. If we are permitted to work together with the industry and other levels of government, the problem will be solved—and the consumer will benefit.

NANCY HARVEY STEORTS,
Chairman,
Consumer Products
Safety Commission.

Washington, DC.

Mr. SIMON. The present chairman of the Commission is opposed to this amendment. How he can feel he is protecting the public by opposing this, I do not know. I do not know how many more children have to die, have to be injured, before we do what we should do.

The Consumer Product Safety Commission reported on August 12 of last year that there were 61 deaths on amusement rides from 1973 through 1981.

Right now, under current law, a hazardous amusement ride, which is permanently fixed at an amusement or theme park site is, in many cases, totally without any kind of inspection

whatsoever. No one can convince me that is in the public interest.

Last year there were 10,687 amusement park related injuries that we know about. How many we do not know about I cannot guess. In 1984, 12 people died in permanent amusement parks.

I see my good friend from Missouri, Senator DANFORTH, is on the floor. I have great respect for him. This is one of those occasions where he and I differ slightly. I would point out that one of the newspapers in commenting editorially on this question is the St. Louis Post Dispatch which said,

Mr. Simon's bill supports consumers and insofar as it bolsters consumer confidence in the amusement park industry deserves the support of the industry as well as consumers. Mr. Danforth's bill does not.

I ask unanimous consent that there be printed in the RECORD a list of some of the major accidents that have occurred in the last 4 years in permanent amusement parks.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

AMUSEMENT PARK ACCIDENTS—1980 TO 1984

1984

June 2: NEW JERSEY AMUSEMENT PARK—Fatal fire inspires Pennsylvania lawmakers to tighten reins on thrill rides.

May 30: GURNEE, ILLINOIS—GREAT AMERICA—Three boys plunged 60 feet to the ground on the ride called "The Edge" during the car's ascent to the top. Accident occurred on May 22, 1984.

May 28: ATLANTA, GEORGIA—Miniature airplanes crashed into one another stranding riders aloft. Thirty-three riders experienced bruises and sprains.

May 26: PONTIAC, ILLINOIS—One person died of multiple injuries approximately fifteen minutes after an accident on a carnival ride.

May 14: HERSHEY, PENNSYLVANIA AT HERSHEY PARK—Two children were thrown from the ride, the "Timber Rattler." Park officials claimed that there were no mechanical problems with the ride.

April 27: CONWAY, SOUTH CAROLINA—Magic Harbor Amusement Park—A 13-year old girl was killed when thrown from the "Black Witch" roller coaster ride at Magic Harbor Amusement Park on April 3, 1984.

March 20: SARASOTA FLORIDA—Sarasota County Fair—Fourteen people were hurled off a ride at Sarasota County Fair; they suffered minor injuries.

Feb. 15: SANTA ANA, CALIFORNIA—Disneyland—A 48-year old woman was killed on Disneyland's Matterhorn bobsled ride as it proceeded down the manmade mountain.

Jan. 24: SANTA ANA, CALIFORNIA—Knott's Berry Farm—A boy was crushed beneath the wheels of a stagecoach at Knott's Berry Farm.

1983

Dec. 30: WILD WORLD AMUSEMENT PARK (LARGO, MARYLAND)—Parents filed a suit against operators of Largo Theme Park after their child drowned at Wild World Amusement Park. Park officials denied that the machine that generates waves was not operating at the time of the accident.

Nov. 10: FARMINGTON, UTAH—LAGOON PARK—A teen is suing for $11 million after losing an arm while working on Lagoon Park's ride, "Colossus."

Oct. 31: SANTA ANA, CALIFORNIA—Knott's Berry Farm—A teen climbed out on the safety rail of a "parachute ride" gondola at Knott's Berry Farm Amusement Park and fell more than 100 feet to his death.

Sept. 11: DOSWELL, VIRGINIA—A youth sat alone on the back of a four-seat car of a roller coaster when an accident occurred.

Sept. 6: AGAWAM, MASSACHUSETTS—Riverside Amusement Park—Seven people riding on a roller coaster, called the "Cyclone Coaster," in the Riverside Park suffered minor injuries when a set of cars ran into the rear of the "Cyclone Coaster."

Aug. 28: RYE, NEW YORK—Rye Playland—A woman was slightly injured when she was thrown from a car on a high-speed ride at Rye Playland owned by Westchester County.

July 30: HOUSTON, TEXAS—Astroworld Amusement Park—A roller coaster plummeted backward off its tracks at Astroworld Amusement Park during a safety test killing one person and injuring three others. Cause of accident: a safety mechanism had been bypassed.

May 15: KINGS ISLAND, OHIO—A boy was killed after he fell from the "Eiffel Tower."

April 4: SURFSIDE BEACH, SOUTH CAROLINA—Magic Harbor Amusement Park—A girl fell from a ride and died shortly thereafter.

March 24: SANTA ANA, CALIFORNIA—Disneyland—A young man fell from Disneyland's Space Mountain ride and was seriously injured.

1982

TRENTON, NEW JERSEY—Vernon Valley Action Park—A man was electrocuted last summer in an amusement park water ride. Tests of a pump in the White Water Kyak ride three days after the fatal accident had found an electrical leak of nine amps.

July 23: ANNISTON, ALABAMA—A Jacksonville man was injured in an accident at Six Flags over Georgia. Possibility of broken vertebra and a bruised stomach.

July 21: GRAND PRAIRIE, TEXAS—Whitewater Amusement Park—Thirteen children were treated for exposure to poisonous chlorine gas. Officials at the park installed a safety feature in the children's pool to prevent similar accidents.

June 15: LAKE BUENA VISTA, FLORIDA—Walt Disney World—An 18-month-old child was killed when she fell from a seven-car train.

June 12: SANTA CLARA, CALIFORNIA—Marriott's Great America—The Whizzer roller coaster ride was closed twice when accidents ended in the death of a boy (May, 1980) and injuries to about 24 riders. Worn tires were said to be the cause of the accidents.

May 30: OCEAN CITY, MARYLAND—A man was seriously injured when he fell from high atop an amusement park ride and tumbled via the machinery before landing on the ground.

Feb. 28: ALBUQUERQUE, NEW MEXICO—A 14-year-old boy died in a racing accident while driving one of the cars.

1981

Sept. 8: WILDWOOD, NEW JERSEY—A girl had part of her scalp torn away after her pigtails tangled in the park's machinery on "one of the safest rides" in the amusement part. She and her parents entered a tunnel on the boat before the accident occurred.

Sept. 6: KENOSHA, WISCONSIN—A three-year-old boy died of head injuries he suffered when thrown from an amusement park ride at a county fair.

Aug. 27: CAMDEN, NEW JERSEY—Ocean County Amusement Park—A 20-year-old ride operator fell 42 feet to his death from a roller coaster at Great Adventure, a large Ocean County amusement park.

Aug. 26: SANDUSKY, OHIO—Cedar Point Amusement Park—A young man and woman were treated for minor injuries when the "Corkscrew" ride malfunctioned.

Aug. 11: ORANGE, CALIFORNIA—Seven teenagers suffered minor cuts when a hole developed on a 68 foot water slide.

July 31: ORLANDO, FLORIDA—Disneyworld—A woman drowned in a canal while trying to find her car in a dark parking lot at Disney

July 20: BRISTOL, CONNECTICUT—Lake Compounce Amusement Park—A teenager died from injuries she sustained when she fell from a roller coaster.

July 9: TRAVERSE CITY, MICHIGAN—A 14-year-old deaf boy was critically injured in a freak accident on a ride at a Northern Michigan resort. He went into a coma shortly after the accident.

June 9: GURNEE, ILLINOIS—Marriott's Great America—A gas leak near two "flume rides" sent 53 people to area hospitals.

May 24: IRONDEQUOIT, NEW YORK—Sea Breeze Park—A 14-year old girl was killed when she got off the ride.

1980

Aug. 30: DALLAS, TEXAS—The Swiss Sky Ride fell, killing one person and injuring 17 others.

Aug. 20: SHREVEPORT, LOUISIANA—Failure of a hydraulic valve caused an amusement park ride called the "YO-YO" to drop about 12 riders to the asphalt below.

Aug. 17: DENVER, COLORADO—Elitch Gardens Amusement Park—A coaster train ran into the back of another train that had been stopped by a fallen tree limb.

July 13: AGAWAM, MASSACHUSETTS—Riverside Amusement Park—More than 20 people suffered bumps and scratches when the "Round-up Ride" made a hard landing.

July 2: MEMPHIS, TENNESSEE—East Memphis Amusement Park—A girl was paralyzed after a water slide collapsed. The cause was attributed to too many youngsters crowding onto a flume designed to hold no more than two people at one time.

June 7: ANAHEIM, CALIFORNIA—Disneyland—A young man was killed when he climbed from a moving car of an elevated train and was struck by another car from the opposite direction.

May 28: ST. LOUIS, MISSOURI—Six Flags—A tram collapsed killing a 12-year-old girl.

Mr. SIMON. Let me just add finally, Mr. President, no industry—and let me underline that, no industry—ought to be without inspection. To have an industry where 200 million people, most of them children, will go into those parks this year and next year and to say, "Sorry, we are not going to see that you have any inspection," simply does not make sense. It is inviting abuse.

What about the cost? you may ask. First of all, if you look at the cost in terms of a life or a paralyzed child, something like that, that is one way. But I would point out that CBO has estimated that the cost of this, since you are using personnel that the Consumer Product Safety Commission has already, will be less than $10,000 a year.

I say to my colleagues this is an issue which is fairly clearcut, and I hope we will have the good sense to adopt this amendment and protect the public. I urge its adoption.

Mr. DANFORTH addressed the Chair.

The PRESIDING OFFICER. The Senator from Missouri.

AMENDMENT NO. 540 TO AMENDMENT NO. 539

(Purpose: To add provision regarding amusement ride safety.)

Mr. DANFORTH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Missouri [Mr. DANFORTH] proposes an amendment numbered 540 to amendment numbered 539.

Mr. DANFORTH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the matter proposed to be inserted by amendment No. 539, insert the following:

NATIONAL COMMISSION ON AMUSEMENT RIDE SAFETY

SEC. .(a) The Congress finds that—

(1) the occurrence of amusement ride accidents in recent years has prompted inquiry into the necessity and desirability of Federal legislation to regulate the amusement ride industry;

(2) the regulation of such rides has traditionally been the responsibiiity of State and local governments and of the amusement ride industry;

(3) it is uncertain whether any Federal agency has sufficient resources or expertise to regulate the amusement ride industry;

(4) Federal involvement in the inspection and regulation of amusement rides could be costly and inefficient;

(5) voluntary comprehensive ride safety standards have been promulgated by the American Society of Testing and Materials and such standards should be evaluated by the Federal Government; and

(6) a temporary Commission to review the scope and adequacy of safety regulations and standards in the amusement ride industry could clarify the need, or lack of need, for Federal legislation regarding amusement ride safety.

(b)(1) There is established a National Commission on Amusement Ride Safety (hereinafter referred to as the "Commission").

(2) The Commission shall be composed of five members as follows:

(A) the Director of the National Bureau of Standards, who shall be chairman of the Commission;

(B) the Chairman of the Consumer Product Safety Commission (or the Chairman's designee), who shall be vice chairman of the Commission; and

(C) three members to be appointed by the President as follows:

(i) one from among State officials who administer State amusement ride safety inspection programs;

(ii) one from among professionals in the amusement ride industry who have education, training, or experience in amusement ride safety matters; and

(iii) one from among persons who represent consumers.

(3) Any vacancy in the Commission shall not affect its powers.

(4) Three members of the Commission shall constitute a quorum.

(c)(1) The Commission shall conduct a comprehensive investigation of the scope and adequacy of safety measures employed to protect the public from unreasonable risks of injury from amusement rides. Such investigation shall include a review of—

(A) Federal, State, and local laws regulating the amusement ride industry;

(B) existing voluntary comprehensive amusement ride safety standards; and

(C) self-regulation mechanisms within such industry.

(2) Such investigation shall determine for each law, standard, and self-regulation mechanism reviewed under paragraph (1)(A) through (C) of this subsection—

(A) the scope of its coverage;

(B) the effectiveness of any available sanctions or enforcement mechanisms; and

(C) the adequacy of powers to investigate violations.

In addition, the investigation shall determine the uniformity of application and quality of enforcement of the reviewed laws, standards, and self-enforcement mechanisms.

(3) As soon as practicable after the date of enactment of this Act, the Commission shall publish in the Federal Register an announcement of the investigation described in paragraph (1) of this subsection, and shall afford an opportunity for any interested persons to submit views on the subject of the investigation.

(4) The Commission may transmit to the President and to the Congress such interim reports as it considers advisable, and shall transmit its final report to the President and to the Congress not later than eighteen months after the date of enactment of this Act. The final report shall contain a detailed statement of the findings and conclusions of the Commission with respect to the adequacy of existing amusement ride safety standards and regulations, together with such recommendations for legislative, administrative, or other action as it considers appropriate.

(d)(1) The Commission may, for the purpose of carrying out this section, hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence as the Commission considers appropriate. The Commission may administer oaths or affirmations to witnesses appearing before it. In holding such hearings, the Commission, upon a vote of a quorum of its members, may—

(A) order any corporation, business, or individual to submit, within a reasonable period, such reports or answers to questions as the Commission may request, in such form and such manner as the Commission may prescribe;

(B) require by subpoena the attendance and testimony of witnesses and the production of any evidence relevant to the execution of its duties; and

(C) order any person to give testimony by deposition to any person designated by the Commission to administer oaths and to take such deposition.

(2) The Commission shall publish notice of any proposed hearing in the Federal Register and shall afford a reasonable opportunity for interested persons to present relevant testimony and data.

(3)(A) If a person issued a subpoena under paragraph (1)(B) of this subsection refuses to obey such subpoena or is guilty of contumacy, any court of the United States within the judicial district within which the hearing is conducted or within the judicial district within which such person is found or resides or transacts business may (upon application of the Commission) order such person to appear before the Commission to produce evidence or to give testimony relating to the matter under investigation. Any failure to obey such order of the court may be punished by such court as a contempt thereof.

(B) Subpoenas of the Commission shall be served in the manner provided for subpoenas of a district court under the Federal Rules of Civil Procedure for the district courts of the United States.

(4) The Commission may request from any department, agency, or independent instrumentality of the Federal Government any information it considers necessary to carry out its functions under this section. Each such department, agency, or independent instrumentality shall cooperate with the Commission and, to the extent permitted by law, shall furnish such information to the Commission.

(6) The Commission may delegate any of its functions to individual members of the Commission.

(e)(1) Members of the Commission shall serve without compensation.

(2) While away from their homes or regular places of business in the performance of services for the Commission, members of the Commission shall be reimbursed for travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons employed intermittently in the Government service.

(f)(1) The Commission may appoint and fix the compensation of a staff director who shall be paid an amount not to exceed the minimum rate of basic pay payable for level GS-15 of the General Schedule pursuant to section 5332 of title 5, United States Code.

(2) The head of any Federal agency may detail, on a reimbursable basis, any of its personnel to assist the Commission in carrying out its duties under this section.

(3) The Commission shall cease to exist upon submitting its final report required under subsection (c)(4) of this section.

INVESTIGATION OF CERTAIN ACCIDENTS

SEC. 6. (a) The National Bureau of Standards of the Department of Commerce may investigate any accident involving an amusement ride at a fixed site amusement park if—

(1) such accident caused death or serious personal injury, or could have caused death or serious personal injury;

(2) an appropriate authority of State or local government requests, in writing, that the Secretary of Commerce conduct such investigation; and

(3) the Secretary of Commerce makes a determination to conduct such an investigation.

(b) Upon conclusion of such an investigation, the National Bureau of Standards shall issue a final accident report containing its findings, conclusions, and recommendations. Such report shall include—

(1) findings of the causes of the accident, including a scientific and technological examination of the material, physical, and chemical conditions that contributed to the accident;

(2) recommendations for actions or procedures which could have prevented the accident; and

(3) recommendations for actions or procedures to prevent similar accidents.

(c) The National Bureau of Standards shall transmit a copy of any such report to—

(1) the authority of State or local government which requested such investigation; and

(2) any other appropriate person or organization, as determined by the Secretary of Commerce.

(d) Nothing in this section shall be construed to limit or affect any existing authority of the Secretary of Commerce.

(e) The provisions of section 8 of the National Bureau of Standards Authorization Act for Fiscal Year 1983 (15 U.S.C. 275b) shall not apply to any service performed pursuant to this section.

(f) The provisions of this section shall be effective until Congress enacts legislation regarding amusement ride safety in response to the report submitted by the Commission under section 5 of this Act.

Mr. DANFORTH. Mr. President, first, I would like to compliment the Senator from Illinois for his initiative and his leadership in addressing the problem of amusement park accidents. My quarrel with the Senator from Illinois is not that he is not addressing an important subject. He is. Clearly, when people are being injured and lives are being lost, we should be attentive.

The issue between us is not whether we should address this problem, but how we should address this problem.

What I have just sent to the desk is an amendment which would substitute for the Simon amendment and approach this issue in a somewhat different fashion.

The amendment that I have sent to the desk is patterned after a bill which has been introduced in the Senate with the cosponsorship of Senators GORE, BUMPERS, KASTEN and EVANS.

The thrust of the amendment that I have offered is as follows: It establishes a commission which is required to conduct an 18-month study, an investigation of the scope and adequacy of safety measures employed to protect the public from unreasonable risks of injury from amusement rides. The commission would be given the authority to hold hearings and to subpena witnesses. Interested parties would be given the authority to submit their views. At the end of the 18-month period, the commission would present a final report of its findings and recommendations to the President and Congress.

The commission would be composed of five members: the Director of the National Bureau of Standards, who would be the Chairman; the Chairman of the Consumer Product Safety Commission, who would be the Vice Chairman; and three others to be appointed by the President. The three Presidential appointees are to be State officials who administer the amusement ride safety programs, an industry safety expert, and a representative of consumer groups.

During the interim period of time, prior to an analysis by the commission as to the best approach for us to follow, the amendment would provide that the National Bureau of Standards would have authority to investigate serious accidents involving rides at fixed-site amusement parks if such an investigation is requested by the appropriate State or local authority. This authority would remain in effect until Congress enacts ride safety legislation in response to the commission's study.

Mr. President, here is the problem with the Simon amendment: right now, the Consumer Product Safety Commission has the authority to go in and inspect rides in mobile amusement parks—mobile rides. For the past 12 years, the Consumer Product Safety Commission has never, never exercised that responsibility. If the Commission has the authority with respect to mobile rides and has not used it in 12 years, what is the basis for our believing that it will use it for fixed rides?

The Consumer Product Safety Commission and the administration oppose the Simon amendment. The Consumer Product Safety Commission takes the position that it has other matters on its agenda of things that it thinks it should be doing, which it believes should take priority. It says that it does not have the manpower and it does not have the funds to undertake an inspection service for all the fixed-ride programs in the country.

Beyond the practicality, Mr. President, is the basic underlying question of how ready we in Washington should be to dispatch inspectors from a Federal agency throughout the countryside. Some of the States presently have inspection services, regulatory agencies dealing at the State level with the amusement park question.

Mr. SIMON. Will the Senator yield?

Mr. DANFORTH. I shall be happy to yield in just a minute.

Some of the States already provide this service, but how ready should we in Washington be to make the judgment right here, on the floor of the Senate, contrary to the opinion of the Consumer Product Safety Commission, that it should use some of its manpower and it should use some of its resources to provide this roving inspection service? Where possible, Mr. President, where feasible, should not our basic predisposition in Congress be that regulation should be done at the local level and at the State level if it can be effectively done at that place?

The point of the commission which would be set up for the 18-month period of time is not just a dead-letter something by yet another commission study. The point of having the commission is to determine, is this the place for the Federal Government to get into the act? Should we not wait for some expert advice before the Consumer Product Safety Commission or some other agency does this? In the meantime, the amendment that I have just sent to the desk would provide a role for the National Bureau of Standards.

Why the National Bureau of Standards? Mr. President, the Consumer Product Safety Commission has no expertise in the engineering problems dealing with amusement parks, zero. The Consumer Product Safety Commission has no personnel with the kind of expertise necessary to make the engineering analysis on what kinds of rides in amusement parks are dangerous and what are not.

The problem with amusement parks, Mr. President, is unlikely to be fixed by having amateur inspectors, badges on their shirts, combing the countryside for who knows what? The problem in the amusement parks is an engineering problem. It requires expertise to determine what the issue is and what the problem is.

Mr. President, when the Hyatt Regency collapsed in Kansas City, MO, when the skywalks in the Hyatt Regency collapsed, it was not the Consumer Product Safety Commission that was asked to go in and make the study of the engineering cause of that collapse; it was the National Bureau of Standards. The National Bureau of Standards is the place with the expertise. Those are the people who should be called in.

What we are saying is not only should the National Bureau of Standards and not the Consumer Product Safety Commission be called in; we say they should be called in at least during this interim period of time before we hear from the Commission as to what course we should follow, that they should be called in at the invitation of State and local governments. We are saying that, unless proven to the contrary, State and local governments are able to function in this area and that we in Washington should not be dispatching inspectors throughout the countryside.

How many of these fixed sites are there, I am not sure. Somebody on the floor probably has that number. But do we really want the resources of the Consumer Product Safety Commission to be used to send inspectors around to

look at the kinds of problems that probably cannot be detected by the naked eye? I doubt it.

So, Mr. President, again, I compliment the Senator from Illinois for his initiative and his interest in this area. I do think that it deserves attention, but I do not think that we in Washington should be so ready to take over something which may be best done by State and local governments. In the meantime, I think we should at least have a healthy presumption in favor of State and local governments doing the job maybe even better than the job which can be done from Washington.

Now I shall be happy either to yield the floor or yield for a question, whichever the Senator from Illinois would like.

Mr. SIMON. Mr. President, I would like to speak in opposition to the amendment.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. SIMON. Mr. President, I ask for the yeas and nays on the Danforth amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SIMON. Mr. President, with all due respect to my colleague, with whom I agree on so many issues, this is not a good amendment. Half of the speech of my colleague from Missouri almost was in favor of my amendment, because he said we ought to let State and local governments have the jurisdiction. And that is precisely what my amendment says.

Wherever State and local governments have jurisdiction, let them have it. But look at that map over there that Senator METZENBAUM is looking at right now. Those States in pink have no inspection whatsoever and parents sending their children to amusement rides in those States I believe think those rides are inspected.

Now, the Senator from Missouri offers us a commission of five people but let me point out that two of those five people are already on record as opposed to any Federal inspection or any mandated inspection whatsoever. If one of the three remaining is opposed to it, the public will get no protection whatsoever.

His amendment also says the Bureau of Standards should move in, and frankly I am not opposed to the Bureau of Standards doing it if we give them meaningful power. I tried to work out a compromise amendment with the Senator from Missouri, but we were unable to work out that amendment because I want whatever agency it is to have the authority to go in and inspect and protect the public. This amendment says they go in under two conditions: One, if there is an accident we go in afterwards, not to prevent an accident, and, No. 2, if State and local governments ask the Bureau to come.

Well, that is, with all due respect, an awfully anemic enforcement power. Probably every industry in this Nation would love to have that kind of inspection.

The amendment of the Senator from Missouri requires no report when defects are found in machines. My bill says let us have reports so that if something goes wrong in Missouri, we are going to find out about it in Ohio and Illinois and Wisconsin and Kentucky and the other States represented on this floor. Why not do this very, very simple thing that can provide protection to the public.

The Senator from Missouri says that the Consumer Product Safety Commission presently has jurisdiction over mobile rides, but they are not doing anything about it; why add this other jurisdiction?

There are two answers to that: First, mobile rides are generally inspected by State authorities, though even then, frankly, a lot of them are not safe. But the other part of this is that if people who operate rides know that they are going to be inspected, they are going to do a better job.

Let us face it. Some of these amusement parks are marginal operations financially, and so instead of doing what they should to give safety to the public, they cut corners and the public loses out.

Mr. President, I have the greatest respect for the Senator from Missouri, but this is an amendment that guts the enforcement provisions. It sets up a commission, a commission that is almost predisposed, because of its composition, to report back that the public does not need any more protection. We need another commission like we need a hole in the head. We know the facts right now. We ought to make the decision. My decision is on behalf of the people of this Nation.

I do not know of a single newspaper editorial anywhere that opposes my amendment. The consumer groups are united in support of it.

Mr. President, if you take a poll in your district, I do not care where you live—Kentucky, Wisconsin, Missouri, Ohio, anyplace else—99.9 percent of the people will want some kind of minimum inspection, and that seems to me not to be too much to ask. And again, we are not asking for a lot of Federal authority. We are saying that if any State has inspection authority, we will stay out. But if States do not do anything, the public is entitled to some kind of protection. That is not asking too much. So I urge the defeat of the Danforth amendment and the adoption of the Simon amendment.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, there are two reasons that to me are preeminent as to why the Danforth amendment should not be adopted. The first one is that I do not think it is the way to solve the problem. If we are going to deal with the issue, we ought to deal with it directly. And second, Lord save me from another commission. I cannot think of anything we need less than a new commission. Every time we have a problem we want to deal with, we appoint a commission to investigate it. I certainly believe, as the Senator from Illinois, that this commission solution is no solution; it ducks the issue.

Mr. President, I am frank to say I am disappointed that my distinguished colleague from Missouri is the author of the amendment, because by and large I see him on the side of moving toward effective Government, not excessive Government, not a waste of Government funds, and yet here he comes with a commission creation that will waste money, do nothing to provide protection, and truly does not meet squarely the issue that concerns us.

There are 200 million people who every year visit the more than 500 amusement parks located throughout the country. I have to be frank and confess there is nothing more that I enjoy than going to an amusement park and riding the rides, as old as I am. And I like to have some feeling that when I am zipping around those corners up there on one of these loop-the-loops somebody is thinking about me. I do not want to think about the fact that there is a commission that is cogitating. I would much rather have the Consumer Product Safety Commission proceed to do that which they should, and if they are not doing that which they should at the present time under the law, that is not the reason to fail to give them additional authority. It is a reason that we ought to prod them and say we expect them to follow through with the law as it is written.

Now, there is a lot of fun and excitement for children and parents alike who visit amusement parks. I am frank to say I wonder how many of those 200 million persons realize that some of the parks they are visiting are not properly checked with respect to the safety of those rides.

I cannot understand why anybody would be opposed to the Simon amendment, of which as I understand I am already a cosponsor. I wonder how many who ride those rides realize that 4 years ago the amusement park industry won an exemption from the Consumer Product Safety Commission jurisdiction. Why? We spend more time providing exemptions from the

laws or repealing decent laws than seeing to it the people of this country obtain adequate protection.

The argument at the time the exemption was provided was that the States, not the CPSC, should regulate fixed site amusement parks. Today, Mr. President, as the Senator from Illinois has so ably pointed out, there are still 26 States where amusement parks are unregulated and uninspected by any public body. More than 50 percent. My State of Ohio has a ride inspection law, and that is reassuring news for thousands of Ohioans and others who come across the country to visit Cedar Point Amusement Park in Sandusky, OH. But what if those same Ohioans travel to another State and they visit an amusement park in one of the 26 States without any such inspection laws? They cannot be reasonably assured that the rides in those parks are safe.

Why the big deal about extending the CPSC jurisdiction in this area? What possible harm can be done by doing that? If the CPSC cannot do it and if they need a few more dollars in order to provide a few more inspectors, we can do that. The budget is out of balance $200 billion. We are not going to worry about a few dollars for a few more inspectors. If that be the case, maybe we should provide for the amusement park to pay, if that is the problem. But I am not advocating that, and I am not suggesting that in my advocating the adoption of the Simon amendment and the defeat of the Danforth amendment.

Over the past decade, 33 senseless deaths have occurred by reason of unsafe rides at fixed-site amusement parks. Twelve of those deaths occurred in the last year alone.

I believe that any person who has enjoyed the excitement of a roller coaster ride—and I include myself in that group—would be shocked to know that 10,687 injuries were reported at amusement parks last year—10,687 injuries and 12 deaths in 1 year.

Do we really want this tragic situation to continue? We owe it to the children of this country to try to make the amusement park rides more safe, and we owe it to those adults who enjoy riding those park rides to see to it that they are more safe.

Some in this body would have us delay this matter, would have us study this issue for another 18 months. My distinguished colleague from Missouri wants to establish a commission. Even if the Senate decides not to adopt the Simon amendment—which I hope will not be the case—please do not saddle us with another commission. We have had enough of those in this country already.

I remember when I was many years younger and I was in the Ohio Legislature and I spoke out against too many bureaucracies, too many bureaucrats. I think we have too many commissions in this country, and I do not believe we should try to solve our problems by appointing commissions to investigate.

We know of the 12 deaths; we know of the 10,687 injuries. It is time for action. We can ill afford a delay of 18 months.

Mr. FORD. Mr. President, will the Senator yield for a question?

Mr. METZENBAUM. I yield.

Mr. FORD. When the Senator says there were 10,687 injuries last year, how many of those injuries occurred in States which have inspection laws?

Mr. METZENBAUM. I do not have the breakdown of that information, but I will be happy to supply it.

Mr. FORD. I just thought that sometimes, even though we have laws, we still have accidents in States that have the inspection laws. The Senator is painting with a broad brush, and he indicates that it is in the "red" States. It could have been in the "green" States, too.

Mr. METZENBAUM. I think the point of the Senator from Kentucky makes has validity. I am not prepared to say that all of them occurred in those States where no inspection exists. I think it is a fact that we do have accidents even where you have safety precautions. But I think we can also stipulate and agree that if you have inspections, if you do the investigations, if it is known that there are Federal Government people concerned about it—or State government people, as the case may be—there is a better chance that you are going to get an element of safety at the amusement park.

Mr. SIMON. Mr. President, will the Senator yield?

Mr. METZENBAUM. I yield.

Mr. SIMON. I thank the Senator for yielding.

This is not a direct response to the Senator from Kentucky, because I do not think anyone has that breakdown, but what we do know is that since we have taken off the Consumer Product Safety Commission authorization for inspection, the number of injuries has doubled. One may say that that is sheer coincidence. I do not believe it. I think there is a relationship, and that is why I want to see these amusement park operators know that somebody is going to stop by and inspect.

I thank the Senator for yielding.

Mr. METZENBAUM. I thank the Senator from Illinois.

If the CPSC cannot provide enough people to do the investigating, at least amusement park operators would understand, with the Simon amendment adopted, that somebody was looking over their shoulder and that a Federal inspector might walk in. I think that would be helpful and a step in the right direction. But if the amusement park operators learn, as of this afternoon's deliberations, that the Senate concluded that all we were going to do was study the issue or have a commission study the issue, I think it is a loud and clear message to them that they need not be concerned yet.

I hope the Senate turns down the creation of a commission, and I say that even if the Senate subsequently decides to turn down the Simon amendment. I believe we should turn down the commission and adopt the Simon amendment. But, under any and all circumstances, I hope we will defeat the Danforth amendment. It would be a meaningless effort, and I do not think it would send the right message out to the amusement ride industry.

Mr. FORD. Mr. President, there is one thing that is in agreement among all the parties who have spoken this afternoon, and it is that safety for the children is vital.

All of us who have spoken—the distinguished Senator from Illinois, the distinguished Senator from Ohio, and myself—represent inspection States. So, really, we are not doing anything to our States so far as imposing the Federal law or regulations on our States is concerned. We are imposing it on others. So it is very easy to stand here and say we want other States to do as we do because we are excluded from the law. That is one thing that kind of grates.

I tried very hard prior to this time to arrive at a compromise, and that was not accepted.

If my information is right, we have had this in place for 12 years before 1981; and effective from 1982 forward, it was taken out on stationary rides, not on mobile rides. That was sort of a compromise. The agreement I tried to put together was that immediately upon passage, and as soon as the Federal Bureau of Standards made their regulations, people would be available on call by the municipalities or by the Sates to come in and inspect. That puts us in the position that if x State wanted their amusement rides inspected, they had the right then to call on them. But for 12 years we have had the law, and nobody ever went anywhere to inspect. If they have not had any inspections and all of a sudden the law goes off, I think it might be circumstances that created the additional injuries. Then we would revisit this particular position from the engineering standpoint.

I think you have to look at any commission and you have to look at any program. It is only as good as its leadership. So a commission will respond, and respond appropriately and adequately and timely, if you have the right kind of leadership as it relates to the commission. If you just appoint a commission and let them go on their own, there is no telling what you will get. But I have a little more faith in

the distinguished Senator from Missouri than some others do.

I think or I believe that he will push this Commission to get the right kind of answers, at least the information for us to make a better decision than we have tonight. We are making an emotional decison rather than a realistic decision.

So we have an opportunity to put the effect the ability of the municipalities and States to call for this team to come in and inspect. But we turned that down.

There is no money appropriated in here. The money is being cut back on the Consumer Product Safety Commission. They will have less money in the next budget than they had in the last one; yet we are putting more responsibility on them and they are not going to accommodate us unless we put them in a position of having to do something.

So, Mr. President, I find myself, as the ranking minority member on this subcommittee, trying to decide which one is right. I do not fault any Senator for trying to get an amendment on a bill but I wish to have an amendment on it that meant something, that we could accomplish, that we could make a step forward as it relates to safety.

But in this instance, if we turn the Danforth amendment down and we turn the Simon amendment down, we have not done anything. If we accept it, we may have accomplished something.

But I want to take this posture, and I agree, generally, with the distinguished Senator from Ohio—no more commissions. But I found even the programs on the national level that received the most national criticism in some places where they had good local leadership the program worked. If we have good leadership for this Commission, it will work.

I believe the distinguished Senator from Missouri will make it work.

Mr. METZENBAUM. Mr. President, will the Senator from Kentucky yield for a question?

Mr. FORD. Always. I may not be able to answer it but I will always yield.

Mr. METZENBAUM. The Senator from Illinois is obviously more familiar with this subject than I. The Senator from Illinois in his remarks made the point that the commission is almost stacked going in against an effective conclusion. Would the Senator from Kentucky and possibly the Senator from Missouri consider changing some of the players which at least would be a step in the right direction? Both the Senator from Missouri and the Senator from Kentucky have bona fides. Their faith is good. Their intensions are good.

The Senator from Illinois is a respected Member of this body and if he says that he thinks that it is a stacked Commission, then would the Senator from Missouri and the Senator from Kentucky not be receptive to changing some of the players which still would not make the amendment acceptable to the Senator from Illinois but if it is going to be accepted, then at least let us get a fair shake?

Mr. FORD. Let me ask the Senator what he considers stacked? Wait just a minute now. Tell me what is stacked about this?

Mr. METZENBAUM. I am going to do this if the Senator does not mind.

Mr. FORD. Did the Senator from Ohio yield?

Mr. METZENBAUM. I am going to yield to the Senator from Illinois to respond in my behalf on that question.

Mr. SIMON. Let me tell the Senator about the stack if my colleague will listen 1 minute.

Mr. FORD. Did the Senator yield the floor or for a question?

Mr. SIMON. The Senator from Ohio yielded the floor to me.

The PRESIDING OFFICER. The Senator from Kentucky has the floor.

Mr. FORD. The Senator from Kentucky has the floor.

Mr. SIMON. I apologize.

Mr. FORD. If he yielded the floor, then I ask for the floor, and it is mine. He did not yield for a question.

Mr. METZENBAUM. I do not want to play any games with the Senator from Kentucky.

Mr. FORD. I yield to the Senator from Ohio for a question.

Mr. METZENBAUM. I will ask the question. Would the Senator from Kentucky permit the Senator from Illinois to respond to his inquiry with reference to stacking of the Commission without in any way losing his right to the floor?

Mr. FORD. The Senator from Kentucky is perfectly willing to do that and I welcome the Senator from Illinois answering the question asked by the Senator from Kentucky of the Senator from Ohio who had no answer.

Mr. METZENBAUM. I indicated originally that he is more knowledgeable than I, and I make no bones about it.

Mr. FORD. Mr. President, let me say this: The Senator was accusing the Commission of being stacked and I merely asked him to explain his accusation as to the stacking of the Commission. He did not have an answer in his saying that the Commission was stacked.

So I wish to yield to the Senator from Illinois to be sure that we understand what a stacked Commission is. And Mr. President, I yield—no, I am not going to yield the floor.

Mr. SIMON. I thank the Senator from Kentucky.

Let me point out there are different members of this Commission. One is the chairman of the Consumer Product Safety Commission who has already come out against any inspection. Then if you go to the next page, there is one from among professionals in the amusement ride industry. I say to my good friend from Kentucky, that means two of the five are already in opposition to any inspection.

I say if you have two of the five already in opposition, that comes pretty close to a stacked deck.

And I apologize for trying to take the time before. I had forgotten that the Senator from Kentucky had the floor.

Mr. FORD. That is perfectly all right.

You have one from the consumer group. Did the Senator mention that?

Mr. SIMON. We have one from the consumer group.

Mr. FORD. And one from the States.

Mr. SIMON. One from the States.

Mr. FORD. All right. And one from the Bureau of Standards.

Mr. SIMON. One from the Bureau of Standards. The administration already announced its opposition to this.

Mr. FORD. The Bureau of Standards announced the opposition.

Mr. SIMON. The administration has and I assume the Director of the Bureau of Standards is going to work for the administration.

Mr. FORD. Well, if you are going to get someone who is knowledgeable that will put these into place, I think if you just blindly pick those people for positions without knowing their personal preference, you would say that the Commission is not stacked. If we are persuasive enough, and I am sure the Senator still testify before that Commission as to how you feel about it, what would be the Senator's proposal that we change the Commission?

Mr. SIMON. This is the proposal of the Senator from Ohio and it is not mine. Frankly, I think we know the facts now. I think we can make a decision. I agree with the Senator from Kentucky that we certainly are not blindly picking a commission. We know exactly where they are going.

Mr. FORD. The only thing that I wish to submit to the Senator is we had an opportunity to put the inspection in place immediately upon the passage of this legislation, subject to the regulations developed by the Bureau of Standards. That should not take too long.

The inspection teams would be on call and be forced to respond to 23 States. They do not have to respond to 27, is that right, or 23 that now have inspections and 27 do not have inspections?

Mr. SIMON. Twenty-six.

Mr. FORD. Twenty-six. So they would immediately respond to 26

States and upon request of the municipalities in those 26 States.

Mr. SIMON. Mr. President, will the Senator yield?

Mr. FORD. I yield.

Mr. SIMON. They will respond to those 26 States after an accident.

Mr. FORD. No, no. That is not the way I understand it. They would respond for an inspection at any time the State or municipality requested it. That was what was in the compromise earlier.

The post-report of accidents was also agreed to and that is exactly what is in the Senator's amendment.

Mr. SIMON. If the Senator will yield again, on page 7 of this amendment, he will read section 6(a) on line 22: "The National Bureau of Standards of the Department of Commerce may investigate any accident involving an amusement ride," and so forth.

Mr. FORD. What I am saying is we had an opportunity prior to the introduction of this to work it out. Now the Senator has put us in the position of saying up-or-down, take it or leave it. What we are going to do is leave it and leave it up to the States to make a decision.

My State has an inspection. The Senator's State has an inspection. We are going to impose it upon 26 other States. Basically, the States of California, Texas, Florida, those along the coast where you have a lot of tourists, the overwhelming majority of vacationers, those States have inspections and they would be excluded now.

Basically, you would have the Midwestern States that would not have inspections and we would be imposing that upon those. Am I correct in that?

Mr. SIMON. If the Senator will yield, the Senator is partially correct.

Mr. FORD. That is better than I have been lately, so I am glad to be partially correct.

Mr. SIMON. If you take a look at the State of California, they are in blue, the State of Texas is in blue, the State of Florida is in blue. That means that there is some kind of a complex of inspections, partial inspections, and virtually none in one or two of the States.

But let me, if I may, also respond to the Senator's suggestion as to why I rejected the compromise that was offered to me. I have been in this legislative business a long time and I recognize you have to compromise and get ahead. But the compromise that was offered to me was a compromise that the National Bureau of Standards would not investigate unless called upon by a State or local jurisdiction. And that is what I rejected, because I want to have some Federal authority that, if there is not a State inspection law, somebody knows out there running an amusement park that a Federal official can stop by and demand an inspection. I want to see some protection for the public.

Mr. FORD. Well, I am not going to argue the point. My dog is not in this fight. Kentucky is in green, so they have a pretty good inspection. My State is taken care of, my constituents are taken care of, and if your family comes to Kentucky our rides are inspected. So I feel very comfortable about that. I worry about going to other States, but maybe they will go to States that are in green and not necessarily those in pink.

Mr. SIMON. Will the Senator yield?

Mr. FORD. I am going to yield the floor and I am going to ask for a vote if the Senator is through. I have no time. I yield the floor.

Mr. DANFORTH. Mr. President, it is my amendment. I would like to proceed for about 2 minutes, then I really think we are ready to vote.

The PRESIDING OFFICER. The Senator from Missouri is recognized.

Mr. DANFORTH. Mr. President, for the Senators who vote for the Simon-Metzenbaum amendment, the idea would be to immediately require the Consumer Product Safety Commission to dispatch inspectors throughout the country inspecting hundreds of amusement parks. Those amusement parks are not small items. They are large amusement parks. They have many rides.

The Consumer Product Safety Commission has no expertise and no personnel to do this. It simply is not going to do the job. It is authorized now to inspect mobile amusement parks. I am told I misspoke slightly before. I said that it has never used that authority in recent years. It has, I am told, on rare occasions, but very rare occasions, for mobile parks. It is not going to do this.

The Metzenbaum-Simon amendment is not going to promote safety. What we are proposing is to have the agency with the technical engineering expertise be on call to local governments to a law the local government is to at least have the say as to where they should be utilized, and for a period of 18 months have a commission established to find out what if anything else we should be doing on the Federal level. That is the difference between the two amendments. I think we are ready to vote.

Mr. SIMON. Mr. President, I will take 2 minutes, also. I simply want to mention a couple of things. Those States in green, we may be protected while we are in those States, but we go to other States, citizens of our State.

Second, the State of Illinois, when I first introduced this, had no inspection. I am pleased to say that they have now.

Finally, I would simply add, the former Chairman of the Consumer Products Safety Commission appointed by President Reagan, Nancy Steorts, has said this legislation is needed. We ought to heed her advice. We ought to protect the public. I hope we will vote "no" on the Danforth amendment.

Mr. LAUTENBERG. Mr. President, I rise to oppose the pending amendment. It would establish a study commission, instead of trying to deal effectively with a matter of public safety. The amendment would defeat the effort of my colleague from Illinois, which I support and I am pleased to cosponsor, to restore some Federal role in assuring the safety of amusement parks.

The State of New Jersey actively inspects the amusement parks and rides in my State. Yet, last year, eight teenagers lost their lives in a tragic fire at the Great Adventure theme park in the Jackson Township. In other States, there is no regulation. And the Nation reaps the grim harvest of the deregulation of amusement parks since 1981. Since deregulation, the number of accidents has doubled.

For those States that have no regulation, the Simon amendment would authorize the Consumer Product Safety Commission to inspect rides. If a State like New Jersey maintains a system for inspection, that system would not be preempted.

Yet, if there is a serious or fatal accident, the CPSC will have the authority to send investigating engineers in, to study the accident, to find the cause, and to provide those findings to the industry. If, for example, a particular ride proves defective in one State, it may well prove defective some place else.

But, more important, when citizens of my State and others travel to other parts of the country, on vacations, and go to an amusement park, their safety should be assured. If a State abdicates that role, the Federal Government should have the power to step in.

Mr. President, I urge my colleagues to oppose the pending amendment and to support the Simon amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Missouri [Mr. DANFORTH]. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SIMPSON. I announce that the Senator from Pennsylvania [Mr. HEINZ] is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Montana [Mr. BAUCUS], the Senator from New Jersey [Mr. BRADLEY], the Senator from Arkansas [Mr. BUMPERS], the Senator from Louisiana [Mr. LONG], the Senator from Arkansas [Mr. PRYOR], and the Senator from Mississippi [Mr. STENNIS] are necessarily absent.

The PRESIDING OFFICER (Mr. EVANS). Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 52, nays 41, as follows:

[Rollcall Vote No. 160 Leg.]

YEAS—52

Abdnor	Goldwater	Nickles
Andrews	Gore	Packwood
Armstrong	Gorton	Pressler
Boschwitz	Gramm	Quayle
Chafee	Grassley	Sasser
Cochran	Hatch	Simpson
D'Amato	Hawkins	Specter
Danforth	Hecht	Stafford
Denton	Helms	Stevens
Dodd	Humphrey	Symms
Dole	Kassebaum	Thurmond
Domenici	Kasten	Trible
Durenberger	Laxalt	Wallop
East	Lugar	Warner
Evans	Mattingly	Wilson
Exon	McClure	Zorinsky
Ford	McConnell	
Garn	Murkowski	

NAYS—41

Bentsen	Hart	Metzenbaum
Biden	Hatfield	Mitchell
Bingaman	Heflin	Moynihan
Boren	Hollings	Nunn
Burdick	Inouye	Pell
Byrd	Johnston	Proxmire
Chiles	Kennedy	Riegle
Cohen	Kerry	Rockefeller
Cranston	Lautenberg	Roth
DeConcini	Leahy	Rudman
Dixon	Levin	Sarbanes
Eagleton	Mathias	Simon
Glenn	Matsunaga	Weicker
Harkin	Melcher	

NOT VOTING—7

Baucus	Heinz	Stennis
Bradley	Long	
Bumpers	Pryor	

So the amendment (No. 540) was agreed to.

Mr. DANFORTH. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. FORD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. KASTEN. Mr. President, it is my understanding that the pending business is the Simon amendment.

The PRESIDING OFFICER. The Senate will be in order.

Mr. KASTEN. Mr. President, it is my understanding that the pending business is the Simon amendment, as amended by the Danforth amendment. I know of no reason for the yeas and nays on our side.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 539), as amended, was agreed to.

Mr. KASTEN. Mr. President, I move to reconsider the vote by which the amendment, as amended, was agreed to.

Mr. DANFORTH. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. KASTEN. Mr. President, I know of no reason for the yeas and nays on final passage. I believe we can proceed to a voice vote.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time the question before the Senate is, Shall the bill pass?

The bill (S. 1077), as amended, was passed, as follows:

S. 1077

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—CONSUMER PRODUCT SAFETY COMMISSION AUTHORIZATION

SEC. 101. This Act may be cited as the "Consumer Product Safety Commission Authorization Act of 1985".

DISCLOSURE TO CONTRACTORS

SEC. 102. Section 6(a)(8)) of the Consumer Product Safety Act (15 U.S.C. 2055(a)(8)) is amended by striking "or employees" and inserting in lieu thereof ", employees or representatives of the Commission (including contractors)".

CHRONIC HAZARD ADVISORY PANEL

SEC. 103. Section 28(b)(1) of the Consumer Product Safety Act (15 U.S.C. 2077(b)(1)) is amended by inserting "that may be the subject of the Panel's investigation" immediately after "product".

AUTHORIZATION OF APPROPRIATIONS

SEC. 104. Section 32(a) of the Consumer Product Safety Act (15 U.S.C. 2081(a)) is amended—

(1) by striking "and" at the end of paragraph (8);

(2) by striking the period at the end of paragraph (9) and inserting in lieu thereof a semicolon; and

(3) by inserting immediately after paragraph (9) the following:

"(10) $35,000,000 for the fiscal year ending September 30, 1986; and

"(11) $35,000,000 for the fiscal year ending September 30, 1987.".

TITLE II—AMUSEMENT RIDE SAFETY

NATIONAL COMMISSION ON AMUSEMENT RIDE SAFETY

SEC. 201. (a) The Congress finds that—

(1) the occurrence of amusement ride accidents in recent years has prompted inquiry into the necessity and desirability of Federal legislation to regulate the amusement ride industry;

(2) the regulation of such rides has traditionally been the responsibility of State and local governments and of the amusement ride industry;

(3) it is uncertain whether any Federal agency has sufficient resources or expertise to regulate the amusement ride industry;

(4) Federal involvement in the inspection and regulation of amusement rides could be costly and inefficient;

(5) voluntary comprehensive ride safety standards have been promulgated by the American Society of Testing and Materials and such standards should be evaluated by the Federal Government; and

(6) a temporary Commission to review the scope and adequacy of safety regulations and standards in the amusement ride industry could clarify the need, or lack of need, for Federal legislation regarding amusement ride safety.

(b)(1) There is established a National Commission on Amusement Ride Safety (hereinafter referred to as the "Commission").

(2) The Commission shall be composed of five members as follows:

(A) the Director of the National Bureau of Standards, who shall be chairman of the Commission;

(B) the Chairman of the Consumer Product Safety Commission (or the Chairman's designee), who shall be vice chairman of the Commission; and

(C) three members to be appointed by the President as follows:

(i) one from among State officials who administer State amusement ride safety inspection programs;

(ii) one from among professionals in the amusement ride industry who have education, training, or experience in amusement ride safety matters; and

(iii) one from among persons who represent consumers.

(3) Any vacancy in the Commission shall not affect its powers.

(4) Three members of the Commission shall constitute a quorum.

(c)(1) The Commission shall conduct a comprehensive investigation of the scope and adequacy of safety measures employed to protect the public from unreasonable risks of injury from amusement rides. Such investigation shall include a review of—

(A) Federal, State, and local laws regulating the amusement ride industry;

(B) existing voluntary comprehensive amusement ride safety standards; and

(C) self-regulation mechanisms within such industry.

(2) Such investigation shall determine for each law, standard, and self-regulation mechanism reviewed under paragraph (1) (A) through (C) of this subsection—

(A) the scope of its coverage;

(B) the effectiveness of any available sanctions or enforcement mechanisms; and

(C) the adequacy of powers to investigate violations.

In addition, the investigation shall determine the uniformity of application and quality of enforcement of the reviewed laws, standards, and self-enforcement mechanisms.

(3) As soon as practicable after the date of enactment of this title, the Commission shall publish in the Federal Register an announcement of the investigation described in paragraph (1) of this subsection, and shall afford an opportunity for any interested persons to submit views on the subject of the investigation.

(4) The Commission may transmit to the President and to the Congress such interim reports as it considers advisable, and shall transmit its final report to the President and to the Congress not later than eighteen months after the date of enactment of this title. The final report shall contain a detailed statement of the findings and conclusions of the Commission with respect to the adequacy of existing amusement ride safety standards and regulations, together with such recommendations for legislative, administrative, or other action as it considers appropriate.

(d)(1) The Commission may, for the purpose of carrying out this section, hold such hearings, sit and act at such times and

places, take such testimony, and receive such evidence as the Commission considers appropriate. The Commission may administer oaths or affirmations to witnesses appearing before it. In holding such hearings, the Commission, upon a vote of a quorum of its members, may—

(A) order any corporation, business, or individual to submit, within a reasonable period, such reports or answers to questions as the Commission may request, in such form and such manner as the Commission may prescribe;

(B) require by subpoena the attendance and testimony of witneses and the production of any evidence relevant to the execution of its duties; and

(C) order any person to give testimony by deposition to any person designated by the Commission to administer oaths and to take such deposition.

(2) The Commission shall publish notice of any proposed hearing in the Federal Register and shall afford a reasonable opportunity for interested persons to present relevant testimony and data.

(3)(A) If a person issued a subpoena under paragraph (1)(B) of this subsection refuses to obey such subpoena or is guilty of contumacy, any court of the United States within the judicial district within which the hearing is conducted or within the judicial district within which such person is found or resides or transacts business may (upon application of the Commission) order such person to appear before the Commission to produce evidence or to give testimony relating to the matter under investigation. Any failure to obey such order of the court may be punished by such court as a contempt thereof.

(B) Subpoenas of the Commission shall be served in the manner provided for subpoenas of a district court under the Federal Rules of Civil Procedure for the district courts of the United States.

(4) The Commission may pay witnesses the same fees and travel expenses as are paid in like circumstances in the courts of the United States.

(5) The Commission may request from any department, agency, or independent instrumentality of the Federal Government any information it considers necessary to carry out its functions under this section. Each such department, agency, or independent instrumentality shall cooperate with the Commission and, to the extent permitted by law, shall furnish such information to the Commission.

(6) The Commission may delegate any of its functions to individual members of the Commission.

(e)(1) Members of the Commission shall serve without compensation.

(2) While away from their homes or regular places of business in the performance of services for the Commission, members of the Commission shall be reimbursed for travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons employed intermittently in the Government service.

(f)(1) The Commission may appoint and fix the compensation of a staff director who shall be paid an amount not to exceed the minimum rate of basic pay payable for level GS-15 of the General Schedule pursuant to section 5332 of title 5, United States Code.

(2) The head of any Federal agency may detail, on a reimbursable basis, any of its personnel to assist the Commission in carrying out its duties under this section.

(3) The Commission shall cease to exist upon submitting its final report required under subsection (c)(4) of this section.

INVESTIGATION OF CERTAIN ACCIDENTS

SEC. 202. (a) The National Bureau of Standards of the Department of Commerce may investigate any accident involving an amusement ride at a fixed site amusement park if—

(1) such accident caused death or serious personal injury, or could have caused death or serious personal injury;

(2) an appropriate authority of State or local government requests, in writing, that the Secretary of Commerce conduct such an investigation; and

(3) the Secretary of Commerce makes a determination to conduct such an investigation.

(b) Upon conclusion of such an investigation, the National Bureau of Standards shall issue a final accident report containing its findings, conclusions, and recommendations. Such report shall include—

(1) findings of the causes of the accident, including a scientific and technological examination of the material, physical, and chemical conditions that contributed to the accident;

(2) recommendations for actions or procedures which could have prevented the accident; and

(3) recommendations for actions or procedures to prevent similar accidents.

(c) The National Bureau of Standards shall transmit a copy of any such report to—

(1) the authority of State or local government which requested such investigation; and

(2) any other appropriate person or organization, as determined by the Secretary of Commerce.

(d) Nothing in this section shall be construed to limit or affect any existing authority of the Secretary of Commerce.

(e) The provisions of section 8 of the National Bureau of Standards Authorization Act for Fiscal Year 1983 (15 U.S.C. 275b) shall not apply to any service performed pursuant to this section.

(f) The provisions of this section shall be effective until Congress enacts legislation regarding amusement ride safety in response to the report submitted by the Commission under section 201 of this title.

Mr. FORD. I move to reconsider the vote by which the bill passed, Mr. President.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I thank the distinguished managers of the bill [Mr. FORD and Mr. KASTEN] for their expeditious handling of that legislation. I also thank the distinguished Senator from Iowa [Mr. GRASSLEY] and the distinguished Senator from Michigan [Mr. LEVIN] for helping us work out this particular piece of legislation. They did give up a right they had to amend this bill. We will bring up the FTC authorization bill tomorrow and hope they will have an opportunity to present or offer their amendment on legislative veto.

SCHEDULE

Mr. BYRD. Mr. President, if I could ask the majority leader at this point, I would like to ask what the schedule will be for tomorrow, Friday, and as far ahead as he can tell.

The PRESIDING OFFICER. Will the Senate please be in order?

The majority leader.

Mr. DOLE. Mr. President, in response to the distinguished minority leader, we will come in at 10 o'clock tomorrow morning because there are eight special orders on this side.

Following the special orders and allowing some period of time for routine morning business, we hope to get consent to take up the FTC authorization bill. If not, we will move, if possible, to take it up and, if there is real objection, we will have to do something else.

Following that, it is our intention to take up the compact of free association bill, which a number of Members have indicated should be passed before the August recess. The distinguished chairman of the Energy Committee has been working on that measure with members on each side who had some problems. But I would hope we could take that bill up tomorrow.

If we complete action on those two bills, we also have a couple of veterans bills that I understand we may be able to dispose of on tomorrow.

We also have the Conservation Service Reform Act—we believe we can take care of that in wrapup if we can work out one additional problem—and the airport security legislation if the 3-day rule can be waived.

This may seem like a rather long list, but I think maybe three of those we can do in wrapup. If we can dispose of all these tomorrow, then we would not be in on Friday. I could probably give the distinguished Democratic leader a better idea about noon tomorrow.

Next week, it is my hope—I am not certain it is shared by many—that we will have the efforts of the distinguished chairman of the Senate Committee on Agriculture and others on the floor; it is called the farm bill. It is really about 15 different bills, all major bills, wrapped up into one. We have had some difficulty getting it all together. But I hope we will be in a position to take that up, plus two appropriations bills.

I have been asked about genocide. I have been asked about a lot of things. But this is one of the specific things I have been asked about.

The President said he would like to get the farm bill passed, the supplemental appropriations bill, and the defense authorization conference report.

Mr. GOLDWATER. Maybe tomorrow, Mr. President—maybe.

Mr. DOLE. That is about all we will have next week.

Mr. BYRD. Mr. President, I thank the distinguished majority leader.

Mr. DOLE. We would like to get an agreement on the Japanese trade bill. I understand there are a number of Members who would like to offer nongermane amendments. I hope we can take that bill up.

There will be no more votes tonight.

Mr. HELMS. Mr. President, could the Senator give me an idea of about how long we will be able to work on the farm bill tomorrow?

Mr. BYRD. Mr. President, the Senate is not in order.

The PRESIDING OFFICER. The Senate will be in order.

Mr. DOLE. Mr. President, the question of the distinguished chairman of the Agriculture Committee——

Mr. BYRD. Mr. President, there is more noise now than there was when I first asked for order.

The PRESIDING OFFICER. The Senate will be in order.

Mr. DOLE. Mr. President, the question from the distinguished chairman of the Agriculture Committee is very relevant. It is a question of how long we will be able to meet tomorrow to, hopefully, wrap up the agriculture bill from the Senate Agriculture Committee. I indicate that we would like to be able to meet tomorrow afternoon, say, from 2:30 until 5 o'clock or longer.

Mr. HELMS. We would like to meet, frankly, Mr. Leader, while the Senate is in session. I think we could wrap up this bill in a reasonable length of time.

Let me point out that there are over 2,500 provisions in this bill, all of which are debatable and have been debated in the committee over and over again. We have made remarkable progress. We have precisely three titles now out of about 22, as I recall, yet to go. Obviously, one of them is the commodities title.

The distinguished Senator from Kansas and the distinguished Senator from Nebraska [Mr. ZORINSKY] have a proposal which the committee has considered and that is subject to amendment. If we could have time to hear these amendments and vote on them tomorrow, I believe we could complete that; then we will have the food stamp title, and so forth.

Mr. DOLE. Mr. President, let me indicate to the distinguished chairman of the committee that I shall work with the distinguished minority leader tomorrow to see if we can have consent throughout the day. Otherwise, it will terminate at—what, noon?

Mr. HELMS. About noon. If the majority leader will yield to me, would he be willing to propound a unanimous-consent request now for the meeting of the Agriculture Committee?

UNANIMOUS-CONSENT REQUEST FOR COMMITTEE ON AGRICULTURE TO MEET TOMORROW

Mr. DOLE. Mr. President, if the distinguished minority leader would entertain or could advise me, I would like to ask unanimous consent at this time that the Senate Committee on Agriculture be permitted to meet tomorrow afternoon from 2 o'clock until an undesignated time while the Senate is in session.

Mr. BYRD. Mr. President, I shall, of course, have to run the phone on that. If the distinguished chairman of the committee could indicate a precise time period, I might stand a better chance.

Mr. DOLE. Two to six would probably see us through.

Mr. HELMS. Two to six would be very helpful.

Mr. BYRD. I shall be glad to run that out and advise the majority leader in the morning, if I may.

Mr. DOLE. Fine. If we could find out early in the morning, Mr. President, say after we come in at 10 o'clock.

Mr. BYRD. I thank the majority leader.

Mr. HELMS. I thank both leaders.

Mr. FORD. Mr. President, if the majority leader will yield for a quick question, if we come in tomorrow and get through the orders and he has no problem and he moves to bring up the Federal Trade Commission legislation, approximately at what time does he expect that to occur?

Mr. DOLE. It will probably be about 12:30.

Mr. FORD. That is fine. I thank the distinguished majority leader.

Mr. DOLE. It will be after the period of routine morning business.

EXTENSION OF JOINT REFERRAL OF S. 1271

Mr. DOLE. Mr. President, I ask unanimous consent that the joint referral request of June 11, 1985, with respect to S. 1271, the intelligence authorization bill, be extended under the same terms and conditions, until September 11, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

INTERNATIONAL SECURITY AND DEVELOPMENT COOPERATION ACT

Mr. DOLE. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on S. 960.

The legislative clerk laid before the Senate the amendment of the House of Representatives to the bill (S. 960) to amend the Foreign Assistance Act of 1961, the Arms Export Control Act, and other acts to authorize appropriations for the fiscal year 1986 for international security and development assistance, the Peace Corps, the Inter-American Foundation, and the African Development Foundation, and for other purposes.

(The amendment of the House is printed in part II of the RECORD of July 11, 1985 beginning at page 18642.)

Mr. DOLE. Mr. President, I move the Senate disagree to the House amendments and agree to the conference requested by the House and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to, and the Presiding Officer [Mr. EVANS] appointed Mr. LUGAR, Mr. HELMS, Mr. MATHIAS, Mrs. KASSEBAUM, Mr. BOSCHWITZ, Mr. PELL, Mr. BIDEN, Mr. SARBANES, and Mr. CRANSTON;

As additional conferees, solely for subtitle II of title IV of the House bill, dealing with airport security: Mr. DANFORTH, Mrs. KASSEBAUM, Mr. GOLDWATER, Mr. HOLLINGS, and Mr. EXON;

For title IX of the House bill, dealing with food and agriculture issues: Mr. HELMS, Mr. LUGAR, and Mr. ZORINSKY conferees on the part of the Senate.

PUBLIC BUILDINGS SERVICE AUTHORIZATION ACT, FISCAL YEAR 1986

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate now turn to Calendar No. 149, S. 1030, Public Buildings Authorization Act of 1986.

The PRESIDING OFFICER. Without objection, it is so ordered. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 1030) to authorize appropriations for the Public Buildings Service of the General Services Administration for fiscal year 1986.

There being no objection, the Senate proceeded to consider the bill to authorize appropriations for the Public Buildings Service of the General Services Administration for fiscal year 1986, which had been reported from the Committee on Environment and Public Works, with amendments, as follows:

(The parts of the bill intended to be stricken are shown in boldface brackets, and the parts of the bill intended to be inserted are shown in italics.)

S. 1030

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Public Buildings Authorization Act of 1985".

SEC. 2. No appropriation, including any appropriation from the fund established pursuant to section 210(f) of the Federal Property and Administrative Services Act of 1949, shall be made by Congress or obligated by the Administrator unless it has been authorized by Congress in accordance with this Act.

SEC. 3. (a) No public building construction, renovation, repair, or alteration shall be [commended] *commenced* unless an appropriation has first been made in the same fiscal year for which such appropriation is authorized and for the estimated cost of completion of such construction, renovation, repair, or alteration.

(b) Beginning in fiscal year 1987, no lease shall be entered into unless the authority to enter into contracts has first been made for the maximum cost of such lease over the entire term in such amounts as are specified in annual appropriations Acts and in the fiscal year for which such lease is authorized.

SEC. 4. There is hereby authorized to be appropriated for fiscal year 1986 not to exceed in the aggregate the amount of [$2,351,313,000] *$2,397,924,000* from revenues and collections deposited into the fund pursuant to section 210(f) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 490(f)), for the real property management and related activities of the Public Buildings Service of which:

CONSTRUCTION

(a) Not to exceed [$198,444,000] *$243,419,000* shall be available for fiscal year 1986 as follows:

(1) For construction of public buildings (including funds for sites) at the following locations and maximum construction costs:

California, Los Angeles, Federal Building, Courthouse and Parking Facility	$137,198,000
Idaho, Eastport, Border Station	2,147,000
Missouri, Overland, National Personnel Records Center Extension	48,932,000
New Jersey, Newark, Federal Building	*44,975,000*
Washington, Seattle, Laboratory	9,767,000

(2) $400,000 for construction of public buildings of less than ten thousand gross square feet of space.

RENOVATIONS, ALTERATIONS, AND REPAIRS

(b) Not to exceed $264,096,000 shall be available for fiscal year 1986 as follows:

(1) For renovations, alterations, and repairs of public buildings at the following locations and at the following maximum project costs of $1,000,000 or more:

California, Hawthorne, Federal Building	$2,383,000
California, Los Angeles, Courthouse	2,570,000
Colorado, Denver, Federal Building and Customshouse	8,540,000
District of Columbia, General Accounting Office	16,200,000
District of Columbia, ICC Customs	2,262,000
District of Columbia, Steam Distribution System	13,796,000
District of Columbia, Pension Building	16,700,000
Illinois, Chicago, Kluczynski Federal Building	4,152,000
Illinois, Peoria, Federal Building	1,041,000
Indiana, Ft. Wayne, Post Office, Courthouse	5,275,000
Kentucky, Louisville, Post Office, Courthouse	5,518,000
Kansas, Wichita, Courthouse	4,840,000
Louisiana, Lafayette, Federal Building, Courthouse	2,083,000
Michigan, Detroit, McNamara Federal Building	7,600,000
Missouri, Kansas City, Federal Building	6,569,000
New Hampshire, Manchester, Post Office, Courthouse	1,988,000
New York, Utica, Federal Building, Courthouse	1,764,000
Ohio, Cleveland, Celebrezze Federal Building	6,507,000
Oklahoma, Oklahoma City, Federal Building, Courthouse	2,416,000
Pennsylvania, Scranton, Post Office, Courthouse	3,863,000
Puerto Rico, Hato Rey, Federal Building, Courthouse	1,683,000
Texas, Dallas, Cabell Federal Building, Courthouse	3,943,000
Texas, Dallas, Terminal Annex	4,600,000
Texas, Forth Worth, Warehouse Number 1	1,986,000
Texas, San Antonio, Post Office, Courthouse	6,078,000
Virginia, Richmond, Federal Building	1,125,000

(2) $119,114,000 for renovations and repairs of public buildings at project costs of less than $1,000,000;

(3) $9,500,000 for alterations of leased buildings, the maximum cost for a single building being less than $250,000

DESIGN AND CONSTRUCTION SERVICES

(c) Notwithstanding the provisions of section 3(a) of this Act, not to exceed [$122,514,000] *$124,150,000* shall be available for design and construction services as follows:

(1) $11,984,000 for prior years project to construct public buildings;

(2) $5,915,000 for prior years repair and alteration projects;

(3) $28,737,000 for repair and alteration projects whose maximum costs of construction do not exceed $1,000,000;

(4) $9,300,000 for technical services;

(5) $3,188,000 for transfer of personnel costs from Program Direction;

(6) For design of public buildings to be constructed at the following locations and maximum design costs:

California, Los Angeles, Federal Building, Parking Facility	$12,848,000
California, San Francisco Bay Area Federal Building	5,000,000
Idaho, Eastport, Border Station	326,000
Missouri, Overland, National Personnel Records Center Extension	5,365,000
New Jersey, Newark, Federal Building	*1,636,000*
Washington, Seattle, Laboratory	1,278,000
Small Projects	96,000

(7) For design of repair and alteration projects whose construction phase is authorized to commence in fiscal year 1986 at the following locations and maximum design costs:

California, Hawthorne, Federal Building	$245,000
California, Los Angeles, Courthouse	180,000
Colorado, Denver, Federal Building, Customshouse	470,000
District of Columbia, General Accounting Office Building	891,000
District of Columbia, ICC Customs	158,000
District of Columbia, Pension Building	918,000
District of Columbia, Steam Distribution Plant	759,000
Illinois, Chicago, Kluczynski Federal Building	291,000
Illinois, Peoria, Federal Building, Courthouse	73,000
Indiana, Fort Wayne, Post Office, Courthouse	290,000
Kentucky, Louisville, Post Office, Courthouse	420,000
Kansas, Wichita, Courthouse	339,000
Louisiana, Lafayette, Federal Building, Courthouse	175,000
Michigan, Detroit, McNamara Federal Building	418,000
Missouri, Kansas City, Federal Building	361,000
New Hampshire, Manchester, Post Office, Courthouse	139,000
New York, Utica, Federal Building, Courthouse	166,000
Ohio, Cieveland, Celebrezze Federal Building	358,000
Oklahoma, Oklahoma City, Post Office, Courthouse	169,000
Pennsylvania, Scranton, Post Office, Courthouse	270,000
Puerto Rico, Hato Rey, Federal Building, Courthouse	118,000
Texas, Dallas, Cabell Federal Building, Courthouse	277,000
Texas, Dallas, Terminal Annex	828,000
Texas, Fort Worth, Warehouse Number 1	139,000
Texas, San Antonio, Post Office, Courthouse	334,000
Virginia, Richmond, Federal Building	194,000

(8) For design of additional repair and alteration projects at the following locations and maximum projects costs:

Arkansas, Juneau, Post Office, Courthouse	$371,000
Alabama, Birmingham, Federal Building, Courthouse	429,000
Arizona, Phoenix, Federal Building, Courthouse	88,000
California, Los Angeles, Federal Building	1,064,000
California, Pasadena, Federal Building, Courthouse	433,000
California, San Diego, Federal Building, Courthouse	88,000
California, San Francisco, Federal Building, Courthouse	3,652,000
Colorado, Denver, Denver Federal Building, Courthouse	1,318,000
Colorado, Denver, Denver Federal Center	352,000

Connecticut, Bridgeport, Federal Office Building, Courthouse	208,000
District of Columbia, Federal Office Building, New Post Office	187,000
District of Columbia, State Department	754,000
Florida, Jacksonville, Federal Building	549,000
Florida, Miami, Federal Building	676,000
Illinois, Chicago, Customhouse	99,000
Illinois, Chicago, Railroad Retirement Building	442,000
Illinois, East St. Louis, Post Office, Courthouse	359,000
Massachusetts, Boston, JFK Federal Building	2,154,000
North Carolina, Raleigh, Federal Building, Courthouse	434,000
New Jersey, Newark, Rodino Federal Building	1,371,000
New Jersey, Trenton, Post Office, Courthouse	357,000
New York, Brooklyn, Cellar Federal Building	1,054,000
New York, Brooklyn, Federal Building Number 2	766,000
New York, Buffalo, Federal Building	1,149,000
New York, New York, 201 Varick Street, Federal Building	1,161,000
New York, New York, 26 Federal Plaza	4,719,000
New York, New York, Foley Square Courthouse	797,000
Pennsylvania, Philadelphia, Federal Building, Post Office	893,000
South Carolina, Charleston, Rivers Federal Building	215,000
Texas, Dallas, Federal Building	176,000
Virginia, Arlington, Federal Building Number 2	635,000
Virginia, Arlington, Pentagon	1,743,000
Washington, Spokane, Federal Building, Post Office	496,000
Wisconsin, Milwaukee, Federal Building, Courthouse	308,000

LEASING

(d) Not to exceed $866,000,000 shall be available for fiscal year 1986 as follows:

(1) $18,998,000 for rental increases due to lease expirations, and

(2) $847,002,000 for payments in fiscal year 1986 to provide for space under lease prior to fiscal year 1986, including increases in operating costs and taxes.

REAL PROPERTY OPERATIONS

(e) Not to exceed $709,678,000 shall be available for fiscal year 1986 real property operation.

PROGRAM DIRECTION

(f) Not to exceed $55,481,000 shall be available for fiscal year 1986 program direction.

PURCHASE CONTRACTS

(g) Not to exceed $135,100,000 shall be available for fiscal year 1986 for payment of principal, interest, taxes, and any other obligation for public buildings acquired by purchase contract.

SEC. 5. (a) Funds appropriated under section 4 of the Act for construction, renovation, repair, or alteration shall remain available for obligation and expenditure without regard to fiscal year limitations: *Provided*, That construction, renovation, repair, or alteration has commenced in the same fiscal year which funds are made available.

(b) Commencement of design using funds authorized pursuant to section 4(c) of this Act for projects authorized by sections 4(a) and 4(b) shall be regarded as complying with the provisions of subsection (a) of this section.

SEC. 6. Ten per centum of the funds made available pursuant to this Act to the Public Buildings Service for renovation, alteration, and repair of public buildings and for payment of leases on buildings shall be available for repair or alteration projects and leases, respectively, not otherwise authorized by this Act, if the Administrator certifies that the space to be repaired, altered, or leased resulted from emergency building conditions or changing or additional programs of Federal agencies. Funds for such projects may not be obligated until thirty days after the submission by the Administrator of an explanatory statement to the Committee on Environment and Public Works of the Senate and the Committee on Public Works and Transportation of the House of Representatives. The explanatory statement shall, among other things, include a statement of the reasons why such project or lease cannot be deferred for authorization in the next succeeding fiscal year.

The amendments were agreed to.

AMENDMENT NO. 541

(Purpose: To provide design funds for renovation of the Mart Federal Building, St. Louis, Missouri.)

Mr. DOLE. Mr. President, I send an amendment to the desk on behalf of Senator STAFFORD and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Kansas [Mr. DOLE], for Mr. STAFFORD, proposes an amendment numbered 541.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, line 19 strike "$2,397,924,000" and insert in lieu thereof "$2,401,868,000".

On page 4, line 9 strike "$124,150,000" and insert in lieu there "$128,094,000".

On page 6, insert in alphabetical order in the list: "Missouri, St. Louis, Mart Federal Building $3,944,000".

Mr. STAFFORD. Mr. President, my amendment would add $3,944,000 to S. 1030 for the design of renovations to the Mart Federal Building in St. Louis, MO.

Although the Mart Building is structurally sound, only 34 percent of its space is occupied because office space is substandard and mechanical, electrical, and fire safety systems are inadequate. Renovation would permit almost full utilization of this government-owned building. It would allow the General Services Administration to cancel existing leases in St. Louis with cost in excess of $4.5 million a year.

Originally constructed in 1931 as a merchandise mart, this building was purchased by the Federal Government in 1960. Its primary 10 stories provide a gross area in excess of 1 million square feet.

Mr. President, I commend my amendment to the Senate. It would provide for efficient utilization of a substantial Federal building, and it would reduce leasing costs in the St. Louis area.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 541) was agreed to.

Mr. STAFFORD. Mr. President, S. 1030 provides authorizations of appropriations for fiscal year 1986 to the Public Buildings Service of the General Services Administration.

The aggregate authorization level of $2.4 billion represents about a 6-percent increase over the fiscal year 1985 program, but there are substantial differences in program emphasis. For example, the construction program is increased by more than 100 percent while operating accounts—such as utilities, cleaning, guards, administration, and lease payments—are reduced.

The 1986 construction program of $243.4 million is comprised of five projects. In Los Angeles and Newark, new buildings would provide expansion space for the U.S. courts and general purpose office space to reduce leasing requirements. The other three construction projects—Eastport, ID; Seattle, WA; and Overland, MO—would provide special purpose space for a border station, laboratory, and national personnel records storage, respectively.

The repair and alteration activity—which is the other major capital account of the Public Buildings Service—is increased about 20 percent over its 1985 level. The total authorization of $264 million places emphasis on first, basic repair work necessary to prevent deterioration and ensure operational continuity; second, health and safety improvements—particularly firesafety in high-rise buildings and asbestos removal and encapsulation; and third, conversion of Government-owned, vacant space to alleviate lease requirements. Authorizations for funding are also provided for construction of new courtrooms in existing buildings, and—in the case of the Pension Building in Washington—historic preservation.

The authorization contained in the bill for leasing is 6 percent less than the funding level provided for the current fiscal year. This reduction represents a reversal of the trend of ever in-

creasing lease costs. The leasing budget has swelled by almost a thousand percent over about the last 20 years, to a figure approaching $1 billion a year. The consequence, of course, has been an ever escalating leasing budget with obvious benefit to the real estate industry but with only a stack of "rent stubs" for the Government.

In recent years, the Committee on Environment and Public Works has expressed concern about the increasing reliance on leasing as a means of meeting the Government's space needs. GSA has now embarked on several programs to reduce dependence on the leasing market. Some have met with limited success, but hopefully improvements will follow. Through the increase in the capital budget to provide more Government-owned space, direct leasing costs can be reduced in the long run. GSA's program to reduce the average number of square feet per employee should also limit leasing requirements over time.

Mr. President, GSA activities are sometimes regarded as routine, housekeeping functions. In fact, the Public Buildings Service controls 224 million square feet of space which is used to provide office and other work space for 883,000 Federal employees. To discharge the manifold responsibilities associated with this vast real estate inventory and large client population, PBS expends annually almost $2.5 billion. The committee is cognizant of size and importance of the Public Buildings Service and takes seriously its oversight and authorizing responsibilities. Government-owned buildings under GSA's charge must be maintained and when necessary repaired so that their value as Federal assets is preserved and so that the work in them can be conducted efficiently and with safety. Leased buildings must be obtained through cost-effective arrangements and lessors held accountable to the terms of their contracts.

Mr. President, a detailed presentation of the public buildings program and the projects proposed for fiscal year 1986 can be found in the Senate Report 99-68, which accompanies the bill. I commend the bill to my colleagues.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill, S. 1030, as amended, was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 1030

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Public Buildings Authorization Act of 1985".

SEC. 2. No appropriation, including any appropriation from the fund established pursuant to section 210(f) of the Federal Property and Administrative Services Act of 1949, shall be made by Congress or obligated by the Administrator unless it has been authorized by Congress in accordance with this Act.

SEC. 3. (a) No public building construction, renovation, repair, or alteration shall be commenced unless an appropriation has first been made in the same fiscal year for which such appropriation is authorized and for the estimated cost of completion of such construction, renovation, repair, or alteration.

(b) Beginning in fiscal year 1987, no lease shall be entered into unless the authority to enter into contracts has first been made for the maximum cost of such lease over the entire term in such amounts as are specified in annual appropriations Acts and in the fiscal year for which such lease is authorized.

SEC. 4. There is hereby authorized to be appropriated for fiscal year 1986 not to exceed in the aggregate the amount of $2,401,868,000 from revenues and collections deposited into the fund pursuant to section 210(f) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 490(f)), for the real property management and related activities of the Public Buildings Service of which:

CONSTRUCTION

(a) Not to exceed $243,419,000 shall be available for fiscal year 1986 as follows:

(1) For construction of public buildings (including funds for sites) at the following locations and maximum construction costs:

California, Los Angeles, Federal Building, Courthouse and Parking Facility	$137,198,000
Idaho, Eastport, Border Station	2,147,000
Missouri, Overland, National Personnel Records Center Extension	48,932,000
New Jersey, Newark, Federal Building	44,975,000
Washington, Seattle, Laboratory	9,767,000

(2) $400,000 for construction of public buildings of less than ten thousand gross square feet of space.

RENOVATIONS, ALTERNATIONS, AND REPAIRS

(b) Not to exceed $264,096,000 shall be available for fiscal year 1986 as follows:

(1) For renovations, alternations, and repairs of public buildings at the following locations and at the following maximum project costs of $1,000,000 or more:

California, Hawthrone, Federal Building	$2,383,000
California, Los Angeles, Courthouse	2,570,000
Colorado, Denver, Federal Building and Customshouse	8,540,000
District of Columbia, General Accounting Office	16,200,000
District of Columbia, ICC Customs	2,262,000
District of Columbia, Steam Distribution System	13,796,000
District of Columbia, Pension Building	16,700,000
Illinois, Chicago, Kluczynski Federal Building	4,152,000
Illinois, Peoria, Federal Building	1,041,000
Indiana, Ft. Wayne, Post Office, Courthouse	5,275,000
Kentucky, Louisville, Post Office, Courthouse	5,518,000
Kansas, Wichita, Courthouse	4,840,000
Louisiana, Lafayette, Federal Building, Courthouse	2,083,000
Michigan, Detroit, McNamara Federal Building	7,600,000
Missouri, Kansas City, Federal Building	6,569,000
New Hampshire, Manchester, Post Office, Courthouse	1,988,000
New York, Utica, Federal Building, Courthouse	1,764,000
Ohio, Cleveland, Celebrezze Federal Building	6,507,000
Oklahoma, Oklahoma City, Federal Building, Courthouse	2,416,000
Pennsylvania, Scranton, Post Office, Courthouse	3,863,000
Puerto Rico, Hato Rey, Federal Building, Courthouse	1,683,000
Texas, Dallas, Cabell Federal Building, Courthouse	3,943,000
Texas, Dallas, Terminal Annex	4,600,000
Texas, Fort Worth, Warehouse Number 1	1,986,000
Texas, San Antonio, Post Office, Courthouse	6,078,000
Virginia, Richmond, Federal Building	1,125,000

(2) $119,114,000 for renovations and repairs of public buildings at project costs of less than $1,000,000;

(3) $9,500,000 for alternations of leased buildings, the maximum cost for a single building being less than $250,000.

DESIGN AND CONSTRUCTION SERVICES

(c) Notwithstanding the provisions of section 3(a) of this Act, not to exceed $128,094,000 shall be available for design and construction services as follows:

(1) $11,984,000 for prior years project to construct public buildings;

(2) $5,915,000 for prior years repair and alteration projects;

(3) $28,737,000 for repair and alternation projects whose maximum costs of construction do not exceed $1,000,000;

(4) $9,300,000 for technical services;

(5) $3,188,000 for transfer of personnel costs from Program Direction;

(6) For design of public buildings to be constructed at the following locations and maximum design costs:

California, Los Angeles, Federal Building, Parking Facility	$12,848,000
California, San Francisco Bay Area Federal Building	5,000,000
Idaho, Eastport, Border Station	326,000
Missouri, Overland, National Personnel Records Center Extension	5,365,000
New Jersey, Newark, Federal Building	1,636,000
Washington, Seattle, Laboratory	1,278,000
Small Projects	96,000

(7) For design of repair and alteration projects whose construction phase is authorized to commence in fiscal year 1986 at

the following locations and maximum design costs:

California, Hawthorne, Federal Building	$245,000
California, Los Angeles, Courthouse	180,000
Colorado, Denver, Federal Building, Customshouse	470,000
District of Columbia, General Accounting Office Building	891,000
District of Columbia, ICC Customs	158,000
District of Columbia, Pension Building	918,000
District of Columbia, Steam Distribution Plant	759,000
Illinois, Chicago, Kluczynski Federal Building	291,000
Illinois, Peoria, Federal Building, Courthouse	73,000
Indiana, Fort Wayne, Post Office, Courthouse	290,000
Kentucky, Louisville, Post Office, Courthouse	420,000
Kansas, Wichita, Courthouse	339,000
Louisiana, Lafayette, Federal Building, Courthouse	175,000
Michigan, Detroit, McNamara Federal Building	418,000
Missouri, Kansas City, Federal Building	361,000
New Hampshire, Manchester, Post Office, Courthouse	139,000
New York, Utica, Federal Building, Courthouse	166,000
Ohio, Cleveland, Celebrezze Federal Building	358,000
Oklahoma, Oklahoma City, Post Office, Courthouse	169,000
Pennsylvania, Scranton, Post Office, Courthouse	270,000
Puerto Rico, Hato Rey, Federal Building, Courthouse	118,000
Texas, Dallas, Cabell Federal Building, Courthouse	277,000
Texas, Dallas, Terminal Annex	828,000
Texas, Forth Worth, Warehouse Number 1	139,000
Texas, San Antonio, Post Office, Courthouse	334,000
Virginia, Richmond, Federal Building	194,000

(8) For design of additional repair and alternation projects at the following locations and maximum projects costs:

Arkansas, Juneau, Post Office, Courthouse	$371,000
Alabama, Birmingham, Federal Building, Courthouse	429,000
Arizona, Phoenix, Federal Building, Courthouse	88,000
California, Los Angeles, Federal Building	1,064,000
California, Pasadena, Federal Building, Courthouse	433,000
California, San Diego, Federal Building, Courthouse	88,000
California, San Francisco, Federal Building, Courthouse	3,652,000
Colorado, Denver, Denver Federal Building, Courthouse	1,318,000
Colorado, Denver, Denver Federal Center	352,000
Connecticut, Bridgeport, Federal Office Building, Courthouse	208,000
District of Columbia, Federal Office Building, New Post Office	187,000
District of Columbia, State Department	754,000
Florida, Jacksonville, Federal Building	549,000
Florida, Miami, Federal Building	676,000
Illinois, Chicago, Customhouse	99,000
Illinois, Chicago, Railroad Retirement Building	442,000
Illinois, East St. Louis, Post Office, Courthouse	359,000
Massachusetts, Boston, JFK Federal Building	2,154,000
Missouri, St. Louis, Mart Federal Building	3,944,000
North Carolina, Raleigh, Federal Building, Courthouse	434,000
New Jersey, Newark, Rodino Federal Building	1,371,000
New Jersey, Trenton, Post Office, Courthouse	357,000
New York, Brooklyn, Cellar Federal Building	1,054,000
New York, Brooklyn, Federal Building Number 2	766,000
New York, Buffalo, Federal Building	1,149,000
New York, New York, 201 Varick Street, Federal Building	1,161,000
New York, New York, 26 Federal Plaza	4,719,000
New York, New York, Foley Square Courthouse	797,000
Pennsylvania, Philadelphia, Federal Building, Post Office	893,000
South Carolina, Charleston, Rivers Federal Building	215,000
Texas, Dallas, Federal Building	176,000
Virginia, Arlington, Federal Building Number 2	635,000
Virginia, Arlington, Pentagon	1,743,000
Washington, Spokane, Federal Building, Post Office	496,000
Wisconsin, Milwaukee, Federal Building, Courthouse	308,000

LEASING

(d) Not to exceed $866,000,000 shall be available for fiscal year 1986 as follows:

(1) $18,998,000 for rental increases due to lease expirations, and

(2) $847,002,000 for payments in fiscal year 1986 to provide for space under lease prior to fiscal year 1986, including increases in operating costs and taxes.

REAL PROPERTY OPERATIONS

(e) Not to exceed $709,678,000 shall be available for fiscal year 1986 real property operations.

PROGRAM DIRECTION

(f) Not to exceed $55,481,000 shall be available for fiscal year 1986 program direction.

PURCHASE CONTRACTS

(g) Not to exceed $135,100,000 shall be available for fiscal year 1986 for payment of principal, interest, taxes, and any other obligation for public buildings acquired by purchase contract.

SEC. 5. (a) Funds appropriated under section 4 of the Act for construction, renovation, repair, or alteration shall remain available for obligation and expenditure without regard to fiscal year limitations: *Provided*, That construction, renovation, repair, or alteration has commenced in the same fiscal year which funds are made available.

(b) Commencement of design using funds authorized pursuant to section 4(c) of this Act for projects authorized by sections 4(a) and 4(b) shall be regarded as complying with the provisions of subsection (a) of this section.

SEC. 6. Ten per centum of the funds made available pursuant to this Act to the Public Buildings Service for renovation, alteration, and repair of public buildings and for payment of leases on buildings shall be available for repair or alteration projects and leases, respectively, not otherwise authorized by this Act, if the Administrator certifies that the space to be repaired, altered, or leased resulted from emergency building conditions or changing or additional programs of Federal agencies. Funds for such projects may not be obligated until thirty days after the submission by the Administrator of an explanatory statement to the Committee on Environment and Public Works of the Senate and the Committee on Public Works and Transportation of the House of Representatives. The explanatory statement shall, among other things, include a statement of the reasons why such project or lease cannot be deferred for authorization in the next succeeding fiscal year.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDERS FOR THURSDAY

ORDER FOR RECESS UNTIL 10 A.M. TOMORROW

Mr. DOLE. Mr. President, I ask unanimous consent that once the Senate completes its business today, it stand in recess until 10 a.m. on Thursday, July 25, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR RECOGNITION OF CERTAIN SENATORS TOMORROW

Mr. DOLE. Mr. President, I ask unanimous consent that following the recognition of the two leaders under the standing order, there be a special order in favor of the following Senators for not to exceed 15 minutes each: Senators DANFORTH, HEINZ, PACKWOOD, GORTON, PRESSLER, PROXMIRE, DIXON, and MURKOWSKI.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, I ask unanimous consent that, following the special orders just identified, there be a period for the transaction of routine

morning business not to extend beyond the hour of 12 noon, with statements therein limited to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. DOLE. Mr. President, as previously indicated, it will be the intention of the majority leader tomorrow to turn to any Executive or Legislative Calendar items which have been cleared for action, possibly Calendar order No. 179, S. 1078, the FTC authorization bill.

I have already indicated there will probably be a number of other bills tomorrow if we could dispose of this rather quickly. It could be that we will be in late tomorrow evening.

Let me indicate, as I have said, if we could dispose of many of these bills, it will be my intention not to have a Friday session. We will be in session on Monday and hopefully at that time, we could either take up the farm bill as reported by the committee or take a bill from the calendar and amend it with the commodities provisions of the farm bill which is now pending in the Senate.

RECESS UNTIL 10 A.M. TOMORROW

Mr. DOLE. Mr. President, there being no further business to come before the Senate, I move the Senate stand in recess until 10 a.m. Thursday, July 25, 1985.

There being no objection, the Senate, at 7:32 p.m., recessed until Thursday, July 25, 1985, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate July 24, 1985:

DEPARTMENT OF STATE

Frank Shakespeare, of Connecticut, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Portugal.

OFFICE OF PERSONNEL MANAGEMENT

Constance Horner, of the District of Columbia, to be Director of the Office of Personnel Management for a term of 4 years, vice Donald J. Devine, term expired.

WITHDRAWAL

Executive nomination withdrawn from the Senate by the President July 24, 1985:

Donald J. Devine, of Maryland, to be Director of the Office of Personnel Management for a term of 4 years, reappointment, which was sent to the Senate on March 8, 1985.

EXTENSIONS OF REMARKS

ANOTHER WAY TO LOOK AT THE BRAIN

HON. TONY COELHO
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. COELHO. Mr. Speaker, I would like to take this opportunity to share with my colleagues interested in medical care cost containment, this fascinating article, "Another Way of Looking at the Brain," by Laurence Cherry and Rona Cherry printed recently in the New York Times magazine. As one who has epilepsy, I am particularly interested in developing and expanding medical research to identify what causes seizures. This article explores the new and innovative technology which has permitted researchers to identify for the first time crucial changes in brain activity that signifies epilepsy, brain cancer and Alzheimers disease, raising new hope for understanding and ultimately treating these baffling ailments.

The article also points out that while these new machines offer hope to millions who suffer from some of the most tragic diseases, many hospitals have quietly abandoned plans to purchase these machines because of the expensive pricetag. However, many doctors feel, and I agree, that as the costs of these machines go down as they are produced in quantity, the use of many of the devices will become a routine part of the general physical examination, disclosing vast amounts of information about the health of a person's brain. While we are all concerned with medical care cost containment, I think we can all share the sentiment of one of the physicians quoted in the article:

"The talk of cost containment is all too seductive—until you develop a stroke, a brain tumor, or sustain a head injury," says Dr. La France, "then you want it diagnosed and treated as quickly, painlessly and precisely as possible, exactly what these tools can do."

ANOTHER WAY OF LOOKING AT THE BRAIN

(New computerized technologies have given doctors diagnostic and surgical tools offering a precision that until recently was only a tantalizing dream).

The young man had been driving on a New England road when the car ahead of him stopped short. In the resulting accident, his head was rammed against the windshield. Apparently suffering only minor bruises, he was treated at the emergency room of a nearby hospital and released. But within days he began to hear voices; within months he had lost his job, been diagnosed as schizophrenic and admitted to a mental hospital. None of the usual antipsychotic drugs seemed to help. When he was transferred to a Boston psychiatric hospital, doctors referred him to Dr. Frank H. Duffy, a neurologist at the Harvard Medical School and Children's Hospital.

A metallic device with 20 electrodes was fixed to the man's scalp and attached to a small console. Suddenly, patterns of brilliant shades of blue, red and green appeared on a video screen, revealing a topographic map, or reconstructed cross-section, of the electrical activity of the man's brain. The images suggested a rare form of epilepsy that sometimes develops after head injuries. Dr. Duffy informed the man's psychiatrist; an anticonvulsant drug, Tegretol, was prescribed, and for the first time in four years the man's "voices" were silenced and he was able to return to work.

The device that rescued the man from misdiagnosis, called a Brain Electrical Activity Mapping (BEAM) machine, is only one of an array of new computerized devices that are revolutionizing the diagnosis and treatment of neurological ailments. Researchers using arrays of electrodes placed on patients' scalps and attached to computers can interpret brain electrical activity to determine if they are dyslexic, manic-depressive or even whether they are just feigning symptoms. Other devices, such as the Positron Emission Tomography (PET) scanner, can identify the exact brain region in which a tumor is emerging. Some are being used to save lives during complex neurosurgical operations, and to disprove some old canards about aging and intelligence.

With a precision that until recently was only a tantalizing dream, doctors can now detect minute changes wrought by brain cancer or multiple sclerosis, or spot elipetic lesions so deep in the brain that they could never before be viewed. The techniques have also permitted researchers to identify for the first time crucial changes in brain activity that signifies schizophrenia, Alzheimer's disease and brain cancer, raising new hope for understanding, and ultimately treating, these baffling ailments.

Beyond diagnosis, the new imaging devices are used for active intervention and treatment. At several large medical centers, such as Johns Hopkins Hospital, the Mayo Clinic, Columbia-Presbyterian Medical Center and the University of Pittsburgh, surgeons can now perform operations on the brain and head that once would have been too dangerous to attempt.

The machines can also be used to help healthy people remain well by revailing problems before they become serious, such as detecting the unsuspected narrowing of a blood vessel before it interferes with function and may still be treated with drugs.

But despite the excitement in the medical community over the possibilities raised by the revolutionary improvements, there is doubt whether many of the new devices will be available to more than a handful of hospitals—or patients. The staggering expense—in some cases, about $4 million a unit—has led many government officials to demand sharp limitations on their acquisition. Some of the devices, such as the Magnetic Resonance Imaging machine, are still officially considered to be investigational and new units must receive clearance from the Food and Drug Administration and, often, state departments of health. The Federal Government can also exert pressures through the Medical system by refusing to reimburse hospitals for the scans they perform, making it impossible for them to recoup the cost of their space-age diagnostic machines.

"Our society will soon have to resolve some very thorny questions about the price of medical progress," says Dr. Bennett M. Stein, chairman of the department of neurosurgery at Columbia-Presbyterian. But if it can, many experts agree that the new imaging tools offer nothing less than the hope of liberation from some of the most tragic and baffling diseases that afflict millions.

The unexcelled accuracy of these new windows on the brain is also raising controversial questions about how the information they produce will be used. It may well be, for example, that people whose "brain profiles" hint at sociopathy, premature mental aging or unrecognized intellectual deficits might be penalized by schools or employers.

"The devices have enormous potential for good, and a substantial potential for harm," says Dr. E. Roy John, director of the Brain Research Laboratories at the New York University Medical Center. "We should begin to decide how, exactly, we are prepared to use them."

The best-known of the new imaging devices is the Computerized Axial Tomograph, the CAT scanner. First used experimentally in 1972 in a London hospital to detect a lesion in a woman's brain, the CAT's clarity has all but eliminated several excruciating diagnostic tests, such as pneumoencephalography, which involved removing spinal fluid and allowing air to float up the spine to the ventricles of the brain, often causing blinding pain.

Inside the doughnut-shaped CAT machine, a moving ring rakes X-ray beams in pencil-thin lines around a patient's head, like a planet rotating around the sun. Brain tissue absorbs the radiation in varying amounts depending on its density. Instantly calculating the difference between the total radiation and the absorption of the X-rays as they enter different parts of the head, the device's high-speed computer uses the mathematical difference as the basis for a reconstructed cross-sectional view of the brain, dazzling in its detail.

Beyond its diagnostic use, CAT has also begun to have an important impact on treatment. One of the most successful innovations is CAT-guided stereotactic surgery, developed in 1977 by Dr. Arthur E. Rosenbaum, neuroradiologist-in-chief at Johns Hopkins Hospital. A patient's head is held fast in a sturdy stereotactic frame, while the device's computer plots the best possible strategy for the operation, based on bits of information about the patient's skull and brain that had been fed into it.

This technique can be a crucial aid, as in the case of Kenny Silverberg, age 8. Although apparently in perfect health, the boy suddenly began to complain of nausea and headache one evening last May. When his father, Dr. Lawrence Silverberg, a family practitioner in a Baltimore suburb,

examined the boy, he saw that the area around his son's eyes was swollen. The opthalmologist whom Dr. Silverberg consulted immediately sent the boy to a neurologist, who told the family that there appeared to be a large tumor growing in the boy's brain. That evening, Kenny's parents brought him to the department of neurosurgery at nearby Johns Hopkins Hospital.

"The initial CAT scan was most discouraging," says Dr. Sumio Uematsu, the neurosurgeon in charge of the boy's case. "There was a very large mass in the center of his brain. We knew we had to act at once." By the time Kenny was wheeled into the operating room at 7 P.M. the next day, he was unconscious.

Again, he was examined by a CAT scanner. Using the images it had already stored in its memory bank, and the coordinates of the boy's head as it rested in the frame, the machine plotted out the different angles that might be used to enter the boy's skull and simulated them on its screen.

"It's like a dress rehearsal," says Dr. Rosenbaum. "By the time we go into the skull, we have a good idea of what we'll be doing."

Because the CAT scan supplied such precise information, large parts of Kenny's skull did not have to be removed to determine how best to approach the tumor, as might once have been the case. Dr. Uematsu withdrew large quantities of spinal fluid from the frontal portion of the brain to relieve the pressure on the boy's skull. Then he bored a second, dime-sized, hole in Kenny's head, and slowly slipped a probe through the glistening gray coils of his cortex and, with gentle pressure, advanced deeper into the recesses of the boy's brain. Periodically, Kenny's brain was scanned by the CAT to make sure that no absolutely vital part—such as his breathing center—was being violated.

When Dr. Uematsu reached the center of the mass near the ventricles of Kenny's brain, he withdrew a tiny amount of dark-brownish fluid from the oozing tumor. A pathologist tested the sample, and a grim verdict was pronounced: the mass was a glioma, an insidious kind of cancer that infiltrates the cells that cement the brain together. The CAT scans also showed that the malignancy had twisted among the brain's most crucial areas, and that attempting its removal would be perilous. At 10 P.M. the first phase of the operation was over.

Intensive radiation treatments continued, and several days later Kenny was back in the radiology suite that also doubled as an operating room for the second phase of the operation. Using the stereotactic frame and the CAT scanner as his guide, Dr. Uematsu again opened the boy's skull and drained about one quarter of the tumor. This procedure, along with the radiation therapy, was effective in shrinking the tumor.

"Of course, a brain cancer like this is terribly serious business," says Dr. Uematsu, sitting at his office desk, on which there is a large photo of Kenny and himself. "But children's brains are amazingly resilient; Kenny's prognosis is guarded, but hopeful."

Beyond their role in neurosurgery, CAT machines, about 1,300 of which are currently in operation in the United States, have also begun to be used by plastic and reconstructive surgeons to design new faces. At the University of Pennsylvania School of Medicine, for example, the CAT scanner collects detailed images of patients' skulls, then permits a plastic surgeon to reconstruct them three-dimensionally at any angle he chooses, thereby allowing him to see the effects of subtracting minute amounts of bone or muscle on facial contours.

In a dimly lit subbasement unit at New York Hospital, a young woman lies on a movable table that is slowly being slid backward through the open mouth of a mammoth white square machine by a radiological technician. "You'll be in there for about a half-hour, and you shouldn't move," Tom Callahan tells the woman as he hands her a long string attached to a brass bell hoisted at the side of the device. "Pull on the string if there's any problem," he says.

Callahan returns to the control room, where a sign just inside the heavy glass door warns visitors to leave keys, watches and other metallic objects behind before approaching the device. The magnetic force that drives the machine is so intense that, with a titanic pull, it can rip metal objects from a visitor's hand, erase the codes on the magnetic strips of credit cards and play havoc with magnetized watches.

A loud hum fills the room as Callahan activates the scanner. Within minutes, the young woman's brain is visible on the monitors in the control room and, to trained eyes, the images reveal a tiny lesion responsible for her frequent and uncontrollable-by-medication epileptic attacks.

The machine diagnosing the woman's once-undetectable brain problem is called a Magnetic Resonance Imaging device, or M.R.I.

Using magnetic fields 3,000 to 28,000 times stronger than the Earth's, an M.R.I. pries information from the body's molecules. The huge doughnut-shaped magnet utilized can make the nuclei of hydrogen atoms within the body twirl like tops in the direction of the magnetic field. A radio wave tuned to this frequency can, by the use of process called "resonance," give these wildly spinning nuclei extra energy. When the radio wave is turned off, the energy is released and is translated by computer into a visual image.

Scientists had used devices like M.R.I. to analyze chemicals in the laboratory for more than 30 years, but the first experimental M.R.I. scan of a human being was not performed until 1977. In March 1984, the Food and Drug Administration permitted two American companies to begin commercial sales of the devices to hospitals and physicians. Since then, three additional companies have been approved as suppliers, and today there are 193 M.R.I. systems installed in the United States.

The reason for the enormous popularity of the young M.R.I. is its ability to do many things a CAT scanner cannot. Tumors at the base of the brain, over-shadowed by bone on CAT scans, show up with precise clarity on M.R.I. pictures. A study last year of 40 patients at New York Hospital, one of the first to use M.R.I.'s, showed that in 13 of the subjects brain lesions in a part of the head called the posterior fossa showed up clearly on M.R.I. but not at all on CAT scans. In multiple sclerosis, plaques—areas of hardened tissue that interfere with nerve function—reveal themselves more clearly on M.R.I. than on CAT scans.

Despite its advantages in some areas, M.R.I.'s powerful magnet causes thorny logistical problems. It must be housed in a special part of the hospital and sealed off from outside electromagnetic influences such as FM and CB radio. Its mighty magnetic field can jam heart pacemakers and heat the metal in artificial joints; many patients with such devices are not presently candidates for M.R.I. scans. And it cannot show calcification of tissue, often an important feature of lesions, which CAT can image well.

At Columbia-Presbyterian, says Dr. Sadel K. Hilal, director of neuroradiology, "Patients with stroke, M.S. or spinal-cord diseases are sent for M.R.I. scans, most of those with suspected tumors for CAT."

Where CAT and M.R.I. excel at revealing details of the brain's anatomy, Positron Emission Tomography (PET) shows the brain actually at work, going about its minute-by-minute metabolic business. "CAT and M.R.I. are like road maps, PET shows the traffic moving on the roads," explains Dr. Thomas N. Chase, chief of experimental therapeutics at the National Institute of Neurological and Communicative Disorders and Stroke, in Bethesda, Md.

Since it was introduced 10 years ago, PET has spawned many descendants, each more sophisticated than its predecessor. PET VI looks like an airplane engine with a hollow core, in which a patient is screened. But instead of being bombarded with X-rays or subjected to superstrong magnetic fields, PET utilizes the radiation coming from the patient himself.

Before a scan, the patient is injected with a form of sugar that has been radioactively tagged to enable scientists to watch it as it proceeds along its chemical path. The sugar quickly passes to the always-hungry brain cells, where the glucose is rapidly absorbed—quite literally becoming food for thought. As it is digested, the substance emits particles called positrons, which collide with electrons to produce gamma rays. Computers then add all the information together, producing a picture of something never before seen so accurately: the brain at work. Suddenly an act of intention can be caught in flagrante, captured in the easy-to-identify gaudy blues and psychedelic yellows often used in PET scans. If you listen to a snatch of music uncritically, PET will show, by color, one part of your brain activating: if you analyze the sound, other parts of the brain will function, producing a different image. Decide to raise your hand, and your decision will appear on the scan in different colors and in different areas as your brain makes ready to obey your wish.

Already these glimpses of the brain at work have shown special biological markers for different psychological ills. At New York University Medical Center, in collaboration with the Brookhaven National Laboratory, researchers have used PET to demonstrate that in chronic schizophrenia the frontal parts of the brain consume glucose at a markedly low rate—in striking contrast to the manic phase of manic-depressive illness, in which glucose consumption in the same brain area soars. "People have been hunting for brain correlates of mental disorders like these for years—and now PET is finding them," says Dr. Jonathan D. Brodie, head of the N.Y.U. research team.

But psychiatry is merely the starting point for PET's explorations. "Although a CAT scan may show a tumor, a PET scan can show an area of heightened chemical activity in the brain where no growth has yet been detected," says Dr. Norman D. LaFrance, clinical director of nuclear medicine at Johns Hopkins Hospital. "That's where the next tumor may pop up—where the real action is."

Indeed, at N.Y.U. Medical Center, Dr. Brodie and his colleagues are using PET to study a chemical called putrescine as an

early marker of brain cancer. Dr. Brodie's hope is that it will "help to save many people who otherwise might have been doomed by brain tumors," by early identification and measuring response to treatments. Patients already being treated for an existing brain tumor might be tested with the substance to determine what kind of treatment should be used and to where it would best be directed.

PET has already provided some clues about Alzheimer's disease, an ailment notoriously difficult to separate from others, such as hypertension or "benign" forgetfulness. "PET's showing great promise in establishing an accurate diagnosis," says Dr. Chase, whose national-institute team has discovered that part of an Alzheimer's victim's brain—the temporoparietal cortex—shows striking diminished glucose metabolism. At the N.Y.U. Medical Center, PET scans have accurately diagnosed Alzheimer's in four-fifths of test subjects; when CAT scan information is added, the accuracy rate climbs to almost 100 percent. It now seems possible that the disease is biochemically detectable long before it betrays itself by affecting a person's behavior. "PET shows a 25 percent reduction in metabolic rates in certain brain areas, even in mild cases of Alzheimer's," says Dr. Chase. "Obviously the degeneration has been going on for some time. The important thing is to intervene at an early, crucial time, with drugs."

Although such drugs are not yet available, Dr. Chase says, "Now that PET is giving us clear ideas about what parts of the brain are involved in diseases like Alzheimer's, there's a strong conviction that we can develop drugs to activate or deactivate the system."

One of the most important steps toward that goal occurred in 1983 when Dr. Henry N. Wagner Jr., director of nuclear medicine at Johns Hopkins, became the first human subject to have his brain mapped by PET for neuroreceptors sensitive to dopamine, one of the crucial neurostransmitters that send messages from one nerve cell to another. Abnormal levels of dopamine appear linked to such diverse diseases as schizophrenia, Parkinson's disease, Down's syndrome and Huntington's chorea.

Surprisingly, the PET images showed an uneven distribution of dopamine receptors, which Dr. Wagner thinks may explain a longstanding minor, but persistent, tremor in his right hand that prevented him from becoming a surgeon.

Teams at Washington University in St. Louis and at a research institute in Orsay, France, have since imaged neuroreceptors—the "locks" of brain cells, awaiting the right biochemical "key" to activate them—involved in memory and anxiety.

In May 1984, Dr. Wagner was again the first human subject as his team used PET to image opiate receptors, those parts of brain cells that appear to be involved in the transmission of pain-killing substances, including those analgesics produced by the body itself. By accurately manipulating the receptors, the Johns Hopkins team hopes eventually to be able to block cancer pain and other types of chronic pain.

PET experts also believe the device's scans will help to predict how individuals will react to various drugs, such as the powerful neuroleptic medications that most schizophrenics must take to control their symptoms, and from which almost a sixth of them develop a Parkinsonian-like state called tardive dyskinesia. "By examining the neuroreceptors, we may be able to predict the exact dosage of drugs someone can tolerate without developing that problem," says Dr. Wagner. It might then not be a difficult step to predict the exact tolerable amounts of other drugs that affect the brain—including sleeping pills and tranquilizers.

Ironically, however, the exuberant sense of discovery so noticeable among PET researchers is not widely shared by many clinicians, who applaud its research potential but are impatient with its delay in delivering more numerous applications. The Federal Government, which has invested $27 million in PET research through the National Institutes of Health, including financing most of the 15 PET units now functioning in this country, has begun to reduce its support to all but a handful of centers.

"It's like criticizing the first flying machine because it only went several hundred feet," says Dr. LaFrance.

Other countries seem less troubled by the amount of time PET has taken to provide large-scale clinical applications; in Japan, always a bellwether country in technology, there are eight PET scanners in operation, and experts believe most Japanese medical schools will soon be outfitted with PET units.

In this country, a team at the University of California at Los Angeles is using PET to screen epileptic surgical patients. No matter how deeply the origin of the epileptic seizure is buried, PET is able to show the point of origin, often giving surgeons enough information to accurately remove the tiny malfunctioning part of the brain.

PET researchers insist their machine will continue to prove itself. Its use will grow, says Dr. LaFrance of Johns Hopkins, "because it offers what none of the other imaging devices can—*in vivo* information about the brain's most basic biochemistry."

But the brain is more than an organ in constant chemical ferment; it is also a small generator, its electrical impulses flying from cell to cell. By measuring this continuous electrical turmoil, a new technique called "evoked potential" has enabled researchers to interpret brain-wave patterns in ways never possible before. An electroencephalograph (EEG) carefully tracks how the brain responds to such challenges as sounds or flashes of light. Then a stimulus is repeated dozens of times and a computer, through an averaging process, elicits the responses evoked by the stimulus from the swirl of noise that accompanies the brain's normal electrical activity.

Not long ago at the University of California at San Diego, for example, researchers were able to tell if a person had a reaction of surprise—even if he controlled his facial expression—by looking at his brain waves. Logical sentences produce normal brain waves, but a nonsense sentence—"He spread the warm bread with socks."—produced a different wave. Researchers could also tell if the person was really paying attention, or merely pretending to.

Interestingly, these new devices have also served to contradict old myths about racial differences in intelligence and in aging. They have revealed, for example, that brain electrical activity (often an important index of normal intelligence) is the same among healthy children no matter what their ethnic group, based on data collected by investigators in regions ranging from northern Europe to the Caribbean. And though many researchers had long suggested that senility represented a kind of accelerated normal aging, Dr. Duffy says that his Harvard team's findings proved otherwise: "We've found that, electrically, in the brain, normal aging and Alzheimer's go in opposite directions—which means that if you're medically healthy, you can look forward to maintaining your brain's electrical functioning and most of your mental functioning into old age."

At the opposite end of the life span, BEAM is diagnosing problems among infants—problems that may not be noticed by parents for months. "Many more kids are born with subtle brain injuries than is recognized, because clinical examinations are not sufficiently fine enough to detect them," says Dr. Duffy. For example, the teams at both Harvard and N.Y.U. have found that reading disability has a definite physiological "signature" in the brain—not only in the language area, but in other regions. The Harvard team is trying to detect potential reading disability before children receive formal reading training. The group is testing large numbers of very young children, knowing that, statistically, many are bound to develop learning disabilities. Once they identify a child as a potential future dyslexic by his neurological correlates on the BEAM machine, investigators hope soon to be able to recommend him for extra attention and tutoring that may help to avoid future school failure.

The team at Harvard has also studied several sociopathic adolescents with histories of physically abusing others. Although their CAT scans were normal, as were the results of their standard neurological exams, BEAM detected characteristic abnormalities in their frontal lobes. "There's no question that many forms of sociopathic behavior are organically based," says Dr. Duffy. "Therefore, if we choose, these individuals could be recognized in advance and monitored."

Those investigating this technique readily admit that their work has some troubling ethical implications. Dr. John of N.Y.U., for one, foresees the possibility of "kids being shunted aside academically because their brains don't meet this profile, and older people losing their jobs because their profiles show that their brains are subtly deteriorating."

With cost-containment the concern of regulators everywhere, the devices could hardly have arrived at their present state of advanced development at a less favorable time. Their price tag seems to many to be hopelessly extravagant: approximately $800,000 for a BEAM machine; up to $1 million for a CAT scanner; $1 million to $4 million for an M.R.I. installation and $3 million for a PET scanner, including a cyclotron to produce radioactive material for the unit, and a computer. Moreover, most of the devices require highly skilled, and expensive, personnel to run them. Researchers hope that when manufacturers begin to produce the machines on a larger scale, the costs may decrease. The approximate costs to patients for each use, according to Dr. Joseph P. Whalen, chairman of the department of radiology of New York Hospital, are $1,000-plus for a PET scan, up $850 for an M.R.I. and $350 for a CAT.

Meanwhile, costs continue to mount. The Congressional Office of Technology Assessment recently reports that medical technology—devices such as CAT and M.R.I.—accounted for nearly 30 percent of the increase in Medicare payments between 1977 and 1982.

As a result, the devices have become prime targets for politicians. "Health costs are like a giant Pac-Man consuming . . . funds I'd like to spend on other things—on education

and infrastructure, on decaying roads and bridges," declared New Jersey Gov. Thomas H. Kean at the National Governors' Association meeting in February 1984.

Public health officials have also begun to respond. Dr. David Axelrod, the New York State Health Commissioner, recommended earlier that the Memorial Sloan-Kettering Cancer Center be denied the $4 million M.R.I. installation it sought, the first time that a major teaching hospital in New York City had been prevented from acquiring what it deemed an important medical apparatus. "In limiting the diffusion of N.M.R."—Nuclear Magnetic Resonance, another name for the M.R.I.—"we are attempting," Dr. Axelrod said, "to strike an appropriate balance between the benefits to be gained and the generation of new costs to our health-care system." Although the center eventually won approval for its M.R.I. unit, the number of hospitals in New York State permitted to acquire the devices has been strictly fixed at 13, at least for the present.

"We're concerned about the constraints on the development of beneficial medical technologies," says Robert M. Moliter, manager of government programs operation for the General Electric Company, a leading manufacturer of both CAT and M.R.I. scanners. "The risk is that we'll wait until, with hindsight, we're able to document the horror stories."

Many in medical circles feel that medical technology has been unfairly targeted as a source of the nation's fiscal woes. "This seems to be the only sector in which more is not better," says Dr. James H. Sammons, executive vice president of the American Medical Association. Moreover, many physicians insist that, ultimately, the head-imaging devices are less expensive than the time-consuming and painful neurological tests they replaced. "And that will be true for the other techniques as well," says Dr. Whalen.

Many doctors believe that as the costs of these machines go down as they are produced in quantity, the use of many of the devices will become a routine part of the general physical examination, disclosing vast amounts of information about the health of a person's brain.

Nevertheless, many hospitals have quietly abandoned plans to purchase improved CAT scanners, M.R.I. units, PET and BEAM machines.

Many researchers fear that if the imaging devices are never truly utilized because of prohibitive costs, they will, in effect, be condemned to become mere curiosities of technical wizardry. "The talk of cost containment is all too seductive—until you develop a stroke, a brain tumor, or sustain a head injury," says Dr. LaFrance. "Then you want it diagnosed and treated as quickly, painlessly and precisely as possible, exactly what these tools can do."●

FEDERAL SUPPORT FOR THE ARTS

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. DOWNEY of New York. Mr. Speaker, today, as the House considers fiscal year 1986 Interior appropriations, I bring to the attention of my colleagues the importance of funding for our Federal cultural programs contained in the bill. In addition, I applaud Chairman SIDNEY YATES for his continuing strong support for these vital programs and his work in rejecting the budget cuts recommended by the administration. On behalf of the nearly 200 members of the congressional arts caucus, I would like to express our appreciation for his efforts.

This year marks the 20th anniversary of the National Foundation of the Arts and Humanities—a time to look back over the past two decades with pride at the tremendous success of our unique American experiment in government cultural support. The National Endowment for the Arts and Humanities—with the addition of the Institute of Museum Services, created in 1976—have not only helped spur an era of cultural growth unprecedented in our country, but have also symbolized our Government's recognition of the value of the arts and humanities to American society.

The commitment of our Federal Government is an essential part of America's cultural support which includes all levels of government, corporations, foundations, and individuals. Each of these components is vital to maintaining America's burgeoning cultural vitality. Over the past year, corporations, foundations, individuals, as well as State and local govenments, have continued to increase their support—all encouraged by the example of our deep Federal commitment. This commitment includes funding which has been a major catalyst for private support. Since 1976, the NEA Challenge Grant Program, for example, has contributed more than $131 million to more than 500 arts groups nationwide, while encouraging almost $1 billion in matching support.

We must not allow our direct support for cultural programs to waiver, particularly when policies attacking our indirect support through the charitable contributions deduction of our tax system are under consideration. This direct support becomes even more important as arts groups cope with continually rising postal rates and potential astronomical rate increase under the administration's fiscal year 1986 budget proposals.

Over the past 20 years, direct Federal cultural support through our national endowments—although a tiny portion of our entire budget—has grown steadily with the encouragement of both Republicans and Democrats. For the first time since the endowments were formed in 1965, this bipartisan congressional commitment was questioned by the Reagan administration, but was reaffirmed early in 1981 by a Presidential task force. The task force report to the President stated: "The strength of America's arts and humanities is essential to the well-being of the Nation." Furthermore, the report stressed that "there is a clear public purpose in supporting the arts and humanities: the preservation and advancement of America's pluralistic cultural and intellectual heritage, the encouragement of creativity, the stimulation of quality in American education, and the enhancement of our general well-being." As we consider the fiscal year 1986 budgets of these essential agencies, let us keep these words in mind.

Although arts support and activities have grown tremendously over the past 20 years, needs and concerns remain. For example, Theatre Communications Group reports that the national survey sample of theaters increased their income by 65 percent over the past 5 years—but their expenses grew by 71 percent. The opera field reports "a difficult financial time," while the total deficit of our Nation's orchestras in 1984 was three times larger than in 1983. Likewise, museums are also struggling to meet increasing demands for services while coping with rising operating costs. Even the Smithsonian—our Nation's premiere museum—has been forced to cut its 1985 summer operating hours because of cuts in the Federal budget.

Mr. Speaker, I find it unbelievable that the administration has proposed to decrease the budgets of NEA and NEH and to eliminate the IMS in the face of the continung needs and concerns of our cultural community.

Cultural support should be considered more of a priority within our entire Federal budget. The administration's fiscal year 1986 budget provides only 0.027 percent for NEA, NEH, and IMS. A shift of one one-hundredth of 1 percent—or even one one-thousandth of 1 percent—taken from the Defense budget would begin to move our priorities in the right direction.

More and more Americans agree that our budget priorities should shift. A January 20, 1985, editoral from the Hutchinson, KS, News stated:

> The National Endowment for the Arts should be exempt from budget problems, no matter how little it may be receiving in federal tax money. But neither the nation's arts nor the nation's poor should be subjected to budget cutting, while the bloated Pentagon budget is given not merely deferential, but reverential treatment.

Mr. Speaker, the Interior Appropriations Subcommittee, under the leadership of Congressman YATES, deserves our highest praise for helping to raise the priority level of cultural funding. I urge all Members to affirm their cultural commitment by supporting the budget levels for our arts and humanities programs contained in the fiscal year 1986 Interior appropriations bill.●

INTRODUCTION OF NATIONAL HOUSING WEEK RESOLUTION

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. AuCOIN. Mr. Speaker, it is my pleasure today to introduce a resolution designating the week of October 6-13, 1985, as "National Housing Week."

The strength of the housing industry is a bellwether of our Nation's economic health. America's home builders have led the Nation out of every recession in recent memory. Today, they help sustain the engine of economic recovery by generating jobs and bringing revenue back to the Treasury.

If builders realize their expectations of starting nearly 1.7 million homes and apartments in 1985, housing will be responsible for creating the equivalent of $2.4 million jobs, $45.2 billion in wages and $20.7 billion in Federal, State, and local tax revenues. And the benefits extend to thousands of other businesses across the country that are tied to the health of the housing industry. As housing goes, so goes the lumber industry, the appliance business, real estate firms, and furniture makers.

However, the important contribution that housing makes to the economy doesn't tell the whole story. For millions of families, housing represents the opportunity to realize the American dream and get a piece of the rock. Two out of three households own their homes, and even more would like to. Home ownership and the ability to achieve that goal is fundamental to our national character and the foundation of our communities.

Our Nation's public policy has long recognized this plain fact: A strong housing industry means a strong America. But housing's strength continues to be threatened by a rising tide of Federal red ink. For 3 years now, these deficits have sapped the underlying strength of our economy, stifled investment and damaged housing. The Nation's home builders have been among the most vociferous advocates of strong medicine to remedy our sick economy. Housing has willingly borne its fair share—and more—of the cuts in domestic spending to bring the deficit under control. Now, the housing industry faces even deeper cuts in programs like rural housing. New and increased user fees for Federal credit programs are touted as the latest cure. While there's no question that we must address the deficit crisis if we are to avoid another round of killer high interest rates, we must not delude ourselves into believing that the destruction of productive housing programs—that help generate revenues—is the answer.

The future of economic recovery is, in many ways, tied to the future of the housing industry. The crystal ball looks better than it has in years and I am encouraged by the innovative private sector initiatives that builders themselves have developed to make home ownership available to more families. Builder bonds are a perfect example of this. They give builders direct access to Wall Street for the financing of housing. For thousands of middle-income families, it has meant the difference between dreaming about home ownership and realizing that dream.

So, as we tackle the very difficult issues on our agenda from the deficit to tax reform, I urge my colleagues to carefully consider the impacts on housing and all it stands for.

Mr. Speaker, America needs a strong housing industry. I urge my colleagues to join me in recognizing the enormous value of housing and home ownership by supporting this resolution declaring October 6-13, "National Housing Week."

A text of the resolution follows:

H.J. RES. 350

Whereas the combined commitment of the federal government with the strength and ingenuity of private enterprise has brought decent housing to an overwhelming majority of all Americans;

Whereas the opportunity to own a home and live in decent housing strengthens the family, the community and the Nation, giving individual Americans a stake in the local community and stimulating political involvement;

Whereas the housing industry has led the Nation to economic recovery following every recession since World War II by creating millions of productive jobs for the unemployed, generating billions of dollars worth of tax revenue, and creating demand for goods and services;

Whereas shelter is one of the basic needs for all individuals, and the production of affordable housing is an important concern at all levels of government; and

Whereas it is appropriate to reaffirm the national historical commitment to housing and home-ownership and to recognize the economic opportunities created by the present housing recovery: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of October 6, 1985, through October 13, 1985, is designated as "National Housing Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate ceremonies and activities.●

INTRODUCTION OF LEGISLATION H.R. 2846

HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. SCHUMER. Mr. Speaker, I have introduced legislation, H.R. 2846, that establishes a new cause of action for libel. It would allow a public official or public figure who is the subject of a publication or broadcast to sue for a declaratory judgment that the publication or broadcast was false and defamatory. In such an action, the plaintiff would not be entitled to damages and would not need to prove actual malice. The bill would also make significant changes affecting all defamation actions, including those brought by private individuals and brought against nonmedia defendants. It would abolish punitive damages, establish a uniform, 1-year statute of limitations and, with some exceptions, award attorney's fees to the prevailing party. A more detailed description of the bill is provided below.

The legislation is intended to provoke wide-ranging discussion about American libel law and to encourage exploration of various alternatives to it. Many other proposals have been made in recent years to change libel law. Undoubtedly other constructive approaches exist as well. I have chosen the approach embodied in H.R. 2846 because it is simple and concrete yet deals with the heart of the matter in a balanced way. It affords injured plaintiffs an opportunity to clear their names while removing the possibility of almost unlimited damages that threaten the news media. I invite comment from the press and media, lawyers, public officials and figures, academicians, other policymakers, and the public. This bill is an effort to focus comment and exchange of ideas on a topic that is already the subject of widespread discussion.

Since the 1964 Supreme Court decision in New York Times versus Sullivan, first amendment values have played a key part in analysis of virtually all issues relating to libel law. In considering the status of libel law and alternatives of modifications to it, it is essential to understand the interests and requirements of the first amendment. As a nation we are committed to the basic principle that debate on public issues should be uninhibited, robust, and wide open. A free press is a cornerstone of our democratic society. Libel is considered a threat to these fundamental values. On the other hand, we consider the reputation and worth of an individual to be vital as well. There is a general consensus expressed in the common law of libel that people have the right to protect their reputation. It is my hope that hearings will be held to explore all possible ways to best accommodate these sometimes conflicting interests.

The public debate on these issues has been particularly intense since the recent Sharon, Westmoreland, and Tavoulareas trials. This discussion has revealed great dissatisfaction with the present system. While the press,

public figures, constitutional experts, and the general public have different specific concerns, there is widespread agreement that the system isn't working.

First, trying a libel case has become too costly and complex for plaintiffs and defendants alike. News organizations must divert scarce resources to defend libel suits whether or not the claim ultimately has merit—and most judgments against news organizations are reversed on appeal. Libel suits now cost an average of $150,000 to try, with three-fourths of the the cost going for attorneys' fees. In addition, defendants who publish controversial allegations may face millions of dollars in damages if they are sued and lose. This is especially worrisome to small publishers who can be bankrupted defending a single lawsuit. Thus, the cost of protracted litigation and the risk of damages could deter many news organizations from aggressive reporting.

These are precisely the concerns raised recently at the annual convention of the American Newspaper Publishers Association. Many publishers said that the cost of libel suits might create a chilling effect on a newspaper's eagerness to tackle controversial subjects. Evidence of this threat is provided in a recent article by Michael Massing in the Columbia Journalism Review (vol. 24, May/June 1985). Mr. Massing's study documents many instances where the press has been chilled or is increasingly feeling threatened.

At the same time, the high costs of litigation effectively limit an aggrieved plaintiff's opportunity for redress. Under the present system, the only way a plaintiff can vindicate his or her reputation is to bring an action for damages. Many public officials and figures cannot afford the costs of bringing a lawsuit with its attendant pretrial discovery and motion practice, let alone a long and costly trial. Thus, a public figure who is the subject of a single false news report may find a life's work destroyed, with no redress. This is particularly ironic because most plaintiffs claim that what they are interested in is not financial redress but simply a determination of truth or falsity by an independent forum.

In addition to the extraordinary costs, many commentators are concerned that current libel law also damages other important first amendment interests. For example, news organizations are subjected to intrusive inquiries into their editorial process both during the discovery and trial phases of a case. Moreover, the recent decision by a panel of the U.S. Court of Appeals for the District of Columbia reinstating a verdict that the Washington Post had libeled the president of Mobil Oil is likely to increase the risk that investigative reporting may be chilled because of the court's holding that a newspaper's general orientation toward "hard-hitting investigative stories" could, together with other evidence, support an inference that it was inclined to publish reckless falsehoods.

Finally, public confidence in the news media is eroding. A recent poll commissioned by the American Society of Newspaper Editors disclosed that three-fourths of American adults do not trust the credibility of those who—in print or on television—report the news. A senior vice president for Knight-Ridder Newspapers has said that the Nation's press has a "serious credibility problem" fueled by "three sins: inaccuracy, unfairness, and arrogance."

Despite this awareness of the credibility gap by the press, it engages in relatively little self-criticism. Commentators have observed that if news organizations covered themselves as diligently as they do other institutions, there would be far fewer libel suits. First amendment interests might well be best served by such a first amendment solution—encouraging more debate rather than ignoring the problem. In addition, news organizations could regulate themselves in the same manner that the ABA or AMA oversee the practice of law or medicine. An earlier attempt to do this failed—the National New Council—but the idea still seems to have potential.

It is clear there are many possible avenues for change. I believe this is a propitious time to explore all of the options. In introducing my legislation, I look forward to constructive proposals of all types. If we could look ahead 20 years from now, what would we like to see as the ideal scenario for balancing first amendment concerns with concerns for individual reputation? Would we like to see libel law changed by legislative intervention? Arbitration? Self-regulation by the press? Or, would we embrace the current system as the best possible choice?

In sum, these proposals, along with other possible changes that could be made, merit a public airing, and I look forward to receiving comments from all those interested in this important issue.●

A TRIBUTE TO AUBREY BAKER

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. COELHO. Mr. Speaker, recently, a good friend of mine, Aubrey Baker, was named the Senior Farmer of the Year by the Madera District Chamber of Commerce in California. Aubrey is certainly most deserving of this award, as both he and his wife Georgia have been farming in the Madera area for several decades and have been very active in farming issues at the State and local levels.

Aubrey was born near Atlanta, GA, to a farming family more then 60 years ago. In 1930, his family moved to Madera, and Aubrey grew up helping his father farm their cotton fields. When he turned 21, Aubrey joined the Army, and served with distinction as a pilot in World War II and the Korean war. In 1953, Aubrey returned to the family farm to help his father run their 900 acres of cropland. He began to build his own farm, and since that time has farmed cotton, row crops, and fruit trees, as well as being involved with the beef and dairy industries. Today Aubrey's main holdings are in cotton and vineyards.

Although most people would have been busy enough with the heavy task of trying to manage a farm successfully, Aubrey has also found time over the years to take a leadership position in agricultural organizations across the State. He is a past president of the Madera County Farm Bureau, and a past director of the Madera District Chamber of Commerce. He served as head of the Soil Conservation Service for over 30 years, and has served on the California Fair Board and the Cotton Variety Testing Committee. Aubrey also has served as the California representative on the Agricultural Stabilization and Conservation Service after having been appointed to that position by President Carter. Aubrey presently serves on the Acala Cotton Board and the Mosquito Abatement Board.

I can think of no one who exemplifies the tenacious but caring spirit of California agriculture better than Aubrey Baker. He and Georgia have had to work very hard to build and maintain their farm, but they have been willing to give their land the sweat and tears required to make it fertile and productive. Aubrey's efforts on behalf of the farming industry in Madera County and in fact in all of California have been recognized by his peers, and their respect for him is evident by choosing him as Senior Farmer of the Year. I share in this great respect for Aubrey Baker, and I congratulate him on this honor. I would like to thank Aubrey for all that he has done for the California agriculture industry, and I wish he and Georgia continued success in all their future endeavors.●

BILLY LEE RANSDALL: OUTSTANDING CIVILIAN

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. SKELTON. Mr. Speaker, I take this time today to inform my colleagues about an outstanding constituent and friend who has recently received the Outstanding Civilian Service Award from the U.S. Army.

Waynesville, MO resident Bill Ransdall was presented the coveted award in a surprise ceremony of the Association for the U.S. Army by Maj. Gen. John Moellering. The citation notes Mr. Ransdall's "unprecedented achievements of local, State, and national impact." The citation further states his work toward "Tremendous individual and corporate growth rates, better than ever service to Fort Leonard Wood soldiers and total community and regional involvement."

To support the soldiers at Fort Leonard Wood, he established the Distinguished Soldier Program, which recognizes service members honored as Soldier of the Year, Non-Commissioned Officer of the Year and Drill Sergeant of the Year.

Mr. Ransdall's civic memberships include: The Waynesville City Council, Rolla Chamber of Commerce, U.S. Chamber of Commerce, Missouri Highway Patrol Benevolent Fund Board, Masonic Lodge Number 375, St. Pat's Board, Scottish Rite and the United Methodist Church of Waynesville.

Mr. Speaker, I feel confident that the Members join me in congratulating this deserving Missourian for his fine work in and around the Fort Leonard Wood area, and in wishing him and his lovely wife Pat all the best in the years to come.●

INTERNATIONAL PLANNED PARENTHOOD FEDERATION

HON. RICHARD J. DURBIN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. DURBIN. Mr. Speaker, the second amendment by the gentleman from New Jersey [Mr. SMITH], which would end U.S. contributions to the International Planned Parenthood Federation [IPPF], fails to acknowledge several realities.

First, none of the funds provided by the United States to the IPPF can be used to fund abortions. This provision has been in the law for many years, and I support this prohibition.

Second, Mr. SMITH's efforts to cut off all funds to the International Planned Parenthood Federation do not recognize the fact that there are few world-wide organizations available which can provide essential family planning assistance to developing countries.

Third, in the name of ending abortion, Mr. SMITH would cut back on family planning efforts which help avoid the need for abortion.

Although the sponsor concedes that U.S. funds are not used directly for abortion counseling through the IPPF, he would defund the agency to avoid indirect support of the activities. Ironically, neither the sponsor nor the administration apply this same standard to U.S. assistance to governments which promote abortion as national policy.

Recently, I met with the Assistant Administrator at the Agency for International Development [AID]. He advised me that during fiscal year 1985 the administration unilaterally reduced its funding to the IPPF to protest that organization's support of abortion and abortion counseling in countries where abortion is legal.

The Assistant Administrator advised me that AID has proposed to reallocate the funds it took away from IPPF-London to IPPF-Western Hemisphere distribution. In the words of the Administrator, the latter organization was a "wholly owned subsidiary" of the former.

If AID can defund IPPF-London and transfer that funding to a wholly owned subsidiary, we have failed to achieve anything other than an accounting transfer. Giving the administration the authority to shuffle funds between IPPF subsidiaries hardly addresses the issues raised by Mr. SMITH.

I believe that we must continue to be vigilant in making certain that no U.S. funds are used for abortion or abortion counseling. Similarly, we should use our foreign policy to discourage abortion whenever possible. However, the amendment by the gentleman from New Jersey adds nothing to that effort and would only serve to diminish the U.S. funding of family planning assistance worldwide. If women in developing countries are not given the family planning information, I fear that their alternative will be unwanted pregnancies and abortions, which are often performed illegally and damage the health of many women.

In the name of ending the practice of abortion, I am concerned that the amendment by the gentleman from New Jersey will only increase the number of abortions. Although I support the objectives of the gentleman from New Jersey, I cannot support his approach.●

ALLIANCE RESPONSIBILITY

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. BROOMFIELD. Mr. Speaker, as my colleagues know, Secretary of State George Shultz recently completed a visit to certain Pacific island nations, in order to discuss our common interests and differences. In particular, the Secretary discussed the consequences of New Zealand's refusal to accept port calls of U.S. warships. This decision by the New Zealand Government has altered its position in the ANZUS [Australia, New Zealand, United States] Alliance and has raised important questions in regard to alliance responsibility in that region of the world. In this regard, I commend to my colleagues excerpts from a recent address on alliance responsibility by the Secretary of State.

ON ALLIANCE RESPONSIBILITY

ADDRESS BY HON. GEORGE P. SHULTZ, SECRETARY OF STATE, BEFORE THE EAST-WEST CENTER AND THE PACIFIC AND ASIAN AFFAIRS COUNCIL, HONOLULU, HI, JULY 17, 1985

On February 4 of this year, New Zealand rejected an American request for a visit by the USS Buchanan, a conventionally-powered destroyer that was to participate in an ANZUS naval exercise. The government of New Zealand rejected the request because the United States would neither confirm nor deny the presence of nuclear weapons aboard the ship.

New Zealand's decision followed months of quiet consultations between our two countries, in which we explored an amicable solution. We pointed out that port access for our ships in accordance with our worldwide policy of neither confirming nor denying the presence of nuclear weapons aboard ships was an essential element of the ANZUS security relationship. The implication of New Zealand's decision was that no American ship that could not be identified as unambiguously non-nuclear-armed could ever call in that nation again. Without access to ports, we could not fulfill our treaty obligations in peacetime or in a crisis. Our policy of neither confirming nor denying the presence of nuclear weapons aboard our naval vessels is essential: It prevents adversaries from identifying our most capable ships, thereby enhancing targeting difficulties and reinforcing deterrence.

We did not challange New Zealand's right to choose its own policy. Indeed, several allied, friendly, and neutral countries have special policies regarding nuclear weapons, but nevertheless permit ship visits.

No other ally, however, refuses to permit port visits on the basis of our "neither confirm nor deny" policy as New Zealand has. And if New Zealand's objective was to enhance Pacific security and reduce the nuclear danger, it has acted against its own interest: By adding a new element of risk and uncertainty New Zealand has weakened regional stability, one of the most important links in the efforts to prevent nuclear war. And the erosion of Western unity only weakens the Western position and the chances for success in arms control.

When New Zealand decided to reject the Buchanan, it also decided, in effect, that the basic operational elements of the ANZUS treaty would not apply to it. In a sense, New Zealand walked off the job—the job of working with each other to defend our common security. This made inevitable the cancellation or restructuring of a number of military exercises and exchanges with New Zealand, including the naval exercise in which the Buchanan was to have participated.

We have left the door open, however. The President said on February 7: "It's our deepest hope that New Zealand will restore the traditional cooperation that has existed between our two countries. Allies must work together as partners to meet their shared responsibilities." New Zealand remains a friend.

We hope that our current differences will eventually be overcome, and that further actions which exacerbate our differences can be avoided.

Our differences with New Zealand are specific and immediate; yet they raise the most basic questions about alliances and about alliance responsibilities in the modern world: What is the purpose of our alliances? What qualities are unique to an alliance of democracies? How do we manage our alliances in a new era in furtherance of our common purpose?

The goal of our alliances

After the end of the Second World War, the Western democracies that had united, together with the Soviet Union, to defeat Hitler soon found themselves faced with another threat to peace and freedom. The Soviet Union took advantage of the temporary weakness of nations struggling to recover from the war; it sought to expand its power and control in Europe and in Asia. The West responded by uniting in common defense of its values and of world peace. In 1949, the United States, Canada, and the nations of Western Europe signed the North Atlantic Treaty.

A year later, after the Communist invasion of South Korea, this web of alliances was extended to East Asia and the Pacific, where the United States entered into alliances with Japan, Australia and New Zealand, the Philippines, and later, Korea and Thailand.

The goal of our alliances 35 years ago was to deter aggression sponsored or conducted by the Soviet Union and its proxies against the alliance partners. Soviet power and its expansionist aims were then clear to all. Today they should be even clearer, in light of the massive Soviet military buildup of the past two decades, the Soviet invasion of Afghanistan, and efforts to extend the reach of Soviet power in Africa, Asia, and Central America. The purpose of our alliances, therefore, remains the same today: to deter Soviet aggression in Europe and Asia by making it clear, beyond a shadow of a doubt, that allied nations will resist, repel, and punish the aggressor.

And something else that was true 35 years ago is also true today: It is not enough for allies to agree that when war starts they will come to each other's aid. Words and agreements alone will not deter war.

Allies must work together to ensure that we have the capability to fight and win such a war—and that our adversaries know it. That is the real deterrent.●

ZAMBELLI INTERNATIONALE

HON. JOE KOLTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. KOLTER. Mr. Speaker, it is my honor today to recognize Zambelli Internationale as the outstanding institution behind the spectacular Fourth of July fireworks exhibition on the Mall this year. Mr. George Zambelli, a constituent of mine and President of the firm which has had its U.S. headquarters in New Castle, PA, since 1893, deserves much praise for the remarkable pyrotechnic displays that he and his family have provided for millions of Americans celebrating our country's great Day of Independence throughout the Nation.

Zambelli Internationale is the world's largest and foremost manufacturer and exhibitor of fireworks, with 95 percent of the displays made in New Castle. The company has designed several hundred fireworks programs in Washington, DC. Also, for over 20 years, it has been in charge of the elaborate display alongside the Washington Monument which is justifiably considered to be the most pestigious show in the Nation.

In addition to thousands of Fourth of July celebrations each year and worldwide events such as the Papal visit to Toronto and the National Portrait Gallery in France, Zambelli Internationale has marked several noteworthy domestic occasions, to name only a few: The 1982 World's Fair, the return of the hostages from Iran, the 50th Anniversary of the Veterans' Administration, the 75th Anniversary of General Motors, the First National Telethon for the March of Dimes, the Inauguration of Jimmy Carter, the Inauguration of President Reagan, and with this past July Fourth, the return of the hostages from Beirut.

I cannot think of a more breathtaking and thrilling experience than the tremendous feeling of national pride possessed by all who witnessed this year's phenomenol three dimensional, audiovisual fireworks exhibit. It honored both the freedom of our Nation and the freedom rights of its citizens. In its 91 years of business, the Zambelli family has so often offered truly brilliant and magnificent tributes to our Nation that I deem it a great honor to bring my colleagues' attention to the fact that the internationally reknown institution is well-established within Pennsylvania's Fourth District.●

A TRIBUTE TO WILLIAM A. "BILL" MARTIN, JR.

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. DYSON. Mr. Speaker, I rise today to honor the memory of a fellow Marylander, Bill Martin. As editor of the Crisfield Times for more than a decade and a half, Bill brightened the lives and broadened the visions of countless Crisfielders.

Bill was a man who made a difference. It was his calling in life to share ideas with the citizenry of Crisfield, and through Bill's insightful and indefatigable spirit, Crisfield benefited. Yes, Bill was a man of ideas who did much to help human understanding.

Bill masterfully wove homespun features that both captured the essence of his community and accentuated the basic goodness of people. And like the people he so often wrote about, Bill made the world a better place for having lived in it.

Not only by word, but also by deed, did Bill devote himself to Crisfield. Bill was a member of the Immanual United Methodist Church for 41 years where he served as church financial secretary for 31 years. A World War II Army veteran, Bill was a past member of the board of directors of the McCready Memorial Hospital; honorary member of the Crisfield Fire Department; honorary member of the Lower Somerset County Ambulance & Rescue Squad, Inc.; life member of the National Hard Crab Derby Association; honorary member of the Crisfield High School Homemakers of America and in his honor the Crisfield High School Pen and Quill Club was named.

Born in Hampstead, MD, Bill was the son of the late William A., Sr., and Florence Resh Martin. A devoted family man, Bill and his wife, Mary Ruth, spent 45 happy years together and raised two sons, William A. and James E. Martin.

In appreciation of his efforts in organizing Crisfield's national bicentennial celebration, a historical narrative of Bill Martin's many accomplishments was placed in Crisfield's 100-year time capsule pyramid to perpetuate him in memory to Americans of the tricentennial and beyond. It is altogether fitting and proper that this should be done.

And when Bill passed away on this July 4—as people throughout the land celebrated the freedom and democracy that Bill so dearly cherished and did so much to strengthen—he left a rich and enduring legacy of which we can all be proud; for Bill Martin was truly a great American.●

HALTING DRUNK DRIVING—A NEW APPROACH

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. PORTER. Mr. Speaker, I'd like to take this opportunity to address a serious problem, an epidemic, which continues to plague our society and endanger its members.

The problem of drunk driving was the subject of widespread debate and legislation during the 98th Congress. Thanks in great part to the grassroots efforts of local citizen groups, we have all been sensitized to the tragic results of those who drink and drive. The approximately 25,000 deaths on our Nation's highways, annually, as a result of alcohol related accidents, deserves our continued attention.

I'm quite proud of the Congress and the President for enacting legislation encouraging States to adopt a national uniform drinking age. It was the first step to counter the preponderance of teenage drinking deaths in the United States and the leading cause of death among young adults ages 16 through 21. I personally urge all State governments to adopt such a standard. If they do not, more tragic deaths will occur with the advent of "Blood Borders" between States with age discrepancies.

In addition to our efforts at the Federal level, we must encourage local legislative and judicial bodies to establish new, creative programs to deal with those who are convicted to "driving under the influence." Deterring drunk driving, and enforcing strict laws, is, in the final analysis, the responsibility of local governments. Although we can do much at the Federal level, local officials are in the best position to prevent the continuous drunk driving slaughter.

I recently read about a program which exemplified the creativity and determination needed to deal with the crisis. Ms. Becky Titus, a Sarasota County judge in Florida, authored a program in which convicted drunk drivers were forced to display red lettered bumper stickers on their vehicles which stated: "Convicted DUI: Restricted Liscense." Her program was designed to increase the public's awareness of the costs of drunk driving by making the penalty visible and long standing. It rose out of the realization that simply increasing the fine or term of imprisonment was an ineffective deterrent. Expectedly the plan brought forth cries of privacy invasion and Puritan "Scarlet Letter" tactics. Ironically, however, the chief opponent of Ms. Titus's plan has been her husband, the chief public defender of the county. Both have been quite vocal in support of their opposing positions, and no matter the outcome, it is refreshing to see such energy being put forth into finding the proper response to the selfish life-taker known as the drunk driver.

At this point I would like to submit for the RECORD the article I referred to:

[From the New York Times, June 6, 1985]

IN-HOUSE DISPUTE: DRUNKEN-DRIVER BUMPER STICKER

(By Jon Nordheimer)

SARASOTA, FLA.—When Becky Titus and Elliott Metcalfe made plans to marry this spring they thought the biggest problem facing them was what to do with their pets.

She owned three aging cats and he a 50-pound English bull terrier.

They were married last month and the pets turned out to be the least of their problems. Miss Titus is a Sarasota County judge and the author of a local program to force people convicted of drunken driving to display a red-lettered bumper sticker announcing the conviction to the world.

Her husband is the county's chief public defender, and next week he will move to end his wife's program.

STEP BACKWARD TO SALEM

"Unconstitutional, humiliating and an invasion of privacy," fumed Mr. Metcalfe. "It's a step backward to Salem, the Scarlet Letter, dunking chairs and public stocks."

Not so fast, argued his wife, who has the last word in court but in another venue, a booth in the sandwich shop near the county courthouse, debates on equal footing. "The Scarlet Letter is appropriate if it causes deterrence," she said. "We are not taking an individual and dyeing him green. We are putting this bumper sticker on his vehicle, not him."

The sentencing, which began last week, gives first-time offenders a choice after their licenses are automatically suspended for a year. If they want special driving privileges to get to work or school, they must agree to a plastic strip on the bumper that says, in large reflective lettering: "Convicted DUI. Restricted License."

Others who drive the car are permitted to cover the bumper sticker with a white plastic strip that the court supplies.

SHE ACCUSED HER OPPONENT

Miss Titus took office in January after ousting the incumbent, denouncing him as soft on drunken driving. There were 1,285 drunken driving arrests last year in a county of nearly a quarter million residents.

"There's everything from die-hard alcoholics to older folks who can't cope with retirement," she said. "Most of them have never been in court before and are mortified. The worst part is seeing their names in the paper."

She said she seized on bumper stickers when she heard about their use by a judge in Oklahoma.

"Having the sticker on the car also helps enforce the court order to keep these offenders off the road at night," she said. Violation of the terms could jail the offender for six months, she said.

Rick DeFuria, one of two other county traffic judges, supports the plan. The third, Alan Dakan, appointed after the policy was announced, said he would wait to observe its results. He hears cases with names at the end of the alphabet.

"Names from O to Z get a break but A to N get slapped with a sticker," Mr. Metcalfe said. "That's discriminatory and that's the basis of our challenge."

He said offenders were not given a free choice because they must accept the conditions or face loss of work. "Probation should be rehabilitative and not punitive," he insisted.

Miss Titus's eyebrows danced. "There's nothing in the books that says I can't think of something new," she said. "I can send an offender to jail. I can't think of anything more punitive!"

"That's all provided for by statute," he said "There's nothing that allows you to make someone wear the Scarlet Letter. What's next?"

"I ask your Honor," he said, "are you going to put all the shoplifters into red T-shirts saying 'Convicted Thief'?" Mr. Metcalfe, who was his wife's campaign manager, was chortling.

The judge rolled her eyes. Her face tightened into the sentencing expression. "I knew I should have let you challenge the bumper sticker issue before I married you," she said. But she could not stay stern. "It's late, honey, let's get back to court," the judge said to the public defender.●

CONGRESSIONAL SALUTE TO FLORIN'S "ONCE IN A LIFETIME REUNION"

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. MATSUI. Mr. Speaker, I rise today to bring your attention to a very special event taking place on July 20 and 21 in the small, rural community of Florin in my Sacramento County congressional district.

For those 2 days, several generations of former Florin residents will gather for a "Once in a Lifetime Reunion." For most, it will be the first time in many decades that they have seen each other. Growth, changing economic conditions, and World War II combined to scatter most of them throughout the country.

And yet there are still remnants of the strong Japanese-American influence this community had prior to the removal and relocation of 2,500 residents in concentration camps as part of the U.S. Government's internment policies. Homes were lost, businesses destroyed, and families torn apart by the massive paranoia and wartime hysteria that gripped the Nation during World War II. All of this was done to American citizens, who had no recourse, no due process or court hearings.

Today, more than 40 years later Japanese-American and Caucasian residents will gather again to renew old acquaintances, share their memories and their experiences. Educational events like this can only help future generations learn from our past mistakes. The tragedy and human suffering that occurred in World War II to Japanese Americans will be mirrored

in the faces and voices of old classmates and coworkers.

A long list of activities is planned to commemorate this historic reunion. A 200-unit parade through the streets of old Florintown and the unveiling of a historic plaque are among some of the events planned for the 2-day program.

Mr. Speaker, I ask that my colleagues join me in commending and thanking the many community groups and organizations, residents of Florin and the Florin Historical Society for their efforts in planning this important reunion.●

THE ISSUE OF ABORTION

HON. RICHARD J. DURBIN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. DURBIN. Mr. Speaker, I rise today to address an issue which has been confronted by Congress repeatedly over the last decade. The issue is abortion. Today we address that issue from the perspective of family planning assistance to other nations of the world.

Let me say at the outset that I oppose abortion on demand and have consistently voted against its funding. It should go without saying that the allegations of forced abortions and compulsory sterilization in China suggest reprehensible conduct which should be condemned by all civilized nations.

However, we are not faced today with the question of whether we should condone or condemn China's family practices. Not a single Member of this body has risen in defense of China on this subject. Instead, we are asked to choose a policy which the United States can follow in the hopes of discouraging and ending compulsory abortion, sterilization, and infanticide in China.

For many years the United States has supported family planning worldwide as a humane use of our funds to alleviate suffering in underdeveloped countries. We have made it clear that none of our family planning assistance is to be used to fund abortion. I strongly support that position.

The Foreign Affairs Committee took that approach one step further during consideration of the foreign aid bill when it adopted the Snowe amendment prohibiting the use of U.S. family planning funds in China through the United Nations Fund for Population Activities [UNFPA], the international agency that distributes family planning assistance in China and 114 other countries.

The gentleman from New Jersey [Mr. SMITH] originally sought to take an additional step and prohibit the use of any family planning assistance funds from the United States to support UNFPA activities in any of the 115 countries it serves because it gives some funding to China. He proposed this policy change even though the Agency for International Development found no evidence that the UNFPA was involved in any way in coercive activities and the UNFPA contributes only 1 percent of the total cost of China's population program.

Mr. SMITH's amendment caused concern to many of us who are aware of the fact that unless family planning assistance funds are available in many countries, women will be forced to turn to abortion. The practical result of Mr. SMITH's original amendment would have been to increase the number of abortions worldwide in an effort to end compulsory abortion in China. For many of us, this was an unacceptable alternative.

Fortunately, Mr. SMITH altered his amendment considerably in the hours preceding this debate during the House's consideration of the foreign aid bill.

The House was presented with two amendments which were quite similar. An amendment offered by Mr. FASCELL of Florida provides the President with discretionary authority to deny funds to the UNFPA if there is any evidence that they are supporting compulsory abortion in China. Mr. SMITH's modified amendment took a slightly different approach by requiring the President to certify that such funds are not being used by the UNFPA to support compulsory abortions in China before the United States releases them.

The practical impact of both amendments is the same. The administration has the authority to completely remove all funding for the UNFPA if there is any evidence that this agency is supporting compulsory abortions in China. Although the Agency for International Development has concluded that there is no evidence of UNFPA support for compulsory abortions, providing the President with this discretionary authority will serve as a constant reminder in the UNFPA that it should not only refuse to participate in China's objectionable family planning program, but also that we will remain vigilant so as to discourage any indirect assistance by UNFPA to this program.

Through the adoption of either the Fascell or Smith amendments, we will have taken a major step toward establishing a policy in the United States condemning forced abortions in China. We will give the President a new tool to fight this Chinese policy in addition to the myriad of other foreign policies available to the administration to influence China's decisions in this area. I am particularly pleased that both amendments achieve this worthy objective without sacrificing the important contribution of the United States to family planning assistance in other nations.

We cannot and should not walk away from our responsibility to provide family planning assistance to developing nations of the world.●

CALL TO CONSCIENCE VIGIL: THE SLEPAKS

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. FASCELL. Mr. Speaker, today I take the floor to once again participate in the "Call to Conscience Vigil" organized by our distinguished colleague, Representative LEVIN, from Michigan. It is with great sadness and dismay that I find it necessary to speak for the ninth consecutive year on the plight of the Slepak family, a family which has been separated for 15 years.

Vladimir Slepak, a radio and television engineer; Maria, a physician; and their two sons, Aleksandr and Leonid, applied in 1970 to emigrate to Israel where they would join Maria's mother. Their request was refused and in 1976, Vladimir joined the Moscow Helsinki Monitoring Group which speaks in defense of Soviet citizens whose rights are violated or denied.

In 1977, Aleksandr was finally allowed to emigrate, but the rest of the family could not leave. Thus in 1978, the Slepaks hung a banner from their balcony which said, "Let Us Go to Our Son in Israel." For this action, Vladimir was convicted of "malicious hooliganism" and was sentenced to a 5-year term of internal exile in Siberia. Maria's sentence was suspended, but she chose to join Vladimir. Their son Leonid was allowed to emigrate in 1979.

In December of 1982, Vladimir completed his sentence and returned to Moscow where he and Maria renewed their efforts to reunite with their family in Israel.

It is most important that we, as those who are fortunate enough to have the freedom to exercise our basic human rights, do not forget those who lack that freedom. The Slepaks and other Soviet Jews are prohibited from living freely and from observing their religion as they choose, yet they are prevented from leaving the country. These people must know that the world has neither abandoned them nor forgotten the beliefs for which they stand.

Mr. Speaker, as in all previous years since the "Call to Conscience Vigil" began in 1976, I pledge my continuing support for the freedom of Soviet Jews, and it is my sincere hope that this year, Vladimir and Maria Slepak will emigrate to Israel and that it will

not be necessary for me to speak on their behalf again next year.●

A TRIBUTE TO SUSAN SMITH McKINNEY, M.D.

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. RANGEL. Mr. Speaker, I rise with great pride to remember the life of Dr. Susan Smith McKinney, New York State's first black female physician, and only the third black woman in the United States to attend medical school.

Susan Smith McKinney's medical career began in 1870, when she began a 24-year practice in Brooklyn, NY. Her tenure in Brooklyn was exceptional, and she immersed herself in all aspects of the medical profession. She was a member of several medical societies, and worked in many local hospitals. Dr. McKinney stood out among her peers, receiving the respect due her. Her community loved her, acknowledging her dedication to her fellow citizens.

On behalf of this fine American, I would like to submit the following article for insertion into the CONGRESSIONAL RECORD.

[From the Journal of the National Medical Association, March 1975]

SUSAN SMITH McKINNEY, M.D., 1847-1918, FIRST AFRO-AMERICAN WOMAN PHYSICIAN IN NEW YORK STATE

(By Leslie L. Alexander, M.D.)

Susan Maria Smith was born in 1847 at the corner of Fulton Street and Buffalo Avenue in Brooklyn, New York. This area, now called Weeksville, was then a farm extending south from Fulton Street. Twenty-three years later in July 1870, she was graduated from the New York Medical College for Women and was valedictorian of her class. One hundred and four years later, on September 25, 1974, Brooklyn's Junior High School No. 265 was named the Dr. Susan Smith McKinney Junior High School in her honor.

Dr. Susan Smith McKinney was the seventh of ten children of Sylvanus and Anne Springsteel Smith. Her father was a successful and prosperous pig farmer who was listed in the directories of the time as a pork merchant. Her mother was the daughter of a Shinnecock squaw and a Revolutionary War French colonel by marriage.

Her oldest sister, (Min) Sarah Tompkins was married to an Episcopal minister and became the principal of Grammar School No. 4 in 1864. After the death of her first husband, this sister married the famous Henry Highland Garnet, the noted anti-slavery orator and later Minister to Liberia. She continued to be a school principal (in Manhattan) at Public School 80 until her retirement in 1901 after a tenure of 37 years.

Another sister, Emma (Thomas) was a school teacher. Clara (Brown) taught piano and Mary was a hairdresser. Two of her brothers died (one at sea) in the Civil War.

As a child Dr. McKinney was a serious student of the organ under the tutelage of two famous organists of New York City, John Zundel of the Plymouth Church, and Henry Eyre Brown of the Brooklyn Tabernacle. This training enabled her to teach in the public school system of Washington, D.C. for two years and later to become, for 28 years, choir director and an accomplished organist of the Bridge Street A.M.E. Church in Brooklyn (during her medical career).

The first Negro women to receive the medical degree were Rebecca Lee, M.D. (New England Female Medical College, Boston, 1864) and Rebecca J. Cole, M.D. (Woman's Medical College, Philadelphia, 1867). Dr. Susan Smith was the first Negro woman physician in Brooklyn and New York State. She was the third in the United States. She practiced 24 years in Brooklyn—as Dr. Susan Smith from 1870-73, and as Dr. Susan McKinney from 1874-1895. Her office was located at 205 DeKalb Avenue which is not too distant from the 101 Park Avenue site of the Dr. Susan Smith McKinney School and also the Bridge Street A.M.E. Church. She also maintained an office in Manhattan.

Dr. McKinney was a member of the medical staff of the New York Medical College and Hospital for Women at 213 West 54th Street, between Broadway and Seventh Avenue, in Manhattan during 1882. She took postgraduate work at the Long Island Medical College Hospital in Brooklyn from 1887-88. She also was one of the organizers and founders, in 1881, and a member of the staff until 1895, of the Brooklyn Woman's Homeopathic Hospital and Dispensary at Myrtle and Grand Avenues (near the Dr. Susan Smith McKinney School). This hospital later was renamed the Memorial Hospital for Women and Children, and was relocated at 808 Prospect Place.

Dr. McKinney was a member of the Kings County Medical Society and the New York State Homeopathic Medical Society. She was official physician to the Brooklyn Home for Aged Colored People and served as a member of its governing board from 1892-1895. This Home is still in operation at the corner of St. Johns Place and Kingston Avenue where a new physical plant is being contemplated.

Dr. McKinney also was a public speaker. On several occasions in Brooklyn and Ohio, she spoke on women in medicine. She addressed the Interracial congress in London, England, in 1911 on Colored Women in America.

Dr. McKinney's kinship can be traced back four generations and forward four generations. Her great, great grandmother, Libby Larkins, was a pure Montauk Indian. Her husband also was of that tribe. His name is not recorded. A great grandfather, Solomon Hubbs, was an African slave ship escapee and was said to be an African prince called "King Solomon." His grandson, Sylvanus, later was to marry the half-breed Shinnecock-French girl, Anne Springsteel, the mother of Dr. Susan Smith McKinney.

Dr. Susan Smith was married to Reverend William Guillard McKinney who was about 20 years her senior. He died in 1895 after fathering two children: Anna McKinney Holly-Carty, a school teacher in Brooklyn for many years, and Reverend William Sylvanus McKinney, a Protestant Episcopal priest.

At the time of the dedication of the Dr. Susan Smith McKinney Junior High School there were 22 direct descendants of Dr. McKinney. William S. McKinney, Jr. of Brooklyn and St. Albans is 74 years of age and was a high school teacher at Thomas Edison Vocational in Queens, New York and at the East New York High School in Brooklyn. His wife, Blanche, retired from elementary school teaching after 31 years of service.

The 22 descendants—all living—include a chemical engineer, seven school teachers, a commercial artist, a piano teacher, a well known actress, an assistant principal, a dentist (Dr. William McKinney of Jamaica), a trial attorney (Charles McKinney, Esq. of Brooklyn), a tennis coach and student, two students at Harvard, a student each at Brown University and Northeastern University, two high school students, and one elementary school pupil.

At the time of her husband's death, Dr. McKinney was 48 years of age. She then married U.S. Army Chaplain Theophilus G. Steward of the 24th Infantry of Fort Missoula in Montana and later at Fort Niobrara, Nebraska. She was licensed and practiced medicine in both of these states. Shortly before Chaplain Steward's retirement she went to Ohio in 1898 and became resident physician and a member of the faculty of Wilberforce University in Xenia, Ohio. Upon his retirement from the Army he joined her there on the faculty as a teacher of history.

Dr. McKinney-Steward remained at Wilberforce until her death in 1918. Her body was brought back to Brooklyn and interred at Greenwood Cemetery. Chaplain Steward survived her for a few years at Wilberforce. There were no offspring from this second marriage.

Dr. Susan McKinney-Steward devoted 48 years to an outstanding medical career. She was honored as a physician, organizer with foresight, churchwoman, community leader, musician, educator, publicist, humanitarian and heroine. In June 1914 President Scarborough of Wilberforce University wrote: "Dr. Susan McKinney-Steward, our resident physican for a number of years, has been faithful in looking after the young people in need of medical attention. I am very glad to commend her and her services, and to say that to have such a woman connected with the institution, where there is a large attendance of girls, is indispensable."

After her death, as part of her eulogy, the Green County (Ohio) Statistics, printed ". . . She was one of the best known women of her race, and for years exerted a remarkable influence for good, in and about Wilberforce, where she had been practicing her profession since 1898. . . ."

To Dr. McKinney-Steward's family one highlight of her career has been recorded as a dramatic and commemorative episode. It was a housecall by train and ship from Ohio to Haiti in 1897 to deliver her first grandson, Louis Holly.

Now after 104 years Brooklyn, her native city, has written its epitaph—the Dr. Susan Smith McKinney Junior High School.

ENTERPRISE ZONES CAN MAKE A DIFFERENCE

HON. JACK F. KEMP
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. KEMP. Mr. Speaker, enterprise zones are crucial to the revitalization of our inner cities and other depressed areas across the country. By creating jobs and entrepreneurial opportunities for disadvantaged residents of these zones, we can go a long way toward rebuilding these distressed communities and providing a leg up on the ladder of opportunity.

I would like to share with my colleagues this informative article on enterprise zones that appeared in the May 1985 issue of Business Facilities. As this article points out, many States such as Kansas, Connecticut, Illinois, and Louisiana have been successful in generating new jobs and economic growth through the use of enterprise zones. This Nation has much to gain and nothing to lose by trying them, and I urge my colleagues to pass enterprise zone legislation at the Federal level this year.

[From Business Facilities, May 1985]

ENTERPRISE ZONES: "THERE'S NOTHING TO LOSE BY TRYING THEM. . . ."

(By Eric Peterson, Editor)

Critics say they don't produce, and that the incentives are better used elsewhere. Advocates admit that their success is iffy, but argue that there's nothing to lose by trying them.

"They" is enterprise zones, a concept that, while some solid success stories are being written, remains controversial.

The concept originated in the U.K., and the father of the enterprise zone is generally considered to be Professor Peter Hall of Reading University, England. The concept was adopted by the British government in late 1978; since then a dozen or so zones have been designated in Britain, and the success of several of them led to interest in the U.S. for a similar approach to redeveloping hardcore depressed areas.

The idea behind the enterprise zone is that government doesn't actually spend money for redevelopment. It offers, instead, a variety of incentives (including tax breaks) for private sector companies to locate and expand in the targeted areas. The concept fits well, in that fashion, with the Reagan Administration's goal of placing most of the country's economic development responsibility in the hands of state and local governments, working in conjunction with the private sector.

At the same time, a number of proposals for Federally-sponsored zones have been placed before Congress, and the Reagan Administration soundly supports the concept. But politics and a variety of other factors have stalled the Federal proposal.

But the enterprise zone as an economic development tool is alive and well at the state level, where 24 of the 50 states now have programs of their own. And don't you believe for one minute that enterprise zones are primarily a tool for redeveloping aging Frost Belt cities. Of the two dozen states, the split is exactly 50–50, Sun Belt vs. Frost Belt.

Further, five of the states with enterprise zone legislation are in the Northeast, 10 are in the South/Southwest, seven are in the Mid-west, and two are in the Far West. At the same time, enterprise zones aren't strictly an urban affair—several states have made provision for designating small cities in particular and rural areas in general as enterprise zones, aimed at coping with rural poverty.

In other words, enterprise zones are widely perceived as a tool for dealing with a wide variety of economic woes.

In Missouri, for example, the goal is to create jobs in economically depressed neighborhoods, and to provide for more growth for companies in the state. "We need these tax incentives to attract businesses, so a business can make a profit," says Gene McNary, St. Louis County executive.

In Kentucky, on the other hand, the goals are business and industrial growth, as well as neighborhood revitalization, according to the state's hand-out material. Both the Illinois and Florida enterprise zone programs emphasize increased participation by the business community in community improvement projects.

On the local level, the goals of those communities which have tried to get, or have actually gotten, zone designation range from "attracting new industry and encouraging rehabilitation of retail and residential activities," as is the case in Danville, VA, to redeveloping historic districts, as is the case in Lynchburg, VA, to increasing "the assessed value by 40%," as is the case in Roanoke, VA.

And while a number of the states that have programs have patterned them largely after proposed Federal legislation, there is by no means any "standard" enterprise zone plan of attack. Some of the criteria in particular are kind of repetitive, as a glance at the following listing of what the various states have to offer will show. Indeed, some state programs have more than a casual tie to what the Federal government wants to do.

Rhode Island's program, for example, which passed some three years ago, won't "operate or be implemented independently of Federal enterprise zone legislation," in the words of the bill itself. In other words, no Federal legislation, no Rhode Island enterprise zone program.

Texas, likewise, has a two-year-old law on the books, but the appointed State Enterprise Zone Board won't implement it until the Federal government does.

Nor is there any standard in terms of number of zones. Louisiana has designated some 630 zones in nearly 110 jurisdictions, and up to one-fourth of the entire state's land area is eligible for designation. Georgia, on the other hand, has only designated two zones, and the state's legislation reads that zones can only be designated within the city of Atlanta, nowhere else.

And about half of the states with programs have "competitive" designation; in other words, only a limited number of designations are allowed, and jurisdictions (cities, counties, etc.) have to compete for them. The other states have "non-competitive" programs, with designation on demand as long as a proposed zone meets the appropriate criteria.

And finally, 23 of the 24 with programs went the legislative route; *i.e.* legislation was passed in the statehouse and signed into law by the governor. The 24th, Pennsylvania, has an "administrative" program. There's no specific law on the books, in other words, but a program was developed to target existing programs for use in specific areas that are distressed.

Enterprise zones should "not be considered a panacea for the economic problems facing our cities," feels Howard Wise of the state of Ohio's Business Development Division. "Rather, they should be considered an additional tool to be used to reduce welfare and unemployment costs and to revitalize the cities through encouragement of business expansion."

"Success or failure depends on the local commitment," according to a spokesman for the state of Illinois. "Determination of the specific objectives and day-to-day administration is the responsibility of the local government sponsoring the zone."

A report by the National Council on Urban Economic Development (CUED) points to several factors upon which success depends: Political and bureaucratic support; private sector support; local capacity and ability; changing market conditions; condition of physical plant; and zone management.

And, according to a recent report by the National Association of State Development Agencies (NASDA), "an enterprise zone will have little success if communities and businesses are unaware of its existence. To work, an enterprise zone must have an effective marketing program."

There's the rub. It's tough to market an area with high unemployment, vacant land and empty buildings, and such other urban woes as high crime. The answer, according to Gerald Burgess, manager of the Portsmouth, VA enterprise zone, speaking at a recent NASDA meeting, is to de-emphasize the distress element and emphasize the incentives and benefits.

Finally, Robert Simonds, enterprise zone coordinator for the Missouri Department of Economic Development, feels that success depends on sticking to your original philosophy. In some cases, he explains, "the selective procedure has been opened up to include entire metropolitan areas, and even entire states, and they've found themselves buried in an avalanche of paperwork and bureaucracy. I think some have lost the whole concept and are trying to focus with a

shotgun when they should be looking down a rifle barrel to specific cases they can clearly identify."

The states which have had programs in operation for a long enough time to judge how they've worked must be doing something right, because some of the numbers are impressive. In Virginia, for example, the zone in the community of Saltville has drawn four new businesses. Saltville, a town with 2,400 people in nearly nine square miles (it's one of the state's two rural zones) was devastated more than a decade ago when Olin Chemical's local plant shut down at the cost of more than 1,000 jobs. And the zone in Roanoke has been able to save a Coca Cola bottling facility and 170 jobs, with the added benefit of 89 new jobs.

In Kentucky, on the other hand, for the first full year after the initial zones were designated in Louisville and Hickman, activity in 51 businesses created or retained more than 1,200 jobs. Louisville's zone alone retained or created about 1,000 jobs, and 300 of the new jobs went to people who had been unemployed for at least a year. More recently, the designation of a zone in Covington brought the announcement of a Gibson Greeting Card plant that will create up to 600 jobs.

Kansas attributes a total of more than $200 million in capital investment to its own enterprise zone program. In Topeka, for example, Santa Fe Railway decided to build a $40 million office complex and retain 2,000 jobs rather than move out of state; Frito Lay has undertaken a $30 million expansion adding 100–150 new jobs; and Goodyear has expanded to the tune of $60 million and 300–400 new jobs, with another expansion already planned.

Indiana's first six zones, according to state figures, have seen significant small business activity. Richmond's zone has four new start-ups; Anderson has had a laundry facility expansion that is adding 30–40 jobs; and Anderson's zone has seen considerable activity, including the Anderson Co.'s decision to stay instead of moving out of state. That saved 1,000 jobs and added 100 new ones.

In Illinois, the state's first eight zones created nearly 1,000 new jobs through last fall, saved more than 2,000 more, and have 2,000 additional jobs in the planning stages. Investment during the first year for the eight was more than $40 million. The "Back-of-the-Yards" zone in Chicago has retained, renovated and expanded several companies; Decatur had 90 projects underway, yielding $7.3 million in value added, through last fall; Will County (Joliet, Lockport, Rockdale) had 31 startups and expansions creating more than 500 new jobs; and a $300 million renovation was recently announced for Corn Products Co. in Bedford Park/Summit zone.

Louisiana officials are projecting, based on approved projects under contract, more than 6,600 new jobs, more than 4,500 construction jobs, and some 4,500 retained jobs over the next five years. They also project that for that period, $2.12 will be returned to the state for every $1.00 given up in incentives. Total projected investment approaches the half-billion-dollar mark.

And Missouri estimates that the first three zones added more than 1,200 new jobs and $14 million in investment during the first year (only three had been designated at that point; the state now has 12).

Connecticut's six zones attracted more than $107 million in investment in the first year and 11 months of the program, representing 367 projects and more than 7,100 jobs. Some 3,700 of the latter were new jobs. In the zone in Bridgeport alone, there have been 46 startups in the first two years, and 18 of those are minority-owned. Most impressive of Bridgeport projects include a $5 million industrial park on a former drive-in theatre.

"These are impressive numbers," feels Connecticut Governor Bill O'Neill. "This program is proving to be the most powerful approach yet to rebuilding our urban neighborhoods."

Other support of the enterprise zone concept has been increasing. Last year, for example, the Sabre Foundation, a Washington, DC "think tank," did a study, the results of which indicated that zones already set up in 182 communities (at that time) "have been hugely successful."

The biggest winners? According to the Sabre study, unemployed and low-income workers accounted for some 30% of all hirings related to enterprise zone growth. In addition, local officials reported that more than 4,000 jobs were saved because of businesses that had planned to move but decided to stay because of the new range of incentives suddenly being offered.

In short, growing success is inarguable; the long-term prognosis could probably be considered as "cautious optimism." Undoubtedly, however, the programs in a few states haven't really scored the big one yet.

But all things considered, a solid and improving track record among state-level enterprise zone programs may well prove to the folks on Capitol Hill that they work, and that could help build the pressure for getting Federal legislation off the back burner and onto the books.●

TRIBUTE TO MORMON PIONEERS

HON. RICHARD STALLINGS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. STALLINGS. Mr. Speaker, I would like to take this opportunity today to pay tribute to Mormon—Church of Jesus Christ of Latter-day Saints—pioneers who entered the Salt Lake Valley on this day in 1847 after a lengthy, difficult trek across the country.

These pioneers, driven from their homes with few possessions, braved harsh weather, sickness and other dangers in search of a place to live and practice their religion in peace.

Hundreds of cities in the West, including many in the Second Congressional District of Idaho which I represent, trace their roots to these pioneers. The histories of these cities reflect the stamina and spirit typical of these pioneers. Many cities bear the names of these pioneers.

Today many residents of my district are honoring this pioneer heritage with parades, picnics, rodeos and other activities.

Wilford Woodruff, a member of the Mormon Church who entered the Salt Lake Valley July 24, 1847, with a body of Mormons including the church's president, Brigham Young, detailed the feelings of many of the pioneers as they looked over the Salt Lake Valley for the first time.

His journal records:

We gazed with wonder and admiration upon the vast fertile valleys which lay for about 25 miles in length and 16 miles in width, clothed with the harvest garb of green vegetation in the midst of which lay a large lake. Our hearts were surely made glad after a hard journey from Winter Quarters of 1,200 miles.

Woodruff said thoughts of orchards, vineyards, gardens and fields, which would soon cover the area, were pleasing to them. Before he cooked dinner that first night, he planted a half bushel of potatoes. This exemplifies the spirit of these early settlers.

Today, 138 years after Woodruff dreamed of the progress to be made in the Salt Lake Valley, we enjoy the heritage of these stalwart pioneers.

I pay tribute to them today.●

NATIONAL LABOR RELATIONS BOARD CELEBRATES 50TH ANNIVERSARY

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. FORD of Michigan. Mr. Speaker, the National Labor Relations Board celebrates its 50th anniversary this year, but the working people and unions the Board was created to protect have little to celebrate. Under the chairmanship of Donald Dotson, who believes unionized labor relations to be a major contributor to decline and failure of once healthy industries, the Board has adopted an antiunion bias that is totally at odds with the purposes of the National Labor Relations Act, which are to promote collective bargaining, a process which requires unions and unionized labor relations, to eliminate the inequality of bargaining power between companies and workers, and to increase the wages and purchasing power of wage earners.

The major decisions of the Dotson board show a pervasive hostility to collective bargaining. Dotson has written—and refused to repudiate—that "collective bargaining frequently means labor monopoly, the destruction of individual freedom, and the destruction of the market place as the mechanism for determining the value of labor." His hostility to the NLRA's most fundamental goals dominates the Board's decisions, where Dotson and Mr. Reagan's other appointees have narrowed the scope of bargaining, made it easier for employers to move operations from union to nonunion sites, given internal union rights to nonmembers and free riders, and used the Board's injunctive remedies disproportionately to assist employers

while refusing to assist employees. Dotson's board has crippled unions' ability to enforce strike discipline, punished the victims of wrongful discharges while rewarding the wrongdoers, sanctioned the destruction of decades-old bargaining relationships, eliminated protections for whistleblowers and individual employees concerned about health and safety, and sowed confusion and confrontation in industries that were developing cooperative industrial relations.

Mr. Dotson lamely defends his abysmal record by pointing out that the courts have affirmed many of the Board's reversals of precedent and have even led the Board in some instances. In many cases, however, the courts' affirmances say no more than that the Board's interpretation of the law was not plainly irrational—hardly an endorsement. But insofar as Mr. Dotson is right, he makes a strong case for legislative reform of the National Labor Relations Act. The courts cannot be relied on to construct sound labor relations policy or to restrain the Board's excesses. As Congress recognized when it passed the Norris-LaGuardia Act in 1932, the court's role in labor relations should be strictly limited. Historically, the judiciary has shown little sympathy for labor unions or the rights of employees in the workplace. Legislative changes are needed to restore the act's integrity and relevance.

Two unusual sources of concern for the rights of unions and the future of collective bargaining have recently condemned the excesses of Mr. Dotson and the NLRB. The Washington Post recently editorialized that the "Reagan board has gone too far." A Business Week commentary on the emasculation of the labor movement's most important economic weapon, the strike, concludes that the NLRB and the courts have undermined collective bargaining and flouted the intent of Congress.

I ask that both of these commentaries be printed in the RECORD.

[From the Business Week, July 15, 1985]

A HOST OF STRIKEBREAKERS IS TIPPING THE SCALE AGAINST LABOR

(By John Hoerr)

A strikebreaker is a traitor to his God his country, his wife, his family, and his class. Attributed to Jack London.

This was what working-class America believed 75 years ago, or even 30 years ago. But crossing a picket line today carries little of the old social stigma, and people do it with no more feeling of guilt than comes from crossing the street against a red light. Indeed, strikebreaking is occurring so often, and in such highly visible strikes—the pilots' walkout at United Airlines Inc. is a recent example—that it is raising some fundamental questions about federal labor law.

In Chicago, a federal district judge is expected to decide soon whether United violated the law in the way it used strikebreakers to continue operations during the 29-day strike. In Washington, the Supreme Court on June 27 declared illegal a union rule that prohibits members from quitting their union during a strike to return to work. This ruling will have a limited impact, because many unions don't have such a provision. But a 5-to-4 decision was the latest in a series of rulings by courts and the National Labor Relations Board that have reduced labor's strike and bargaining power.

In the wings. There have always been workers willing to take strikers' jobs. But the idea of living with unions dominated management thinking for the first 25 years or so after World War II, and most large unionized companies simply closed their gates during strikes. They didn't want to stir up hatreds by hiring "scabs," thus risking stormy relations with the union after the walkout. But increasing competitive pressures and the existence of what AFL-CIO President Lane Kirkland calls "an army of long-term unemployed" have motivated more and more companies to hire strikebreakers.

Some notable examples include the failed strike in 1981 by air traffic controllers against the federal government, walkouts at Greyhound, Continental Airlines, and Phelps Dodge in 1983, and an eight-month strike last year at Danly Machine Corp. in Chicago. In these cases, management found an abundance of jobless people, or workers who wanted to find better jobs, who were willing to cross the picket line. One counterexample is United, which tried—but failed—to lure some 500 trainees across the Air Line Pilots Assn. picket lines.

Workers gained the right to join a union, engage in collective bargaining, and strike to support their demands in the Railway Labor Act of 1926—which covers railroads and airlines—and the National Labor Relations Act of 1935 [NLRA]. The idea behind both statutes is that the union would pit its ability to shut down a business against the company's ability to withstand a strike, and the outcome would reflect the free play of economic forces.

BROKEN PROMISES

But as far back as 1938 the Supreme Court ruled that management could hire "permanent replacements" for strikers. An employer can keep the strikebreakers on the payroll after the walkout is over, even if some strikers don't immediately regain their jobs. Another Supreme Court decision, in 1983, fosters this practice. If a company promises permanent jobs to strikebreakers and then fires them at the end of a strike, the workers can file suit for damages in state court.

Moreover, under other court decisions and NLRA amendments, permanent replacements have the right to vote in an election to decertify the union. But striking workers lose the right to vote after they have been on strike for more than a year. Thus, strikebreakers last year voted to oust Phelps Dodge's unions.

Some labor law specialists, including Paul C. Weiler of Harvard University and William B. Gould IV of Stanford University, contend that the "permanent replacement" rule was wrong to begin with. They note that one of the NLRA's main goals was to prevent employers from firing workers who went on strike. "The employer can't fire you for striking, but he can replace you," Weiler says. "Workers can be excused for not seeing the difference." Adds Gould: "The increasing number of employers who are willing and able to rely upon permanent strikebreakers seems to me to be completely antithetical to the purposes of the NLRA."

BIG TROUBLE.

Weiler and Gould favor the use of "temporary replacements" who would gain a permanent status only after the strike has lasted a certain period. However, management attorneys argue that companies are merely exercising their economic strength by hiring permanent substitutes. James C. Paras, a San Francisco lawyer who represents companies, says that focusing on the legal issue of replacements obscures what is really happening. "The legal rules have not changed significantly, but the environment has," Paras says. "We live in the era of the individual, not the organization person, and that is causing the unions a great deal of trouble."

It is true, of course, that unions too often ignore their own shortcomings and tend to blame the law or the Reagan NLRB for their decline. Nevertheless, it is hard to avoid the conclusion that the trend of judicial and legislative law is eroding labor's ability to conduct an effective strike. The NLRA's original goal was to eliminate the "inequality of bargaining power" between companies and individual workers by encouraging collective bargaining. To the extent that strikes are no longer viable options, collective bargaining as envisaged 50 years ago by Congress is also diminished.

[From the Washington Post, July 6, 1985]

TILTING AGAINST LABOR

The 50th anniversary of the National Labor Relations Act comes at a time not of celebration but dispute. In a series of decisions mostly freeing employers from past restraints, Reagan administration majorities on the National Labor Relations Board have affected the balance of power in the work place. Even before these decisions labor wanted to amend the act; it tried in 1978 but failed. Now some labor leaders have said—and only in part for the shock value—that they might be better off if the act were repealed. The NLRA is the nation's fundamental labor law; it was written to bring labor disputes off the street. But the largest union in the AFL-CIO, the United Food and Commercial Workers, has now announced it will conduct its organizing drives where possible outside the NLRA framework, which it says is more hindrance than help.

The unions say that the Reagan board has unbalanced the law, taken it to extremes. They offer a long list of examples, some minor, some major. Thus the board has relaxed old rules meant to keep employers from making either threats or special promises to employees during organizing drives. It has weakened rules meant to safeguard the right of pro-union employees to sign up union members on company premises during the work day. It has indicated it will no longer protect against retaliation workers who turn their employers in to public agencies for violating health and safety laws. On a broader issue, it has expanded the right of employers to transfer work from union to non-union plants.

The board and its defenders say that this labor rendering of the record is itself unbalanced, that the Reagan board is simply redressing the tilt of its Carter predecessor and that the current swing is no different from others when the board has changed party hands in the past. They note that on several issues the courts have upheld the Reagan board; the Supreme Court last week upheld a board ruling that unions may not bar members from resigning during or just before a strike.

But many of the precedents the new board has altered date not from the Carter administration but the Nixon-Ford years and before. In routine cases involving charges of unfair labor practices, moreover, the Reagan board has held for management much more than either the Carter or Nixon-Ford boards, whose records were about the same.

We think the Reagan board has gone too far. The issue is not so much labor versus management as it is economic health. The Reagan board's holdings point to continuing low-level labor-management strife that an already burdened economy should not have to bear. Labor unions themselves have done some damage to the economy, taking some U.S. industries out of competitive range; in recent years they have paid for this, in lost work and at the bargaining table. But unions on balance are constructive institutions now in weakened condition, the public policy should not seek to diminish them.●

CLEAN COAL TECHNOLOGY

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, July 24, 1985 into the CONGRESSIONAL RECORD:

CLEAN COAL TECHNOLOGY

Recent positive developments in energy have been good news for consumers, but they are also lulling us into a false sense of energy security. As oil supplies have increased and domestic consumption has decreased, interest in boosting energy production and in developing alternative domestic energy sources has declined. Construction of new electricity generating plants has slowed, spending on solar energy development is down, and domestic exploration efforts are being reduced. Increased energy demand from a continued economic recovery may result in energy shortages greater than we have experienced in the past. The current energy "breathing period" is not a time for complacency; it presents us an opportunity to ensure our long-range energy security. We must begin to take the necessary steps to develop stable and reliable domestic energy sources.

Coal is a major source of energy we should develop. America's coal resources are enormous. Recoverable reserves total about 300 billion tons, 30 percent of the world's coal reserves and about 90 percent of our domestic fossil fuel supply. Our coal supplies could last for centuries, even in the face of increased demand. Indiana has a significant share of the U.S. supply, ranking among the top ten states in both coal production and coal reserves.

Despite these vast resources and coal's key role in the last four Presidents' energy plans, coal has not lived up to its potential. Events in recent years, including the 1973 OPEC oil embargo, the rising price of natural gas, and the controversy over nuclear power, have given coal a boost. Since 1974, coal's share of our domestic energy supply increased from 18 percent to 23 percent a significant increase, though less than expected.

There are several obstacles to the increased use of coal. Over 80 percent of our domestic coal consumption goes to generate electricity, but electricity demand is down due to conservation and sluggish economic growth. The cost of producing synthetic fuels from coal has turned out to be higher than expected. The decline in oil prices has reduced incentives for conversion from oil-fired units to coal. Deregulation has increased the cost of transporting coal, and new coal slurry pipelines have been blocked. Other countries are boosting coal production, challenging our coal exports and even penetrating U.S. markets. High severance taxes in some western states on coal shipped out of state have increased the price of coal. Federal leasing of coal reserves has been halted since the controversy over former Secretary of Interior James Watt's leasing policies.

However, the main barrier to expanding coal use is environmental: air pollution resulting from burning coal. The major problem is "acid rain", which can result when sulfur oxides from coal combustion mix with chemicals in the atmosphere to produce rainfall with increased acidity. Acid rain may cause trees to die near industrialized areas. High sulfur coal found in Indiana and throughout the east and midwest is a particular concern. Another worry is the so-called "greenhouse effect", the possibility that carbon dioxide produced by burning coal and other fossil fuels could trap the sun's heat in the atmosphere and eventually cause major changes in the world's climate.

Technology is available to burn coal more cleanly, but it is expensive. "Scrubbers" in smokestacks remove sulfur oxides from coal smoke. Wet scrubbing, the most widely-used method, increases the cost of generating electricity by 15-25 percent.

Because a large share of America's coal reserves has high sulfur content, significant attention is being given to developing clean coal technologies. The federal government assists this effort primarily by funding the early stages of research and development. Last year it spent $65 million. Several technologies are promising. One would remove pollutants by using advanced chemical and physical cleaning at the mine-head. Physical deep cleaning of coal could be commercially available in the early 1990s, though it could nearly double the cost of coal. Another involves developing chemicals to be added during combustion to reduce the production of pollutants. Perhaps the most promising technology employs "fluidized bed combustion", in which crushed coal is burned on a bed that is suspended—fluidized—by air blown through it. The bed also contains limestone to capture emissions. This technology is already commercially available for smaller industrial-size boilers, but not for larger utility—size units. Such units could be ready by the early 1990's, generating electricity as much as 100 percent cheaper than electricity from traditional coal plants equipped with scrubbers.

Research is also being done on alternate uses for coal. One approach uses a coal-water mixture, a liquid containing 70 percent pulverized coal with properties similar to fuel oil. In a few years, this mixture could be cheaper than oil. Work is also continuing on the production of synthetic fuels from coal. Liquid synfuels from coal are currently about 3 or 4 times more expensive than crude oil, but more promising coal gasification plants have been built.

Congress should continue to promote clean coal technologies. In a major step last session it created the Clean Coal Technology Reserve, to be funded by money taken from the Synthetic Fuels Corporation. This reserve complements the federal clean coal involvement in research and development with demonstration projects. It seeks to accelerate the commercial use of promising technologies by joint government-private sector funding efforts.

Our ability to expand coal use in the future will depend heavily on the successful introduction of clean coal technology. Indiana has a major stake in the success of this technology. Our nation has the world's largest coal resources. We must ensure that coal, and other domestic sources of energy, bring us a better measure of energy security in an insecure world.●

CONGRESSIONAL SALUTE TO MARY O. AMEMIYA

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. MATSUI. Mr. Speaker, I rise today to acknowledge and commend the outstanding public service record of one of my most respected constituents Mary Amemiya, who retired June 30 after more than 23 years of employment with a variety of local, State, and Federal agencies. For the past 6 years, she has served as district secretary and office manager for my California congressional office, effectively performing her duties with enthusiasm and determination.

Mary began her government service career with the State of California in 1941 when she went to work for the department of social welfare as a junior stenographer. Her life took a dramatic turn in 1942 when she and her family were sent to a relocation camp in Amache, CO, as part of the U.S. Government's internment of Americans of Japanese ancestry. But being the persistent person that she is, Mary battled against this personal setback, even working for the Department of Interior's War Relocation Authority as a clerk-stenographer for 2 years while in camp.

After the war, Mary worked 2 years as a clerk-stenographer for the War Department's Separation Center at Camp Beale, CA. In 1947, she became the secretary for the regional supervisor of the Bureau of Reclamation in Sacamento. Following a 12-year leave of absence to raise her family, Mary became a legal secretary for Sacramento attorney Henry Taketa. In 1970, she returned to the public sector as secretary to the personnel director for the city of Sacramento. She remained in that job until joining my staff in 1979 as district secretary and office manager.

I know that after 32 years in public and private sector employment, Mary is looking forward to a well-deserved rest and change of pace. She and her husband, George, a longtime pharmacist in Sacramento who is nearing re-

tirement, have been married 38 years and they have three children, Denise, Alan, and Gayle.

Mr. Speaker, I ask that my colleagues join me in expressing our appreciation and thanks to Mary Amemiya for her many years of loyal and dedicated service to the people of Sacramento County, the State of California, and the United States of America. We all owe her a great debt of gratitude for serving as an inspiring role model for the positive and very desirable attributes of dedication, competence, and hard work.●

TURKISH INVASION OF CYPRUS 11 YEARS AGO

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. FLORIO. Mr. Speaker, on July 20, the international community again mourned the passing of yet another year since the illegal occupation of Cyprus by Turkish troops 11 years ago. Eleven years ago, Turkish troops violated the small nation's territorial integrity by invading the island and wreaking havoc and destruction among the island's inhabitants. Today, 11 years later, 18,000 Turkish troops still occupy over 40 percent of Cyprus and pose an ominous threat to the island's Greek Cypriot population.

And yet, despite the passage of 11 years, a solution of the Cyprus conflict seems far away. For every positive step that has been taken over the years, the Greek Cypriots can recount a number of negative setbacks that have all but canceled out these positive initiatives. Despite the passage of 11 years, Greek Cypriots vividly recall the days when the Turkish army invaded Cyprus and displace 170,000 people. They can vividly recall the rape and pillage of a once prosperous and peaceful island. They can vividly recall the numerous casualties, the desecration of churches and cemeteries, the disregard of public outrage, and the creation of a new class of citizens who became refugees in their own land.

Mr. Speaker, it is past time for recalling these tragedies. It is time that we diligently persevere in negotiating a solution to this problem. Since summit talks between Cypriot President Kyprianou and Turkish Cypriot leader Denktash collapsed this past January, Mr. Denktash has held both parliamentary and presidential elections in his illegally occupied portion of Cyprus. Indications are that the Turkish Government intends to continue to maintain Turkish troops on Cyprus as a part of any settlement. Our Government must continue to emphasize that this situation is unacceptable, and we must continue to press for a just and viable solution.

On February 7, 1985, I was joined by 18 of my colleagues in introducing House Concurrent Resolution 56, a resolution calling for the establishment of a Cyprus Cooperative Development Fund to support projects on the island that would foster cooperation on the island. Currently, both sides remain divided and there is no opportunity for improving relations and for cooperating toward a mutually agreeable settlement. The fund would create a climate conducive for cooperation. I was pleased to see that similar provisions were incorporated in the House foreign aid authorization bill, H.R. 1555, which passed the House on July 11, 1985.

Recently, the U.N. Secretary General reported the preparation of a draft agreement which represents the formula most likely to lead to a just and lasting solution to the Cyprus problem. Though the Greek Cypriots have accepted this agreement, the Turkish Cypriots have yet to reply. I hope that an affirmative reply will be given and I hope that the international community will strengthen efforts for a just and timely settlement.

The situation that currently exists on Cyprus is not acceptable and we are responsible for sending a clear signal to the Turkish authorities that we are convinced that the illegal partition of Cyprus is not only contrary to the interests of the Cypriot people, but also to those of the United States. It is our moral responsibility to work to ensure that the illegal occupation of Cyprus and the tragedy of the division is not prolonged.●

REAGAN TAX REFORM PROPOSAL LOWERS TAXES FOR ALL INCOME GROUPS

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. KEMP. Mr. Speaker, Warren Brookes' recent column contains figures from an analysis of IRS reports on individual tax returns. Brookes' study shows that nearly 75 percent of the claims for State and local tax deductions went to the highest 20 percent of all taxpayers. That deduction, in short, is an enormous subsidy to the wealthiest people of America, a subsidy that has to be eaten by lower and middle income Americans. Moreover, State and local tax deductibility is being used as a weapon unfairly to stop tax reform.

The column demonstrates, on the other hand, that the reduction in tax rates for everyone will benefit most working Americans in every income category, in New York State and in every State of the Union. In fact, the Greater Washington, DC, Research Center has published a report showing that low-income taxpayers will be getting the largest share of benefits under President Reagan's tax reform plan.

There are refinements in the details of the Reagan proposal that Congress can make to perfect it. But we cannot let tax reform be derailed by a few political leaders and special interest lobbyists who focus on one narrow provision and simply refuse to look at the advantages of reforming our unfair Tax Code and reducing tax rates for the whole family of America.

The article follows:

In 1984, New York Gov. Mario Cuomo was the Democratic Party's brilliant oratorical defender of the poor and downtrodden.

But in 1985 he has become the passionately articulate defender of rich taxpayers and government bureaucracies, in his role as point man in the fight against the Reagan tax reform plan.

While Mr. Cuomo attempts to wrap his rhetoric in the green sackcloth of the politics of envy by arguing that eliminating the state and local tax deduction will force cutbacks in services to the poor, he has in fact put his political clout into defending the rich at the expense of lower-income groups.

Mr. Cuomo's own 1982 campaign finance chairman, William Stern, chided him in a July 1 *Wall Street Journal* article for "demanding the continuance of one of the most indefensible deductions in the federal system. . . ." Mr. Stern is absolutely correct.

We have just completed an anlysis of the IRS summary of 1983 tax returns. And it shows that 74.2 percent of the $97.4 billion claimed in state and local tax deductions—$72.3 billion—went to the top 18.6 percent of income-tax filers: those with incomes greater than $30,000 who also itemized their deductions.

The other 25.8 percent ($25.1 billion) went to the 15.8 percent of all filers whose incomes were less than $30,000 but who also itemized deductions.

The largest group of all, however, the 65.6 percent of all tax filers—mostly earning less than $20,000—who did *not* itemize got *none* of the $97.4 billion claimed.

Since in 1983 Americans paid a grand total of $244.7 billion in state and local sales, property, and income taxes, more than 60 percent of those taxes, $147.3 billion, were not itemized or deducted.

So this may well be the most inefficient, and regressive, tax "loophole" in history—not only because it so heavily favors the top 20 percent—but because 60 percent of the potential deductions are swallowed whole, mostly by the lower-income groups.

To put it bluntly, in Mario Cuomo's New York state, because of this deduction which he is trying to protect, the rich are carrying a tax burden that is at least 30 percent *lower* as a percentage of their income than the average taxpayer's, and at least 50 percent lower than that of the renting poor, who get nothing.

That's Mr. Cuomo's "dirty little secret." He likes rich New Yorkers getting a big tax break, because they keep quiet while he taxes the middle and lower classes at the highest rates in the nation. But those folks who don't itemize are the very ones who

would benefit most from Mr. Reagan's lower tax rates and doubled exemption.

That's why the Greater Washington (D.C.) Research Center's July 1 report said lower-income taxpayers would receive the largest proportional benefits under Mr. Reagan's proposal.

The reason? Of the 58 percent of all federal tax return filers with incomes below $20,000, only 11.6 percent (less than 6.7 percent of all taxpayers) claimed deductions for state and local taxes, and they only got $7.6 billion, or 7.8 percent of the total.

This means the huge lower-income 58 percent of all taxpayers paid at least $65 billion in state and local taxes that they could not or did not deduct from their federal tax. Only lower tax rates could offset that harsh injustice.

Of the 21 percent of all the taxpayers in the $20,000-30,000 group, only 44.4 percent itemized, and this group got only 18 percent of the state and local deductions, or $17.56 billion—meaning that 56 percent of the taxpayers in this group failed to itemize at least another $23 billion in state and local taxes.

In short, the whole argument that removing this deduction would "put a tax on a tax" falls apart when more than 60 percent of all state and local taxes are being taxed by the present system.

This means that by far the fairest way to reduce this "tax on a tax" effect for all taxpayers is to wipe out the deduction completely, and use all of the $35 billion-$40 billion in immediate revenue proceeds *to reduce tax rates for everyone.*

A recent study by California's State Franchise Tax Board shows that President Reagan's tax plan will save individual California taxpayers a net of $3.2 billion. And what they lose in the state and local deduction ($4 billion) is more than offset by what they gain in rate reduction ($6 billion) and the doubled exemptions ($4.8 billion) which also help offset other lost deductions.

The prestigious accounting firm of Arthur Andersen did a study for the Joint Economic Committee of Congress, and found that even high-income, itemizing taxpayers in *every* state with taxable incomes of $50,000 and varying values of homes came out *ahead* with the president's plan. Even in New York City, Mr. Cuomo's home, taxpayers with a median home ($97,000 value) were $600 better off than under current law. And in the great "heartland" states of Ohio and Illinois, the savings were $1,200 to $1,700.

This is why Mr. Cuomo is blowing smoke on this issue. Just don't let that smoke blind you to the value of tax reform.●

THE "JUSTICE" DEPARTMENT

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. HUBBARD. Mr. Speaker, more and more Americans are becoming aware that the U.S. Justice Department is the most politically conscious, politically active agency in our Federal Government.

Today, in a front page news article in the Washington Post, we read the following written by reporters Ronald J. Ostrow and Robert L. Jackson of the Los Agneles Times:

UNITED STATES TO DROP FRAUD PROBE OF TEAMSTER UNION'S PRESSER—SOURCES SAY CASE LACKS PROSECUTIVE MERIT

(By Ronald J. Ostrow and Robert L. Jackson)

The federal government has decided to drop its 32-month-old labor fraud investigation of Teamsters President Jackie Presser, the Los Angeles Times learned last night.

The politically sensitive case, developed by Department of Labor investigators assigned to a U.S. strike force in Cleveland, is being dropped because the Justice Department has concluded that it lacks "prosecutive merit," sources said.

Ray Maria, the Department of Labor deputy inspector general who oversees labor racketeering investigations, said: "We have no pending investigation of Jackie Presser." He declined to elaborate.

The decision not to prosecute Presser, President Reagan's only supporter among major labor leaders, came six months after federal prosecutors in Cleveland recommended that Presser be indicted on charges of authorizing union payments to "ghost employes."

Presser's alleged status as a source of information for the FBI was a key impediment to prosecution, sources said. it also was learned yesterday that Justice Department officials have ordered a new inquiry into why the FBI did not tell the department for nearly two years that Presser had acted as an informer.

Providing information to the FBI does not usually give a person immunity from prosecution. But in Presser's case, there was unusual concern by FBI officials that information about other investigations might be disclosed in the course of prosecuting the labor leader.

Throughout the course of the investigation, Justice Department officials said politics would play no role in the highly visible case. Administration officials, led by Vice President Bush, were in contact with Presser, who served as cochairman of Reagan's inaugural labor committee in January.

The decision in the Presser case, according to sources, was made by Deputy Attorney General D. Lowell Jensen after conferring with Stephen S. Trott, assistant attorney general in charge of the department's Criminal Division. It appears that Attorney General Edwin Meese III removed himself from the case.

Meese, at his confirmation hearing this year, acknowledged he might have called Presser early in the Reagan administration to inform him that Raymond J. Donovan would be named secretary of labor.

Department officials reportedly advised Stephen H. Jigger, the Cleveland strike force prosecutor, of the decision at a meeting here yesterday.

The Justice Department decision is expected to be controversial because it rejected the recommendation of strike force prosecutors, whom department officials has sent back to the field for more work, delaying the case for nearly a year.

The strike force recommended that Presser be indicted on charges of fraud and conspiracy for putting "ghost employes"—cronies who get paid but do no work—on the payroll of Cleveland Teamsters Local 507, of which Presser is secretary-treasurer.

The decision came less than a week after the grand jury foreman, Robert A. Reading, Jr., confirmed that the jurors had complained to two federal judges in Cleveland that the Justice Department was dragging its feet in the case.

In an effort to resolve the issue surrounding Presser's informer status, Justice Department officials have ordered a full-scale review of the FBI's relationship with Presser.

"There are people in the Department of Justice who feel they were deceived and lied to" by the FBI, said one administration official who is familiar with the investigation.

But sources close to the FBI said officials there contend that the failure to disclose Presser's status as an informer resulted when the Labor Department reportedly did not inform the FBI in 1982 that it was investigating Presser and other Teamster union officials.

"Labor didn't tell them, and they didn't tell Labor," one official said. "In other words, it was a lack of communication."

But another source familiar with the case declared: "There's more to it than that." The question of Presser's status was raised directly early in the investigation, he said, "and the [FBI] categorically denied any relationship whatsoever."

Several months ago, the FBI acknowledged Presser's role as a source of information when prosecutors for the Cleveland strike force urged Justice Department superiors to authorize them to seek a grand jury indictment of the Teamster leader.

In addition to attempting to ascertain what the FBI disclosed about its knowledge of Presser, the FBI's internal inquiry is looking into what information FBI agents got from Presser, a source said.

"Trott and Jensen are very concerned about this case, particularly about the relationship of the agents to the source," one official said.

Mr. Speaker, the politically naive will perhaps be impressed that the net results of the 32-month old Jackie Presser investigation are that the Justice Department has ordered a full-scale review of the FBI's relationship with Mr. Presser and that the FBI will undergo an internal inquiry, looking into what information FBI agents got from Presser.

Those of us familiar with the Justice Department do chuckle when we read: "There are people in the Department of Justice who feel they were deceived and lied to by the FBI."●

TO UNDERSTAND THE UNIVERSE

HON. JOHN E. GROTBERG

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. GROTBERG. Mr. Speaker, as the Congressman representing the Fermi National Accelerator Laboratory—Fermilab—in Batavia, IL, I would like to bring to the attention of our colleagues the following article written by Dr. Leon Lederman, the Director of Fermilab. This is a well-reasoned article by Dr. Lederman detailing his great quest to unlock new secrets about high-energy physics. At this point, I would like to insert the article in the RECORD:

To Understand the Universe

(By Leon M. Lederman)

Prologue: It is an exciting time for high-energy physics. A tremendous amount has been learned in the last 30 years about elementary particles and fundamental forces, thanks to particle accelerators. Physicists are now on the brink of critically important new knowledge. To uncover that knowledge an expensive new tool is needed, the supercollider.

Leon Lederman, the director of Fermilab, the site of one of the most powerful accelerators now in existence, argues strongly that the supercollider must go forward. He reviews the state of high-energy physics, pointing out what has been learned and how close are the answers to questions that have intrigued mankind for thousands of years. He says that technology now or presently available makes the new accelerator feasible. Finally, Lederman argues that the contributions the supercollider can make to basic science and the resulting benefits to applied sciences and technology make the supercollider a bargain.

Leon Lederman received his Ph.D. from Columbia University in 1951. He has taught and done research at Columbia University. He served as director of Nevis Laboratories from 1962 until 1979 when he became director of Fermilab in Batavia, Illinois, a position that he holds today. Among other honors, he has received the National Medal of Science and the Elliot Cresson Medal, and shared the Wolf Prize in Physics.

In 1983 the high-energy physics community recommended to the Department of Energy that a new accelerator, about 20 times larger than anything existing today, be designed and constructed. The new accelerator, the Superconducting Supercollider (SSC), will cost about $4 billion [1] by the time it is expected to begin operations in 1994.

This extraordinary cost, about four times more expensive than any previous construction project in this field, has provoked a serious debate about priorities in funding basic science and about the proper balance between the federal government's support of scientific research and its other responsibilities. I believe that a close look at the issues involved indicates strongly that the supercollider should be constructed. In particular, the supercollider is critically important to the 2500-year search for the nature of fundamental matter.

The State of the Science. High-energy physics is the current designation of a research discipline that attempts to discover the fundamental laws determining the structure and operation of the physical world. It seeks to understand the nature of matter, energy, space, and time. The history of this discipline may be characterized by the continuing success of the powerful concept of atomism, the belief that matter is composed of ultimate, indivisible components that are too small to be seen directly.

The state of high-energy physics in the 1988s can be described as revolutionary. A tremendous increase in our knowledge has been brought about by experimental results emerging from particle accelerators constructed during the past 30 years in laboratories around the world. Accelerators are designed to produce streams of very energetic particles that are directed at nuclear targets. The collisions release products that are detected by a variety of sensitive instruments. The combination of accelerators of increasing energy and particle detectors of increasing sophistication gives physicists a kind of microscope capable of studying phenomena at ever smaller distances.

Progress in assembling these data into a coherent theoretical structure has also been dramatic. A major synthesis has been formulated over the past dozen years. Such is the power of this radically new insight into the workings of the physical world that it successfully accommodates all the experimental data that have emerged from all the world's laboratories. It includes the two previous revolutionary theories of the twentieth century, the quantum theory and the theory of relativity. It is called the Standard Model. It is in fact the illumination provided by this synthesis that has led to the proposal to build the supercollider, an accelerator with an effective energy 70 times greater than any machine now in operation.

It is useful to recall that the goal of high-energy physics is to identify the most elemental objects whose combinations build up the things of our world in endless variety. Not only must the basic particles be identified but we must understand the forces that act between these particles, causing them to move, vibrate, change species, cluster, and bind to form the higher-order structures.

The Standard Model identifies the candidates for the fundamental building blocks as quarks and leptons. It provides a powerful new mathematical formulation (known as gauge theory) for the four basic forces. It also takes a giant step, the electroweak theory, in the 50-year search for a unifying principle. All of this has brought high-energy physicists to a new level of understanding of the physical laws.

And yet we wish to argue that this synthesis, by its very power, requires the construction of a new accelerator, the supercollider.

The reason for such an assertion is that the Standard Model is logically imcomplete. For example, the model does not account for the masses of the quarks and leptons or for the pattern of families of particles. Why are there three families? Are there more?

There is also a failure of that simplicity that has proved to be so powerful a guide in the history of high-energy physics. There are about 20 parameters contained in the Standard Model. Designing the world this way, the Creator would have to have set 20 dials carefully at seemingly arbitrary values. This has led many of my colleagues to assume or to speculate that another layer of atomism is called for—that the apparent complexity can be accounted for by a smaller number of truly primordial objects, the constituents of quarks and leptons. If this is true, a new force must operate to bind these objects into quarks and leptons. Further significant progress in unification of forces would be impossible without knowledge of this new force.

Over the past five years or so, theorists in quests of unification—of a simpler picture—have generated a vast literature of speculation. The power of the Standard Model serves as a guide and as a strong constraint on new themes. A key task is to define a domain of energies in which experimental facts would resolve current incomplete understanding. Considerable study over the past three years has resulted in a consensus that the new accelerator needs to be a collider that will provide 40 trillion electron volts (TeV) by the head-on collisions of 20 TeV protons.

Support for this proposal comes from a surprising quarter. Astrophysicists have determined that creation of the universe we now observe took place in a primordial explosion called the big bang. After this seminal event the universe expanded and cooled. It follows that the very young universe was hot enough to dismember all composite structures into their irreducible components. Thus, there was a time when all the quarks and leptons in the currently observable universe were compressed into a submicroscopic domain at indescribably high temperatures. If quarks are not basic particles but are composite, then their constituents were also free. The identity and the properties of the basic particles and forces are fundamental to the subsequent history of the universe. The joining of cosmology and particle physics is a major facet of the scientific drive for the supercollider. Clearly, our understanding of the evolution of the universe now depends on the clarifications of the Standard Model that high-energy physicists so urgently seek.

More generally, the supercollider will be the most sensitive probe ever to test our basic understanding of the very nature of space and time.

Accelerators. The experimental measurements that have enabled scientists to reach their current state of knowledge were made possible by new inventions in accelerator and detector technology. On the accelerator side there has been an evolution of the energy of accelerators from the 100 million electron volt (MeV) range in 1950 to the 1000 billion electron volt (GeV) level in the 1980s. At the same time the cost per MeV has been reduced by a factor of 100. Even more dramatic has been the development of colliders, in which counter-rotating beams of high-energy particles collide head-on. In conventional accelerators the accelerated particles (protons or electrons) are made to collide with stationary targets, and much of the energy goes to imparting momentum to the collision products. However, in head-on collisions all of the energy is available to produce new particles or to explore smaller spatial structures. At the European Center for Nuclear Research (CERN) in Geneva, head-on collisions of 300 GeV protons with 300 GeV antiprotons make 600 GeV available, the current world's record.

On the detector side observation and analyses of the collisions have been spurred by the invention of the bubbie chamber and of a sequence of electronic counterparts of increasing resolving power. This progress has included mastery of fast digital electronics for data acquisition and processing and of methods for managing and analyzing vast quantities of data.

Most recently entirely new computer architectures have been developed to cope with the quantity and detail of the information being sought. The results of this continuous evolution have been observations of great sensitivity, which have yielded the data base for the Standard Model. The supercollider will pose a tremendous challenge to the instrument makers as well as to the engineers and industry people who must build this formidable machine.

Building the Supercollider. Acceleration depends on creating a gap between two charged electrodes across which a voltage appears as the particle begins its traverse. The energy gain per gap crossing is typically on the order of 1 million volts. To gain substantial energy, many gaps can be arranged in series. The result is a linear accelerator. Another technique is for the accelerator to

[1] This sum, given in constant 1984 dollars, includes the cost of particle detectors as well as R&D and preoperating costs. It also includes about $0.8 billion set aside for contingency.

employ a single gap and bring the particles back to it many times by forcing them into a circular orbit. Thousands of crossings per second can thereby be achieved. At the 6 kilometer circumference accelerator of the Fermi Laboratory in Batavia, Illinois, particles execute 50,000 orbits per second and can gain 1 TeV in about 20 seconds.

The bending of particles into circular orbits is accomplished by magnetic fields, and the engineering effort is dominated by magnets. The more energetic the particle, the stronger the magnet required to maintian the circular path. Thus, the energy of the accelerator is given by the strength of the magnet and by the radius of the accelerator. Fermilab's Tevatron uses superconducting magnets that can contain a beam of 1 TeV in a radius of 1 kilometer. The supercollider may use improved magnets that are close to the maximum strength that can be confidently produced in the quantities and with the quality required. To contain 20 TeV particles with these magnets, the radius of the machine will have to be about 15 kilometers.

As currently planned the supercollider will consist of two rings containing protons circulating in opposite directions and guided by superconducting magnets. Protons are brought into collision in six places around the rings. Much of the confidence in the technology comes from the successful operation of the Tevatron at Fermilab. There, a 6.3 kilometer ring of superconducting magnets has been operating since mid-1983. The Tevatron has employed large systems of cryogenics, computer controls and diagnostics. Another source of confidence in the SSC design is the success of the European proton/antiproton collider at CERN. Whereas it was not obvious that one could read physics results out of the complex collisions, the spectacular discoveries and amazingly clear patterns of this collider have clearly indicated the appropriate technique for the 1990s. In short, current technological expertise makes the supercollider feasible.

Perspective. The intellectual heritage of particle physics is awesome. The search for a logical and parsimonious description of the physical world forms a continuous road of intellectual history that can be traced backwards in time. It goes back through the founders of the quantum theory, relativity, and the experimental data that called forth these revolutions. It connects Maxwell, Faraday, Newton, Kepler, Galileo, and Copernicus. It joins side roads leading off to new disciplines: quantum chemistry, molecular biology, materials science, electronics, and computer science. The impact of this scientific activity on society is immense. To take only one measure, it seems clear that some significant percentage (10 percent? 30 percent?) of the U.S. $3 trillion gross national product is derived from the technology produced by the forebears and relatives of particle physics.[2] It is conceivable that the discoveries that will emerge from SSC research may never have practical application. If so, however, it will be for the first time in history. Accelerator physics continues to produce technological spin-offs at a rate that defrays much of its cost to the public.[3]

[2] L. M. Lederman, "The Value of Fundamental Science," *Scientific American* (November 1984): 40-47; see also M. Bianchi-Strest, et al., "Economic Utility from CERN Contracts," *CERN* (December 1984) 84-14.

[3] Bianchi-Strest, et al., "Economic Utility from CERN Contracts."

Although it is not possible to predict exactly the scientific outcome of SSC research, it is likely to move the scientific frontier beyond the Standard Model, perhaps toward alternative models already developed by theoretical physicists: Technicolor, Supersymmetry, Grand Unification, Compositeness, and so on. Then again, we may be in for a great surprise. A totally new conception of reality may emerge. There is even the possibility that the supercollider will become an adequate bridge to that great accelerator in the sky, the early universe.

The Real World. Can the United States afford the supercollider, especially at a time when the effort to control the federal deficit is causing cuts in so many government programs? High-energy physics has been supported at an average annual level of about $550 million (in constant 1984 dollars) over the past four years. If the supercollider is approved, it can be assumed that an increasing proportion of this sum will be applied to the new accelerator between now and 1994. Furthermore, supercollider construction costs will require approximately an additional $350 million a year averaged over the period 1987 to 1994. This increment, though, may be reduced somewhat by the results of a vigorous R&D program now proceeding and by international collaboration, which is also being intensely pursued. The high-energy physics community has been reasonably responsible in its 30-year history, closing still-useful accelerators to make funds available to construct and operate essential facilities. Operation of the supercollider, estimated at about $250 million per year, may require further reduction in the number of facilities to keep the operating costs near current levels. The funding problem is made more difficult by an increasing number of scientific disciplines that will require expensive, shared research facilities over the next decade. Some examples are oceanographic vessels, telescopes, plasma devices, and accelerators for materials science and nuclear physics. Small science is an essential component of the total scientific activity and must also be nurtured.

The United States does face a major federal budget deficit crisis. We are also in the midst of rapid change as technology and technological competition increasingly dominate the economy. Particle physicists need the supercollider for the viable continuation of their discipline. In weighing the cost of the supercollider, our decisionmakers must not lose touch with history. If at any stage, for whatever reason, we have abandoned the road to research in particle physics, progress in other sciences and science-based technologies would have been immeasurably more difficult. This applies to semiconductors and transistors, quantum optics and lasers, supercomputers, biotechnology, space science, synchrotron radiation for materials science, and so on.

In my view a supplement of $1 billion to $2 billion a year, implemented over the next five years, with careful review for scientific merit, would fund the highest-priority basic research needs. Over the last several years, we have in fact made a good start towards revitalizing our research capabilities. This added sum would be the wisest possible investment to secure the future of the nation.

One can, of course, ask Why must the United States have the supercollider by 1994? One important reason is the career choices that gifted young scientists will soon be making. Opportunities for significant progress must fit comfortably within a scientific lifetime. In the case of high-energy physics, a much longer delay in the supercollider would surely compromise this requirement as high-energy physicists drown in speculative literature with only distant visas to confronting this speculation with data. In addition, such a delay would threaten the strategy that hopes to make the supercollider an internationally constructed facility located in the United States.

International science is traditionally a mix of collaboration and competition. In 1985 Europe is ahead and is in the midst of a $2 billion construction program. New facilities will be in place by about 1990. Modest but significant U.S. resources are involved there. European scientists continue to be active in U.S. laboratories. Costs and complexity are surely forcing a transition from duplication to complementary facilities. There should be closer collaboration in construction of facilities. We believe the supercollider is the correct scientific step. If we proceed with vigor, we are likely to be joined by Japan, Canada, and Western Europe as they complete their present programs.

What is at issue is the viable pursuit of a concept set forth most clearly in the Greek colony of Miletus in 650 B.C.: The universe is beholden to a rational order and the human mind is capable of comprehending this order. Consider that a scientific instrument, devised by inhabitants of a minor planet, may serve to illuminate the issues of creation, evolution and the mechanisms of the entire physical universe. The supercollider must be one of the most spectacular bargains ever offered to the American public!●

GOLDEN ANNIVERSARY OF SOCIAL SECURITY

HON. LAWRENCE J. SMITH

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. SMITH of Florida. Mr. Speaker, today, Congress celebrates the 50th anniversary of the passage of the Social Security Act. In light of the budgetary decisions now before us, it is particularly important that we remember the history of Social Security and the motivation behind its enactment.

On August 14, 1935, this monumental piece of legislation was signed into law by President Franklin Roosevelt, who stated, "I see one-third of a nation ill-housed, ill-clad, ill-nourished."

In its original form, the Social Security Act had three major components: old age insurance, what we now call Social Security; unemployment insurance; and public assistance.

Old age insurance was designed to help prevent the kind of widespread economic insecurity faced by the elderly during the 1930's. Benefits were to be provided when there was a loss or reduction of work in old age regardless of nonwork income.

Now some 50 years later, Social Security is the basic source of income for

the elderly—42 cents out of every dollar of income that the elderly receive comes from Social Security. Although the poverty rate for the elderly has declined, older Americans are heavily concentrated at very modest income levels.

Social Security is all that stands between a majority of senior citizens and poverty. If Social Security did not exist, the poverty rate among the elderly would be over 50 percent. Social Security keeps 17 million people out of poverty.

Social Security cost-of-living benefit increases were first provided in 1972. Even with an increase in supplemental security income [SSI], skipping the COLA for a year would put 400,000 older Americans into poverty. Even those seniors that would not fall below the poverty level are at income levels where they cannot afford to fall behind inflation.

The Social Security trustees report that Social Security is funded well into the next century. We must not sacrifice our senior citizens and renege on our promise just to achieve a "paper reduction" of the deficit.

As the 99th Congress continues to grapple with the budget, I remind my colleagues on both sides of the aisle of FDR's famous warning: "The American people are quite competent to judge a political party that works both sides of the street." We must make good on our pledge to older Americans. We must uphold our commitment to provide a strong permanent Social Security System for all Americans and full cost-of-living adjustments for today's Social Security recipients.●

OUR NUCLEAR CAPABILITY NOT TRAILING

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. AuCOIN. Mr. Speaker, I would like to bring to the attention of my colleagues a thoughtful article written by Mr. Bill Siverly in the Oregonian, on July 18, 1985. Mr. Siverly provides a concise and meaningful response to the allegation that the United States is falling behind the Soviets in our nuclear defense capability. As a fellow Oregonian, I commend the following article to my colleagues' attention:

UNITED STATES, SOVIETS HAVE SAME WARHEAD TOTAL: PLENTY

(By Bill Siverly)

Omissions and insufficient context marred a recent Forum column, "Missile critics ignore Soviet strength" (June 18).

The article warns that, "Weighing in at more than 240 tons, this monster (the Soviet SS-18) dwarfs our giant MX, which tips the scale at less than 100 tons."

But what does the weight of the two missiles have to do with anything?

"Throw-weight" has long been cast aside as a meaningful point of comparison in missile weaponry.

This concern for the physical weight or size of the missile reminds me of the Pentagon officials who bring model missiles to Senate hearings; little blue ones representing our missiles, and big red ones representing theirs.

It is true that the Soviets replacing 900-kiloton warheads with 550-kiloton warheads is not the good news that some might think.

If a nuclear warhead of either power should land anywhere near you, the relative kilotonnage will make no difference.

By the nature of nuclear detonation, 900 or 550 kilotons will kill you just as dead. The Hiroshima bomb was only 13 kilotons.

The article shows alarm at the Soviets MIRVing their SS-18s lest it grant them some advantage.

Yet U.S. weapons technology is presently ahead of the Soviets in two areas; miniaturization of warheads and MIRVing, which means providing missiles with multiple independently targetable warheads.

U.S. military planners figured out long ago that smaller warheads in the 300-600 kiloton range distribute more "bang" over a larger area than do large single warheads.

Large warheads, like much of the Soviet arsenal, are necessary when you don't have miniaturization and accuracy; small warheads and MIRVing are possible when you do have those advances.

Consequently, the Soviets are now working to catch up with a technology that the United States already has in place, a procedure accounted for in SALT II.

Accepting that the Soviets are MIRVing, the article's conclusion that they could destroy 73 percent of the U.S. Minuteman missile force by first strike again misses the point; only one-third of the U.S. nuclear force is tied up in land-based Minutemen.

The other two "legs" of the strategic triad are air-based and submarine-based, and in numbers and invulnerability of these, the United States far exceeds the Soviets, who have most of their nuclear forces invested in land-based missiles in Soviet territory.

In 1981, President Reagan utilized a similar narrow perception by referring to the supposed U.S. weakness in the land-based third of the triad as a "window of vulnerability."

Then later, in April 1985, Reagan rejected Soviet leader Mikhail Gorbachev's offer of a moratorium on missile deployment because it would give the Soviets an 8-1 advantage.

No doubt he was referring to land-based missiles, ignoring the American superiority in air- and sea-based missiles.

In reality, the United States and the Soviet Union are about equal in the destructive powers of their respective nuclear arsenals, and this is the only figure that should matter to any citizen contemplating nuclear peril.

The number of warheads, the size and weight of missiles, and whether the missiles were land-, sea- or air-launched will not matter at all to the victims of a nuclear exchange.

With some 50,000 warheads in the world, there's plenty of killing power to go around.

The writer of the Forum article says, "If the Kremlin's choice of weaponry is any indication of Soviet doctrine, then Soviet leaders are obviously getting prepared to launch a first strike."

Apparently he imagines that the Soviet leaders are lunatic enough to launch a first strike against U.S. land-based Minuteman silos, ignoring our undetectable submarine and cruise missile forces.

Perhaps he imagines the Soviets intend to commit suicide—for that would certainly be the result of inevitable U.S. retaliation.

A single U.S. Trident submarine contains enough firepower—24 Trident II's MIRVed at 10 warheads each for a total of 240 per Trident—to annihilate every major Soviet city.

Besides, the Soviet and American planners know full well that even if the other side did not retaliate, the radioactivity released from the detonation of just one side's arsenal would be borne back on the winds to destroy the "victor" who had launched a "successful" first strike.

No matter how you plan to fight it, nuclear war will take care of you, too.

Indeed, all this talk of "first strike" is dangerous, as if it could be a real option sometime.

Traditionally, military men have not felt secure unless they could have the capacity to get there first with the most. "Superiority" would consist not merely of having the capacity to retaliate, but the capacity of destroying the enemy first.

Hence, the whole concept of first strike becomes a basic assumption of military planning, while at the same time it is entirely suicidal in the nuclear era.

At this moment, the United States already assumes first-strike capacity in terms of the Pershing II missile (10 warheads) already deployed in Germany and the Trident II, (10 warheads) aboard the Trident submarine.

What those of traditional military mentality seem to fear is not that the Soviets would have first-strike capacity, but that the United States might not have it—even though a first strike by either side would destroy them both.

I am reminded of Einstein's oft-reprinted remark that "Everything has changed except our mode of thinking, and thus we drift toward unparalleled catastrophe." The mode of thinking that has changed least of all is practiced in the Pentagon.

Finally, there is the widest context of all; that nuclear war between the superpowers would result in the annihiliation of the United States, possibly of humanity, and possibly of most other life on Earth.

In light of this the narrow calculations, the risky military fantasies, the macho posturing and the dependence on armaments is grossly offensive to us "disarmament enthusiasts" who have some hope left for a human future.●

THE CONTINUING TRAGEDY IN SOUTH AFRICA

HON. BERNARD J. DWYER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. DWYER of New Jersey. Mr. Speaker, it is with a great degree of sadness, as well as anger, that I rise today to share with you and our colleagues my outrage over the abhorrent situation which currently exists in the South Africa.

Many of us in this Chamber have expressed, both publicly and privately, the shock and disgust which we feel

toward the blatant mistreatment of blacks in that country. I do not believe that any Member of Congress feels anything but contempt for a regime which so brutally represses the majority of its citizens.

Earlier this year, the House passed very responsible legislation, authorized by my good friend and colleague from Pennsylvania, BILL GRAY, designed to distance ourselves from South African Government. The Senate has been slow to follow suit, although there are growing indications of disenchantment in that body as well.

Likewise, the administration, which has spent the last 5 years trying to defend its policy of "constructive engagement," has finally begun to evidence a growing impatience with developments there. This is a most welcome sign, Mr. Speaker, because the United States has one recognized voice in foreign affairs and that is the President's.

Unfortunately, in spite of these promising developments, the situation in South Africa has deterioriated dramatically in the past 72 hours. The imposition of a state of emergency by the Pretoria government has resulted in siege-like conditions throughout that country. Violence has occurred and seems likely to spread.

Situations like these challenge America and Americans. It is relatively easy for us to look the other way; to convince ourselves that this is a problem in a far-off nation and that we have more immediate concerns here at home. But, are any of us truly free until all of us are free?

Whether it be blacks in South Africa, Jews in the Soviet Union, Hungarians in Romania, or any other repressed people, Americans have an obligation, rooted in our history and nurtured by our status as the leader of the free world, to speak out forcefully and directly, confronting injustice and seeking it redress.

Mr. Speaker, I hope and pray that a solution to the strife which has gripped South Africa is forthcoming. That solution would have to include the extension of total civil and political rights to every person in that troubled nation—a course of action which would take great courage and statesmanship by the government there. Nothing less, however, will avert a human tragedy of far greater proportions.●

NUCLEAR REACTORS CAN BE MADE INHERENTLY SAFE

HON. MARILYN LLOYD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mrs. LLOYD. Mr. Speaker, recent articles in the newspaper U.S.A. Today, June 19, 1985, discussed the pros and cons of nuclear power as a salvageable energy source for this country. One guest columnist, Mr. S. David Freeman, the former Chairman of the Board of the Tennessee Valley Authority, noted that, "What's needed for the future is a reactor design that's safer and more economic." I couldn't agree more with this assessment. As chairman of the Subcommittee on Energy Research and Production of the Committee on Science and Technology, I have been a proponent for the development of innovative reactor designs that are based, not on man-machine interface for their safety, but rather depend on inherent characteristics for the reactor design itself. One of my noted constituents, Dr. Alvin Weinberg, has often stated that reactors can be built with safety features that depend solely on the physical characteristics of the reactor itself, thereby eliminating the need for highly complex and often uncertain man-engineered systems. Our committee recommended, in its authorization deliberations of last year, as well as this year, that the Department proceed with a program aimed at investigating advanced reactor concepts that indeed have these inherently, or passively, safe characteristics. The committee's recommendation has been to accelerate the development of the modular high temperature gas-cooled reactor [MHTGR] which has passively safe characteristics.

Another attractive concept that is under investigation involves the use of the liquid metal reactor design. The liquid metal reactor is, of course, the basis for the breeder reactor, which has been under development for several years. But LMR's do not have to breed fuel in order to generate electrical power. Reactors that use liquid metal as the coolant rather than water offer an attractive alternative to the standard pressurized water reactor designs that are presently in commercial operation. Although liquid metal reactors operate generally at very high temperatures, they do not require the high vapor pressures that must be compensated for in the light water reactors. Also, they have been demonstrated to perform very well even though all backup systems may fail. That is, under conditions in which the pumps that cause the coolant to flow past the hot radioactive core may fail, and even if the automatic shutdown system fails, natural circulation and characteristics inherent in the design of liquid metal reactors are sufficient to cool these reactors down in a normal manner without endangering workers or the reactor itself. Recently, the Argonne National Laboratory performed such tests at the experimental breeder reactor-II [EBR-II] that operates at the Idaho National Engineering Laboratory near Idaho Falls. This reactor, which has operated continuously without any major failure for more than 20 years, underwent a severe test of its failure capabilities recently. A series of six tests were used to show that natural circulation of the coolant within the reactor core area itself was sufficient to satisfactorily cool down the reactor. Mr. Speaker, I would like to include in the RECORD a short article in the Energy Daily, dated June 26, 1985, that describes these tests in some detail.

It should also be noted that similar tests have been performed in Europe, both by the English and the French, on their liquid metal reactors and similar results were found to occur. It is, therefore, within our grasp to design reactors based upon known and documented technology—for example, MHTGR's and LMR's—that are indeed inherently safe.

NO PUMPS, NO SCRAM, NO PROBLEM AT EBR-II

Argonne National Laboratory put one of its experimental nuclear reactors through a severe torture test recently—simultaneously shutting off all coolant flow and bypassing the control system that would normally scram the reactor. The series of six tests took place in Experimental Breeder Reactor II (EBR-II) at the Idaho National Engineering Laboratory, a small sodium-cooled reactor loaded with a metallic fuel (unlike the oxide fuel form used in the Fast Flux Test Facility, the other American metal-cooled breeder reactor). Even with the multiple failures of coolant pumps and reactor shutdown system, EBR-II reduced its power level automatically, cooled itself by natural circulation and did not overheat the fuel. Argonne claims that "the tests give strong support to the position that sodium-cooled reactors of the EBR-II type do not need complicated backup systems for emergency shutdown and emergency cooling. The safety of the plant is guaranteed instead by its basic design, without depending on extra devices that may be subject to failure."

The recent tests in EBR-II were conducted at 16 percent of full reactor power and 19 percent of full coolant flow. Various combinations of failure were tried: first the reactor's two primary pumps were shut down, then the secondary sodium pumps, until Argonne engineers felt confident enough to try shutting off all the pumps simultaneously. "In all these tests the reactor performed as expected and temperatures agreed with predicted levels," Argonne reported. The lab plans similar tests at higher power levels later in the year.●

TRIBUTE TO LES ARENDS

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 18, 1985

● Mr. CRANE. Mr. Speaker, I wish to add my name to the many who mourn the death of our former Illinois colleague and House Republican whip, Les Arends.

Few men served their Nation as well as Les Arends served the United

States. None could match his record of serving as House Republican whip for three decades.

Les Arends matched leadership with graciousness. When I first came to the House of Representatives in 1969, Les Arends made himself available for any help he could possibly render to a freshman Congressman. He was a gentleman—kind, considerate, ever-thoughtful.

While House Republicans occasionally voted to turn over their party's House leadership to a new man, they never took the Republican whip post from Les once they had entrusted him with that important role in 1943.

He was fiercely loyal, and never abandoned his House party leader in the face of controversy. That loyalty, of course, extended to each of us on this side of the aisle.

Besides this House of Representatives, another love of Les Arends was the game of golf. It brought a great grin to his face when he boasted his golf score was lower than his age. His score slipped recently, however. When I visited with him earlier this year, my 89-year-old friend told me he was shotting in the low nineties.

Les Arends will be missed by all of us who were privileged to be his friend.●

CHRISTA McAULIFFE, SPACE FLIGHT PARTICIPANT

HON. JUDD GREGG

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. GREGG. Mr. Speaker, last August President Reagan directed the National Aeronautics and Space Administration to select a teacher to be the first private citizen to be launched into space aboard the space shuttle. Subsequent to reviewing more than 10,000 applications from teachers all across the Nation, the Space Agency narrowed the competition down to 10 finalists from America's elementary and secondary schools. After conducting rigorous medical examinations and numerous evaluations to determine the candidate's overall suitability for space flight, NASA demonstrated its good taste by selecting my constituent, Christa McAuliffe, an accomplished social studies teacher from Concord High School, Concord, NH. The formal announcement was made by Vice President BUSH at the White House last Friday.

In addition to her 12 years of teaching experience and 25 years in the Girl Scout Program as Scout and leader, Christa has found time to act as a host parent for students from innercity schools and raise funds for the YWCA and a local hospital expansion project. She is also a wife and the mother of two young children.

As a space flight participant on a shuttle to be launched next January, Christa plans to compile a personal journal that will help to complete and humanize the technology of the space age. In the classroom, she has created a social history course entitled, "The American Woman," which reveals that much information about the history of the United States has been found in diaries, travel accounts, and personal letters. Just as the personal journals from pioneer travelers of the Conestoga wagon days provide us with historic reality, as a pioneer space traveler, future historians will be able to use her eyewitness accounts to help assess the impact of the space age on the general population. Her journal will be a trilogy which begins at the point of selection and training as the first teacher in space, continues through the actual flight, and ends with her personal thoughts and reflections upon her return. As she has indicated, this will not only provide ideal material for her course on "The American Woman," but for all educators in the field of sociology, American culture, and history.

After my staff and I got acquainted with Christa during her recent visits to Washington, we knew immediately that she was a winner. While we are not at all surprised that her many attributes compelled NASA officials to choose her, like all the citizens of New Hampshire and the Nation we can hardly contain our emotions and we share her enthusiasm over the most exciting field trip she will ever take. I know that my colleagues join with me today in extending hearty congratulations to Christa McAuliffe, the attractive, articulate future teacher-astronaut from Concord, NH, who has all the "right stuff."●

CONGRATULATIONS TO 160TH AIR REFUELING GROUP

HON. CHALMERS P. WYLIE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. WYLIE. Mr. Speaker, may I extend personal congratulations to the 160th Air Refueling Group and to Maj. Gen. Raymond R. Galloway, the adjutant general for Ohio, Brig. Gen. Robert E. Preston, assistant adjutant general for Air, and Lt. Col. Donald W. Easley, commander of the 160th Air Refueling Group. This unit which is stationed at Rickenbacker Air National Guard Base in my district was judged the best refueling group at the largest military air show in the world held in Fairfield, England. An editorial which appeared in the Columbus Citizen-Journal on July 20, 1985 read as follows:

AIR GUARD UNIT A WINNER

An Ohio Air National Guard unit stationed at Rickenbacker Air National Guard Base brought back top honors from the International Air Show in England.

Lt. Col. Donald W. Easley, commander of the 160th Air Refueling Group, said the unit received best of show honors from a panel of five international judges for the 1956 model KC135E the guard unit entered. The Boeing Stratotanker plane won for authenticity, cleanliness and appearance over aircraft from 32 other countries.

Easley said the group award is a Wilkinson sword, mounted on a plaque. The award, called the Concours d' Elegance, was donated by British Airways and is valued at about $3,100. It will remain with the unit.

Easley said the three top awards at the competition last weekend went to Air National Guard units in Ohio, Pittsburgh and California.

The show, held in Fairfield, England, was sponored by the Royal Air Force Benevolent Fund and ran under the theme Skytanker 85. The show was billed as the largest military air show in the world.

The 14-member crew, after placing first, was congraluated by Jordan's King Hussein.

Easley said the unit will compete again in 1987 in the biannual event.

The aircraft, which passed a white glove inspection, highlights Ohio State colors of scarlet and gray, and crew members were dressed in those colors for the competition.

The plane is now at Rickenbacker.

This is truly an outstanding achievement which demonstrates that any National Guard unit properly trained can compete with the best.

Again, my sincere congraluations to all who made this Concours d' Elegance Award possible.●

GOLDIE HOFFMAN HONORED BY LAUREL VOLUNTEER FIRE DEPARTMENT

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. HOYER. Mr. Speaker, on Saturday, July 27, 1985, the Laurel Volunteer Fire Department will honor one of its longstanding members, Mrs. Goldie Hoffman.

Mrs. Hoffman has been associated with the department and its auxiliary for more than 54 years. Her dedication to the department is well known throughout the city of Laurel, a community which takes great pride in many volunteer activities and especially its fire department.

During World War II, with many of the volunteer firefighters serving in the Armed Forces, Goldie Hoffman and several other women who had been active in the auxiliary took over, drove the firetrucks and fought the fires in the Laurel area. The Hoffman residence, almost across the street from the fire department, provided Goldie Hoffman with a perfect vantage point to respond to fire calls. In

the postwar period, Mrs. Hoffman has been, to quote another member of the department, "a steadying influence on the auxiliary and one of our department's greatest fundraisers."

Mr. Speaker, we often hear discussion of the collapse of family and community life in our country. Perhaps that is true in some areas, but it is not true in Prince George's County, and it certainly is not true in Laurel. The commitment that Mrs. Goldie Hoffman has shown to her community for more than 50 years, while raising her family of five children, is evidence that she is a very special person and that Laurel is a special community. The Laurel Volunteer Fire Department and the rest of the citizens of Laurel are very fortunate to have had the benefit of Goldie Hoffman's involvement over the last 54 years.

Mr. Speaker, I know the Members of the House will want to join me in wishing Mrs. Hoffman well and congratulating her as the city of Laurel honors her.●

CARGO PREFERENCE: END THE BATTLES—WIN THE WAR

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. BIAGGI. Mr. Speaker, I rise to address a problem that threatens serious irreparable harm to the American agricultural community and the American maritime community.

This problem is not cargo preference. The problem is the battle over cargo preference that has divided this body and which is now threatening the promotional programs of both industries.

In recent months, bipartisan cross-industry support for maritime and agriculture has eroded. Now, I hear my colleagues from the farm belt condemn cargo perference and argue that maritime interests and seafarers are earning unjust and undeserved profits. Similarly, I hear my colleagues from coastal States talk about greed of farmers who get billions a year in subsidy. It seems we even have a battle raging as to the relative poor health of both industries with maritime and agriculture proponents each arguing that the crisis of the respective industries is more acute.

Well, the fact is that farmers and seafarers are not greedy; they only want fair compensation that recognizes the important contribution they make to the economy. Rather than battling over which industry has the more acute problems, let us resolve to help both industries win their war against subsidized foreign competition.

If we were to eliminate cargo preference, there would be three tragic results.

First, Agricultural appropriations would be reduced since savings from elimination of cargo preference would be deducted from farm spending.

Second, the already troubled merchant marine would suffer severe harm with a possible loss of 39 percent of the total cargo carried on our vessels—a loss representing $560 million in revenue.

Third, maritime industry support for agriculture could be greatly eroded.

The good news is that representatives of maritime and agriculture interests are working together to develop a solution to the perceived problems associated with cargo preference. Though this is just a first step, it is an important first step.

I praise all the parties who are engaged in these quiet negotiations to end the battles, so we can go on to win new markets for our maritime and agricultural industries.●

PIAA CLASS AAA BASEBALL CHAMPIONSHIP

HON. GEORGE W. GEKAS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. GEKAS. Mr. Speaker, the unexpected sometimes brings us more pleasure than the anticipated and so it was when the high school baseball team from Montoursville, PA, did what no one, including the coach, expected—won the school's first PIAA class AAA baseball championship on June 14, 1985, with an impressive 5 to 0 victory over District 7 champ Bethel Park.

Hustle, good defense and a lot of determination and hard work were the main ingredients that led the Montoursville Warriors baseball team down the road to the State championship. After opening its season with 10 consecutive wins and then falling into a mid-season slump when most teams, including the major baseball teams, would never recover, they sprang back to life with a 13-game winning streak. The team concluded its season with a 23-3 record.

The Montoursville High School Warriors, led by Carter Giles in his 14th year as head coach, shared the Susquehanna Valley League crown with Shikellamy and won over Berwick for the District 4 title, that put the team in the final four for the State championship.

The coaches and players should be congratulated for their outstanding performance as athletes and citizens of their community. The sportsmanship which was displayed throughout their long and gruelling season is a credit to themselves and the fans who enjoyed watching them play.

The assistant coaches and players who contributed to the team's winning effort this year include; assistant coaches Fred Springman, Mike Laychur, and Max Schnieder; players Scott Taylor, Jim Marino. Kimber Watson, Donald Shearer, Ken Miller, Don Kelch, Jim Moore, Ron Beck, Phil Albrect, Jeff Gyurina, Jeff Arnold, Steve Stugard, Steve Sauter, Craig Ashley, Clint Babcock, Bob Brobson, Dan Albert, Joe Betts, Jack McCarthy, Dale Ross, Brian Batkowski, Dan Cristini, Eric Giles, Jim Freezer, Paul Homes, Mike Mussina, Shawn Crawford, Joe Plants, Tory Shimp, and managers Charlene Hannun, Lori Neufer, Megan Bingaman, Amy Kilgus, and Jana Lentz.

I would like the CONGRESSIONAL RECORD to reflect my personal congratulations to the coaches and players for giving the fans of Montoursville a season of unending thrills and showing us the joy of high school baseball at its finest.●

IMPROVING OUR COUNTER-ESPIONAGE CAPABILITIES

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. EDWARDS of California. Mr. Speaker, the scope and duration of the alleged Walker spy ring suggest that safeguards for our national security secrets may be woefully inadequate.

Unfortunately, the response of some has been to seize on this situation to promote attention-getting proposals, most notably the death penalty and polygraphs, that do nothing to address the underlying effectiveness of our counterespionage program.

In an essay published on the op-ed page of the New York Times on Monday, Morton Halperin outlined an alternative series of measures that could actually improve the protections afforded our militarily vital secrets.

Mr. Halperin, a former staff official at the Defense Department and the National Security Council, directs the Washington office of the American Civil Liberties Union. I urge my colleagues to read his thoughtful and persuasive article:

[From the New York Times, July 22, 1985]

HOW TO STOP THE SALE OF SECRETS: DON'T GO FOR EASY "SOLUTIONS"

(By Morton H. Halperin)

WASHINGTON.—The recent spate of spying cases has generated public pressure to do something. Congress has responded with ill-considered plans—for reinstituting the death penalty and vastly expanding the use of polygraph tests—that do not solve the problem but run the risk of creating the impression that the problem has been solved. More important, these proposals, included in the Defense Department authorization bill now before Congress, could lead to violations of fundamental rights.

Consider the death penalty. Most spies take the risks they do because they believe that they will not get caught—not, certainly, because they know that "only" life imprisonment and not death is the maximum punishment. Thus, clearly, the death penalty would not prevent espionage.

Polygraphs, which are notoriously unreliable, are an unwarranted invasion of privacy and can be deceived by those trained to do so. The Defense Department already has a pilot polygraph program that permits limited testing. Until the results of this experimental program are evaluated, there is no justification for the expanded use of polygraph machines.

If polygraphs and the death penalty would not solve the problem, what will? Most serious students of the issue agree that we should begin by reducing the amount of classified material and the number of clearances. When everything is classified, nothing is; when everyone has a clearance, no one has been adequately cleared. We need to drastically reduce the number of things that we try to keep secret so that we can effectively protect that information. We need to reduce the number of people who are cleared so that we can examine them seriously.

We also need to change the clearance process. When it was put into place just after World War II, it was directed at ferreting out Communists and other "subversives" seeking to enter the Government in order to spy for the Soviet Union. The focus was on the initial clearance process and on learning about the political beliefs and associations of the applicants. In recent years, however, almost all spies are motivated by money and recruited after they are given clearances. Thus, we should be doing periodic reviews of those who have been cleared and examining their finances rather than their politics.

We must also distinguish between the three different problems that are now grouped together and dealt with similarly by "counterintelligence" agencies. These three problems are spying for the Russians, leaking information to the press and working in support of foreign groups, such as the Salvadoran opposition, that the Government considers hostile.

Leaking to the press and working against American policy in places like Central America are naturally subjects of some concern to the Government, but they are not the same as spying, and we must stop treating them as if they were. Certainly, no one who cares seriously about civil liberties will support stricter counterespionage laws unless we can begin to make these crucial distinctions.

Moreover, unless we can clearly isolate spying from other deceptively similar activity, there is little hope that we will catch many spies. The people conducting clearance reviews and investigating possible crimes should be directed by people with a clear understanding of what information is likely to be of greatest value to the Soviet Union and which individuals are likely to have access to it.

Finally, any effective counterespionage measures must be consistent with the mandates of the Constitution and with our values and ideals. If they are not, they will drive the best of our public servants—people who would not, for example, submit to prepublication review requirements or polygraph tests—out of Government.

Congress and the Administration face an all too common choice. They can go with the "solutions" proposed in the Defense authorization—measures that are politically popular but would not work and would violate Constitutional rights. Alternatively, they can work for real changes that would help prevent espionage without trampling on basic principles. Considered in the long view, it shouldn't be a very hard choice.●

WAR ON TERRORISM

HON. WILLIAM W. COBEY, JR.

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. COBEY. Mr. Speaker, in recent weeks, the United States has experienced increased dangers from terrorist groups around the world. The President has spoken out against these actions in his "war on terrorism" speech. I believe that as Members of Congress we support a strong stance against terrorism and we must continue to search for effective solutions to this serious problem. The United States must join efforts with other nations around the world to combat this growing problem. We need to consider meaningful sanctions against those countries we know to be active in, or support, terrorist acts.

Past American policy has been to ignore these countries who support terrorism. In many ways we have closed our eyes to these activities. Our policy has been to cut off relations or to ban trading with these nations. Terrorism continues to increase, indicating previous steps have not been successful in deterring radical groups.

We must take a stronger stand on this issue. Perhaps, the United States should consider revoking the visas of all citizens and students living in the United States, who are native to proterrorist countries. Why should we grant visas to individuals whose country is actively campaigning against the United States.

This is only one step that can be taken. However, a clear message must be sent, that terrorist activities will not be tolerated. We need to let it be known that strong sanctions will result from any threat to the safety of our Nation or it's citizens.●

PAUL FABRA: CURRENCY REFORM AND STABILITY IS THE KEY TO BUDGET EQUILIBRIUM

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. KEMP. Mr. Speaker, Paul Fabra, who writes on economic affairs for Le Monde, is in my opinion one of the most astute journalists on monetary matters in the world today.

In this morning's Wall Street Journal, Mr. Fabra critically examines the conventional official wisdom on the moribund international floating-exchange-rate system. He concludes that current efforts to try to manage rather than replace the floating-rate system "amount to an admission of defeat in advance and put the Free World on a dangerous course."

Mr. Fabra shows that unless we reconnect our national paper currencies with an external monetary standard such as gold, it is no longer possible to operate, even loosely, a stable system of exchange rates.

Among the errors which Mr. Fabra exposes is "the notion that floating rates are the genuine product of a free-market system," that floating exchange rates can avoid overvaluation or undervaluation of currencies, and that balance-of-payments discrepancies are the causes rather than the results of monetary instability.

Above all, according to Mr. Fabra, there is: "Another false premise underlying the present consensus in favor of floating exchange rates: the belief that the problem of eliminating budget deficits is merely a matter of adjusting receipts and expenditures. Both logic and experience make it clear that without a broad program of monetary stabilization, there is no chance of coming close to a balanced budget, either in the U.S. or anywhere else."

He quotes the great economist Jacques Rueff:

Stabilize the currency and a balanced budget will take care of itself.

To increase tax revenues, governments need sustained growth and more people employed. The principal obstacle is a general shortage of capital available for economic purposes * * *. The establishment of a sound monetary system is the only way to provide us with what the world most needs: a genuine capitalism—that is, a system able to generate capital.

I commend this excellent article to my colleagues.

The article follows:

[From the Wall Street Journal, July 24, 1985]

GOLD CONVERTIBILITY IS THE KEY

(By Paul Fabra)

PARIS—Let us be clear from the outset: The solutions now being embraced for improving the functioning of the international monetary system, by the Americans as well as the French and the other Europeans, amount to an admission of defeat in advance and put the Free World on a dangerous course.

These solutions are all based on the idea of reinforcing—through consultations organized at the highest levels—the "surveillance" by the International Monetary Fund of economic and monetary policies affecting exchange rates. The fact that the largest countries (starting with the U.S.) now recognize at least in principle the need for some such collective discipline—as evidenced by the June 21 Tokyo communique of the finance ministers of the "Group of 10"—has

been hailed on all sides as representing a philosophical advance that only needs a concrete form. Such an "advance" is anything but. If these proposals were applied, they would constitute a major setback, the logical conclusion of a long series of policy mistakes.

While asserting that the system of floating exchange rates "remains valid and requires no major institutional change," the Tokyo communique admits that it has also "shown weaknesses." These weaknesses are well known: an excessive volatility and instability of exchange rates, which furthermore demonstrate an annoying tendency to be undervalued one moment and overvalued the next. Might not these "dysfunctions" be the result of certain political errors on the part of national governments? Might not a greater "convergence" of their respective policies—to be obtained precisely through a greater coordination of their efforts under the aegis of the IMF—permit the correction of the "mistakes" of the marketplace?

A FALSE PREMISE

The fact is that with or without "surveillance," floating rates will fail to produce what is most desired of a monetary system: an efficient auxiliary to the pricing mechanisms permitting international transactions, both commercial and financial, to be carried out in equilibrium.

It is a false premise of the reigning consensus that floating rates are the genuine product of a free-market system. The economists and the experts have lost sight of the simple fact that floating rates constitute the system normally applicable to nonconvertible currencies, those that were traditionally called "fiat money."

The dollar lost its convertibility into gold on Aug. 15, 1971. During the months following this historic decision by President Nixon, attempts were made to keep alive the Bretton Woods system of fixed parties. Such was the object of the "Smithsonian" accords of December 1971, imprudently characterized by President Nixon as "the most significant monetary agreement in the history of the world." This was an attempt by the Big 10—the U.S., France, West Germany, the United Kingdom, Italy, the Netherlands, Belgium, Sweden, Canada and Japan—to reshuffle the collapsed Bretton Woods accords, and it included the first devaluation of the dollar. Fourteen months later, the Smithsonian agreement sank without a trace, leaving the dollar afloat, where it has remained ever since.

At the time there was a debate between the partisans of fixed and floating rates. Their argument, in reality, was without significance. Both camps had simply forgotten to tell us that we no longer had any choice. Once any connection with an external standard has been severed, it was no longer possible to operate, even loosely, a system of stable exchange rates.

It is this same principle that is forgotten today, in both the U.S. (for example, by Ronald McKinnon of Stanford University) and France (by President Francois Mitterrand and his counselor, Jacques Attali), in proposals for the establishment of a system of "target zones" as a first step toward more stable exchange rates. According to these proposals, monetary authorities would restrict the evolution of the exchange rate of the dollar by establishing a "band" of rates (revisable over time) within which the market would be politely requested to fix the prices of the world's principal currencies.

Behind any proposal of this kind is the idea that there exists at a given moment an area of equilibrium that is not necessarily the same as that determined spontaneously by the market. In other words, it is assumed that one factor or another—such as capital movements—constitutes a "disturbing" influence on the market, and that the "real" area of equilibrium may be identified by discounting for the effects of that factor. This sort of intellectual exercise cannot conceivably form the basis of exchange-rate policies in the real world.

The concept of "convertibility" is both so vital to an understanding of monetary phenomena, and so gravely misunderstood, that it requires some further explanation. It is said that the gold standard is incompatible with the free market because, by definition, it involves a fixed price for gold. This is reasoning backward. The system, in essense, is based on the idea of an initial deposit. I entrust one ounce of gold to a bank, which gives me a receipt. If by convention this receipt is considered to be worth, say, 300 units of account (call them dollars), it will be concluded that the dollar is worth 1/300th of one ounce of gold and such will be the definition of the dollar. The receipt will circulate as money in place of gold.

Put into practice, in a world where gold circulates freely from one country to another and where the various currencies are all freely convertible upon presentation to the various issuers of receipts (the central banks), convertibility produces a remarkable result: Prices expressed in dollars, pounds or francs are all in effect prices expressed in gold. Any danger of "overvaluation" or "undervaluation" is avoided. Our fiat-money currencies, lacking this common standard, must inevitably "float" each in terms of the others.

With a system of convertible currency, the holder of a currency can exchange it (a liability on the ledger of the central bank) for gold (an asset). In our system of fiat-money this exchange is impossible, and the ordinary citizen no longer has access to the assets of the central bank. The central bank, as a result, is free from market discipline. It is fair to say that all of the abuses of which the central banks have been guilty over the past 75 years have been the result of this.

The IMF has followed the same course. Ever since the Jamaica accords of January 1976, which expurgated from its articles of agreement any reference to the rules inspired by the gold standard, the IMF has been unhindered in asserting an increasingly arbitrary authority. If the IMF's managing director, Jacques de Larosiere, wanted to return to the original spirit of Bretton Woods, since so shamelessly betrayed, he would constantly be asking himself: By what means could we reestablish, in the world of today, a full-fledged free-market monetary system?

Reestablishment of the full array of gold-standard mechanisms, nationally and internationally, is all the more urgent because of another delusion afflicting national governments, even more pernicious than the first. This is another false premise underlying the present consensus in favor of floating exchange rates: the belief that the problem of eliminating the budget deficits is merely a matter of adjusting receipts and expenditures. Both logic and experience make it clear that without a broad program of monetary stabilization, there is no chance of coming close to a balanced budget, either in the U.S. or anywere else. This is why the debate in the U.S. between the "supply-siders," who oppose any reduction in the tax-cut program, and those such as Federal Reserve Chairman Paul Volcker, who would give priority to a massive reduction of the deficit, is irrelevant.

"Stabilize the currency and a balanced budget will take care of itself," said Jacques Rueff. Probably the best monetary theorist of the past 60 years, Rueff wrote the French recovery plan of late 1958 that allowed Gen. Charles de Gaulle to establish the Fifth Republic.

Tax revenues in the West are much lower today than they should be because of a new and much large form of "crowding out" than the term is generally used to mean. We are observing a massive diversion of saving resources away from productive investment and toward short-term investments: hot money moving in accordance with speculation over exchange rates.

'FLOATING CAPITAL'

The huge masses of wandering capital have become so much a part of the landscape that their existence is taken for granted. They are even used to justify the system of floating rates. No central bank, the argument goes, could defend its parity against speculation capable of putting in motion amounts exceeding the most comfortable official reserves. The argument appears compelling only because an effect is mistaken for a cause. Balance-of-payments deficits and surpluses do not create monetary instability. Rather, it is this instability that causes the imbalances, notably through discrepancies in national price levels and nominal interest rates. These imbalances lead to the creation of "floating capital," which merely represents an availability of credit whose volume would be immediately reduced in a more stable environment. In the case of the U.S. it is foreign funds invested in U.S. Treasury bills that by the same token finance the balance-of-payments deficit. Internal and external deficits are closely linked.

To increase tax revenues, governments need sustained growth and more people employed. The principal obstacle is a general shortage of capital available for economic purposes, the lack of which is evidenced by the fact that long-term interest rates have declined much less than short-term rates. The establishment of a sound monetary system is the only way to provide us with what the world most needs: a genuine capitalism—that is, a system able to generate capital.●

JACK KISHPAUGH HELPS THE HANDICAPPED

HON. GEORGE W. GEKAS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. GEKAS. Mr. Speaker, many times I have come to the floor of the House of Representatives to praise the accomplishments of my constituents. At this time, I would like to bring to the attention of my colleagues the work of a man who currently lives in Texas, but who once lived in Hershey, PA. The person I refer to is John S. (Jack) Kishpaugh, Sr., who now works in Arlington, TX, with the Center for

Computer Assistance to the Disabled [C-CAD].

The main goal for C-CAD is to get handicapped men and women out into the work force by the use of computers. Jack Kishpaugh, a quadriplegic injured since 1971, is well qualified to develop training programs in this regard. By combining his firsthand knowledge of the difficulties encountered by disabled persons with his computer experience, Jack Kishpaugh has done marvelous work in Arlington.

As we all too sadly know, many disabled persons find the prospect of entering the work force too imposing, and end up wasting numerous valuable resources that could help society and themselves. By using the ever-expanding computer market, these people have the opportunity to put their brainpower to good use. Their self-esteem grows by leaps and bounds, and everybody benefits by having them work.

For these reasons, it is my sincere hope that Jack Kishpaugh and the Center for Computer Assistance to the Disabled continue their excellent program for many years to come. The service they provide the handicapped community, and in turn, their entire community, should serve as a model across the Nation for cities and towns interested in the same goals.

That is why the residents of the 17th Congressional District of Pennsylvania can point to Jack Kishpaugh with pride as a Hershey boy who has made good. Keep up the good work, Jack.●

CITY DEMONSTRATES NEED FOR FLOOD CONTROL PROJECT

HON. BEAU BOULTER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. BOULTER. Mr. Speaker, yesterday, the citizens of Wichita Falls, TX, overwhelmingly demonstrated their support for the Lake Wichita-Holliday Creek flood control project. Not only did they demonstrate their support, but they also demonstrated true financial commitment. Yesterday, the citizens voted to issue municipal bonds to fund a "do it yourself" flood control plan in the amount of $9 million. Mr. Speaker, for over 40 years, Wichita Falls has been plagued by severe flooding and the bureaucratic Federal Government has failed to provide any assistance. Even though last week's House passage of the 1986 appropriations for water projects brings funding closer, the citizens of Wichita Falls are tired of waiting. They have said, enough is enough, and are going ahead with a city-financed plan that will provide some, though not all, of the protection they need.

I commend the citizens for their initiative. Wichita Falls has shown both the community spirit to get things done and the necessary commitment to justify their request for Federal assistance to complete this project. With Federal funding to complement the city's input, the citizens will be protected to the level of a 100-year flood. This will enable the city to continue to grow and prosper, thus creating jobs and economic opportunity. I urge my colleagues to act swiftly on legislation to make this project a reality.●

REFLECTIONS OF FRANK BARNETT

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. MICHEL. Mr. Speaker, on April 30, 1985, Frank Barnett, president of the National Strategy Information Center, addressed a meeting of the American Bar Association's Standing Committee on Law and National Security. His speech is an informed view of the origins, the history, and the possible future of our current relationship with the Soviet Union. I recommend it to all our colleagues.

At this point I wish to insert in the RECORD, "Reflections on Anniversaries, Détente, and Disinformation," by Frank R. Barnett, president of the National Strategy Information Center to a meeting of the ABA Standing Commitee on Law and National Security, April 30, 1985:

REFLECTIONS ON ANNIVERSARIES, DÉTENTE, AND DISINFORMATION

(By Frank R. Barnett)

Ladies and gentlemen, I'm very grateful to Bill Casey, not only for that generous introduction, but for serving as a founding director of NSIC, and even more for being a friend and tutor for over three decades.

While I have the chance, I want to add something: Bill, I have the absolute conviction that if General "Wild Bill" Donovan were with us today, he would be just as happy as the rest of your friends that his shoes fit you so comfortably. And I also would take this opportunity to refute the rumor that General Donovan used to call you "The Mumbling Pimpernel."

I owe other debts of gratitude to a number of men in this room. The ABA Committee on Law and National Security has been my regiment for nearly 25 years. In fact, NSIC owes its genesis to the prompting and support of former and present members of this committee—like Lewis Powell, Morry Leibman, Bill Mott, Jack Marsh, and John Norton Moore—to all of whom I pay deep tribute and thanks.

If NSIC has had some small success in implanting courses on national security policy in universities both here and in Europe, it's partly because we've tried to emulate the modus operandi of this committee. That "m.o.," as I see it, is to build consensus on unimpeachable research; avoid "hardening of the categories" in the body politic; and enlist liberals and conservatives on the same team, animating people who agree to disagree on secondary issues but are willing to stand together against all forms of totalitarian aggression.

One of the few compensations of becoming a senior citizen is that people seem slightly more tolerant of your banalities; or perhaps it's rather that your antennae have atrophied, and you don't really notice the impatience with which your modest gifts of wisdom are really received. In either case, counting on your forbearance, I ask leave to reminisce about World War II anniversaries, detente, and disinformation.

SOVIETS AND UNITED STATES MEET ON THE ELBE

Let me begin with anniversaries: 40 years ago last Thursday, the American 69th Infantry met the First Ukranian Army at the Elbe River, cutting Nazi Germany in two. By random luck, I was there, and by an even more improbable chance, I became the interpreter for the U.S. military government unit that worked with the Red Army to repatriate Soviet displaced persons and POWs. At first, the Russian and American GIs got along famously. The Russians were boisterous and friendly; we sang together, we applauded while they danced, we traded souvenirs, drank too much vodka, and relished those glorious weeks in May following the end of the war in Europe. As the troops from both sides of the Elbe got to know each other better, GIs would pull out sweat-stained wallets, to show a Russian pal photos of home back in Denver or Des Moines. Quite often the pictures would show a small house, a Ford in the driveway, and handsome shoes on the feet of wives and children.

Soviet soldiers were astonished. It was not that great affluence was on display; rather it was that ordinary GIs, the American proletariat, carried visible proof that workers under capitalism were not so oppressed as Stalinist mythology contended. Fraternization began to spread a dangerous virus to the East. And then the picnic ended.

In the first days of June 1945, the Iron Curtain came down on the Elbe. Regular units of the Red Army were withdrawn, and replaced by an MVD detachment, with Mongolian cadres who in effect created a "cordon sanitaire" between Russians and Americans. The Mongolians spoke no German, and didn't even appear to speak Russian. They carried Al Capone-type tommyguns, with which they unpredictably blasted birds and shot up the river. So we stayed prudently on our side. The era of friendship on the Elbe was short-lived. And despite propaganda charades it has never been renewed. The Mongolian machine-gunners have been replaced with barbed wire, minefields and the Berlin wall; but whether we refer to "cold war," or the cosmetics of detente, the reality of protracted conflict remains. In fact, the ceremony on the Elbe last week was overshadowed by the recent murder of Major Nicholson, for which the Kremlin offers neither remorse nor apology.

NAZI GENOCIDE AND THE SOVIET RECORD

No one can doubt the need to honor the victims of Hitler's war and reaffirm the righteousness of the crusade against fascism. We must never forget Dachau. But not every holocaust has been perpetrated by the SS, nor have European Jews been the only objects of state terror. Yet, if "never again" is to have operational meaning today, the world must direct effective outrage against the gauleiters of Lenin and Mao as well. We shall master the fearful lesson that Hitler taught the democracies only when we com-

prehend that the "killing fields" of Cambodia are the moral equivalent of Auschwitz. Thus, in light of communist genocide in Southeast Asia, and the ongoing butchery of Afghan civilians by the Red Army, the relevant lessons of World War II must include anniversaries the Kremlin prefers to forget.

Most historians cite September 1, 1939, the date of Germany's invasion of Poland, as the start of World War II. But on August 23, with the signing of a nonaggression treaty in Moscow between Nazi Germany and Stalin's Russia, the red dictator freed the hands of his Nazi counterpart for the prelude to the Holocaust. The Molotov-Ribbentrop pact had a secret blueprint for the partition of Eastern Europe into Nazi and Soviet spheres of influence. As early as 1935, according to historian Paul Johnson, Stalin privately put out periodic feelers to persuade the Nazis to relinquish their anti-Soviet crusade, and settle for a totalitarian brotherhood of mutual respect and divided spoils.

Not only did the Hitler-Stalin accord loose the dogs of war in Europe; the Soviet Union provided crucial material support to fuel the Luftwaffe in the skies above Britain and drive the Panzers in the invasion of the Low Countries and France. Soviet oil, rubber, zinc, copper, manganese and grain were all supplied to Nazi Germany during the first 22 months of the war. Moscow, to this day, accuses the U.S. and West Germany of "profascism." We should never forget that the first wave of the Nazi "blitzkrieg" was fed with Soviet supplies.

Stalin's designs "metastasized" during the period of Nazi-Soviet collaboration. Soviet armies invaded Galicia on the 17th day of the German-Polish war, attacking Polish troops from the rear. More than a million and a half Poles were deported in 1939 and 1940 by the Red Army. The eastern half of Poland was submerged in the gulag, in the context of fraternal collaboration between the NKVD and the Gestapo. And then thousands of Polish officers were massacred in the Katyn Forest to further Stalin's goal of decapitating Polish nationalism, which would otherwise prove an obstacle to the Kremlin's post-war expansion.

Next came Russia's winter war with Finland—an unprovoked power grab against a peaceful neighbor, frustrated in part by the tenacity of Finnish arms. And then the three Baltic nations, independent since 1918, were smuggled into Soviet dungeons in 1940. The horror of Hitler's "final solution" for the Jews was foreshadowed when Stalin's boxcars transported—by the tens of thousands—the future of Latvia, Estonia and Lithuania to extinction in the Siberian permafrost.

And finally, another neutrality pact—this one between the Soviet Union and Japan in April 1941—stabilized Japan's rear, while the Tojo cabinet completed its plans for Pearl Harbor.

Thus Stalin was either a bumbling broker of World War II, or at least a co-sponsor of many state crimes that led to its outbreak. That he was ultimately betrayed by Hitler, his partner in genocide, scarcely entitles him to our sympathy.

Our sincerest sorrow and gratitude, however, can rightly be reserved for the millions of Soviet citizens who shed their blood fighting Hitler's armies. Humanity also owes compassion to other millions: Russians, Ukrainians, Crimean Tartars and the like, all victims of the Kremlin's internal war against its own people, which continued despite the war against Hitler.

Some may ask if this is "ancient history," with no meaning for today. Well, the Polish nation knows better. The workers who built "Solidarity," only to see it crushed on orders from Moscow, had fathers who were even more brutally betrayed by Russians. to decimate the potential leadership of post-war Poland, Stalin deliberately halted the Red Army offensive outside of Warsaw for two months in 1944, to give the Germans ample time to wipe out the resistance forces in Warsaw. Cordell Hull's memoirs tell us that Stalin refused to grant landing rights to American bombers so they could drop arms and supplies to the Poles. With 200,000 anti-Soviet Poles in their graves, it was easy for Stalin to imprison the handful of pro-Western leaders who returned from exile in London after the war, and install Moscow's puppets in their stead.

THE SOVIET PEOPLE AND THE LENINIST OLIGARCHY

Stalin's crimes do not diminish the bravery and suffering of the Soviet people during the war against Hitler. The Russians are not our enemies. Rather, it is the Leninist oligarchy, which uses Russia as a base for projecting power, which is the enemy of all of us. Thus it would be folly to ignore the legacy of Lenin and Stalin as we celebrate the victory over the Nazis. For while Adolph Hitler's regime was obliterated forever in 1945, Joseph Stalin's political and ideological heirs occupy offices in the Kremlin today.

Some will object to that assertion and will postulate yet again another "thaw," another Prague spring, another helping of goulash communism with a human face. But so far, every detente has resulted in more Soviet throwweight, fresh communist insurrection, more refugees and new bases for the export of subversion.

Some American entrepreneurs, anxious to sell technology to Moscow, still profess to believe that the Russian leaders are simply Slavic-speaking graduates of the Harvard Business School. They are not. They are an ideological "mafia," who control an empire and possess the guts and guile to carry out their ambitions. Our political heritage, as we all know, derives from Magna Carta, Locke and Jefferson. The Soviet legacy is from Genghis Khan, Ivan the Terrible and Lenin, which means that the "culture gap" is wider than the missile gap, and has a bleak impact on policy.

GORBACHEV'S "CAMELOT"

Today, two years after the disinformation about Andropov's penchant for Johnny Walker Black and Jacqueline Susanne, we are now digesting stories describing the off-Kremlin tryout of *Camelot*. We should remember that the Soviet Union has regularly initiated peace offensives, without abandoning ideological warfare, since Trotsky returned from Brest-Litovsk. Gorbachev's political biography suggests little will change in the years ahead, nor does the appointment of an Andropov protege as his patronage chief offer much comfort.

Mikhail Gorbachev was born in 1931 in a village near Stavropol in the Caucasus. After the war he began work at a Machine Tractor Station, the agricultural machinery depots which insure party control of the peasants. Later, at Moscow State University, he was appointed head of the Komsomol apparatus at the University. Gorbachev is said to have participated in the mid-50s "cleansing" of the university of Soviet student elements who were supportive of the Hungarian uprising. Returning to Stavropol. Gorbachev rose in the party ranks due to his patient nurturing of personal ties with vacationing Soviet politicians in the resort areas of the Black Sea coast. In short, he enhanced his career by playing "good old boy" to Moscow's visiting bosses in a holiday mood.

One of the officials with whom Gorbachev developed close links was Suslov, ideological czar and the most inveterate Stalinist of his generation, Suslov became patron and teacher of the younger apparatchik. His fellow countryman in the nomenklatura, Yuri Andropov, also a native of the Stavropol region, became another mentor.

Gorbachev was moved to Moscow in the mid-1970s to take over the agricultural portfolio after the death of Kulakov, an old Brezhnev crony. In spite of repeated Soviet crop disasters, Gorbachev attained full rank in the Politburo, a singular success at age 48. After the death of Andropov, Gorbachev moved to secure control of Party ideology—Suslov's former fiefdom.

Soon after Gorbachev became ideological secretary, *Pravda* and other official organs began to mention the name of Josef Stalin in favorable terms. It was, as the Soviets say, "no accident." The rehabilitation of Stalin is proceeding as the Soviets prepare for the 40th anniversary of Victory Day over Hitler.

Moreover, Gorbachev's first public announcement as General Secretary was a bald threat to Pakistan about the consequences of continued aid to the Afghan rebels. Recently, this well-pressed dictator has tried to blackmail the West into abandoning research on SDI, for fear that otherwise the Kremlin will again abrogate the arms talks. This is scarely a Russian Dubcek or a reborn Kerensky. In fact, given his vitality and the tutoring from Suslov and Andropov, Gorbachev may prove to be a more formidable adversary than Stalin, who after all, had neither ICBMs nor a four-ocean navy at his disposal.

THE TWILIGHT WAR

May I offer one recommendation. Certainly, the Pentagon is justified in expending large resources to avert worst-case scenarios. Yet the most terrible danger may be the least likely to materialize. Hence, while we constantly strive to ward off Armaggedon, we cannot ignore lesser threats that recur with disturbing frequency: terrorism, subversion, insurgency, and the other black arts of the "twilight war," so difficult to counter by a society based on pluralism and the rule of law.

But if we cannot cope with the export of guerrilla war into the resource-rich areas of the world, upon which the economies of Japan, Europe and the United States depend, then eventually even NATO, and an effective SDI may prove to be maginot lines. The Kremlin has crafted a Special Operations cadre that includes East Germans, Cubans, Bulgarians and the PLO, as well as the Soviet Spetsnaz. This conflict consortium is engaged in low-cost, low-visibility warfare. The targets are: the oil of the Middle East; the strategic minerals of Africa; the vital sea lanes of the Caribbean; and within a decade, perhaps even sooner, Mexico. If and when U.S. divisions earmarked for the reinforcement of NATO are pinned to the defense of the Texas and Arizona borders, the current game of dominoes in Central America will not, in retrospect, seem so trivial to many observers.

One reason why the West is muddled in its ability to counter the "twilight war" is

that Soviet covert operations in the Third World are coordinated with a cloud of propaganda and other active measures in Europe and the U.S. In effect, Moscow seeks to interdict the Third World battlefield not with airstrikes, but with political warfare that discrdits anti-communist resistance and dries up its logistical support from natural allies. This tactic is effective against the West precisely because it is so difficult to distinguish Soviet active measures from the quite legitimate dissent and honest doubts that invariably arise among free men.

DISINFORMATION, DISAGREEMENT, DISLOYALTY

Certainly, we do not wish to confuse disagreement with disloyalty. How then do we protect ourselves from Soviet disinformation? I know of no conclusive answer. Perhaps we begin by persuading more leaders in the private sector to emulate the work of this ABA committee—to simply do their homework in geopolitics, comparative ideology, world strategy and national security. Hopefully, from a more professional analysis may emerge a more workable consensus on how to deal with Leninism, without curtailing our own liberties.

I again salute this ABA committee for its elan and finese in the battle of public opinion. In an open society, that struggle is crucial and never-ending—especially now that totalitarian elite have learned how to exploit the customs of fair play and democratic discourse.

May I conclude by repeating some lines I wrote 25 years ago to socialize my own frustrations over the propaganda war. I wish these lines were totally obsolete. I'm afraid they're still partly relevant.

If our nation should ever be pushed into a narrow corner by a combination of Soviet nuclear blackmail and political warfare, then all our affluence, all our stockpile of weapons, might be as impotent as were the walls of Troy, against the cunning of the Greeks. Either we create for ourselves a sophisticated public opinion based on a passion for the facts and responsible dissent—or we may find some parts of our intellectual climate polluted by alien forces, who have borrowed a little bit from Goebbels, Pavlov, Lenin and Mao, and use this witches' brew to sow disinformation and despondency in the national psyche. Should we permit that to happen, the epitaph on America's tombstone might read as follows: "Here lies the only civilization that perished at the peak of its power, with its power unused. Here lies a decent people who wanted love, not empire, and got neither; who tried to trade power for popularity, and lost both; here lies a nation of advertisers who knew how to change consumer tastes in cigarettes, but were themselves manipulated on the issues that really mattered to their salvation. Here died a sort of Lancelot in the court of nations, who, granting all his grievous flaws, was still perhaps the noblest knight of all: except this Lancelot, crippled with an undeserved guilt complex, let his weapons and ideals fall unused, and so condemned all mankind to the thousand year winter of the Russian bear."

Personally, I don't believe that epitaph will ever be written, but whether it's written or not, will depend not exclusively on decisions in the White House or the Pentagon or the Department of State, but on the courage, wisdom and civic commitment of such leadership groups as this ABA Committee on Law and National Security. Thank you.●

POW/MIA RECOGNITION DAY

HON. BILL HENDON

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. HENDON. Mr. Speaker, as we all know, Friday July 19, 1985 was National POW/MIA Recognition Day. One of the ceremonies I had the honor of attending was the Sons and Daughters ceremony held at Arlington National Cemetery sponsored by No Greater Love. I was deeply moved by the ceremony, and in particular, by the speech given by Dr. Patricia O'Grady Aloot, POW daughter and board member of the National League of POW/MIA Families.

Mr. Speaker, I take this opportunity to share with my colleagues and the American people this very eloquent plea for help:

SONS AND DAUGHTERS OF POWs/MIAs

(By Patricia O'Grady Aloot)

We have come here today, you and I, to rededicate a memorial to the men we left behind in Southeast Asia. In standing with us today, you stand with our fathers and we thank you.

As many of you know, a few weeks ago, I placed Father's Day cards from the Sons and Daughters of our POWs and MIAs at the Vietnam Memorial. At that remembrance, a passerby said to me, "The war is over, why are you here?" I would like to take a few moments to answer that question.

We are here because our fathers cannot be here. We are here so that you will not forget our dads. We are here because for us the war is not over.

The Sons and Daughters gathered here today share an unspoken truth, a powerful and painful memory. We have all known the childhood terror of wondering whether our fathers' spirits had been crippled, minds bruised, bodies tortured, hearts broken. Every day, we wondered if they were crying, or hungry, or cold or hurting, or dying alone. We wondered if they were still alive or already dead. We hoped that they would escape, we fantasized about their return, we imagined we saw them everywhere. Throughout most of our lives, thoughts of our fathers haunted us.

Why are we here? Because we are still haunted. Reliable, intelligence data and sources suggest that some of our fathers may still be alive and in prison. We are here because some of us have pictures of our fathers in captivity. Fathers who never came home. Some of our fathers were lost in Laos or Cambodia. Fathers whose fates are shrouded in secrecy. Some of us know where, in all probability, our fathers are buried. Fathers left in an alien land. Fathers who deserve better.

Why are we here? Because we have faith that the American people will demand the return of our POWs and a full accounting of our MIAs. Because we believe that this country will make Vietnam see it is in their best interest to give us back our living men and repatriate our debt.

A generation of silence has passed. While we shall always remain our father's children, we are children no more. Our past silent terror has become our present resolve that no issue is too difficult to resolve, no group is too powerful to confront, no person is too important to oppose, and no problem is too great to surmount—in the name of our fathers.

So we gather here because we believe that this memorial, this living tree, is perhaps the most fitting symbol of our cause. As it lives and grows, so do we. And through us, the men we honor today, your father and mine, live. With your help, your voice, we can begin to rekindle the conscience of this country so that these invisible will be visible again.

So, to my fellow Sons and Daughters, I say take heart. You are not alone. To this Country I say, do not put our fathers out of your mind to avoid the troubling memories of a past war. We are here to ask you to join us, join us in seeking, no demanding, answers to our question: Where have all our fathers gone?

Do not leave us with our private thoughts and silent memorials. Join us by raising your voice with ours to create a chorus that will echo across the Potomac and be heard across the Pacific: Not another year, not another day let our fathers go . . . let our fathers go.●

YONKERS DESERVES ITS OWN RADIO STATION

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. BIAGGI. Mr. Speaker, today I am introducing a bill that would end a longstanding inequity by providing the city of Yonkers with its first radio station.

Specifically, my bill would authorize Weiner Broadcasting Co. and Joseph-Paul Ferraro, a Yonkers resident, to own and operate station KPF-941 for noncommercial radio broadcasting to the Yonkers community. Significantly, while Yonkers is New York's fourth largest city, it does not have a radio station of its own.

This bill became necessary when the Federal Communications Commission rejected my request earlier this year to grant Yonkers a radio license through normal administrative procedures. In a February 15, 1985, letter, I informed the FCC that I was concerned that Yonkers did not have its own licensed broadcast radio station and suggested that station KPF-941, which was operating out of Yonkers as a remote pickup base for a station in Maine, should be allowed to broadcast to the city of Yonkers.

The response from James C. McKinney, Chief of the FCC's Mass Media Bureau, said:

Your suggested solution of permitting remote pickup base station KPF-941 to operate as a broadcast station does not comport with the Commission's rules. * * *. Consequently, the only recourse open to interested licensees in Yonkers, NY would be to file proposals for new AM broadcast facilities through our formal application procedures.

Mr. Speaker, it should be pointed out that the formal application process would not help Yonkers since all available broadcast frequencies on the AM and FM dials are already occupied by powerful New York radio stations and neighboring Westchester County stations. My bill would solve this problem by allowing station KPF-941 to continue to operate on its currently assigned auxiliary frequency of 1622 kilohertz. It should be noted that although the AM dial technically ends at 1600, most radios can receive broadcasts on 1622 if they are close to the source of transmission.

Mr. Speaker, Yonkers is the only city of its size in the country without a radio broadcast license. The people of Yonkers deserve their own station, which can focus on Yonkers' issues and interests. I would strongly urge that this legislation receive the prompt and favorable consideration that it merits.

At this time, I insert the text of this legislation:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. (a) Not later than 60 days after the date of the enactment of this Act, the Federal Communications Commission shall modify the license for station KPF-941 of Yonkers, New York, to authorize Weiner Broadcasting Company and Joseph-Paul Ferraro to own and operate such station, on its assigned frequency of 1622 kilohertz, for noncommercial radio broadcasting in service to the Yonkers, New York, area.

(b) Such license shall be granted for a term of 7 years, beginning on the date of modification of the license under subsection (a).

SEC. 2. For purposes of any administrative action by the Commission relating to such station or operations over such frequency, the operations over such frequency before the date of the enactment of this Act, or other activities relating to such station or its facilities, operations, or licensee (including those of any affiliated station or its facilities, operations, or licensee), shall not be taken into account.●

CONGRATULATIONS TO RANNY AND JOHN RIECKER

HON. BILL SCHUETTE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. SCHUETTE. Mr. Speaker, it is my great pleasure and pride to celebrate the 30th wedding anniversary of Ranny and John Riecker. I can't be there to join them on July 30, but I can at least make a little celebratory noise of my own here in the House of Representatives.

Mr. Speaker, Ranny and John were my neighbors when I was growing up. They gave me one of my first jobs cutting grass and raking leaves. Through them too, I got my start in local politics. They have been good neighbors, good employers, and always good friends to me as long as I have lived. I point this out to the House because of my gratitude at having known them, and because I am so happy and proud as they celebrate their 30th on the 30th!

Ranny and John, congratulations and best wishes for another 50 years!●

LILLIAN FOGEL: A LIVING HISTORIAN

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. LEHMAN of Florida. Mr. Speaker, I would like to bring to the attention of my colleagues this Newsday article about the efforts of my constituent, Lillian Fogel, to make history come alive for our younger generation.

This article describes how Lillian Fogel recorded her history, and then was willing to share her personal experience with students at the Plainview-Old Bethpage Middle School.

Lillian Fogel has set a wonderful example and I know that her written memoirs are an inspiration to all who read them.

The article follows:

[From Newsday, Friday, May 3, 1985]

SHARING STORIES OF IMMIGRANT LIFE

(By Gwen Young)

Plainview—Like so many other grandmothers, Lillian Mordecai Fogel has family tales to tell. Tales of her life as a child in Russia, her family's struggle to come to the United States and their joy when they finally reached Ellis Island in 1923.

While memories like these are often lost with passing generations, Fogel took steps to make her memoirs permanent. In a white loose-leaf binder encased in clear plastic, the highlights of Fogel's life, from childhood to grandmother, unfold on 59 double-spaced, typewritten pages.

There are tales of arranged marriages, of the boat trip from the Soviet Union, of Sabbath dinners, philosophies of raising children and the loneliness of growing old.

After writing with the help of a friend, Marjorie Wolfe of Syosset, the stories she has told for years, Fogel, 85, decided to share her personal history with others. Yesterday, dressed in a lace-trimmed lavendar dress and black patent pumps, Fogel met 40 fifth-grade students at the Plainview-Old Bethpage Middle School who had read some of her stories. Wolfe, who teaches there, had introduced the manuscript to two other teachers. After reading the stories, the students invited Fogel to their classes.

The stories they read had piqued their curiosity. How long was the boat ride? "Three weeks." What was it like when you came to Ellis Island? "It was a dream that you never dreamed could be true." Her voice was barely audible, so the children leaned forward in their chairs to hear. With the help of her son, Rabbi Daniel Fogel, who presides at the North Shore Synagogue in Syosset, she was able to tell her tales.

Fogel and her family lived in cramped cabins in a section of the boat that had no windows, and she was the only one who didn't get seasick. They were allowed to bring only the barest necessities, and even their beloved Torah was left behind.

Daniel Fogel tried to help the children understand the sacrifices his mother and her family made in traveling to the United States. "Can you imagine leaving your home with almost nothing?"

After the questions and answers, the children gave Fogel a small bouquet of flowers that matched her dress. Encircled by a group of young girls, she gave them all grandmotherly kisses. Before leaving, she donated $18 to Ellen Smyle's and Elinor Froehlich's fifth-grade students for their Statue of Liberty Restoration collection. The amount, chai, the rabbi said, means "life" in Hebrew.

Together, the Fogels urged the children to ask someone in their families to write down the family story. Adam Abzeg, 11, said he would ask his great-grandmother Ida to do that. "Then she could become famous, like Mrs. Fogel, and she could come to the school," he said.●

STATE DEPARTMENT AND CIA "INDULGE THEIR EMPTINESS"

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. GINGRICH. Mr. Speaker, in my special orders recently, I've been addressing flaws in the way our State Department conducts foreign policy. What I see at stake is the institutional and cultural incapacity of the American State Department in its current form to deal with the realities of power in an effective manner.

The esteemed Senator MALCOLM WALLOP addressed this same issue in his April 19 speech at the Fletcher School of Law and Diplomacy at Tufts University. I'd like to share with my colleagues excerpts from this speech which were printed in the July 23 Wall Street Journal.

I urge my colleagues to review these remarks carefully, so that Congress doesn't fall prey to the confusion and lethargy of the State Department.

STATE DEPARTMENT AND CIA "INDULGE THEIR EMPTINESS"

The following is excerpted from an April 19 speech by Sen. Malcolm Wallop (R., Wyo.) at the Fletcher School of Law and Diplomacy at Tufts University.

The absence of intellectual and moral principles allows tastes and personal considerations to drive American officials into doing some awful things. Today they want to give military aid to the communist government of Mozambique to crush a democratic resistance. Today these officials aid Afghanistan's mujahedeen against the Soviets with the same conviction with which they aided the Kurds against Iraq. Today some of the highest officials is the CIA rejoice that they are finally rid of the burden of supplying arms to Nicaragua's contras. Indeed, for several years they have been discussing with lawmakers who share their tastes at what point they should be "dumped." It is no passion for the Sandinis-

tas at CIA or State, just a dull desire to be rid of the arduous task of confronting them, and to return to routine. Their "reputation," meaning their ease, represents a higher scale of values than their mission.

No wonder that such officials are uncomfortable discussing right and wrong, better and worse as though these terms mean something objectively. Thus last year the CIA refused my request to compile sets of unclassified biographies of the Sandinista leaders and the of contras because, responsible officials said, they did not want to be party to a debate about which side in that civil war is inherently preferable! So much for the words of Christ so proudly carved on the CIA's building: "You shall know the truth, and the truth shall make you free." The biographies of the contras finally compiled, I put them into the CONGRESSIONAL RECORD. This year a few dedicated foreign-service officers expanded the set. But the State Department's Bureau of Public Affairs blocked their publication, until pressure from the White House allowed it to proceed.

There is no reason for surprise here. If the contras are indeed "our brothers," as President Reagan said, if their cause is objectively better than that of their foes, then the duty we have in their regard is both clear and strict. After all is said and done, we simply cannot allow them to be crushed and the worse side to triumph. At last, then, if this be so, there is an objective standard against which the CIA's and the State Department's performance can be judged. That standard makes impossible accommodation with the Sandinistas. But that standard is inconvenient because living by it displeases friends of so many high officials.

For that reason, such officials describe the world as too complex to be painted black and white. Within a standardless spectrum of gray, they can indulge their emptiness. Another manifestation of this emptiness is the ability of so many high officials to give good causes their due in speech, but to betray them in action. Secretary of State George Shultz is as good an example as any of one who rejects the Brezhnev doctrine with eloquent words but has never been known to oppose it with any concrete actions. Such officials have learned from Helmut Sonnenfelt's experience in 1976 that when their words reflect their de facto preference for accommodation with totalitarians, the American political system will produce a Ronald Reagan who will discredit them before the American people, and make it impossible for them to hold public office.

So they talk brave talk, formulate half-baked plans, and present them to the Congress in ways that subtly signal that they would not be so upset if the Congress disapproved. Thus they project upon the Congress and on the American people their own confusion and lethargy. Thus do they bring out the worst in the Congress. Regrettably, that is easy to do.●

AQUILINA HOWELL SERVED EDUCATION FOR 47 YEARS

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. FUQUA. Mr. Speaker, for nearly half a century, Aquilina Howell has been an effective force for education and for progress in Leon County in Florida. As a result, children for time to come will benefit from the 47 years this distinguished lady has devoted to her profession.

It is not often that we have the opportunity to pause and pay tribute to one whom no words of tribute could be adequate.

Instead let it be said that deeds speak louder than words and in this case there is a chorus of accomplishments. As Aquilina Howell relinquishes her active role in the school system of Tallahassee and Leon County, she can know full well that she has not labored in vain. She and her wonderful family can take pride in having led in a time of testing—and because of that service, we are all richer.

The Tallahassee Democrat recently printed an article on this great and good lady which I commend to the Congress. I ask that it be reprinted in these pages as a reminder to each of us as to how much difference one person can make.

The article follows:

AQUILINA HOWELL: SHAPING SCHOOLS FOR 47 YEARS

(By Marc Brown)

By her own account, Aquilina Howell is entering the home stretch of her career. If that's true, it must be an awfully long track for the Leon County school system's assistant superintendent for instruction and the school district's highest-ranking black administrator.

Howell has been employed by the county school system—or rather, its two school systems—for 47 years.

Her contact with those same schools goes back even further. A Tallahassee native, born in a home on Georgia Street her family still owns, she attended school in Leon County, graduating in 1934 from the old Lincoln High School in what's now the Frenchtown neighborhood.

After college, she returned to Lincoln in 1938 as a social studies, English and Spanish teacher.

Schools have been her home since then, and the career she's carved for herself has been one of self-motivation. For a black woman in the South in the middle of this century, "careers" as we know them today were scarce. But with the guidance of a strong family and the will to succeed, she ignored the hostile environment and forged a career.

The school system in 1938, Howell remembers, was vastly different than the one she works for now. The most obvious difference was segregation. Lincoln was Tallahassee's black high school. The whites went to Leon. In effect, the county school system was actually two school systems, with one vastly poorer than the other.

"The facilities were always unequal," she recalled last week, "and we used hand-me-down textbooks that the white schools no longer wanted. Bus service to the black schools was non-existent."

Blacks were isolated, but that isolation drew them closer together, and in the close-knit situation, schools were a focal point of the community.

"Lincoln was much more than a high school. It was the center of the community. There were dances there, club meetings, plays."

In the late '50s and early '60s, as the long, painful process of integration began to unfold here, some of that close-knit community identification was lost. Lincoln was phased out as a regular high school, and now serves as a neighborhood community center and alternative school in the county system. Most of the county's 47 small, rural black schools were closed.

"As a minority, we realized that we were going to have to give up more to make the process work," Howell said, "but there was some resentment, people saying, 'Why do we have to give up everything?' "

But integration came off far smoother here than in other Southern cities. Howell credits leaders on both sides—the late Rev. C.K. Steele in the black community and former Gov. Leroy Collins in the white—with keeping the pot from boiling over.

As integration began, Howell was appointed director of secondary education, in charge of the county's junior high schools and high schools. Actually, she was one of two secondary-education directors. In the transition to integration, the school system was run by two sets of administrators—one black, one white.

Eventually, Howell became the county's only director of secondary education, a position held until 1981, when she was promoted to assistant superintendent.

Coming from a system that discriminated so much, it might seem ironic that she has spent nearly half a century in education. But Howell comes from a family of educators. Her mother, aunts and uncles all spent time in front of a classroom.

"At that time," she said, "education was about it for blacks as far as professions were concerned."

Of the four children in her family, three went to colleges. The fourth, a brother, died when he was 20.

Colleges were as segregated as the public schools. Howell received her bachelor's degree from the then all-black Florida A&M College (now FAMU). When it came time for a master's, FAMC didn't have a graduate program and the Florida State College for Women (now FSU) didn't admit blacks. Howell had to go first to Boston University, then to New York University on an out-of-state scholarship, a device used by the Florida Board of Regents to keep the state's colleges white.

Did it hinder her to be a high-ranking black administrator in a school system reluctant to accept blacks?

"Actually, I think being a woman hindered me more," she said. Then, after a moment's pause, "No, I take that back. I came equipped to deal effectively with men.

"I was always Daddy's girl. I was always close to him. He was Cuban and taught me Spanish, something the rest of the family wasn't interested in, and we were closer that way. He was also a mechanic, and all his male co-workers were always around. I grew up around men, and I was better able to get along with them once I started working."

With the battle against segregation behind her, one of Howell's biggest concerns is discrimination of another kind—the possibility that new demands for higher educational standards will leave minority students worse off then they were 20 years ago.

"I firmly believe in standards of excellence," she said, "as long as we still provide educational opportunities for *all* children. We have to be careful that we don't sacrifice children in the pursuit of excellence.

"Some say this means duel standards, which I don't believe in, but we can't throw the baby out with the bath water. Students—all students—are going to have to learn to pass the literacy test and others, and we have to be more effective in encouraging children to be more responsible for their own education, to set goals early.

"As a school system, we can't do it all. It's going to take an effort from the students, the family, the community, *and* the system. As a system, though, we have to be sensitive to conditions in the home and provide counseling and work with agencies that can get help to a family."

Howell has a traditional family life. Married to Sam Howell, she has two daughters and has been active for years in Bethel Baptist Church in Tallahassee.

"As chairman of the Tallahassee Housing Authority (in 1983), I saw what kind of effect the community has on what goes on in the schools. Where you live has a big effect on your self-image and what you do."

Howell has worked for 10 years on educational accountability—requiring students to pass a set of standard tests before being advanced to the next grade—and its effect on minority students. It's a problem that probably won't be solved before she retires.

She has plenty of other accomplishments.

Her biggest thrill is seeing children she's worked with accomplish big things in life.

"It never ceases to amaze me," she said, "when people come up to me and tell me what an influence I've been in their lives. I look back, and it never seemed like it at the time."●

IMPORTANCE OF THE SECONDARY MORTGAGE MARKET TO THRIFTS

HON. CHALMERS P. WYLIE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. WYLIE. Mr. Speaker, I know my colleagues will join me in saying happy birthday to Freddie Mac as it celebrates its 15th anniversary today.

When Freddie Mac was created by Congress in 1970, the role of the secondary mortgage market was primarily to help solve regional differences in cost and availability of mortgage credit. Due to the fact that during the 1960's and 1970's thrifts originated as much as two-thirds of conventional mortgages, the availability of mortgage money depended heavily on their deposit flows.

However, there was a regional mismatch between these deposit flows and the demand for mortgage credit. Through its purchases of mortgages in the faster growing regions and its sales of mortgages in the slower growing regions, the secondary mortgage market redistributed the available mortgage money by transferring funds from capital surplus to capital deficit areas.

Recently, Freddie Mac has aided small or rural lenders who previously did not process the volume or expertise to tap outside capital through the secondary market. By eliminating the minimum delivery requirements, lenders became able to sell one mortgage at a time. In 1984 alone, 659 new lenders sold to Freddie Mac, thus providing mortgage financing to areas of the country which truly needed it. The need for mortgage financing remains and Freddie Mac estimates that in the next 5 years at least $1 trillion in mortgage credit will be needed. Freddie Mac intends to commit itself to providing this financing.

In addition to redistributing funds, the secondary market reduces the degree of lenders' interest rate risk by offering to buy and sell mortgages, and designing mortgage-backed securities that offer prepayment protection, thus reducing the interest premium lenders demanded for holding mortgages loans.

Today, the secondary mortgage market links the capital and mortgage markets more closely through it sales of mortgages in forms that have attracted investment from outside the traditional mortgage investment community. This need for new sources of investment in residential mortgages has increased in recent years as the demand for mortgages credit nationwide has grown more rapidly than the deposit bases of traditional lending institutions.

As the demand for mortgage financing increases, as inflation rises, and as the Government deregulates the interest rate environment, thrift institutions seek only to grant mortgages which they can do so profitably. Without the secondary market purchases of the traditional long term fixed-rate mortgages, thrift institutions would only be able to offer short term, adjustable rate mortgages, that better compensate for interest-rate risks. This would severely restrict the diversity of mortgages today's homebuying public needs.

All in all, from the thrifts perspective, the opportunity to sell loans or securitize mortgages utilizing the secondary market has the principal advnatage of allowing the originators to write new mortgages or reinvest. The role of the secondry market as a link between the capital and mortgage markets, in order to create a market for the sale of conventional mortgages, is critical to the operation of thrift institutions. Freddie Mac has committed itself to keeping the secondary mortgage market alive so that thrift institutions will be able to maintain and expand their role of providing mortgage credit of America's homebuyer.●

TRIBUTE TO LES ARENDS

HON. MELVIN PRICE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 18, 1985

● Mr. PRICE. Mr. Speaker, I wish to join my colleagues, and particularly those in the Illinois delegation, in this tribute to the late Les Arends. Also, I wish to thank the distinguished minority leader for taking this special order.

Mr. Speaker, I served with Les through 30 sessisons of Congress. He arrived in the 74th and I arrived in the 79th Congress—and I am proud to say we were warm friends during all those years and throughout his well earned retirement.

Les Arends was dean of the Illinois delegation for a number of years and I was privileged to succeed him when he left Congress in 1974.

Although we were of different political faiths, I have vivid memories of Les as an outstanding minority whip who served his party and constituency with loyalty and devotion. But my fondest recollections spring from our long period of joint service on the House Armed Services Committee. We worked together in perfect harmony over many years in the unique nonpartisan atmosphere of our committee to forge a defense posture that served the national interest of this country extremely well during many difficult years. That record is one for which we owe Les a lasting debt of gratitude, and is a tribute to his life-long devotion to the welfare of our great Nation.

We will miss meeting with Les during his occasional visits to Washington and Gary joins me in our deepest sympathy to Betty and Leslie.●

THE 11TH ANNIVERSARY OF INVASION EVOKES SAD MEMORIES FOR GREEKS

HON. NICHOLAS MAVROULES

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. MAVROULES. Mr. Speaker, I address my colleagues today in memory of one of the darker moments in history. This month, Greeks all over the world commemorate the 11th anniversary of the invasion of Cyprus. It is not a memory that is easy to look back upon—indeed, it is a tragic anniversary, not only for Hellenism, but for humanity itself. It is important, however, that we take time to reflect on this occasion. It is important both for the lessons which we can learn from the past, as well as for the inspiration which we need today to continue our efforts to help resolve the crisis.

As we all know, the Republic of Cyprus was invaded and occupied by Turkish troops on July 20, 1974. The invasion resulted in a complete geographical separation of the island, a separation which has not been recognized as legitimate by either the Greek people or the international community. There remains over 1,500

persons who have not been accounted for since this tragic event. Moreover, the occupation resulted in the immediate displacement of some 160,000 Greek Cypriots, all of whom fled for their safety, or were forcefully evicted from the Turkish occupied northern region. An additional 40,000 were displaced because their homes were too near the Turkish army lines, or because their places of employment had become inaccessible. Thousands of these people were crammed into the dwellings of family and friends, while the even less fortunate were forced to reside in shacks or under canvas tents.

Today, Mr. Speaker, 11 years after the invasion, this unfortunate situation has remained largely unchanged. The northern region of Cyrpus is still under Turkish military occupation, marking a continuation of the de facto separation of the island. The people of Cyprus are restricted in their freedom of movement, with the Greek Cypriots living in constant fear of Turkish military intimidation. The refugee problem, for the most part, remains unsettled. Families remain separated, and loved ones unaccounted for. In November of 1983, northern Cyprus illegally declared itself an "independent state," an action which was condemned by U.N. Security Council resolutions 541 and 550. More recently, meetings between President Spyros Kyprianou and Turkish Cypriot leader Rauf Denktash have proven disturbingly unproductive. Finally, international efforts to resolve the dispute have been predominantly unsuccessful.

None of this, of course, is news to any of us. We are all aware of the present stalemate. The purpose of my remarks today is not to elaborate upon the details of this unfortunate situation, for the gravity of the crisis is too obvious to require much documentation. My purpose is to urge my colleagues, and all Americans, to consider the Cyprus question with the attention and concern which it merits. To emphasize, once again, that it is in the best interest of our Nation to work diligently toward a peaceful, acceptable solution to the dispute. For without such a solution, U.S. relations with Greece, Turkey, and Cyprus will never be as cooperative and productive and they could, and should, in fact be.

And finally, perhaps most importantly, there is the humanitarian aspect of this issue. I need not remind any of us of the human suffering which is involved here. It is impossible to forget, when there are thousands of displaced Greek Cypriots to remind us of the tragedy of Cyprus. It is impossible to forget when there are so many families whose loved ones are still among the missing. No, my remarks are not offered as reminders, because we need no reminding. They are, rather, offered both in commemoration and as memorials—memorials to those who have lost their lives in the crisis, and to those who are still today waiting for the return of their loved ones. They are offered as memorials to the thousands of Greek Cypriots who struggle to maintain their faith, and to persevere despite the pain and quiet moments of despair. And they are offered as a source of hope—the hope that someday soon the people of Cyprus will witness and enjoy a peaceful resolution to this crisis.●

BOY SCOUTS CELEBRATE DIAMOND JUBILEE

HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. ROTH. Mr. Speaker, this weekend the Boy Scouts of America will culminate its diamond jubilee year at the 1985 National Scout Jamboree at Fort A.P. Hill, VA. This fine organization has good reason to celebrate its 75 years of dedicated service to American youth and to look ahead toward another 75 of building sound character, fostering personal fitness, and teaching citizenship.

Members of Scout Troops 559, 560, and 561 of the Bay Lakes Council in northeast Wisconsin will be at the scout jamboree, where they will join other scouts and scout leaders nationwide to reaffirm the principles of the scout oath and law. I offer them my best wishes and hope the scout jamboree is a joyful occasion for all.

The members of troops follow:

TROOP 559

Michael Ackeret, Chris Albert, Rick Bartelt, Ken Beres, Cory Daehn, Cory Davis, Greg Esvang, Graham Fownes, Tony Frey, Mark Gehring,

Todd Gehring, Dennis Gruenke, Jeff Gruenke, Tim Gruenke, Michael Hess, Ralph Hess, Stephen Hess, Eddie Huffman, Richard Jenss, Michael Johann Jr.,

Erik Paul Kehl, Edward Krueger, Tim Marquis, Gary Miller, Robert Neill, Bill Petersen, Jim Prom, Phillip Ramthum, Andrew Rikkers, David Rikkers,

Chris Sayles, Richard Scamehorn, James Simmons, Mark Thaves, Ken Thomas, Kevin Tipple, Scott Tipple, John Vandecastle, William Yankus, Thomas Zillmer.

TROOP 560

John Ambrosius, Brain Berriman, David Block, Keith Block, Chad Brecke, Chad Buck, Ben Castner, Timothy Draheim, Gary Eklund, Jamie Forsberg,

Jonathon Hawlish, Wayne Johnson, Jerad Keil, Steve Kickland, John Knapp, Joe Knox, Aaron Kohlman, Bill Ledger, Jeff Ledger, Bradley Linden,

Chris Lyle, Robert Lyle, Orland Marotz, Tony Pfau, Robert Preuhs, Tim Roberts, Doug Rossow, Peter Schiefelbein, Mark Schiller, Ted Schubert,

Edward Shell, Wesley Shell, Robert Smits, Albert Thaves, Bill Turriff, Geoffrey Urbanz, Grant Urbantz, Tim Vertz, Craig Wenberg, Kurt Wendt.

TROOP 561

David Boltz, Douglas Brusse, Timothy DeTroye, Jeffrey Dorsey, Robert Dorsey, Mike Gorges, Tim Gorges, Michael Hermann, David Hirn, John Houk,

Larry Jackson, Seth Klessig, Andy Kober, Brian Lallemont, Brad Larson, Tim Lehmann, Jeff Lochmann, David Mailand, Steve Marsh, Thomas McGrane,

Tyler McGrane, Kevin Minkel, Norman Petersen, Martin Peterson, Scott Phillips, Peter Reynolds, Joseph Saunders, Brian Schroeder, Cory Schultz, Russel Shambeau,

Erik Simonson, Anthony Stoeger, John Thaves, Luke Thaves, John Torinus III, Mark Vanderbloomen, Antonio Villarreal, Justin Welch, Frank Wickham, Bradley Hoffman.●

WAYS AND MEANS AMENDMENTS IMPERIL COMPACT OF FREE ASSOCIATION

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. SOLARZ. Mr. Speaker, as the House prepares to vote on the Compact of Free Association between the United States and Micronesia, I would like to call to my colleagues' attention two letters that illustrate the importance of rejecting the Ways and Means Committee amendments to the compact that are embodied in the bill before the House and voting in favor of the Udall-Fascell substitute.

The first letter I would like to submit is the communication sent to you, Mr. Speaker, by Adm. W.J. Crowe, who is now Commander in Chief of the U.S. Pacific Command and is about to become Chairman of the Joint Chiefs of Staff. The other letter was sent to President Reagan by Tosiwo Nakayama, president of the Federated States of Micronesia.

In the Compact of Free Association, negotiated over a period of 15 years, the United States was able to protect our security interests by agreeing to tax, trade, and aid provisions designed to foster American investment in the freely associated states. By upsetting this carefully balanced agreement, the Ways and Means Committee amendments undermine the prospects for approval of the compact and thereby jeopardize important security interests of the United States. In addition, the compact is a good deal for the American taxpayer. The administration estimates that over the 15 years of the compact, the total cost to the United States will be $311 million less than a continuation of our current level of payments to Micronesia.

In view of the highly adverse impact of the Ways and Means provisions, as described by Admiral Crowe and President Nakayama, I urge my colleagues to approve the Udall-Fascell substitute.

The letters by Admiral Crowe and President Nakayama follow:

COMMANDER IN CHIEF,
U.S. PACIFIC COMMAND,
Camp H.M. Smith, Hawaii, July 24, 1985.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives, Washington, DC.

DEAR MR. SPEAKER: As Commander of U.S. forces in the Pacific and as someone who has been involved for a number of years in the negotiations to terminate the trusteeship over the islands of Micronesia, I have followed with great interest the Congress' consideration of the proposed Compact of Free Association between the United States and the Marshall Islands and Federated States of Micronesia. I was concerned to learn recently that the Compact Legislation which is expected to be brought to the floor of the House of Representatives is likely to include amendments that would largely eliminate the Compact's favorable trade and taxation provisions.

From my point of view, the security aspects of the Compact are of great importance to our defense posture in the Pacific. The delegation of defense responsibilities and authority to the U.S. together with the provisions that the freely associated states will refrain from any action the U.S. determines to be inconsistent with defense and security requirements, provide the latitude needed to support our security interests. In addition, the Compact forecloses Micronesia to the military forces of third nations, guarantees our military forces unrestricted movement within Micronesia, and ensures continued access to the important missile testing facility at Kwajalein.

In return for these important defense rights, the Compact commits the United States to provide not only significant economic assistance but also favorable trade and tax arrangements. I regard these latter provisions as especially important, as they are designed to assist the Micronesian states to overcome the natural obstacles to development these small islands face and to move toward greater self-sufficiency. For this reason, I believe that they are also of particular importance to the Micronesian leaders. Removal or weakening of those beneficial trade and tax provisions would thus eliminate a key element of our agreement with the Micronesians. I hope that we will not jeopardize the important security benefits of the Compact by taking this step.

I understand that during full House debate, an amendment is likely to be offered that would restore to the Compact Legislation the trade and tax provisions contained in the bill as agreed to by the Interior and Foreign Affairs Committees. In the interests of our security posture in the Pacific, I believe this amendment should receive broad support.

I hope these views can be shared with the members of the House. Please let me know if I can be of assistance to you or other members on this matter.

Warmest regards,

W.J. CROWE, Jr.,
Admiral, U.S. Navy.

FEDERATED STATES OF MICRONESIA,
OFFICE OF THE PRESIDENT, *Kolonia, Ponape, Eastern Caroline Islands,* JULY 23, 1985.

Hon. RONALD REAGAN,
The White House,
Washington, DC.

DEAR MR. PRESIDENT: On September 8, 1983, I had the honor and pleasure of advising you that the people and governments of the Federated States of Micronesia had completed the process of approving the Compact of Free Association signed by our respective representatives on October 1, 1982. I was also proud to have informed you that my people, in a United Nations-observed plebiscite, had voiced their overwhelming support for a continued close relationship with the United States after termination of the 1947 Trusteeship Agreement.

Now, almost two years later, the governments and people of the Federated States of Micronesia are in a state of frustration, shock, and despair. Last Thursday, the House Ways and Means Committee repudiated a fundamental principle of the Compact by eliminating the agreed tax and tariff incentives needed for development of our nation's economy in cooperation with the United States.

We had relied on a concerted effort by the administration to have the Compact approved expeditiously and to achieve accommodation of congressional concerns within the framework of the negotiated Compact without amending, or effectively amending the document itself. Indeed, we must recognize those members and staff of the Foreign Affairs and Interior & Insular Affairs Committees in the House who have achieved a consensus to present to the Full House. While we have not had an opportunity to review this consensus, we understand that the Committees considered carefully our comments on the prior versions of the amendments, and hope that deleterious amendments have been either eliminated or revised.

It is nothing short of tragic that on the very day this consensus was reached, the House Ways and Means Committee approved a set of amendments which would repeal the tax and trade benefit sections of the Compact.

Incredibly, such actions appear to have been taken with no regard for anything other than the parochial considerations of today's U.S. tax policy. It is bad enough that the Ways and Means Committee gave no weight to the broad policy considerations that guided the Compact negotiations, but it is even worse the Committee's action was openly encouraged by the U.S. Treasury Department, an organ of your administration. We are totally at a loss to understand how this could have been allowed to happen, much less explain it to our people. Questions are now being raised about the good faith of the United States Government, even by some of the most ardent advocates of the Compact during the negotiations and FSM approval process.

The trade and tax benefits package in the Compact is essential if U.S. business is to participate significantly in the FSM's development during the next fifteen years, at costs which maximize the value of Compact dollars. It is just as true today as it was on October 1, 1982 that the future stability of the emerging governments in this region cannot be subordinated to overall tax or territorial policy concerns. Nevertheless, the Ways & Means Committee, in forty-five minutes, destroyed a carefully conceived balance between grants and development incentives which took almost twenty years of planning and negotiations to achieve.

We can only hope that during the final stages of congressional consideration your administration will unite to turn aside the Ways and Means action and resolve any outstanding problems in the House Foreign Affairs/Interior consensus. If that cannot be done, we will be confronted by what had been feared most, fundamental and destructive changes in the Compact as approved by our people. We have come too far to turn back now. We cannot continue to live under the Trusteeship, nor can we accept a free association relationship with the United States, which fully protects United States interests, but denies our people genuine hope for future progress and development. We ask that your administration demonstrate, now before it is too late, your commitment to a continued close relationship with the Federated States of Micronesia.

Sincerely,

TOSIWO NAKAYAMA,
President.●

PLIGHT OF SOVIET JEWRY

HON. JOHN McCAIN

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 16, 1985

● Mr. McCAIN. Mr. Speaker, I am both proud and honored to once again join with my colleagues in focusing attention on the continued oppression of Soviet Jews through my participation in the Annual Congressional Call to Conscience for Soviet Jews. We must not let our voices falter as we renew our pleas for freedom on behalf of the Jews in the Soviet Union.

Victims of a brutal program of cultural repression, Soviet Jews are systematically persecuted for their religious beliefs and denied the opportunity to emigrate. Many are also presently languishing in labor camps as prisoners of conscience. For the most part, these people are not radicals or subversives, but simple citizens who wish to live out their lives in accordance with their religious and cultural heritage.

The prevailing policy during the 1970's was apparently to let the "undesirable" minorities—such as Jews—go, in the hope that the government would then be free of them. A repressive regime, however, can never be rid of those who wish for liberty. Each person who was permitted to leave inspired countless others to apply. The response was never-ending. In the Soviet Government's eyes, the experiment had failed, and the policy was reversed. During 1984, less than 1,000 Jews were allowed to leave the country. This is in stark contrast to the over 51,000 who left in 1979.

There is still hope that Secretary Gorbachev will reverse, or at least soften, the Government's hard-line policies on emigration with regard to Soviet Jewry. Early this year, there was initial optimism that the emigration levels were indeed increasing under Gorbachev's regime. In the past 3 months, however, the number of Jews permitted to leave the Soviet Union has decreased sharply, from 166 in April, to only 36 in June.

Visas are routinely denied to Soviet Jews, on almost any pretext, one of the most common and convenient reasons for refusal being "regime considerations." The government claims that the person in question—or a relative—has had access to classified information, and that his or her presence abroad would be damaging to national security. This excuse is especially useful in denying visas to those who have served in the Soviet military.

I would like to draw your attention here to one man in particular, a refusenik—one who has been refused permission to emigrate—whom I have "adopted." His experiences are not unusual. His name is Feliks Kochubievsky, and he was once a highly respected member of his community. An electrical engineer who earned the Soviet Order of Merit for Patriotic Work, he lost his job as a senior researcher after he and his wife, Valentina, applied to join their two sons in Israel.

The visa was denied on the grounds of "regime considerations." Kochubievsky, like many others, denies ever having had access to classified materials.

Harassed as a result of his desire to emigrate, and finally arrested in 1982 after several of his literary works were published abroad, he was sentenced to 2½ years in a Soviet labor camp.

Feliks Kochubievsky's sentence expired in April of this year, and fortunately, he was released. An elderly man, his health has deteriorated since his imprisonment. His greatest desire is still to emigrate to Israel and be reunited with his sons, but there is little likelihood of this happening.

The sharp decline in emigration since 1979 has been paralleled by an increase in Jewish cultural awareness and by a resultant increase in cultural persecution. In the 1980's, the Soviets' campaign of antisemitism has intensified. Forbidden to practice or study their religion, Hebrew teachers have been singled out for particularly harsh treatment.

Arrests of teachers and activists have become more frequent, and searches and seizures have become commonplace. The most alarming feature of this crackdown has been the change in the number of political and criminal arrests. Detainees are now more often charged with criminal offenses. Several teachers have been framed on weapons or drug charges.

Still more upsetting are recent reports of police brutality, the most notable case being that of Josef Berenshtein, a Hebrew teacher from the Ukraine, who was almost completely blinded in a knife attack by prison guards. This type of savagery is condoned by a government that has begun to pursue an especially virulent campaign of antisemitism.

Nearly one-fourth of the entire world Jewish population resides in the Soviet Union, approximately 2½ million people who are harassed and deprived of their basic human rights, rights which were recognized by the Soviet Union in the Helsinki accords.

Our efforts to persuade the Soviets to uphold these rights must not weaken, especially now, when a new leader has emerged. Mr. Gorbachev has a golden opportunity to improve relations with the United States by upgrading the Soviet policy on human rights, and I can only hope he will take advantage of it.

As a member of the Congressional Coalition for Soviet Jews, and a participant in the Congressional Call to Conscience, I am glad to have had this occasion to appeal to the Soviet Union to restore to the Jewish people their basic right to live and worship as they please.●

WILLIS CONOVER: AMERICA'S MUSICAL VOICE ABROAD

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. MICHEL. Mr. Speaker, the Voice of America [VOA], the international radio station of the U.S. Information Agency, has many ways of telling America's story to the world. News, editorial commentary, features—through these and many other means, VOA informs and influences millions. Most observers of VOA through the years agree that perhaps the most influential program on VOA is "Music USA," whose music program conductor, Willis Conover, may well be the best-known American in many areas of the world, although he is relatively unknown in his own country. Recently the Washington Times interviewed Mr. Conover about his career.

At this point I wish to insert in the RECORD "Voice of American Jazz Never Heard Back Home," by Veronica Riddick, in the Washington Times, Wednesday, July 24, 1985.

VOICE OF AMERICAN JAZZ NEVER HEARD BACK HOME

(By Veronica Riddick)

Willis Conover, the fervently followed musicologist who is said to be second only to blue jeans in popularity behind the Iron Curtain, is a man of profound anonymity in the country for which he has become the voice of jazz.

Over the past 30 years, he's hosted "Music U.S.A." for the Voice of America, a jazz program that has not only spread the good news of jazz but has inspired enthusiasts estimated in the millions.

As "music program conductor" for "Music U.S.A.," Mr. Conover takes enormous pains with his show, which is broadcast by a division of the U.S. Information Agency and is prohibited by law from broadcast in this country.

That he is unknown at home, however, bothers Mr. Conover not at all. "There is a price to be paid for fame," he said the other day in that deep, sonorous voice, "Everyone is watching you."

But Willis Conover is a man to be watched. He is tall, graying, distinguished in bearing. He answers questions slowly and methodically, punctuating his sentences with drags from the Marlboros he chain smokes.

Though Mr. Conover's life is filled with the sound of music, remarkably, he does not play a note himself, describing his musical performing ability as "practically non-existent."

The main reason he says he does not play is because "I've heard so many good musicians, I would know how badly I sound."

It is as a listener that Mr. Conover finds his musical niche. To him this is a particular art. "You learn to be selective in your listening," he states. "It is like a muscle that as you use gets stronger."

Music is also an emotional release for him. As he puts it: "I am moved by much of what I hear in music. So when it plays, I am sharing its feelings."

In an effort to perfect his craft, he may spend up to three days preparing for a single show. He does an average of 12 programs a week, most, but not all, of which focus on jazz.

Relating the composition process for his broadcasts to a story formula he notes that it contains a central idea, mood, structure, variations, climax and, finally, the denouement.

His literary reference is not surprising. The written word is among his passions in life. He published his first sonnet at 18. Among his later works is a poem called "May Recessional." Its subject: the death of his close friend Duke Ellington.

Spending a little time with Mr. Conover, it is easy to understand how he became prominent for his radio broadcasts. His rich voice has lost none of its distinctiveness over the years.

This remarkable set of vocal chords initially lured him into broadcasting. He played the part of a radio announcer in a high-school play and was repeatedly told how realistic he sounded. "That put a bug in my ear," he says. By 17, his commitment to broadcasting was firm.

Yet the path eventually leading Mr. Conover to jazz was not direct. In 1942, he was drafted and stationed at Fort Meade, Md. While in the service, he happened upon Washington's famous Stage Door Canteen. Dissatisfied with the music, he went backstage and asked if he could "pick out a few records."

Because his selections were so successful, he was offered a part-time job at a radio station. The spot turned into a full-time position after he was discharged from the service in 1946.

Upon discovering his love for the music characterized as "jazz," Mr. Conover became acquainted with Washington-area musicians. He encouraged some to perform, organized others into bands and promoted a few concerts.

He also arranged a series of midnight concerts at the Howard Theater, bringing many of the present jazz luminaries to the city for the first time. Among these were Charlie Parker, Dizzy Gillespie, Thelonious Monk and Miles Davis. Through his efforts, many of the District's jazz clubs were desegregated.

When Mr. Conover heard that the Voice of America was looking for someone to host a jazz program, he was eager for the opportunity. He got the job and started his broadcasts in January 1955.

However, this music was not received with open arms. Some critics contended that jazz was less than the best that American culture had to offer.

But Mr. Conover was not deeply disturbed. "There are always people who will say, 'What is this noise?' But, it is noise to people who don't listen to it, and don't understand the differences in it," he says.

Mr. Conover has traveled to many parts of the world. But a trip to Poland in 1959 stands out. He received what he describes as a "hero's welcome," and two concerts were given in his honor, in which Polish musicians showed what they learned from his program.

In 1982 he made a trip to Moscow, accompanying two American jazz musicians—Gary Burton and Chick Corea. As in Poland, he received a good deal of praise, but he also notes that the two concerts were by invitation. Therefore, who could and could not attend was controlled.

"I do not discuss politics," he says. "There are some people who might think I should. But the point is, anyone who has been overseas knows the music speaks for itself."

Yet, he sees a structural parallel between jazz and the American system. "There are certain agreed-upon rules, and within that is freedom of expression."

If Mr. Conover had a radio program broadcast in this country, his ideal would be "the kind of music you play for friends when they come around to your home." There would be no categories, just good music.

His music and broadcasting have been constant source of fulfillment. As he says, "I'm not happy if I'm not doing it. I'd be lost without it."

So would many of his fans around the world.●

SOUTH AFRICA'S DECLARATION OF STATE OF EMERGENCY

HON. SANDER M. LEVIN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. LEVIN of Michigan. Mr. Speaker, I rise, to express my dismay over the South African Government's recent declaration of a state of emergency. Now, perhaps more than ever, is the time to declare an end to the Reagan administration's policy of "constructive engagement".

This declaration of emergency gives the police of South Africa broad-sweeping powers. It gives the police the unlimited right to search and seize property without warrants; to arrest individuals without charge or provocation, and deny citizens their most basic legal rights. Since Saturday, over 665 persons have been arrested in South Africa, and 10 killed outright. These actions are not those of a representative democracy, but of a desperate Government whose only method of dealing with dissent is to resort to state-sponsored repression.

Sadly enough, nothing in these recent reports is really news. In South Africa, we have learned, police brutality, imprisonment without charge, and other atrocities are commonplace enough.

The events in South Africa over this past weekend serve to once again underscore the fact that the policy of "constructive engagement" simply has failed. The present Government of South Africa has neither the resolve, nor the desire to bring about meaningful social change in that country.

Mr. Speaker, storm clouds are gathering ominously over South Africa. It is past time for the administration to disassociate itself from President Botha's repressive policies.●

REGIONAL POWER PLANNING AND REGULATORY COORDINATION ACT OF 1985

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. VENTO. Mr. Speaker, I am pleased to join my colleagues today in introducing the Regional Power Planning and Regulatory Coordination Act of 1985. This legislation responds to the concern in the public and private sectors over the ability of utilities to continue to provide low-cost supplies of electricity in the current regulatory environment. I am convinced that this legislation will establish the means by which States can voluntarily join together to assess least-cost resources, evaluate regulatory changes needed to encourage regional resource acquisition and take advantage of bulk power marketing opportunities.

I believe the legislation introduced today supports several principals that are key to ensuring the Nation's electricity future:

To ensure the provision of adequate, reliable supplies of electricity at the lowest possible cost needed to sustain and encourage economic development;

To assure the future health of the electric utility industry as the primary supplier of electrical services;

To promote the efficient utilization of electricity to cut costs to users, make industrial consumers more competitive in the marketplace, and reduce the need for investment in capital-intensive generation sources;

To increase competition from alternative sources of electricity to meet incremental demand, reduce dependence on oil-fired capacity, and replacement or rehabilitation of older, less efficient units;

To utilize the advantages and potential flexibility provided by development of regional electricity markets;

To reduce environmental impacts in the most cost-effective manner; and

To promote public consensus on plans to meet future electricity needs.

Favorable trends of electricity supply and price during the late 1950's and 1960's have ended. During those decades, construction of larger generating units reduced unit costs of production and lowered electricity prices through economies of scale. Demand for electricity in the United States grew steadily by about 8 percent a year, allowing utilities to safely predict the need for new plants.

More recently, slower population growth and economic uncertainty have made electricity demand growth more difficult to predict. Higher costs of capital and fuel changed price trends in the 1970's. Additional regulation for various governmental agencies at the Federal and State levels in response to safety issues and concern over powerplant emissions affected construction time and costs. As a result of all these factors, experts have argued for policy changes which can improve the Nation's electricity future.

The legislation also could help rationalize public environmental concerns. Congress has, for example, considered several proposals for reducing acid rain by toughening pollution control provisions, particularly affecting coal-fired plants. Through regional planning and increased utility interties, older coal-fired plants lacking adequate pollution control equipment could be placed in the reserve base. In addition, new coal-fired plants with effective pollution controls could be built to sell electricity in regional markets, spreading the costs of the plants over a wider base. No less significantly, a power plan open to public debate would force decisionmakers to weigh environmental benefits and costs against the need to build plants and the subsequent impact on prices. This would increase public support for utility plans to build plants and/or transmission lines in accordance with the plan, lessening the likelihood of expensive confrontation and rate base disagreements in the future. It would encourage the democratization of decisionmaking while spreading responsibility more fairly to State officials and regulators, as well as utilities.

There have been numerous studies of all of these problems and their implications for the provision of future electricity. For instance, the report of the Electricity Policy Project of the Department of Energy expressed concern about the ability and willingness of the electric power industry to undertake capital investments needed to meet future electricity demand. The report concluded that if electricity demand grows at a projected average rate of 3 percent a year, that utilities would need to build 438,000 megawatts of new capacity by the year 2000. This

is estimated to cost $1 trillion in constant dollars, or approximately $2.28 billion per 1,000 megawatts central station generating plant.

In its recent report, "A Perspective on Electric Utility Capacity Planning," the Congressional Research Service reviewed the cost effective potential for what some have called least-cost methods of meeting future demand for electricity, including cogeneration and small power production, conservation, solar generation and load management. The estimates prepared by CRS were not forecasts but a measure of potential contribution.

CRS concluded that these sources could account for 359,000 megawatts of equivalent power by 2000. CRS noted, however:

In considering the above contributions it appears that institutional inertia may prevent full realization of the cost-effective conservation and load management potential.

In a subsequent report, "Gold at the End of the Rainbow?", CRS concluded that higher yearly growth in demand for electricity would probably result in higher prices for electricity compared to the lower growth case. According to CRS, regions with a limited need to build new plants are more likely to experience stable or declining prices. Given the uncertainties surrounding predicted increases in demand, the best strategy would be to minimize risks and costs by developing a flexible electricity generating system able to respond to changing conditions. More specifically, CRS argues that it calls for building smaller plants, rehabilitating older plants, beefing up interties between systems and regions, developing rate structures that help control demand and that permit flexibility in meeting reliability requirements, and developing technologies that will permit utilities to achieve declining costs once again.

CRS concluded that a more tightly intertied utility network with an active spot market in power would achieve significant economies. Interruptible load and purchased bulk power from utilities with surpluses could, for example, provide the major reserves of the system. In order to achieve these goals, however, changes would have to be made in the way utilities operate and in Federal policies that form the framework within which utilities operate.

The National Governor Association's Electric Utility Task Force studied electric utility regulation and considered proposals for regulatory reform and other solutions to problems experienced by the electric industry and its ratepayers. In its review, the task force found that the primary problems stem from limits inherent in regulating a multistate delivery system through a State-by-State regulatory system. The task force concluded that the existing State-by-State system resulted in conflicts between States in establishing the need for facilities, siting them, and setting their rates.

Many States lack the ability and the scope needed to determine the accuracy of load forecasts and resource acquisition plans prepared by utilities. More importantly, States by themselves cannot adequately assess the potential efficiencies resulting from expanded electricity markets. Only through regional cooperation can States effectively implement policies affecting transmission access, the establishment of rate structures designed to encourage bulk power marketing, regional reserve sharing, and placement of plants lacking adequate pollution control equipment in the reserve base.

NGA concluded that a number of opportunities for improved efficiency and cost-savings were available from increased interconnections, pooling and wheeling. NGA worked closely with the National Association of Regulatory Utility Commissioners and Members of Congress to prepare the initial draft of the Regional Conservation and Electric Power Planning and Regulatory Coordination Act, which we are reintroducing today.

There follows a section-by-section summary of the major provisions of the legislation:

SECTION-BY-SECTION SUMMARY OF THE REGIONAL CONSERVATION AND ELECTRIC POWER PLANNING AND REGULATORY COORDINATION ACT OF 1985

Section 1. This section states the title of the bill, "The Regional Conservation and Electric Power Planning and Regulatory Coordination Act of 1985."

Section 2. This section consists of findings that explain the assumptions underlying the legislation.

Section 3. This section states the purpose of the legislation, namely, to permit and encourage two or more States to form compacts for the purpose of conservation and electric power planning and for other purposes and to delegate the authority to regulate certain wholesale electric rates from the Federal Energy Regulatory Commission [Commission], where they are presently regulated, to the States, upon the approval of a State plan for such regulation by the Commission.

Section 4. This section consists of definitions.

TITLE I

Section 101. Section 101 grants the consent of Congress to any two or more states to enter into multi-state compacts for the purposes, and under the conditions, set forth in Title I.

Section 102. Section 102 summarizes the purposes for which states may enter into multi-state compacts under the bill as described in detail in sections 104–106.

Section 103. This section describes the formation of the compacts and the manner of implementation of functions authorized under the legislation. The major provisions of this section are:

Any two or more states may form compacts authorized under the legislation, but membership in any compact must be by unanimous agreement of all states forming the compact;

Once formed, a compact may not be terminated for five years;

Each compact must form a compact governing agency (agency) to implement any of the functions permitted under the bill;

Each state shall have the same number of members of any such agency as any other member state and one member from each state must be a current public utility commissioner.

The federal laws that apply to the Federal Energy Regulatory Commission respecting disclosure of information, administrative procedure, meetings, contracts and other similar matters shall apply to these agencies unless the compact in which an agency is established determines that such application is inappropriate. In such an instance, the compact would be required to come up with other procedures to adequately protect the public interests protected by such federal laws;

Each agency is authorized to levy a fee not to exceed 0.1 mills per kilowatt hour on retail sales of electricity within the region covered by the compact in which the agency is established to fund its operations.

Section 104. Section 104 sets forth certain functions which a compact agency may implement prior to the adoption of a regional energy services plan. These functions are:

The development and implementation of rate standards to govern the ratemaking for certain costs incurred by electric utilities that are unrelated to conservation or electricity supply resources, including the recovery or amortization of the costs of finally abandoned powerplants;

The development and implementation of methodologies to evaluate the cost-effectiveness of resources, including conservation, load management, and central station powerplants;

Emergency outage and shortage plans for the compact region.

Full public involvement is required in the development of any standards, methodologies or plans authorized under the section.

In addition, this section spells out that the agency is not permitted to implement or require the implementation of any standard, methodology or plan except as agreed to by the compact in which the agency is established and except as consistent with law. Section 104 also specifies that the agencies authorized under this bill are not, by the terms of this section, authorized to directly regulate either wholesale or retain electric rates.

These requirements are intended to assure that regional agencies do not use the authority granted them under the legislation to directly regulate the rates for wholesale electricity sales regulated by the Federal Energy Regulatory Commission or to directly regulate retail electricity rates, unless the agency otherwise would have the authority to directly regulate such retail rates without the consent of Congress. However, this section is intended to authorize the establishment of ratemaking standards for costs unrelated to resource acquisition.

In addition these requirements are intended to avoid inconsistent directives by the agency and the Commission with respect to outage and shortage plans. Under section 202(g) of the Federal Power Act, the Commission is given certain, limited authority to impose requirements on electric utilities expecting power shortages. Regional agencies are required to exercise the authority granted them under section 104 of the bill in a

manner consistent with the authority of the Commission under section 202(g).

Finally, section 104 authorizes compact agencies to intervene before the Commission to advocate positions consistent with any standards, methodologies or plans developed under this section. Intervention is the way in which a regional agency could advocate and thereby influence the adoption of ratemaking standards in rates regulated by the Commission.

Section 105. This section of the bill authorizes the development by any compact agency of long-run plans to meet the total demand for electric energy services in the region covered by the compact. The agency is directed to assess the potential for conservation, load management, central station powerplants and other resources to meet such demand cost-effectively and to develop a plan to acquire resources on a cost-effective basis. Full public involvement is required in the development of the plan. The plan is required to be reviewed once every five years.

Section 106. Section 106 permits any regional compact agency to encourage electric utilities, customers and others in the region to acquire resources in accordance with the plan by a variety of means. The agency would be authorized to encourage such acquisition by:

Certifying the need for conservation programs, load management, powerplant and other resources;

Developing and implementing regional conservation programs including building codes, conservation standards, conservation financing, appliance and other rebate programs and any other programs to encourage acquisition of consumer conservation and consumer direct use of renewable resources;

Developing and implementing rate incentives to encourage utilities and others to acquire resources;

Developing and implementing programs and policies to encourage increased power pooling, transmission services and other inter-utility coordination and coordination between utilities and qualifying cogeneration and small power production facilities under Title II of the Public Utility Regulatory Policies Act of 1978, both within the region covered by the compact and between such region and utilities outside the region;

Developing programs and policies to encourage increased power imports and exports;

Developing and implementing a system of rate and other disincentives to discourage resource acquisition inconsistent with the plan.

Full public involvement is also specified in this section in the development of any of the means to encourage resource acquisition according to the plan.

Under Section 106 no compact agency would be permitted to implement or require the implementation of any means described in section 106 except as established in the compact and except as consistent with law. And no state or state regulatory authority is required to implement any such means unless it has agreed to do so by the compact. Section 106 also establishes that the agencies authorized under this bill are not, by the terms of this section, authorized to directly regulate wholesale electric rates regulated by the Commission or to directly regulate retail rates unless an agency otherwise would have the authority to directly regulate such retail rates without the consent of Congress.

This section is intended to enable an agency established under this title to have the tools to encourage acquisition in accordance with a plan adopted under Section 105, if the states that have formed the compact so agree. These tools may extend to the development of region-wide conservation programs to energize building and the markets affecting energy conservation so that more cost-effective conservation resources are acquired. The tools may include region-wide rate base treatment for resources that are part of a plan and region-wide rate structures designed to communicate the cost to utilities of building new resources that can be saved if consumers and customers conserve energy. They also include the development of programs to enable the transmission of power generated by cogeneration and small power production facilities to markets that may be more advantageous to these facilities. They include agency certification of need for conservation programs, powerplants and other resources.

Subsection (d) of Section 106 authorizes compact agencies to intervene in Commission proceedings to advocate positions consistent with a resource plan or means developed in Section 106. As under section 104, intervention is the way in which a regional agency could advocate and thereby influence the adoption of rate incentives and disincentives designed to encourage acquisition of resources consistent with a plan adopted under section 105.

Subsection (e) permits an agency to apply for an order from the Commission to compel the rendering of transmission services consistent with a plan by an electric utility. Any application for such transmission services significantly affecting an electric utility within the United States but outside the area covered by such plan shall be accompanied by a statement of concurrence with the provision of such transmission services by the Governor of a state or, where it exists, compact agency established pursuant to Section 103, in which such electric utility operates. Such application shall also be accompanied by a proposed arrangement for the recovery of costs which would be incurred by an electric utility in the implementation of any such order. Upon receipt of an application under this subsection, and after public notice and notice to each affected electric utility and opportunity for an evidentiary hearing, the Commission shall issue such order unless the Commission finds that the order would unreasonably impair the reliability of an electric utility affected by the order or would impair the ability of such an electric utility to render adequate service to its customers or consumers.

Section 107. This section consists of provisions establishing the judicial review of final compact agency actions and other matters.

Section 108. This section states that nothing in Title I of the legislation shall be construed to amend, modify or otherwise affect the provisions of the Pacific Northwest Electric Power Planning Act of 1980 or other Act of Congress in which Congress has given its consent to the formation of multi-state compacts, and to abridge or otherwise limit the authority granted to the Pacific Northwest Electric Power Planning Council by the 1980 Act.

TITLE II

Section 201. This section is a delegation to the states to regulate the rates for certain wholesale sales of electricity subject to the conditions established under this Title.

Section 202. This section permits any state regulatory authority to file a plan with the Federal Energy Regulatory Commission under which a state could regulate some or all of the rates for the sale of electricity from one electric utility to another provided that the retail sales of electricity of the purchasing utility are completely within the boundaries of such states.

Section 203. This section establishes certain requirements for the plan that states may file under Section 202

Section 204. This section requires the Commission to approve any plan filed under Section 202, within 180 days of its filing, unless the Commission finds that:

The state regulatory authority lacks the authority to regulate the wholesale rates proposed to be regulated by such authority in the plan submitted;

The state regulatory authority is not required by law to regulate such wholesale rates in a manner to avoid undue discrimination between such wholesale rates and retail rates that it regulates; or

The wholesale rate regulation proposed in the plan would likely have a significant, adverse impact on

(1) competition in electricity supply markets or

(2) benefits to consumers resulting from the operation of power pools and other interutility coordination subject to the Commission's jurisdiction.

Section 205. This section specifies that a state regulatory authority may file amendments to the plan submitted under Section 202.

Section 206. This section establishes the method of Commission review of a state's implementation of a plan submitted under Section 202.

Section 207. This section specifies that rehearing and court review of a Commission approval or disapproval of a plan shall be governed by Section 313 of the Federal Power Act.

Section 208. This section specifies that, for purposes of this Title, the term "electric utility" does not include the Tennessee Valley Authority or any of the Federal Power Marketing administrations. It also defines "state regulatory authority," for this title, to exclude municipalities.

TITLE III

Section 301. Section 301 is an amendment to the Federal Power Act to assure that Sections 211 and 212 of that Act do not apply to applications by a regional agency for an order for transmission services under Section 106(e) of this bill.●

THE REGIONAL POWER PLANNING AND REGULATORY COORDINATION ACT OF 1985

HON. JAMES M. JEFFORDS

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. JEFFORDS. Mr. Speaker, the Regional Power Planning and Regulatory Coordination Act of 1985 which I am introducing today with my colleagues enables regions of the country to assess the need for additional electricity and the most cost-effective way to meet that need. It provides a process by which potential electricity resources can be evaluated and a flexible least-cost approach to the future

supply of electricity can be achieved. By allowing States to join together into compacts for these purposes, the legislation provides a public forum for regional debate and agreement on meeting future electricity demand.

There is growing concern that under the present regulatory environment and with current utility trends, the industry will either fail to meet projected demand for electricity in the 1990's or will not meet this demand in the most cost-effective manner.

Governors, State regulatory commissioners, and Members of Congress have noted the limitations inherent in the ability of State government to effectively regulate utilities that cover multi-State areas. Electricity resources vary widely by region and must be assessed on a regional basis; this legislation gives State officials that capability, and allows them to look regionally at such strategies as the expanded bulk power marketing of electricity by those utilities with surpluses. They could also examine efficiencies that might be achieved through comprehensive strategies to promote efficiency investments, cogeneration, load management, reserve sharing and small scale electricity production.

Electricity experts and public officials in the Northeast-Midwest region are concerned about several key electricity trends and their impact on the region's economy: High electricity prices; cost overruns on plants under construction; need for future supply; and older plants that need replacement or refurbishment.

The region currently pays the highest electricity rates in the United States. For example in 1983 residential prices in major U.S. cities ranged from 6.49 cents/kWh in Indianapolis to 15.83 cents/kWh in New York City, compared to a U.S. average of 7.46 cents/kWh and a low of 1.6 cents in Seattle. Moreover, on an average, State electricity prices vary dramatically. In 1982 prices varied by 273 percent between New Jersey and Washington State.

The construction of 26 new nuclear powerplants has caused debilitating cost overruns and financial problems for the region. These plants represent 29,000 megawatts of generating capacity with an estimated completion cost of $67 billion. Putting those plants into the rate base could produce an estimated increase in electricity rates of 9 to 107 percent in the Northeast and 13 to 121 percent in the Midwest.

The increase in rates some utilities would need to recover such costs under current regulation have raised questions of possible financial insolvency for certain utilities and rapid price increases for consumers—what some have called dramatically the death spiral. Under this worst case scenario, higher cost electricity could result in decreased demand and, consequently, lower revenues for those very utilities that have increased their electricity capacity, and which need revenue to repay the debts they incurred by building new plants.

Currently, utilities which are not bringing new plants into generation are in better financial health than those expanding their capacity. Increasingly, utility officials are arriving at the conclusion that the financial risks of constructing new generating capacity greatly outweigh the benefits to the utility.

FUTURE ELECTRICITY NEEDS

Many energy experts project a need to increase electricity generating capacity by the year 2000 to meet rising demand and expanded economic growth. According to some projections, the region's utilities may need to build an additional 79,000 Megawatts of new capacity at an estimated cost of $180 billion in current dollars by the year 2000. In addition, the region has a significant number of older, less efficient generating units—66,000 megawatts will be over 35 years old by the year 2000 and could cost an additional $150 billion to replace.

The Federal Government long has recognized the economic importance of assuring adequate supplied of relatively low-cost electricity. It has sought to provide a regulatory framework designed to maintain a financially sound utility industry which is encouraged and rewarded for assuring adequate and reliable supplies of low-cost electricity. Now, Members of Congress, faced with troubling trends in the region's utility industry, need to reassess this Federal role and provide new tools to assure that adequate, reliable, low-cost electricity is available in the future.

Recent analyses by both the National Governors' Association and Congressional Research Service have concluded that a regional approach to utility issues could help States provide more efficiently for their future. For instance, expanded bulk power sales both within and among subregions could lower costs for both sellers and purchasers of electricity.

However, there is no structure or process by which regions can assess or take advantage of the benefits to be realized from a regional approach to electricity supply. Nor is there any way for States together to remove any of numerous barriers to a number of cost-effective electricity strategies.

ALTERNATE SOURCES OF ELECTRICITY

The Northeast-Midwest Institute recently completed a major research project on the desirability and feasibility of increasing Canadian imports of electricity as one strategy to moderate future electricity prices. The report of that project, "Trading in Power," also identified several other potential sources of least cost electricity, including bulk power sales between utilities in the region, expanded efficiency investments and development of small-scale renewable resources. Conservation, load management and passive solar could contribute up to 59,000 megawatts of power by 2000. Small scale hydro and cogeneration could account for an additional 3,000 megawatts. However, the report pointed out a number of barriers to the development of these resources: a lack of a marketing structure, transmission limitations, wheeling charges, regulatory disincentives, and the lack of a regional approach to address future supply issues.

The most pressing need is removal of impediments to regional electricity market competition. The Regional Power Planning and Regulatory Coordination Act of 1985 allows States to enter into compacts to evaluate these impediments and develop strategies for removing them. Regions would be given the tools to utilize short-term surpluses. They could identify and take advantage of increased diversity of electricity sources and flexibility. In the long term, they would move toward a more competitive market. This would enable these States and region to ensure a least cost supply of future electricity needed for long term economic growth.●

REGIONAL POWER PLANNING AND REGULATORY COORDINATION ACT OF 1985

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. GEJDENSON. Mr. Speaker, today I am pleased to join my distinguished colleagues Representatives VENTO and JEFFORDS in introducing the Regional Power Planning and Regulatory Coordination Act of 1985. I rise to urge my colleagues to support this legislation. This bill is a significant first step toward ensuring that in the future, our Nation's consumers will continue to pay a reasonable price for electricity.

The next energy crisis that this Nation faces will most likely be an electricity crisis. Ratepayers all across the country are experiencing the trauma of rate shock, the sudden skyrocket of electricity prices as expensive new powerplants come on line. Utilities and State regulators looking for new sources of electricity supply find they have nowhere to turn. Nuclear power has become incredibly expensive, with many plants lying half finished because of tremendous cost overruns and safety problems. Conventional coal generation has become much less attractive because of the problem of acid rain. Energy conservation has a great deal of potential, but

much of this potential lies untapped because of institutional barriers and ignorance. The utility industry and State regulators have been forced into a state of paralysis, unable to effectively plan for our Nation's electricity future.

The Regional Power Planning Act provides a structure for States to begin working together to address the electricity problem. The National Governors Association and the National Association of Regulatory Utility Commissioners have concluded that the current State-by-State system is an obstacle to obtaining the cheapest electricity possible. This legislation gives State officials the option to assess and plan for future electricity needs on a regional basis if they believe it is in their State's best interest. Through regional cooperation and planning the price of electricity in the future can be lowered.

My home State in particular faces an uncertain electricity future. Virtually all of Connecticut's electricity comes from oil and nuclear power, two of the most expensive sources of electricity. The future of nuclear power is in question and oil remains unattractive because of its expense and the instability of foreign sources of supply. Connecticut's electricity prices are much higher than the national average.

When the Millstone III nuclear powerplant comes on line the cost of electricity to Connecticut Light & Power ratepayers in my district could go up by as much as 25 percent. In May of this year the director of the New England Power Pool predicted that an electricity brownout could occur this summer if we have an extended period of extremely hot weather in New England. If we do not act decisively an electricity crisis could develop in Connecticut.

Regional power planning could help keep electricity prices down in Connecticut. Through a regional power organization Connecticut could take full advantage of inexpensive Canadian hydropower, energy conservation opportunities, small-scale hydropower, cogeneration, and other supply options.

Clearly something needs to be done about the electricity problem that is confronting Connecticut and the Nation. Our electricity rates and our economy depend on it. I think this bill is a step in the right direction.●

REGIONAL POWER PLANNING AND REGULATORY COORDINATION ACT OF 1985

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1985

● Mr. MARKEY. Mr. Speaker, I am pleased to join today with my distinguished colleagues, the gentleman from Minnesota [Mr. VENTO] and the gentleman from Vermont [Mr. JEFFORDS] in introducing the Regional Conservation and Electric Power Planning and Regulatory Coordination Act of 1985. The bill represents an important step in encouraging long-term planning to meet the need for electric power services at the lowest possible cost. I congratulate the electric utility task force of the National Governor's Association whose January 1983 report is the basis for this bill. The report concluded that the regionalization of certain regulatory functions, particularly planning, could stimulate the utilization of cost effective measures to meet the demand for electricity.

The legislation authorizes two or more States to enter into compacts to determine on a regional basis how to meet the demand for electricity in the compact area. The bill requires that a compact governing agency be established to implement the functions permitted under the bill. These functions include the development and implementation of regional rate standards for the ratemaking treatment of certain utility costs unrelated to resource acquisition, including the cost of abandoned powerplants. The bill also authorizes the participating States to develop emergency outage and shortage plans for the compact region.

The key feature of the bill, however, is the authority it gives to the compact States to develop long range plans to meet the total demand for electricity in the region covered by the compact. The compact agency is directed to develop plans based on an assessment of the potential for conservation, load management, central station powerplants and other resources to meet regional electricity demand on a cost-effective basis. Full public invovlement is required in the development of the plans.

This planning function is essential. Many States have been unable to assess the potential for conservation and other resources because of limited technical, financial, and staff resources at the State level. The bill we are introducing today would help to resolve these problems through regional councils which shall be funded in a manner determined in the compacts. Through each council, compact members will be able to work together to meet regional needs cost effectively. The bill will help the States increase the quality of data regarding resource planning, develop public support for long-range plans and encourage the development of an electricity conservation market.

The bill is especially important because the planning it encourages is required to give priority to the lowest cost sources of electric power. Effective conservation measures alone, including appliance standards, could produce energy savings reducing growth in peak summer demand by more than 40 percent. We cannot ignore this potential, especially with a price tag of $40 billion or more from abandoned and canceled powerplants threatening electricity consumers.

Finally, the bill is being introduced at the right time. Most areas of the country currently enjoy large electricity surpluses. But, these surpluses will not last forever. By planning today, we can head off future shortages with cost-effective sources of electricity. Without planning, we may be confronted in the near future with meeting such shortages in a crisis-like atmosphere. Wise decisionmaking is almost impossible under such conditions. By beginning today we can fully develop our most cost-effective measures, such as conservation, and eliminate the need to build many expensive central power stations. Importantly, by taking efforts to maximize cost-effective resources, we can be assured that more expensive resources, such as large Central powerplants, will be constructed only when essential. The bill we are introducing today is an important step upon which we must build a secure and cost-effective energy future.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, July 25, 1985, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

JULY 26

9:00 a.m.
Judiciary
Immigration and Refugee Policy Subcommittee
To hold hearings to examine certain immigration procedures to gain legal and expeditious entry into the United States by marrying U.S. citizens.
SD-226

JULY 29

10:00 a.m.
Energy and Natural Resources
To resume hearings on the nomination of Charles A. Trabandt, of Virginia, to be a Member of the Federal Energy Regulatory Commission, Department of Energy.
SD-366

Finance
Savings, Pensions and Investment Policy Subcommittee
To hold hearings to examine certain problems encountered by employers in the funding of retiree health benefits.
SD-215

Judiciary
To hold hearings on S. 1300, to provide for antitrust law violators to be subject to individual responsibility for treble the amount of damages attributable to their violations, and to assure fairness in the allocation and award of antitrust damages.
SD-226

1:30 p.m.
Finance
Health Subcommittee
To hold hearings to examine the causes of higher costs experienced by hospitals treating low-income patients.
SD-215

2:00 p.m.
* Environment and Public Works
Business meeting, to consider pending calendar business.
SD-406

JULY 30

9:30 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

10:00 a.m.
Environment and Public Works
Regional and Community Development Subcommittee
To resume hearings to review the programs and policies of the Tennessee Valley Authority.
SD-406

Foreign Relations
To hold hearings on pending treaties.
SD-419

Governmental Affairs
Civil Service, Post Office, and General Services Subcommittee
To hold hearings on S. 1440, to restrict smoking to designated areas in all U.S. Government buildings.
SD-342

Judiciary
To resume oversight hearings on private civil suits which have been filed under the Racketeer Influenced and Corrupt Organizations Act [RICO].
SD-226

Judiciary
Security and Terrorism Subcommittee
To hold hearings on S. 1373 and S. 1429, bills to authorize prosecution of terrorists and others who attack U.S. Government employees abroad.
SD-485

11:00 a.m.
Foreign Relations
Business meeting, to consider pending calendar business.
SD-419

2:00 p.m.
Environment and Public Works
Environmental Pollution Subcommittee
To hold hearings on S. 824, authorizing funds for programs of title I of the Marine Protection, Research, and Sanctuaries Act of 1972, and related measures.
SD-406

Judiciary
Juvenile Justice Subcommittee
To hold hearings on S. 985, to protect the rights of victims of child abuse.
SD-226

JULY 31

9:30 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Labor and Human Resources
To hold hearings to examine certain barriers to health care.
SD-430

Select on Intelligence
To hold closed hearings on counterintelligence.
SH-219

10:00 a.m.
Environment and Public Works
Transportation Subcommittee
To resume hearings on proposed legislation authorizing funds for the Federal Aid Highway Program.
SD-406

Foreign Relations
To hold hearings to reveiw current U.S. financing of foreign military exports.
SD-419

Judiciary
Criminal Law Subcommittee
To hold hearings on S. 1090, to eliminate the use of cable television and interstate telephone service for the transmission of obscene and indecent material.
SD-226

11:30 a.m.
Select on Intelligence
Closed briefing on worldwide intelligence matters.
SH-219

2:00 p.m.
Governmental Affairs
Oversight of Government Management Subcommittee
Business meeting, to mark up S. 992, to discontinue or modify certain requirements for agency reports to Congress, and S. 1134, to permit Federal agencies to impose monetary penalties on individuals or companies which submit certain false claims to the Government.
SD-342

Judiciary
To hold hearings on pending nominations.
SD-226

AUGUST 1

9:30 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

10:00 a.m.
Foreign Relations
To hold hearings on the Supplemental Extradition Treaty between the United States of America and the United Kingdom of Great Britain and Northern Ireland, with Annex (Treaty Doc. 99-8), signed at Washington, DC, on June 25, 1985.
SD-419

Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To hold joint hearings with the House Committee on Education and Labor to examine the scope of illiteracy.
SD-430

SEPTEMBER 5

10:00 a.m.
Commerce, Science, and Transportation
Communications Subcommittee
To hold hearings on competitiveness in the long-distance telephone markets.
SR-253

SEPTEMBER 11

10:00 a.m.
Select on Indian Affairs
To hold hearings on S. 1396, to settle unresolved claims relating to certain allotted Indian lands on the White Earth Indian Reservation in Minnesota.
SD-628

1:00 p.m.
Commerce, Science, and Transportation
Communications Subcommittee
To continue hearings on competitiveness in the long-distance telephone markets.
SD-253

SEPTEMBER 12

10:00 a.m.
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To hold hearings on proposed legislation authorizing funds for programs of the Higher Education Act.
SD-430

SEPTEMBER 17

10:00 a.m.
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume hearings and proposed legislation authorizing funds for programs of the Higher Education Act.
SD-430

SEPTEMBER 19

10:00 a.m.
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume hearings on proposed legislation authorizing funds for programs of the Higher Education Act.
SD-430

SEPTEMBER 24

10:00 a.m.
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To hold hearings on the problem of illiteracy in America.
SD-430

SEPTEMBER 26

10:00 a.m.
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume hearings on the problem of illiteracy in America.
SD-430

OCTOBER 1

11:00 a.m.
Veterans Affairs
To hold hearings to review the legislative priorities of the American Legion.
SD-106

CANCELLATIONS

JULY 25

9:30 a.m.
Environment and Public Works
Nuclear Regulation Subcommittee
To hold hearings on S. 445, to revise certain provisions regarding liability for nuclear incidents, and S. 1225, to compensate the public for injuries or damages suffered in the event of an accident involving nuclear activities undertaken by Nuclear Regulatory Commission licensees or Department of Energy contractors.
SD-406

11:00 a.m.
Foreign Relations
Business meeting, to consider the Protocol Amending the Interim Convention on Conservation of North Pacific Fur Seals Between the United States, Canada, Japan, and the Soviet Union (Treaty Doc. 99-5), signed at Washington, D.C., on October 12, 1984, and the nomination of Thomas M.T. Niles, of the District of Columbia, to be Ambassador to Canada.
SD-419

SENATE—*Thursday, July 25, 1985*

(Legislative day of Tuesday, July 16, 1985)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

They that wait upon the Lord shall renew their strength.—Isaiah 40:31.
